FEDERAL REGISTER

Vol. 81 Wednesday,

No. 81 April 27, 2016

Pages 24693–25322

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 81 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 870

RIN 3206–AM67

Federal Employees' Group Life Insurance Program: Court Orders Prior to July 22, 1998

AGENCY: U.S. Office of Personnel Management.

ACTION: Final rule.

SUMMARY: The Office of Personnel Management (OPM) is issuing this final regulation to adopt as final the interim final regulation published on December 4, 2012. The regulation implements section 8705 of title 5, United States Code regarding the effect of any court decree of divorce, annulment, or legal separation, or any court-approved property settlement agreement incident to any court decree of divorce, annulment, or legal separation (hereinafter ''court order'') where the court order expressly provides that an individual receive Federal Employee's Group Life Insurance (FEGLI) benefits. The regulations will allow court orders submitted to the appropriate Federal agency before July 22, 1998 to be effective for providing FEGLI benefits if the court order was received in the appropriate office before the insured Federal employee's or annuitant's death. This revision does not affect the current statutory limitation that court orders apply only when FEGLI benefits are based on insured individuals who died on or after July 22, 1998.

DATES: This rule is effective April 27, 2016.

FOR FURTHER INFORMATION CONTACT: Marguerite Martel, Senior Policy Analyst, at (202) 606–0004 or email: *marguerite.martel@opm.gov.*

SUPPLEMENTARY INFORMATION: Public Law 105–205, 112 Stat. 683, enacted July 22, 1998, amending section 8705 of title 5, United States Code, required benefits to be paid in accordance with the terms of a court order instead of the otherwise existing statutory order of precedence for payment of benefits under FEGLI. On October 8, 1999, OPM published a final regulation interpreting the law to mean that only those court orders received in the appropriate office after the date the law was enacted would be valid to name a FEGLI beneficiary. The regulation amended section 870.801(d)(2), of title 5, Code of Federal Regulations.

Based on *Pascavage* v. *Office of Personnel Management,* 773 F. Supp.2d 452 (D. Del. 2011), OPM is changing this regulation to provide FEGLI benefits based on court orders submitted to the appropriate Federal agency before July 22, 1998, so long as the court order was received in the appropriate office before the insured Federal employee's or annuitant's death. This change is consistent with the settlement agreement in this case, *Pascavage* v. *Office of Personnel Management,* C.A. No.: 09–276–LPS–MPT (D. Del. filed Aug. 6, 2012).[1] This revision does not affect the current statutory limitation that court orders apply only when FEGLI benefits are based on insured individuals who died on or after July 22, 1998. On December 4, 2012, OPM published an interim final regulation at 77 FR 71687. We received no comments on the interim final regulation. Therefore, OPM is adopting the interim final regulation with no changes.

Regulatory Impact Analysis

OPM has examined the impact of this rule as required by Executive Order 12866 (September 1993, Regulatory Planning and Review) and Executive Order 13563, which directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public, health, and safety effects, distributive impacts, and equity). A regulatory impact analysis must be prepared for major rules with economically significant effects of $100 million or more in any one year. This rule is not considered a major rule because OPM estimates there are relatively few court orders received by the appropriate office before July 22, 1998.

Paperwork Reduction Act

This document does not contain proposed information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13.

Regulatory Flexibility Act

I certify that these regulations will not have a significant economic impact on a substantial number of small entities because they will apply only to Federal employees, annuitants and their former spouses.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2010–1167]

Airworthiness Directives Legal Interpretation

AGENCY: Federal Aviation Administration, DOT.

ACTION: Airworthiness directives legal interpretation.

SUMMARY: The Federal Aviation Administration is issuing a legal interpretation on regulations applicable to airworthiness directives. This legal interpretation responds to questions asked by an Aviation Rulemaking Committee and is intended to resolve certain issues for the public.

[1] The settlement agreement has been preliminarily approved by the Court.

DATES: April 27, 2016.

FOR FURTHER INFORMATION CONTACT: Douglas Anderson, Manager of Aircraft Certification and Space Law Branch, Office of the Chief Counsel, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: 202–267–3073.

SUPPLEMENTARY INFORMATION:

The Request

This legal interpretation addresses several regulations in Title 14 of the Code of Federal Regulation (14 CFR) part 39 applicable to airworthiness directives. It responds to questions asked by the Federal Aviation Administration's (FAA) Organization/Procedures Working Group of the Airworthiness Directive Implementation Aviation Rulemaking Committee (AD ARC). The Working Group (WG) requested the agency to interpret several provisions in part 39 to resolve issues that have been debated within the WG. These issues partly result from amendments made to part 39 in 2002. *See Airworthiness Directives,* 67 FR 47998 (Jul. 22, 2002). The WG asked four questions:

1. What is the extent of an aircraft operator's continuing obligation following the issuance of an airworthiness directive (AD)?

2. What is the extent of an aircraft operator's obligation to accomplish actions referenced in an AD beyond those actions necessary to resolve the unsafe condition specifically identified in an AD?

3. What is the meaning of the term ''applicable'' in AD 2007–07–02?

4. What is the extent of an aircraft operator's responsibilities when an AD requires an action that cannot be accomplished on a particular aircraft?

The FAA published for public comment a proposed legal interpretation answering these questions. *Proposed Airworthiness Directive Legal Interpretation,* 76 FR 20898 (Apr. 14, 2011) (Proposed Legal Interpretation).[1] The FAA received numerous comments expressing concern with the FAA's proposed interpretation. Most comments focus on the FAA's responses to questions 1 and 4.

As an initial matter, it is important to emphasize that each AD is unique, and its terms control. Thus, this legal interpretation only addresses the matters raised by the AD ARC and is limited to an interpretation of part 39 and general agency policy governing ADs.

Legal Interpretation, Summary of Comments and the FAA's Responses

Some of the commenters suggested that this interpretation should change the existing part 39 regulations or FAA internal procedures with respect to how ADs are prepared and issued. The FAA rejects those suggestions because a regulation cannot be changed by a legal interpretation; rulemaking is the proper method for amending a regulation.

Some of the comments raised policy considerations, which provide valuable information to the FAA, but those policy considerations cannot change the present wording of the regulations, and are best taken into account during rulemaking. A legal interpretation only may explain the meaning of the words that are in the existing regulation; it may not create new policy. Set forth below is a summary and response to comments as to the proper interpretation of existing provisions of part 39.

Question 1: What is the extent of an aircraft operator's continuing obligation following the issuance of an airworthiness directive (AD)?

Answer: The FAA interprets §§ 39.7 and 39.9 to mean that operators have an ongoing obligation to ensure that the modification mandated by an AD is maintained.

For changes to AD-mandated modifications and for deviations from ADs that do not have a terminating action, the operator must obtain approval for an alternative means of compliance (AMOC) with the AD. The FAA recognizes that in some cases this may impose a burden on operators to obtain AMOC approvals for activities that would otherwise be considered normal maintenance. The FAA may allow, on an AD-by-AD basis, reversion to part 43 maintenance, with airworthiness limitations if appropriate to prevent operators from reintroducing unsafe conditions.

Summary of Comments Received

Some commenters contended that the words of the regulation must be given their plain meaning and that the proposed interpretation is not consistent with the regulatory text. Section 39.9 provides, ''If the requirements of an airworthiness directive have not been met, you violate § 39.7 each time you operate the aircraft or use the product.'' Some commenters suggested that this means that once the requirements of the AD are met, the action has been taken to resolve the unsafe condition and the AD is, therefore, no longer applicable. Indeed, some commenters further contended that after the AD's requirements have been met, it is likely that the product will be in a new type design that is different from the type design covered under the AD, and therefore, the product now falls out of the AD's applicability. While some commenters contended that § 39.9 contains no continuing obligation to maintain an AD-mandated condition, other commenters suggested that the standard maintenance practices under other parts should then control. A significant number of the comments objected to maintaining an AD-mandated configuration in perpetuity without any allowance for or consideration of normal maintenance, alterations, and design changes properly performed and approved in accordance with parts 21 and 43.

FAA's Response to Comments

Under §§ 39.7 and 39.9, operators must comply with the requirements of applicable ADs and must operate aircraft in accordance with all applicable ADs. Section 39.7 prohibits the operation of a product that fails to meet AD requirements. Section 39.9 imposes a continuing obligation to maintain compliance with an AD by establishing a separate violation for each time an aircraft is operated or a product is used that fails to meet AD requirements. When these sections are read together in the context of part 39, an AD requires that products be operated free of any identified unsafe condition. The FAA issues ADs not only to require operators to accomplish particular actions listed in the AD, but also to ensure that, when products are operated, they are free of identified unsafe conditions. It is important that once the unsafe condition is corrected as required by an AD, the unsafe condition not be reintroduced. Even if the configuration of the airplane has changed to comply with the AD, it does not mean that the AD no longer applies.

There are two main categories of ADs issued by the FAA: (1) Ongoing inspection and/or maintenance requirements that address a known unsafe condition or an unsafe condition likely to exist; and (2) ADs that require modifications, which may be ''terminating actions'' for ongoing requirements, and which remove the unsafe condition. Sections 39.7 and 39.9 impose a continuing obligation to comply with both types of AD requirements.

The comments appear to manifest confusion regarding the second type of AD and specifically the use of the term ''terminating action'' in an AD. While

[1] In response to several requests, the FAA extended the comment period until June 30, 2011. 76 FR 30040 (May 24, 2011).

how that term is used in an individual AD controls, general guidance of the FAA's general use of such term follows. Terminating action ADs allow or direct operators to perform a maintenance action that removes the unsafe condition from the affected aircraft and eliminates the need for the AD's inspection requirements. One example of a terminating action is the removal and replacement of a defective part that had been subject to AD-mandated repetitive inspections. After a ''terminating action,'' the resulting configuration constitutes an FAA-approved type design which must be maintained as required by §§ 39.7 and 39.9. This configuration must also be maintained in order for the aircraft to be airworthy.[2]

Terminating actions fall into two broad categories—those that either (1) correct whatever defect kept the product from conforming to an approved type design; or (2) accomplish a required change in type design where the FAA has determined that the original type design does not comply with the applicable airworthiness standards. In both cases, the post-AD configuration meets type certification requirements and renders the aircraft in a condition for safe operation. An aircraft operator must maintain that resulting configuration, and may not change it to any other configuration that does not comply either with the AD or with an approved AMOC to the AD.

For ADs mandating modifications where the AD requires no further action after modification, the operator may perform standard maintenance practices on that new configuration, associated with maintaining the fleet, which would not change the required modification, and may do so without AMOC approval. Any change from the mandated modification, however, requires FAA approval of an AMOC.[3]

When an unsafe condition is eliminated in production before the FAA issues the AD, the FAA limits the applicability of the AD requirements to exclude those newly produced aircraft. Those new aircraft resolve the unsafe condition by having appropriate modifications incorporated into their type design during production and initial airworthiness certification. Continued compliance with the type design, inspection, and maintenance requirements under parts 21 and 43 for that product should ensure that operators maintain the product's condition for safe operation. In contrast, when the FAA issues an AD, it is because the agency determined that regulatory requirements have not effectively prevented an unsafe condition of the affected products. Therefore, § 39.7 requires that, when a product is operated, it must meet the requirements of all applicable ADs including any ongoing mandated inspection and maintenance requirements that may override general part 43 maintenance practices.

Question 2: What is the extent of an aircraft operator's obligation to accomplish actions referenced in an AD beyond those actions necessary to resolve the unsafe condition specifically identified in an AD?

Answer: An AD may require more actions than correcting the specific unsafe condition. These may include actions reasonably related to resolving or preventing the unsafe condition. Thus, an aircraft operator has an obligation to accomplish all actions required by an AD including those beyond the actions necessary to resolve the unsafe condition specifically identified in an AD.

Summary of Comments Received

Some commenters argued that the FAA's interpretation is not consistent with the regulatory text because by its terms § 39.11 is limited to actions to resolve only the ''unsafe condition.'' According to such commenters, if an action required by the AD does not directly affect the unsafe condition, those actions are over-prescriptive and outside the scope of the FAA's authority.

Other commenters take the opposite view. As Airbus, a design approval holder (DAH) noted, operators often request complete sets of instructions for preparation, procedures, test, and closing up. Additionally, DAH-determined tools, methods, proceedings, materials, and instructions to be used for accomplishing a service instruction for continued airworthiness are part of the type design under § 21.31.

FAA's Response to Comments

The FAA's interpretation is consistent with Title 49 of United States Code, Section 44701, which establishes the FAA's broad authority to issue regulations in the interest of aviation safety and the FAA issues ADs under such authority. In addition, § 39.11 of the regulations provides:

§ 39.11 *What actions do airworthiness directives require? Airworthiness directives* specify inspections you must carry out, conditions and limitations you must comply with, and any actions you must take to resolve an unsafe condition (emphasis added).

When describing the types of actions required by an AD, which is a final rule, § 39.11 does not limit the agency's broad statutory authority. AD requirements are imposed by the language of the AD itself and not by § 39.11. Thus, an AD may require more actions than simply correcting the specific unsafe condition by, for example, requiring certain continuing maintenance actions to prevent or detect the unsafe condition in the future.

In developing an AD, the FAA determines the range of actions that are reasonably related to and further the interest of aviation safety.[4] For example, service information frequently includes instructions for accessing the area to be worked on to address the unsafe condition. Because these access instructions are reasonably related to addressing the unsafe condition, the FAA has the authority to mandate such instructions by AD.

The rulemaking process by which individual ADs are adopted provides the public with an opportunity to identify and express concern with potentially overly prescriptive requirements. In addition, each AD contains a provision allowing for approval of an AMOC, which allows an operator to address an unsafe condition in a manner approved by the FAA.

Question 3: What is the meaning of the term ''applicable'' in AD 2007–07–02?[5]

Answer: The FAA interprets ''applicable'' to limit the required actions to those that apply to a particular aircraft under the specific conditions found. The use of ''applicable'' does not permit an operator to decide which actions are necessary to correct the unsafe condition.

Summary of Comments Received

One commenter contended there was no ambiguity in the subject AD because

[2] Any operation of an unairworthy aircraft is subject to enforcement action under Part 91.

[3] Parts 21 and 43 also prohibit the reintroduction of an unsafe condition.

[4] The FAA has ''broad authority to require whatever types of corrective actions we determine to be most effective in addressing identified unsafe conditions. This includes inspections, repairs, modifications, operating limitations, airworthiness limitations, and maintenance program requirements.'' *Airworthiness Directives,* 67 FR 47998–01 (Jul. 22, 2002). The FAA issues ADs under the Administrative Procedure Act (APA); therefore, if the actions required by an AD are reasonably related to resolution of the unsafe condition, the FAA may mandate them. 5 U.S.C.A. § 551 *et seq.*

[5] *AD 2007–07–02* paragraph (f) states in pertinent part that operators must ''do[] all the applicable actions specified in the Accomplishment Instructions of the applicable service bulletin specified in Table 1 of this AD.''.

the SB specifically list the fleets affected, and which steps are applicable based on several different configurations of various aircraft. Therefore, the commenter concluded there is no need to include the word ''applicable'' to exclude those products for which the requirements clearly do not apply.

ARSA commented that under part 39 the FAA cannot make anything ''applicable'' that is not directly related to the unsafe condition and specified actions must be limited to those that directly address the unsafe condition. In its view, the FAA's interpretation mandates accomplishing all actions, whether or not necessary to correcting the unsafe condition, which is contrary to part 39.

FAA's Response to Comments

The FAA intends ''applicable'' to have the same meaning in both places in paragraph (f) of *AD 2007–07–02.* The first usage limits the required actions to those that apply to a particular aircraft under the specific conditions found; it does not permit an operator to decide which actions are necessary and which are unnecessary to correct the unsafe condition.

The second usage references Table 1 in the AD that identifies the model of aircraft to which each service bulletin applies. The ''applicable service bulletin'' means the service bulletin that applies to each corresponding aircraft model, as indicated in Table 1 of the AD. Similarly, ''all the applicable actions'' specified in each applicable service bulletin are those actions that are identified as applying to a particular aircraft. ''Applicable'' is a necessary qualifier in this context for two reasons: (1) In many ADs, the referenced service bulletins specify different actions for different aircraft configurations, typically identified as ''Group 1,'' ''Group 2,'' etc.; (2) in many ADs, the referenced service bulletins specify different actions depending on conditions found during performance of previous steps in the instructions (*e.g.,* if a crack is smaller than a specified size, repair in accordance with the Structural Repair Manual; if larger, repair in accordance with a method approved by the Aircraft Certification Office). The term ''applicable'' limits the AD's requirements to only those that are specified in the service bulletin for the configuration and conditions of a particular aircraft. In this case, the word ''all'' means that every applicable action must be accomplished.

Although this response applies specifically to AD 2007–07–02, this general principle also applies to uses of the term ''applicable'' in other ADs. The FAA promulgates ADs with specific standards to directly address the identified unsafe condition. As exemplified by AD 2007–07–02, ADs often require many different actions for various models and aircraft configurations. Because of those complexities, mandating AD actions without incorporating by reference the manufacturer's service bulletin that may contain ''normal'' part 43 maintenance actions becomes impracticable or may interject unnecessary complexities or inconsistencies that adversely affect performance of the necessary corrective actions.

Question 4: What is the extent of an aircraft operator's responsibilities when an AD requires an action that cannot be accomplished on a particular aircraft?

Answer: Sections 39.15 and 39.17 require ADs to apply to a specific product, even if the product has been changed through component removal or replacement or other modification. An operator who cannot comply with the specific requirements of an AD must request approval of an AMOC from the FAA. The operator must obtain an AMOC approval even if the affected component has been removed from the aircraft, rendering compliance with the specific requirements of the AD impossible. The AMOC process allows the FAA to determine whether the unsafe condition has been eliminated when an operator removes a component addressed in an AD and replaces it with a different component.

Summary of Comments

Some commenters stated the FAA's interpretation is either wrong because when the AD pertains to a specific part or component that has since been legally removed or pertains to a part or such that is not installed on the aircraft, the AD no longer applies, or represents a change from past practice or guidance.

FAA Response to Comments

If a change to a product makes it impossible to comply with the requirements of an AD, then the operator must request an AMOC approval from the FAA. Sections 39.15 and 39.17 directly answer this issue. Section 39.15 provides that an AD applies to each product identified in the AD, even if an individual product has been changed by modifying, altering, or repairing it in the area addressed by the AD. Section 39.17 requires that if a change in a product affects an operator's ability to accomplish the actions required by the AD in any way, the operator must request FAA approval of an AMOC. Together these sections require an operator who cannot comply with the specific requirements of an AD to request FAA approval of an AMOC. The operator must obtain an AMOC approval even if the affected product has been removed from the aircraft, rendering compliance with the specific requirements of the AD impossible. The AMOC process allows the FAA to determine whether the unsafe condition has been eliminated when an operator removes a component to which an AD applies and replaces it with a different component.

This approach was clearly specified in the FAA's part 39 rulemaking in 2002. *See Airworthiness Directives,* 67 FR 47998 (''Specifically, FAA is adding to part 39 the language explaining that ADs apply even if products have been modified, altered, or repaired in the area addressed by the directive.''). The 2002 rulemaking did not introduce any new regulatory requirements; rather, the FAA simply codified in part 39 provisions currently found in ADs. *Id.* at 47999. If a change in a product affects one's ability to comply with the AD, the person operating the aircraft or using the product must ask the FAA's permission to use an AMOC, and the request must either show that the change eliminated the unsafe condition or include the specific actions proposed. *Id.* at 48000.

This response was coordinated with the Aircraft Maintenance Division of the Flight Standards Service and the Design, Manufacturing and Airworthiness Division of the Aircraft Certification Service.

Issued in Washington, DC, on April 19, 2016.

Lorelei Peter,

Assistant Chief Counsel for Regulations.

RIN 2120–AA64

Airworthiness Directives; Pratt & Whitney Division Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain

Pratt & Whitney Division (PW) PW4000–94 inch and PW4000–100 inch model turbofan engines. This AD was prompted by a report of a crack found in the high-pressure compressor (HPC) 10th stage disk. This AD requires performing an ultrasonic inspection (USI) or an eddy current inspection (ECI) of the HPC 10th stage disk. We are issuing this AD to prevent failure of the HPC 10th stage disk, uncontained disk release, damage to the engine, and damage to the airplane.

DATES: This AD is effective June 1, 2016.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of June 1, 2016.

ADDRESSES: For service information identified in this final rule, contact Pratt & Whitney Division, 400 Main St., East Hartford, CT 06108; phone: 860 565–8770; fax: 860 565–4503. You may view this service information at the FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA. For information on the availability of this material at the FAA, call (781) 238–7125. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–4474.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–4474; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Katheryn Malatek, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7747; fax: 781–238–7199; email: *katheryn.malatek@faa.gov*.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain PW PW4000–94 inch turbofan engines with HPC 10th stage disk, part number (P/N) 51H710 or 53H976–06, installed and certain PW4000–100 inch turbofan engines with HPC 10th stage disk, P/N 53H976–06, installed. The NPRM published in the **Federal Register** on December 9, 2015 (80 FR 76400). The NPRM was prompted by a report of a crack found in the HPC 10th stage disk. The root cause of the crack was a manual polishing procedure, previously used during manufacture, that caused surface scratches on the disk. The NPRM proposed to require a USI or ECI of the HPC 10th stage disk. We are issuing this AD to prevent failure of the HPC 10th stage disk, which could lead to an uncontained disk release, damage to the engine, and damage to the airplane.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the NPRM (80 FR 76400, December 9, 2015) and the FAA's response to each comment.

Support for the NPRM

The Boeing Company and United Airlines expressed support for the NPRM (80 FR 76400, December 9, 2015).

Request To Use ECI as Follow-on to USI

American Airlines requested that we revise Compliance paragraph (e) of this AD to add a statement that the ECI can be used to confirm the presence of a crack if a USI is initially performed and the ECI is the final authority on whether or not a crack is present on the disk.

We agree. We revised Compliance paragraph (e) of this AD to allow a follow-on ECI.

Request To Allow Disk Replacement Repairs

Atlas Air requested that we revise the Compliance paragraph (e) of this AD to allow use of disk replacement repairs per the PW PW4000–94/100 Clean, Inspect, Repair (CIR) Manual Part No. 51A357, Section 72–35–10, Repair 07.

We disagree. This AD requires removal of the 10th stage disk if it fails inspection. There are no FAA-approved repairs allowed on the 10th stage disk. The previously approved PW4000–94/100 CIR Manual Part No. 51A357, Section 72–35–07, Repair 04 to the drum rotor, replaces the disk, resulting in a part eligible for installation. We did not change this AD.

Request To Allow ECI at Overhaul

Air India Limited requested that Compliance paragraph (e) of this AD allow an ECI when the HPC is ''overhauled'' rather than when it is ''removed from the engine.'' Air India Limited indicated that ''overhauled'' is clearer than ''removed from the engine''.

We disagree. The intent of this AD is to inspect the 10th stage disk at exposure. The phrase, ''Whenever the HPC front drum rotor is removed from the engine . . .'' clearly describes the appropriate level of exposure for performing the ECI. We did not change this AD.

Request To Waive Repeat USI

Air India Limited requested that we revise Compliance paragraph (e) of this AD to indicate that a repeat USI should be waived to reduce the maintenance burden if the low-pressure turbine (LPT) is removed in less than 100 hours since the last USI.

We disagree. Our safety risk assessment assumed that a USI is performed whenever the high-pressure turbine (HPT) or LPT is removed from the engine and an ECI is performed whenever the HPC front drum rotor disk assembly is removed from the engine. We determined the inspection interval in the Compliance paragraph (e) of this AD provides an acceptable level of safety. We did not change this AD.

Request To Remove Compliance Statement

FedEx requested that we revise Compliance paragraph (e) of this AD to remove the statement, ''Comply with this AD within the compliance times specified, unless already done.'' FedEx stated that there are no compliance times specified and the compliance requires a repetitive inspection, so the statement does not apply.

We disagree. The statement ''. . . unless already done'' allows an operator who has performed an initial inspection before the effective date of the AD, but has not yet returned the part to service, to take credit for that action. While there is no calendar or cyclic time given, the requirements of this AD must be met when the HPT, LPT, or HPC front drum rotor disk assembly is removed from the engine. We did not change this AD.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD with the changes described previously. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (80 FR 76400, December 9, 2015) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already

proposed in the NPRM (80 FR 76400, December 9, 2015).

We also determined that these changes will not increase the economic burden on any operator or increase the scope of this AD.

Related Service Information Under 1 CFR Part 51

We reviewed PW Alert Service Bulletin (ASB) PW4G–100–A72–255, dated August 31, 2015 and PW ASB PW4ENG A72–833, dated August 20, 2015. The ASBs provide lists of affected HPC disks and describe procedures for USI and ECI of the HPC 10th stage disk. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

We estimate that this AD affects 763 engines installed on airplanes of U.S. registry. We also estimate that it would take about 12 hours per engine to do the inspection. The average labor rate is $85 per hour. Based on these figures, we estimate the cost of this AD on U.S. operators to be $778,260.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–08–09 Pratt & Whitney Division: Amendment 39–18485; FAA–2015–4474; Directorate Identifier 2015–NE–34–AD.

(a) Effective Date

This AD is effective June 1, 2016.

(b) Affected ADs

None.

(c) Applicability

(1) This AD applies to all Pratt & Whitney Division (PW) PW4050, PW4052, PW4056, PW4060, PW4060A, PW4060C, PW4062, PW4062A, PW4152, PW4156, PW4156A, PW4158, PW4160, PW4460, PW4462, and PW4650 turbofan engines, including models with a ''-3'' suffix, with one of the following installed:

(i) High-pressure compressor (HPC) 10th stage disk, part number (P/N) 51H710, with a serial number (S/N) listed in Table 1 of PW Alert Service Bulletin (ASB) PW4ENG A72–833, dated August 20, 2015; or

(ii) HPC 10th stage disk, P/N 53H976–06, with an S/N listed in Table 2 of PW ASB PW4ENG A72–833, dated August 20, 2015.

(2) This AD also applies to all PW PW4164, PW4168, PW4168A, PW4164C, PW4164C/B, PW4170, PW4168A–1D, PW4168–1D, PW4164–1D, PW4164C–1D, and PW4164C/B–1D turbofan engines with an HPC 10th stage disk, P/N 53H976–06, with an S/N listed Table 1 of PW ASB PW4G–100–A72–255, dated August 31, 2015, installed.

(d) Unsafe Condition

This AD was prompted by a report of a crack found in the HPC 10th stage disk. We are issuing this AD to prevent failure of the HPC 10th stage disk, uncontained disk release, damage to the engine, and damage to the airplane.

(e) Compliance

Comply with this AD within the compliance times specified, unless already done.

(1) After the effective date of this AD, whenever the high-pressure turbine (HPT) or low-pressure turbine (LPT) is removed from the engine, perform an ultrasonic inspection (USI) of the HPC 10th stage disk for cracks. If the HPC 10th stage disk fails the USI, perform a follow-on eddy current inspection (ECI) or remove the disk from service and replace with a part eligible for installation.

(2) After the effective date of this AD, whenever the HPC front drum rotor disk assembly is removed from the engine, perform an ECI of the HPC 10th stage disk for cracks. Remove from service any HPC 10th stage disk that fails inspection and replace with a part eligible for installation. A USI as required by paragraph (e)(1) of this AD is not required if an ECI is performed.

(f) Alternative Methods of Compliance (AMOCs)

The Manager, Engine Certification Office, FAA, may approve AMOCs for this AD. Use the procedures found in 14 CFR 39.19 to make your request. You may email your request to: *ANE–AD–AMOC@faa.gov.*

(g) Related Information

For more information about this AD, contact Katheryn Malatek, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7747; fax: 781–238–7199; email: *katheryn.malatek@faa.gov.*

(h) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Pratt & Whitney (PW) Alert Service Bulletin (ASB) PW4G–100–A72–255, dated August 31, 2015.

(ii) PW ASB PW4ENG A72–833, dated August 20, 2015.

(3) For PW service information identified in this AD, contact Pratt & Whitney Division, 400 Main St., East Hartford, CT 06108; phone: 860–565–8770; fax: 860–565–4503.

(4) You may view this service information at FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA. For information on the availability of this material at the FAA, call 781–238–7125.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call

202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued in Burlington, Massachusetts, on April 7, 2016.

Colleen M. D'Alessandro,

Manager, Engine & Propeller Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. FAA–2015–4344; Directorate Identifier 2015–NE–32–AD; Amendment 39–18486; AD 2016–08–10]

RIN 2120–AA64

Airworthiness Directives; General Electric Company Turbofan Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for all General Electric Company (GE) CF6–80C2A1, CF6–80C2A2, CF6–80C2A3, CF6–80C2A5, CF6–80C2A5F, CF6–80C2A8, CF6–80C2B1, CF6–80C2B1F, CF6–80C2B1F1, CF6–80C2B1F2, CF6–80C2B2, CF6–80C2B2F, CF6–80C2B3F, CF6–80C2B4, CF6–80C2B4F, CF6–80C2B5F, CF6–80C2B6, CF6–80C2B6F, CF6–80C2B6FA, CF6–80C2B7F, CF6–80C2B8F, CF6–80C2D1F, CF6–80C2L1F, CF6–80C2K1F and CF6–80E1A1, CF6–80E1A2, CF6–80E1A3, CF6–80E1A4, and CF6–80E1A4/B turbofan engines. This AD was prompted by reports of a burn-through of the accessory heat shield during an engine fire, propagating the fire into the accessory compartment and igniting additional flammable fuel source. This AD requires replacing the accessory heat shield assembly. We are issuing this AD to prevent fires from propagating into the accessory compartment, resulting in an uncontrolled engine fire, and damage to the airplane.

DATES: This AD is effective June 1, 2016.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of June 1, 2016.

ADDRESSES: For service information identified in this final rule, contact General Electric Company, GE Aviation, Room 285, 1 Neumann Way, Cincinnati, OH 45215; phone: 513–552–3272; email: *aviation.fleetsupport@ge.com.* You may view this service information at the FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA. For information on the availability of this material at the FAA, call 781–238–7125. It is also available on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–4344.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–4344; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Herman Mak, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7147; fax: 781–238–7199; email: *herman.mak@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to GE CF6–80C2A1, CF6–80C2A2, CF6–80C2A3, CF6–80C2A5, CF6–80C2A5F, CF6–80C2A8, CF6–80C2B1, CF6–80C2B1F, CF6–80C2B1F1, CF6–80C2B1F2, CF6–80C2B2, CF6–80C2B2F, CF6–80C2B3F, CF6–80C2B4, CF6–80C2B4F, CF6–80C2B5F, CF6–80C2B6, CF6–80C2B6F, CF6–80C2B6FA, CF6–80C2B7F, CF6–80C2B8F, CF6–80C2D1F, CF6–80C2L1F, and CF6–80C2K1F turbofan engines. This AD that would also apply to CF6–80E1A1, CF6–80E1A2, CF6–80E1A3, CF6–80E1A4, and CF6–80E1A4/B turbofan engines. The NPRM published in the **Federal Register** on December 7, 2015 (80 FR 75952). The NPRM was prompted by reports of a burn-through of the accessory heat shield during an engine fire leading to an accessory compartment fire. A fire burns through the accessory heat shield and ignites the integrated drive generator (IDG) and main fuel pump, which supports further combustion. The existing accessory heat shield assembly leaves a large area above the sensitive accessories, such as the IDG and the main fuel pump, without adequate protection. A total of three burn-through events have occurred. The NPRM proposed to require replacing the accessory heat shield assembly. We are issuing this AD to prevent an uncontrolled engine fire, and damage to the airplane.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the NPRM (80 FR 75952, December 7, 2015) and the FAA's response to each comment.

Support for the NPRM (80 FR 75952, December 7, 2015)

The Boeing Company and the National Transportation Safety Board expressed support for the NPRM (80 FR 75952, December 7, 2015).

Revision to Service Information

We revised the Discussion section and Applicability paragraph (e) of this AD to include all the GE CF6–80C2 and CF6–80E1 turbofan engine models.

Request To Change Summary

GE requested that we revise the Summary paragraph of this AD to correct the number of events and clarify the event description.

We agree. Only three of the originally specified five events resulted in heat shield burn-throughs. We revised the Summary paragraph of this AD to correct the number of events and clarify the event description.

Request To Revise the Other Related Service Information Paragraph

GE requested that we revise the Other Related Service Information paragraph of this AD to remove GE Service Bulletin (SB) CF6–80C2 S/B 72–1523, dated September 22, 2015. This SB only applies to the military variant of the engine.

We disagree. The military variant of the engine is also certified by the FAA. We did not change this AD.

Request To Revise the Costs of Compliance

GE, KLM Royal Dutch Airlines (KLM), All Nippon Airways (ANA), and Federal Express (FedEx) requested that we revise the Costs of Compliance paragraph of this AD to correct the parts cost used in the calculations.

We agree. We considered the costs of all the parts needed to comply with this AD and revised the costs per engine to $14,207 and the total cost to U.S. operators to $13,680,920.

Request To Change Applicability

KLM requested that we exclude GE CF6–80E1 engines from the Applicability paragraph of this AD. KLM reasoned that the NTSB safety recommendation did not address GE CF6–80E1 engines and CF6–80E1 engines have not experienced any sump fires to date.

We disagree. Although the NTSB did not address GE CF6–80E1 engines, the designs of the GE CF6–80C2 and CF6–80E1 engines are substantially similar. Therefore, the unsafe condition addressed by this AD is likely to exist or develop on the GE CF6–80E1 engines. We did not change this AD.

Request To Change Compliance

GE requests that the following part numbers (P/Ns) be removed from Table 1 of GE SB 72–1520: P/N 2022M47G01, P/N 2022M81P01, P/N 2022M85G01, and P/N 2023M20G01. These P/Ns are used only on GE CF6–80C2B6FA models, a military application, and contain a different heat shield design.

We disagree. The specified P/Ns are not listed in Table 1 of GE SB 72–1520 and therefore this comment is not applicable. We did not change this AD.

Request To Change Definition

GE, United Airlines, KLM, Lufthansa, Lufthansa Cargo, Lufthansa Technik, and FedEx requested that we provide a more accurate description of flange separation and exclude certain situations from the definition of a shop visit. The commenters reasoned that this would provide clarity and reduce the undue economic and operational burden of complying with this AD earlier than necessary.

We agree. We revised the Definition paragraph of this AD to clarify the description of flange separation and include specific conditions that do not qualify as shop visits.

Request To Delay the Effective Date

GE and Delta Air Lines (Delta) requested that we delay the effective date of this AD. GE reasoned that the revised service bulletin addressing the lack of repair instructions for accessory heat shield assembly, P/N 1313M94G09, will not be available until after the expected effective date of this AD.

We disagree. The current effective date of this AD is needed to address the unsafe condition for the affected fleet. Any party may make a request for an Alternative Method of Compliance (AMOC) to this AD using the procedures listed in this AD. Any requests for an AMOC are reviewed and responded to accordingly. We did not change this AD.

Request To Change Applicability

ANA requested limiting the Applicability paragraph of this AD to a particular maintenance, repair, and overhaul (MRO) shop where improper maintenance occurred leading to fire. ANA reasoned that the latest 2010 sump fire leading to heat shield burn-through was the result of improper maintenance at a particular MRO.

We disagree. This AD addresses the insufficient fire protection design of the heat shield to prevent secondary fire damage. This is independent from the cause of fire in the engine. We did not change this AD.

Request To Change Effectivity

Lufthansa, Lufthansa Cargo, and Lufthansa Technik requested that we not mandate heat shield rework or replacement. Lufthansa reasoned that none of their customers operating GE CF6–80C2/80A engines have experienced a compressor rear frame (CRF) sump fire.

We disagree. Complying with this AD is necessary to correct the unsafe condition of heat shield burn-through. The heat shield rework or replacement is needed to prevent fires from propagating into the accessory compartment, leading to a larger engine fire and subsequent damage to the airplane. We did not change this AD.

Request for Allowance of Creating and Marking Serial Numbers

Delta requested we allow operators to both create and mark identification numbers on heat shields that are not currently marked. Delta has received reports that there are illegible identification markings on heat shields.

We partially agree. We agree there is a lack of information about heat shields with illegible P/Ns in this AD. We revised the Compliance section of this AD to address heat shields with illegible P/Ns.

We disagree with allowing operators to create and mark identification numbers on heat shields as this does not resolve the unsafe condition and is beyond the scope of this AD.

Request To Change Applicability

GE commented that heat shield, P/N 1643M23G12, is also affected by the unsafe condition described in this AD.

We agree. We added heat shield, P/N 1643M23G12, to the applicability of this AD.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD with the changes described previously. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (80 FR 75952, December 7, 2015) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (80 FR 75952, December 7, 2015).

We also determined that these changes will not increase the economic burden on any operator or increase the scope of this AD.

Related Service Information Under 1 CFR Part 51

We reviewed GE SB CF6–80C2 S/B 72–1520, dated September 22, 2015 and GE SB CF6–80E1 S/B 72–0525, dated September 22, 2015. These SBs describe the procedures for removing and replacing the accessory heat shield assembly. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Other Related Service Information

We reviewed GE SB CF6–80E1 S/B 72–0504, dated October 24, 2014. This SB describes procedures for quick-turn workscope procedure to replace CF6–80E1 stage 1 high-pressure turbine blades. We also reviewed GE SB CF6–80C2 S/B 72–1516, Revision 2, dated November 6, 2015. This SB describes procedures for replacement of the CRF assembly, oil manifold, air tubes, and support brackets. We also reviewed GE SB CF6–80C2 S/B 72–1523, dated September 22, 2015. This SB describes procedures for removing and replacing the accessory heat shield assembly.

Costs of Compliance

We estimate that this AD affects 935 engines installed on airplanes of U.S. registry. We also estimate that it will take about 5 hours per engine to comply with this AD. The average labor rate is $85 per hour. Parts cost about $14,207 per engine. Based on these figures, we estimate the total cost of this AD to U.S. operators to be $13,680,920.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: ''General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska to the extent that it justifies making a regulatory distinction, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2016–08–10 General Electric Company: Amendment 39–18486; Docket No. FAA–2015–4344; Directorate Identifier 2015–NE–32–AD.

(a) Effective Date

This AD is effective June 1, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all General Electric Company (GE) CF6–80C2A1, CF6–80C2A2, CF6–80C2A3, CF6–80C2A5, CF6–80C2A5F, CF6–80C2A8, CF6–80C2B1, CF6–80C2B1F, CF6–80C2B1F1, CF6–80C2B1F2, CF6–80C2B2, CF6–80C2B2F, CF6–80C2B3F, CF6–80C2B4, CF6–80C2B4F, CF6–80C2B5F, CF6–80C2B6, CF6–80C2B6F, CF6–80C2B6FA, CF6–80C2B7F, CF6–80C2B8F, CF6–80C2D1F, CF6–80C2L1F, CF6–80C2K1F turbofan engines. This AD also applies to CF6–80E1A1, CF6–80E1A2, CF6–80E1A3, CF6–80E1A4, and CF6–80E1A4/B turbofan engines.

(d) Unsafe Condition

This AD was prompted by reports of a burn-through of the accessory heat shield during an engine fire, leading to an accessory compartment fire. We are issuing this AD to prevent uncontrolled engine fire, and damage to the airplane.

(e) Compliance

Comply with this AD within the compliance times specified, unless already done.

(1) For CF6–80C2 engines, at the next engine shop visit after the effective date of this AD, remove from service accessory heat shield assembly, part number (P/N) 1643M23G12, and any other accessory heat shield assembly listed by P/N in Table 1 of GE Service Bulletin (SB) CF6–80C2 S/B 72–1520, dated September 22, 2015. Install an accessory heat shield assembly eligible for installation.

(2) For CF6–80E1 engines, at the next engine shop visit after the effective date of this AD, remove from service accessory heat shield assemblies listed by P/N in Table 1 of GE SB CF6–80E1 S/B 72–0525, dated September 22, 2015. Install an accessory heat shield assembly eligible for installation.

(3) Remove any heat shield assembly from service if the accessory heat shield assembly part number marking is illegible and the documentation associated with the part cannot properly identify the part.

(f) Installation Prohibition

After the effective date of this AD, do not install any accessory heat shield assembly, P/N 1643M23G12; or any accessory heat shield assembly listed by P/N in Table 1 of GE SB CF6–80C2 S/B 72–1520, dated September 22, 2015; or in Table 1 of GE SB CF6–80E1 S/B 72–0525, dated September 22, 2015; into any engine.

(g) Definition

For the purpose of this AD, an engine shop visit is defined as the induction of an engine into the shop for maintenance involving the separation of any major mating engine flanges, except that the separation of engine flanges solely for the following purposes is not considered a shop visit:

(1) Transportation without subsequent engine maintenance.

(2) Replacement of the turbine rear frame.

(3) Removal of the top or bottom high-pressure compressor (HPC) case, or both, for HPC airfoil maintenance or replacement of variable stator vane bushing or lever arms.

(4) Quick-turn workscope procedure to replace CF6–80E1 stage 1 high-pressure turbine (HPT) blades per CF6–80E1 SB 72–0504 R00 ENGINE—General (72–00–00)—Quick-Turn Workscope Procedure to Replace CF6–80E1 Stage 1 HPT Blades.

(5) Replacement of compressor rear frame assembly, new oil manifold, air tubes and support brackets per CF6–80C2 SB 72–1516 R02 ENGINE—Compressor Rear Frame Assembly (72–34–00)—New Oil Manifold, Air Tubes and Support Brackets.

(h) Alternative Methods of Compliance (AMOCs)

The Manager, Engine Certification Office, FAA, may approve AMOCs to this AD. Use the procedures found in 14 CFR 39.19 to make your request. You may email your request to: *ANE-AD-AMOC@faa.gov.*

(i) Related Information

For more information about this AD, contact Herman Mak, Aerospace Engineer, Engine Certification Office, FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA 01803; phone: 781–238–7147; fax: 781–238–7199; email: *herman.mak@faa.gov.*

(j) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) General Electric Company (GE) Service Bulletin (SB) CF6–80C2 S/B 72–1520, dated September 22, 2015.

(ii) GE SB CF6–80E1 S/B 72–0525, dated September 22, 2015.

(3) For GE service information identified in this AD, contact General Electric Company, GE Aviation, Room 285, 1 Neumann Way, Cincinnati, OH 45215; phone: 513–552–3272; email: *aviation.fleetsupport@ge.com.*

(4) You may view this service information at FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA. For information on the availability of this material at the FAA, call 781–238–7125.

BILLING CODE 4910–13–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[TD 9750]

RIN 1545–BN59

Reporting of Original Issue Discount on Tax-Exempt Obligations; Basis and Transfer Reporting by Securities Brokers for Debt Instruments and Options; Correction

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations; correction.

SUMMARY: This document contains corrections to final regulations (TD 9750) that published in the **Federal Register** on Thursday, February 18, 2016 (81 FR 8149). The final regulations relates to information reporting by brokers for transactions involving debt instruments and options, including the reporting of original issue discount (OID) on tax-exempt obligations, the treatment of certain holder elections for reporting a taxpayer's adjusted basis in a debt instrument, and transfer reporting for section 1256 options and debt instruments.

DATES: This correction is effective April 27, 2016 and applicable February 18, 2016.

FOR FURTHER INFORMATION CONTACT: Pamela Lew at (202) 317–7053 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final regulation (TD 9750) that is the subject of this correction is under section 6045 of the Internal Revenue Code.

Need for Correction

As published, the final regulation (TD 9750) contains errors that may prove to be misleading and are in need of clarification.

Correction of Publication

Accordingly, the final regulation (TD 9750), that is the subject of FR Doc. 2016–03429, is corrected as follows:

1. On page 8151, in the preamble, third column, third line from the bottom of the first full paragraph, ''OID and acquisition discount on all tax-'' is corrected to read ''OID and acquisition premium on all tax-''.

2. On page 8151, in the preamble, third column, third line from the bottom of the last full paragraph, ''discount for a tax-exempt obligation that'' is corrected to read ''premium for a tax-exempt obligation that''.

Martin V. Franks,

Chief, Publications and Regulations Branch, Legal Processing Division, Associate Chief Counsel (Procedure and Administration).

Reporting of Original Issue Discount on Tax-Exempt Obligations; Basis and Transfer Reporting by Securities Brokers for Debt Instruments and Options; Correction

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Correcting amendment.

SUMMARY: This document contains corrections to final regulations (TD 9750) that were published in the **Federal Register** on Thursday, February 18, 2016 (81 FR 8149). The final regulations relate to information reporting by brokers for transactions involving debt instruments and options, including the reporting of original issue discount (OID) on tax-exempt obligations, the treatment of certain holder elections for reporting a taxpayer's adjusted basis in a debt instrument, and transfer reporting for section 1256 options and debt instruments.

DATES: This correction is effective April 27, 2016 and applicable February 18, 2016.

FOR FURTHER INFORMATION CONTACT: Pamela Lew at (202) 317–7053 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

The final regulations (TD 9750) that are the subject of this correction are under section 6045, 6045A, and 6049 of the Internal Revenue Code.

Need for Correction

As published, the final regulations (TD 9750) contain errors that may prove to be misleading and are in need of clarification.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Correction of Publication

Accordingly, 26 CFR part 1 is corrected by making the following correcting amendments:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

■ **Par. 2.** Section 1.6045–1 is amended by revising the third sentence of paragraph (n)(4) to read as follows:

§ 1.6045–1 Returns of information of brokers and barter exchanges.

* * * * *

(n) * * *

(4) * * * See paragraph (n)(11) of this section for the treatment of an election described in paragraph (n)(4)(iii) of this section (election to accrue market discount based on a constant yield) and an election described in paragraph (n)(4)(iv) of this section (election to treat all interest as OID).

* * * * *

§ 1.6045A–1 [Corrected]

■ **Par. 3.** Section 1.6045A–1 is amended by removing ''and;'' at the end of paragraphs (b)(3)(ix) and (b)(4)(iii) and adding ''; and'' in its place.

§ 1.6049–9 [Corrected]

■ **Par. 4.** Section 1.6049–9(c) is amended by revising the citation ''§ 1.6049–10T'' to read ''§ 1.6049–10'' in the last sentence.

Martin V. Franks,

Chief, Publications and Regulations Branch, Legal Processing Division, Associate Chief Counsel (Procedure and Administration).

BILLING CODE 4830–01–P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

37 CFR Part 42

[Docket No. PTO–P–2015–0053]

RIN 0651–AD01

Amendments to the Rules of Practice for Trials Before the Patent Trial and Appeal Board; Correction

AGENCY: United States Patent and Trademark Office, Commerce.

ACTION: Final rule; correction.

SUMMARY: The United States Patent and Trademark Office (Office) published a final rule in the **Federal Register** on

April 1, 2016, revising the rules related to trial practice for *inter partes* review, post-grant review, the transitional program for covered business method patents, and derivation proceedings that implemented provisions of the Leahy-Smith America Invents Act (''AIA'') providing for trials before the Office. This document corrects an error in that final rule.

DATES: *Effective Date:* This rule is effective May 2, 2016 and applies to all AIA petitions filed on or after the effective date and to any ongoing AIA preliminary proceeding or trial before the Office.

FOR FURTHER INFORMATION CONTACT: Susan L. C. Mitchell, Lead Administrative Patent Judge, by telephone at (571) 272–9797.

SUPPLEMENTARY INFORMATION: The Office published a final rule in the **Federal Register** on April 1, 2016 (81 FR 18750), entitled ''Amendments to the Rules of Practice for Trials Before the Patent Trial and Appeal Board.'' This document corrects an error in § 42.24(a)(1).

The second sentence of § 42.24(a)(1) should state that the word count or page limit does not include a table of contents, a table of authorities, mandatory notices under § 42.8, a certificate of service or word count, or appendix of exhibits or claim listing. The reference to ''grounds for standing under § 42.104, § 42.204, or § 42.304'' was inadvertently included as administrative items, such as mandatory notices, and in the related discussion in the preamble on pages 18762 and 18763 of the final rule published on April 1, 2016 (81 FR 18750). This correction removes that reference from § 42.24(a)(1).

In rule FR Doc. 2016–07381, published on April 1, 2016 (81 FR 18750), make the following correction:

§ 42.24 [Correction]

1. On page 18765, in the second column, in paragraph (a)(1) of § 42.24, correct the second sentence by removing ''grounds for standing under § 42.104, § 42.204, or § 42.304,''.

Dated: April 21, 2016.

Michelle K. Lee,

Under Secretary of Commerce for Intellectual Property and Director of the United States Patent and Trademark Office.

BILLING CODE 3510–16–P

FEDERAL MARITIME COMMISSION

46 CFR Part 535

[Docket No. 16–09]

RIN 3072–AC65

Optional Method of Filing Ocean Common Carrier and Marine Terminal Operator Agreements Subject to the Shipping Act of 1984

AGENCY: Federal Maritime Commission.

ACTION: Direct final rule; and request for comments.

SUMMARY: The Federal Maritime Commission (FMC or Commission) amends its regulations relating to the method of filing Ocean Common Carrier and Marine Terminal Operator Agreements to provide for optional filing of these agreements through a new electronic filing system. This optional filing system is intended to facilitate more efficient filing, review, and publication of these agreements.

DATES: This rule is effective without further action on June 13, 2016, unless significant adverse comment is received by May 27, 2016. If significant adverse comment is received, the Federal Maritime Commission will publish a timely withdrawal of the rule in the **Federal Register**.

ADDRESSES: You may submit comments by the following methods:

- *Email: secretary@fmc.gov.* Include in the subject line: ''Docket No. 16–09, Commentor/Company name.'' Comments should be attached to the email as a Microsoft Word or text-searchable PDF document. Only non-confidential and public versions of confidential comments should be submitted by email.
- *Mail:* Karen V. Gregory, Secretary, Federal Maritime Commission, 800 North Capitol Street NW., Washington, DC 20573–0001. *Phone:* (202) 523–5725. *Email: secretary@fmc.gov.*

Docket: For access to the docket to read background documents or comments received, go to the Commission's Electronic Reading Room at: *http://www.fmc.gov/16-09.*

Confidential Information: The Commission will provide confidential treatment for identified confidential information to the extent allowed by law. If your comments contain confidential information, you must submit the following:

- A transmittal letter requesting confidential treatment that identifies the specific information in the comments for which protection is sought and demonstrates that the information is a trade secret or other confidential research, development, or commercial information.
- A confidential copy of your comments, consisting of the complete filing with a cover page marked ''Confidential-Restricted,'' and the confidential material clearly marked on each page. You should submit the confidential copy to the Commission by mail.
- A public version of your comments with the confidential information excluded. The public version must state ''Public Version—confidential materials excluded'' on the cover page and on each affected page, and must clearly indicate any information withheld. You may submit the public version to the Commission by email or mail.

FOR FURTHER INFORMATION CONTACT: For questions regarding submitting comments or the treatment of confidential information, contact Karen V. Gregory, Secretary, *Phone:* (202) 523–5725. *Email: secretary@fmc.gov.* For technical questions, contact Florence A. Carr, Director, Bureau of Trade Analysis. *Phone:* (202) 523–5796. *Email: tradeanalysis@fmc.gov.* For legal questions, contact Tyler J. Wood, General Counsel. *Phone:* (202) 523–5740. *Email: generalcounsel@fmc.gov.*

SUPPLEMENTARY INFORMATION: On January 18, 2011, President Obama issued Executive Order 13563 (E.O. 13563) to emphasize the importance of public participation in adopting regulations, integration and innovation in regulatory actions, flexible approaches in achieving regulatory objectives, and ensuring the objectivity of any scientific and technological information and process in regulatory actions. E.O. 13563 requires executive agencies to develop a plan to periodically review their existing significant regulations to determine whether any such regulations should be modified, streamlined, expanded, or repealed so as to make such agencies' regulatory programs more effective and less burdensome in achieving the regulatory objectives. On July 11, 2011, Executive Order 13579 was issued to encourage independent regulatory agencies to also pursue the goals stated in E.O. 13563.

On November 4, 2011, the Commission issued its *Plan for Retrospective Review of Existing Rules* (Plan) and invited public comment on how it might improve the current regulations.[1] The Plan included a review schedule for the Commission's existing regulations, which was updated

[1] A copy of the Plan and comments filed in response to the Plan that are within the scope of this rulemaking have been placed in the docket.

on February 13, 2013. Among the comments received in response to the Plan were the *Comments of Ocean Common Carriers* on May 18, 2012.[2]

The carriers' comments included a request for the Commission to ''adopt rules and procedures pursuant to which carrier and marine terminal operator agreements can be filed electronically.'' The carriers pointed out that ''virtually all filings made with the Commission, other than agreement filings, are made electronically (*e.g.,* agreement minutes, monitoring reports and guidelines, OTI license applications)'' and noted that ''[i]ronically, the Commission maintains an electronic library of agreements on its Web site, so these agreements are retained electronically in any event.'' While the carriers conclude that the electronic filing of agreements ''would reduce the burden and expense of filing for the industry,'' the Commission notes that doing so would also streamline its internal business processes, thereby resulting in a more efficient regulatory process and expediting public access to agreement filings through the Commission's Web site. These benefits are consistent with Executive Order 13579.

Under the Commission's existing rules at 46 CFR 535.401, ''a true copy and seven additional copies of the executed agreement'' must be submitted in paper format to the Commission's Secretary during the regular business hours of 8:30 a.m. to 5:00 p.m., Monday through Friday. The agreement's filing must be accompanied by a letter of transmittal, and, where required, an original and five copies of the completed Information Form, also in paper format. To respond to the industry's request to reduce the regulatory burden associated with the filing of multiple copies of agreements and supporting documents in paper format, the Commission determined that automating the agreement filing process should be given priority.

The FMC's Office of Information Technology (OIT), in conjunction with the Bureau of Trade Analysis (BTA), commenced efforts in October 2015 to automate the process of filing agreements with the Commission. BTA met with various agreement filers during development to ensure that the new system would not only provide a user-oriented electronic filing environment but also deliver more robust public search capabilities for the online agreement library based on a variety of filters. Further enhancement of the online agreement library's search capabilities is planned in the future.

Initial software development and associated testing to support the electronic agreement filing system has been completed. The Commission now plans to make this technology available as an optional method to file agreements and supporting documents. Use of the automated system will not be required, however, as parties may continue to submit agreements in paper format. Paper filings will be received and processed in the same manner as before.

Under the new electronic agreement filing system, supporting documentation previously submitted in paper form may also be appended electronically as part of the filing process. Validity checks incorporated into the automated filing process will allow the filer to verify Commission information regarding agreement parties, thereby ensuring a more accurate public online agreement library, as well as facilitating review and oversight of agreements by the Commission. The system may be accessed through the Commission's Web site at *http://www.fmc.gov* under Public FMC Databases/Agreement Notices and Library. Prospective filers may register for the electronic agreement filing system and obtain a login and password by following the instructions on the system's Web page. As with current practice, the public will have the ability to view all agreements in the online agreement library; however, the public will not be able to view the filer's letter of transmittal and Information Form, if any. In addition, the filing system is password-protected to ensure the security of information being collected, primarily in supporting documents, and to appropriately restrict external filing permission to the agreement filer and its authorized filing agents.

The Commission's rules presently require that each agreement and modification filed must be signed by an official or authorized representative of each of the parties and that the original signature page(s) accompany the agreement's filing. The rules allow some measure of flexibility to filers by permitting faxed or photocopied signatures to accompany the agreement's filing if the copies are replaced with original signatures prior to the agreement's effective date. § 535.403(d). Many times, the individuals who sign an agreement are located overseas or are traveling and may be required to transmit a signature page electronically to filing counsel in order to expedite an agreement's filing, and consequently, its effectiveness. In such cases, agreement counsel submits a photocopy of the parties' signature pages with the agreement's filing, and must follow up by sending the original signatures by mail or courier to the Commission prior to the effective date.

While the Commission's rules presently require that the original signatures of the parties executing an agreement must be filed with the Commission, the Shipping Act of 1984 (the Act) 46 U.S.C. 40101 *et seq.,* provides only that ''a true copy of every agreement . . . shall be filed with the Federal Maritime Commission'' and permits the Commission to prescribe the form and manner in which agreements are filed. 46 U.S.C. 40302(a), (c). As the Act does not require the filing of the original agreement with the Commission, removing the parties' requirement to provide original signatures with an agreement's filing would eliminate an unnecessary regulatory burden. The Commission is, therefore, removing this requirement and will begin accepting photocopies and scanned electronic copies of the agreement parties' original signatures. The Commission is similarly removing the requirement that transmittal letters accompanying agreement filings include an original signature.

Congressional Review Act

The rule is not a ''major rule'' as defined by the Congressional Review Act, codified at 5 U.S.C. 801 *et seq.* The rule will not result in: (1) An annual effect on the economy of $100,000,000 or more; (2) a major increase in costs or prices; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based companies to compete with foreign-based companies. 5 U.S.C. 804(2).

Regulatory Flexibility Act

In accordance with the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.,* the Chairman of the Federal Maritime Commission certifies that this direct final rule will not have a significant

[2] The commenting carriers consisted of a total of thirty ocean carriers participating in the following agreements active at that time: The fourteen members of the Transpacific Stabilization Agreement (TSA); ten members of the Westbound Transpacific Stabilization Agreement (WTSA); six members of the Central America Discussion Agreement (CADA); eleven members of the West Coast South America Discussion Agreement (WCSADA); five members of the Venezuela Discussion Agreement (VDA); three members of the ABC Discussion Agreement (ABCDA); six members of the United States Australasia Discussion Agreement (USADA); and, the three members of the Australia New Zealand United States Discussion Agreement (ANZUSDA). The carriers' recommendations with respect to agreements, with one exception, are being considered by the Commission under FMC Docket No. 16–04. See Advance Notice of Proposed Rulemaking, *Ocean Common Carrier and Marine Terminal Operator Agreements Subject to the Shipping Act of 1984,* 81 FR 10188 (Feb. 29, 2016). The exception referenced is the subject of this rulemaking.

economic impact on a substantial number of small entities. The rule applies to the filing requirements for agreements by or among vessel-operating common carriers (VOCCs) and/or marine terminal operators (MTOs). The Commission has previously determined that VOCCs and MTOs do not qualify as small entities because the number of employees and/or gross receipts of these regulated businesses typically exceed the thresholds set under the guidelines of the Small Business Administration.[3] This rule implements an alternative electronic method for filing agreements with the Commission that is optional for the industry. The current regulations require that agreements be filed with the Commission in paper form. The new electronic system should significantly reduce the burden and expense of filing on the industry. Further, in comments to the Commission's *Plan for the Retrospective Review of Existing Rules,* a majority of VOCCs specifically requested that the Commission implement an electronic system for filing agreements.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) requires an agency to seek and receive approval from the Office of Management and Budget (OMB) before collecting information from the public and before making substantive or material modifications to a previously approved information collection. 44 U.S.C. 3507; 5 CFR 1320.5(a), (g). The information-collection contained in Part 535, including the agreement-filing requirements, have been approved by OMB and assigned OMB Control Number 3072–0046. The Commission is modifying this information collection by allowing electronic filing of agreements and expects that this change will reduce the paperwork burdens on regulated entities. The Commission will, however, continue to allow paper filing of agreements. Accordingly, this modification is neither substantive nor material. The expiration date for the Part 535 information collection is November 30, 2016, and the Commission will note the modification and any resulting changes to the burden hour estimate when it seeks an extension of the information collection later this year.

[3] See *FMC Policy and Procedures Regarding Proper Considerations of Small Entities in Rulemakings,* page 4 (February 7, 2003), from the Web site of the FMC at *http://www.fmc.gov/assets/1/Page/SBREFA_Guidelines_2003.pdf.*

Direct Final Rule Justification

The Commission expects the amendments to be noncontroversial. Under the Administrative Procedure Act (APA), 5 U.S.C. 553(b)(B), a final rule may be issued without notice and comment when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefor in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest. This rule provides an optional electronic method of filing agreements and supporting documents as a more flexible and less burdensome alternative for the regulated parties to those agreements, and maintains the present paper format filing procedures for filers that wish to continue utilizing the current method. The electronic agreement filing system was developed at the behest, in 2012, of thirty global ocean common carriers participating in the major rate discussion agreements filed with the Commission to relieve the regulatory burden of paper filings. Further, the requirement to include original signatures to agreements and transmittal letters, rather than photo- or electronic copies, burdens filers and appears to provide limited, if any, public benefit. Thus, the Commission has determined that providing an opportunity for comment is unnecessary.

Therefore, pursuant to 5 U.S.C. 553, notice and comment are not required and this rule may become effective after publication in the **Federal Register**, unless the Commission receives significant adverse comments within the specified period. The Commission recognizes that parties may have information that could impact the Commission's views and intentions with respect to the revised regulations, and the Commission intends to consider any comments filed. The Commission will withdraw the rule if it receives significant adverse comments. Filed comments that are not adverse may be considered for modifications to Part 535 at a future date.

If no significant adverse comment is received, the rule will become effective 15 days after the close of the comment period without additional action. The Administrative Procedure Act generally requires a minimum of 30 days before a final rule can go into effect, but excepts from this requirement rules that relieve a restriction. 5 U.S.C. 553(d)(1). Because this final rule provides for an additional, optional method of filing agreements and removes the requirement that agreement filings and accompanying transmittal letters include original signatures, the rule falls within this exception.

List of Subjects in 46 CFR Part 535

Freight, Maritime carriers, Reporting and recordkeeping requirements.

Regulatory Text

For the foregoing reasons, the Commission amends 46 CFR part 535 as follows:

PART 535—OCEAN COMMON CARRIER AND MARINE TERMINAL OPERATOR AGREEMENTS SUBJECT TO THE SHIPPING ACT OF 1984

■ 1. The authority citation for part 535 continues to read as follows:

Authority: 5 U.S.C. 553; 46 U.S.C. 305, 40101–40104, 40301–40307, 40501–40503, 40901–40904, 41101–41109, 41301–41302, and 41305–41307.

■ 2. Amend § 535.401 by revising paragraphs (a) and (b)(4) to read as follows:

§ 535.401 General requirements.

(a) All agreements (including oral agreements reduced to writing in accordance with the Act) subject to this part and filed with the Commission for review and disposition pursuant to section 6 of the Act (46 U.S.C. 40304, 40306, 41307(b)–(d)), must be submitted to the Commission either in paper during regular business hours to the Secretary, Federal Maritime Commission, Washington, DC 20573, or electronically using the automated agreement filing system.

(1) *Paper filings.* Paper filings must include:

(i) A true copy and seven additional copies of the executed agreement;

(ii) Where required by this part, an original and five copies of the completed Information Form referenced at subpart E of this part; and

(iii) A letter of transmittal as described in paragraph (b) of this section.

(2) *Electronic filings.* (i) Electronic filings using the automated agreement filing system must be made in accordance with the instructions found on the Commission's home page, *http://www.fmc.gov.*

(ii) Electronic filings must include searchable Portable Document Format (PDF) copies of the following:

(A) A true copy of the executed agreement;

(B) Where required by this part, a completed Information Form referenced at subpart E of this part; and

(C) A letter of transmittal as described in paragraph (b) of this section.

(b) * * *

(4) Be signed by the filing party or on the filing party's behalf by an authorized employee or agent of the filing party. A faxed, photocopied, or scanned signature will be accepted.

* * * * *

■ 3. Amend § 535.403 by revising paragraph (d) to read as follows:

§ 535.403 Form of agreements.

* * * * *

(d) Each agreement and/or modification filed must be signed by an official or authorized representative of each of the parties and must indicate the typewritten full name of the signing party and his or her position, including organizational affiliation. Faxed, photocopied, or scanned signatures will be accepted.

* * * * *

■ 4. Amend § 535.501 by revising the last sentence of paragraph (b) to read as follows:

§ 535.501 General requirements.

* * * * *

(b) * * * In lieu of submitting paper copies, parties may complete and submit their Information Form in the Commission's prescribed electronic format, either on diskette or CD–ROM, or submit the Information Form using the automated agreement filing system in accordance with the instructions found on the Commission's home page, *http://www.fmc.gov.*

* * * * *

By the Commission.

Karen V. Gregory,

Secretary.

BILLING CODE 6731–AA–P

DEPARTMENT OF STATE

48 CFR Parts 601, 606, 608, 615, 616, 623, 627, 633, 651, and 652

[Public Notice: 9482]

RIN 1400–AD92

Department of State Acquisition Regulation; Technical Amendments

AGENCY: Department of State.

ACTION: Final rule; technical amendments.

SUMMARY: The Department of State is amending the Department of State Acquisition Regulation (DOSAR) to make non-substantive corrections and editorial changes.

DATES: This rule is effective April 27, 2016.

ADDRESSES: You may submit comments using the following method:

- *Email: KosarCM@state.gov.* You must include the RIN in the subject line of your message.

FOR FURTHER INFORMATION CONTACT: Ms. Colleen Kosar, Policy Division, Office of the Procurement Executive, A/OPE, 2201 C Street NW., Suite 1060, State Annex Number 15, Washington, DC 20520. Telephone: 703–516–1685. Email: *KosarCM@state.gov.*

SUPPLEMENTARY INFORMATION: This document updates Parts 601, 606, 608, 615, 616, 623, 627, 633, 651 and 652 to correct formatting, grammatical, numbering and wording errors/oversights as follows—

1. Corrects a cross reference in DOSAR 601.602–1(b);
2. Corrects a grammatical error in DOSAR 606.304(a)(2);
3. Corrects the title of DOSAR 606.5;
4. Corrects terminology in DOSAR 606.501(b) to align with a recent FAR change;
5. Adds a delegation of authority in DOSAR 608.405–3(a)(3)(ii);
6. Removes ''DOSAR'' from DOSAR 615.205–70 to comply with the referencing convention cited at DOSAR 601.303(c);
7. Corrects the title of DOSAR 616.103;
8. Adds a delegation of authority in DOSAR 616.504(c)(1)(ii)(D)*(1)*
9. Adds a paragraph identifier to the text of DOSAR 623.506;
10. Adds a clarification to DOSAR 627.304–1;
11. Adds a missing section heading for DOSAR 633.214;
12. Retitles DOSAR 633. 214–70;
13. Redesignates 651.701 as 651.7001;
14. Corrects the capitalization of ''subpart'' in DOSAR 652.100–70(a) and (b) to comply with the referencing convention cited at DOSAR 601.303(c);
15. Corrects the title of DOSAR subpart 652.2; and
16. Corrects a reference in the introductory text of DOSAR 652.232–72.

Regulatory Findings

Administrative Procedure Act

The Department is publishing this rule as a direct final rule, as an interpretative rule, general statement of policy, or rule of agency organization, procedure, or practice, in accordance with 5 U.S.C. 553(b). The effective date of this rulemaking is the date of publication, in accordance with 5 U.S.C. 553(d). The Department finds good cause for this rule to be effective immediately. Since the amendments in this rule are merely technical in nature or address the internal operating procedures of the agency, public comment is unnecessary.

Regulatory Flexibility, Unfunded Mandates, SBREFA

The Department of State, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this regulation and, by approving it, certifies that this rule will not have a significant economic impact on a substantial number of small entities. This determination was based on the fact that the amendments in this rule will not have any cost or administrative impact on offerors or contractors. Thus, it was concluded that the rule will not have a significant economic impact on a substantial number of small entities. This rule will not result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any year and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Act of 1995. Finally, this rule is not a major rule as defined by the Small Business Regulatory Enforcement Act of 1996 (5 U.S.C. 801 *et seq.*).

Executive Orders 12866 and 13563

The Department of State does not consider this rule to be an ''economically significant'' regulatory action under E. O. 12866. The Department has reviewed the regulation to ensure its consistency with the regulatory philosophy and principles set forth in Executive Orders 12866 and 13563 and finds that the benefits of updating this rule outweigh any costs, which the Department assesses to be minimal.

Executive Order 13132 and 13175

This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. The Department has determined that this rulemaking will not have tribal implications, will not impose substantial direct compliance costs on Indian tribal governments, and will not pre-empt tribal law.

Paperwork Reduction Act

The rule imposes no new or revised information collections under the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

List of Subjects in 48 CFR Parts 601, 606, 608, 615, 616, 623, 627, 633, 651 and 652

Administrative practice and procedure, Government procurement.

For the reasons stated in the preamble, the Department of State amends 48 CFR chapter 6 as follows:

■ 1. The authority citation for 48 CFR parts 601, 606, 608, 615, 616, 623, 627, 633, 651 and 652 continues to read as follows:

Authority: 22 U.S.C. 2651a, 40 U.S.C. 121(c) and 48 CFR chapter 1.

PART 601—DEPARTMENT OF STATE ACQUISITION REGULATION SYSTEM

601.602–1 [Amended]

■ 2. In section 601.602–1, paragraph (b), remove ''601.603–70'' and add in its place ''601.601–70''.

PART 606—COMPETITION REQUIREMENTS

606.304 [Amended]

■ 3. In section 606.304, in paragraph (a)(2), remove ''a advocate for competition'' and add in its place ''an advocate for competition''.

Subpart 606.5—Advocates for Competition

■ 4. Revise the heading for subpart 606.5 to read as set forth above.

■ 5. In section 606.501, in the second sentence of paragraph (b), remove ''competition advocate'' and add in its place ''advocate for competition''.

PART 608—REQUIRED SOURCES OF SUPPLIES AND SERVICES

■ 6. Add subpart 608.4 to read as follows:

Subpart 608.4—Federal Supply Schedules

608.405 Ordering procedures for Federal Supply Schedules.
608.405–3 Blanket Purchase Agreements.

Subpart 608.4—Federal Supply Schedules

608.405 Ordering procedures for Federal Supply Schedules.

608.405–3 Blanket Purchase Agreements.

(a) *Establishment.*

(3)(ii) The Procurement Executive is the head of the agency for the purposes of FAR 8.405–3(a)(3)(ii).

PART 615—CONTRACTING BY NEGOTIATION

615.205–70 [Amended]

■ 7. In section 615.205–70, remove ''DOSAR''.

PART 616—TYPES OF CONTRACTS

■ 8. Revise the heading for section 616.103 to read as follows:

616.103 Negotiating contract type.

* * * * *

■ 9. Add section 616.504 to read as follows:

616.504 Indefinite-quantity contracts.

(c) *Multiple award preference*—(1) *Planning the acquisition.*

(ii)(D)*(1)* The Procurement Executive is the head of the agency for the purposes of FAR 16.504(c)(1)(ii)(D)*(1).*

PART 623—ENVIRONMENT, ENERGY AND WATER EFFICIENCY, RENEWABLE ENERGY TECHNOLOGIES, OCCUPATIONAL SAFETY, AND DRUG-FREE WORKPLACE TYPES OF CONTRACTS

623.506 [Amended]

■ 10. The text of section 623.506 is designated as paragraph (e).

PART 627—PATENTS, DATA, AND COPYRIGHTS

627.304–1 [Amended]

■ 11. In the third sentence of section 627.304–1, add ''proposed to be'' between ''Determinations'' and ''issued''.

PART 633—PROTESTS, DISPUTES, AND APPEALS

Subpart 633.214—Alternative dispute resolution (ADR)

■ 12. Add a subpaart 633.214 heading to read as set forth above.

■ 13. Revise the heading for section 633.214–70 to read as follows:

633.214–70 DOS ADR program.

* * * * *

PART 651—USE OF GOVERNMENT SOURCES BY CONTRACTORS

651.701 [Redesignated as 651.7001]

■ 14. Section 651.701 is redesignated as section 651.7001.

PART 652—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

652.100–70 [Amended]

■ 15. In section 652.100–70, revise ''Subpart'' to read ''subpart'' in paragraphs (a) and (b).

Subpart 652.2—Text of Provisions and Clauses

■ 16. Revise the subpart 652.2 heading to read as set forth above.

652.232–72 [Amended]

■ 17. In the introductory text of section 652.232–72, remove ''632.705–70'' and add in its place ''632.706–70''.

Corey M. Rindner,

Procurement Executive, Department of State.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

[Docket No. FWS–R3–ES–2016–0052; 4500030113]

RIN 1018–AZ62

Endangered and Threatened Wildlife and Plants; Determination That Designation of Critical Habitat Is Not Prudent for the Northern Long-Eared Bat

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Critical habitat determination.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), have reconsidered whether designating critical habitat for the northern long-eared bat (*Myotis septentrionalis*) is prudent. We have determined that such a designation is not prudent. We listed the northern long-eared bat as a threatened species under the Endangered Species Act of 1973, as amended (Act), on April 2, 2015. At the time the species was listed, we determined that designation of critical habitat was prudent, but not determinable. Since that time, information has come available that demonstrates that designating the wintering habitat as critical habitat for the bat would likely increase the threat from vandalism and disturbance, and could, potentially, increase the spread of white-nose syndrome. In addition, designating the summer habitat as critical habitat would not be beneficial to the species, because there are no areas within the summer habitat that meet the definition of critical habitat. Thus, we have determined that the designation of critical habitat is not prudent for the northern long-eared bat.

DATES: The determination announced in this document was made on April 27, 2016.

ADDRESSES: This document is available on the Internet at *http://www.regulations.gov* at Docket No. FWS–R3–ES–2016–0052. Supporting documentation we used in preparing this document will be available for public inspection, by appointment, during normal business hours at the Twin Cities Ecological Services Office, U.S. Fish and Wildlife Service, 4101 American Blvd. E., Bloomington, MN 55425.

FOR FURTHER INFORMATION CONTACT: Peter Fasbender, Field Supervisor, 952–252–0092, extension 210. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 800–877–8339.

SUPPLEMENTARY INFORMATION:

Background

The northern long-eared bat (*Myotis septentrionalis*) is a wide-ranging species that is found in a variety of forested habitats in summer and hibernates in caves and mines (or habitat with similar conditions to suitable caves or mines) in winter. The fungal disease, white-nose syndrome (WNS), is the main threat to this species and has caused a precipitous decline in bat numbers (in many cases, 90–100 percent) where the disease has occurred. Declines in the numbers of northern long-eared bats are expected to continue as WNS extends across the species' range, provided no cure to the disease is found. For more information on the northern long-eared bat, its habitat, and WNS, please refer to the October 2, 2013, proposed listing (78 FR 61046) and the April 2, 2015, final listing (80 FR 17974) rules.

Summer Habitat

Suitable summer habitat for the northern long-eared bat consists of a wide variety of forested and wooded habitats where they roost, forage, and travel (Foster and Kurta 1999, p. 668), and may also include some adjacent and interspersed non-forested habitats (Yates and Muzika 2006, p. 1,245). This includes forests and woodlots containing potential roosts, as well as linear features such as fence rows, riparian forests, and other wooded corridors. These wooded areas may be dense or loose aggregates of trees with variable amounts of canopy closure (Lacki and Schwierjohann 2001, p. 487; Perry and Thill 2007, p. 223; Sasse and Pekins 1996, p. 95; Timpone *et al.* 2010, p. 118).

After hibernation ends in late March or early April (as late as May in some northern areas), most northern long-eared bats migrate to summer roosts. The spring migration period typically runs from mid-March to mid-May (Caire *et al.* 1979, p. 405; Easterla 1968, p. 770; Whitaker and Mumford 2009, p. 207). The northern long-eared bat is not considered to be a long-distance migrant (typically 40–50 miles (64–80 kilometers)). Males and non-reproductive females may summer near or in their winter habitat (hibernacula), or migrate to summer habitat some distance from their hibernaculum.

After emerging from hibernacula in the spring, female northern long-eared bats actively form colonies in the summer (Foster and Kurta 1999) and exhibit fission-fusion behavior (Garroway and Broders 2007), where members frequently coalesce to form a group, but composition of the group is in flux (Barclay and Kurta 2007, p. 44). As part of this behavior, northern long-eared bats switch tree roosts often (Sasse and Pekins 1996, p. 95), typically every 2 to 3 days (Foster and Kurta 1999, p. 665; Owen *et al.* 2002, p. 2; Carter and Feldhamer 2005, p. 261; Timpone *et al.* 2010, p. 119). Northern long-eared bat maternity colonies range widely in size (reported range of 7 to 100; Owen *et al.* 2002, p. 2; Whitaker and Mumford 2009, p. 212), although colonies of 30–60 individuals may be most common, at least prior to the onset of WNS (Whitaker and Mumford 2009, p. 212; Caceres and Barclay 2000, p. 3; Service 2014, p. A16).

Northern long-eared bats show interannual fidelity to roost trees and maternity areas. They use networks of roost trees often centered around one or more central-node roost trees (Johnson *et al.* 2011, p. 228) with multiple alternate roost trees. Northern long-eared bats roost in cavities, crevices, hollows, or underneath bark of both live and dead trees and snags (typically ≥3 inches (in) (8 centimeters (cm)) in diameter at breast height (dbh)). Northern long-eared bats are known to use a wide variety of roost types, using tree species based on presence of cavities or crevices or presence of peeling bark. Northern long-eared bats have also been found roosting in structures such as buildings, barns, sheds, houses, and bridges (Benedict and Howell 2008, p. 5; Krochmal and Sparks 2007, p. 650; Timpone *et al.* 2010, p. 119; Service 2014, p. 2).

The best available information indicates that northern long-eared bats seem to be flexible in roost selection, using varying roost tree species and types of roosts throughout their range. They do not depend on certain species of trees for roosts; rather, they opportunistically use many tree species that form suitable cavities or retain bark (Foster and Kurta 1999, p. 668). Additionally, the bats may use either live trees or snags; the use of live trees versus snags may reflect the availability of such structures (Perry and Thill 2007, p. 224) and the presence of sympatric bat species (*e.g.,* Indiana bat (*Myotis sodalis*)) (Timpone *et al.* 2010, p. 120), as opposed to a specific preference of tree or other habitat characteristics. Results from studies have also found that the diameters of roost trees selected by northern long-eared bats vary greatly (Sasse and Pekins 1996, pp. 95–96; Schultes 2002, pp. 49, 51; Perry 2014, pers. comm.; Lereculeur 2013, pp. 52–54; Carter and Feldhamer 2005, p. 263; Foster and Kurta 1999, p. 663; Lacki and Schwierjohann 2001, pp. 484–485; Owens *et al.* 2002, p. 3; Timpone *et al.* 2010, p. 118; Lowe 2012, p. 61; Perry and Thill 2007, p. 223; Lacki *et al.* 2009, p. 1,171) and that northern long-eared bats can forage in a variety of forest types (Brack and Whitaker 2001, p. 207; LaVal *et al.* 1977, p. 594; van Zyll de Jong 1985, p. 94). Northern long-eared bats change roost trees frequently (*e.g.,* Cryan *et al.* 2001, p. 50; Foster and Kurta 1999, p. 665) within their summer home range; this behavior suggests they are adapted to responding quickly to changes in roost availability and ephemeral roosts. For a more detailed discussion on summer habitat, refer to the April 2, 2015, final listing rule (80 FR 17974).

Winter Habitat (Hibernacula)

Northern long-eared bats hibernate during the winter months to conserve energy from increased thermoregulatory demands and reduced food resources (Thomas *et al.* 1990, p. 475; Thomas and Geiser 1997, p. 585; Bouma *et al.* 2010, p. 623). Suitable winter habitat includes caves and cave-like structures (*e.g.,* abandoned or active mines, railroad tunnels) (Service 2015, unpublished data; Goehring 1954, p. 435; Kurta *et al.* 1997, p. 478). Other landscape features may be used by northern long-eared bats during the winter, but they have yet to be documented. Generally, northern long-eared bats hibernate from October to April, depending on the local climate (November/December through March in southern areas, with emergence as late as mid-May in some northern areas) (Caire *et al.* 1979, p. 405; Whitaker and Hamilton 1998, p. 100; Amelon and Burhans 2006, p. 72).

Hibernacula used by northern long-eared bats vary in size (Raesly and Gates 1987, p. 20; Kurta 2013, in litt.), and these hibernacula have relatively constant, cooler temperatures (0 to 9 degrees Celsius (°C) (32 to 48 degrees

Fahrenheit (°F)) (Raesly and Gates 1987, p. 18; Caceres and Pybus 1997, p. 2; Brack 2007, p. 744), with high humidity and minimal air currents (Fitch and Shump 1979, p. 2; van Zyll de Jong 1985, p. 94; Raesly and Gates 1987, p. 118; Caceres and Pybus 1997, p. 2). The sites favored by northern long-eared bats are often in very high humidity areas, to such a large degree that droplets of water are often observed on their fur (Hitchcock 1949, p. 52; Barbour and Davis 1969, p. 77). Within hibernacula, northern long-eared bats are typically found roosting in small crevices or cracks in cave or mine walls or ceilings, sometimes with only the nose and ears visible (Griffin 1940, pp. 181–182; Barbour and Davis 1969, p. 77; Caire *et al.* 1979, p. 405; van Zyll de Jong 1985, p. 9; Caceres and Pybus 1997, p. 2; Whitaker and Mumford 2009, pp. 209–210).

To a lesser extent, northern long-eared bats have also been observed overwintering in other types of habitat that resemble cave or mine hibernacula, including abandoned railroad tunnels (Service 2015, unpublished data). Although similar bat species (*e.g.,* big brown bats (*Eptesicus fuscus*)) have been found using non-cave or non-mine hibernacula, including attics and hollow trees (Neubaum *et al.* 2006, p. 473; Whitaker and Gummer 1992, pp. 313–316), northern long-eared bats have only been observed overwintering in suitable caves, mines, or habitat with the same types of conditions found in suitable caves or mines.

Northern long-eared bats tend to roost singly or in small groups (Service 2013, unpublished data), with hibernating population sizes rarely recorded in concentrations of more than 100 bats in a single hibernaculum (Barbour and Davis 1969, p. 77). Northern long-eared bats display more winter activity than other cave species, with individuals occasionally moving between hibernacula throughout the winter (Griffin 1940, p. 185; Whitaker and Rissler 1992, p. 131; Caceres and Barclay 2000, pp. 2–3). Northern long-eared bats have shown a high degree of philopatry (*i.e.,* using the same site multiple years) to the hibernacula used (Pearson 1962, p. 30).

Northern long-eared bat hibernacula have fairly specific physical and biological requirements that make them suitable for northern long-eared bats. In general, bats select hibernacula because they have characteristics that allow the bats to meet specific life-cycle requirements. Factors influencing a hibernaculum's suitability include its physical structure (*e.g.,* openings, interior space, depth), air circulation, temperature profile, and location relative to foraging sites (Tuttle and Stevenson 1978, pp. 108–121). For a more detailed discussion on winter habitat, refer to the April 2, 2015, final listing rule (80 FR 17974).

Previous Federal Actions

Refer to the proposed (78 FR 61046; October 2, 2013) and final (80 FR 17974; April 2, 2015) listing rules for the northern long-eared bat for a detailed description of previous Federal actions concerning this species. On April 2, 2015, we published in the **Federal Register** (80 FR 17974) a final rule listing the northern long-eared bat as a threatened species. In the April 2, 2015, rule, we also established an interim rule under section 4(d) of the Act (16 U.S.C. 1531 *et seq.*). The final listing rule and the interim 4(d) rule both became effective on May 4, 2015. On January 14, 2016 (81 FR 1900), we published a final 4(d) rule, which became effective on February 16, 2016.

Critical Habitat

Background

Section 4(a)(3) of the Act, as amended, and implementing regulations (50 CFR 424.12), require that, to the maximum extent prudent and determinable, we designate critical habitat at the time the species is determined to be an endangered or threatened species. Critical habitat is defined in section 3 of the Act as:

(1) The specific areas within the geographical area occupied by the species, at the time it is listed in accordance with the Act, on which are found those physical or biological features

(a) Essential to the conservation of the species, and

(b) Which may require special management considerations or protection; and

(2) Specific areas outside the geographical area occupied by the species at the time it is listed, upon a determination that such areas are essential for the conservation of the species.

Our regulations at 50 CFR 424.02 defines the geographical area occupied by the species as: An area that may generally be delineated around species' occurrences, as determined by the Secretary (*i.e.,* range). Such areas may include those areas used throughout all or part of the species' life cycle, even if not used on a regular basis (*e.g.,* migratory corridors, seasonal habitats, and habitats used periodically, but not solely by vagrant individuals).

Conservation, as defined under section 3 of the Act, means to use, and the use of, all methods and procedures that are necessary to bring an endangered or threatened species to the point at which the measures provided pursuant to the Act are no longer necessary. Such methods and procedures include, but are not limited to, all activities associated with scientific resources management such as research, census, law enforcement, habitat acquisition and maintenance, propagation, live trapping, and transplantation, and, in the extraordinary case where population pressures within a given ecosystem cannot be otherwise relieved, may include regulated taking.

Critical habitat receives protection under section 7 of the Act through the requirement that Federal agencies ensure, in consultation with the Service, that any action they authorize, fund, or carry out is not likely to result in the destruction or adverse modification of critical habitat. The designation of critical habitat does not affect land ownership or establish a refuge, wilderness, reserve, preserve, or other conservation area. Critical habitat designation does not allow the government or public to access private lands, nor does it require implementation of restoration, recovery, or enhancement measures by non-Federal landowners. Where a landowner requests Federal agency funding or authorization for an action that may affect a listed species or critical habitat, the Federal agency would be required to consult under section 7(a)(2) of the Act, but even if consultation leads to a finding that the action would likely cause destruction or adverse modification of critical habitat, the resulting obligation of the Federal action agency and the landowner is not to restore or recover the species, but rather to implement reasonable and prudent alternatives to avoid destruction or adverse modification of critical habitat.

Under the first prong of the Act's definition of critical habitat, areas within the geographical area occupied by the species at the time it was listed are included in a critical habitat designation if they contain physical or biological features (1) which are essential to the conservation of the species and (2) which may require special management considerations or protection. For these areas, critical habitat designations identify, to the extent known using the best scientific and commercial data available, those physical or biological features that are essential to the conservation of the species (such as space, food, cover, and protected habitat). In identifying those physical or biological features, we focus

on the specific features that support the life-history needs of the species, including but not limited to, water characteristics, soil type, geological features, prey, vegetation, symbiotic species, or other features. A feature may be a single habitat characteristic, or a more complex combination of habitat characteristics. Features may include habitat characteristics that support ephemeral or dynamic habitat conditions. Features may also be expressed in terms relating to principles of conservation biology, such as patch size, distribution distances, and connectivity.

Under the second prong of the Act's definition of critical habitat, we can designate critical habitat in areas outside the geographical area occupied by the species at the time it is listed if we determine that such areas are essential for the conservation of the species. For example, an area that is currently occupied by the species, but was not occupied at the time of listing, may be essential to the conservation of the species and may be included in the critical habitat designation.

Section 4 of the Act requires that we designate critical habitat on the basis of the best scientific data available. Further, our Policy on Information Standards Under the Endangered Species Act (published in the **Federal Register** on July 1, 1994 (59 FR 34271)), the Information Quality Act (section 515 of the Treasury and General Government Appropriations Act for Fiscal Year 2001 (Pub. L. 106–554; H.R. 5658)), and our associated Information Quality Guidelines, provide criteria, establish procedures, and provide guidance to ensure that our decisions are based on the best scientific data available. For example, they require our biologists, to the extent consistent with the Act and with the use of the best scientific data available, to use primary and original sources of information as the basis for recommendations to designate critical habitat.

Critical Habitat Prudency Determination

Section 4(a)(3) of the Act, as amended, and implementing regulations (50 CFR 424.12), require that, to the maximum extent prudent and determinable, we designate critical habitat at the time the species is determined to be an endangered or threatened species. Our regulations (50 CFR 424.12(a)(1)) state that the designation of critical habitat is not prudent when any of the following situations exist: (i) The species is threatened by taking or other human activity, and identification of critical habitat can be expected to increase the degree of threat to the species, or (ii) such designation of critical habitat would not be beneficial to the species. The regulations also provide that, in determining whether a designation of critical habitat would not be beneficial to the species, the factors the Services may consider include but are not limited to: Whether the present or threatened destruction, modification, or curtailment of a species' habitat or range is not a threat to the species, or whether any areas meet the definition of ''critical habitat'' (50 CFR 424.12(a)(1)(ii)).

We have determined that both situations when a critical habitat designation would not be prudent apply to the northern long-eared bat. With respect to summer habitat, we have determined that designating critical habitat would not be beneficial to the species. Further, with respect to wintering habitat, we have determined that the species is threatened by taking or human activity and identification of critical habitat could be expected to increase the degree of this threat to the species. An explanation of these determinations follows.

Designating Summer Habitat Would Not Be Beneficial to the Species

The northern long-eared bat is widely distributed throughout much of its range during the summer months and is considered to be flexible with regards to summer habitat requirements.

The best scientific information available on summer habitat suggests that where the northern long-eared bat is found, it is widely distributed in a variety of wooded habitats (ranging from highly fragmented forest habitats to contiguous forest blocks from the southern United States to Canada's Yukon Territory), with generally non-specific habitat elements. There are elements of summer habitat that the northern long-eared bat needs (forests for roosting, raising young, foraging, and commuting between roosting and foraging habitat); however, the best available information indicates that the species' specific needs and preferences for these habitat elements are relatively flexible, plentiful, and widely distributed. Thus, summer habitat for the northern long-eared bat does not have specific physical or biological features that are essential to the conservation of the species and, therefore, does not meet the definition of critical habitat.

Furthermore, as discussed in the final listing rule (80 FR 17974; April 2, 2015), northern long-eared bat summer habitat is not limited or in short supply, and summer habitat loss is not a rangewide threat to the species. Based on a compilation of the total forested acres for each State in the northern long-eared bat's range (from the U.S. Forest Service's 2015 State and Private Forestry Fact sheets (available at *http://stateforesters.org/regional-state*)), there are an estimated 281,528,709 acres (113,213,960 hectares) of available forested habitat for the northern long-eared bat throughout its range in the United States (Service 2016, p. 28). This is assuming that all forested acres are suitable for the northern long-eared bat, which probably overestimates habitat availability, but such an assumption is not unreasonable given the northern long-eared bat's flexible selection of summer habitat and ability to use very small trees (≥3 in (8 cm) in dbh) (Service 2016, p. 18).

As we documented in the final listing rule (80 FR 17974; April 2, 2015), the extent of conversion from forest to other land cover types has been fairly consistent with conversion to forest (cropland reversion/plantings). Further, the recent past and projected future amounts of forest loss to conversion was, and is anticipated to be, only a small percentage of the total amount of forest habitat. For example, the U.S. Forest Service expects only 4 to 8 percent of the forested area found in 2007 across the conterminous United States to be lost by 2060 (U.S. Forest Service 2012, p. 12). Additionally, as discussed above, the northern long-eared bat has been documented to use a wide variety of forest types across its wide range (living in highly fragmented forest habitats to contiguous forest blocks from the southern United States to Canada's Yukon Territory). Because summer habitat for the northern long-eared bat is not limiting, and because the northern long-eared bat is considered to be flexible with regards to summer habitat, the availability of forested habitat does not now, nor will it likely in the future, limit the conservation of the northern long-eared bat.

The critical habitat regulations at 50 CFR 424.12(a)(1)(ii) provide two examples of when designating critical habitat may not be beneficial to the species and, therefore, may be not prudent: Where the present or threatened destruction, modification, or curtailment of a species' habitat or range is not a threat to the species, or where there are no areas that meet the definition of critical habitat for the species. The summer habitat for the northern long-eared bat falls within both examples. First, there are no areas of summer habitat that meet the definition of critical habitat for the northern long-eared bat. Second, the present or

threatened destruction, modification, or curtailment of summer habitat is not a threat to the species; rather, disease is the primary threat to the species within its summer habitat. In the final rule revising the critical habitat regulations (81 FR 7414; February 11, 2016), the Services expressly identified this situation as an example where designating critical habitat may not be beneficial to the species: ''In some circumstances, a species may be listed because of factors other than threats to its habitat or range, such as disease, and the species may be a habitat generalist. In such a case, on the basis of the existing and revised regulations, it is permissible to determine that critical habitat is not beneficial and, therefore, not prudent'' (see 81 FR 7425; February 11, 2016). Therefore, we conclude that designating the summer habitat of the northern long-eared bat as critical habitat is not prudent.

Increased Threat to the Taxon by Designating Critical Habitat in Their Hibernacula

Disturbance of hibernating bats (as discussed under Factor A of the final listing rule (80 FR 17974, April 2, 2015; see 80 FR 17989–17990)) has long been considered a threat to cave-hibernating bat species, including the northern long-eared bat. Northern long-eared bats hibernate during the winter months to conserve energy from increased thermoregulatory demands and reduced food resources. To increase energy savings, individuals enter a state of torpor, when internal body temperatures approach ambient temperature, metabolic rates are significantly lowered, and immune function declines (Thomas *et al.* 1990, p. 475; Thomas and Geiser 1997, p. 585; Bouma *et al.* 2010, p. 623). Each time a bat arouses from torpor, it uses a significant amount of energy to warm its body and increase its metabolic rate. These arousals during hibernation cause the greatest amount of energy depletion in hibernating bats (Thomas *et al.* 1990, p. 477). The cost and number of arousals are the two key factors that determine energy expenditures of hibernating bats in winter (Thomas *et al.* 1990, p. 475). Human disturbance at hibernacula can cause bats to arouse more frequently, causing premature energy store depletion and starvation (Thomas 1995, p. 944; Speakman *et al.* 1991, p. 1103), leading to marked reductions in bat populations (Tuttle 1979, p. 3) and increased susceptibility to disease.

The primary forms of human disturbance to hibernating bats result from recreational caving, vandalism, cave commercialization (cave tours and other commercial uses of caves), and research-related activities (Service 2007, p. 80). Fire building is also a common form of disturbance that, in addition to elevating interior temperatures (which is detrimental during hibernation) and accumulating smoke, can deposit soot on ceilings and eventually result in site abandonment by bats (Tigner and Stukel 2003, p. 54). In addition to unintended effects of commercial and recreational caving, intentional killing of bats in caves by shooting, burning, and clubbing has been documented (Tuttle 1979, pp. 4, 8). Intentional killing of northern long-eared bats has been documented at a small percentage of hibernacula (*e.g.,* one case of shooting disturbance in Maryland, and one case of bat torching in Massachusetts where approximately 100 bats (northern long-eared bats and other species) were killed) (Service, unpublished data).

Prior to the outbreak of WNS, Amelon and Burhans (2006, p. 73) indicated that ''the widespread recreational use of caves and indirect or direct disturbance by humans during the hibernation period pose the greatest known threat to this species (northern long-eared bat).'' In addition, human disturbance at hibernacula has been identified by many States as the next greatest threat to the bat after WNS. Of 14 States that assessed the possibility of human disturbance at bat hibernacula within the range of the northern long-eared bat, 13 identified at least 1 known hibernacula as having been negatively affected by human disturbance (Service 2012, unpublished data). Eight of these 14 States (Arkansas, Kentucky, Maine, Minnesota, New Hampshire, North Carolina, South Carolina, and Vermont) indicated the potential for human disturbance at over 50 percent of the known hibernacula in that State. Nearly all States without WNS identified human disturbance as the primary threat to hibernating bats, and all others (including WNS-positive States) noted that human disturbance either is of significant concern or is the next greatest threat after WNS (Service 2012, unpublished data).

Since the time of listing (April 2, 2015), additional information has become available that demonstrates that designating critical habitat for the northern long-eared bat would likely increase the threat from vandalism and disturbance, and could, potentially, increase the spread of WNS. In November 2015, we sought information from State fish and wildlife agencies and other public landowners with known bat caves or mines to determine: (1) How prevalent accounts of disturbance to bats and vandalism to hibernacula are throughout the species' range; and (2) the level and types of concerns that State fish and wildlife agencies and other landowners with known bat caves or mines have regarding the release of known bat hibernacula location information.

Prevalence of Disturbance—State and other agency or organization personnel provided information regarding specific incidents of disturbance of hibernating bats within their State or area of jurisdiction. Incidents were reported throughout the range of the northern long-eared bat. Evidence of vandalism of caves and mines and disturbance of bats included: dead bats, graffiti, trash, evidence of camp fires, bottle rockets, fireworks, digging or excavation, attempts to remove rock or minerals, alteration of cave or mine entrances, and damage to and breach of gates. There were also a few reported incidents of intentional killing of bats, including clubbing, thrown rocks, and burning. In addition, materials found in hibernacula, such as tennis rackets and blow torches, indicate harm inflicted on bats (NJDFW 2015, pers. comm.). There are few law enforcement reports regarding these incidents, either due to a lack of law enforcement actions or because reporting these incidents would publicize mine or cave locations (SCDNR 2015, pers. comm.).

Examples of incidents of vandalism and disturbance to bats at publicly known hibernacula have been found throughout the range of the northern long-eared bat; we received examples of vandalism and disturbance to bats from 20 State fish and wildlife agencies and 9 other public landowners (including Federal, State, and local agencies and organizations) with known northern long-eared bat hibernacula. Due to the large number of specific incidents, a small, representative subset of the examples we received is presented below. For purposes of illustrating that these incidents occur throughout the species' range, the information is organized into four geographic areas: Northeast, southeast, midwest, and west.

Northeast: In northeastern States such as Pennsylvania and New York, vandalism and disturbance to bats within hibernacula occurs frequently. Evidence of human use of caves and mines in Pennsylvania, including digging for new passage, waste, all-terrain-vehicle use, guns being shot, and burning, are common. There are also many examples of people trying to cut, remove, or get around gates to access gated hibernacula (PGFC 2015, pers. comm.). Due to the large numbers of people trespassing in Pennsylvania

caves and mines, especially during winter months while bats are hibernating, the Pennsylvania Game Commission installed cameras at many caves to capture visual proof of those illegally entering caves and send automated messages to alert a wildlife conservation officer of the entry. Since January 2015, conservation officers have confronted at least 50 suspected trespassers, resulting in more than 20 citations (PGFC 2015, pers. comm.). Similarly, in New York, nearly all ungated hibernacula, both on public and private lands, are visited by people, and many gated caves and mines have been compromised. Some sites have signs informing visitors that caves and mines are closed to visitation in the winter; however, this does not stop individuals from accessing those sites (NYDEC 2015, pers. comm.).

Southeast: In southeastern States such as South Carolina, North Carolina, and Kentucky, vandalism and disturbance to bats within hibernacula occurs often. For example, in South Carolina reports exist of bottle rockets being shot into a gated mine, missing locks on bat-friendly gates, litter inside a cave, and individuals barricading an entrance to a cave (SCDNR 2015, pers. comm.). In North Carolina, there are multiple incidents of vandalism to caves and mines. One particular mine in North Carolina has had repeated vandalism issues over several years, and multiple security fences, gates, and locks have been compromised by vandalism (NCWRC 2015, pers. comm.). In Kentucky, 82 of 118 total hibernacula where northern long-eared bats have been observed are exposed to human disturbance; in 2007, two people were convicted of intentionally killing more than 100 federally-listed Indiana bats in a Kentucky cave (USFWS 2010).

Midwest: There are multiple records of vandalism and disturbance of bats in Midwestern States, including Michigan, Indiana, Wisconsin, Missouri, and Minnesota. The first mine to have WNS-associated bat mortality in Michigan had been illegally accessed in 2013, when people used a torch to break the gate. The WNS-associated mortality was ''likely as a direct result of this disturbance'' (MIDNR 2015, pers. comm.). Winter visitation to caves in Indiana is relatively common, and in one particular incident, hibernating Indiana bats were intentionally burned (INDNR 2015, pers. comm.). In Wisconsin, five State-owned underground sites were sealed for use if there was a need for artificial hibernacula for WNS treatment trials; all five were breached (welded doors were ground off) during the spring of 2015. Additionally, one private landowner filled in a cave on their property when they learned it was occupied by bats (WDNR 2015, pers. comm.). In Missouri, there has been evidence of digging at cave entrances, parties, fires, fireworks, graffiti, off-highway vehicle use, gate damage, and trash left behind at caves throughout the State. In fact, there is an ongoing investigation and prosecution regarding illegal entry at a Missouri cave (MDC 2016, pers. comm.). Issues with breached gates and broken locks occurred at several Minnesota caves; approximately 4 years ago, surveyors found bat bones and shotgun shells in one cave.

West: In States such as South Dakota, Arkansas, and Oklahoma in the western portion of the northern long-eared bat's range, there are several records of incidents of vandalism and disturbance to bats as well. The South Dakota Department of Game, Fish, and Parks provided literature with evidence of both historical and ongoing vandalism at their State's hibernacula. Increasing disturbance of known hibernacula throughout the Black Hills area is noted as one of the greatest threats to bat populations in the area (Tigner and Stukel 2003, p. 11). Some of the more disruptive and damaging activities inside caves and abandoned mines include discharging firearms and fireworks, spray-painting, campfire construction, and intentionally killing bats and other wildlife (Tigner and Stukel 2003, p. 54). At one particular cave, campfires are common during hibernation, and only a small fraction of the bats identified in the cave in the early 1990s still use the cave (Tigner 2002, p. 7). In Arkansas, approximately 200 endangered gray bats (*Myotis grisescens*) were killed at a major gray bat hibernaculum on National Park Service land (AGFC 2015, pers. comm.). In Oklahoma, there have been multiple incidents involving cutting fences around gate entrances, breaching cave gates (by cutting, digging under, or removing structures around gates to gain access), and campfires near cave entrances (Service 2015, pers. comm.).

Summary: As illustrated by the examples above, which are only a small subset of the reported incidents, we have extensive rangewide evidence that indicates known northern long-eared bat hibernacula have been, and are likely to continue to be, disturbed and vandalized. These acts not only lead to increases in disturbance during the northern long-eared bat's sensitive hibernation period, which, in turn, leads to decreased survival, but also may lead to direct mortality of northern long-eared bats.

Concerns over Release of Location Information—Northern long-eared bats that are infected with WNS are believed to be less resilient to disturbance and resulting arousal, and the northern long-eared bat is one of the most highly susceptible bat species to WNS (Langwig *et al.* 2014). As discussed in the final listing rule (80 FR 17974, April 2, 2015; see 80 FR 17993–17998), WNS-causing fungal spores can be transmitted not only by bat-to-bat transmission, but also by human actions (USGS National Wildlife Health Center, Wildlife Health Bulletin 2011–05), and decontamination remains one of the only management options available to reduce the risk of human-assisted transmission. State, Federal, and local agencies and organizations are especially concerned with the spread of WNS if cave and mine locations are made public, especially in sites where WNS has not been found or in areas that have not yet been inundated with the disease. Several agency and organization personnel expressed concern regarding those visiting caves and mines and not properly decontaminating after leaving hibernacula, which may result in these visitors spreading WNS fungal spores by using contaminated gear in uninfected caves or mines (ANHC 2015, pers. comm.; CDEEP 2015, pers. comm.; KDFWR 2015, pers. comm.; NBSRP 2015, pers. comm.; NJDVW 2015, pers. comm.; WDNR 2015, pers. comm.; WGFD 2015, pers. comm.). It is possible that the spread of WNS was enhanced by human transfer of fungal spores in some States, such as Connecticut (CDEEP 2015, pers. comm.).

State, Federal, and local agencies that gather specific location information exercise extra efforts to protect hibernacula location information from becoming readily available to the public. In fact, many States reported that they are concerned that release of location information could significantly increase human visitation, thereby increasing disturbance to bats, and, therefore, they do not share hibernacula location information with the public. For example, the Wisconsin Department of Natural Resources stated, ''we have not shared locational information as to maternity sites and hibernacula. Under state law, locations deemed critical to the survival of the species may be withheld from the public. All data in the WI Natural Heritage Inventory are exempt from State open records laws'' (WDNR 2015, pers. comm.). Some agencies and organizations state that when location information is disclosed, an agreement typically must be in place with those requesting the location

information to protect the data, and point data are buffered to conceal the specific locations. Similarly, in Missouri, the Missouri Department of Conservation (MDC) does not release hibernacula locations to the general public, and location information for caves not owned by MDC cannot be disclosed by the State (MDC 2016, pers. comm.).

In addition to protecting location information, State, Federal, and local agencies and organizations use other means to protect bat hibernacula, such as installation of bat-friendly gates. Direct protection of caves and mines can be accomplished through installation of bat-friendly gates that allow passage of bats while reducing disturbance from human entry as well as reducing changes to the cave microclimate from air restrictions. Bat-friendly gates are generally thought to be effective in preventing disturbance of hibernating bats and vandalism of hibernacula (AGFC 2015, pers. comm.; ANF 2015, pers. comm.; ANHC 2015, pers. comm.; BNR 2015, pers. comm.; CDEEP 2015, pers. comm.; DMCC 2015, pers. comm.; IADNR 2015, pers. comm.; ILDNR 2015, pers. comm.; INDNR 2015, pers. comm.; KDFWR 2015, pers. comm.; MANG 2015, pers. comm.; MDC 2016, pers. comm.; MIDNR 2015, pers. comm.; NBSRP 2015, pers. comm.; NGDFW 2015, pers. comm.; NYDEC 2015, pers. comm.; ONF 2015, pers. comm.; ONSR 2015, pers. comm.; OSFNF 2015, pers. comm.; PGC 2015, pers. comm.; SCDNR 2015, pers. comm.; SDGFP 2015, pers. comm.; SMP 2015, pers. comm.; WDNR 2015, pers. comm.), although attempts to protect hibernacula from disturbance have varying degrees of effectiveness. In most States for which we have information, a small percentage of caves and mines are gated, and a majority of State agencies indicated that there is a need to gate additional caves and mines used by bats. For example, in Missouri, less than approximately 2 percent of known hibernacula have bat-friendly gates Statewide (MDC 2015, pers. comm.). Attempts to remove gates at hibernacula are numerous and pervasive throughout the northern long-eared bat's range, although the success of removal attempts varies. Some State and Federal agencies and other organizations state that attempts to remove gates are rarely successful; others, such as the Kentucky Department of Fish and Wildlife Resources, state that removal attempts are almost always successful: ''When parties wish to gain access, they are very resourceful and come prepared to cut, dig, pry, or use any other means necessary to enter. The remote nature of some sites does not seem to deter vandalism either'' (KDFWR 2015, pers. comm.). See *Prevalence of Disturbance,* above, for more examples of attempts to remove gates.

The process of designating critical habitat would increase human threats to the northern long-eared bat by increasing the vulnerability of this species to disturbance during its sensitive hibernation period and by increasing the likelihood of vandalism to its winter hibernacula by publicly disclosing the locations of those hibernacula. Northern long-eared bats are particularly sensitive to disturbance while hibernating, and such disturbance further reduces survival chances of already compromised, WNS-infected bats. Additionally, increased human access to hibernacula may facilitate or accelerate the spread of WNS to uninfected sites, as people may carry the fungal spores from site to site. Designation of critical habitat requires the publication of maps and a specific narrative description of critical habitat in the **Federal Register**. The degree of detail in those maps and boundary descriptions is far greater than the general location information provided in the final listing rule (80 FR 17974; April 2, 2015). Furthermore, a critical habitat designation normally results in the news media publishing articles in local newspapers and on special interest Web sites, usually with maps of the critical habitat. We have determined that the publication of maps and descriptions outlining the locations of this species' wintering areas would increase awareness and visitation of hibernacula, and thus disturbance of bats, as those interested in accessing caves and mines would then have detailed location information for these hibernacula. As expressed by many State bat biologists and land managers with hibernacula within their area of jurisdiction, there is a strong concern regarding publicizing cave and mine location information due to the increased threat of disturbance to the northern long-eared bat, and bats in general. Furthermore, human disturbance may exacerbate the effect of WNS on northern long-eared bats; providing a literal map of bat hibernacula in the form of critical habitat will likely facilitate human disturbance and may further compound threats to the species. We, therefore, conclude that the northern long-eared bat is threatened by taking and other human activity, and identification of critical habitat can be expected to increase the degree of threat to the species. Designating critical habitat is therefore not prudent under the regulations at 50 CFR 424.12(a)(1)(i). As discussed earlier, the risk of increased threats from publishing hibernacula locations is significant. The northern long-eared bat, and bats in general, are very sensitive to disturbance while hibernating, and there are numerous known incidents of vandalism, targeted killing, and disturbance of hibernating northern long-eared bats throughout the species' range. The public has great interest in visiting caves and mines for recreational purposes, and human-caused disturbance has clear effects on hibernating bats. Thus, any action that publicly discloses the location of northern long-eared bat hibernacula (such as a critical habitat designation) puts the species in further peril. One of the basic measures to protect northern long-eared bats from vandalism and disturbance while hibernating is restricting access to information pertaining to the location of the species' hibernacula. Publishing maps and narrative descriptions of northern long-eared bat critical habitat would significantly affect our ability to reduce the threat of vandalism and disturbance of hibernacula and hibernating bats and may facilitate or intensify the spread of WNS by humans.

Summary of Prudency Determination

We have determined that designating critical habitat for the northern long-eared bat is not prudent. Designating summer habitat as critical habitat is not beneficial to the species, because there are no areas within the summer habitat of the species that meet the definition of critical habitat. Further, the primary threat to the species is the disease WNS; the destruction, modification, or curtailment of summer habitat is not a threat to the species as suitable summer habitat continues to exist and is not limited throughout the species' range. Therefore, designating critical habitat in the summer habitat areas would not be beneficial. Moreover, designating winter habitat as critical habitat would disclose hibernacula location information, and thereby increase the threat to the northern long-eared bat from vandalism and disturbance at hibernacula and could, potentially, increase the spread of WNS. Disturbance of hibernating bats has long been considered a threat to cave-hibernating bat species, and has been identified as the next greatest threat to this taxon after WNS. Human disturbance at hibernacula causes bats to arouse more frequently, leading to premature energy store depletion and, possibly, starvation. Further compounding the effects of disturbance, northern long-eared bats that are

infected with WNS are believed to be less resilient to disturbance and resulting arousal. Furthermore, increased human visitation of hibernacula could intensify the spread of WNS from infected to uninfected sites. We have, therefore, determined in accordance with 50 CFR 424.12(a)(1) that it is not prudent to designate critical habitat for the northern long-eared bat.

RIN 0648–XE564

Fisheries of the Northeastern United States; Summer Flounder Fishery; Quota Transfer

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; quota transfer.

SUMMARY: NMFS announces that the Commonwealth of Virginia is transferring a portion of its 2016 commercial summer flounder quota to the Commonwealth of Massachusetts. These quota adjustments are necessary to comply with the Summer Flounder, Scup and Black Sea Bass Fishery Management Plan quota transfer provision. This announcement informs the public of the revised commercial quotas for Virginia and Massachusetts.

DATES: Effective April 26, 2016, through December 31, 2016.

FOR FURTHER INFORMATION CONTACT: Elizabeth Scheimer, Fishery Management Specialist, (978) 281–9236.

SUPPLEMENTARY INFORMATION: Regulations governing the summer flounder fishery are found in 50 CFR 648.100 through 648.110. The regulations require annual specification of a commercial quota that is apportioned among the coastal states from Maine through North Carolina. The process to set the annual commercial quota and the percent allocated to each state are described in § 648.102.

The final rule implementing Amendment 5 to the Summer Flounder Fishery Management Plan, as published in the **Federal Register** on December 17, 1993 (58 FR 65936), provided a mechanism for transferring summer flounder commercial quota from one state to another. Two or more states, under mutual agreement and with the concurrence of the NMFS Greater Atlantic Regional Administrator, can transfer or combine summer flounder commercial quota under § 648.102(c)(2). The Regional Administrator is required to consider the criteria in § 648.102(c)(2)(i)(A) through (C) in the evaluation of requests for quota transfers or combinations.

Virginia is transferring 6,525 lb (2,959 kg) of summer flounder commercial quota to Massachusetts. This transfer was requested by Virginia to repay landings by a Virginia-permitted vessel that landed in Massachusetts under a safe harbor agreement.

The revised summer flounder quotas for calendar year 2016 are now: Virginia, 1,755,829 lb (796,430 kg); and Massachusetts, 577,777 lb (262,075 kg) based on the initial quotas published in the 2016–2018 Summer Flounder, Scup and Black Sea Bass Specifications, (December 28, 2015, 80 FR 80689) and previous 2016 quota transfers (March 8, 2016, 81 FR 12030 and April 14, 2016, 81 FR 22032).

Classification

This action is taken under 50 CFR part 648 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: April 21, 2016.

Fisheries of the Exclusive Economic Zone Off Alaska; Bering Sea and Aleutian Islands Management Area; American Fisheries Act; Amendment 111

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues this final rule to implement Amendment 111 to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP). This final rule reduces bycatch limits, also known as prohibited species catch (PSC) limits, for Pacific halibut in the Bering Sea and Aleutian Islands (BSAI) groundfish fisheries by specific amounts in four groundfish sectors: The Amendment 80 sector (non-pollock trawl catcher/processors); the BSAI trawl limited access sector (all non-Amendment 80 trawl fishery participants); the non-trawl sector (primarily hook-and-line catcher/processors); and the Western Alaska Community Development Quota Program (CDQ Program). This final rule establishes the following halibut PSC limits: 1,745 mt for the Amendment 80 sector; 745 mt for the BSAI trawl limited access sector; 710 mt for the BSAI non-trawl sector; and 315 mt for the CDQ Program. This results in an overall BSAI halibut PSC limit of 3,515 mt. This action is necessary to minimize halibut bycatch in the BSAI groundfish fisheries to the extent practicable and to achieve, on a continuing basis, optimum yield from the BSAI groundfish fisheries. This action is intended to promote the goals and objectives of the Magnuson-Stevens Fishery Conservation and Management Act, the FMP, and other applicable laws.

DATES: Effective May 27, 2016.

ADDRESSES: Electronic copies of the Environmental Assessment (EA), Regulatory Impact Review (RIR), and Finding of No Significant Impact (FONSI) prepared for this action, collectively ''the Analysis;'' the FMP; and the proposed rule are available from *http://www.regulations.gov* or from the

NMFS Alaska Region Web site at *http://alaskafisheries.noaa.gov.*

FOR FURTHER INFORMATION CONTACT: Rachel Baker or Mary Alice McKeen, 907–586–7228.

SUPPLEMENTARY INFORMATION:

Background

NMFS manages the groundfish fisheries in the Exclusive Economic Zone (EEZ) of the BSAI under the FMP. The North Pacific Fishery Management Council (Council) prepared, and the Secretary of Commerce (Secretary) approved, the FMP pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) and other applicable laws. Regulations implementing the FMP appear at 50 CFR part 679. General regulations that pertain to U.S. fisheries appear at 50 CFR part 600. NMFS manages fishing for Pacific halibut through regulations established under the authority of the Northern Pacific Halibut Act of 1982.

NMFS published the Notice of Availability for Amendment 111 on October 29, 2015 (80 FR 66486) with comments invited through December 28, 2015. NMFS published the proposed rule to implement Amendment 111 on November 16, 2015 (80 FR 71650) with comments invited through December 16, 2015. The Secretary approved Amendment 111 on January 20, 2016. NMFS received 39 unique comments on the FMP and proposed rule from 17 different commenters. A summary of these comments and the responses by NMFS are provided under the heading Response to Comments below. These comments did not result in any change to the proposed rule.

A detailed review of the provisions of Amendment 111, the proposed regulations to implement Amendment 111, and the rationale for these regulations is provided in the preamble to the proposed rule (80 FR 71650, November 16, 2015) and is not repeated here (see **ADDRESSES**). The preamble to this final rule provides a brief review of the regulatory changes made by this final rule. In this preamble, unless otherwise noted, the citations to regulations are to the regulations that will be in place after the effective date of this final rule.

NMFS manages halibut PSC, also known commonly as halibut bycatch, in groundfish fisheries under the authority of the Magnuson-Stevens Act. Under Section 3.6.1 of the FMP, and the implementing regulation at § 679.21(a)(2), prohibited species are Pacific halibut, Pacific herring, Pacific salmon and steelhead, king crab, and Tanner crab. Under the FMP and the regulations, prohibited species must be avoided while fishing for groundfish and must be returned to the sea with a minimum of injury except where retention is required or authorized by law.

Under the Magnuson-Stevens Act, bycatch includes fish that are discarded for any reason, including discards required by regulation, or for economic reasons, such as the fact that the fish might be of an undesirable size, sex, or quality (16 U.S.C. 1802 (3); 16 U.S.C. 1802 (9)). Halibut PSC is one type of bycatch; it is a regulatory discard. Regulations at § 679.21(a)(2) require the discard of all halibut that is caught while directed fishing for groundfish in the BSAI or the Gulf of Alaska. A limited exception to this discard requirement is provided for donations of halibut made under the prohibited species donation program authorized in regulation at § 679.26. In this preamble, when NMFS refers to halibut bycatch, NMFS means halibut PSC.

Pacific halibut (*Hippoglossus stenolepis*) is fully utilized in the waters off Alaska as a target species in subsistence, personal use, recreational (sport), and commercial halibut fisheries. Halibut is also incidentally taken as bycatch in groundfish fisheries. Although participants in the groundfish fisheries are under an obligation to avoid halibut, all halibut cannot be avoided. The groundfish fisheries cannot be prosecuted without some amount of halibut bycatch because groundfish and halibut occur in the same areas at the same times and because no fishing gear or technique has been developed that can avoid all halibut bycatch.

Although halibut is taken as bycatch by vessels using all types of gear (trawl, hook-and-line, pot, and jig gear), halibut bycatch primarily occurs in the trawl and hook-and-line groundfish fisheries. Halibut bycatch occurs in both the Gulf of Alaska and the BSAI. The greatest portion of halibut bycatch occurs in the BSAI. NMFS manages halibut bycatch in the BSAI groundfish fisheries by (1) establishing halibut PSC limits for trawl and non-trawl fisheries; (2) apportioning those halibut PSC limits to groundfish sectors, fishery categories, and seasons; and (3) managing groundfish fisheries to prevent halibut PSC use from exceeding the established limits. The proposed rule contains a detailed explanation of halibut bycatch management in the BSAI groundfish fisheries (80 FR 71650, 71654–71660, November 16, 2015).

Consistent with National Standard 1 and National Standard 9 of the Magnuson-Stevens Act, the Council and NMFS use halibut PSC limits in the BSAI groundfish fisheries to minimize bycatch to the extent practicable as required by National Standard 9, while achieving, on a continuing basis, optimum yield from the groundfish fisheries as required by National Standard 1. With one limited exception, groundfish fishing is prohibited once a halibut PSC limit has been reached for a particular sector, fishery, or season, depending on the particular halibut PSC limit. The limited exception is that groundfish fishing in the pollock/Atka mackerel/''other species'' trawl fishery is not prohibited if that fishery reaches its halibut PSC limit. (80 FR 71650, 71658, November 16, 2015). Although there is no formal regulatory constraint, this fishery (pollock/Atka mackerel/''other species'') has not exceeded its halibut PSC limit in recent years (*i.e.,* 2013, 2014 and 2015).

The use of halibut PSC limits in the groundfish fisheries reduces halibut bycatch and promotes conservation of the halibut resource. Halibut bycatch in the groundfish fisheries may affect commercial, sport, and subsistence halibut fishing opportunities by decreasing the amount of halibut available for those fisheries. Therefore, the Council and NMFS establish halibut PSC limits to balance the needs of fishermen, fishing communities, and U.S. consumers that consume halibut and groundfish.

Actions Implemented by This Rule

This final rule changes the halibut PSC limits for BSAI groundfish fisheries. This table shows the current halibut PSC limits and the halibut PSC limits that will be in effect with this final rule.

BSAI Groundfish fisheries—sectors	Description of sector	Previous halibut PSC limit (mt)	Halibut PSC limit established under this final rule (mt)	Percentage decrease from the previous halibut PSC limit
1. Amendment 80	Non-pollock trawl catcher/processors	2,325	1,745	25
2. BSAI trawl limited access	All other trawl catcher/processors	875	745	15
3. BSAI non-trawl	Primarily hook-and-line catcher/processors	833	710	15
4. CDQ Program	Vessels fishing for CDQ groups	393	315	20
Overall BSAI limit		4,426	3,515	21

PSC limits are stated in metric tons of halibut mortality.
CDQ Program = Western Alaska Community Development Quota Program.

With one exception, this final rule does not change the complex process for apportioning halibut PSC limits among sectors, fisheries, and seasons (see regulations at § 679.21(b)). The exception is that this final rule makes a single process change to halibut PSC apportionment for the CDQ Program. Under current regulations, the allocation of halibut PSC to the CDQ Program is made as a Prohibited Species Quota Reserve (PSQ Reserve) that is derived partly from the halibut PSC limit established for the trawl fisheries and partly from the halibut PSC limit for the non-trawl fisheries. This final rule establishes a separate halibut PSC limit for the CDQ Program. The halibut PSC limit for the CDQ Program will be established specifically in regulation, and will no longer be derived from the halibut PSC limit established for the trawl and non-trawl fisheries.

For a full description of the apportionment of halibut PSC among the BSAI groundfish fisheries, see the section in the preamble to the proposed rule, ''Halibut Bycatch Management in the BSAI Groundfish Fisheries'' (80 FR 71650, 71655–71656, November 16, 2015).

Summary of Regulatory Changes

This final rule makes the following changes to regulations at 50 CFR part 679:

- Moves the general provisions on prohibited species bycatch management from § 679.21(b) to § 679.21(a).
- Moves all the provisions on BSAI halibut bycatch management in current § 679.21(e) to a new § 679.21(b) and reorganizes the provisions in the new § 679.21(b) to improve clarity.
- Establishes new BSAI halibut PSC limits in § 679.21(b): 1,745 mt for the Amendment 80 sector; 745 mt for the BSAI trawl limited access sector; 710 mt for the BSAI non-trawl sector; and 315 mt for the CDQ Program.
- Uses the term ''PSC allowance'' rather than ''bycatch allowance'' in § 679.21(b) and uses the term ''PSC'' rather than ''incidental catch'' in § 679.21(b)(1)(ii)(C).
- Changes cross-references from § 679.21(e) to § 679.21(b) where necessary.
- Changes the BSAI halibut PSC limits in Table 35 and Table 40 to the new limits.

Changes From the Proposed Rule

This final rule does not change any of the regulations as proposed in the proposed rule (80 FR 71650, November 16, 2015).

Response to Comments

NMFS received 39 unique comments on the proposed rule or Amendment 111 from 17 commenters. The 17 commenters consisted of six individuals; three fishing industry groups, one of which represents Amendment 80 participants, one of which represents hook-and-line catcher/processors, one of which represents predominantly hook-and-line catcher vessels; three Alaska Native Tribal Organizations; one Alaska Native Village Corporation; one non-profit corporation engaged in commercial fishing; one for-profit corporation engaged in wilderness marine tours; one conservation organization; and one anonymous comment.

Of the 17 commenters, 14 explicitly supported adoption of the proposed halibut PSC reductions. Most of these commenters (12 out of 14) favored larger halibut PSC limit reductions. The comment from the corporation engaged in wilderness tours was the only comment that recommended that the Secretary disapprove Amendment 111. The comment from the Amendment 80 fishing industry group questioned whether the proposed halibut PSC limit reductions were practicable but did not recommend disapproval of Amendment 111 or rejection of the proposed rule.

In responding to these comments, when NMFS refers to Amendment 111, unless otherwise noted, NMFS means Amendment 111 and this final rule implementing Amendment 111. There were no public comments asserting that the proposed rule is not consistent with Amendment 111, and NMFS did not make any changes from the proposed to this final rule. Therefore, NMFS' responses to comments on Amendment 111 also apply to the proposed and final rules.

Comments Related to the Magnuson-Stevens Act and National Standards Generally

Comment 1: Amendment 111 should be approved and implemented.

Response: The Secretary, through his designee, the Assistant Administrator for Fisheries, approved Amendment 111 on January 20, 2016, and implements Amendment 111 with this final rule. The Secretary concluded that the PSC limit reductions in Amendment 111 are consistent with the Magnuson-Stevens Act including the national standards and other applicable law.

Comment 2: Twelve commenters stated they were in favor of the Secretary approving Amendment 111 but would have preferred larger reductions in the PSC limits. Some of these commenters stated that Amendment 111 was a ''first step,'' was ''a step in the right direction,'' and was ''a positive action,'' to reducing BSAI halibut bycatch.

Response: Before the Council recommended Amendment 111 for approval and implementation by the Secretary, the Council reviewed an extensive record that included the Analysis, input from Council and NMFS staff, and extensive public testimony. The Council considered a broad range of potential halibut PSC limit reductions, and recommended Amendment 111 only after considering halibut PSC limit reductions that ranged from 10 to 50 percent lower than the current halibut PSC limits in each BSAI groundfish sector. The Council recommended halibut PSC limit reductions within the range of the alternatives considered.

The Council concluded, and the Secretary agreed, that Amendment 111 is consistent with all national standards,

and specifically the directive in National Standard 9 to minimize halibut PSC to the extent practicable while preserving the potential for the harvest of optimum yield in the BSAI fisheries consistent with National Standard 1. The Council also concluded, and the Secretary agreed, that Amendment 111 would take into account the effect of halibut PSC limit reductions on communities dependent on the groundfish fisheries and communities dependent on the halibut fishery consistent with National Standard 8. The Council concluded, and NMFS agrees, that the PSC limits reductions in Amendment 111 met the purpose and need for this action, namely to minimize bycatch to the extent practicable while preserving the potential for optimum yield from the groundfish fisheries. (Section 1.2 of Analysis) The rationale for rejecting larger PSC reductions in each sector is explained in the proposed rule (80 FR 71650, 71663—71668, November 16, 2015) and is summarized in the response to Comment 14.

Comment 3: NMFS should adopt the BSAI halibut PSC limits in Amendment 111 by implementing a final rule with those reductions. However, NMFS should reject the part of the proposed rule that asserts that the proposed rule complies with the Magnuson-Stevens Act because Amendment 111 does not represent a proper balancing of the national standards in the Magnuson-Stevens Act.

Response: As explained in response to Comments 1 and 2, the Secretary determined that Amendment 111 is consistent with the national standards and other applicable law and approved Amendment 111 on January 20, 2016.

Comment 4: The Secretary should disapprove Amendment 111, withdraw the proposed rule, and instruct the Council to expedite the preparation of a new FMP amendment that recommends larger halibut PSC limit reductions.

Response: As explained in response to Comments 1 and 2, the Secretary has determined that Amendment 111 is consistent with the national standards and other applicable law and approved Amendment 111 on January 20, 2016. The Council recommended Amendment 111 after considering halibut PSC limit reductions that were 10 to 50 percent lower than the current halibut PSC limits in each BSAI groundfish sector. The Council concluded that larger reductions are not practicable and would reduce the net benefit to the nation. The rationale the Council and NMFS used for concluding that larger reductions in PSC limits are not practicable is described in the preamble to the proposed rule. (80 FR 71650, 71663–71668, November 16, 2015). See also responses to Comments 2 and 14.

Comment 5: The proposed rule concluded that the halibut PSC limit reductions for the Amendment 80 sector would provide the greatest benefit to the nation. (80 FR 71650, 71664, November 16, 2015) In reaching this conclusion, NMFS did not consider the high value of the halibut fishery and resource.

Response: NMFS agrees that halibut has a high socioeconomic value but disagrees that the Analysis for this action did not take that into account. The Analysis contains numerous sections that describe the value of the commercial halibut fishery and summarize the potential impact of halibut PSC reductions ranging from 10 to 50 percent lower than the current halibut PSC limits in each sector (see Sections 4, 5 and Appendix D in the Analysis). For each level of halibut PSC limit reduction analyzed, the Analysis evaluated possible benefits to the directed halibut fishery by looking at the estimated increase in wholesale revenues in the directed halibut fishery that would occur from each level of reduction. The wholesale revenues in the directed halibut fishery are based on the estimated price per pound for halibut sold (see, *e.g.,* Table ES–4 and ES–5 in the Analysis).

The Analysis also looked at the socioeconomic value of halibut among the various communities that participate in the halibut fisheries. Section 4.5.3 and Appendix C of the Analysis described the socioeconomic impacts of the alternatives analyzed by the Council before it selected a preferred alternative. Appendix C looked at various metrics to measure the value of the directed halibut fisheries to communities including vessel ownership related to the directed commercial halibut fishery and employment related to the directed commercial halibut fishery. Appendix C also evaluated the value of halibut, and the potential impacts from the action alternatives, on the subsistence fisheries, and Section 3.1.4.3 assessed the potential impact of Amendment 111 on sport halibut fisheries.

Comment 6: NMFS should take, or commit to taking, the following additional actions to reduce halibut bycatch: Additional reductions in the halibut PSC limits; modifications to the process for annual groundfish total allowable catch (TAC) allocations to better incorporate concerns about halibut bycatch; adopting an abundance-based management for halibut so that PSC limits in some way automatically decrease when halibut is scarce and automatically increase when halibut is abundant; adopting a performance standard for halibut PSC management by the Amendment 80 sector; mandating deck sorting to ensure halibut are returned to sea as soon as possible to reduce the mortality of halibut bycatch; limiting the reallocation of halibut PSC from the BSAI trawl limited access sector to the Amendment 80 sector so that unused halibut PSC in the BSAI trawl limited access sector is not fully used; and adopting area closures for the BSAI groundfish fisheries on a seasonal basis to reduce the potential impacts of groundfish fisheries on halibut habitat.

Response: The actions suggested by the commenters are outside the scope of this final rule. NMFS notes that the Council and NMFS, in conjunction with the IPHC, are considering a range of actions to improve the management of halibut PSC. Several of the actions suggested by the commenter are under consideration. A partial list of actions underway or under consideration follows:

- A joint meeting to promote a more collaborative approach to halibut management in February 2015;
- The development of a halibut framework document to further the objective to balance the needs of directed halibut users and halibut bycatch users in the BSAI and Gulf of Alaska. This framework document will be reviewed by the Council in April 2016;
- The establishment of a work group comprised of Council, NMFS, and IPHC staff to evaluate linking halibut PSC limits to a metric or metrics of halibut abundance in December 2015;
- Beginning in December 2015, annual reporting by Amendment 80 cooperatives describing their ongoing efforts to avoid halibut bycatch to ensure halibut PSC use is below the halibut PSC limits that would be established for the Amendment 80 cooperatives under this final rule; and
- NMFS' approval of an expedited exempted fishing permit in 2015 to evaluate halibut deck sorting as a means to reduce halibut bycatch mortalities (Appendix A–7 of the Analysis). NMFS is currently processing an application for an additional exempted fishing permit to test halibut deck sorting methods for 2016.

For a more complete description of the range of actions being considered by the Council, IPHC, and NMFS to address halibut bycatch management, please see the newsletters on the Council's Web site: *http://www.npfmc.org/npfmc-newsletters/.*

Comments Associated With Specific National Standards

Comment 7: Under National Standard 1, an FMP should prevent overfishing while achieving, on a sustainable basis, the ''optimum yield'' from a fishery. The definition of optimum yield in the Magnuson-Stevens Act states that the optimum yield is the amount of fish that ''will provide the greatest overall benefit to the Nation, particularly with respect to food production and recreational opportunities, and taking into account the protection of marine ecosystems.'' (16 U.S.C. 1802(33)) Halibut bycatch is preventing the directed halibut fishery from achieving optimum yield.

Response: Halibut does not have an ''optimum yield'' within the Magnuson-Stevens Act definition because halibut is not managed pursuant to the Magnuson-Stevens Act. Halibut is managed under the Convention between the United States and Canada for the Preservation of the Halibut Fishery of the North Pacific Ocean and Bering Sea (Convention), signed at Ottawa, Ontario, on March 2, 1953, as amended by a Protocol Amending the Convention (signed at Washington, DC on March 29, 1979). The Convention is implemented in the U.S. by the Northern Pacific Halibut Act of 1982 (Halibut Act). Therefore halibut bycatch is not preventing the achieving of optimum yield in the directed halibut fishery because halibut does not have an ''optimum yield'' established under the Magnuson-Stevens Act.

Pursuant to the Convention, the International Pacific Halibut Commission (IPHC) makes stock assessment and catch limit decisions for halibut. Although the IPHC does not establish an ''optimum yield'' for halibut, the IPHC harvest policy includes a harvest control rule that reduces commercial harvest rates linearly if the stock is estimated to have fallen below established thresholds for female spawning biomass. These harvest control rules would severely curtail the commercial halibut fishery during times of particularly poor stock conditions. The current status of the halibut stock has not triggered the application of the IPHC's restrictive harvest control rules. (Proposed Rule, 80 FR 71650, 71652, November 16, 2015). Even without any reduction in halibut PSC limits, the halibut stock is stable or potentially increasing slightly in overall abundance, as measured by the IPHC stock assessment of exploitable halibut biomass and female spawning biomass. (Section 3.1.1 of the Analysis; 80 FR 71650, 71651, November 16, 2015).

Amendment 111 does, however, seek to reduce halibut bycatch in the BSAI groundfish fisheries to the extent practicable as required by National Standard 9. If halibut bycatch is decreased, there will be more halibut available for the IPHC to allocate to the directed halibut fisheries: Commercial, sport and subsistence. NMFS therefore expects that this action will decrease halibut PSC use and will make more halibut available for the directed halibut fisheries.

Comment 8: Amendment 111 does not properly balance National Standard 1 and National Standard 9. NMFS has described the purpose of the amendment as limiting ''the use of PSC limits to minimize halibut bycatch in the groundfish fisheries, to the extent practicable, while achieving, on a continuing basis, optimum yield from the groundfish fisheries.'' (*e.g.,* Notice of Availability, 80 FR 66486, 66487, October 29, 2015; Proposed Rule, 80 FR 71650, 71651, November 16, 2015). These statements indicate that halibut PSC limit reductions are only practicable if the reductions allow for optimum yield in the groundfish fishery. National Standard 1 and National Standard 9, read together, require that necessary and practicable bycatch reduction measures must be implemented, even if that results in a downward adjustment in the optimum yield of the BSAI groundfish fishery.

Response: The preferred alternative that is implemented by this final rule balances the need to minimize halibut bycatch to the extent practicable, consistent with National Standard 9, with the requirement to achieve optimum yield in the groundfish fishery, consistent with National Standard 1. In developing the preferred alternative, NMFS and the Council have appropriately balanced obligations under National Standard 1 and National Standard 9.

Section 1.2 of the Analysis states: ''The purpose of the proposed action is to minimize halibut PSC in the commercial groundfish fisheries to the extent practicable, *while preserving the potential for the optimum harvest of the groundfish TACs assigned to the trawl and non-trawl sectors.''* (emphasis added) The preferred alternative selected by the Council and implemented by this final rule preserves the potential for the BSAI groundfish fisheries to achieve optimum yield by harvesting the TACs assigned to the different BSAI groundfish fisheries. However, this final rule may result in some BSAI groundfish fisheries, in some years, harvesting less than their TACs.

The Council and NMFS did not exclude the preferred alternative implemented by this final rule because it may result in a decrease in groundfish harvests in some groundfish fisheries in some years. The Analysis before the Council and NMFS states that the halibut PSC limit reductions imposed under Amendment 111 may result in decreased harvests by the BSAI groundfish fisheries. The preamble to the proposed rule states that Amendment 111 is likely to result in groundfish harvests below the TACs for several fisheries prosecuted by the Amendment 80 sector. (80 FR 71,650, 71,663, November 16, 2015)

The Analysis estimates that Amendment 111 could result in groundfish harvest reductions in the Amendment 80 sector between 9,500 mt and 25,700 mt each year during the 10-year period considered (2014 to 2023) in the Analysis, for a total possible reduction of 95,000 mt to 257,000 mt over this 10-year period. As described in the Analysis, this could translate to a reduction in wholesale revenues for groundfish fishery participants between $6.2 million and $18.7 million for each year during this 10-year period, for a total of $62 million to $187 million throughout this 10-year period (Table ES–4 of Analysis; 80 FR 71650, 71663, November 16, 2015).

This rule provides the flexibility for participants in the groundfish fisheries to potentially harvest the TAC assigned to their fisheries. This rule minimizes bycatch to the extent practicable by recognizing that different sectors of the groundfish fisheries have available different tools to minimize halibut bycatch (see also responses to Comments 14 and 15). The fact that this rule will reduce halibut PSC limits, and likely result in reductions in groundfish harvests, supports the conclusion that Amendment 111 reflects a well-reasoned and articulated balance between National Standards 1 and 9.

Comment 9: Social and economic factors must be considered when establishing optimum yield under National Standard 1. The proposed rule does not discuss this requirement.

Response: The commenter is correct that social and economic factors are considered when establishing the optimum yield for a fishery. Optimum yield, as defined in the Magnuson-Stevens Act, is that amount of fish which ''will provide the greatest overall benefit to the Nation, particularly with respect to food production and recreational opportunities, and taking into account the protection of marine ecosystems'' and the amount of fish which ''is prescribed as such on the

basis of the maximum sustainable yield from the fishery, as reduced by any relevant economic, social, or ecological factor'' (16 U.S.C. 1802(33)(A); 16 U.S.C. 1802(33)(B)). Amendment 111 and the proposed rule did not propose to change the optimum yield of the BSAI groundfish fisheries, which is specified in regulations as a range from 1.4 million to 2.0 million metric tons. (§ 679.20(a)(1)(i)(A)) Therefore NMFS did not elaborate on the factors that go into establishing optimum yield. As noted in the response to Comment 7, the requirement to establish an optimum yield does not apply to halibut.

Although Amendment 111 does not change the optimum yield established for the BSAI groundfish fisheries, fishery regulations require that the total of the TACs for the BSAI groundfish fisheries must come within the optimum yield range. (§ 679.20(a)(2)) As noted also in the response to Comment 8, the proposed rule acknowledged that Amendment 111 would likely decrease groundfish harvests below TAC for the Amendment 80 sector (80 FR 71650, 71663, November 16, 2015). The Council concluded, and NMFS agrees, that the likely economic loss from foregone harvests under this final rule is outweighed by the potential decrease in halibut bycatch and the potential increase in halibut available for the directed halibut fisheries.

Comment 10: Amendment 111 is not fair and equitable under National Standard 4. A fundamental flaw in the proposed rule and the Analysis is that the Analysis uses the status quo halibut PSC limits as the baseline for analysis. That is not fair because the directed halibut fishery has declined 63 percent in Area 4 and 67 percent in Area 4CDE from 2003 through 2013.

Response: The Analysis does evaluate a ''no action'' or ''Status Quo'' alternative. When taking action, NMFS is under an obligation to analyze a ''no action'' alternative in the Environmental Assessment portion of the Analysis. (Section 5.03b, NOAA Administrative Order 216–6, May 20, 1999, available at *http://www.nepa.noaa.gov/*) The Environmental Assessment would have been deficient if it did not analyze a ''no action'' or ''Status Quo'' alternative. Whether Amendment 111 is consistent with National Standard 4 is a separate question.

The Council and NMFS determined, and the Secretary concluded, that Amendment 111 is consistent with National Standard 4 (see Section 6.1 of Analysis). National Standard 4 provides that ''conservation and management measures shall not discriminate between residents of different states. If it becomes necessary to allocate or assign fishing privileges among various U.S. fishermen, such allocation shall be A) fair and equitable to all such fishermen, B) reasonably calculated to promote conservation, and C) carried out in such a manner that no particular individual, corporation, or other entity acquires an excessive share of such privileges.'' (16 U.S.C. 1851).

Amendment 111 does not discriminate between residents of specific states. Amendment 111 does not use residency of any fishermen, or group of fishermen, as a criterion for reduction of a PSC limit in any sector.

Amendment 111 is fair and equitable to the fishermen affected by Amendment 111. Amendment 111 reduces the PSC limits for a legitimate objective. Amendment 111 seeks to minimize halibut PSC to the extent practicable while maintaining, on a continuing basis, the potential to achieve optimum yield from the groundfish fishery. Amendment 111 achieves that objective fairly and equitably by decreasing halibut PSC limits by sector and by establishing the PSC reduction for each sector based on an evaluation of what is practicable for that sector.

The Council recommended Amendment 111 after analyzing a status quo alternative (no reductions in the halibut PSC limits for each sector) and alternatives with reductions ranging from 10 to 50 percent lower than the current halibut PSC limits in each sector. The Analysis showed that residents of various states, including Alaska and states of the Pacific Northwest, participate in the directed groundfish fisheries and the directed halibut fisheries and may be affected by this final rule. For each groundfish sector in the groundfish fisheries and for the directed halibut fisheries, the Analysis describes the participants in each fishery (Section 4.4 and 4.5 of Analysis) and the effects of each alternative, including the status quo alternative, on the groundfish fisheries and the directed halibut fisheries (Section 4.7 through 4.14 of Analysis).

In developing Amendment 111, the Council and NMFS recognized that under the status quo, the directed halibut fisheries have experienced reductions in catch limits as the halibut stock has declined (Section 4.5. of Analysis). The Analysis sets out the percentage declines cited in the comment (see text associated with Table 4–85 and Table 4–86 in Section 4.5.1 of Analysis). The Council and NMFS recognize that the reductions in halibut PSC limits in Amendment 111 will likely increase the halibut available for the directed fisheries and, in some years, may reduce groundfish harvests and therefore revenues for participants in the directed groundfish fisheries (Table ES–4 of Analysis; 80 FR 71650, 71663, November 16, 2015).

Amendment 111 is reasonably calculated to promote conservation consistent with National Standard 4. The Council and NMFS do not anticipate that Amendment 111 will have a significant effect on overall halibut mortality but do expect it to have a limited conservation benefit. The IPHC's current measure for a juvenile halibut is a halibut that is 26 inches and under or ''U26 halibut.'' (Section 3.1.2.1 of Analysis) In response to this rule, the IPHC may increase the catch limits for the directed commercial halibut fishery. Even if the IPHC does that, U26 halibut still may not be retained by any fishery. This rule is expected to have a limited conservation benefit because decreasing bycatch overall will decrease bycatch of U26 halibut. Some of those U26 halibut will mature and, of those, some will reproduce.

The preamble to the proposed rule described the estimated limited conservation benefit from this action. (80 FR 71650, 71662, November 16, 2015). The Council determined, and NMFS agrees, that the reduction in U26 mortality from this action ranges from 188,000 to 210,000 pounds annually compared to the status quo. (Section 3.1.5.3 of Analysis) This conservation benefit is limited because this number of U26 halibut comprises a small proportion of the total female spawning biomass of halibut. This number of U26 halibut (188,000 to 210,000 pounds) is substantially less than 1 percent of the total female spawning biomass which, in 2015, was estimated to be 215.10 million pounds (Table 3–1 of Analysis).

Finally, consistent with National Standard 4, Amendment 111 does not result in any particular individual, corporation, or other entity acquiring an excessive share of the PSC reductions in Amendment 111. The reductions in PSC limits are spread across the individuals within each sector. The reductions in PSC limits do not change the amount of PSC that each participant in a sector has relative to other participants in the sector.

Comment 11: National Standard 5 requires that ''conservation and management measures consider efficiency; except no such measure shall have economic allocation as its sole purpose.'' (16 U.S.C. 1851) The guideline in Federal regulation for applying National Standard 5 states that ''efficiency'' refers to the wise use of all resources involved in the fishery,

including ecological resources (50 CFR 600.330(e)). Reducing halibut bycatch reduces waste and constitutes wise and efficient use of the resource.

Response: NMFS agrees that reducing halibut bycatch constitutes a wise and efficient use of the resource, but accepts that some level of halibut bycatch is inevitable in the prosecution of the BSAI groundfish fisheries. Halibut bycatch is a function of the overlapping distribution of groundfish and halibut as well as regulatory requirements established by NMFS and the IPHC that require the discard of halibut harvested with trawl gear or in fisheries other than defined commercial, sport, and subsistence fisheries. Therefore, the current regulatory structure ensures that some degree of halibut bycatch must occur. The Council concluded, and NMFS agrees, that Amendment 111 reduces halibut PSC, or halibut bycatch, by the BSAI groundfish fisheries to the extent practicable consistent with National Standard 9.

Comment 12: Amendment 111 is not consistent with National Standard 8. The Analysis does not adequately evaluate the cultural and socioeconomic benefits of the halibut resource to the isolated communities of the Bering Sea, especially St. Paul and St. George, and the dozens of coastal communities throughout Alaska and the entire Pacific Coast that depend on the halibut resource for subsistence, sport, and commercial fishing and that are negatively affected by halibut bycatch.

Response: National Standard 8 provides: ''Conservation and management measures shall, consistent with the conservation requirements of this Act (including the prevention of overfishing and rebuilding of overfished stocks), take into account the importance of fishery resources to fishing communities by utilizing economic and social data that meet the requirements of paragraph (2), in order to (A) provide for the sustained participation of such communities, and (B) to the extent practicable, minimize adverse economic impacts on such communities.'' (16 U.S.C. 1851(a)(8)). The reference to paragraph (2) is to National Standard 2: ''Conservation and management measures shall be based upon the best scientific information'' (16 U.S.C. 1851(a)(8)).

The Council and NMFS used the best available scientific information to assess the importance of the directed halibut fishery to various communities. For example, Appendix C to the Analysis is devoted solely to the impacts of this action on communities that are dependent on and engaged in the BSAI groundfish fisheries and communities that are dependent on and engaged in the directed halibut fisheries. Appendix C identified 15 halibut-dependent communities in the BSAI based on a variety of metrics. These communities include St. Paul and St. George (Table 1–1). Appendix C presented qualitative and quantitative information to assist the Council and NMFS in assessing the effects of this action on halibut-dependent communities and other communities by examining metrics such as the ownership of halibut catcher vessels by community (Table 2–6a); ex-vessel gross revenues from halibut catcher vessels by community (Table 2–6b); number of BSAI subsistence halibut fishermen, halibut caught, and pounds of halibut caught in Area 4 (Table 2–8); and estimated annual halibut crew and halibut crew payments by community (Table 3–10). In addition to the Analysis, the Council and NMFS had the benefit of extensive public testimony on the importance of subsistence and commercial fisheries to the residents of St. Paul and St. George and other communities engaged in the directed halibut fisheries.

Amendment 111 minimizes bycatch to the extent practicable as determined by the Council based on the best available information. Amendment 111 is expected to provide additional harvest opportunities to residents of St. George and St. Paul, based on the assumption that the IPHC will respond to the decreased bycatch resulting from Amendment 111 by increasing the commercial catch limit. Appendix C estimated the distribution of the expected increase in harvests in the directed halibut fishery in Area 4 from Amendment 111 among communities in Northwest Alaska; communities in Bristol Bay, the Aleutians and the Pribilof Islands (including St. Paul and St. George); communities in other parts of Alaska; and communities in other states (Table 4–4; Table 4–5). Appendix C also examined the potential impacts of the PSC limit reductions in Amendment 111 on BSAI communities engaged in the halibut subsistence fishery (Section 4.2.4 of Appendix C of Analysis) and the sport halibut fishery (Section 4.2.5 of Appendix C of Analysis). The Analysis also discussed the potential long-term impacts of Amendment 111 on directed halibut fishery participants and communities reliant on the halibut resource outside of the BSAI (Section 4.14.1.2 of Analysis).

Appendix C also described the adverse impacts that Amendment 111 would likely have on communities that are substantially engaged in the directed groundfish fisheries (Table 2–1a through Table 2–5f). In selecting Amendment 111, the Council weighed the potential benefits to fishing communities against the potential adverse impacts to fishing communities that could result under each halibut PSC limit reduction alternative.

Comment 13: St. Paul and St. George are much more dependent on the halibut fisheries than Seattle, Washington and Newport, Oregon are dependent on the BSAI groundfish fisheries. The interests of St. Paul and St. George are not properly weighed in the Analysis.

Response: Under National Standard 8, conservation and management measures shall take into account the importance of fishery resources to ''fishing communities.'' The term ''fishing community'' in the Magnuson-Stevens Act means ''a community which is substantially dependent on or substantially engaged in the harvest or processing of fishery resources to meet social and economic needs, and includes fishing vessel owners, operators, and crew and United States fish processors that are based in such communities'' (16 U.S.C. 1802(17)). An analysis of conservation and management measures should examine the effect of a proposed action on communities that are substantially dependent on the fishery resource in question and on communities that are substantially engaged with the fishery resource in question (50 CFR. 600.345(c)).

In approving Amendment 111, the Council was aware that communities such as St. Paul and St. George are substantially dependent on halibut. Appendix C of the Analysis specifically identified 15 communities that are considered to be halibut-dependent (Table ES–2 in Appendix C to Analysis). The Analysis considered the best available data on the importance of the directed halibut fisheries to halibut-dependent communities such as St. Paul and St. George. The Council and NMFS considered this information, in addition to public testimony from residents of these communities.

The Council and NMFS reviewed the Analysis and considered the impacts of Amendment 111 on communities engaged in the BSAI groundfish fishery, including Seattle and Newport. The Analysis notes that Seattle and Newport are substantially engaged in the BSAI groundfish fisheries but, because of the size of those communities, the availability of other employment and other factors, Seattle and Newport were not substantially dependent on the BSAI groundfish fisheries. The Analysis noted: ''While community-level

dependence is not a salient issue for the Seattle MSA, potential adverse impacts of some of the Alternative 2 options and suboptions would be profound in terms of potential loss of revenues to individual operations and sectors and potential loss of income and/or employment to relatively large numbers of individuals.'' (ES–5 in Appendix C to Analysis). Seattle MSA stands for Seattle Metropolitan Statistical Area.

In recommending Amendment 111, the Council weighed the benefits to halibut-dependent fishing communities from different levels of PSC reductions against the adverse impacts to communities that are substantially engaged in the BSAI groundfish fisheries.

Comment 14: Amendment 111 does not decrease bycatch to the extent practicable. Larger PSC reductions are practicable and therefore must be adopted to be consistent with National Standard 9.

Response: The Council approved Amendment 111 after considering halibut PSC limit reductions that were 10 to 50 percent lower than the current halibut PSC limits in each BSAI groundfish sector. The Council and NMFS considered the practicability of each sector to meet these revised PSC limits. The preamble to the proposed rule contains a description of the specific factors considered in the section titled ''Rationale and Impacts of Amendment 111 and the Proposed Rule'' (80 FR 71650, 71661—71668, November 16, 2015).

For each sector, the Council and NMFS considered the relative amount of halibut PSC for that sector compared to the total amount of halibut PSC in the BSAI; whether the sector had been able to harvest groundfish TACs with lower amounts of halibut PSC than the sector's current PSC limit; what ''tools'' or changes in fishery operations were available to the sector to adapt to reductions in the halibut PSC limit for that sector; and the potential socioeconomic impacts of reduced halibut PSC limits for each sector. As part of the last consideration, the Council and NMFS considered the potential adverse socioeconomic impacts of halibut PSC limit reductions from reduced groundfish harvests on harvesters of BSAI groundfish and on fishing communities that participate in the groundfish fisheries, as well the potential benefits to the harvesters of halibut and to fishing communities that participate in the halibut fishery. (Proposed Rule, 80 FR 71650, 71663, November 16, 2015).

Based on these factors and the information described in the Analysis and the preamble to the proposed rule, the Council recommended and NMFS implemented the halibut PSC limits described in this final rule. A brief summary for each of the sectors follows.

For the Amendment 80 sector, Amendment 111 reduces the PSC limit by 25 percent: from 2,325 to 1,745 mt. The Amendment 80 sector is the sector that uses the largest amount of halibut PSC. The Amendment 80 sector is responsible for about 60 percent of halibut PSC use, based on average PSC usage from 2008 through 2014 (Table 1, Proposed Rule, 80 FR 71650, 71660, November 16, 2015). This final rule imposes the largest halibut PSC limit reduction on the sector which is most able to decrease bycatch through behavioral changes. The Amendment 80 sector is prosecuted by Amendment 80 cooperatives. Amendment 80 cooperatives have the power to coordinate the responses of their members to reduced PSC limits. Amendment 80 cooperatives are also more able to adopt tools to decrease bycatch as compared to a sector where individual fishery participants engage in a ''race for fish'' against other participants in a sector. The tools to decrease bycatch are behavior changes such as expanding the use of gear modifications known as excluders to reduce bycatch; improving communication on the fishing grounds within and between the Amendment 80 cooperatives; using test hauls to gauge halibut rates and considering the use of night-time hauls that tend to have lower halibut PSC. The tools to reduce PSC—those just mentioned and others—are described in the proposed rule (80 FR 71650, 71664, November 16, 2015) and in further detail in Section 3.1.3.6 and Appendix B of the Analysis.

The Council considered, and rejected, alternatives that would have adopted greater reductions in the PSC limit for the Amendment 80 sector. The proposed rule summarizes the Council and NMFS' reasoning for concluding that greater reductions were not practicable for the Amendment 80 sector (80 FR 71650, 71664, November 16, 2015). The Council and NMFS concluded that alternatives that would have reduced the halibut PSC limit by 30, 35, 40, 45, or 50 percent in the Amendment 80 sector would have come at significant economic cost to the Amendment 80 sector and fishing communities participating in the Amendment 80 fisheries. Based on the best available information, the Council and NMFS concluded that it was not clear that the Amendment 80 sector could make additional changes in fishery operations to accommodate higher PSC limit reductions other than foregoing substantial harvests and revenue. The Council and NMFS concluded that greater PSC reductions in the Amendment 80 sector would have reduced net benefits to the Nation ''because the socioeconomic benefits from the potential increase in harvest opportunities would be less than the negative socioeconomic impacts from foregone BSAI groundfish harvests.'' (Proposed Rule, 80 FR 71650, 71664, November 16, 2015).

For the BSAI trawl limited access sector, Amendment 111 reduces the PSC limit by 15 percent: from 875 mt to 745 mt. This sector has used, on average from 2008 through 2014, 710 mt; in all of those years, it used less than 745 mt except in 2012, when it used 960 mt of halibut PSC (Table 1 in Proposed Rule, 80 FR 71650, 71660, November 16, 2015; Table 3–12 of Analysis).

Unlike the Amendment 80 sector, the ''race for fish'' still exists in large parts of the BSAI trawl limited access sector, specifically in the Pacific cod and yellowfin sole fisheries (Section 4.9 of Analysis; Proposed Rule, 80 FR 71650, 71666, November 16, 2015.) This affects what bycatch reduction is practicable for this sector. The Council recommended, and NMFS proposed, a 15 percent reduction in the halibut PSC limit for the BSAI trawl limited access sector after considering the relatively limited amount of halibut PSC in this sector; the more limited tools available to the sector to reduce its halibut PSC use; the overall socioeconomic cost to the sector, communities participating in the sector, and the Nation from larger reductions in the PSC limit for this sector; and the limited benefits that larger reductions in the PSC limit for this sector might provide to the halibut fisheries and communities participating in the halibut fisheries. The Council and NMFS also determined that the reduced halibut PSC limit in this final rule is likely to provide incentives for the BSAI trawl limited access sector to more fully develop and use tools that could improve on the relatively low PSC use that this sector achieved in 2010 and 2011. (Table 4–209 of Analysis; Proposed Rule, 80 FR 71650, 71666, November 16, 2015)

For the BSAI non-trawl limited access sector, Amendment 111 reduces the halibut PSC limit by 15 percent: from 833 mt to 710 mt. This sector has used, on average, 505 mt of halibut PSC from 2008 through 2014 (Table 1 in Proposed Rule, 80 FR 71659, 71660, November 16, 2015). The Council and NMFS did not consider greater reductions in halibut PSC limits to be practicable. Therefore, the Council did not recommend, and

NMFS does not propose, larger reductions in the PSC limit for the non-trawl sector given this sector's relatively limited use of halibut PSC; this sector's consistent pattern of halibut PSC use well below its PSC limit; and the limited benefit that larger PSC reductions would likely provide to the halibut fishery and communities participating in the halibut fishery relative to the negative impacts on participants in the non-trawl sector. (Proposed Rule, 80 FR 71650, 71667, November 16, 2015)

For the CDQ Program, Amendment 111 reduces the PSC limit by 20 percent: from 393 mt to 315 mt. The CDQ Program has used, on average, 215 mt of halibut PSC from 2008 through 2014. The Council and NMFS considered greater reductions in the PSC limit for this sector also but concluded that greater reductions were not practicable. The Analysis shows that the halibut PSC limit reductions for the CDQ Program would have to be extremely high to yield actual reductions. A 50 percent reduction in the PSC limit for the CDQ Program would reduce the PSC limit from 393 mt to 197 mt. A PSC limit of 197 mt for the CDQ Program would yield only 18 mt of halibut savings compared to the CDQ Program's average use of halibut PSC of 215 mt from 2008 through 2014 (Table 1 in Proposed Rule, 80 FR 71650, 71660, November 16, 2915). A PSC limit of 197 mt for the CDQ Program would yield only 47 mt of halibut savings relative to the CDQ Program's use of halibut PSC of 244 mt in 2014. (Table 4–209 of Analysis) Neither the Analysis nor public testimony suggests that halibut PSC use in the CDQ Program will increase relative to current use. Therefore, the Council and NMFS determined that it is impracticable to adopt a PSC limit that would substantially constrain the vessels participating in the CDQ Program, given the limited amount of PSC by the CDQ Program and the limited potential harvest opportunity for the commercial halibut fishery that a more restrictive halibut PSC limit for the CDQ Program would provide. (Proposed Rule, 80 FR 71650, 71667, November 16, 2015)

Comment 15: Amendment 111 does not minimize bycatch to the extent practicable as required under National Standard 9 because the BSAI groundfish fisheries do not use the maximum amount of their halibut PSC limits every year. Other management approaches should be tried.

Response: The commenter is correct that most sectors in the BSAI groundfish fisheries have been using less halibut PSC than their current PSC limit (Table 1 in Proposed Rule, 80 FR 71650, 71660, November 16, 2015). However, the halibut PSC limits established by this final rule are expected to limit halibut PSC use for the Amendment 80 sector relative to current use. The halibut PSC limit established for the Amendment 80 sector in this final rule is 1,745 mt. From 2008 through 2014, the Amendment 80 sector used more than 1,745 mt of halibut PSC every year. In 2015, for the first time, the Amendment 80 sector used 1,636 mt of halibut PSC, which is less than the new PSC limit of 1,745 mt. In establishing the new halibut PSC limit for the Amendment 80 sector, the Council and NMFS took into account the sector's history of PSC use and information that the Amendment 80 sector could make behavioral changes to decrease PSC levels below its PSC levels from 2008 through 2014 (Section 3.1.3.6 of Analysis; Section 14.4.2.2 of Analysis; Appendix B of Analysis; Proposed Rule, 80 FR 71650, 71664, November 16, 2015).

For the BSAI trawl limited access, BSAI non-trawl, and CDQ sectors, the Council and NMFS were aware that these sectors generally used less halibut PSC than their PSC limit (Table 1 to Proposed Rule, 80 FR 71650, 71660, November 16, 2015). The response to Comment 14 explains why the Council and NMFS concluded that greater reductions than implemented in this final rule are not practicable.

Other management approaches to manage halibut bycatch are outside of the scope of this proposed rule. NMFS lists some of the suggestions it has received for alternative halibut bycatch management measures in Comment 6 and describes some actions that are underway or under consideration in the response to Comment 6.

Comment 16: The halibut PSC limit reductions mandated in Amendment 111 will be very difficult for the Amendment 80 sector to achieve. The halibut PSC limits imposed on the Amendment 80 sector strain, and probably exceed, the limits of practicability under National Standard 9.

Response: The Council determined that the PSC limit reductions in Amendment 111 were practicable and were consistent with National Standard 9 by considering the factors summarized in the response to Comment 14 and detailed in the Analysis and the preamble to the proposed rule. NMFS notes that the use of halibut PSC in the Amendment 80 sector during 2015 supports the conclusion that the halibut PSC limit established by this final rule is practicable. In 2015, the Amendment 80 sector used 1,636 mt of halibut PSC. That amount of halibut PSC is less than the new halibut PSC limit in this rule of 1,745 mt. The Amendment 80 sector achieved this even though no regulatory provisions were in place during 2015 requiring such a substantial reduction in halibut PSC use relative to the recent average use of halibut PSC of 2,047 mt. from 2008 through 2014.

Comment 17: Technologies exist that can further decrease halibut bycatch in the Amendment 80 fleet. These include 1) the use of wide mesh nets to allow juvenile halibut to escape; 2) an underwater camera system that allows vessel operators to detect and release net-loads containing disproportionately high amounts of halibut bycatch underwater; and 3) other gear modifications to reduce halibut bycatch.

Response: The ability of the Amendment 80 fleet to develop and use new technologies to decrease halibut bycatch was one of the reasons that the Council and NMFS concluded that the PSC reductions in Amendment 111 were practicable. Amendment 111 establishes an incentive for the Amendment 80 fleet to experiment with, and use, technologies such as the ones described by the commenter.

Comment 18: Mandatory deck sorting of halibut (returning halibut to sea as quickly as possible after the harvest comes onboard) should be required so that halibut to be returned swiftly to the water. This would decrease the mortality of halibut bycatch.

Response: Mandatory deck sorting of halibut bycatch is outside of the scope of Amendment 111and is not allowed under current regulations. To conduct deck sorting, a vessel operator must have an exemption from current regulations that prevent deck sorting. In 2015, NMFS granted an exempted fishing permit for vessels in the Amendment 80 sector to test the conditions necessary to effectively conduct deck sorting and evaluate whether deck sorting decreased mortality of halibut bycatch (Appendix A–7 of the Analysis). The results from this exempted fishing permit, and other research, indicates that deck sorting can reduce the discard mortality of halibut under some conditions. In 2016, NMFS received an application for another exempted fishing permit for deck sorting, including participants in the Amendment 80 sector and the BSAI trawl limited access sector (Notice, 81 FR 4018, January 25, 2016). After reviewing the results from these exempted fishing permits and other research, the Council and NMFS may choose to begin the analytic process necessary to consider changing

regulations to allow or require halibut deck sorting.

Comment 19: Hook-and-line catcher/processors have successfully decreased their halibut bycatch mortality. From 1994 to 2014, hook-and-line catcher/processors reduced their use of halibut PSC by 58 percent; reduced their halibut discard mortality rate by 47 percent; and reduced the encounter rate of halibut bycatch by 41 percent. It is possible to decrease halibut mortality through voluntary efforts rather than through regulations that implement lower halibut PSC limits.

Response: NMFS acknowledges that hook-and-line catcher/processors have taken a number of steps to reduce halibut PSC use during the period described by the commenter. Table 3–14 of the Analysis provides a description of the use of halibut PSC by hook-and-line catcher/processors from 2008 through 2014.

Comment 20: Amendment 111 does not adequately take into account the effect of halibut bycatch on the recreational (sport) halibut fishery.

Response: Under the current IPHC policy, for those IPHC management areas that occur in the BSAI (Areas 4A, 4B, and 4CDE), the IPHC deducts bycatch, sport, and subsistence halibut removals before establishing the commercial catch limit (Section 3.1.2.1 of Analysis). The IPHC does not deduct halibut used as bycatch from the amount that would otherwise be available for harvest in the Area 4 sport fishery. Therefore, unlike the case for the commercial halibut fishery, a reduction in halibut PSC limits would not directly affect the Area 4 sport fishery by making more halibut directly available for allocation to the sport fishery (Section 4.5.2 to Appendix C of Analysis). The response to Comment 21 describes how this final rule may provide a limited but long-term benefit to the sport fishery in Area 4 as well as sport fisheries in other IPHC areas.

Comment 21: Amendment 111 will not only benefit the directed commercial halibut fishery. It will also benefit sport and subsistence fisheries.

Response: The primary benefit of Amendment 111 will be to reduce the total amount of halibut bycatch removals in the BSAI (Area 4) before commercial catch limits are established, thereby increasing the amount of halibut available for commercial fishery harvests in Area 4. NMFS agrees with the commenter that Amendment 111 has the potential to provide a modest benefit to recreational and subsistence halibut fisheries as well as commercial halibut fisheries. This final rule would be expected to provide a modest long-term benefit to sport and subsistence fisheries by decreasing the bycatch of U26 halibut (the IPHC's current measure for juvenile halibut). U26 halibut are expected to grow over time and become available for harvest in sport and subsistence fisheries. (Table 3–1 in Section 3.1.1 of Analysis; 80 FR 71650, 71662, November 16, 2015). NMFS stated in the proposed rule that the specific long-term impacts of reduced U26 bycatch on potential long-term commercial, personal use, sport or subsistence harvests of halibut in specific IPHC areas ''cannot be predicted with certainty given the available information.'' (80 FR 71650, 71662, November 16, 2015)

Comments Associated With Halibut Biology and Conservation

Comment 22: Amendment 111 does not adhere to a precautionary approach of management by protecting the halibut resource from the effects of halibut PSC use in the BSAI groundfish fisheries.

Response: This final rule follows the precautionary principle by implementing conservation measures to reduce overall halibut PSC in the groundfish fisheries even though there is limited data and information to determine the impact of halibut PSC on halibut stocks. Although the effects of halibut PSC in the groundfish fishery on the halibut fishery are uncertain, this action reduces the overall potential impacts by reducing existing halibut PSC limits in the groundfish fisheries. The halibut PSC limit reductions in the groundfish fisheries minimize bycatch to the extent practicable given the tools currently available to the sectors, the prosecution of the fishery, the uncertainty about the overall adverse effects of bycatch on the halibut stocks, and the need to ensure that the trawl and hook-and-line fisheries contribute to the achievement of optimum yield in the groundfish fisheries.

The preamble to the proposed rule and Section 3.1.1 of the Analysis presents a summary of the current condition of the Pacific halibut stock. (80 FR 71650, 71651–71652, November 16, 2015) The preamble to the proposed rule concludes that, based on the best available information, the current status of exploitable halibut biomass and female halibut spawning biomass is ''that the halibut stock is stable or potentially increasing slightly in overall abundance.'' (80 FR 71650, 71651, November 16, 2015) The preamble to the proposed rule also notes that ''even under the greatest PSC limit reduction alternatives considered, this reduction would represent less than 1 percent of the 2015 coastwide female spawning halibut biomass (see Table 3–2 in Section 3.1.1 of the Analysis).'' (80 FR 71650, 71662, November 16, 2015). The halibut PSC limits established by this final rule are appropriately precautionary given the status of the halibut resource.

Comment 23: Amendment 111 does not protect juvenile halibut.

Response: By reducing halibut bycatch, Amendment 111 will decrease the amount of halibut taken by the groundfish fisheries; this reduces bycatch of juvenile halibut. The best available information shows that the halibut PSC limit reductions established in Amendment 111 will decrease U26 halibut bycatch (a size of halibut considered by the IPHC to represent juvenile halibut) by 188,000 to 210,000 pounds annually relative to recent halibut PSC use. (Proposed Rule, 80 FR 71650, 71662, November 16, 2015)

Comment 24: The Closed Area in the Bering Sea was established by the IPHC to protect juvenile halibut. The Closed Area was formerly closed to both the directed halibut fisheries and the BSAI groundfish fisheries. The reopening of the Closed Area to trawl fisheries removed a significant protection to juvenile halibut.

Response: NMFS responds in two ways. First, the commenter is correct in that the Closed Area was established by the IPHC in 1967 to protect juvenile halibut in response to severe declines in halibut abundance. Whether the Closed Area should be open to the directed halibut fishery is a matter for the IPHC to decide and is outside the scope of this rule. The IPHC assessed the impact of the Closed Area recently. An IPHC staff report prepared in 2012 concluded that ''from a halibut assessment and management perspective, there was no continued purpose in maintaining the current Closed Area to the commercial halibut fishery in the eastern Bering Sea'' (Section 3.1.2.4 of Analysis). Second, as described in the preamble to the proposed rule and section 3.1.1 of the Analysis, the current status of the halibut stock as measured by exploitable biomass and female spawning biomass is stable or potentially increasing slightly in abundance. (80 FR 71650, 71651–71652, November 16, 2015) The fact that the Closed Area is open to the directed groundfish fisheries does not appear to have had a deleterious effect on the halibut stock. In any event, a prohibition on fishing for groundfish in the Closed Area is outside the scope of this action.

Comment 25: The IPHC's assumption that natural mortality is the same for all age classes of halibut is not realistic and

overestimates the future contribution of smaller age classes to the halibut stock.

Response: The IPHC makes assumptions about several variables in its annual assessment of the halibut stock. Section 3.1.5.1 of the Analysis describes areas of uncertainty in the IPHC's stock assessment process, including uncertainties about the natural mortality rates for halibut for various age classes. Regardless of the effect of the IPHC's assumptions about halibut natural mortality, National Standard 9 requires conservation and management measures to minimize halibut bycatch in the BSAI groundfish fisheries to the extent practicable.

Comments Associated With Fisheries Management

Comment 26: The current management of halibut PSC is not abundance-based. The current management system allows the proportion of halibut removals taken as halibut bycatch to increase as halibut abundance decreases. NMFS should set halibut PSC limits based on the abundance of halibut. An abundance-based PSC limit would protect the Bering Sea ecosystem.

Response: The commenter is correct that the current management of halibut PSC is not abundance-based. Halibut PSC limits are established in regulation as specific amounts of halibut mortality. These halibut PSC limits are not scaled to changes in halibut abundance. The change from fixed halibut PSC limits to halibut PSC limits that change with the abundance of the halibut resource is outside of the scope of this rule. The Council, in conjunction with NMFS and the IPHC, is evaluating whether it would be feasible to establish halibut PSC limits that vary with abundance (see response to comment 6).

Comment 27: The preamble to the proposed rule states that the IPHC can adopt harvest control rules to protect the halibut stock during times of low abundance and that these harvest control rules have not been triggered even during the most recent years of low exploitable halibut biomass (80 FR 71650, 71652 (November 16, 2015). This ignores the fact that the IPHC cannot curtail the PSC take of halibut bycatch in the groundfish fisheries and does not excuse inaction by the Council and NMFS.

Response: The statement cited by the commenter was in a section of the preamble to the proposed rule titled ''The Status of the Halibut Stock.'' The conclusion in that section of the preamble was that ''[t]he best available data indicate that at current levels of removals, the halibut biomass would be expected to be stable, and well above the thresholds established by the IPHC'' for imposing the harvest control rules. (80 FR 71650, 71652, November 16, 2015). The Council and NMFS used this information, and other information, to understand the status of the halibut resource and the potential impact of this final rule on the halibut resource.

NMFS agrees that the IPHC does not manage the use of halibut PSC in the BSAI groundfish fisheries. The Council and NMFS have the authority to manage halibut PSC in the groundfish fisheries. NMFS agrees that the current status of the halibut resource does not preclude action by the Council or NMFS, and it has not precluded the action taken in this final rule, to reduce halibut PSC.

Comment 28: The IPHC has consistently overestimated halibut biomass and therefore has set commercial catch limits too high in the recent past. The decline in commercial catch limits from 2013 through 2015 is due in part to more accurate information about the status of halibut biomass.

Response: The commenter is correct that in 2012, IPHC staff reported that the IPHC had consistently overestimated halibut biomass and underestimated halibut harvest rates due to a retrospective bias in the IPHC's stock assessments (Section 3.1.1.1 of Analysis). The commenter is also correct that the IPHC's efforts to correct this bias is one reason that commercial catch limits declined from 2013 through 2015 compared to prior years. Although these factors have contributed to recent declines in commercial catch limits, these factors do not preclude NMFS from reviewing and undertaking actions, such as this final rule, to minimize halibut bycatch to the extent practicable consistent with National Standard 9.

Comments Associated With the Analysis (Not Discussed Under Other Comments)

Comment 29: The Analysis states that larger halibut PSC limit reductions would not significantly conserve the halibut resource by protecting more juvenile halibut. This conclusion strains reason and credibility.

Response: The conclusion of the Analysis is credible and reasonable and is based on the best available information. The IPHC's current measure for a juvenile halibut is a halibut that is 26 inches and under or ''U26 halibut.'' (Section 3.1.2.1 of Analysis) The best available information is that approximately 36 percent of halibut PSC mortality in the BSAI is U26 halibut. (Table 4–210 in Section 4.14.1.4 of Analysis; Proposed Rule, 80 FR 71650, 71662, November 16, 2015) Ultimately, reductions in U26 bycatch could provide an opportunity for additional halibut to grow, reproduce, and eventually recruit to the halibut fishery (*i.e.,* be available for harvest). The extent to which a decrease in U26 halibut PSC may affect the coastwide female spawning biomass is not well-known based on the best available information. (Section 3.1.1.2 of the Analysis) However, the best available information suggests that reductions in U26 halibut PSC under this rule are unlikely to impact the long-term abundance of the halibut stock. Even with a 50 percent reduction in PSC limits, the largest PSC reduction considered by the Council and NMFS, the reduction in the amount of U26 halibut PSC used relative to current use would likely range from 690,000 pounds to 740,000 pounds. (Proposed Rule, 80 FR 71650, 71662, November 16, 2015) This amount would represent less than 1 percent of the 2015 coastwide female spawning biomass, which was 215.1 million pounds in 2015 (Table 3–1 of Analysis). Under the halibut PSC limit reductions established in this final rule, the reduction in U26 halibut PSC use is expected to range from 188,000 to 210,000 pounds. (Proposed Rule, 80 FR 71650, 71662, November 16, 2015) This amount represents substantially less than 1 percent of the 2015 coastwide female spawning biomass of 215.1 million pounds.

Comment 30: The Analysis focused on the economic costs of reducing halibut PSC limits on the BSAI groundfish fisheries without discussing the practicability for the groundfish fleet to make greater reductions. The Iterative Multi-year Simulation Model (IMS) in the Analysis presented two scenarios to describe potential economic impacts. Under one of those scenarios, the IMS predicted that bycatch could not be reduced without closing groundfish fisheries, an assumption that the SSC identified as unrealistic in its June 2015 Report to the Council meeting (at *http://www.npfmc.org/bsai-halibut-bycatch/).*

Response: The commenter is referring to a simulation model that was used, along with other information, to provide a quantitative estimate of the economic impacts of different levels of PSC reductions on the BSAI groundfish fisheries. Section 4.6 of the Analysis describes the simulation model.

The commenter is correct that the SSC identified that a deficiency in the model was the assumption that halibut PSC mortality could not be reduced without some decrease in groundfish harvests. This assumption is explicitly identified as Assumption 34 of the simulation model. Assumption 34 states that there

are no ''cost-free behavioral changes'' by which vessels in the BSAI groundfish fisheries could decrease halibut PSC mortality. (Section 4.6.3 of Analysis)

However, the Analysis did not limit its discussion of potential economic impacts on the BSAI groundfish fisheries to the quantitative results of the model. The Analysis describes behavioral and operational changes that are being made, or that could be expanded or improved, in response to a decrease in PSC limits. Section 3.1.3.6 of the Analysis describes ''PSC reduction tools'' in the BSAI groundfish fisheries. Section 4.14.2.2 describes the ''Response to PSC limit reductions.'' Appendix B of the Analysis describes ''Mitigation of PSC Reduction Impacts.''

Finally, despite this and some other limitations in the model noted by the SSC, the SSC concluded the estimates of foregone revenues provided by the analytic model ''likely provides an upper bound'' of impacts on the groundfish fleet ''as harvesters can mitigate their foregone revenue by fishing in other fisheries, in cleaner areas, or changing gear deployment of fishing practices'' (June 2015 SSC Report: *http://www.npfmc.org/bsai-halibut-bycatch/* at page 10).

The Council received the SSC Report and considered it, along with all the information in the record, when it approved Amendment 111. Neither the Council nor NMFS limited review or consideration of the potential social or economic impacts of Amendment 111 on the BSAI groundfish fisheries to this specific assumption in the IMS.

Comment 31: The Analysis does not describe the directed halibut fisheries and the BSAI groundfish fisheries equitably, as noted by the SSC in its June 2015 SSC Report: ''The uneven treatment between sectors (*e.g.,* income plurality only for halibut permit holders and demographics of employment only for trawl CPs) further confounds the ability to evaluate impacts.''

Response: NMFS assumes that the commenter is referring to demographic data on employment of minority employees that was used in the environmental justice discussion. This data is provided in Attachment 4 to Appendix C of the Analysis. Appendix C in the Analysis reviewed by the SSC did not use employment as a measure of community engagement for trawl catcher/processors. Section 2.2 examined data such as trawl catcher/processors by community of vessel owner; first wholesale gross revenue by community of vessel owner; an estimate of first wholesale gross revenue diversification by community of vessel owner (what percentage of the catcher/processor's revenues came from BSAI groundfish trawl fisheries) (Table 2–2a, 2–2b, 2–2c to Appendix C in the Council Draft Analysis, May 2015, available at Archive of Council Meetings, June 2015, *www.npfmc.org/council-meeting-archive/*).

In response to the SSC comment, Appendix C in the Analysis was expanded to include estimated crew employment and payments for the directed halibut fishery for the BSAI halibut-dependent communities. This new data is shown in Tables 3–3, 3–7, 3–10, and 3–13.

The Council and NMFS used the best available information consistent with National Standard 2 in the Magnuson-Stevens Act to evaluate the impacts of this action on all the communities affected by this action. The SSC found that the Analysis provided scientific support for two general statements ''around which the Council can frame a policy decision,'' namely, that the Analysis provided an upper bound for adverse impacts on the groundfish fisheries and that the Analysis showed that the economic and cultural footprint of the directed halibut fishery is larger than that of the groundfish fishery in many small communities (June 2015 SSC Report: *http://www.npfmc.org/bsai-halibut-bycatch/* at page 10).

Comment 32: The commenter asserts that the SSC Report in June 2015 stated that the Analysis has flaws in the ''upper bound'' estimate on impacts on groundfish sectors provided in the IMS.

Response: The June 2015 SSC Report stated that the upper bound estimate of potential economic impacts of Amendment 111 on the BSAI groundfish fisheries was one of the general statements ''around which the Council can frame a policy decision.'' The ''upper bound'' estimate is the same as the ''high impact scenario'' (Scenario B) used in IMS, the results of which are described in the Analysis and summarized in Table ES–4 of the Analysis. The simulation model reported the results of two scenarios: A low impact scenario (Scenario A) and a high impact scenario (Scenario B). In the low impact scenario, fishery participants are assumed to be able to coordinate harvesting activities with other participants in the sector to achieve almost optimal efficiency in avoiding halibut PSC. In the high impact scenario, fishery participants are assumed to act individually to decrease their own PSC but not cooperatively with other participants in the sector and do not achieve optimal efficiency in avoiding halibut PSC.

The Council and NMFS considered both of these scenarios. Based on the Analysis and extensive public testimony before the Council, NMFS determined that the BSAI groundfish sectors have varying abilities to optimize efficient use of halibut PSC and ''it is likely that the actual economic impacts of the proposed rule will fall within the range between the low impact and high impact scenarios presented in the Analysis.'' (Proposed Rule, 80 FR 71650, 71661, November 16, 2015)

Comment 33: The Council's Draft Analysis states that the revisions in the IMS described in the Analysis are based on ''discussions with industry.'' This is not the best available science as required by National Standard 2.

Response: The reference to ''discussions with industry'' is in note 51 in section 4.8 of the Council's Draft Analysis of May 2015, which states: ''In the initial draft of the analysis, the IMS did, in fact, make assumptions about which vessels operations would be cut under the PSC limit reductions. After further discussions with industry, there was not a clear consensus among managers on how they might proceed. Much would depend on vessels' specific operating characteristics and the demands of the market.'' (available at Archive of Council Meetings, June 2015, *www.npfmc.org/council-meeting-archive*).

The Council's Draft Analysis in section 4.6.2.3 at pages 253–254 describes these discussions in detail. These discussions were with ''industry and fishery managers,'' and were not limited to industry participants. These discussions were used to help define which of the four BSAI groundfish sectors should be described as catch share fisheries (and therefore more likely to be subject to economic impacts described under the low impact scenario) and which fisheries should be described as ''race for fish'' fisheries (and therefore more likely to be subject to economic impacts described under the high impact scenario). The final Analysis repeats the description of these discussions from the Council Draft Analysis and repeats in two places the footnote cited by the commenter (Section 4.6.2.3; Section 4.8 at note 48; Section 4.13.2.1 at note 55).

The result of the discussions was noted in the description of Assumption 42b in Section 4.6.3 of the Analysis. Assumption 42b describes the assumptions used in the model about how participants in catch share sectors (the Amendment 80 and the BSAI non-trawl sector) would respond to decreases in PSC limits. Based on these discussions, Assumption 42b was changed so that the model ''[did] not make any assumptions regarding the de-

activation of individual vessels'' in response to reductions in PSC limits. Previously, ''[i]n the initial draft of the analysis, the IMS model did in fact make assumptions about which vessel's operations would be cut under the PSC limits reductions'' (Section 4.6.3 of Analysis at note 45).

Thus, the discussions with industry [1] were not just with industry but also with fishery managers, [2] resulted in a change of one assumption in the model, not a new model, [3] were an appropriate subject for gathering information from industry, namely how a company with a number of vessels would react to PSC limit reductions, and [4] resulted in a valid change in the model. This is an example of the use of best available information consistent with National Standard 2.

Comment 34: Halibut is primarily consumed domestically while groundfish with its high halibut bycatch rates is primarily exported. These values are not adequately evaluated in the Analysis.

Response: The Analysis describes the range of ex-vessel and wholesale values of halibut and groundfish fisheries. Although halibut and many groundfish species may have different markets, the impact of domestic and foreign markets is reflected in the ex-vessel and wholesale values of the fisheries described in the Analysis.

Comment 35: The Analysis overlooks the fact that the number of halibut caught, not the poundage, is the key to evaluating the population effects on the halibut stock of halibut bycatch.

Response: This action reduces the BSAI halibut PSC limits which are set as a limit on the total weight of halibut mortality that may be taken as bycatch. The Analysis appropriately assessed the impacts of the management alternatives based on the regulatory mechanism used to establish halibut PSC limits. Changing halibut PSC limits so that these limits restrict the number of halibut caught as bycatch is beyond the scope of Amendment 111. As noted in response to Comment 6, the Council, NMFS, and the IPHC are considering the potential for establishing halibut PSC limits based on the number of halibut. Any evaluation about the potential impacts of this alternative management approach would have to be considered under a separate action.

Other Issues

Comment 36: Worldwide, the rate at which fish are being taken from the oceans is unsustainable. Amendment 111 represents a scratch on the surface of what we need to do worldwide.

Response: It is beyond the scope of this final rule, and the Analysis prepared for this rule, to evaluate the worldwide management of fisheries. NMFS appreciates that the commenter believes that Amendment 111 is a step in furtherance of sustainable fisheries.

Comment 37: Establishing a separate PSC limit for CDQ groups is a good idea. The commenter criticized CDQ groups concerning their non-profit status and other aspects of their fishing operations.

Response: NMFS acknowledges the commenter's support for the part of this rule that establishes a separate BSAI halibut PSC limit for CDQ Program. Comments on other aspects of the CDQ Program are beyond the scope of this final rule.

Comment 38: As federally recognized tribal communities, protection of fishing rights in St. Paul and St. George is a shared role of both NOAA and the Department of the Interior. One commenter stated that halibut PSC limit reductions of 40 percent are necessary to protect the federally recognized fishing rights of these tribes. One tribal government passed a resolution supporting a 50 percent reduction in all halibut PSC limits in BSAI, but also requested implementation of Amendment 111.

Response: The Council recommended, and NMFS implements, Amendment 111 under the authority of the Magnuson-Stevens Act. Amendment 111 reduces halibut PSC limits in a manner that could provide additional halibut harvest opportunities for residents of St. George and St. Paul and for the tribal governments of St. George and St. Paul. The three tribal governments that submitted comments, including the tribal government that passed a resolution supporting a 50 percent reduction in BSAI halibut PSC limits, supported adoption and implementation of Amendment 111.

Comment 39: The commenter requested a description of the standard for determining conflicts of interest for the IPHC.

Response: This rule deals with conservation and management measures developed by the Council and approved and implemented by the Secretary under the Magnuson-Stevens Act. The provisions for U.S. Commissioners to participate in issues before the IPHC are beyond the scope of this rule.

Additional Action Accompanying This Rule

With this rule, NMFS also publishes revised Groundfish Harvest Specification tables with revised apportionments of BSAI halibut PSC limits. At its December 2015 Council meeting, the Council approved two sets of tables that apportion the BSAI halibut PSC limits for the 2016 and 2017 annual harvest specifications: One apportionment based on the PSC limits in effect before this final rule and one apportionment based on the PSC limits that would be in effect if this final rule were approved. (*http://www.npfmc.org/council-meeting-archive/*). The Council approved both sets of apportionments of the BSAI halibut PSC limits so that the apportionments based on the new PSC limits would go into effect when this final rule establishing the new PSC limits went into effect. Therefore, with this final rule, NMFS publishes revised Tables 14, 16, 17, and 18 for the BSAI Groundfish Harvest Specification tables. These tables supersede the prior tables of the same number that were published in the **Federal Register** on March 18, 2016 (80 FR 14773, 14787–14788). The revised Tables 14, 16, 17, and 18 are printed below.

TABLE 14—FINAL 2016 AND 2017 APPORTIONMENT OF PROHIBITED SPECIES CATCH ALLOWANCES TO NON-TRAWL GEAR, THE CDQ PROGRAM, AMENDMENT 80, AND THE BSAI TRAWL LIMITED ACCESS SECTORS

PSC species and area [1]	Non-trawl PSC remaining after CDQ PSQ [2]	Total trawl PSC	Trawl PSC remaining after CDQ PSQ [2]	CDQ PSQ reserve [2]	Amendment 80 sector [3]	BSAI trawl limited access fishery
Halibut mortality (mt) BSAI	710	2,805	n/a	315	1,745	745
Herring (mt) BSAI	n/a	2,631	n/a	n/a	n/a	n/a
Red king crab (animals) Zone 1	n/a	97,000	86,621	10,379	43,293	26,489
C. *opilio* (animals) COBLZ	n/a	4,708,314	4,204,524	503,790	2,066,524	1,351,334
C. *bairdi* crab (animals) Zone 1	n/a	830,000	741,190	88,810	312,115	348,285

TABLE 14—FINAL 2016 AND 2017 APPORTIONMENT OF PROHIBITED SPECIES CATCH ALLOWANCES TO NON-TRAWL GEAR, THE CDQ PROGRAM, AMENDMENT 80, AND THE BSAI TRAWL LIMITED ACCESS SECTORS—Continued

PSC species and area [1]	Non-trawl PSC remaining after CDQ PSQ [2]	Total trawl PSC	Trawl PSC remaining after CDQ PSQ [2]	CDQ PSQ reserve [2]	Amendment 80 sector [3]	BSAI trawl limited access fishery
C. *bairdi* crab (animals) Zone 2	n/a	2,520,000	2,250,360	269,640	532,660	1,053,394

[1] Refer to § 679.2 for definitions of zones.
[2] Section 679.21(e)(3)(i)(A)(*2*) allocates 326 mt of the trawl halibut mortality limit and § 679.21(e)(4)(i)(A) allocates 7.5 percent, or 67 mt, of the non-trawl halibut mortality limit as the PSQ reserve for use by the groundfish CDQ program. The PSQ reserve for crab species is 10.7 percent of each crab PSC limit.
[3] The Amendment 80 program reduced apportionment of the trawl PSC limits by 150 mt for halibut mortality and 20 percent for crab. These reductions are not apportioned to other gear types or sectors.
Note: Sector apportionments may not total precisely due to rounding.

TABLE 16—FINAL 2016 AND 2017 PROHIBITED SPECIES BYCATCH ALLOWANCES FOR THE BSAI TRAWL LIMITED ACCESS SECTOR

BSAI trawl limited access fisheries	Prohibited species and area [1]				
	Halibut mortality (mt) BSAI	Red king crab (animals) Zone 1	*C. opilio* (animals) COBLZ	*C. bairdi* (animals)	
				Zone 1	Zone 2
Yellowfin sole	150	23,338	1,273,886	293,234	1,005,879
Rock sole/flathead sole/other flatfish [2]	0	0	0	0	0
Greenland turbot/arrowtooth flounder/Kamchatka flounder/sablefish	0	0	0	0	0
Rockfish April 15–December 31	4	0	2,104	0	849
Pacific cod	391	2,954	54,298	50,816	42,424
Pollock/Atka mackerel/other species [3]	200	197	21,046	4,235	4,242
Total BSAI trawl limited access PSC	745	26,489	1,351,334	348,285	1,053,394

[1] Refer to § 679.2 for definitions of areas.
[2] "Other flatfish" for PSC monitoring includes all flatfish species, except for halibut (a prohibited species), flathead sole, Greenland turbot, rock sole, yellowfin sole, Kamchatka flounder, and arrowtooth flounder.
[3] "Other species" for PSC monitoring includes skates, sculpins, sharks, squids, and octopuses.
Note: Seasonal or sector apportionments may not total precisely due to rounding.

TABLE 17—FINAL 2016 AND 2017 HALIBUT PROHIBITED SPECIES BYCATCH ALLOWANCES FOR NON-TRAWL FISHERIES

Halibut mortality (mt) BSAI				
Non-trawl fisheries	Seasons	Catcher/processor	Catcher vessel	All non-trawl
Pacific cod	Total Pacific cod	648	13	n/a.
	January 1–June 10	388	9	n/a.
	June 10–August 15	162	2	n/a.
	August 15–December 31	98	2	n/a.
Non-Pacific cod non-trawl-Total	May 1–December 31	n/a	n/a	49.
Groundfish pot and jig	n/a	n/a	n/a	Exempt.

TABLE 18—FINAL 2016 PROHIBITED SPECIES BYCATCH ALLOWANCE FOR THE BSAI AMENDMENT 80 COOPERATIVES

Cooperative	Prohibited species and zones [1]				
	Halibut mortality (mt) BSAI	Red king crab (animals) Zone 1	*C. opilio* (animals) COBLZ	*C. bairdi* (animals)	
				Zone 1	Zone 2
Alaska Groundfish Cooperative	474	12,459	650,551	82,136	137,369
Alaska Seafood Cooperative	1,271	30,834	1,415,973	229,979	395,291

[1] Refer to § 679.2 for definitions of zones.
Note: Sector apportionments may not total precisely due to rounding.

Classification

The NMFS Assistant Administrator has determined that Amendment 111 to the FMP and this rule are necessary for the conservation and management of the groundfish fishery and that it is consistent with the Magnuson-Stevens Act and other applicable law.

This rule has been determined to be not significant for the purposes of Executive Order (E.O.) 12866.

Small Entity Compliance Guide

Section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996 states that, for each rule or group of related rules for which an agency is required to prepare a Final Regulatory Flexibility Analysis, the agency shall publish one or more guides to assist small entities in complying with the rule, and shall designate such publications as ''small entity compliance guides.'' The preambles to the proposed rule and this final rule serve as the small entity compliance guide. This action does not require any additional compliance from small entities that is not described in the preambles. Copies of the proposed rule and this final rule are available from the NMFS Web site at *http://alaskafisheries.noaa.gov.*

Final Regulatory Flexibility Analysis

This final regulatory flexibility analysis (FRFA) incorporates the Initial Regulatory Flexibility Analysis (IRFA), a summary of the significant issues raised by the public comments, NMFS' responses to those comments, and a summary of the analyses completed to support the action. NMFS published the proposed rule on November 16, 2015 (80 FR 71650), with comments invited through December 16, 2015. An IRFA was prepared and summarized in the Classification section of the preamble to the proposed rule. The FRFA describes the impacts on small entities, which are defined in the IRFA for this action and not repeated here. Analytical requirements for the FRFA are described in Regulatory Flexibility Act, section 304(a)(1) through (5), and summarized below.

The FRFA must contain:

1. A succinct statement of the need for, and objectives of, the rule;

2. A summary of the significant issues raised by the public comments in response to the IRFA, a summary of the assessment of the agency of such issues, and a statement of any changes made in the proposed rule as a result of such comments;

3. A description and an estimate of the number of small entities to which the rule will apply, or an explanation of why no such estimate is available;

4. A description of the projected reporting, recordkeeping and other compliance requirements of the rule, including an estimate of the classes of small entities which will be subject to the requirement and the type of professional skills necessary for preparation of the report or record; and

5. A description of the steps the agency has taken to minimize the significant economic impact on small entities consistent with the stated objectives of applicable statutes, including a statement of the factual, policy, and legal reasons for selecting the alternative adopted in the final rule and why each one of the other significant alternatives to the rule considered by the agency which affect the impact on small entities was rejected.

The ''universe'' of entities to be considered in a FRFA generally includes only those small entities that can reasonably be expected to be directly regulated by the action. If the effects of the rule fall primarily on a distinct segment of the industry, or portion thereof (*e.g.,* user group, gear type, geographic area), that segment would be considered the universe for purposes of this analysis.

In preparing a FRFA, an agency may provide either a quantifiable or numerical description of the effects of a rule (and alternatives to the rule), or more general descriptive statements, if quantification is not practicable or reliable.

Need for and Objectives of This Final Rule

The objective of this final rule is to decrease BSAI halibut PSC to the extent practicable by the BSAI groundfish fisheries while achieving, on a continuing basis, optimum yield from the BSAI groundfish fisheries. This rule achieves that objective by reducing the BSAI halibut PSC limits in four sectors of the BSAI groundfish fisheries and adopting the following new BSAI halibut PSC limits: 1,745 mt for the Amendment 80 sector; 745 mt for the BSAI trawl limited access sector; 710 mt for the BSAI non-trawl sector; and 315 mt for the CDQ Program. These new limits result in an overall BSAI halibut PSC limit of 3,515 mt. By reducing halibut PSC, this final rule may increase harvest opportunities for the directed halibut fisheries if the IPHC responds to this final rule by increasing catch limits for the directed halibut fisheries.

Summary of Significant Issues Raised During Public Comment

No comments were received that raised significant issues in response to the IRFA specifically; therefore, no changes were made to the rule as a result of comments on the IRFA. However, several comments were received on the economic impacts of Amendment 111 on different sectors of the groundfish and halibut fisheries and on fishing communities. For a summary of the comments received and the agency's responses, refer to the section above titled ''Response to Comments,'' particularly the sections titled ''Comments Associated with Specific National Standards'' and ''Comments Associated with the Analysis.''

Number and Description of Directly Regulated Small Entities

This action directly regulates those entities that participate in harvesting groundfish from the Federal or parallel groundfish fisheries of the BSAI subject to a halibut PSC limit. The Regulatory Flexibility Act (RFA) recognizes and defines three kinds of small entities that could be regulated by this action: (1) small businesses, (2) small non-profit organizations, and (3) small government jurisdictions. This action directly regulates small businesses that participate in the harvesting of groundfish, and small non-profit organizations.

In this FRFA, NMFS estimates the number of directly regulated small entities based on size criteria established for industry sectors defined by the Small Business Administration (SBA). According to the SBA criteria, the groundfish fishery is defined as a finfish harvesting sector. An entity primarily involved in finfish harvesting is a small entity if it is independently owned and operated and not dominant in its field of operation (including its affiliates), and if it has combined annual gross receipts not in excess of $20.5 million for all its affiliated operations worldwide. Based on the best available and most recent data from 2014, a maximum of up to 178 vessels could be directly regulated by this action. This FRFA assumes that each vessel is a unique entity. Because of that, this FRFA likely overestimates the total number of directly regulated entities because some vessels are likely affiliated through common ownership. However, these potential affiliations are not known with the best available data and cannot be predicted.

Only 19 of these directly regulated entities are estimated to be small entities based on the best available data

on the gross receipts from these entities and their known affiliates. Seventeen of these small entities are hook-and-line catcher vessels that participate in the non-trawl sector, and two are trawl catcher vessels that participate in the BSAI trawl limited access sector, specifically the Pacific cod target fishery.

This final rule directly regulates all six of the CDQ groups: the Aleutian Pribilof Island Community Development Association, the Bristol Bay Economic Development Corporation, the Central Bering Sea Fishermen's Association, the Coastal Villages Region Fund, the Norton Sound Economic Development Corporation, and the Yukon Delta Fisheries Development Association. Each of the six CDQ groups receives an exclusive allocation of halibut PSC that will be reduced (*i.e.,* regulated) under this action. The six CDQ groups are non-profit organizations and none is dominant in its field; consequently each is defined as a small entity under the RFA.

Recordkeeping and Reporting Requirements

This action does not modify recordkeeping or reporting requirements.

Description of Significant Alternatives Considered

The Council considered an extensive series of alternatives, options, and suboptions to reduce halibut PSC limits in the BSAI, including the ''no action'' alternative. The RIR presents the complete set of alternatives (see **ADDRESSES**). Alternative 1 is the status quo/no action alternative, which would retain the current BSAI halibut PSC limits in the FMP and in regulations. Alternative 2 would have amended the FMP and regulations to reduce BSAI halibut PSC limits for six groundfish sectors. Alternative 2 includes six options. Each of the options under Alternative 2 contained seven suboptions analyzing halibut PSC limit reductions ranging from 10 percent to 50 percent for each sector. Option 1 would have reduced halibut PSC limits for the Amendment 80 sector. The reductions ranged from 232 mt to 1,162 mt. Option 2 would have reduced halibut PSC limits for the BSAI trawl limited access sector. The reductions ranged from 87 mt to 437 mt. Option 3 would have reduced halibut PSC limits for the Pacific cod hook-and-line catcher/processor sector. The reductions ranged from 76 mt to 380 mt. Option 4 would have reduced halibut PSC limits for hook-and-line vessels participating in target fisheries other than Pacific cod or sablefish. The reductions ranged from 6 mt to 29 mt. Option 5 would have reduced halibut PSC limits for the Pacific cod hook-and-line catcher vessel sector. The reductions ranged from 1 mt to 7 mt. Option 6 would have reduced halibut PSC limits for the CDQ Program. The reductions ranged from 39 mt to 196 mt. The variety of options and suboptions under Alternative 2 provided dozens of different combinations of halibut PSC limit reductions and allowed the Council and NMFS to consider a broad range of potential alternative actions.

After carefully considering these alternatives, the Council concluded that the preferred alternative represented the proper balance between achieving optimum yield by the groundfish fisheries and reducing bycatch by the groundfish fisheries to the extent practicable, taking into account the importance of the groundfish fisheries and the halibut fisheries to fishing communities. The other alternatives would have decreased bycatch by the groundfish fisheries either too much (going beyond what was practicable) or too little (falling short of what was practicable).

Section 2.5 of the Analysis describes other significant alternatives to the rule that the Council considered but did not advance for further analysis: (1) Apportioning the halibut PSC limit for the BSAI trawl limited access sector between American Fisheries Act (AFA) trawl catcher vessels and non-AFA trawl catcher vessels based on the halibut PSC by these vessel categories from 2009 through 2013; (2) implementing permanent measures in the Amendment 80 sector for deck sorting of halibut; and (3) establishing a seasonal apportionment of the halibut PSC limit for the BSAI trawl limited access sector. Each of these alternatives would have changed the current management structure for regulating halibut PSC limits in BSAI. The Council's preferred alternative is a straightforward reduction in halibut PSC limits by sector. The Council's preferred alternative leaves the current management structure intact and most expeditiously achieves the Council's objective of reducing halibut PSC limit to the extent practicable in accord with National Standard 9 and other national standards. The alternatives that were not advanced for further analysis would have taken substantially longer to develop and implement than the preferred alternative.

Based on the best available scientific data and information, none of the alternatives except the preferred alternative appear to have the potential to accomplish the stated objectives of the Magnuson-Stevens Act and other applicable statutes (as reflected in this action), while minimizing any significant adverse economic impact on small entities beyond those achieved under this action. This action will minimize bycatch to the extent practicable with existing management tools. Thus, this action will minimize the impacts on small entities in the BSAI groundfish fisheries and promote more efficient use of the available halibut PSC limits.

Tribal Consultation

Executive Order (E.O.) 13175 of November 6, 2000 (25 U.S.C. 450 note), the Executive Memorandum of April 29, 1994 (25 U.S.C. 450 note), the American Indian and Alaska Native Policy of the U.S. Department of Commerce (March 30, 1995), and the Department of Commerce Tribal Consultation and Coordination policy (78 FR 33331, June 4, 2013) outline the responsibilities of NMFS for Federal policies that have tribal implications. Section 161 of Public Law 108–199 (188 Stat. 452), as amended by section 518 of Public Law 109–447 (118 Stat. 3267), extends the consultation requirements of E.O. 13175 to Alaska Native corporations. Under the E.O. and agency policies, NMFS must ensure meaningful and timely input by tribal officials and representatives of Alaska Native corporations in the development of regulatory policies that have tribal implications.

Section 5(b)(2)(B) of E.O. 13175 requires NMFS to prepare a ''tribal summary impact statement'' for any regulation that has tribal implications, that imposes substantial direct compliance costs on Indian tribal governments, and is not required by statute. The tribal summary impact statement must contain (1) a description of the extent of the agency's prior consultation with tribal officials, (2) a summary of the nature of their concerns, (3) the agency's position supporting the need to issue the regulation, and (4) a statement of the extent to which the concerns of tribal officials have been met.

NMFS provided a copy of the Notice of Availability (80 FR 66486, October 29, 2015) and the proposed rule (80 FR 71650, November 16, 2015) to all federally recognized tribal governments and Alaska Native corporations to notify them of the opportunity to comment or request a consultation on this action. NMFS received no requests for consultation.

NMFS received comment on this action from three federally recognized

tribes in Alaska and one Alaska Native corporation. All four entities supported adoption of Amendment 111. Three of the four entities favored larger PSC reductions than contained in Amendment 111. The preference for these commenters and other commenters for larger PSC reductions is addressed in the response to Comment 2. Even though three of these commenters favored larger PSC reductions, if the Secretary disapproved this action, there would be no reductions in the PSC limit for 2016 and no reductions in the PSC limit unless, and until, the Council and NMFS proposed a new rule adopting different PSC reductions. This would be against the interests of these four commenters, as they described those interests, in their comments because they supported adoption of the PSC reductions in Amendment 111.

List of Subjects in 50 CFR Part 679

Alaska, Fisheries, Reporting and recordkeeping requirements.

Dated: April 20, 2016.

Samuel D. Rauch III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 679 is amended as follows:

PART 679—FISHERIES OF THE EXCLUSIVE ECONOMIC ZONE OFF ALASKA

■ 1. The authority citation for 50 CFR part 679 continues to read as follows:

Authority: 16 U.S.C. 773 *et seq.;* 1801 *et seq.;* 3631 *et seq.;* Pub. L. 108–447; Pub. L. 111–281.

■ 2. In § 679.2, revise the definitions for paragraph (5) of ''Directed fishing'', ''Herring Savings Area'', ''PSQ reserve'', and ''Sablefish (black cod)'' to read as follows:

§ 679.2 Definitions.

* * * * *

Directed fishing means:

* * * * *

(5) *With respect to the harvest of flatfish in the Bering Sea subarea,* for purposes of nonpelagic trawl restrictions under § 679.22(a) and modified nonpelagic trawl gear requirements under §§ 679.7(c)(5) and 679.24(f), fishing with nonpelagic trawl gear during any fishing trip that results in a retained aggregate amount of yellowfin sole, rock sole, Greenland turbot, arrowtooth flounder, flathead sole, Alaska plaice, and other flatfish that is greater than the retained amount of any other fishery category defined under § 679.21(b)(1)(ii) or of sablefish.

* * * * *

Herring Savings Area means any of three areas in the BSAI presented in Figure 4 to this part (see also § 679.21(b)(4) for additional closure information).

* * * * *

PSQ reserve means the amount of a prohibited species catch limit established under § 679.21 that has been allocated to the CDQ Program under § 679.21.

* * * * *

Sablefish (black cod) means *Anoplopoma fimbria.* (See also *IFQ sablefish; sablefish as a prohibited species* at § 679.21(a)(5); and *sablefish as a prohibited species* at § 679.24(c)(2)(ii)).

* * * * *

■ 3. In § 679.7, revise paragraphs (a)(12), (k)(1)(v), and (k)(4)(iii) to read as follows:

§ 679.7 Prohibitions.

* * * * *

(a) * * *

(12) *Prohibited species donation program.* Retain or possess prohibited species, defined at § 679.21(a)(1), except as permitted to do so under the PSD program as provided by § 679.26, or as authorized by other applicable law.

* * * * *

(k) * * *

(1) * * *

(v) *Directed fishing after a sideboard closure.* Use a listed AFA catcher/processor or a catcher/processor designated on a listed AFA catcher/processor permit to engage in directed fishing for a groundfish species or species group in the BSAI after the Regional Administrator has issued an AFA catcher/processor sideboard directed fishing closure for that groundfish species or species group under §§ 679.20(d)(1)(iv), 679.21(b)(4)(iii), or 679.21(e)(3)(v).

* * * * *

(4) * * *

(iii) *Groundfish sideboard closures.* Use an AFA catcher vessel to engage in directed fishing for a groundfish species or species group in the BSAI or GOA after the Regional Administrator has issued an AFA catcher vessel sideboard directed fishing closure for that groundfish species or species group under §§ 679.20(d)(1)(iv), 679.21(b)(4)(iii), or 679.21(e)(3)(iv), if the vessel's AFA permit does not contain a sideboard exemption for that groundfish species or species group.

* * * * *

■ 4. In § 679.21,

■ a. Redesignate paragraph (b) as paragraph (a);

■ b. Revise newly redesignated paragraph (a)(4);

■ c. Add a new paragraph (b);

■ d. Revise paragraph (e) heading;

■ e. Remove and reserve paragraphs (e)(1)(iv), (e)(2), and (e)(3)(i)(A)(*2*);

■ f. Revise paragraph (e)(3)(ii) heading, paragraphs (e)(3)(ii)(A) and (C), (e)(3)(iv) introductory text, paragraph (e)(3)(iv)(B)(*2*) heading, (e)(3)(v), and (e)(3)(vi)(A) and (B);

■ g. Remove and reserve paragraph (e)(4);

■ h. Remove paragraph (e)(5)(iv);

■ i. Revise paragraphs (e)(6)(i) and (ii), and (e)(7)(i);

■ j. Remove and reserve paragraph (e)(7)(v); and

■ k. Remove paragraph (e)(8).

The revisions and additions read as follows:

§ 679.21 Prohibited species bycatch management.

(a) * * *

(4) *Prohibited species taken seaward of the EEZ off Alaska.* No vessel fishing for groundfish in the GOA or BSAI may have on board any species listed in this paragraph (a) that was taken in waters seaward of these management areas, regardless of whether retention of such species was authorized by other applicable laws.

* * * * *

(b) *BSAI halibut PSC limits*—(1) *Establishment of BSAI halibut PSC limits.* Subject to the provisions in paragraphs (b)(1)(i) through (iv) of this section, the following four BSAI halibut PSC limits are established, which total 3,515 mt: Amendment 80 sector—1,745 mt; BSAI trawl limited access sector—745 mt; BSAI non-trawl sector—710 mt; and CDQ Program—315 mt (established as a PSQ reserve).

(i) *Amendment 80 sector.* The PSC limit of halibut caught while conducting any fishery in the Amendment 80 sector is an amount of halibut equivalent to 1,745 mt of halibut mortality. Halibut PSC limits within the Amendment 80 sector will be established for Amendment 80 cooperatives and the Amendment 80 limited access fishery according to the procedure and formulae in § 679.91(d) and (f). If halibut PSC is assigned to the Amendment 80 limited access fishery, it will be apportioned into PSC allowances for trawl fishery categories according to the procedure in paragraphs (b)(1)(ii)(A)(*2*) and (*3*) of this section.

(ii) *BSAI trawl limited access sector*—(A) *General.* (*1*) The PSC limit of halibut

caught while conducting any fishery in the BSAI trawl limited access sector is an amount of halibut equivalent to 745 mt of halibut mortality.

(*2*) NMFS, after consultation with the Council, will apportion the PSC limit set forth under paragraph (b)(1)(ii)(A)(*1*) of this section into PSC allowances for the trawl fishery categories defined in paragraphs (b)(1)(ii)(B)(*1*) through (*6*) of this section.

(*3*) Apportionment of the trawl halibut PSC limit set forth under paragraph (b)(1)(ii)(A)(*1*) of this section among the trawl fishery categories will be based on each category's proportional share of the anticipated halibut PSC during a fishing year and the need to optimize the amount of total groundfish harvested under the halibut PSC limit for this sector.

(*4*) The sum of all PSC allowances for this sector will equal the PSC limit set forth under paragraph (b)(1)(ii)(A)(*1*) of this section.

(B) *Trawl fishery categories.* For purposes of apportioning the trawl PSC limit set forth under paragraph (b)(1)(ii)(A)(*1*) of this section among trawl fisheries, the following fishery categories are specified and defined in terms of round-weight equivalents of those groundfish species or species groups for which a TAC has been specified under § 679.20.

(*1*) *Midwater pollock fishery.* Fishing with trawl gear during any weekly reporting period that results in a catch of pollock that is 95 percent or more of the total amount of groundfish caught during the week.

(*2*) *Flatfish fishery.* Fishing with trawl gear during any weekly reporting period that results in a retained aggregate amount of rock sole, ''other flatfish,'' and yellowfin sole that is greater than the retained amount of any other fishery category defined under this paragraph (b)(1)(ii)(B).

(*i*) *Yellowfin sole fishery.* Fishing with trawl gear during any weekly reporting period that is defined as a flatfish fishery under this paragraph (b)(1)(ii)(B)(*2*) and results in a retained amount of yellowfin sole that is 70 percent or more of the retained aggregate amount of rock sole, ''other flatfish,'' and yellowfin sole.

(*ii*) *Rock sole/flathead sole/Alaska plaice/''other flatfish'' fishery.* Fishing with trawl gear during any weekly reporting period that is defined as a flatfish fishery under this paragraph (b)(1)(ii)(B)(*2*) and is not a yellowfin sole fishery as defined under paragraph (b)(1)(ii)(B)(*2*)(*i*) of this section.

(*3*) *Greenland turbot/arrowtooth flounder/Kamchatka flounder/sablefish fishery.* Fishing with trawl gear during any weekly reporting period that results in a retained aggregate amount of Greenland turbot, arrowtooth flounder, Kamchatka flounder, and sablefish that is greater than the retained amount of any other fishery category defined under this paragraph (b)(1)(ii)(B).

(*4*) *Rockfish fishery.* Fishing with trawl gear during any weekly reporting period that results in a retained aggregate amount of rockfish species that is greater than the retained amount of any other fishery category defined under this paragraph (b)(1)(ii)(B).

(*5*) *Pacific cod fishery.* Fishing with trawl gear during any weekly reporting period that results in a retained aggregate amount of Pacific cod that is greater than the retained amount of any other groundfish fishery category defined under this paragraph (b)(1)(ii)(B).

(*6*) *Pollock/Atka mackerel/''other species.''* Fishing with trawl gear during any weekly reporting period that results in a retained aggregate amount of pollock other than pollock harvested in the midwater pollock fishery defined under paragraph (b)(1)(ii)(B)(*1*) of this section, Atka mackerel, and ''other species'' that is greater than the retained amount of any other fishery category defined under this paragraph (b)(1)(ii)(B).

(C) *Halibut PSC in midwater pollock fishery.* Any amount of halibut that is incidentally taken in the midwater pollock fishery, as defined in paragraph (b)(1)(ii)(B)(*1*) of this section, will be counted against the halibut PSC allowance specified for the pollock/Atka mackerel/''other species'' category, as defined in paragraph (b)(1)(ii)(B)(*6*) of this section.

(iii) *BSAI Non-trawl Sector*—(A) *General.* (*1*) The PSC limit of halibut caught while conducting any fishery in the BSAI non-trawl sector is an amount of halibut equivalent to 710 mt of halibut mortality.

(*2*) NMFS, after consultation with the Council, will apportion the PSC limit set forth under paragraph (b)(1)(iii)(A)(*1*) into PSC allowances for the non-trawl fishery categories defined under paragraph (b)(1)(iii)(B) of this section.

(*3*) Apportionment of the non-trawl halibut PSC limit of 710 mt among the non-trawl fishery categories will be based on each category's proportional share of the anticipated halibut PSC during a fishing year and the need to optimize the amount of total groundfish harvested under the halibut PSC limit for this sector.

(*4*) The sum of all PSC allowances for this sector will equal the PSC limit set forth under paragraph (b)(1)(iii)(A)(*1*) of this section.

(B) *Non-trawl fishery categories.* For purposes of apportioning the non-trawl halibut PSC limit among fisheries, the following fishery categories are specified and defined in terms of round-weight equivalents of those BSAI groundfish species for which a TAC has been specified under § 679.20.

(*1*) *Pacific cod hook-and-line catcher vessel fishery.* Catcher vessels fishing with hook-and-line gear during any weekly reporting period that results in a retained catch of Pacific cod that is greater than the retained amount of any other groundfish species.

(*2*) *Pacific cod hook-and-line catcher/processor fishery.* Catcher/processors fishing with hook-and-line gear during any weekly reporting period that results in a retained catch of Pacific cod that is greater than the retained amount of any other groundfish species.

(*3*) *Sablefish hook-and-line fishery.* Fishing with hook-and-line gear during any weekly reporting period that results in a retained catch of sablefish that is greater than the retained amount of any other groundfish species.

(*4*) *Groundfish jig gear fishery.* Fishing with jig gear during any weekly reporting period that results in a retained catch of groundfish.

(*5*) *Groundfish pot gear fishery.* Fishing with pot gear under restrictions set forth in § 679.24(b) during any weekly reporting period that results in a retained catch of groundfish.

(*6*) *Other non-trawl fisheries.* Fishing for groundfish with non-trawl gear during any weekly reporting period that results in a retained catch of groundfish and does not qualify as a Pacific cod hook-and-line catcher vessel fishery, a Pacific cod hook-and-line catcher/processor fishery, a sablefish hook-and-line fishery, a jig gear fishery, or a groundfish pot gear fishery as defined under paragraphs (b)(1)(iii)(B)(*1*) through (*5*) of this section.

(iv) *CDQ Program.* The PSC limit of halibut caught while conducting any fishery in the CDQ Program is an amount of halibut equivalent to 315 mt of halibut mortality. The PSC limit to the CDQ Program will be treated as a Prohibited Species Quota (PSQ) reserve to the CDQ Program for all purposes under 50 CFR part 679 including §§ 679.31 and 679.7(d)(3). The PSQ limit is not apportioned by gear, fishery, or season.

(2) *Seasonal apportionments of BSAI halibut PSC allowances*—(i) *General.* NMFS, after consultation with the Council, may apportion a halibut PSC allowance on a seasonal basis.

(ii) *Factors to be considered.* NMFS will base any seasonal apportionment of a PSC allowance on the following types of information:

(A) Seasonal distribution of prohibited species;

(B) Seasonal distribution of target groundfish species relative to prohibited species distribution;

(C) Expected PSC needs on a seasonal basis relevant to change in prohibited species biomass and expected catches of target groundfish species;

(D) Expected variations in PSC rates throughout the fishing year;

(E) Expected changes in directed groundfish fishing seasons;

(F) Expected start of fishing effort; or

(G) Economic effects of establishing seasonal prohibited species apportionments on segments of the target groundfish industry.

(iii) *Seasonal trawl fishery PSC allowances*—(A) *Unused seasonal apportionments.* Unused seasonal apportionments of trawl fishery PSC allowances made under paragraph (b)(2) of this section will be added to its respective fishery PSC allowance for the next season during a current fishing year.

(B) *Seasonal apportionment exceeded.* If a seasonal apportionment of a trawl fishery PSC allowance made under paragraph (b)(2) of this section is exceeded, the amount by which the seasonal apportionment is exceeded will be deducted from its respective apportionment for the next season during a current fishing year.

(iv) *Seasonal non-trawl fishery PSC allowances*—(A) *Unused seasonal apportionments.* Any unused portion of a seasonal non-trawl fishery PSC allowance made under paragraph (b)(2) of this section will be reapportioned to the fishery's remaining seasonal PSC allowances during a current fishing year in a manner determined by NMFS, after consultation with the Council, based on the types of information listed under paragraph (b)(2)(ii) of this section.

(B) *Seasonal apportionment exceeded.* If a seasonal apportionment of a non-trawl fishery PSC allowance made under paragraph (b)(2) of this section is exceeded, the amount by which the seasonal apportionment is exceeded will be deducted from the fishery's remaining seasonal PSC allowances during a current fishing year in a manner determined by NMFS, after consultation with the Council, based on the types of information listed under paragraph (b)(2)(ii) of this section.

(3) *Notification of allowances*—(i) *General.* NMFS will publish in the **Federal Register,** for up to two fishing years, the proposed and final BSAI halibut PSC allowances, the seasonal apportionments thereof, and the manner in which seasonal apportionments of non-trawl fishery PSC allowances will be managed.

(ii) *Public comment.* Public comment will be accepted by NMFS on the proposed PSC allowances seasonal apportionments thereof, and the manner in which seasonal apportionments of non-trawl fishery PSC allowances will be managed, for a period specified in the notice of proposed specifications published in the **Federal Register.**

(4) *Management of BSAI halibut PSC allowances*—(i) *Trawl sector—Amendment 80 limited access fishery and BSAI trawl limited access sector: closures*—(A) *Exception.* When a PSC allowance, or seasonal apportionment thereof, specified for the pollock/Atka mackerel/''other species'' fishery category, as defined in paragraph (b)(1)(ii)(B)(*6*) of this section is reached, only directed fishing for pollock is closed to trawl vessels using nonpelagic trawl gear.

(B) *Closures.* Except as provided in paragraph (b)(4)(i)(A) of this section, if, during the fishing year, the Regional Administrator determines that U.S. fishing vessels participating in any of the trawl fishery categories listed in paragraphs (b)(1)(ii)(B)(*2*) through (*6*) of this section will catch the halibut PSC allowance, or seasonal apportionment thereof, specified for that fishery category under paragraph (b)(1)(i) or (b)(1)(ii) of this section, NMFS will publish in the **Federal Register** the closure of the entire BSAI to directed fishing for each species and/or species group in that fishery category for the remainder of the year or for the remainder of the season.

(ii) *BSAI non-trawl sector: closures.* If, during the fishing year, the Regional Administrator determines that U.S. fishing vessels participating in any of the non-trawl fishery categories listed under paragraph (b)(1)(iii) of this section will catch the halibut PSC allowance, or seasonal apportionment thereof, specified for that fishery category under paragraph (b)(1)(iii) of this section, NMFS will publish in the **Federal Register** the closure of the entire BSAI to directed fishing with the relevant gear type for each species and/or species group in that fishery category.

(iii) *AFA PSC sideboard limits.* Halibut PSC limits for the AFA catcher/processor sector and the AFA trawl catcher vessel sector will be established pursuant to § 679.64(a) and (b) and managed through directed fishing closures for the AFA catcher/processor sector and the AFA trawl catcher vessel sector in the groundfish fisheries for which the PSC limit applies.

* * * * *

(e) *BSAI PSC limits for crab, salmon, herring*—

* * * * *

(3) * * *

(ii) *Red king crab, C. bairdi, and C. opilio*—(A) *General.* For vessels engaged in directed fishing for groundfish in the BSAI, other than vessels fishing under a CQ permit assigned to an Amendment 80 cooperative, the PSC limits for red king crab, *C. bairdi,* and *C. opilio* will be apportioned to the trawl fishery categories defined in paragraphs (e)(3)(iv)(B) through (F) of this section.

* * * * *

(C) *Incidental catch in midwater pollock fishery.* Any amount of red king crab, *C. bairdi,* or *C. opilio* that is incidentally taken in the midwater pollock fishery as defined in paragraph (e)(3)(iv)(A) of this section will be counted against the bycatch allowances specified for the pollock/Atka mackerel/''other species'' category defined in paragraph (e)(3)(iv)(F) of this section.

* * * * *

(iv) *Trawl fishery categories.* For purposes of apportioning trawl PSC limits for crab and herring among fisheries, other than crab PSC CQ assigned to an Amendment 80 cooperative, the following fishery categories are specified and defined in terms of round-weight equivalents of those groundfish species or species groups for which a TAC has been specified under § 679.20.

* * * * *

(B) * * *

(*2*) *Rock sole/flathead sole/Alaska plaice/''other flatfish'' fishery.* * * *

* * * * *

(v) *AFA prohibited species catch limitations.* Crab PSC limits for the AFA catcher/processor sector and the AFA trawl catcher vessel sector will be established according to the procedures and formulas set out in § 679.64(a) and (b) and managed through directed fishing closures for the AFA catcher/processor sector and the AFA trawl catcher vessel sector in the groundfish fisheries for which the PSC limit applies.

(vi) * * *

(A) Crab PSC limits for the Amendment 80 sector in the BSAI will be established according to the procedure and formulae set out in § 679.91(d) through (f); and

(B) Crab PSC assigned to the Amendment 80 limited access fishery will be managed through directed fishing closures for Amendment 80

vessels to which the crab bycatch limits apply.

* * * * *

(6) * * *

(i) *General.* NMFS will publish in the **Federal Register**, for up to two fishing years, the annual red king crab PSC limit, and, if applicable, the amount of this PSC limit specified for the RKCSS, the annual *C. bairdi* PSC limit, the annual *C. opilio* PSC limit, the proposed and final PSQ reserve amounts, the proposed and final bycatch allowances, and the seasonal apportionments thereof, as required by paragraph (e) of this section.

(ii) *Public comment.* Public comment will be accepted by NMFS on the proposed annual red king crab PSC limit and, if applicable, the amount of this PSC limit specified for the RKCSS, the annual *C. bairdi* PSC limit, the annual *C. opilio* PSC limit, the proposed and final bycatch allowances, seasonal apportionments thereof, and the manner in which seasonal apportionments of non-trawl fishery bycatch allowances will be managed, for a period specified in the notice of proposed specifications published in the **Federal Register.**

(7) * * *

(i) *Exception.* When a bycatch allowance, or seasonal apportionment thereof, specified for the pollock/Atka mackerel/''other species'' fishery category is reached, only directed fishing for pollock is closed to trawl vessels using nonpelagic trawl gear.

* * * * *

■ 5. In § 679.31, revise paragraph (a)(4) to read as follows:

§ 679.31 CDQ and PSQ reserves, allocations, and transfers.

(a) * * *

(4) *PSQ reserve.* (See § 679.21(e)(3)(i)(A) and (b)(1)(iv))

* * * * *

■ 6. In § 679.64, revise paragraph (a)(3) to read as follows:

§ 679.64 Harvesting sideboard limits in other fisheries.

(a) * * *

(3) *How will AFA catcher/processor sideboard limits be managed?* The Regional Administrator will manage groundfish harvest limits and PSC bycatch limits for AFA catcher/processors through directed fishing closures in fisheries established under paragraph (a)(1) of this section in accordance with the procedures set out in §§ 679.20(d)(1)(iv) and 679.21(b)(4)(iii).

* * * * *

■ 7. In § 679.91, revise paragraphs (d)(1) and (3) to read as follows:

§ 679.91 Amendment 80 Program annual harvester privileges.

* * * * *

(d) * * *

(1) *Amount of Amendment 80 halibut PSC for the Amendment 80 sector.* The amount of halibut PSC limit for the Amendment 80 sector for each calendar year is specified in Table 35 to this part. That halibut PSC is then assigned to Amendment 80 cooperatives and the Amendment 80 limited access fishery pursuant to paragraphs (d)(2) and (3) of this section. If one or more Amendment 80 vessels participate in the Amendment 80 limited access fishery, the halibut PSC limit assigned to the Amendment 80 sector will be reduced pursuant to paragraph (d)(3) of this section.

* * * * *

(3) *Amount of Amendment 80 halibut PSC assigned to the Amendment 80 limited access fishery.* The amount of Amendment 80 halibut PSC assigned to the Amendment 80 limited access fishery is equal to the amount of halibut PSC assigned to the Amendment 80 sector, as specified in Table 35 to this part, subtracting the amount of Amendment 80 halibut PSC assigned as CQ to all Amendment 80 cooperatives as determined in paragraph (d)(2)(iv) of this section, multiplied by 80 percent.

* * * * *

§§ 679.20, 679.23, 679.24, 679.25, and 679.26 [Amended]

■ 8. At each of the locations shown in the ''Location'' column, remove the phrase indicated in the ''Remove'' column and replace it with the phrase indicated in the ''Add'' column for the number of times indicated in the ''Frequency'' column.

Location	Remove	Add	Frequency
§ 679.20(d)(2)	§ 679.21(b)	§ 679.21(a)	1
§ 679.23(f)	§ 679.21(b)	§ 679.21(a)	1
§ 679.23(g)(3)	§ 679.21(b)	§ 679.21(a)	1
§ 679.24(c)(2)(ii)(A)	§ 679.21(b)	§ 679.21(a)	1
§ 679.24(c)(2)(ii)(B)	§ 679.21(b)	§ 679.21(a)	1
§ 679.24(c)(3)	§ 679.21(b)	§ 679.21(a)	1
§ 679.24(c)(4)	§ 679.21(b)	§ 679.21(a)	1
§ 679.25(a)(2)(ii)(A)	§ 679.21(b)	§ 679.21(a)	1
§ 679.26(d)(2)	§ 679.21(b)	§ 679.21(a)	1

■ 9. Revise table 35 to part 679 to read as follows:

TABLE 35 TO PART 679—APPORTIONMENT OF CRAB PSC AND HALIBUT PSC BETWEEN THE AMENDMENT 80 AND BSAI TRAWL LIMITED ACCESS SECTORS

Fishery	Halibut PSC limit in the BSAI (mt)	Zone 1 Red king crab PSC limit . . .	*C. opilio* crab PSC limit (COBLZ) . . .	Zone 1 *C. bairdi* crab PSC limit . . .	Zone 2 *C. bairdi* crab PSC limit . . .
		as a percentage of the total BSAI trawl PSC limit after allocation as PSQ.			
Amendment 80 sector	1,745	49.98	49.15	42.11	23.67
BSAI trawl limited access	745	30.58	32.14	46.99	46.81

■ 10. Revise table 40 to part 679 to read as follows:

TABLE 40 TO PART 679—BSAI HALIBUT PSC SIDEBOARD LIMITS FOR AFA CATCHER/PROCESSORS AND AFA CATCHER VESSELS

In the following target species categories as defined in § 679.21(b)(1)(iii) and (e)(3)(iv) . . .	The AFA catcher/processor halibut PSC sideboard limit in metric tons is . . .	The AFA catcher vessel halibut PSC sideboard limit in metric tons is . . .
All target species categories	286	N/A
Pacific cod trawl	N/A	887
Pacific cod hook-and-line or pot	N/A	2
Yellowfin sole	N/A	101
Rock sole/flathead sole/"other flatfish" [1]	N/A	228
Turbot/Arrowtooth/Sablefish	N/A	0
Rockfish [2]	N/A	2
Pollock/Atka mackerel/"other species"	N/A	5

[1] "Other flatfish" for PSC monitoring includes all flatfish species, except for halibut (a prohibited species), Greenland turbot, rock sole, flathead sole, yellowfin sole, and arrowtooth flounder.
[2] Applicable from July 1 through December 31.

Proposed Rules

Federal Register
Vol. 81, No. 81
Wednesday, April 27, 2016

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

2 CFR Part 1800

RIN 2700–AE29

Federal Regulation Supplement: Revisions to Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards (NASA Case 2015–N030)

AGENCY: National Aeronautics and Space Administration.

ACTION: Proposed rule.

SUMMARY: NASA is proposing to amend the NASA regulation, titled Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards to modify the requirements related to information contained in a Federal award for commercial firms with no cost sharing requirement and to add new or modify existing terms and conditions related to indirect cost charges and access to research results.

DATES: Comments on the proposed rule should be submitted in writing to the address shown below on or before June 27, 2016, to be considered in the formation of a final rule.

ADDRESSES: Submit comments identified by NASA Case 2015–N030, using any of the following methods:

○ *Regulations.gov: http://www.regulations.gov.* Submit comments via the Federal eRulemaking portal by entering ''NASA Case 2015–N030'' under the heading ''Enter keyword or ID'' and selecting ''Search.'' Select the link ''Submit a Comment'' that corresponds with ''NASA Case 2015–N030.'' Follow the instructions provided at the ''Submit a Comment'' screen. Please include your name, company name (if any), and ''NASA Case 2015–N030'' on your attached document.

○ *Email: jennifer.l.richards@nasa.gov.* Include NASA Case 2015–N030 in the subject line of the message.

○ *Fax:* (202) 358–3082.

○ *Mail:* National Aeronautics and Space Administration, Headquarters, Office of Procurement, Contract and Grant Policy Division, Attn: Ms. Jennifer Richards, Room 5M34, 300 E Street SW., Washington, DC 20546–0001.

FOR FURTHER INFORMATION CONTACT: Ms. Jennifer Richards, NASA HQ, Office of Procurement, Contract and Grant Policy Division, Room 5M34, 300 E Street SW., Washington, DC 20456–0001. Telephone 202–358–0047; facsimile 202–358–3082.

SUPPLEMENTARY INFORMATION:

I. Background

NASA is proposing the following changes to NASA regulation Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards (2 CFR part 1800):

1. Modify the requirement related to information contained in a Federal award for commercial firms with no cost sharing requirement. NASA requirements for information contained in a Federal award can be found at 2 CFR 1800.210, which adopts and supplements 2 CFR 200.210. Title 2 CFR 200.210 includes a list of data elements that must be included in a Federal award, including indirect cost rate for the Federal award (including if the de minimis rate is charged per § 200.414 Indirect (F&A) costs). Although 2 CFR part 200 does not apply to commercial firms, NASA, in its adoption of the regulation at 2 CFR 1800.3, Applicability, added commercial firms with no cost sharing requirement to the list of applicable entities. Therefore, the requirement to include an indirect cost rate on a notice of Federal award is applicable to commercial firms with no cost sharing requirement.

2. Add a new term and condition to address those instances when a recipient has a change in its negotiated indirect cost rate agreement during the period of performance of an award. See 2 CFR 200.56, 200.57, and 200.414 for more information on indirect (facilities & administrative) costs. NASA has discovered that, on occasion, when a recipient's indirect cost rate has changed as a result of a new negotiated indirect cost rate agreement, the change in rate has not always been captured when indirect costs have been charged to NASA. As a result, some recipients have either overcharged or undercharged NASA for indirect costs.

3. Modify an existing term and condition and add a new term and condition to ensure recipients meet requirements associated with, ''NASA Plan: Increasing Access to the Results of Scientific Research'' (see *http://science.nasa.gov/media/medialibrary/2015/07/08/NASA_Plan_for_increasing_access_to_results_of_federally_funded_research1.pdf*). This plan was issued in response to the Executive Office of the President's, Office of Science and Technology Policy (OSTP) Memorandum for the Heads of Executive Departments and Agencies, dated February 22, 2013, ''Increasing Access to the Results of Federally Funded Scientific Research.'' Through this memorandum, OSTP directed all agencies with more than $100 million in annual research and development expenditures to prepare a plan for improving the public's access to the results of federally funded research. Part A of NASA's plan focuses on digital unclassified scientific research data, which are research data that can be stored digitally and accessed electronically.

To facilitate increased access to such data, NASA has updated its research data policy to require all investigators submitting a research proposal or research project plan to NASA to include a Data Management Plan for managing and providing access to final research data or to state why their data cannot or need not be made publicly available. Part B of the plan focuses on the public access to peer-reviewed scientific research manuscripts. The scope of applicability of this part includes all final peer-reviewed scientific research manuscripts authored or coauthored by investigators funded for this research by NASA-appropriated funds.

II. Analysis

After consideration of feedback from commercial firms expressing concern that indirect cost rates are sensitive financial information which should not be available on documents that could potentially be released to the public, NASA has determined that excluding indirect cost rates from notices of Federal award to commercial firms with no cost sharing requirement is a prudent business decision that protects sensitive financial information.

In order to ensure that the permitted amount of indirect costs is being charged to an award, NASA is proposing a new term and condition requiring recipients that have changes to their indirect cost rate agreement during the period of performance of an award to apply the approved rate to covered direct costs expended during the time frame of the rate agreement, even if the agreement is not on file with NASA. This will prevent NASA from overpaying or underpaying for indirect charges and ensure recipients are receiving what they are legally allowed. To address the NASA plan requirements for awardees from non-NASA organizations that publish scientific research or compile digital datasets resulting from research, development, and technology programs, NASA is proposing the following revisions:

• Modify an existing term and condition, 2 CFR 1800.902 Technical Publications and Reports, to add a requirement for awardees with research and research-related awards to follow additional reporting requirements at 2 CFR 1800.930 Access to Research Results.

• Add a new term and condition requiring recipients to comply with their approved Data Management Plan submitted with their proposal, and as modified upon agreement by the recipient and NASA from time to time during the course of the period of performance. In addition, this new term and condition will ensure that any Final Peer-Reviewed Manuscripts are submitted to the NASA-designated repository, currently the PubMed Central system at *www.ncbi.nlm.nih.gov,* within one year of peer-review or publication by a journal, whichever is earlier. Furthermore, it will ensure that any publisher's agreements entered into by an awardee will allow for the awardee to comply with these requirements including submission of Final Peer-Reviewed Manuscripts to the NASA-designated repository, currently the PubMed Central system, with sufficient rights to permit such repository to use such Final Peer-Reviewed Manuscript in its normal course, including rights to permit users to download XML and plain text formats. Finally, the grantee agrees to be responsible for, and defend NASA against, any royalties, fees, or other costs claimed against NASA or for which NASA may be held liable as a consequence of awardee failing to comply with the foregoing and include in annual and final reports a list of Final Peer-Reviewed Manuscripts covered by this term and condition.

III. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This proposed rule is not a major rule under 5 U.S.C. 804.

IV. Paperwork Reduction Act

This proposed rule contains information collection requirements that require the approval of the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C chapter 35; however, these changes to 2 CFR part 1800 do not impose additional information collection requirements to the paperwork burden previously approved under OMB Control Number 2700–0092, entitled Financial Assistant Awards/Grants and Cooperative Agreements.

List of Subjects in 2 CFR Part 1800

Government financial assistance.

Manuel Quinones,

NASA Federal Register Liaison.

Accordingly, 2 CFR part 1800 is proposed to be amended as follows:

PART 1800—UNIFORM ADMINISTRATIVE REQUIREMENTS, COST PRINCIPLES, AND AUDIT REQUIREMENTS FOR FEDERAL AWARDS

■ 1. The authority citation for 2 CFR part 1800 continues to read as follows:

Authority: 51 U.S.C. 20113(e), Pub. L. 97–258, 96 Stat. 1003 (31 U.S.C. 6301 *et seq.*), and 2 CFR part 200.

■ 2. Revise § 1800.210 to read as follows:

§ 1800.210 Information contained in a Federal award.

NASA waives the requirement for the inclusion of indirect cost rates on any notice of Federal award for commercial firms with no cost sharing requirement. The terms and conditions for NASA may be found at Appendix B of this Part and *https://prod.nais.nasa.gov/pub/pub_library/srba.*

■ 3. Amend Appendix B to part 1800 by:
■ a. Under 1800.902 Technical Publications and Reports, adding paragraph (a)(4); and
■ b. Adding 1800.929 Indirect Costs and 1800.930 Access to Research Results.

The additions read as follows:

Appendix B to Part 1800—Terms and Conditions

* * * * *

1800.902 Technical Publications and Reports

* * * * *

(a) * * *

* * * * *

(4) For research and research-related awards, see additional reporting requirements at 1800.930 Access to Research Results.

* * * * *

1800.929 Indirect Costs

Prescription —The Grant Officer shall include this term and condition in all awards with indirect costs, excluding those awards using the 10% de minimis rate.

Indirect Costs

If during the course of this award, the approved indirect cost rate is revised, changed or removed, that rate must be applied, as allowed, to the covered direct costs that are expended during the time frame of that rate agreement. Any corrections, either up or down, to the approved budget submitted with the awarded application must be reflected in the awardees' records of costs and should be audited as such.

(End of Term and Condition)

1800.930 Access to Research Results

Prescription—The Grant Officer shall include this term and condition in all research and research-related awards.

Access to Research Results

(a) This award is subject to the requirements of the, ''NASA Plan: Increasing Access to the Results of Scientific Research,'' which covers public access to digital scientific data and peer-reviewed publications. For purposes of this term and condition, the following definitions apply:

(1) Awardee: Any recipient of a NASA grant or cooperative agreement, its investigators, and subrecipient (subaward or contract as defined in 2 CFR part 200.92 and 200.22, respectively) at any level.

(2) Final Peer-Reviewed Manuscript: The final text version of a peer-reviewed article disclosing the results of scientific research which is authored or co-authored by the Awardee or funded, in whole or in part, with funds from a NASA award, that includes all modifications from the publishing peer review process, and all graphics and supplemental material associated with the article.

(b) The recipient shall:

(1) Comply with their approved Data Management Plan submitted with its proposal, and as modified upon agreement by the recipient and NASA from time to time

during the course of the period of performance.

(2) Ensure that any Final Peer-Reviewed Manuscript is submitted to the NASA-designated repository, currently the PubMed Central system at *www.ncbi.nlm.nih.gov.* Ensure that the Final Peer-Reviewed Manuscript is submitted to PubMed Central within one year of peer-review or publication by a journal, whichever is earlier.

(3) Ensure that any publisher's agreements entered into by an Awardee will allow for the Awardee to comply with these requirements including submission of Final Peer-Reviewed Manuscripts to the NASA-designated repository, as listed in the above bullet, with sufficient rights to permit such repository to use such Final Peer-Reviewed Manuscript in its normal course, including rights to permit users to download XML and plain text formats.

(4) Agree to be responsible for, and defend NASA against, any royalties, fees, or other costs claimed against NASA or for which NASA may be held liable as a consequence of Awardee failing to comply with the foregoing. Include in annual and final reports a list of Final Peer-Reviewed Manuscripts covered by this term and condition.

(End of Term and Condition)

BILLING CODE 7510–13–P

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 532

RIN 3206–AN37

Prevailing Rate Systems; Redefinition of the Asheville, NC, and Charlotte, NC, Appropriated Fund Federal Wage System Wage Areas

AGENCY: U.S. Office of Personnel Management.

ACTION: Proposed rule with request for comments.

SUMMARY: The U.S. Office of Personnel Management (OPM) is issuing a proposed rule that would redefine the geographic boundaries of the Asheville, NC, and Charlotte, NC, appropriated fund Federal Wage System (FWS) wage areas. The proposed rule would redefine Alexander and Catawba Counties, NC, from the Charlotte wage area to the Asheville wage area. These changes are based on a recent consensus recommendation of the Federal Prevailing Rate Advisory Committee (FPRAC) to best match the counties proposed for redefinition to a nearby FWS survey area. There are no FWS employees stationed in Alexander or Catawba Counties.

DATES: We must receive comments on or before May 27, 2016.

ADDRESSES: You may submit comments, identified by ''RIN 3206–AN37,'' using any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Mail: Brenda L. Roberts, Deputy Associate Director for Pay and Leave, Employee Services, U.S. Office of Personnel Management, Room 7H31, 1900 E Street NW., Washington, DC 20415–8200.

Email: pay-leave-policy@opm.gov.

FOR FURTHER INFORMATION CONTACT: Madeline Gonzalez, (202) 606–2858; email *pay-leave-policy@opm.gov*; or FAX: (202) 606–4264.

SUPPLEMENTARY INFORMATION: OPM is issuing a proposed rule that would redefine the geographic boundaries of the Asheville, NC, and Charlotte, NC, appropriated fund FWS wage areas. The proposed rule would redefine Alexander and Catawba Counties, NC, from the Charlotte wage area to the Asheville wage area.

OPM considers the following regulatory criteria under 5 CFR 532.211 when defining FWS wage area boundaries:

(i) Distance, transportation facilities, and geographic features;

(ii) Commuting patterns; and

(iii) Similarities in overall population, employment, and the kinds and sizes of private industrial establishments.

In addition, OPM regulations at 5 CFR 532.211 do not permit splitting Metropolitan Statistical Areas (MSAs) for the purpose of defining a wage area, except in very unusual circumstances.

Alexander, Burke, Caldwell, and Catawba Counties, NC, comprise the Hickory-Lenoir-Morganton, NC, MSA. The Hickory-Lenoir-Morganton MSA is split between the Asheville, NC, and Charlotte, NC, wage areas. Burke and Caldwell Counties are part of the area of application of the Asheville wage area and Alexander and Catawba Counties are part of the area of application of the Charlotte wage area.

Based on an analysis of the regulatory criteria for Caldwell County, the core county in the Hickory-Lenoir-Morganton MSA, the entire Hickory-Lenoir-Morganton MSA would be defined to the Asheville wage area. When measuring to cities, the distance criterion does not favor one wage area more than another. When measuring to host installations, the distance criterion favors the Asheville wage area more than the Charlotte wage area. The commuting patterns criterion does not favor one wage area more than another. Caldwell County resembles the Asheville survey area more than the Charlotte survey area in terms of the overall population and employment and the kinds and sizes of private industrial establishments criteria.

Based on this analysis, we believe Caldwell County is appropriately defined to the Asheville wage area. OPM regulations at 5 CFR 532.211 permit splitting MSAs only in very unusual circumstances. There appear to be no unusual circumstances that would permit splitting the Bloomsburg-Berwick MSA. To comply with OPM regulations not to split MSAs, Alexander and Catawba Counties would be redefined to the Asheville wage area. The remaining county in the Hickory-Lenoir-Morganton MSA, Burke County, is already defined to the Asheville wage area. There are currently no FWS employees working in Alexander and Catawba Counties.

FPRAC, the national labor-management committee responsible for advising OPM on matters concerning the pay of FWS employees, recommended this change by consensus. This change would be effective on the first day of the first applicable pay period beginning on or after 30 days following publication of the final regulations.

Regulatory Flexibility Act

I certify that these regulations would not have a significant economic impact on a substantial number of small entities because they would affect only Federal agencies and employees.

List of Subjects in 5 CFR Part 532

Administrative practice and procedure, Freedom of information, Government employees, Reporting and recordkeeping requirements, Wages.

U.S. Office of Personnel Management.

Beth F. Cobert,

Acting Director.

Accordingly, the U.S. Office of Personnel Management is proposing to amend 5 CFR part 532 as follows:

PART 532—PREVAILING RATE SYSTEMS

■ 1. The authority citation for part 532 continues to read as follows:

Authority: 5 U.S.C. 5343, 5346; § 532.707 also issued under 5 U.S.C. 552.

Appendix C to Subpart B of Part 532—Appropriated Fund Wage and Survey Areas

■ 2. Appendix C to subpart B is amended by revising the wage area listings for the proposed rule that would redefine the geographic boundaries of the wage areas to read as follows:

* * * * *

NORTH CAROLINA

Asheville

Survey Area

North Carolina:
Buscombe
Haywood

BILLING CODE P

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Parts 701 and 721

RIN 3133–AE54

Federal Credit Union Occupancy, Planning, and Disposal of Acquired and Abandoned Premises; Incidental Powers

AGENCY: National Credit Union Administration (NCUA).

ACTION: Proposed rule.

SUMMARY: As part of NCUA's Regulatory Modernization Initiative, the NCUA Board (Board) is issuing for public comment a proposed rule to amend its regulation governing federal credit union (FCU) occupancy, planning, and disposal of acquired and abandoned premises, and its regulation regarding incidental powers. To provide regulatory relief to FCUs, the proposal eliminates a requirement in the current occupancy rule (formerly known as the fixed assets rule) that an FCU must plan for, and eventually achieve, *full* occupancy of acquired premises.

The proposal generally retains the current regulatory timeframes for *partial* occupancy. However, it modifies the definition of ''partially occupy'' to mean occupation and use, on a full-time basis, of at least fifty percent of the premises by the FCU, or by a combination of the FCU and a credit union service organization (CUSO) in which the FCU has a controlling interest in accordance with Generally Accepted Accounting Principles (GAAP).

The proposal also amends the excess capacity provision in NCUA's incidental powers rule to clarify that an FCU may lease or sell excess capacity in its *facilities,* but it need not anticipate that such excess capacity will be fully occupied by the FCU in the future. However, the sale or lease of excess capacity in *equipment or services,* including employee-sharing and data processing for third parties, continues to be limited to circumstances where an FCU reasonably anticipates that such excess capacity will be taken up by the future expansion of services to members.

DATES: Comments must be received on or before June 27, 2016.

ADDRESSES: You may submit comments by any of the following methods (Please send comments by one method only):

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *NCUA Web site: https://www.ncua.gov/regulation-supervision/Pages/rules/proposed.aspx.* Follow the instructions for submitting comments.
- *Email:* Address to *regcomments@ncua.gov.* Include ''[Your name] Comments on Notice of Proposed Rulemaking for Parts 701 and 721, FCU Occupancy, Planning, and Disposal of Acquired and Abandoned Premises; Incidental Powers'' in the email subject line.
- *Fax:* (703) 518–6319. Use the subject line described above for email.
- *Mail:* Address to Gerard Poliquin, Secretary of the Board, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314–3428.

• *Hand Delivery/Courier:* Same as mail address.

Public Inspection: You may view all public comments on NCUA's Web site at *http://www.ncua.gov/Legal/Regs/Pages/PropRegs.aspx* as submitted, except for those we cannot post for technical reasons. NCUA will not edit or remove any identifying or contact information from the public comments submitted. You may inspect paper copies of comments in NCUA's law library at 1775 Duke Street, Alexandria, Virginia 22314, by appointment weekdays between 9 a.m. and 3 p.m. To make an appointment, call (703) 518–6546 or send an email to *OGCMail@ncua.gov.*

FOR FURTHER INFORMATION CONTACT: Pamela Yu, Senior Staff Attorney, Office of General Counsel, at the above address or telephone (703) 518–6540, or Jacob McCall, Program Officer, Office of Examination and Insurance, at the above address or telephone (703) 518–6360.

SUPPLEMENTARY INFORMATION:

I. Background

Section 107(4) of the Federal Credit Union Act (FCU Act) authorizes an FCU to purchase, hold, and dispose of property necessary or incidental to its operations.[1] NCUA's occupancy rule (formerly referred to as the fixed assets rule) interprets and implements this provision of the FCU Act by establishing occupancy, planning, and disposal requirements for acquired and abandoned premises. The rule also prohibits certain transactions to avoid conflicts of interest in the acquisition or lease of FCU premises.[2]

Over the past several years, the Board has proposed and adopted several regulatory amendments to modernize § 701.36.[3] Most recently, in July 2015, the Board approved a final rule to eliminate the five percent aggregate limit on investments in fixed assets for FCUs with $1,000,000 or more in assets and to streamline the partial occupancy requirements. Public comment in response to these recent amendments has been generally supportive of the Board's ongoing efforts to provide regulatory relief to FCUs in this area. However, commenters have continued to ask for more regulatory relief to provide FCUs with greater flexibility in the management of property necessary or incidental to FCU operations. In particular, commenters have strongly advocated the elimination of regulatory occupancy requirements, especially the requirement for full occupancy.

In general, commenters have maintained that the FCU Act does not expressly mandate specific timeframes for occupancy or otherwise prescribe occupancy requirements for FCU premises. Thus, commenters have urged the Board to liberalize NCUA's occupancy rules.[4] For example, commenters have said that NCUA should not set a specific time period for full occupancy; that FCU boards and management should determine the best timeframe in which to fully develop property; and that the full occupancy requirement should be eliminated entirely.[5] Commenters have also suggested that NCUA should replace the ''full'' occupancy requirement with a ''significant'' or ''substantial'' occupancy requirement, defined as fifty-one percent occupancy.[6]

In addition, commenters urging NCUA to reconsider its position on full occupancy have indicated that it oftentimes makes sense for a credit union to own a building and lease out part or all of the building to help offset the cost of property ownership.[7] Commenters have argued that prescriptive occupancy requirements reduce access to commercial space and limit an FCU's ability to acquire space in the most cost-effective manner. As an example, commenters have noted that some local zoning or mixed-use ordinances, city entitlements, or other use requirements may require a portion of the property to be dedicated to retail business.[8] Commenters have also posited that generating long-term income from FCU premises would generate value for the FCU's membership.[9]

The Board has carefully considered the numerous comments received on this subject since at least 2013.[10] The Board also has reconsidered the regulatory position that the limited authority for FCUs to invest in property granted by Section 107(4) of the FCU Act means that an FCU may not hold real property indefinitely without fully occupying the premises. Accordingly, as discussed in more detail below, the Board is proposing to eliminate from the current occupancy rule the requirement that an FCU must plan for, and eventually achieve, *full* occupancy of its premises. The proposal generally retains the current regulatory timeframes for *partial* occupancy and the related waiver provisions, including those finalized in July 2015.[11] However, the current definition of ''partially occupy'' is modified in the proposal to reflect that an FCU need not fully occupy premises, but the FCU (or a combination of the FCU and a CUSO in which the FCU has a controlling interest in accordance with GAAP) must utilize at least fifty percent of the premises on a full-time basis within the required timeframe to achieve partial occupancy. For consistency, the proposal also amends the excess capacity provision in the incidental powers rule and makes technical and conforming amendments[12] to reflect the proposed policy change regarding full occupancy for FCU premises.

The proposed rule is discussed in greater detail below.

II. Summary of the Proposed Rule

A. Occupancy rule

Under the current rule, if an FCU acquires premises for future expansion and does not fully occupy them within one year, it must have an FCU board resolution in place by the end of that year with definitive plans for full occupation.[13] For purposes of the rule, ''premises'' means any office, branch office, suboffice, service center, parking lot, other facility, or real estate where the FCU transacts or will transact business.[14] The current rule does not set a specific time period within which an

[7] 80 FR 45844 (Aug. 3, 2015).

[8] 80 FR 16595, 16599 (Mar. 30, 2015).

[9] *Id.*

[10] In fact, requests for relief from the full occupancy requirement date back to at least 2004. *See* 69 FR 58039, 58041 (Sept. 29, 2004) (''Several commenters believe NCUA should reduce or eliminate the rule's requirements for both partial and full occupation, but particularly for full occupation. These commenters contend it is difficult for a credit union to obtain a building or lease space that is a perfect fit for the credit union's current and near term plans and the rule's occupation requirements restrict credit union growth and may be anticompetitive. One commenter cites the perceived difficulty rural and low-income credit unions have in finding appropriate office space, and another cites the perceived difficulty a continuing credit union in a merger has in balancing reduced staffing needs with the buildings it inherits in a merger.'')

[11] 80 FR 45844 (Aug. 3, 2015).

[12] For example, the proposed rule generally removes references to ''future expansion'' and other language that implies an FCU must plan for and achieve full occupancy of its premises.

[13] 12 CFR 701.36(c)(1). Under the current rule, the reasonableness of an FCU's plan for full occupation is evaluated through the examination process and based upon such factors as the defensibility of projection assumptions, the operational and financial feasibility of the plan, and the overall suitability of the plan relative to the FCU's field of membership.

[14] 12 CFR 701.36(b).

FCU must achieve full occupation of premises acquired for future expansion. However, partial occupancy of the premises is required within a reasonable period, but no later than six years after the date of acquisition, regardless of whether the premises are improved or unimproved.[15] Partial occupancy must be sufficient to show, among other things, that the FCU will fully occupy the premises within a reasonable time and consistent with its plan for the premises.[16]

The occupancy requirements in the current rule have a statutory basis, but full occupancy of FCU premises is not expressly or specifically mandated by statute. Section 107(4) of the FCU Act authorizes an FCU to purchase, hold, and dispose of property *necessary or incidental to its operations.*[17] NCUA has long held that the limited authority granted by this provision means that an FCU may not hold, or lease to unrelated third parties, real property indefinitely without fully occupying the premises.[18]

After further consideration, however, the Board believes the language in Section 107(4) of the FCU Act supports an interpretation that provides FCUs' with more flexibility to acquire and hold real property. Accordingly, the Board has reconsidered its current approach of ensuring that FCU investment in and use of real property is consistent with the FCU Act by requiring FCUs to fully occupy premises. Section 107(4) neither explicitly mentions nor expressly requires full occupancy of FCU property. Accordingly, the Board proposes to eliminate the full occupancy and related planning requirements in the current occupancy rule. Specifically, the proposed rule deletes the requirement in current § 701.36(c)(1) that, if an FCU acquires premises for future expansion and does not fully occupy them within one year, it must have a board resolution in place by the end of that year with definitive plans for full occupation.

While this proposed change represents a departure from the Board's previous interpretation of Section 107(4), it is both reasonable and consistent with the requirements of the FCU Act. The United States Supreme Court has emphasized that an ''initial agency interpretation is not instantly carved in stone,'' and ''to engage in informed rulemaking, [an agency] must consider varying interpretations and the wisdom of its policy on a continuing basis,'' indicating that an agency may change its interpretive position on the statutes it administers.[19] In light of the continuing requests from commenters for relief from the full occupancy requirement, the proposed change is required to avoid unnecessarily imposing undue hardship on FCUs that may have difficulty realizing their growth potential and member service strategies under the current rule.

The Board emphasizes, however, that it maintains its current view that there is no authority in the FCU Act for an FCU to invest in real estate for speculative purposes or to otherwise engage in real estate activities that do not generally support its purpose of providing financial services to its members. The statute is clear that any property acquired or held by an FCU must be ''necessary or incidental to its operations.'' [20] NCUA has stated consistently that an FCU may only invest in property it intends to use to transact credit union business or in property that supports its internal operations or member services.[21]

Although the Board's position on *full* occupancy has evolved, it continues to read the FCU Act as requiring that an FCU may purchase or hold property only for a permissible purpose or activity; that is, to support the FCU's provision of financial services to its members. As the Board noted in the preamble to the July 2015 final rule, the requirement for an FCU to partially occupy its acquired premises within a specified timeframe is intended to function as a reasonable safeguard against speculative real estate investments or other real estate activities that are not permitted for FCUs under the FCU Act.[22] Making speculative investments in real property exceeds an FCU's authority and can lead to safety and soundness problems. Making speculative investments in real property increases an FCU's exposure to market factors unrelated to financial services. As well, managing unoccupied real property or commercial leases creates operational risk exposures which are significantly different from those related to managing authorized financial services permissible for FCUs. By maintaining the requirement that FCUs must partially occupy real property, NCUA reduces the opportunity for speculative investment and helps FCUs align their real property investment decisions with the operational needs of the FCU and its members.

Requiring an FCU to fully occupy its acquired premises may, under certain circumstances: (1) Hinder its ability to obtain cost-effective office space necessary to serve its members; (2) restrict its growth; or (3) place it at a competitive disadvantage. However, without a reasonable occupancy requirement, there is little to inhibit an FCU from: (1) Speculating on real property with the sole intent of realizing a profit from its future sale; (2) acting as a property developer or full-time landlord; or (3) otherwise venturing into real estate activities that are beyond the scope of its authority under Section 107(4). Accordingly, the Board has determined that an FCU must at least partially occupy each of its acquired real property. For both legal and safety and soundness reasons, the proposed rule retains the requirement that an FCU premises, including unimproved property, must be partially occupied within six years from the date of its acquisition. An FCU may apply for a waiver if it is not able to achieve partial occupancy of its premises within six years.[23]

Under the current rule, ''partially occupy'' means occupation, on a full-time basis, of a portion of the premises that is: (1) Consistent with the FCU's usage plan for the premises; (2) significant enough that the FCU is deriving practical utility from the occupied portion relative to the scope of the usage plan; and (3) sufficient to show that the FCU will fully occupy the premises within a reasonable time.[24] The Board proposes to modify the current definition of ''partial occupancy'' to eliminate references to the current requirement to plan for full occupancy (usage plan) and the need to show that the FCU will fully occupy the premises. Additionally, the Board proposes to amend that definition to

[15] 12 CFR 701.36(c)(2).

[24] 12 CFR 701.36(b).

emphasize that at least fifty percent of FCU premises must be occupied and used, on a full-time basis, by the FCU or a combination of the FCU and a CUSO in which the FCU has a controlling interest in accordance with GAAP.[25] Occupancy of FCU premises with third-party vendors or CUSOs in which the FCU does not maintain a controlling interest will not count towards the fifty percent partial occupancy requirement because these entities operate at the direction of other owners and may not be obligated to primarily support the FCU that acquired the premises or to primarily serve that FCU's members. The proposed definition, which incorporates elements from the current rule's definition of full occupancy,[26] will ensure that any property acquired or held by an FCU is primarily utilized for a purpose that is necessary or incidental to its operations, as required by the FCU Act.

B. Incidental powers.

The Board recognizes that in planning for future expansion, FCUs should be permitted to sell or lease their excess capacity as a matter of good business practice.[27] The incidental powers rule permits an FCU to sell or lease its excess capacity with respect to its property and services.[28] Under that rule, excess capacity refers to the excess use or capacity remaining in FCU facilities, equipment, or services.[29] An FCU's sale or lease of excess capacity, for example, may involve leasing excess office space, sharing employees, or using data processing systems to process information for third parties.[30] However, while an FCU has the authority under the rule to obtain income by selling or leasing excess capacity in its facilities, equipment, or services to third parties, that authority is subject to the following conditions: (1) The facilities, equipment, or services must have been acquired by an FCU, in good faith, for the purpose of providing financial services to its members; and (2) the FCU must reasonably anticipate that the excess capacity will be taken up by the future expansion of services to its members.[31]

To conform to the above proposed amendments to the occupancy rule, the Board proposes to amend the incidental powers rule regarding the sale or lease of excess capacity by removing the condition that excess capacity in FCU facilities must eventually be fully occupied by the FCU. The Board continues to believe, however, that the sale or lease of excess capacity in equipment or services, including employee-sharing and data processing for third parties, should be limited to circumstances where an FCU reasonably anticipates that the excess capacity will be taken up by the future expansion of services to its members.

In adopting the excess capacity provision in the incidental powers rule, the Board reasoned in 2001 that ''[t]he sale of excess capacity offers FCUs the opportunity to provide financial services to its members, even though member demand for the services does not initially meet the FCU's capacity.'' [32] However, the Board also noted:

> NCUA has consistently held the position that an FCU has limited authority in the leasing of fixed assets and the sale of excess data processing capacity. FCUs are not in the business of providing others with data processing capacity or any other service that is not within their express or incidental powers; rather, they are cooperative financial institutions organized to provide financial services to their members.[33]

While the Board has reconsidered its position with respect to requiring full occupancy of FCU facilities, the Board maintains its view that FCUs are not, and should not be, in the business of providing third parties with data processing capacity or other equipment or services outside their express or incidental powers. Accordingly, under this proposal, an FCU's authority to sell or lease excess capacity in equipment and services continues to be conditioned on the FCU's reasonable anticipation that its members will eventually fully utilize the excess capacity.

III. Regulatory Procedures

A. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) generally requires that, in connection with a notice of proposed rulemaking, an agency prepare and make available for public comment an initial regulatory flexibility analysis that describes the impact of a proposed rule on small entities. A regulatory flexibility analysis is not required, however, if the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities (defined for purposes of the RFA to include credit unions with assets less than $100 million) and publishes its certification and a short, explanatory statement in the **Federal Register** together with the rule. The proposed rule would provide regulatory relief by eliminating the need to develop a plan for full occupancy. However, FCUs currently have limited flexibility to purchase real estate with excess capacity. NCUA certifies that the proposed rule will not have a significant economic impact on a substantial number of small credit unions.

B. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (PRA) applies to rulemakings in which an agency by rule creates a new paperwork burden on regulated entities or modifies an existing burden.[34] For purposes of the PRA, a paperwork burden may take the form of either a reporting or a recordkeeping requirement, both referred to as information collections. The proposed rule provides regulatory relief to FCUs by eliminating the requirement that, if an FCU does not fully occupy premises acquired for future expansion within one year, it must have a board resolution in place by the end of that year with definitive plans for full occupation. The proposed rule does not impose new paperwork burdens. The proposed rule would relieve FCUs from the current requirement to have a board-approved plan for full occupation of its premises.

According to NCUA estimates, approximately 15 FCUs are required to develop a plan for full occupation premises each year. Accordingly, the reduction to existing paperwork burdens that would result from the proposal is analyzed below:

Estimate of the reduced burden by eliminating the full occupancy planning requirement.

Estimated FCUs: 15.

Frequency of waiver request: Annual.

[25] FASB Accounting Standards Update (ASU) 805 defines controlling interest as ''the ability of an entity to direct the policies and management that guide the ongoing activities of another entity so as to increase its benefits and limit its losses from that other entity's activities.'' More generally, controlling interest is majority interest or any other ownership interest which entitles the owner to direct the activities of the CUSO.

[26] 12 CFR 701.36(c)(1).

[27] 66 FR 40845, 40851 (Aug. 6, 2001).

[28] The incidental powers rule defines an incidental powers activity as one that is necessary or requisite to enable an FCU to carry on effectively the business for which it is incorporated. An activity meets the definition of an incidental powers activity if it: (1) Is convenient or useful in carrying out the mission or business of credit unions consistent with the FCU Act; (2) is the functional equivalent or logical outgrowth of activities that are part of the mission or business of credit unions; and (3) involves risks similar in nature to those already assumed as part of the business of credit unions. 12 CFR 721.2.

[29] 12 CFR 721.3(e).

[31] *Id.*

[32] 66 FR 40845, 40851 (Aug. 6, 2001).

[33] *Id.*

[34] 44 U.S.C. 3507(d); 5 CFR part 1320.

Reduced hour burden: 15 hours.

15 FCUs × 15 hours = 225 hours reduced burden.

In accordance with the requirements of the PRA, NCUA intends to obtain a modification of its OMB Control Number, 3133–0040, to support these changes. NCUA is submitting a copy of the proposed rule to OMB, along with an application for a modification of the OMB Control Number.

The PRA and OMB regulations require that the public be provided an opportunity to comment on the paperwork requirements, including an agency's estimate of the burden of the paperwork requirements. The Board invites comment on: (1) Whether the paperwork requirements are necessary; (2) the accuracy of NCUA's estimates on the burden of the paperwork requirements; (3) ways to enhance the quality, utility, and clarity of the paperwork requirements; and (4) ways to minimize the burden of the paperwork requirements.

Comments should be sent to the NCUA Contact and the OMB Reviewer listed below:

NCUA Contact: Dawn Wolfgang, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314–3428, Fax No. 703–837–2861, Email: *OCIOPRA@ncua.gov.*

OMB Contact: Office of Management and Budget, ATTN: Desk Officer for the National Credit Union Administration, Office of Information and Regulatory Affairs, Washington, DC 20503.

C. Executive Order 13132

Executive Order 13132 encourages independent regulatory agencies to consider the impact of their actions on state and local interests. NCUA, an independent regulatory agency, as defined in 44 U.S.C. 3502(5), voluntarily complies with the executive order to adhere to fundamental federalism principles. Because the occupancy and incidental powers regulations apply only to FCUs, the proposed rule would not have a substantial direct effect on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. As such, NCUA has determined that this rule does not constitute a policy that has federalism implications for purposes of the executive order.

D. Assessment of Federal Regulations and Policies on Families

NCUA has determined that this rule will not affect family well-being within the meaning of Section 654 of the Treasury and General Government Appropriations Act of 1999.[35]

List of Subjects

12 CFR Part 701

Credit unions, Reporting and recordkeeping requirements.

12 CFR Part 721

Credit unions, functions, implied powers.

By the National Credit Union Administration Board, on April 21, 2016.

Gerard Poliquin,

Secretary of the Board.

For the reasons stated above, NCUA proposes to amend 12 CFR parts 701 and 721 as follows:

PART 701—ORGANIZATION AND OPERATION OF FEDERAL CREDIT UNIONS

■ 1. The authority for part 701 continues to read as follows:

Authority: 12 U.S.C. 1752(5), 1757, 1765, 1766, 1781, 1782, 1787, 1789; Title V, Pub. L. 109–351, 120 Stat. 1966.

■ 2. Amend the title of § 701.36 and amend §§ 701.36(a) and (b) to read as follows:

§ 701.36 Federal credit union occupancy and disposal of acquired and abandoned premises.

(a) *Scope.* Section 107(4) of the Federal Credit Union Act (12 U.S.C. 1757(4)) authorizes a federal credit union to purchase, hold, and dispose of property necessary or incidental to its operations. This section interprets and implements that provision by establishing occupancy and disposal requirements for acquired and abandoned premises, and by prohibiting certain transactions. This section applies only to federal credit unions.

(b) * * *

Abandoned premises means premises previously used to transact credit union business but no longer used for that purpose. It also means premises originally acquired to transact future credit union business but no longer intended for that purpose.

* * * * *

Partially occupy means occupation and use, on a full-time basis, of at least fifty percent of each of the premises by the federal credit union, or the federal credit union and a credit union service organization in which the federal credit union has a controlling interest in accordance with Generally Accepted Accounting Principles (GAAP).

* * * * *

[35] Public Law 105–277, 112 Stat. 2681 (1998).

■ 3. Remove § 701.36(c)(1); redesignate § 701.36(c)(2) as § 701.36(c)(1) and amend it to read as follows:

(c) *Premises not currently used to transact credit union business.* (1) If a federal credit union acquires premises, including unimproved land or unimproved real property, it must partially occupy each of them within a reasonable period, but no later than six years after the date of acquisition. NCUA may waive the partial occupation requirements. To seek a waiver, a federal credit union must submit a written request to its Regional Office and fully explain why it needs the waiver. The Regional Director will provide the federal credit union a written response, either approving or disapproving the request. The Regional Director's decision will be based on safety and soundness considerations.

■ 4. Redesignate § 701.36(c)(3) as § 701.36(c)(2).

PART 721—INCIDENTAL POWERS

■ 5. The authority for part 721 continues to read as follows:

Authority: 12 U.S.C. 1757(17), 1766 and 1789.

■ 6. Amend § 721.3 to read as follows:

§ 721.3 What categories of activities are preapproved as incidental powers necessary or requisite to carry on a credit union's business?

* * * * *

(a) * * *

(b) * * *

(c) * * *

(d) * * *

(e) *Excess capacity.* Excess capacity is the excess use or capacity remaining in facilities, equipment, or services that you properly invested in or established, in good faith, with the intent of serving your members or supporting your business operations. You may sell or lease the excess capacity in facilities, such as office space and other premises. You may sell or lease the excess capacity in equipment or services, such as employees and data processing, if you reasonably anticipate that the excess capacity will be taken up by the future expansion of services to your members.

* * * * *

BILLING CODE 7535–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–6123; Directorate Identifier 2016–CE–007–AD]

RIN 2120–AA64

Airworthiness Directives; Schempp-Hirth Flugzeugbau GmbH Gliders

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for Schempp-Hirth Flugzeugbau GmbH Models Discus-2a, Discus-2b, Discus-2c, Discus 2cT, Ventus-2a, and Ventus-2b gliders. This proposed AD results from mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as insufficient overlap of the airbrake panels. We are issuing this proposed AD to require actions to address the unsafe condition on these products.

DATES: We must receive comments on this proposed AD by June 13, 2016.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Schempp-Hirth Flugzeugbau GmbH, Krebenstrasse 25, 73230 Kirchheim/Teck, Germany; telephone: +49 7021 7298–0; fax: +49 7021 7298–199; email: *info@schempp-hirth.com*; Internet: *http://www.schempp-hirth.com.* You may review this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–6123; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Jim Rutherford, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4165; fax: (816) 329–4090; email: *jim.rutherford@faa.gov.*

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–6123; Directorate Identifier 2016–CE–007–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to *http://regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued AD No.: 2016–0027, dated February 9, 2016 (referred to after this as ''the MCAI''), to correct an unsafe condition for the specified products. The MCAI states:

> Operational experience shows that, under certain conditions, the overlap between the two airbrake panels can be insufficient and the panels can interlock.
>
> This condition, if not corrected, could lead to blockage of the airbrakes, possibly resulting in reduced control of the (powered) sailplane.
>
> To address this potential unsafe condition, Schempp-Hirth Flugzeugbau GmbH issued TN 349–39, 360–29, 825–55 and 863–22 (single document, hereafter referred to as 'the TN' in this AD), to provide inspection instructions to verify the correct overlap between the two affected airbrake panels.
>
> For the reason described above, this AD requires a one-time inspection of the overlap of the affected airbrake panels and, depending on findings, accomplishment of applicable corrective action(s).

You may examine the MCAI on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–6123.

Related Service Information Under 1 CFR Part 51

Schempp-Hirth Flugzeugbau GmbH has issued Technical Note No. 349–39, 360–29, 825–55, 863–22; dated January 29, 2016 (published as a single document), and Arbeitsanweisung (English translation: Working instructions) for Technische Mitteilung Nr. (English translation: Technical Note No.) 349–39, 360–29, 825–55, 863–22, Ausgabe (English translation: Issue) 1, Datum (English translation: Dated) January 22, 2016. The service information describes procedures for inspection of the overlap of the airbrake panels and, if necessary, replacement of the airbrake panels. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this NPRM.

FAA's Determination and Requirements of the Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with this State of Design Authority, they have notified us of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all information and determined the unsafe condition exists and is likely to exist or develop on other products of the same type design.

Costs of Compliance

We estimate that this proposed AD will affect 86 products of U.S. registry. We also estimate that it would take about 2 work-hours per product to comply with the basic requirements of this proposed AD.

Based on these figures, we estimate the cost of the proposed AD on U.S. operators to be $14,620, or $170 per product.

In addition, we estimate that any necessary follow-on actions would take about 4 work-hours and require parts

costing $100, for a cost of $440 per product. We have no way of determining the number of products that may need these actions.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

Schempp-Hirth Flugzeugbau GmbH: Docket No. FAA–2016–6123; Directorate Identifier 2016–CE–007–AD.

(a) Comments Due Date

We must receive comments by June 13, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to the following Schempp-Hirth Flugzeugbau GmbH model and serial number gliders, certificated in any category:

(1) Model Discus-2a, serial numbers 1 through 253;

(2) Model Discus-2b, serial numbers 1 through 255;

(3) Model Discus-2c, serial numbers 1 through 61;

(4) Model Discus 2cT, serial numbers 1 through 127;

(5) Model Ventus-2a, serial numbers 1 through 178; and

(6) Model Ventus-2b, serial numbers 1 through 175.

(d) Subject

Air Transport Association of America (ATA) Code 27: Flight Controls.

(e) Reason

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as insufficient overlap of the airbrake panels. We are issuing this proposed AD to require actions to address the unsafe condition on these products. We are issuing this AD to prevent interlocking of the airbrake panels, which could lead to blockage of the airbrakes and possible loss of control.

(f) Actions and Compliance

Unless already done, do the following actions in paragraphs (f)(1) and (f)(2) of this AD:

(1) Within the next 40 days after the effective date of this AD, inspect the overlap of the airbrake panels for a minimum overlap of at least 3 millimeters following Action 1 in Schempp-Hirth Flugzeugbau GmbH Technische Mitteilung Nr. (English translation: Technical Note No.) 349–39, 360–29, 825–55, 863–22, dated January 29, 2016 (published as a single document); and Action 1 in the associated Arbeitsanweisung (English translation: Working instructions) for Technische Mitteilung Nr. (English translation: Technical Note No.) 349–39, 360–29, 825–55, 863–22, Ausgabe (English translation: issue) 1, Datum (English translation: dated) January 22, 2016.

Note 1 to paragraph (f)(1) and (f)(2) of this AD: This service information contains German to English translation. The EASA used the English translation in referencing the document. For enforceability purposes, we will refer to the Schempp-Hirth Flugzeugbau GmbH service information as it appears on the document.

(2) If, during the inspection required in paragraph (f)(1) of this AD, the overlap on the airbrake panels is found to be less than 3 millimeters, before further flight, install eccentric bushings and make adjustments following Action 2 in Schempp-Hirth Flugzeugbau GmbH Technische Mitteilung Nr. (English translation: Technical Note No.) 349–39, 360–29, 825–55, 863–22, dated January 29, 2016 (published as a single document); and Action 2 in the associated Arbeitsanweisung (English translation: Working instructions) for Technische Mitteilung Nr. (English translation: Technical Note No.) 349–39, 360–29, 825–55, 863–22, Ausgabe (English translation: issue) 1, Datum (English translation: dated) January 22, 2016.

(g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Jim Rutherford, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4165; fax: (816) 329–4090; email: *jim.rutherford@faa.gov.* Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(h) Related Information

Refer to MCAI European Aviation Safety Agency (EASA) AD No.: 2016–0027, dated February 9, 2016, for related information. You may examine the MCAI on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–6123. For service information related to this AD, contact Schempp-Hirth Flugzeugbau GmbH, Krebenstrasse 25, 73230 Kirchheim/Teck, Germany; telephone: +49 7021 7298–0; fax: +49 7021 7298–199; email: *info@schempp-hirth.com*; Internet: *http://www.schempp-hirth.com.* You may review this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148.

Issued in Kansas City, Missouri, on April 15, 2016.

Melvin Johnson,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 2016–09435 Filed 4–26–16; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2016–5596; Directorate Identifier 2015–NM–121–AD]

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to supersede Airworthiness Directive (AD) 2014–12–06, for certain Airbus Model A300 B4–600, B4–600R, and F4–600R series airplanes, and Model A300 C4–605R Variant F airplanes (collectively called Model A300–600 series airplanes); and Airbus Model A310 series airplanes. AD 2014–12–06 currently requires inspections of the external area of the aft cargo door sill beam for cracking, and repair if necessary. Since we issued AD 2014–12–06, we have determined it is necessary to require that high frequency eddy current (HFEC) inspections be performed repetitively. This proposed AD would mandate the previously optional terminating HFEC inspection, and require that it be done repetitively. We are proposing this AD to detect and correct fatigue cracking of the cargo door sill beam, lock fitting, and torsion box plate. Failure of one or more of these components could result in the loss of the door locking function and, subsequently, complete loss of the cargo door in flight with the risk of rapid decompression.

DATES: We must receive comments on this proposed AD by June 13, 2016.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this NPRM, contact Airbus SAS, Airworthiness Office—EAW, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email *account.airworth-eas@airbus.com;* Internet *http://www.airbus.com.* You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–5596; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Dan Rodina, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–2125; fax 425–227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2016–5596; Directorate Identifier 2015–NM–121–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

On June 4, 2014, we issued AD 2014–12–06, Amendment 39–17867 (79 FR 34403, June 17, 2014) (''AD 2014–12–06''). AD 2014–12–06 requires actions intended to address an unsafe condition on certain Airbus Model A300 B4–600, B4–600R, and F4–600R series airplanes, and Model A300 C4–605R Variant F airplanes (collectively called Model A300–600 series airplanes); and Airbus Model A310 series airplanes.

Since we issued AD 2014–12–06, we have determined it is necessary to require that the HFEC inspections be performed repetitively.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2015–0150, dated July 23, 2015 (referred to after this as the Mandatory Continuing Airworthiness Information, or ''the MCAI''), to correct an unsafe condition for certain Airbus Model A300 B4–600, B4–600R, and F4–600R series airplanes, and Model A300 C4–605R Variant F airplanes (collectively called Model A300–600 series airplanes); and Airbus Model A310 series airplanes. The MCAI states:

> During accomplishment of Maintenance Review Board Report (MRBR) task 531625–01–1 on an A300–600 aeroplane having accumulated more than 25,000 flight cycles (FC) since aeroplane first flight, multiple fatigue cracks were found on the following parts:
>
> —Aft cargo door sill beam Part Number (P/N) A53973085210
>
> —Lock fitting P/N A53978239002
>
> —Torsion box plate P/N A53973318206.
>
> Prompted by these findings, a stress analysis was performed during which it was discovered that there is no dedicated scheduled maintenance task to inspect the affected area for fatigue damage.
>
> This condition, if not detected and corrected, could lead to failure of multiple lock fittings, possibly resulting in loss of the cargo door in flight and consequent explosive decompression of the aeroplane.
>
> To address this unsafe condition, Airbus issued Alert Operators Transmission (AOT) A53W005–14 providing instructions for inspection of the affected area.
>
> Consequently, EASA issued Emergency AD 2014–0097–E [FAA AD 2014–12–06, Amendment 39–17867 (79 FR 34403, June 17, 2014)] to require repetitive ultrasonic (US) inspections or detailed inspections (DET) of the aft cargo door sill beam external area, and/or a one-time High Frequency Eddy Current (HFEC) inspection of the aft cargo door sill beam internal structure and, depending on findings, accomplishment of corrective action(s).
>
> Since that [EASA] AD was issued, the results of further analysis have indicated that repetitive HFEC inspections need to be introduced.

For the reasons described above, this [EASA] AD retains the requirements of EASA AD 2014–0097–E, which is superseded, and requires repetitive HFEC inspections of the concerned areas. The first HFEC inspection terminates the repetitive US/DET inspections.

You may examine the MCAI in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–5596.

Related Service Information Under 1 CFR Part 51

Airbus has issued Service Bulletin A300–53–6179, dated December 12, 2014; and Service Bulletin A310–53–2139, dated December 12, 2014. The service information describes procedures for repetitive HFEC inspections of the cargo door sill beam, lock fitting, and torsion box plate.

Airbus has also issued AOT A53W005–14, Revision 01, dated April 29, 2014. The service information describes procedures for doing an ultrasonic inspection or detailed inspection of the aft cargo door sill beam external area for cracking.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of these same type designs.

Costs of Compliance

We estimate that this proposed AD affects 75 airplanes of U.S. registry.

The actions required by AD 2014–12–06, and retained in this proposed AD, take about 12 work-hours per product, at an average labor rate of $85 per work-hour. Based on these figures, the estimated cost of the actions that are required by AD 2014–12–06 and retained in this AD is $1,020 per product.

We also estimate that it would take about 1 work-hour per product to comply with the reporting requirements of this proposed AD. The average labor rate is $85 per work-hour. Based on these figures, we estimate the cost of this proposed AD on U.S. operators to be $6,374, or $85 per product.

We have received no definitive data that would enable us to provide cost estimates for the on-condition actions specified in this proposed AD.

Paperwork Reduction Act

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB control number. The control number for the collection of information required by this AD is 2120–0056. The paperwork cost associated with this AD has been detailed in the Costs of Compliance section of this document and includes time for reviewing instructions, as well as completing and reviewing the collection of information. Therefore, all reporting associated with this AD is mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at 800 Independence Ave. SW., Washington, DC 20591, ATTN: Information Collection Clearance Officer, AES–200.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, Section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a ''significant regulatory action'' under Executive Order 12866;

2. Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);

3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing AD 2014–12–06, Amendment 39–17867 (79 FR 34403, June 17, 2014), and adding the following new AD:

Airbus: Docket No. FAA–2016–5596; Directorate Identifier 2015–NM–121–AD.

(a) Comments Due Date

We must receive comments by June 13, 2016.

(b) Affected ADs

This AD replaces AD 2014–12–06, Amendment 39–17867 (79 FR 34403, June 17, 2014) (''AD 2014–12–06'').

(c) Applicability

This AD applies to the airplanes identified in paragraphs (c)(1), (c)(2), (c)(3), (c)(4), and (c)(5) of this AD, certificated in any category, all manufacturer serial numbers on which Airbus Modification 05438 has been embodied in production, except those on which Airbus Modification 12046 has been embodied in production.

(1) Airbus Model A300 B4–601, B4–603, B4–620, and B4–622 airplanes.

(2) Airbus Model A300 B4–605R and B4–622R airplanes.

(3) Airbus Model A300 F4–605R and F4–622R airplanes.

(4) Airbus Model A300 C4–605R Variant F airplanes.

(5) Airbus Model A310–203, –204, –221, –222, –304, –322, –324, and –325 airplanes.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Reason

This AD was prompted by reports of fatigue cracks on the cargo door sill beam, lock fitting, and torsion box plate. We are issuing this AD to detect and correct fatigue cracking of the cargo door sill beam, lock fitting, and torsion box plate, which could result in the loss of the door locking function and subsequently, complete loss of the cargo door in flight with the risk of rapid decompression.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Inspection With Revised Service Information

This paragraph restates the requirements of paragraph (g)(1) of AD 2014–12–06 with revised service information: Within the compliance time identified in paragraph (g)(1), (g)(2), or (g)(3) of this AD, as applicable, do an ultrasonic inspection or detailed inspection of the aft cargo door sill beam external area for cracking, in accordance with Airbus Alert Operators Transmission (AOT) A53W005–14, dated April 22, 2014; or Airbus AOT A53W005–14, Revision 01, dated April 29, 2014. Repeat the inspection thereafter at intervals not to exceed 275 flight cycles. As of the effective date of this AD, only Airbus AOT A53W005–14, Revision 01, dated April 29, 2014, may be used to comply with the requirements of this paragraph.

(1) For airplanes that have accumulated 30,000 flight cycles or more since the airplane's first flight as of July 2, 2014 (the effective date of AD 2014–12–06): Within 50 flight cycles after July 2, 2014.

(2) For airplanes that have accumulated 18,000 flight cycles or more, but fewer than 30,000 flight cycles since the airplane's first flight as of July 2, 2014 (the effective date of AD 2014–12–06): Within 275 flight cycles after July 2, 2014.

(3) For airplanes that have accumulated fewer than 18,000 flight cycles since the airplane's first flight as of July 2, 2014 (the effective date of AD 2014–12–06): Before exceeding 18,275 flight cycles since the airplane's first flight.

(h) Retained Optional Terminating Action, With Revised Service Information

This paragraph restates the provisions of paragraph (h) of AD 2014–12–06, with revised service information. Accomplishment of high frequency eddy current (HFEC) inspection for cracking, in accordance with Airbus AOT A53W005–14, dated April 22, 2014; or Airbus AOT A53W005–14, Revision 01, dated April 29, 2014, terminates the repetitive inspections required by paragraph (g) of this AD for that airplane. If any cracking is found during the HFEC inspection, before further flight, repair using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA).

(i) Retained Reporting Requirement, With Revised Service Information

This paragraph restates the provisions of paragraph (i) of AD 2014–12–06, with revised service information. Submit a report of the findings (both positive and negative) of the inspection required by paragraph (g) of this AD to Airbus, as specified in paragraph 7.,''Reporting,'' of Airbus AOT A53W005–14, dated April 22, 2014; or Airbus AOT A53W005–14, Revision 01, dated April 29, 2014, at the applicable time specified in paragraph (i)(1) or (i)(2) of this AD. The report must include inspection results, including no findings.

(1) If the inspection was done on or after the effective date of this AD: Submit the report within 30 days after the inspection.

(2) If the inspection was done before the effective date of this AD: Submit the report within 30 days after the effective date of this AD.

(j) Definition of Airplane Groups

Paragraphs (k)(1), (k)(2), and (k)(3) of this AD refer to airplane groups, as identified in paragraphs (j)(1), (j)(2), and (j)(3) of this AD.

(1) Airplanes on which a HFEC inspection was accomplished as specified in Airbus AOT A53W005–14.

(2) Airplanes on which no HFEC inspection was accomplished as specified in Airbus AOT A53W005–14, and that have accumulated more than 18,000 total flight cycles as of the effective date of this AD.

(3) Airplanes on which no HFEC inspection accomplished as specified in Airbus AOT A53W005–14, that have accumulated 18,000 total flight cycles or fewer as of the effective date of this AD.

(k) New Repetitive HFEC Inspections and Repair

At the applicable time specified in paragraph (k)(1), (k)(2), or (k)(3) of this AD, do an HFEC inspection for fatigue cracking of the cargo door sill beam, lock fitting, and torsion box plate, in accordance with Airbus Service Bulletin A300–53–6179, dated December 12, 2014; or Airbus Service Bulletin A310–53–2139, dated December 12, 2014, as applicable. Repeat the HFEC inspection thereafter at intervals not to exceed 4,600 flight cycles.

(1) For airplanes identified in paragraph (j)(1) of this AD: Inspect within 4,600 flight cycles after the most recent HFEC inspection specified in Airbus AOT A53W005–14.

(2) For airplanes identified in paragraph (j)(2) of this AD: Inspect within 2,000 flight cycles after the effective date of this AD.

(3) For airplanes identified in paragraph (j)(3) of this AD: Inspect before exceeding 13,000 total flight cycles since the airplane's first flight, or within 2,000 flight cycles after the effective date of this AD, whichever occurs later.

(l) Corrective Action

If any crack is found during any inspection required by paragraph (g) or (k) of this AD: Before further flight, repair using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the EASA; or Airbus's EASA DOA.

(m) Terminating Action for HFEC Inspections

For any airplane identified in paragraphs (j)(2) and (j)(3) of this AD, accomplishment of the initial inspection required by paragraph (k) of this AD terminates the repetitive inspections required by paragraph (g) of this AD.

(n) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Dan Rodina, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–2125; fax 425–227–1149. Information may be emailed to: *9-ANM-116-AMOC-REQUESTS@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer:* As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the EASA; or Airbus's EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Reporting Requirements:* A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120–0056. Public reporting for this collection of information is estimated to be approximately 5 minutes per response, including the time for reviewing instructions, completing and reviewing the collection of information. All responses to this collection of information are mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at: 800 Independence Ave. SW., Washington, DC 20591, Attn: Information Collection Clearance Officer, AES–200.

(4) *Required for Compliance (RC):* Except as required by paragraph (l) of this AD: If any service information contains procedures or tests that are identified as RC, those

procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(o) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) European Aviation Safety Agency (EASA) Airworthiness Directive 2015–0150, dated July 23, 2015, for related information. This MCAI may be found in the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2016–5596.

(2) For service information identified in this AD, contact Airbus SAS, Airworthiness Office—EAW, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email *account.airworth-eas@airbus.com;* Internet *http://www.airbus.com.* You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on April 15, 2016.

Victor Wicklund,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) proposes to designate one dredged material disposal site, the Eastern Long Island Sound Disposal Site (ELDS) located offshore from New London, Connecticut, for the disposal of dredged material from harbors and navigation channels in eastern Long Island Sound in the states of Connecticut and New York. This action is necessary to provide a long-term, open-water dredged material disposal site as an alternative for the possible future disposal of such material. This disposal site designation is subject to various restrictions designed to support the goal of reducing or eliminating the disposal of dredged material in Long Island Sound.

While EPA is currently proposing to designate the ELDS as its preferred alternative, EPA also has concluded, based on the analysis in the Draft Supplemental Environmental Impact Statement for the Designation of Dredged Material Disposal Site(s) in Eastern Long Island Sound, Connecticut and New York (DSEIS), that two other alternatives, the Niantic Bay and Cornfield Shoals disposal sites (NBDS and CSDS), or portions thereof, could potentially be designated in addition to, or instead of, the ELDS. EPA is not currently recommending the NBDS and CSDS as preferred alternatives, but is inviting public comments on the option of designating one or both of these sites instead of, or as a complement to, the ELDS.

DATES: Comments must be received on or before June 27, 2016. EPA will hold four public hearings to receive comments on the proposed rule. The first two will be held on May 25, 2016, from 1–3 p.m. at the Suffolk County Community College Culinary Arts Center, 20 East Main St., Riverhead, NY 11901, and from 5:30–7:30 p.m. at the Mattituck-Laurel Library, 13900 Main Rd., Mattituck, NY 11952. The second two will be held on May 26, 2016, from 1–3 p.m. and from 5–7 p.m. at the University of Connecticut—Avery Point, Academic Building, Room 308, 1084 Shennecossett Rd., Groton, CT 06340. Registration will begin 30 minutes before each of the four hearings.

ADDRESSES: Written comments should be sent to *ELIS@epa.gov.*

FOR FURTHER INFORMATION CONTACT: Ms. Jean Brochi, U.S. Environmental Protection Agency, New England Regional Office, 5 Post Office Square, Suite 100, Mail Code: OEP06–1, Boston, MA 02109–3912, telephone: (617) 918–1536, fax number: (617) 918–0536; email address: *Brochi.Jean@epa.gov* or *ELIS@epa.gov.*

SUPPLEMENTARY INFORMATION: The supporting document for this site designation is the DSEIS. The DSEIS is considered supplemental because it updates and builds on analyses that were conducted for the 2005 Long Island Sound Environmental Impact Statement that supported the designation of the Central and Western Long Island Sound dredged material disposal sites. This document is available for public inspection at the following locations:

1. EPA Web site: *https://www.epa.gov/ocean-dumping/dredged-material-management-long-island-sound.*

2. Regulations.gov: Docket No. EPA–R01–OW–2016–0239.

3. In person: EPA Region 1 Library, 5 Post Office Square, Boston, MA 02109.

Organization of this document. The following outline is provided to aid in locating information in this preamble.

I. Background

Section 102(c) of the Marine Protection, Research, and Sanctuaries Act of 1972 (MPRSA), as amended, 33 U.S.C. 1412, gives the Administrator of EPA the authority to designate sites where ocean disposal may be permitted. On October 1, 1986, the Administrator delegated the authority to designate ocean dredged material disposal sites to the Regional Administrator of the Region in which the sites are located. The preferred alternative site, ELDS, and the other two alternatives, NBDS and CSDS, are all located within Connecticut state waters, which is within the area assigned to EPA Region 1, *see* 40 CFR 1.7(b)(1); therefore the designation of one or more of these sites is being proposed pursuant to the EPA Region 1 Administrator's delegated authority.

EPA regulations (40 CFR 228.4(e)(1)) promulgated under the MPRSA require, among other things, that EPA designate ocean disposal sites by promulgation in 40 CFR 228. Designated ocean disposal sites are codified at 40 CFR 228.15.

The primary authorities that govern the aquatic disposal of dredged material in the United States are the MPRSA, 33 U.S.C. 1401 *et seq.,* and the Clean Water Act of 1972, 33 U.S.C. 1251 *et seq.* (CWA). While the CWA does not apply specifically to an EPA designation of a long-term dredged material disposal site

under the MPRSA, future federal and non-federal projects involving dredged material disposal in Long Island Sound will require both a section 404 permit as well as a State Water Quality Certification pursuant to section 401 of the CWA. In 1980, the MPRSA was amended to add Section 106(f) to the statute. 33 U.S.C. 1416(f). This provision is commonly referred to as the ''Ambro Amendment,'' named after its author, Congressman Jerome Ambro. MPRSA section 106(f), 33 U.S.C. 1416(f), was itself amended in 1990. Under this provision, the disposal of dredged material in Long Island Sound from both federal projects (*i.e.,* projects carried out by the USACE Civil Works Program or the actions of other federal agencies) and from non-federal projects generating more than 25,000 cubic yards of material must satisfy the requirements of both CWA section 404 and the MPRSA. Disposal from non-federal projects generating less than 25,000 cubic yards of material, however, are subject only to CWA section 404.

This rule proposes to designate the ELDS for open-water disposal of dredged material. While EPA is currently proposing the designation of the ELDS as its preferred alternative, EPA also has concluded, based on the analysis in the DSEIS, that two other alternatives, the Niantic Bay and Cornfield Shoals disposal sites (NBDS and CSDS), or portions thereof, could potentially be designated in addition to, or instead of, the ELDS. All three sites are described in detail in section IV, Disposal Site Descriptions.

EPA has conducted the disposal site designation process consistent with the requirements of the MPRSA, the National Environmental Policy Act (NEPA), the Coastal Zone Management Act (CZMA), and other relevant statutes and regulations. The site designations are intended to be effective for an indefinite period of time.

It is important to understand that the designation of a dredged material disposal site by EPA does not by itself authorize the disposal at that site of dredged material from any particular dredging project. For example, designation of the ELDS would only make that site available to receive dredged material from a specific project if no environmentally preferable, practicable alternative for managing that dredged material exists, and if analysis of the dredged material indicates that it is suitable for open-water disposal. *See* 40 CFR 227.1(b), 227.2 and 227.3; 40 CFR part 227, subparts B and C.

Thus, each proposed dredging project will be evaluated on a case-by-case basis to determine whether there are practicable, environmentally preferable alternatives to open-water disposal (*i.e.,* whether there is a need for open-water disposal). In addition, the dredged material from each proposed disposal project will be subjected to MPRSA and/or CWA sediment testing requirements to determine its suitability for possible open-water disposal at an approved site. Alternatives to open-water disposal that will be considered include upland disposal and beneficial uses such as beach nourishment. If environmentally preferable, practicable disposal alternatives exist, open-water disposal will not be allowed. EPA also will not approve dredged material for open-water disposal if it determines that the material has the potential to cause unacceptable adverse effects to the marine environment or human health. The review process for proposed disposal projects is discussed in more detail below and in the DSEIS.

Dredged material disposal sites designated by EPA under the MPRSA are subject to detailed management and monitoring protocols to track site conditions and prevent the occurrence of unacceptable adverse effects. EPA and the USACE typically share responsibility for the management and monitoring of these disposal sites. The management and monitoring protocols for the ELDS are described in the Site Management and Monitoring Plan (SMMP) that is incorporated in the DSEIS as Appendix I. *See* 33 U.S.C. 1412(c)(3). EPA is authorized to close or limit the use of these sites to further disposal activity if their use causes unacceptable adverse impacts to the marine environment or human health.

II. Purpose and Need

As described in the DSEIS, the purpose of EPA's proposed action is to determine whether one or more environmentally sound open-water dredged material disposal sites should be authorized for future long-term use in the eastern Long Island Sound region and, if so, to designate the site or sites accordingly and consistent with applicable law. The need for this effort derives from the following facts: (1) There are currently no disposal sites designated for long-term use in the eastern Long Island Sound region; (2) the two currently used sites in this region are only authorized for use until December 23, 2016; (3) periodic dredging is necessary to maintain safe navigation and marine commerce, and dredged material disposal is necessary when practicable alternative means of managing the material are not available; (4) EPA determined, based on the evaluation of projected dredging needs over a 30-year planning horizon and alternatives to open-water disposal conducted for the USACE's DMMP, that there are dredging and dredged material disposal/handling needs that exceed the available disposal/handling capacity in the eastern region of Long Island Sound; and (5) the MPRSA requires an EPA designation for any long-term dredged material disposal site.

In addition, the closest designated sites outside the eastern Long Island Sound region (and outside the ''Zone of Siting Feasibility,'' or ZSF, which is discussed in Section 1.3 of the DSEIS), are the Central Long Island Sound Disposal Site (CLDS) and the Rhode Island Sound Disposal Site (RISDS), which are 29.9 nautical miles (nmi) and 51.4 nmi, respectively, from the Saybrook Outer Bars at the mouth of the Connecticut River. The Saybrook Outer Bars is the southernmost project in the Connecticut River dredging center, which is the largest dredging center in the eastern Long Island Sound region. The Western Long Island Sound Disposal Site (WLDS) is even farther to the west than the CLDS, lying 58.4 nmi from the Connecticut River dredging center (DMMP, Section 5.3).

While the CLDS, WLDS, and RISDS have all been determined to be environmentally sound sites for receiving suitable dredged material, proposing to use any of them for suitable dredged material from the eastern region of Long Island Sound would be problematic and EPA would consider them to be options of last resort. Indeed, EPA does not consider the WLDS to be a truly viable option for eastern Long Island Sound material given how distant it is and given the fact that if material was being hauled long distance to the west from the eastern region of the Sound, the material would be taken to the CLDS and not hauled even farther to the WLDS. At the same time, using the CLDS or RISDS (not to mention the WLDS) would greatly increase the transport distance for, and duration of, open-water disposal for dredging projects from the eastern Long Island Sound region. This, in turn, would greatly increase the cost of such projects and would likely render many dredging projects too expensive to conduct, thus threatening safe navigation and interfering with marine recreation and commerce. Furthermore, the greater transport distance would also be environmentally detrimental in that it would entail greater energy use, increased air emissions, and increased risk of spills and short dumps (DSEIS, Section 2.1). Regarding air emissions, increased hauling distances may require using larger scows with more powerful

tug boats, which would use more fuel and cause more emission of air pollutants.

As determined by the USACE through the development of its recently completed Long Island Sound Dredged Material Management Plan (DMMP), and described in the DSEIS (Section 2.3 and Tables 2–2 and 2–3), dredging in eastern Long Island Sound is projected to generate approximately 22.6 million cubic yards (mcy) of dredged material over the next 30 years, including 17.9 mcy from Connecticut ports and harbors and 4.7 mcy from ports and harbors in New York. Of the total amount of 22.6 mcy, approximately 13.5 mcy are projected to be fine-grained sediment that meets MPRSA and CWA standards for aquatic disposal (*i.e.,* ''suitable'' material), and 9.1 mcy are projected to be coarse-grained sand that also meets MPRSA and CWA standards for aquatic disposal (*i.e.,* also ''suitable'' material). In addition, the DMMP estimates that approximately 80,900 cy of material from eastern Long Island Sound will be fine-grained sediment that does not meet MPRSA and CWA standards for aquatic disposal (*i.e.,* ''unsuitable'' material).

Although Rhode Island is included in the ZSF for an eastern Long Island Sound dredged material disposal site—the ZSF is described later in section V, Compliance with Statutory and Regulatory Authorities—the volume of material estimated to come from two Rhode Island dredging centers (Block Island and South-Central/Southeast Washington County) located within the ZSF in Rhode Island is not included in the total amount of material estimated to come from the eastern portion of the Sound. This is because these dredging centers are closer to the RISDS. In addition, much of the dredged material from these two dredging centers is sand and will end up being used beneficially to nourish beaches.

The DMMP also estimates the total dredging needs for the entire Long Island Sound region at 52.9 mcy, meaning the central and western regions are projected to generate approximately 30.3 mcy of dredged material over the 30-year planning horizon (DMMP, Section 4.7 and Table 4.1). Of the total of 30.3 mcy, 20.9 mcy are projected to be fine-grained sediment that meets MPRSA and CWA standards for aquatic disposal (*i.e.,* ''suitable'' material), 6.1 mcy are projected to be course-grained sand that also would be suitable for open-water disposal, and 3.3 mcy is projected to be fine-grained sediment unsuitable for open-water disposal. This leaves a total of 27 mcy of dredged material that could be suitable for open-water disposal, although EPA expects most, if not all, of the 6.1 mcy of sand would be used beneficially. The combined capacity of the CLDS and WLDS is approximately 40 mcy, which is enough to handle the 27 mcy from those regions. Those sites, however, neither have the capacity nor were intended also to meet the dredging needs of the eastern Long Island Sound region, which, as stated above, has been estimated to be approximately 22.6 mcy of suitable material (which, when added to the 27 mcy of suitable material from the central and western regions, amounts to a total of 49.6 mcy of suitable material from all of Long Island Sound). Furthermore, the distances from mouth of the Connecticut River to the CLDS and WLDS are 29.9 nmi and 58.4 nmi, respectively. Thus, both sites are outside the ZSF for the eastern Long Island Sound Region and for the reasons discussed above, neither would be a viable as a long-term solution for dredged material from the eastern Long Island Sound region, even if the CLDS could conceivably be used for material from the eastern Sound in an emergency situation.

The DMMP also included a detailed assessment of alternatives to open-water disposal and determined that, while all the sand generated in this region should be able to be used beneficially to nourish beaches, there are not practicable alternatives to open-water disposal with sufficient capacity to handle the projected volume of fine-grained sediment. As described in section VI, Restrictions, and in the proposed rule itself, there will be restrictions on the use of all Long Island Sound dredged material disposal sites that are designed to facilitate and promote the use of practicable alternatives to open-water disposal whenever available, but one or more designated open-water disposal sites are needed in eastern Long Island Sound.

EPA designation of a long-term dredged material disposal site(s) provides environmental benefits. First, when use of a site under the USACE short-term site selection authority is due to expire, designation by EPA is the only way to authorize continued use of that site, even if the site is environmentally suitable or even environmentally preferable to all other sites. With the NLDS and CSDS closing in December 2016, EPA's site designation studies were designed to determine whether or not these or any other sites should be designated for continued long-term use. Congress has directed that the disposal of dredged material should take place at EPA-designated sites, rather than USACE-selected sites, when EPA-designated sites are available (*see* MPRSA 103(b)). Thus, Congress has identified a preference for use of EPA-designated sites.

Second, MPRSA criteria for selecting and designating sites require EPA to consider previously used disposal sites or areas, with active or historically used sites given preference in the evaluation (40 CFR 228.5(e)). This preference is intended to concentrate the effects, if any, of disposal practices to small, discrete areas that have already received dredged material, and avoid distributing any effects over a larger geographic area. Finally, EPA designated sites require a SMMP that will help ensure environmentally sound monitoring and management of the sites.

Periodic dredging of harbors and channels and, therefore, dredged material management, are essential for ensuring safe navigation and facilitating marine commerce. This is because the natural processes of erosion and siltation result in sediment accumulation in federal navigation channels, harbors, port facilities, marinas, and other important areas of our water bodies. Unsafe navigational conditions not only threaten public health and safety, but also pose an environmental threat from an increased risk of spills from vessels involved in accidents. Navigation safety is a regulatory requirement for such agencies as the USACE and U.S. Coast Guard.

Economic considerations also contribute to the need for dredging (and the environmentally sound management of dredged material). There are a large number of important navigation-dependent businesses and industries in the eastern Long Island Sound region and Block Island Sound, ranging from shipping (especially the movement of petroleum fuels and the shipping of bulk materials), to recreational boating-related businesses, marine transportation, commercial and recreational fishing, interstate ferry operations, and military navigation, such as that associated with the U.S. Naval Submarine Base in New London. These businesses and industries contribute substantially to the region's economic output, the gross state product (GSP) of the bordering states and tax revenue. Continued access to harbors, berths, and mooring areas is vital to ensuring the continued economic health of these industries, and to preserving the ability of the region to import fuels, bulk supplies, and other commodities at competitive prices. In addition, preserving navigation channels, marinas, harbors, berthing areas, and

other marine resources, improves the quality of life for residents and visitors to the eastern Long Island Sound region by facilitating recreational boating and associated activities, such as fishing and sightseeing.

Finally, maintaining these marine areas (*i.e.,* navigation channels, harbors, berthing areas) also is important for homeland security and public safety, as they support the operation of the U.S. Naval Submarine Base and USCG facilities in the region, as well as other governmental entities that operate on the waters of Long Island Sound.

III. Potentially Affected Entities

Entities potentially affected by this proposed action are persons, organizations, or government bodies seeking to dispose of dredged material in waters of eastern Long Island Sound, subject to the requirements of the MPRSA and/or the CWA and their implementing regulations. This proposed rule is expected to be primarily of relevance to: (a) Private parties seeking permits from the USACE to transport more than 25,000 cubic yards of dredged material for the purpose of disposal into the waters of eastern Long Island Sound; (b) the USACE for its own dredged material disposal projects; and (c) other federal agencies seeking to dispose of dredged material in eastern Long Island Sound. Potentially affected entities and categories of entities that may seek to use the proposed dredged material disposal site and would be subject to the proposed rule include:

Category	Examples of potentially affected entities
Federal government	USACE (Civil Works Projects), and other federal agencies.
State, local, and tribal governments	Governments owning and/or responsible for ports, harbors, and/or berths, government agencies requiring disposal of dredged material associated with public works projects.
Industry and general public	Port authorities, shipyards and marine repair facilities, marinas and boatyards, and berth owners.

This table is not intended to be comprehensive, but rather provides a guide for readers regarding the types of entities that could potentially be affected should the proposed rule become a final rule. EPA notes that nothing in this proposed rule alters the jurisdiction or authority of EPA, the USACE, or the types of entities regulated under the MPRSA and/or CWA. Questions regarding the applicability of this proposed rule to a particular entity should be directed to the contact person listed in the preceding **FOR FURTHER INFORMATION CONTACT** section.

IV. Disposal Site Descriptions

This rule proposes to designate the ELDS for open-water disposal of dredged material for several reasons. First, unlike the other two alternatives (*i.e.,* Cornfield Shoals and portions of the Niantic Bay site), the entire ELDS is a containment site, which would support effective management and monitoring. Second, the NLDS, a part of which makes up part of the ELDS, has been used for dredged material disposal for over 35 years, and monitoring of the site has determined that past and present management practices have been successful in minimizing short-term, long-term, and cumulative impacts to water quality and benthic habitat. Third, designating the ELDS, which includes a portion of the NLDS, would be consistent with USEPA's ocean disposal regulations, which indicate a preference for designating disposal sites in areas that have been used in the past, rather than new, relatively undisturbed areas (40 CFR 228.5(e)). Finally, the capacity of the ELDS is approximately 27 million cy (based on water volume below 59 feet [18 m]), which would be sufficient to meet the dredging needs of the eastern Long Island Sound region for the next 30 years and beyond.

While EPA is currently proposing the designation of the ELDS as its preferred alternative, EPA also has concluded, based on the analysis in the DSEIS, that two other alternatives, the Niantic Bay and Cornfield Shoals disposal sites (NBDS and CSDS), or portions thereof, could potentially be designated in addition to, or instead of, the ELDS. The Niantic Bay alternative, located just to the west of the existing NLDS, contains an area that was historically used (*i.e.,* the NBDS), which is a criterion in the regulations. It also has a capacity of up to 27 million cy (based on water volume below 59 feet [18 m]), which is sufficient to meet the dredging needs of the eastern Long Island Sound region. However, the Niantic Bay site is predominately a transitional area, with a containment area in the northeastern corner, and the remainder of the site being dispersive. EPA is not recommending this site as a preferred alternative at this time primarily because it is not fully a containment site, as is the ELDS site.

The CSDS, located in the western part of eastern Long Island Sound, has been used for dredged material disposal for over 30 years. Because the site is located in a highly dispersive environment, disposal there has been limited to certain types of sediment (*e.g.,* sandy material). Monitoring of the site has determined that past and present management practices have been successful in minimizing short-term, long-term, and cumulative impacts to water quality and benthic habitat from dredged material disposal. Designation of this site in addition to one of the other alternatives would provide a disposal site on both ends of eastern Long Island Sound, which could reduce travel time for tugs/scows transporting dredged material for disposal at the CSDS. This, in turn, could reduce costs and further minimize any risks of spills or short dumps. Due to the high energy and dispersive nature of the area, the site has unlimited capacity, but disposal at the site would be restricted to only certain types of sediments, such as sand, consistent with past practice.

Despite these considerations, EPA does not currently recommend designating the CSDS. Given the site's dispersive characteristics, EPA concludes that the CSDS would not be appropriate to designate as the sole disposal site in eastern Long Island Sound. *See* 40 CFR 228.6(a)(5) and (6). Furthermore, EPA is not proposing to designate the Cornfield Shoals site even as a limited complement to one or more other sites because of the growing opportunities for sand and other dredged sediments to be beneficially used, such as for beach nourishment.

The following site descriptions are based on information in section 3.4.3 of the DSEIS and other support documents. Specifically, Figures 3–9 and 3–10 in the DSEIS show the locations of the sites, and Table 3–8 provides corner coordinates.

A. Eastern Long Island Sound Disposal Site

The ELDS alternative is located to the south of the mouth of Thames River

estuary, approximately halfway between Connecticut and New York. The ELDS encompasses approximately the western half of the existing New London Disposal Site (NLDS), along with Sites NL-Wa and NL-Wb, which are adjacent areas immediately to the west of the NLDS (*see* DSEIS, Figure 3–9). The dimensions of the ELDS, which combines these three areas, are 1×2 nautical miles (nmi), for a total size of 2 square nautical miles (nmi^2). The closest upland points to the ELDS are Goshen Point, Connecticut, approximately 1.2 nmi (2.2 km) to the north, and Fishers Island, New York, approximately 1.4 nmi (2.6 km) to the southeast. The following are descriptions of the three areas that together would comprise the ELDS.

1. New London Disposal Site

The NLDS is located in the eastern part of the eastern Long Island Sound region and has been used for dredged material disposal since 1955 (SAIC, 2001b). This active open-water dredged material disposal site was previously selected by the USACE using their site selection authority under MPRSA 103(b), 33 U.S.C. 1413(b). The statute limits the use of USACE-selected sites to two five-year periods, 33 U.S.C. 1413(b), but Congress extended the period of use of the NLDS by five additional years by Public Law on December 23, 2011 (Pub. L. 112–74, Title I, Sec 116).

The center of the NLDS is located 3.1 nmi (5.4 km) south of Eastern Point in Groton, Connecticut. The site has an area of 1 nmi^2 (3.4 km^2) centered at 41°16.306′ N., 72°04.571′ W. (NAD83); corner coordinates are presented in Table 3–8. Water depths in the site range from approximately 46 to 79 feet (14 to 24 m). Most of the site is located within Connecticut waters, while a small portion in the southeastern corner of the site is located in New York state waters. However, this rule proposes to include only the western half of the NLDS, which would exclude the portion of the site that is in New York waters.

Approximately 5.4 mcy (4.1 million m^3) were disposed at the NLDS between 1955 and 1976. A total of approximately 3.5 mcy (2.6 million m^3) of dredged material have been placed at this location since it was formally selected in 1982. The dredged materials mounds on the seafloor result in an uneven seafloor within the site; the dredged material deposits can rise as much as 16 to 20 feet (5 to 6 m) above the surrounding seafloor.

The USGS mapped the sediment at the NLDS as predominantly sand, while sediments in the northernmost part of the site were mapped as gravelly. NUSC (1979) described the sediment at the site as generally fine sand. Much of the surface sediment at the site consists of placed dredged material. Sediment sampled by the DAMOS program at locations approximately 0.5 nmi (1 km) to the east and west of the NLDS consisted of silt/clay and very fine silty sand, which may reflect pre-disposal sediment textures at the NLDS.

2. Site NL-Wa

Site NL-Wa is immediately to the west of the NLDS and also has an area of 1 nmi^2 (3.4 km^2). Water depths range from approximately 45 feet (14 m) in the north, to 100 feet (30 m) in the south. The site consists of mostly sandy areas, but also an area of boulders and rocks in the northern part of the site (WHG, 2014). This boulder area may be a lag deposit of a glacial moraine. The water depth in parts of the boulder area is shallower than 59 feet (18 m).

3. Site NL-Wb

Site NL-Wb is immediately to the west of Site NL-Wa and has an area of 0.5 nmi^2 (1.7 km^2). Water depths across the site range from approximately 59 feet (18 m) in the north, to 95 feet (28 m) in the south. The site consists of an extension of the sandy areas of Site NL-Wa. The southwestern corner of Site NL-Wb contains an area of bedrock and boulders; this area is an extension of a larger area with a similar substrate further to the south. The bedrock appears as parallel ridges of dipping, layered rock that can be correlated to bedrock on shore. The bedrock area within Site NL-Wb also contains some sand waves. Bartlett Reef is located approximately 0.5 nmi (0.9 km) to the west of the western boundary of the site.

B. Niantic Bay Disposal Site

The NBDS alternative is located to the south of Niantic Bay, between the Connecticut and Thames Rivers (DSEIS, Figure 3–9). It consists of the historic NBDS and Site NB–E immediately to the east. The NBDS alternative includes areas that were used historically for dredged material disposal, but it has not been used since at least 1972.

The northern edge of the alternative site is located approximately 0.6 nmi (1.1 km) from Black Point (southwestern corner of Niantic Bay) and 1.6 nmi (3.0 km) from the Millstone Nuclear Power Station (southeastern corner of Niantic Bay). The Niantic Bay alternative has an area of 2.8 nmi^2, with a length of 2.08 nmi and a width of 1.33 nmi. Water depths at the site range from approximately 60 to 130 feet (18 to 40 m). The site is located entirely within Connecticut waters.

1. Niantic Bay Disposal Site (Historic)

The NBDS was used historically for the disposal of dredged materials between 1969 and 1972, when a total of 176,000 cy (135,000 m^3) of dredged material was disposed at this location. The site, however, has not been used for many years and it is not currently an active disposal site. Sediments at the site mostly consist of sand to the north and northwest and gravelly sediment with patches of gravel in the remainder of the area. There is a boulder area in the north-central part of the site and scour depressions in the south. The southeastern corner of the site abuts a bedrock area. The historic NBDS has an area of approximately 1.8 nmi^2 (6.2 km^2).

2. Site NB–E

Water depths at Site NB–E range from 43 feet (13 m) in the north to 230 feet (70 m) in the southeast. Surface sediments at the site are generally similar to sediments at the NBDS. The southwestern corner of Site NB–E contains a bedrock area, which is an extension of an exposed area of dipping bedrock layers to the south of the site. Site NB–E has an area of 1.0 nmi^2 (3.4 km^2). Bartlett Reef, a bedrock shoal, is located approximately 0.5 nmi (1 km) to the east of the site.

C. Cornfield Shoals Disposal Site

The CSDS alternative consists entirely of the active CSDS, which is located in the westernmost part of eastern Long Island Sound, approximately halfway between the states of Connecticut and New York (Figure 3–10). Like the NLDS, the CSDS was selected by the USACE using its site selection authority, and use of the site was then further extended by Congress on December 23, 2011 (Pub. L.–112–74, Title I, Sec 116). An estimated 1.2 mcy (0.95 million m^3) were disposed at the site between 1960 and 1976, and an additional 1.7 mcy (1.3 million m^3) between 1982 and 2013.

The center of the site is located 3.3 nmi (6.1 km) south of Cornfield Point in Old Saybrook, Connecticut. The site has an area of 1 nmi^2 (3.4 km^2) centered at 41°12.6858′ N., 72°21.4914′ W., (NAD83). The water depth is around 150 feet (50 m). The site is located mostly within Connecticut waters, with only approximately 17 percent in New York state waters.

Bottom currents generally move in an ENE–WSW direction. The seafloor around the CSDS is relatively flat, with longitudinal ripples and other bedforms that suggests that this area is sediment-starved. The site is classified as

erosional/non-depositional in the DSEIS. The surface of the seafloor at the CSDS consists predominantly of gravel and gravelly sediment. Gravelly sediment consists of a mixture of 50 to 90% sand, silt and clay, with the remaining fraction consisting of gravel.

V. Compliance With Statutory and Regulatory Authorities

In proposing to designate a dredged material disposal site for the eastern portion of Long Island Sound, EPA has conducted the dredged material disposal site designation process consistent with the requirements of the MPRSA, NEPA, CZMA, the Endangered Species Act (ESA), the Magnuson-Stevens Fishery Conservation and Management Act (MSFCMA), and any other applicable legal requirements.

A. Marine Protection, Research, and Sanctuaries Act

Section 102(c) of the MPRSA, as amended, 33 U.S.C. 1412(c) *et seq.,* gives the Administrator of EPA authority to designate sites where ocean disposal of dredged material may be permitted. *See* also 33 U.S.C. 1413(b) and 40 CFR 228.4(e). The statute places no specific time limit on the term for use of an EPA-designated disposal site. Thus, EPA site designations can be for an indefinite term and are generally thought of as long-term designations. EPA may, however, place various restrictions or limits on the use of a site based on the site's capacity to accommodate dredged material or other environmental concerns. *See* 33 U.S.C. 1412(c).

Section 103(b) of the MPRSA, 33 U.S.C. 1413(b), provides that any ocean disposal of dredged material should occur at EPA-designated sites to the maximum extent feasible. In the absence of an available EPA-designated site, however, the USACE is authorized to ''select'' appropriate disposal sites. In 1992, Congress amended MPRSA section 103(b) to place maximum time limits on the use of USACE-selected disposal sites. Specifically, the statute restricted the use of such sites to two separate five-year terms. There are no EPA-designated dredged material disposal sites in the eastern portion of Long Island Sound and past open-water disposal of dredged material from projects subject to MPRSA requirements under section 106(f) has been conducted in this area of Long Island Sound at sites used pursuant to the USACE site selection authority. The two active USACE-selected sites, the NLDS and CSDS, will no longer be available after December 23, 2016, however, when their Congressionally-authorized term of use expires.

The Ocean Dumping Regulations, *see generally* 40 CFR Subchapter H, prescribe general and specific criteria at 40 CFR 228.5 and 228.6, respectively, to guide EPA's choice of disposal sites for final designation. EPA regulations at 40 CFR 228.4(e)(1) provide, among other things, that EPA will designate any disposal sites by promulgation in 40 CFR part 228. Ocean dumping sites designated on a final basis are promulgated at 40 CFR 228.15. Section 102(c) of the MPRSA, 33 U.S.C. 1412(c), and 40 CFR 228.3 also establish requirements for EPA's ongoing management and monitoring, in conjunction with the USACE, of disposal sites designated by EPA to ensure that unacceptable, adverse environmental impacts do not occur. Examples of such management and monitoring include the following: Regulating the times, rates, and methods of disposal, as well as the quantities and types of material that may be disposed; conducting pre- and post-disposal monitoring of sites; conducting disposal site evaluation and designation studies; and, if warranted, recommending modification of site use and/or designation conditions and restrictions. *See* also 40 CFR 228.7, 228.8, 228.9.

Finally, a disposal site designation by EPA does not actually authorize any dredged material to be disposed of at that site. It only makes that site available as a possible management option if various other conditions are met first. Use of the site for dredged material disposal must be authorized by the Corps under MPRSA section 103(b), subject to EPA review, and such disposal at the site can only be authorized if: (1) It is determined that there is a need for open-water disposal for that project (*i.e.,* that there are no practicable alternatives to such disposal that would cause less harm to the environment); and (2) the dredged material satisfies the applicable environmental impact criteria specified in EPA's regulations at 40 CFR part 227. *See* 40 CFR 227.1(b), 227.2 and 227.16. Furthermore, the authorization for disposal is also subject to review for compliance with other applicable legal requirements, which may include the ESA, the MSFCMA, the CWA (including any applicable state water quality standards), NEPA, and the CZMA. The following describes EPA's evaluation of the ELDS, NBDS, and CSDS alternatives pursuant to the applicable site evaluation criteria, and its compliance with site management and monitoring requirements.

EPA undertook its evaluation of whether to designate any dredged material disposal sites in the eastern Long Island Sound region pursuant to its authority under MPRSA section 102(c) in response to several factors. These factors include the following:

- The determination by EPA, based on the evaluation of projected dredging needs over the 30-year planning horizon and alternatives to open-water disposal conducted for the USACE's DMMP, that the potential alternatives to open-water disposal do not provide sufficient capacity to accept the quantity of dredged material expected to be generated over the next 30 years in the region;
- The prohibition on use of the NLDS and CSDS disposal sites after December 23, 2016, pursuant to the USACE site selection authority under MPRSA section 103(b) and the five-year extension provided by Congress under Public Law 112–74, Title I, Sec 116.
- The understanding that in the absence of an EPA-designated disposal site or sites, any necessary open-water disposal would either be stymied, despite the importance of dredging for ensuring navigational safety and facilitating marine commercial and recreational activities, or the USACE would have to undertake additional short-term site selections, perhaps many of them, in the future;
- The clear Congressional preference expressed in MPRSA section 103(b) that any open-water disposal of dredged material take place at EPA-designated sites, if feasible;
- The fact that the two closest EPA-designated sites outside the eastern Long Island Sound region, the CLDS and RISDS, do not have the capacity to accept the quantity of suitable dredged material estimated to be generated from the eastern region of Long Island Sound, which was not anticipated when these sites were designated in 2005, and the additional fact that the two sites are 29.9 nmi and 51.4 nmi respectively from the Connecticut River dredging center, which would significantly increase transportation costs and project durations, while also increasing energy use, air emissions, and the risk of spills or short-dumps; and
- EPA's policy view that it is generally environmentally preferable to concentrate any open-water disposal at sites that have been used historically and at fewer sites, rather than relying on the selection of multiple sites to be used for a limited time, *see* 40 CFR 228.5(e).

EPA's evaluation considered whether there was a need to designate one or more disposal sites for long-term dredged material disposal, including an

assessment of whether other dredged material management methods could reasonably be judged to obviate the need for such designations. Having concluded that there was a need for open-water disposal sites, EPA then assessed whether there were sites that would satisfy the applicable environmental criteria to support a site designation under MPRSA section 102(c). The MPRSA and EPA regulations promulgated thereunder impose a number of requirements related to the designation of dredged material disposal sites. These include procedural requirements, specification of criteria for use in site evaluations, and the requirement that a SMMP must be developed for all designated sites. As discussed below, EPA complied with each of these requirements in proposing to designate the ELDS.

1. Procedural Requirements

MPRSA sections 102(c) and 103(b) indicate that EPA may designate ocean disposal sites for dredged material. EPA regulations at 40 CFR 228.4(e) specify that dredged material disposal sites will be ''designated by EPA promulgation in this [40 CFR] part 228 . . . .'' EPA regulations at 40 CFR 228.6(b) direct that if an EIS is prepared by EPA to assess the proposed designation of one or more disposal sites, it should include the results of an environmental evaluation of the proposed disposal site(s), the Draft EIS (DEIS) should be presented to the public along with a proposed rule for the proposed disposal site designation(s), and that a Final EIS (FEIS) should be provided at the time of final rulemaking for the site designation. EPA has complied with all procedural requirements related to the publication of this proposed rule and associated DSEIS. The Agency has prepared a thorough environmental evaluation of the recommended alternative site being proposed for designation, the other two alternative sites still being considered, and other courses of action (including the option of not designating open-water disposal sites). This evaluation is presented in the DSEIS (and related documents) and this proposed rule.

2. Disposal Site Selection Criteria

EPA regulations under the MPRSA identify four general criteria and 11 specific criteria for evaluating locations for the potential designation of dredged material disposal sites. *See* 40 CFR 228.4(e), 228.5 and 228.6. The evaluation of the ELDS with respect to the four general and 11 specific criteria is discussed in detail in the DSEIS and supporting documents and is summarized below. The evaluation of the NBDS and CSDS with respect to the criteria also is discussed in detail in the DSEIS and supporting documents, but is not discussed in detail below because EPA is not currently proposing to designate these sites.

General Criteria (40 CFR 228.5)

As described in the DSEIS, and summarized below, EPA has determined that the ELDS, NBDS, and CSDS satisfy the four general criteria specified in 40 CFR 228.5. This is discussed in Chapter 5 and summarized in Table 5–9, ''Summary of Impacts for Action and No Action Alternatives,'' of the DSEIS.

i. Sites must be selected to minimize interference with other activities in the marine environment, particularly avoiding areas of existing fisheries or shellfisheries, and regions of heavy commercial or recreational navigation (40 CFR 228.5(a)).

EPA's evaluation determined that use of the ELDS would cause minimal interference with the aquatic activities identified in the criterion. The site is not located in shipping lanes or any other region of heavy commercial or recreational navigation. In addition, the site is not located in an area that is important for commercial or recreational fishing or shellfish harvesting. EPA used Geographic Information System (GIS) software to overlay the locations of various uses and natural resources of the marine environment on the disposal site location and surrounding areas (including their bathymetry). Analysis of this data indicated that use of the site would have minimal potential for interfering with other existing or ongoing uses of the marine environment in and around the ELDS, including lobster harvesting or fishing activities. In addition, the western half of the ELDS has been used for dredged material disposal for many years (as the NLDS) and not only has this activity not significantly interfered with the uses identified in the criterion, but mariners in the area are accustomed to use of this site. Finally, time-of-year restrictions (also known as ''environmental windows'') imposed to protect fishery resources will typically limit dredged material disposal activities to the months of October through April, thus further minimizing any possibility of interference with the various activities specified in the criterion. The NBDS and CSDS also meet this criterion for largely the same reasons.

ii. Sites must be situated such that temporary perturbations to water quality or other environmental conditions during initial mixing caused by disposal operations would be reduced to normal ambient levels or to undetectable contaminant concentrations or effects before reaching any beach, shoreline, marine sanctuary, or known geographically limited fishery or shellfishery (40 CFR 228.5(b)).

EPA's analysis concludes that the ELDS satisfies this criterion. First, the site is a significant distance from any beach, shoreline, marine sanctuary (in fact, there are no federally-designated marine sanctuaries in Long Island Sound), or known geographically limited fishery or shellfishery. Second, the site will be used only for the disposal of dredged material determined to be suitable for open-water disposal by application of the MPRSA's ocean dumping criteria. *See* 40 CFR part 227. These criteria include provisions related to water quality and account for initial mixing. *See* 40 CFR 227.4, 227.5(d), 227.6(b) and (c), 227.13(c), 227.27, and 227.29. Data evaluated during development of the DSEIS, including data from monitoring conducted during and after past disposal activities, indicates that any temporary perturbations in water quality or other environmental conditions at the site during initial mixing from disposal operations will be limited to the immediate area of the site and will neither cause any significant environmental degradation at the site nor reach any beach, shoreline, marine sanctuary, or other important natural resource area. The NBDS and CSDS also meet this criterion for the same reasons.

iii. The sizes of disposal sites will be limited in order to localize for identification and control any immediate adverse impacts, and to permit the implementation of effective monitoring and surveillance to prevent adverse long-range impacts. Size, configuration, and location are to be determined as part of the disposal site evaluation (40 CFR 228.5(d)).

EPA has determined, based on the information presented in the DSEIS, that the ELDS, NBDS, and CSDS alternatives are sufficiently limited in size to allow for the identification and control of any immediate adverse impacts, and to permit the implementation of effective monitoring and surveillance to prevent adverse long-range impacts. The maximum combined size of the three sites is approximately 5.8 nmi2, which is just 0.015 (1.5 percent) of the approximately 370 nmi^2 surface area of the eastern Long Island Sound region (the ZSF excluding Block Island Sound), and just 0.0043 (less than one-percent) of the surface area of the entire Long Island Sound. The long history of dredged material disposal site monitoring in New England through the

DAMOS program, and specifically at active and historic dredged material disposal sites in Long Island Sound, provides ample evidence that these surveillance and monitoring programs are effective at determining physical, chemical, and biological impacts at sites of the size of the options considered in this case.

All three alternative sites are identified by specific coordinates spelled out in the DSEIS, and the use of precision navigation equipment in both dredged material disposal operations and monitoring efforts will enable accurate disposal operations and contribute to effective management and monitoring of the sites. Detailed plans for the management and monitoring of the ELDS are described in the SMMP (Appendix I of the DSEIS). Finally, as discussed herein and in the DEIS, EPA has tailored the boundaries of each of the alternative sites in light of site characteristics, such as local currents and bottom features, so that the area and boundaries of the sites are optimized for environmentally sound dredged material disposal operations.

iv. EPA will, wherever feasible, designate ocean dumping sites beyond the edge of the continental shelf and other such sites that have been historically used (40 CFR 228.5(e)).

EPA evaluated sites beyond the edge of the continental shelf and historical disposal sites in Long Island Sound as part of the alternatives analysis conducted for the DSEIS. The continental shelf extends about 60 nmi seaward from Montauk Point, New York, and a site located on the continental slope would result in a transit of approximately 80 nmi from New London. This evaluation determined that the long distances and travel times between the dredging locations in eastern Long Island Sound and the continental shelf posed significant environmental, operational, safety, and financial concerns, rendering such options unreasonable. Environmental concerns include increased risk of encountering endangered species during transit, increased fuel consumption and air emissions, and greater potential for accidents in transit that could lead to dredged material being dumped in unintended areas.

As described in the Disposal Site Descriptions section, the ELDS, NBDS, and CSDS all encompass the footprints of historically used sites. To the extent that the site boundaries have been adjusted to include adjacent areas outside of the existing sites, EPA has concluded that these adjustments will be environmentally beneficial, as discussed in the DSEIS. For example, rather than propose designation of the existing NLDS, the eastern half of which is at capacity and nearing depths that could lead to scouring of the sediment by surface currents and storms, EPA is proposing a new ELDS that encompasses the western half of the existing NLDS along with two adjacent areas immediately to the west of the NLDS. These two adjacent areas have been determined to be containment areas by physical oceanographic modeling. Long-term monitoring of the three alternative sites, or at least the historically used parts of them, has shown minimal adverse impacts to the adjacent marine environment and rapid recovery of the benthic community in the disposal mounds. While there are also other historically used disposal sites in eastern Long Island Sound, the analysis in the DSEIS concludes that the ELDS, NBDS, and CSDS are the preferable locations. Thus, designation of the ELSD, NBDS, and/or CSDS would be consistent with this criterion.

a. Specific Criteria (40 CFR 228.6)

In addition to the four general criteria discussed above, 40 CFR 228.6(a) lists eleven specific factors to be used in evaluating the impact of using the site(s) for dredged material disposal under the MPRSA. Compliance with the eleven specific criteria is discussed below. It is also discussed in detail in Chapter 5 and summarized in Table 5–13, ''Summary of Impacts at the Alternative Sites,'' of the DSEIS.

i. Geographical Position, Depth of Water, Bottom Topography and Distance From Coast (40 CFR 228.6(a)(1)).

Based on analyses in the DSEIS, EPA has concluded that the geographical position (*i.e.,* location), water depth, bottom topography (*i.e.,* bathymetry), and distance from coastlines of the ELDS (and part of the NBDS) will facilitate containment of dredged material within site boundaries, and reduce the likelihood of material being transported away from the site to adjacent sea floor areas. As described in the preceding Disposal Sites Description section and in the above discussion of compliance with general criteria iii and iv (40 CFR 228.5(c) and (d)), all three sites (ELDS, NBDS and CSDS) are located far enough from shore and are in deep enough water to avoid adverse impacts to the coastline.

The ELDS and northeastern portion of the NBDS are containment areas, so disposal of dredged material there is expected to stay in those sites and not cause adverse effects to the adjacent seafloor areas. The CSDS and remaining portions of the NBDS are dispersive, so any dredged material disposed there would not be expected to stay within the site boundaries. However, disposal site monitoring, ambient water quality monitoring, and fisheries surveys have not documented any adverse impacts from the use of the CSDS since the early 1980s. The closest points of land to the ELDS are Goshen Point, Connecticut, approximately 1.2 nmi (2.2 km) to the north, and Fishers Island, New York, approximately 2 nmi (3.2 km) to the southeast, in water depths ranging from approximately 45 feet (14 m) in the north to 100 feet (30 m) in the south. The northern edge of the NBDS alternative is located approximately 0.6 nmi (1.1 km) from Black Point (southwestern corner of Niantic Bay) and 1.6 nmi (3.0 km) from the Millstone Nuclear Power Station (southeastern corner of Niantic Bay). Water depths at the site range from approximately 60 to 130 feet (18 to 40 m). The center of the CSDS is 3.3 nmi (6.1 km) south of Cornfield Point in Old Saybrook, Connecticut, and the water depth at the site is around 150 feet (50 m).

As discussed in the DSEIS, long-term monitoring of disposal sites in Long Island Sound has indicated that creating mounds above a depth of 46 feet (14 meters) can result in material being removed from the mounds by currents. All three sites are of a sufficient depth to allow the disposal of the amount of material that is projected over the 30-year planning horizon without exceeding this depth threshold. As discussed in the DSEIS, the entire ELDS and the northeastern part of the NBDS are containment areas and, as a result, EPA expects material placed at these sites to remain there. As a result, any short-term impacts from dredged material placement will be localized and this, together with other regulatory requirements described elsewhere in this document, will facilitate prevention of any adverse impacts at the sites.

The CSDS alternative and a part of the NBDS, however, are dispersive areas from which dredged material disposed there would likely be eroded over time. This material would then be dispersed in the water column and transported predominantly toward the west. As a result, past disposal at the CSDS has been limited to certain types of sediments (*i.e.,* sandy material). If the NBDS were designated, similar restrictions would likely be appropriate regarding any use of the dispersive areas of the site. Monitoring of the CSDS has determined that past and present management practices have been successful in minimizing short-term, long-term, and cumulative impacts to

water quality and benthic habitat from dredged material disposal. EPA expects that similar results would follow from using the dispersive portions of the NBDS with similar restrictions.

ii. Location in Relation To Breeding, Spawning, Nursery, Feeding, or Passage Areas of Living Resources in Adult or Juvenile Phases (40 CFR 228.6(a)(2)).

EPA considered the proposed ELDS and the other two sites in relation to breeding, spawning, nursery, feeding, and passage areas for adult and juvenile phases (*i.e.,* life stages) of living resources in Long Island Sound. From this analysis, EPA concluded that, while disposal of suitable dredged material at the ELDS, NBDS, or CSDS would cause some short-term, localized effects, overall it would not cause adverse effects to the habitat functions and living resources specified in the above criterion. As previously noted, the maximum combined size of the three sites is approximately 5.8 nmi ^{2}, which is just 0.015 (1.5 percent) of the approximately 370 nmi^2 surface area of the eastern Long Island Sound region (the ZSF excluding Block Island Sound), and just 0.0043 (less than one-percent) of the surface area of the entire Long Island Sound.

Generally, there are three primary ways that dredged material disposal could potentially adversely affect marine resources. First, disposal can cause physical impacts by injuring or burying less mobile fish, shellfish, and benthic organisms, as well as their eggs and larvae. Second, tug and barge traffic transporting the dredged material to a disposal site could possibly collide or otherwise interfere with marine mammals and reptiles. Third, contaminants in the dredged material could potentially bioaccumulate through the food chain. However, EPA and the other federal and state agencies that regulate dredging and dredged material disposal impose requirements that prevent or greatly limit the potential for these types of impacts to occur.

For example, the agencies impose ''environmental windows,'' or time-of-year restrictions, for both dredging and dredged material disposal. This type of restriction has been a standard practice for more than a decade in Long Island Sound, and New England generally, and is incorporated in USACE permits and authorizations in response to consultation with federal and state natural resource agencies (*e.g.,* NMFS). Dredged material disposal in Long Island Sound is generally limited to the period between October 1 and April 30 to avoid time periods when any threat of effects on aquatic organisms would be greater. Indeed, environmental windows are often set depending on the location of specific dredging projects in relation to certain fish and shellfish species. For example, dredging in nearshore areas where winter flounder spawning occurs is generally prohibited between February 1 and April 1; dredging that may interfere with anadromous fish runs is generally prohibited between April 1 and May 15; and dredging that may adversely affect shellfish is prohibited between June 1 and September 30. These environmental windows, in effect, serve to further restrict periods during which dredged material disposal would occur.

Another benefit of using environmental windows is that they reduce the likelihood of dredged material disposal activities interfering with marine mammals and reptiles. While there are several species of marine mammal or reptile, such as harbor porpoises, long-finned pilot whales, seals, and sea turtles, that either inhabit or migrate through Long Island Sound, most of them either leave the Sound during the winter months for warmer waters to the south or are less active and remain near the shore. There also are many species of fish (*e.g.,* striped bass, bluefish, scup) and invertebrates (*e.g.,* squid) that leave the Sound during the winter for either deeper water or warmer waters to the south, thus avoiding the time of year when most dredging and dredged material disposal occurs. The use of environmental windows has been refined over time and is considered an effective management tool to minimize impacts to marine resources.

Dredged material disposal will, however, have some localized impacts to fish, shellfish, and benthic organisms, such as clams and worms, that are present at a disposal site (or in the water column directly above the site) during a disposal event. The sediment plume may entrain and smother some fish in the water column, and may bury some fish, shellfish, and other marine organisms on the sea floor. It also may result in a short-term loss of forage habitat in the immediate disposal area, but the DAMOS program has documented the recolonization of disposal mounds by benthic infauna within 1–3 years after disposal and this pattern would be expected at the sites evaluated in the DSEIS. As discussed in the DSEIS (section 5.2.2), over time, disposal mounds recover and develop abundant and diverse biological communities that are healthy and able to support species typically found in the ambient surroundings. Some organisms may burrow deeply into sediments, often up to 20 inches, and are more likely to survive a burial event.

To further reduce potential environmental impacts associated with dredged material disposal, the dredged material from each proposed dredging project will be subjected to the MPRSA sediment testing requirements set forth at 40 CFR part 227 to determine its suitability for open-water disposal. Suitability for open-water disposal is determined by testing the proposed dredged material for toxicity and bioaccumulation and by quantifying the risk to human health from consuming marine organisms that are exposed to dredged material and its associated contaminants using a risk assessment model. If it is determined that the sediment is unsuitable for open-water disposal—that is, that it may unreasonably degrade or endanger human health or the marine environment—it cannot be disposed at disposal sites designated under the MPRSA. *See* 40 CFR 227.6. Therefore, EPA does not anticipate significant effects on marine organisms from dredged material disposal at the sites under evaluation.

EPA also is complying with the ESA by consulting with the NMFS and U.S. Fish and Wildlife Service (USFWS) concerning EPA's conclusion that the designation of the ELDS, NBDS, or CSDS would not likely adversely affect federally listed species under their respective jurisdictions or any habitat designated as critical for such species. Additionally, EPA consulted with NMFS under the MSFCMA on potential impacts to essential fish habitat (EFH). NMFS determined that the use of environmental windows and the stringent testing requirements were sufficient steps to minimize any impacts to EFH and did not offer additional conservation recommendations. Further details on these consultations are provided in the DSEIS and the section below describing compliance with the ESA and MSFCMA.

EPA recognizes that dredged material disposal causes some short-term, localized adverse effects to marine organisms in the immediate vicinity of each disposal event. But because dredged material disposal would be limited to suitable material at the 1–3 small sites under consideration here (see above regarding compliance with general criteria (40 CFR 2285(e)), and during only several months of the year, EPA concludes that designating ELDS, NBDS, or CSDS would not cause unacceptable or unreasonable adverse impacts to breeding, spawning, nursery, feeding, or passage areas of living resources in adult or juvenile phases.

There is no evidence of long-term effects on benthic processes or habitat conditions.

iii. Location in Relation to Beaches and Other Amenity Areas (40 CFR 228.6(a)(3)).

EPA's analysis concludes that the ELDS, NBDS, and CSDS all satisfy this criterion. All three sites are far enough away from beaches, parks, wildlife refuges, and other areas of special concern to prevent adverse impacts to these amenities and, as previously noted, there are no marine sanctuaries in Long Island Sound. As previously described, the ELDS, NBDS, and CSDS are 1.2 nmi (2.2 km), 0.6 nmi (1.1 km), and 2.8 nmi (5.2 km) from the nearest shore, respectively, and none of the sites is closer than 1.7 nmi (3.2 km) to public beaches in either Connecticut or New York. Based on modeling results that are presented in section 5.5.3 of the DSEIS, and past monitoring of actual disposal activities, this distance is beyond any expected transport of dredged material due to tidal motion or currents. As noted above, any temporary perturbations in water quality or other environmental conditions at the sites during initial mixing from disposal operations will be limited to the immediate area of the sites and will not reach any beach, parks, wildlife refuges, or other areas of special concern.

Thus, EPA does not anticipate that the use of the ELDS, NBDS, or CSDS would cause any adverse impacts to beaches or other amenity areas.

iv. Types and Quantities of Wastes Proposed To Be Disposed of, and Proposed Methods of Release, Including Methods of Packing the Waste, if Any (40 CFR 228.6(a)(4)).

The typical composition of dredged material to be disposed at the sites is expected to range from predominantly ''clay-silt'' to ''mostly sand.'' This expectation is based on data from historical dredging projects from the eastern region of Long Island Sound. For federal dredging projects and private projects generating more 25,000 cubic yards of dredged material, EPA and the USACE will conduct sediment suitability determinations applying the criteria for testing and evaluating dredged material under 40 CFR 227 and further guidance in the ''Regional Implementation Manual for the Evaluation of Dredged Material Proposed for Disposal in New England Waters'' (EPA, 2004), and the material would have to satisfy these suitability criteria before it could be authorized for disposal under the MPRSA. Private dredging projects generating up to 25,000 cubic yards will continue to be regulated under CWA section 404. The requirements under the MPRSA and the CWA are discussed in detail in the DSEIS.

The ELDS, NBDS, and CSDS would receive dredged material that is transported by either government or private contractor hopper dredges or oceangoing bottom-dump barges (''scows'') towed by tugboat. Both types of equipment release the material at or very near the surface, which is the standard operating procedure for this activity. The disposal of this material will occur at specific coordinates marked by buoys and will be placed so as to concentrate material from each disposal project. This concentrated placement is expected to help minimize bottom impacts to benthic organisms. In addition, there are no plans to pack or package dredged material prior to disposal.

Furthermore, it should be emphasized that the three alternative sites are only being considered for the disposal of dredged material; disposal of other types of material will not be allowed at these sites. It also should be noted that the disposal of certain other types of material is expressly prohibited by the MPRSA and EPA regulations (*e.g.,* industrial waste, sewage sludge, chemical warfare agents, insufficiently characterized materials) (33 U.S.C. 1414b; 40 CFR 227.5).

As previously discussed, dredging in eastern Long Island Sound is projected to generate approximately 22.6 million cubic yards (mcy) of dredged material over the next 30 years, including 17.9 mcy from Connecticut ports and harbors and 4.7 mcy from ports and harbors in New York. Of the total amount of 22.6 mcy, approximately 13.5 mcy are projected to be fine-grained sediment that meets MPRSA and CWA standards for aquatic disposal (*i.e.,* ''suitable'' material), and 9.1 mcy are projected to be course-grained sand that also meets MPRSA and CWA standards for aquatic disposal (*i.e.,* also ''suitable'' material). Even if none of the sand is used beneficially, which is highly unlikely given the high demand for this resource, the maximum quantity of dredged material that may possibly be disposed of at one or more of the three alternatives is approximately 22.6 mcy, and EPA expects that increased efforts to develop and use practicable alternatives to open-water disposal will reduce that amount significantly. Since the estimated capacity of the ELDS, NBDS, and CSDS is 27 mcy, 27 mcy, and unlimited respectively, there is more than sufficient capacity even if only ELDS or one of the other two alternatives is designated for long-term use. (As previously stated, EPA is not considering designating the CSDS alone because it is a dispersive site.) For all of these reasons, no significant adverse impacts are expected to be associated with the types and quantities of dredged material that may be disposed at the sites.

v. Feasibility of Surveillance and Monitoring (40 CFR 228.6(a)(5)).

Monitoring and surveillance are expected to be feasible at all three sites, although the ELDS and the northeast portion of the NBDS would be most conducive to monitoring because they're containment sites and material disposed there is expected to stay there. The ELDS, NBDS, and CSDS are all readily accessible for bathymetric and side-scan sonar surveys and the NLDS portion of the ELDS and the CSDS have been successfully monitored by the USACE over the past 35 years under the DAMOS program. Upon designation of a site or sites, monitoring would continue under the DAMOS program in accordance with the most current approved Site Management and Monitoring Plan (SMMP) for each site. A draft SMMP has been developed only for the ELDS at this time, since it is EPA's preferred alternative, but EPA will develop SMMPs for any other sites that may be designated following a similar format. As a containment site, the ELDS is conducive to the type of monitoring most commonly conducted at dredged material disposal sites, including side-scan sonar, sediment profile imaging, and sediment grab sampling. The draft SMMP for the ELDS is included as Appendix I of the DSEIS.

While the CSDS and transitional part of the NBDS can be monitored, they are more dispersive sites, which means that currents take dredged sediments away from the sites over time. Therefore, it is not possible to accurately track the fate of material placed at these sites. As explained above, that is why use of the CSDS has been limited over the years to receiving sediments from non-industrial harbors and channels, like the mouth of the Connecticut River. EPA is not currently proposing to designate the NBDS or CSDS, but if that changes after consideration of public comments, EPA would prepare an SMMP for public review and comment in conjunction with a proposal to designate the site. The SMMPs are subject to review and updating at least once every ten years, if necessary, and may be subject to additional revisions based on the results of site monitoring and other new information. Any such revisions will be closely coordinated with other federal and state resource management agencies and stakeholders during the review and approval process and will become final

only when approved by EPA, in conjunction with the USACE. *See* 33 U.S.C. 1413 (c)(3).

vi. Dispersal, Horizontal Transport and Vertical Mixing Characteristics of the Area, Including Prevailing Current Direction and Velocity, if Any (40 CFR 228.6(a)(6)).

Although the interactions of bathymetry, wind-generated waves, and river and ocean currents in Long Island Sound are complex, the ELDS, NBDS, and CSDS are located in areas that are generally calm except during storms. (Dredging and dredged material disposal would not be conducted during storm events. See *e.g.,* 40 CFR 228.15(b)(4)(vi)(L)). Consistent with this, past monitoring during disposal operations at the NLDS (in the vicinity of the proposed ELDS), NBDS, and CSDS revealed minimal drift of sediment out of the disposal site area as it passed through the water column.

Conditions are more complicated at the seafloor within the alternative disposal sites. Disposal site monitoring has confirmed that peak wave-induced bottom current velocities are not sufficient to cause significant erosion of dredged material placed at either the ELDS or the containment portions of the NBDS. As noted above, physical oceanographic monitoring and modeling has indicated that the ELDS and portions of the NBDS are depositional locations that collect, rather than disperse, sediment. For these reasons, EPA has determined that the dispersal, horizontal transport, and vertical mixing characteristics, as well as the current velocities and directions at the ELDS and within portions of the NBDS are appropriate to support their designation as dredged material disposal sites.

As discussed above, EPA also has determined that the CSDS and portions of the NBDS are dispersive sites with bottom currents that would likely move dredged material away from the site to surrounding areas. Therefore, EPA does not currently favor designating these sites, but they could be designated for limited use for the placement of suitable sediments with similar characteristics to native sediments in the general vicinity of the sites. This is how the CSDS was used in the past. EPA is interested in receiving comments concerning the option of designating the CSDS for such limited use.

vii. Existence and Effects of Current and Previous Discharges and Dumping in the Area (Including Cumulative Effects) (40 CFR 228.6(a)(7)).

As previously described in the Disposal Sites Descriptions section, the portion of the ELDS that was used historically as the NLDS has received approximately 8.9 mcy (6.7 million m^3) since 1955. The NBDS is not currently an active disposal site, but it was used between 1969 and 1972, when a total of 176,000 cy (135,000 m^3) of dredged material was disposed at this location. The CSDS has received an estimated 2.9 mcy of dredged material (2.25 million m^3) since 1960.

Until the passage of the CWA in 1972, dredged material disposal was not a heavily regulated activity. Since 1972, open-water disposal in Long Island Sound has been subject to the sediment testing and alternatives analysis provisions of section 404 of the CWA. With passage of the Ambro Amendment in 1980 (which was further amended in 1990), dredged material disposal from all federal projects and non-federal projects generating more than 25,000 cubic yards of material became subject to the requirements of both CWA section 404 and the MPRSA. The result of these increasingly stringent regulatory requirements for dredged material disposal, combined with the reduction in contaminants entering waterways from other Clean Water Act programs, is that there has been a steady, measurable improvement in the quality of material that has been allowed to be placed at the NLDS portion of the ELDS and CSDS over the past 35 years.

The NLDS portion of the ELDS and CSDS both have been used on a consistent basis since the early 1980s pursuant to the USACE's short-term site selection authority under section 103(b) of the MPRSA (33 U.S.C. 1413(b)). Since then, disposal operations at these sites have been carefully managed and the material disposed there has been monitored. In EPA's view, past use of these sites generally makes them preferable to more pristine sites that have either not been used or have been used in the more distant past. *See* 40 CFR 228.5(e). Continuing to use existing sites, as long as they have remaining capacity, rather using a multitude of sites, helps to limit or concentrate the footprint of dredged material disposal on the seafloor of Long Island Sound. While the effects of placing suitable dredged material at a disposal site are primarily limited to short-term physical effects, such as burying benthic organisms in the location where the material is placed, EPA regards it to be preferable to concentrate such effects in particular areas and leave other areas untouched as much as possible.

That said, EPA's evaluation of data and modeling results indicates that past disposal operations have not resulted in unacceptable or unreasonable environmental degradation, and that there should be no such adverse effects in the future from the projected use of any of the three sites, although it would be easier to determine this at the ELDS and the containment portion of the NBDS, since the material is expected to stay at those sites and could be monitored. As part of this conclusion, discussed in detail in the DSEIS, EPA found that there should be no significant adverse cumulative environmental effects from using these sites on a long-term basis for dredged material disposal in compliance with all applicable regulatory requirements regarding sediment quality and site usage.

viii. Interference With Shipping, Fishing, Recreation, Mineral Extraction, Desalination, Fish and Shellfish Culture, Areas of Special Scientific Importance and Other Legitimate Uses of the Ocean (40 CFR 228.6(a)(8)).

In evaluating whether disposal activity at the sites could interfere with shipping, fishing, recreation, mineral extraction, desalination, fish or shellfish culture, areas of scientific importance, and other legitimate uses of the ocean, EPA considered both the effects of placing dredged material on the bottom of the Sound at the ELDS, NBDS, and CSDS and any effects from vessel traffic associated with transporting the dredged material to the disposal sites. From this evaluation, EPA concluded there would be no unacceptable or unreasonable adverse effects on the considerations noted in this criterion. Some of the factors listed in this criterion have already been discussed above due to the overlap of this criterion with aspects of certain other criteria. Nevertheless, EPA will address each point below.

The ELDS is the only site in close proximity to significant shipping activity. The eastern boundary of the proposed ELDS is one-half mile west of the eastern boundary of the current NLDS; this shift to the west would move the disposal site out of about half of the Submarine Transit Corridor into New London Harbor, further reducing the potential for conflicts between the disposal site and submarine traffic. Vessel traffic generated by disposal activity is expected to be similar to that which has occurred over the past 20–30 years, which has not interfered with other shipping activity. Moreover, research by EPA and the USACE concluded that after disposal at any of the three sites, resulting water depths will be sufficient to permit navigation in the area without interference. (And by providing an open-water alternative for dredged material disposal in the absence of environmentally preferable,

practicable alternatives, the sites are likely to improve and facilitate navigation in many of the harbors, bays, rivers and channels around eastern Long Island Sound.)

EPA also carefully evaluated the potential effects on commercial and recreational fishing for both finfish and shellfish (including lobster) of designating the ELDS, NBDS, and CSDS for dredged material disposal and concluded that there would be no unreasonable or unacceptable adverse effects. As discussed above in relation to other site evaluation criteria, dredged material disposal will only have short-term, incidental, and insignificant effects on organisms in the disposal sites and no appreciable effects beyond the sites. Indeed, since past dredged material disposal has been determined to have no significant adverse effects on fishing, the similar projected levels of future disposal activities at the designated sites also are not expected to have any significant adverse effects.

Four main reasons that EPA concluded that no unacceptable adverse effects would occur from placing dredged material at the site alternatives are discussed below. First, as discussed above, EPA has concluded that any contaminants in material permitted for disposal—having satisfied the dredged material criteria in the regulations that restrict any toxicity and bioaccumulation—will not cause any significant adverse effects on fish, shellfish, or other aquatic organisms. Because both the ELDS and portions of the NBDS are containment areas, dredged material disposed at those sites is expected to remain there. If the CSDS and/or dispersive portion of the NBDS were to be designated, EPA would restrict the types of material to be placed at those sites, as discussed above.

Second, as also discussed above, the disposal sites do not encompass any especially important, sensitive, or limited habitat for the Sound's fish and shellfish, such as key spawning or nursery habitat for species of finfish. Numerous studies and data reviewed by EPA and the USACE indicate that there is low potential for any future incremental risk from the placement of dredged sediments at the three alternative sites, either in the long- or short-term.

Third, while EPA found that a small number of demersal fish (*e.g.,* winter flounder), shellfish (*e.g.,* clams and lobsters), benthic organisms (*e.g.,* worms), and zooplankton and phytoplankton could be lost due to the physical effects of disposal (*e.g.,* burial of organisms on the bottom by dredged material and entrainment of plankton in the water column by dredged material upon its release from a disposal barge), EPA also determined that these minor, temporary adverse effects would be neither unreasonable nor unacceptable. This determination was based on EPA's conclusion that the numbers of organisms potentially affected represent only a minuscule percentage of those in eastern Long Island Sound, and on DAMOS monitoring that consistently documents the rapid recovery of the benthic community in an area that has received dredged material. In addition, any physical effects will be further limited by the relatively few months in which disposal activities could be permitted by the environmental window (or time-of-year) restrictions.

Fourth, EPA has determined that vessel traffic associated with dredged material disposal will not have any unreasonable or unacceptable adverse effects on fishing. As explained above, environmental window restrictions will limit any disposal to the period between October 1 and April 30, and often to fewer months depending on species-specific restrictions for each dredging project, each year. Moreover, there is generally far less vessel traffic in the months when disposal would occur due to the seasonal nature of recreational boating and commercial shipping. There currently are no mineral extraction activities or desalinization facilities in the eastern Long Island Sound region with which disposal activity could potentially interfere. Energy transmission pipelines and cables are located near the sites, but none are within their boundaries. No finfish aquaculture currently takes place in Long Island Sound and the only form of shellfish culture in the area, oyster production, occurs in nearshore locations far enough away from the three alternative sites that it should not be impacted in any manner by this proposed action. Finally, none of the disposal site options are in an area of special scientific importance; in fact, areas with such characteristics were screened out very early in the alternatives screening process. Accordingly, depositing dredged material at any of the three sites will not interfere with any of the activities described in this criterion or other legitimate uses of Long Island Sound.

ix. The Existing Water Quality and Ecology of the Sites as Determined by Available Data or by Trend Assessment or Baseline Surveys (40 CFR 228.6(a)(9)).

EPA's analysis of existing water quality and ecological conditions at the site in light of available data, trend assessments and baseline surveys indicates that use of the designated disposal sites will cause no unacceptable or unreasonable adverse environmental effects. Considerations related to water quality and various ecological factors (*e.g.,* sediment quality, benthic organisms, fish and shellfish) have already been discussed above in relation to other site selection criteria, and are discussed in detail in the DSEIS and supporting documents. In considering this criterion, EPA took into account existing water quality and sediment quality data collected at the disposal sites, including from the USACE's DAMOS site monitoring program, as well as water quality data from the Department of Energy and Environmental Protection's (CT DEEP) Long Island Sound Water Quality Monitoring Program. As discussed herein, EPA has determined that placement of suitable dredged material at the disposal site alternatives should not cause any significant adverse environmental effects to water quality or to ecological conditions at the disposal sites. EPA and the USACE have prepared a draft SMMP for the ELDS to guide future monitoring of site conditions (DSEIS Appendix I), and would prepare SMMPs for the NBDS and/or CSDS if either of them were to be designated.

x. Potentiality for the Development or Recruitment of Nuisance Species in the Disposal Sites (40 CFR 228.6(a)(10)).

Monitoring at disposal sites in Long Island Sound over the past 35 years has shown no recruitment of nuisance (invasive, non-native) species and no such adverse effects are expected to occur at the ELDS, NBDS, or CSDS in the future. EPA and the USACE will continue to monitor EPA-designated sites under their respective SMMPs, which include a ''management focus'' on ''changes in composition and numbers of pelagic, demersal, or benthic biota at or near the disposal sites'' (section 6.1.5 of the SMMP, Appendix I of the DSEIS).

xi. Existence at or in Close Proximity to the Sites of Any Significant Natural or Cultural Feature of Historical Importance (40 CFR 228.6(a)(11)).

There are no natural features of historical importance in the ELDS, NBDS, or CSDS, and the cultural resources that have the greatest potential for being impacted in eastern Long Island Sound are shipwrecks. As discussed in the DSEIS, a review of submerged vessel reports in the NOAA and Connecticut State Historic Preservation Office (CT SHPO) shipwreck databases indicate that there are three charted shipwrecks within 0.5

nmi (0.9 km) of the alternative sites. One of these charted shipwrecks is located within Site NL-Wa of the ELDS; this wreck was also identified by the side-scan sonar survey. The side-scan sonar survey identified two additional wrecks within the 0.5-nm (0.9-km) perimeter outside of the NBDS. None of these known shipwrecks are currently considered to be of historical significance. Consultation with the New York Office of Parks, Recreation and Historic Preservation (OPRHP; acts as the NY SHPO) revealed that there are no submerged vessels or historic resources within the portion of the CSDS that is located in New York State waters.

As additional side-scan sonar surveys are conducted at the disposal sites in the future under the SMMPs, and if potential shipwrecks are identified, EPA will take appropriate action in cooperation with federal and state historic preservation officials in response to any significant cultural resources. The CT SHPO also determined that there are no known aboriginal artifacts at the ELDS, NBDS, or CSDS. EPA coordinated with Indian tribes in Connecticut, Rhode Island, and New York throughout the development of the DSEIS and the tribes did not identify any important natural, cultural, spiritual, or historical features or areas within any of the three disposal sites under consideration.

In summary, there are no historic or archaeological resources within the NBDS or CSDS, and while the NL-Wa portion of the ELDS contains a shipwreck near its southern boundary, this wreck is not considered to be of historical significance. Nevertheless, any impacts to that wreck from dredged material disposal could be minimized by establishing a 164-foot (50 m) avoidance buffer surrounding the shipwreck and appropriate site management, which accommodates both the minimum buffer of 30 m recommended by the CT SHPO, and the 40–50 m minimum buffer applied by the NY OPRHP.

3. Disposal Site Management (40 CFR 228.3, 228.7, 228.8 and 228.9)

The ELDS, NBDS, and CSDS would be subject to specific management requirements to ensure that unacceptable adverse environmental impacts do not occur. Examples of these requirements include: (1) Restricting the use of the sites to the disposal of dredged material that has been determined to be suitable for ocean disposal following MPRSA and/or CWA requirements in accordance with the provisions of MPRSA section 106(f), as well as to material from waters in the vicinity of the disposal sites; (2) monitoring the disposal sites and their associated reference sites, which are not used for dredged material disposal, to assess potential impacts to the marine environment by providing a point of comparison to an area unaffected by dredged material disposal; and (3) retaining the right to limit or close these sites to further disposal activity if monitoring or other information reveals evidence of unacceptable adverse impacts to the marine environment. As mentioned above, dredged material disposal will not be allowed when weather and sea conditions could interfere with safe, effective placement of any dredged material at a designated site. In addition, although not technically a site management requirement, disposal activity at the sites will generally be limited to the period between October 1 and April 30, but often less depending on environmental windows to protect certain species, as described above.

EPA and the USACE have managed and monitored dredged material disposal activities at the CSDS and the historically used portion of the ELDS since the early 1980s. Site monitoring has been conducted under the USACE's DAMOS disposal site monitoring program. In accordance with the requirements of MPRSA section 102(c) and 40 CFR 228.3, EPA and the USACE have developed a draft SMMP for the ELDS, and are prepared to do so for the NBDS and/or CSDS if a decision is made to propose either for designation. The draft SMMP is incorporated in the DSEIS as Appendix I and is available for review and comment. The SMMP describes in detail the specific management and monitoring requirements for the ELDS. With respect to site monitoring, the SMMP builds on the USACE's DAMOS monitoring program, which will continue to provide the backbone of the site monitoring effort.

B. National Environmental Policy Act

The NEPA, 42 U.S.C. 4321 *et seq.,* requires the public analysis of the potential environmental effects of proposed federal agency actions and reasonable alternative courses of action to ensure that these effects, and the differences in effects among the different alternatives, are understood. The goal of this analysis is to ensure high quality, informed decision-making, to facilitate avoiding or minimizing any adverse effects of proposed actions, and to help restore and enhance environmental quality. *See* 40 CFR 6.100(a) and 1500.1(c) and 1500.2(d)–(f). NEPA requires public involvement throughout the decision-making process. *See* 40 CFR 6.400(a) and 40 CFR 1503 and 1501.7, 1506.6.

Section 102(c) of NEPA, 42 U.S.C. 4321 *et seq.,* requires federal agencies to prepare an EIS for major federal actions significantly affecting the quality of the human environment. An EIS should assess: (1) The environmental impact of the proposed action; (2) any adverse environmental effects that cannot be avoided should the proposal be implemented; (3) alternatives to the proposed action; (4) the relationship between local short-term uses of the environment and the maintenance and enhancement of long-term productivity; and (5) any irreversible and irretrievable commitments of resources that would be involved in the proposed action should it be implemented. The required content of an EIS is further described in regulations promulgated by the President's Council on Environmental Quality (CEQ). *See* 40 CFR 1502.

EPA disposal site designation evaluations conducted under the MPRSA have been determined to be ''functionally equivalent'' to NEPA reviews, so that they are not subject to NEPA analysis requirements as a matter of law. Nevertheless, as a matter of policy, EPA voluntarily uses NEPA procedures when evaluating the potential designation of ocean dumping sites. *See* 63 FR 58045 (Notice of Policy and Procedures for Voluntary Preparation of National Environmental Policy Act Documents, October 29, 1998). While EPA voluntarily uses NEPA review procedures in conducting MPRSA disposal site designation evaluations, EPA also has explained that ''[t]he voluntary preparation of these documents in no way legally subjects the Agency to NEPA's requirements'' (63 FR 58046).

In this case, EPA has prepared a Draft Supplemental EIS (DSEIS) to evaluate the possibility of designating one or more open-water disposal sites to serve the eastern Long Island Sound region. As previously noted, the DSEIS is considered supplemental because it updates and builds on the analyses that were conducted for the 2005 Long Island Sound Environmental Impact Statement that supported the designation of the Central and Western Long Island Sound disposal sites. As part of the NEPA process, federal agencies prepare a public record of decision (ROD) at the time of their final decision on any action for which an FEIS has been prepared. If EPA decides to proceed with this proposed action after full consideration of public comments, the Agency will publish a final rule (in conjunction with the FEIS)

that will serve as the ROD for the site designation. *See* 40 CFR 1505.2 and 1506.4 (the ROD may be integrated into any other agency document prepared in carrying out its action). In addition, EPA will also publish a Responses to Comments document in conjunction with publication of a FSEIS and final rule. The Responses to Comments will identify and respond to comments received on the DSEIS and proposed rule. EPA's use of NEPA procedures to evaluate this proposed action is further described below.

Consistent with its voluntary NEPA policy, as described and referenced above, EPA has followed the NEPA process and undertaken NEPA analyses as part of its decision-making process for the disposal site designations. EPA published a Notice of Intent to prepare an EIS, held public meetings regarding the scope of issues to be addressed by the SEIS, and has now published a DSEIS for public review and comment. The DSEIS, entitled, ''Draft Supplemental Environmental Impact Statement for the Designation of Dredged Material Disposal Site(s) in Eastern Long Island Sound, Connecticut and New York,'' assesses and compares the effects, including the environmental effects, of designating dredged material disposal sites in eastern Long Island Sound, and of various alternative approaches to managing dredging needs, including the ''no action'' alternative (*i.e.,* the alternative of not designating any open-water disposal sites). *See* 40 CFR 1502.14.

1. Third-Party Contracting

EPA is the agency authorized by the MPRSA to designate dredged material disposal sites and is responsible for the DSEIS. However, EPA does not receive appropriations to support disposal site designation studies, so the state of Connecticut provided funding to hire contractors to carry out the studies, support the public participation program, and help to produce the DSEIS, all with participation and close supervision by EPA. CEQ regulations state that an EIS can be prepared by a contractor under contract to and paid directly by the applicant (*i.e.,* a ''third-party contract''). 40 CFR 1506.5(c); Forty Most Asked Questions Concerning CEQ's National Environmental Policy Act Regulations, 46 FR 18026, 18031 (1981). The contractor answers to the federal agency preparing the EIS (in this case, the EPA), not the applicant, for preparing an EIS that meets the requirements of the National Environmental Policy Act (NEPA). 40 CFR 1506.5(c).

Because EPA is ultimately responsible for the SEIS, the Agency worked closely with the state of Connecticut to select the contractors and then maintained close involvement with production of the SEIS and control over its analyses and conclusions. The state of Connecticut is not an ''applicant'' because it is not applying directly for the disposal site designation. Nevertheless, because Connecticut has expressed past support for designating one or more dredged material disposal sites in the eastern region of Long Island Sound, EPA followed the third-party contracting method described in 40 CFR 1506.5 to ensure the impartiality of the EIS.

Under the third-party contracting method, EPA must be involved in the selection of the contractor, furnish guidance and participate in the preparation of the EIS, and independently evaluate the EIS prior to approval. *See* 40 CFR 1506.5(c). The third-party contracting process used by EPA requires the third party (or parties) to pay for the contractor's services while EPA retains control of and supervisory authority over the analysis. *See* 66 FR 15527, 15531 (2001). While EPA retains final control over the selection of the contractor, applicants are allowed some input. *Id.* Once a contractor is selected, EPA and the applicant enter into a Memorandum of Understanding (MOU) outlining a general timeframe for the completion of the EIS and defining the scope of the EIS. *Id.* If EPA determines more information is needed, the MOU may be amended or EPA can complete the analysis itself. *Id.* The applicant and the contractor also enter into an agreement. *Id.* Additionally, the contractor must sign a disclosure statement for EPA declaring that it has no financial or other interest in the outcome of the project. *Id.;* 46 FR at 18031; 40 CFR 6.604(g)(3)(ii).

The Connecticut Department of Transportation (CT DOT) was the lead agency for the state with regard to preparation of the DSEIS, with technical assistance provided by the CT DEEP. CT DOT, with extensive input from EPA and CT DEEP, selected as its primary contractor the University of Connecticut, in large part due to its expertise in physical oceanography. The university selected as its subcontractor the Louis Berger Group (LBG). EPA worked in close partnership with CT DOT to ensure both that all project components carried out through third-party contracting would meet federal statutory and regulatory requirements, and that CT DOT's contractors were qualified to support public participation and other necessary processes under NEPA and the MPRSA, including scoping and site screening.

The U.S. Navy also contributed to the site designation process by funding biological and other environmental studies in support of the DSEIS. The Navy, with extensive input from EPA and CT DEEP, used its contractor Tetra Tech due to its expertise in biological resources studies and risk assessment.

2. Cooperating Agencies

The USACE was a ''cooperating agency'' in the development of the DSEIS because of its knowledge concerning the region's dredging needs, its technical expertise in monitoring dredged material disposal sites and assessing the environmental effects of dredging and dredged material disposal, its history in the regulation of dredged material disposal in Long Island Sound and elsewhere, and its ongoing legal role in regulating dredging, dredged material disposal and the management and monitoring of disposal sites. Other cooperating agencies were NMFS, CT DEEP, CT DOT, New York Department of State (NY DOS), New York Department of Environmental Conservation (NY DEC), and Rhode Island Coastal Resources Management Council (RI CRMC). To take advantage of expertise held by other entities, and to promote strong inter-agency communications, EPA also coordinated with the U.S. Fish and Wildlife Service; the Mashantucket (Western) Pequot Tribal Nation, Mohegan Tribe, Eastern Pequot Tribal Nation, and Paucatuck Eastern Pequot Indians (in Connecticut); the Narragansett Indian Tribe (in Rhode Island); the Shinnecock Indian Nation (in New York), and, as previously discussed, the CT SHPO and NY OPRHP.

Throughout the SEIS development process, EPA communicated with the cooperating federal and state agencies and tribes to keep them apprised of progress on the project and to solicit input. EPA conducted approximately ten interagency meetings and teleconferences between October 2012 and January 2016 to review progress and get feedback, and EPA was in regular contact with representatives of these agencies throughout the SEIS process.

3. Public Participation

Consistent with the public participation provisions of the NEPA regulations, EPA conducted an extensive public participation program throughout the development of the DSEIS as described in detail in Chapter 7 and Appendix A of the DSEIS.

4. Zone of Siting Feasibility

As one of the first steps in the SEIS process, EPA, in cooperation with other federal and state agencies delineated a ''Zone of Siting Feasibility'' (ZSF). The ZSF is the geographic area from which reasonable and practicable open-water dredged material disposal site alternatives should be selected for evaluation. EPA's 1986 site designation guidance manual describes the factors that should be considered in delineating the ZSF and recommends locating open-water disposal sites within an economically and operationally feasible radius from areas where dredging occurs. Other factors to be considered include navigational restrictions, political or other jurisdictional boundaries, the distance to the edge of the continental shelf, the feasibility of surveillance and monitoring, and operation and transportation costs. In 2012, consistent with the guidance and in cooperation with the other agencies, EPA established the ZSF to include the eastern region of Long Island Sound, with a western boundary consisting of a line from Mulberry Point in Guilford, CT, to Mattituck Point in Mattituck, NY, a southern boundary from Montauk Point to the southern tip of Block Island, and an eastern boundary from the northern tip of Block Island due north to the Rhode Island shoreline.

5. Draft Supplemental Environmental Impact Statement

The DSEIS evaluates whether—and if so, which—open-water dredged material disposal sites should be designated in the eastern region of Long Island Sound. The DSEIS describes the purpose and need for any such designations, evaluates several alternatives to this action, including the option of ''no action'' (*i.e.,* no designation). From this evaluation, EPA concludes that designation of the ELDS under the MPRSA is the preferred alternative.

The purpose of this designation is to provide a long-term, open-water dredged material disposal site as a potential option for the future disposal of such material. The action is necessary because periodic dredging and dredged material disposal is unavoidably necessary to maintain safe navigation and marine commerce in Long Island Sound. As previously noted, dredging in eastern Long Island Sound is projected to generate approximately 22.6 million cubic yards (mcy) of dredged material over the next 30 years, including 17.9 mcy from Connecticut ports and harbors and 4.7 mcy from ports and harbors in New York. Of the total amount of 22.6 mcy, approximately 13.5 mcy are projected to be suitable, fine-grained sediment, and 9.1 mcy are projected to be suitable, coarse-grained sand. In addition, the DMMP estimates that approximately 80,900 cy of material from eastern Long Island Sound will be fine-grained sediment that does not meet MPRSA and CWA standards for aquatic disposal (*i.e.,* ''unsuitable'' material).

With the USACE's DMMP as its primary source, EPA evaluated potential alternatives to open-water disposal in Long Island Sound but determined that they are not sufficient to meet the regional dredging needs. In accordance with EPA regulations, use of alternatives to open-water disposal will be required for dredged material management when they provide a practicable, environmentally preferable option for the dredged material from any particular disposal project. *See* 40 CFR 227.16. When no such practicable alternatives exist, however, EPA's designation of the ELDS will provide an open-water disposal site as a potential management option for dredged material regulated under the MPRSA that has been tested and determined to be environmentally suitable for open-water disposal. Sediments found to be unsuitable for open-water disposal will not be authorized for placement at a disposal site designated by EPA under the MPRSA and will have to be managed in other ways.

EPA's initial screening of alternatives, which involved input from other federal and state agencies, local governments, academic institutions, and the public, led to the determination that the open-water disposal sites were the most environmentally sound, cost-effective, and operationally feasible options for the full quantity of dredged material expected to be found suitable for open-water disposal over the 30-year planning horizon. Regardless of this conclusion, in practice, each individual dredging project will be analyzed on a case-specific basis and open-water disposal of dredged material at a designated site would only be authorized when there is a need for such disposal (*i.e.,* there are no practicable, environmentally preferable alternatives). *See* 40 CFR 227.2(a)(1), 227.16(b). EPA analyzed alternatives for the management of dredged material from navigation channels and harbors in eastern Long Island Sound. This analysis was informed by the DMMP and evaluated several different potential alternatives, including open-water disposal sites, upland disposal, beneficial uses, sediment treatment, and the no-action alternative. From this analysis, EPA determined that at least one open-water disposal site, such as the ELDS, was necessary to provide sufficient capacity to meet long-term dredged material disposal needs in the eastern Long Island Sound region, in the event that practicable alternatives to open-water disposal are not available for all the material. Again, EPA's analysis also acknowledged that options for dredged material management other than open-water disposal might be identified and required for specific dredged material disposal projects in the future.

EPA also evaluated several open-water disposal site alternatives other than the ELDS, NBDS, and CSDS. This evaluation considered multiple factors, such as reasonable distances to transport dredged material, the potential for adverse effects on important natural resources, and other measures that might indicate incompatibility for use as a disposal site. Specific factors evaluated included: The sensitivity and value of natural resources; geographically limited habitats; fisheries and shellfisheries; shipping and navigation lanes; physical and environmental parameters; and economic and operational feasibility. The analysis was carried out in a tiered process in which some options were ''screened out'' at an earlier stage based on certain factors, while other options were retained for further evaluation. The final tier involved a detailed analysis of the no-action alternative and the following three open-water alternative sites: ELDS, NBDS, and CSDS. Based on this analysis, designating the ELDS as an open-water dredged material disposal site was identified as the preferred alternative, but we are soliciting public comments on the other two alternative sites (NBDS and CSDS). A management and monitoring strategy was developed for the ELDS and is set forth in the SMMP for the site.

C. Coastal Zone Management Act

The CZMA, 16 U.S.C. 1451 *et seq.,* authorizes states to establish coastal zone management programs to develop and enforce policies to protect their coastal resources and promote uses of those resources that are desired by the state. These coastal zone management programs must be approved by the Department of Commerce's National Oceanic and Atmospheric Administration (NOAA), which is responsible for administering the CZMA. Sections 307(c)(1)(A) and (C) of the CZMA require federal agencies to provide relevant states with a determination that each federal agency activity, whether taking place within or

outside the coastal zone, that affects any land or water use or natural resource of the state's coastal zone, will be carried out in a manner consistent to the maximum extent practicable with the enforceable policies of the state's approved coastal zone management program. EPA's compliance with the CZMA is described below.

Based on the evaluations presented in the DSEIS and supporting documents, and a review of the federally approved Connecticut and New York coastal zone programs and policies, EPA has determined that designation of the ELDS, and/or the NBDS and CSDS for open-water dredged material disposal under the MPRSA would be consistent to the maximum extent practicable with the enforceable policies of the coastal zone management programs of Connecticut, New York, and Rhode Island. EPA will provide a written determination to that effect to each of the three states within the statutory and regulatory mandated timeframes.

In EPA's view, there are several broad reasons why the proposed designation of the ELDS would be consistent with the applicable, enforceable policies of both states' coastal zone programs. First, the designation is not expected to cause any significant adverse impacts to the marine environment, coastal resources, or uses of the coastal zone. Indeed, EPA expects the designation to benefit uses involving navigation and berthing of vessels by facilitating needed dredging, and to benefit the environment by concentrating any open-water dredged material disposal at a small number of environmentally appropriate sites designated by EPA and subject to the previously described SMMP, rather than at a potential proliferation of USACE-selected sites. Second, designation of the sites does not actually authorize the disposal of any dredged material at the sites, since any proposal to dispose dredged material from a particular project at a designated site will be subject to case-specific evaluation and be allowed only if: (a) The material satisfies the sediment quality requirements of the MPRSA and the CWA; (b) no practicable alternative method of management with less adverse environmental impact can be identified; and (c) the disposal complies with the site restrictions for the site. (EPA is proposing a number of restrictions on the potential use of the ELDS in today's Proposed Rule. *See* Proposed 40 CFR 228.15(b)(6)). These restrictions are described and discussed in the next section of the preamble. Third, the designated disposal site(s) will be managed and monitored pursuant to a SMMP and if adverse impacts are identified, use of the sites will be modified to reduce or eliminate those impacts. Such modification could further restrict, or even terminate, use of the sites, if appropriate. *See* 40 CFR 228.3, 228.11.

On December 22, 2015, as suggested by NOAA guidance on federal consistency determinations, EPA sent letters to NY DOS and CT DEEP (1) identifying EPA's effort to prepare a DSEIS to assess whether to propose designation of one or more dredged material disposal sites in the eastern portion of Long Island Sound, and (2) requesting information from each state concerning their respective coastal zone management programs to assist EPA with its federal consistency determination. On March 11, 2016, EPA sent a similar letter to the State of Rhode Island Coastal Resources Management Council. All three states responded in writing to EPA's letters and provided the most current information on their respective coastal management programs.

D. Endangered Species Act

Under section 7(a)(2) of the ESA, 16 U.S.C. 1536(a)(2), federal agencies are required to ensure that their actions are ''not likely to jeopardize the continued existence of any endangered species or result in the destruction or adverse modification of habitat of such species, which is determined * * * to be critical * * * .'' Depending on the species involved, a federal agency is required to consult with the NMFS and/or USFWS if the agency's action ''may affect'' an endangered or threatened species or its critical habitat (50 CFR 402.14(a)). Thus, the ESA requires consultation with NMFS and/or USFWS to adequately address potential impacts to threatened and endangered species that may occur at the proposed dredged material disposal alternative sites from any proposal to dispose dredged material.

To comply with the ESA, EPA has coordinated with NMFS and USFWS and will request consultation concurrent with the release of the draft SEIS. EPA has determined that the designation of a disposal site will not result in adverse impacts to threatened or endangered species, species of concern, marine protected areas, or essential fish habitat. In addition, the USACE would coordinate with the NMFS and USFWS for individual permitted projects to further ensure that impacts would not adversely impact any threatened or endangered species.

E. Magnuson-Stevens Fishery Conservation and Management Act

The 1996 Sustainable Fisheries Act amendments to the MSFCMA, 16 U.S.C. 1801 *et seq.,* require the designation of essential fish habitat (EFH) for federally managed species of fish and shellfish. The goal of the these amendments is to ensure that EFH is not adversely impacted by fishing or other human activities, including dredged material disposal, and to further the enhancement of these habitats, thereby protecting both ecosystem health and the fisheries industries. Pursuant to section 305(b)(2) of the MSFCMA, federal agencies are required to consult with NMFS regarding any action they authorize, fund, or undertake that may adversely affect EFH. An adverse effect has been defined by the Act as, ''[a]ny impact which reduces the quality and/or quantity of EFH [and] may include direct (*e.g.,* contamination or physical disruption), indirect (*e.g.,* loss of prey, reduction in species' fecundity), site-specific or habitat-wide impacts, including individual, cumulative, or synergistic consequences of actions'' (50 CFR 600.810(a)).

EPA is coordinating with NMFS to ensure compliance with the EFH provisions of the MSFCMA and has prepared an essential fish habitat assessment in compliance with the Act. EPA will incorporate any conservation recommendations from NMFS or explain why it has not done so in its final action.

VI. Restrictions

EPA proposes to restrict use of the ELDS in the same manner that it has restricted use of the CLDS and WLDS. The existing site use restrictions for the CLDS are detailed in 40 CFR 228.15(b)(4)(vi) and are incorporated for the WLDS by the cross-references in 40 CFR 228.15(b)(4)(vi) and 228.15(b)(5)(vi). Similarly, EPA is proposing to apply to the ELDS the same restrictions as are applied to the CLDS and WLDS by including simple cross-references to those restrictions in the new proposed regulations at 40 CFR 228.15(b)(4) and 228.15(b)(6)(vi).

While EPA is planning for the restrictions applicable to the CLDS and WLDS to also be applied to the ELDS, it also should be understood that EPA is currently proposing amendments to the CLDS/WLDS restrictions. Specifically, on February 10, 2016, EPA published in the **Federal Register** (81 FR 7055) a proposed rule to *amend* the restrictions on the CLDS and WLDS. EPA is currently considering public

comments received on the proposed regulatory amendments.

EPA has proposed amendments to the CLDS/WLDS restrictions in order to incorporate new standards and procedures for the use of those sites consistent with the recommendations of the Long Island Sound DMMP completed by the USACE on January 11, 2016. The DMMP identifies a wide range of alternatives to open-water disposal and recommends standards and procedures to help determine whether and which of these alternatives should be pursued for particular dredging projects. The goal of EPA's proposed regulatory amendments based on these standards and procedures is to reduce or eliminate the open-water disposal of dredged material in Long Island Sound wherever practicable.

The DMMP addresses dredging and dredged material management issues for *all* of Long Island Sound, including the eastern portion of the Sound. Therefore, EPA concludes that it makes sense to apply site use restrictions based on the DMMP to the ELDS as well as to the CLDS and WLDS. Again, it is intended that these restrictions will help to reduce or eliminate dredged material disposal in the Eastern portion of Long Island Sound as well as in the Central and Western portions. That said, no final decisions have been made about final restrictions for the ELDS and such final decisions will only be made after EPA considers public comments received on this proposed rule and other relevant information.

In order to understand the nature of the site use restrictions that EPA is considering for the ELDS, reviewers of this proposed rule for the ELDS should review the site use restrictions in 40 CFR 228.15(b)(4)(vi), as cross-referenced in proposed 40 CFR 228.15(b)(6)(vi). Reviewers can also review the regulatory amendments that EPA has proposed for 40 CFR 228.15(b)(4)(vi). *See* 81 FR 7055. EPA is currently considering public comments submitted on these proposed amendments and, as explained above, EPA expects that the amendments, including any changes made to them based on public comments, will ultimately be applied to the ELDS, as well as to the CLDS and WLDS. This expectation is, however, subject to EPA considering the final amendments to the restrictions for the CLDS and WLDS, public comments received on this proposed rule for the ELDS, and other relevant information. The proposed restrictions on site use are summarized below.

A. Standards

The proposed restrictions provide that disposal at the site shall be allowed only if there is no practicable alternative to open-water disposal and that any practicable alternative will be fully utilized for the maximum volume of dredged material practicable. EPA recognizes that an alternative to open-water disposal may add additional costs. The decision regarding whether there is a ''practicable alternative'' will continue to be made on a case-by-case basis, in connection with the permitting process. The term ''practicable alternative'' is defined in 40 CFR 227.16(b) of the EPA's ocean disposal regulations as an alternative which is ''available at reasonable incremental cost and energy expenditures, [and] which need not be competitive with the costs of ocean dumping, taking into account the environmental benefits derived from such activity, including the relative adverse environmental impacts associated with the use of alternatives to ocean dumping.''

The following standards for the disposal of dredged material, by type of material, are derived from the DMMP. These proposed restrictions do not make decisions about the suitability of any particular dredged material for open-water disposal or any other type of management. Each dredging project will have to go through project-specific permitting evaluations.

1. Unsuitable Material

''Unsuitable fine-grained materials'' are those determined by physical, chemical and biological testing to be unsuitable for unconfined open-water placement. Accordingly, EPA's proposed rule specifies that unsuitable fine-grained materials shall not be disposed of at the designated sites.

2. Sandy Material

''Sandy material'' in Long Island Sound is coarse-grained material of generally up to 20 percent fines when used for direct beach placement, or up to 40 percent fines when used for nearshore bar/berm nourishment. Clean sandy material should be used for beach or nearshore bar/berm nourishment whenever practicable. Sandy material has a high value as nourishment or in other coastal resiliency applications, and recent experience is that state and local governments, as well as property owner groups, are willing to fund the additional cost for such material even where there is no other federal project authority to assist in that cost. As long as beach or nearshore placement is a practicable alternative, project proponents will need to identify and secure funding for any needed non-federal cost-sharing. Accordingly, the proposed restriction specifies that coarse-grained material should be used for beach or nearshore bar/berm nourishment, or other beneficial use whenever practicable.

3. Suitable Fine-Grained Material

''Suitable fine-grained material'' in Long Island Sound is typically clay and silty material of more than 20 to 40 percent fines that is not suitable for beach or nearshore placement, yet is determined through testing and analysis to be suitable for open-water placement. Although the most likely cost-effective and environmentally acceptable method of placement of this material is at open-water disposal sites, EPA proposes that every proposed project will continue to have to exhaust the possibility for a practicable alternative to open-water disposal. More specifically, for materials dredged from upper river channels in the Connecticut, Housatonic and Thames Rivers, whenever practicable, the one existing Confined Open Water site, and on-shore or in-river placement, should be used for such projects.

The proposed restrictions specify that beneficial uses such as marsh creation, should be examined and used whenever practicable. If no other alternative is determined to be practicable, suitable fine-grained material may be placed at the designated site.

4. Source Reduction

Efforts to control sediment entering waterways can reduce the need for maintenance dredging of harbor features and facilities by reducing shoaling rates. Reducing sediment loads could help reduce the volumes dredged in each maintenance operation as well as reduce the frequency of maintenance. In addition, efforts to prevent introduction of contaminants into the watershed (*e.g.,* multi-sector and municipal stormwater permits, measures to control nonpoint agricultural runoff) can result in reduced contaminant levels in sediments that can increase the range of options available to beneficially use those sediments. Continued source reduction efforts for both sediment and contaminants will assist in further reducing the need for open-water placement of dredged material in Long Island Sound. The EPA expects that federal, state and local agencies tasked with regulating those discharges into the watersheds tributary to Long Island Sound will exercise their authority under various statues and regulations in a continuing effort to reduce the flow of

sediments and contaminants into state waterways and harbors.

B. Procedures

The Long Island Sound Regional Dredging Team (RDT) was formed to identify practicable alternatives to open-water disposal and recommend their use for projects proposed while the USACE was preparing the DMMP. EPA proposes to include restrictions that redefine the role of the RDT to ensure that the Standards described above are utilized in evaluating proposed dredging projects in Long Island Sound. EPA proposes restrictions that make explicit the RDT's purpose, geographic scope, membership, structure and general process as described below.

1. Purpose of the Long Island Sound Regional Dredging Team (LIS RDT)

The primary purpose of the LIS RDT is to reduce or eliminate wherever practicable the open-water disposal of dredged material in Long Island Sound. The LIS RDT will accomplish this by reviewing all proposed dredging projects subject to MPRSA (namely all federal projects and non-federal projects that generate greater than 25,000 cubic yards) to assess whether there are practicable alternatives to open-water disposal, by recommending that any available alternative(s) to open-water disposal be utilized for the maximum volume of dredged material practicable, and to provide documented findings and recommendations to USACE on these points so that the USACE and the EPA can consider the LIS RDT's recommendations. The LIS RDT should review the alternatives analysis for all projects submitted to help ensure that available alternatives as described in the DMMP for each harbor and dredging center have been thoroughly evaluated and are implemented where practicable. While the LIS RDT will conduct project reviews and make submissions and recommendations to the USACE, the LIS RDT will not supplant the regulatory obligations or authorities of participant agencies under the MPRSA, CWA, CZMA or other applicable laws.

Other purposes of the LIS RDT include: Serving as a forum for continuing exploration of new beneficial use alternatives to open-water disposal; promoting the use of such alternatives; and suggesting approaches for cost-sharing opportunities. For example, the LIS RDT could further investigate and develop opportunities for approving and funding long-term regional Confined Disposal Facilities which could accommodate suitable and unsuitable dredged material and provide environmental and social benefits such as parkland and habitat once filled and closed.

The LIS RDT and its member agencies should also assist USACE and EPA in continuing a number of long term activities to continue the environmentally sound implementation of dredging and dredged material management in Long Island Sound. These activities include supporting USACE's dredged material tracking system, supporting USACE's DAMOS (Disposal Area Monitoring System) program and related efforts to study the long-term impacts of open-water placement, and promoting opportunities for beneficial use of clean, parent marine sediments often generated in the development of CAD cells.

2. Geographic Scope

The geographic range of the LIS RDT will include all of Long Island Sound and adjacent waters landward of the seaward edge of the territorial sea (three mile limit) or, in other words, from Throgs Neck to a line three miles east of the baseline across western Block Island Sound. These boundaries would encompass all harbors and areas included in the DMMP except Block Island. The WLDS, CLDS, and ELDS would all be within the RDT's purview.

3. Membership

The LIS RDT should include representatives from affected federal and state government organizations. EPA anticipates that federal participation would include EPA Regions 1 & 2; the New England and New York Districts and the North Atlantic Division of the USACE and the National Oceanic and Atmospheric Administration. EPA encourages the participation of the U.S. Navy, the U.S. Coast Guard and the U.S. Fish & Wildlife Service. EPA expects that the states of Connecticut, New York and Rhode Island would be participants through their environmental agencies, coastal zone management programs and relevant port authorities. EPA requests that, to the extent possible, member organizations will provide sufficient funding to enable their active participation in the LIS RDT.

4. Structure and Process

EPA proposes that the specific details for structure (*e.g.,* chair, committees, working groups) and process (*e.g.,* how projects come before the LIS RDT, coordination with other entities) be left for the LIS RDT to determine and allowed to evolve as best accomplishes the team's purpose.

The LIS RDT is encouraged to establish and maintain cooperative working relationships with other Long Island Sound-based organizations (*e.g.,* the Long Island Sound Study's Science and Technical Advisory Committee, non-governmental organizations, relevant university-based programs) so that relevant scientific, program and policy information is effectively shared and resources are leveraged to the maximum extent.

VII. Proposed Action

EPA is proposing this rule to designate the ELDS for the purpose of providing an environmentally sound, open-water disposal option for possible use in managing dredged material from harbors and navigation channels in eastern Long Island Sound and its vicinity in the states of Connecticut, New York, and Rhode Island. Without this dredged material disposal site designation, there will be no open-water disposal site available in the eastern region of Long Island Sound after December 23, 2016. In developing the DMMP, described previously in several sections, the USACE conducted a ''dredging needs'' assessment that estimated that a total volume of 22.6 mcy of dredged material that from the eastern region of Long Island Sound over the 30-year planning horizon.

The site designation process has been conducted consistent with the requirements of the MPRSA, CWA, NEPA, CZMA, and other applicable federal and state statutes and regulations. The basis for this federal action is further described in a DSEIS that identifies EPA designation of the ELDS as the preferred alternative. The DSEIS also is being released for public comment in conjunction with the publication of this proposed rule. Upon completion of the public comment period and EPA's consideration of all comments received, EPA will publish a final Supplemental Environmental Impact Statement (FSEIS) specifying a preferred alternative, and a final rule that will serve as EPA's Record of Decision (ROD) in the NEPA process.

The ELDS is subject to management and monitoring protocols to prevent the occurrence of unacceptable adverse environmental impacts. These protocols are spelled out in a SMMP for the site. The SMMP is included as Appendix I to the DSEIS. Under 40 CFR 228.3(b), the Regional Administrator of EPA Region 1 is responsible for the overall management of this site. As previously explained, the designation of these disposal sites does not constitute or imply EPA's approval of open-water disposal at either site of dredged material from any specific project. Disposal of dredged material will not be

allowed at the ELDS until the proposed disposal operation first receives proper authorization from the USACE under MPRSA section 103. In addition, any such authorization by the Corps is subject to EPA review under MPRSA section 103(c), and EPA may condition or ''veto'' the authorization as a result of such review in accordance with MPRSA section 103(c). In order to properly obtain authorization to dispose of dredged material at the ELDS disposal site under the MPRSA, the dredged material proposed for disposal must first satisfy the applicable criteria for testing and evaluating dredged material specified in EPA regulations at 40 CFR part 227, and it must be determined in accordance with EPA regulations at 40 CFR part 227, subpart C, that there is a need for open-water disposal (*i.e.,* that there is no practicable dredged material management alternative to open-water disposal with less adverse environmental impact). In addition, any proposal to dispose of dredged material under the MPRSA at the designated site will need to satisfy all the site Restrictions included in the final rule as part of the site designations. *See* 40 CFR 228.8 and 228.15(b)(6).

IX. Statutory and Executive Order Reviews

1. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a significant regulatory action, as defined in the Executive Order, and was therefore not submitted to the Office of Management and Budget (OMB) for review.

2. Paperwork Reduction Act (PRA)

This action does not impose an information collection burden under the PRA because it would not require persons to obtain, maintain, retain, report or publicly disclose information to or for a federal agency.

3. Regulatory Flexibility Act (RFA)

This action will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (RFA). The amended restrictions in this proposed rule are only relevant for dredged material disposal projects subject to the MPRSA. Non-federal projects involving 25,000 cubic yards or less of material are not subject to the MPRSA and, instead, are regulated under CWA section 404. This action will, therefore, have no effect on such projects. ''Small entities'' under the RFA are most likely to be involved with smaller projects not covered by the MPRSA. Therefore, EPA does not believe a substantial number of small entities will be affected by today's rule. Furthermore, the proposed amendments to the restrictions also will not have significant economic impacts on a substantial number of small entities because they primarily will create requirements to be followed by regulatory agencies rather than small entities, and will create requirements (*i.e.,* the standards and procedures) intended to help ensure satisfaction of the existing regulatory requirement (*see* 40 CFR 227.16) that practicable alternatives to the ocean dumping of dredged material be utilized.

4. Unfunded Mandates Reform Act (UMRA)

This action does not contain any unfunded mandate as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local or tribal governments or the private sector.

5. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Through the RDT process, however, this action will provide a vehicle for facilitating the interaction and communication of interested federal and state agencies concerned with regulating dredged material disposal in Long Island Sound.

6. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications as specified in Executive Order 13175 because the proposed restrictions will not have substantial direct effects on Indian tribes, on the relationship between the federal government and Indian Tribes, or the distribution of power and responsibilities between the federal government and Indian Tribes. EPA consulted with the potentially affected

Indian tribes in making this determination.

7. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

This action is not subject to Executive Order 13045 because it is not economically significant as defined in Executive Order 12866, and because the EPA does not believe the environmental health or safety risks addressed by this action present a disproportionate risk to children.

8. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution or Use

This action is not subject to Executive Order 13211, because it is not a significant regulatory action under Executive Order 12866.

9. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

10. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes the human health or environmental risk addressed by this action will not have a disproportionately high and adverse human health or environmental effects on minority, low-income or indigenous populations.

11. Executive Order 13158: Marine Protected Areas

Executive Order 13158 (65 FR 34909, May 31, 2000) requires EPA to ''expeditiously propose new science-based regulations, as necessary, to ensure appropriate levels of protection for the marine environment.'' EPA may take action to enhance or expand protection of existing marine protected areas and to establish or recommend, as appropriate, new marine protected areas. The purpose of the Executive Order is to protect the significant natural and cultural resources within the marine environment, which means, ''those areas of coastal and ocean waters, the Great Lakes and their connecting waters, and submerged lands thereunder, over which the United States exercises jurisdiction, consistent with international law.''

The EPA expects that this proposed rule will afford additional protection to the waters of Long Island Sound and organisms that inhabit them. Building on the existing protections of the MPRSA and the ocean dumping regulations, the proposed regulatory amendments are designed to promote the reduction of open-water disposal of dredged material in Long Island Sound.

12. Executive Order 13547: Stewardship of the Ocean, Our Coasts, and the Great Lakes

Section 6(a)(i) of Executive Order 13547, (75 FR 43023, July 19, 2010) requires, among other things, EPA and certain other agencies ''. . . to the fullest extent consistent with applicable law [to] . . . take such action as necessary to implement the policy set forth in section 2 of this order and the stewardship principles and national priority objectives as set forth in the Final Recommendations and subsequent guidance from the Council.'' The policies in section 2 of Executive Order 13547 include, among other things, the following: ''. . . it is the policy of the United States to: (i) protect, maintain, and restore the health and biological diversity of ocean, coastal, and Great Lakes ecosystems and resources; [and] (ii) improve the resiliency of ocean, coastal, and Great Lakes ecosystems, communities, and economies . . ..'' As with Executive Order 13158 (Marine Protected Areas), the overall purpose of the Executive Order is to promote protection of ocean and coastal environmental resources.

The EPA expects that this proposed rule will afford additional protection to the waters of Long Island Sound and the organisms that inhabit them. Building on the existing protections of the MPRSA and the ocean dumping regulations, the proposed regulatory amendments are designed to promote the reduction or elimination of open-water disposal of dredged material in Long Island Sound.

List of Subjects in 40 CFR Part 228

Environmental protection, Water pollution control.

Dated: April 18, 2016.

H. Curtis Spalding,

Regional Administrator, EPA Region 1—New England.

For the reasons stated in the preamble, title 40, Chapter I, of the *Code of Federal Regulations* is proposed to be amended as set forth below.

PART 228—CRITERIA FOR THE MANAGEMENT OF DISPOSAL SITES FOR OCEAN DUMPING

■ 1. The authority citation for part 228 continues to read as follows:

Authority: 33 U.S.C. 1412 and 1418.

■ 2. Section 228.15(b) is amended by revising paragraph (b)(4)(vi) introductory text and adding paragraph (b)(6) to read as follows:

§ 228.15 Dumping sites designated on a final basis.

* * * * *

(b) * * *

(4) * * *

(vi) *Restrictions:* The designation in this paragraph (b)(4) sets forth conditions for the use of the Central Long Island Sound (CLDS), Western Long Island Sound (WLDS) and Eastern Long Island Sound (ELDS) Dredged Material Disposal Sites. These conditions apply to all disposal subject to the MPRSA, namely, all federal projects and nonfederal projects greater than 25,000 cubic yards. All references to'' permittees'' shall be deemed to include the U. S. Army Corps of Engineers (USACE) when it is authorizing its own dredged material disposal from a USACE dredging project. The conditions for this designation are as follows:

* * * * *

(6) Eastern Long Island Sound Dredged Material Disposal Site (ELDS).

(i) *Location:* Corner Coordinates (NAD 1983) 41°15.81′ N., 72°04.57′ W.; 41°16.81′ N., 72°04.57′ W.; 41°16.81′ N., 72°07.22′ W.; 41°15.81′ N., 72°07.22′ W.

(ii) *Size:* A 2 by 1 nautical mile rectangular area, a size of 2 square nautical miles (nmi^2).

(iii) *Depth:* Ranges from 45 to 100 feet (14m to 30m).

(iv) *Primary use:* Dredged material disposal.

(v) *Period of use:* Continuing use.

(vi) *Restrictions:* See 40 CFR 228.15(b)(4)(vi)(A) through (N).

* * * * *

[FR Doc. 2016–09603 Filed 4–26–16; 8:45 am]

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MB Docket No. 16–93, RM–11764; DA 16–404]

Television Broadcasting Services; Tolleson, Arizona

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission has before it a petition for rulemaking filed by America 51, L.P. (America 51), the licensee of KPPX–TV, channel 51, Tolleson, Arizona, requesting the substitution of channel 31 for channel 51 at Tolleson. While the Commission

instituted a freeze on the acceptance of full power television rulemaking petitions requesting channel substitutions in May 2011, it subsequently announced that it would lift the freeze to accept such petitions for rulemaking seeking to relocate from channel 51 pursuant to a voluntary relocation agreement with Lower 700 MHz A Block licensees. America 51 has entered into such a voluntary relocation agreement with T-Mobile and states that operation on channel 31 would remove any potential interference with authorized wireless operations in the Lower 700 MHZ A Block adjacent to channel 51 in the Phoenix, Arizona market, permitting those operations to expand to additional consumers sooner than would otherwise be possible.

DATES: Comments must be filed on or before May 27, 2016, and reply comments on or before June 13, 2016.

ADDRESSES: You may submit comments, identified by MB Docket No. 16–93, by any of the following methods:

- *Federal Communications Commission's Web site: http://apps.fcc.gov/ecfs/.* Follow the instructions for submitting comments.
- *People with Disabilities:* Contact the FCC to request reasonable accommodations (accessible format documents, sign language interpreters, CART, etc.) by email: *FCC504@fcc.gov* or phone: 202–418–0530 or TTY: 202–418–0432.

FOR FURTHER INFORMATION CONTACT: Joyce Bernstein, *Joyce.Bernstein@fcc.gov,* Media Bureau, (202) 418–1647.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MB Docket No. 16–93, adopted April 14, 2016, and released April 14, 2016. The full text of this document is available for public inspection and copying during normal business hours in the FCC's Reference Information Center at Portals II, CY–A257, 445 12th Street SW., Washington, DC, 20554. This document will also be available via ECFS (*http://www.fcc.gov/cgb/ecfs/*). (Documents will be available electronically in ASCII, Word 97, and/or Adobe Acrobat.). To request this document in accessible formats (computer diskettes, large print, audio recording, and Braille), send an email to *fcc504@fcc.gov* or call the Commission's Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY). This document does not contain proposed information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, therefore, it does not contain any proposed information collection burden ''for small business concerns with fewer than 25 employees,'' pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4).

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding. Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts (other than *ex parte* presentations exempt under 47 CFR 1.1204(a)) are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1208 for rules governing restricted proceedings.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

Proposed Rule

For the reasons discussed in the preamble, the Federal Communications Commission proposes to amend 47 CFR part 73 as follows:

PART 73—RADIO BROADCAST SERVICES

■ 1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303, 334, 336, and 339.

§ 73.622 [Amended].

■ 2. Section 73.622(i), in the table under Arizona, is amended by adding channel 31 and removing channel 51 at Tolleson.

[FR Doc. 2016–09831 Filed 4–26–16; 8:45 am]

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MB Docket No. 16–123, RM–11766; DA 16–405]

Television Broadcasting Services; Cordele, Georgia

AGENCY: Federal Communications Commission.

ACTION: Proposed Rule.

SUMMARY: The Commission has before it a petition for rulemaking filed by Sunbelt-South TeleCommunications, Ltd. (Sunbelt), the licensee of WSST–TV, channel 51, Cordele, Georgia, requesting the substitution of channel 22 for channel 51 at Cordele. While the Commission instituted a freeze on the acceptance of full power television rulemaking petitions requesting channel substitutions in May 2011, it subsequently announced that it would lift the freeze to accept such petitions for rulemaking seeking to relocate from channel 51 pursuant to a voluntary relocation agreement with Lower 700 MHz A Block licensees. Sunbelt has entered into such a voluntary relocation agreement with T-Mobile USA, Inc. and states that operation on channel 22 would remove any potential interference with authorized wireless operations in the Lower 700 MHZ A Block adjacent to channel 51.

DATES: Comments must be filed on or before May 27, 2016, and reply comments on or before June 13, 2016.

ADDRESSES: Federal Communications Commission, Office of the Secretary, 445 12th Street SW., Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve counsel for petitioner as follows: Scott C. Cinnamon, Esq., Law Offices of Scott C. Cinnamon, PLLC, 1250 Connecticut Avenue NW., Suite 200, #144, Washington, DC 20036.

FOR FURTHER INFORMATION CONTACT: Joyce Bernstein, *Joyce.Bernstein@fcc.gov,* Media Bureau, (202) 418–1647.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MB Docket No. 16–123, adopted April 14, 2016, and released April 14, 2016. The full text of this document is available for public inspection and copying during normal business hours in the FCC's Reference Information Center at Portals II, CY–A257, 445 12th Street SW., Washington, DC 20554. BILLING CODE P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

49 CFR Parts 350

[Docket No. FMCSA–2014–0470]

RIN 2126–AB84

State Inspection Programs for Passenger-Carrier Vehicles

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Advance notice of proposed rulemaking (ANPRM).

SUMMARY: FMCSA announces that it is considering a rulemaking that would require the States to establish a program for annual inspections of commercial motor vehicles (CMVs) designed or used to transport passengers (or, passenger-carrying CMVs). FMCSA plans to assess the risks associated with improperly maintained or inspected passenger-carrying CMVs by reviewing the effectiveness of existing Federal inspection standards that are applicable to these types of vehicles, and considering the costs and benefits of having a mandatory inspection program.

DATES: Comments on this notice must be received on or before June 27, 2016.

ADDRESSES: You may submit comments identified by Docket Number FMCSA–2014–0470 using any of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* 202–493–2251.

To avoid duplication, please use only one of these four methods. See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: Ms. Loretta Bitner, Chief, Passenger Carrier Division at 202–385–2428, or via email at *Loretta.Bitner@dot.gov,* Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590–0001. If you have questions on viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION: This advanced notice of proposed rulemaking (ANPRM) is organized as follows:

I. Public Participation and Request for Comments

A. Submitting Comments

If you submit a comment, please include the docket number for this ANPRM (Docket No. FMCSA–2014–0470), indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov,* put the docket number, FMCSA–2014–0470, in the keyword box, and click ''Search.'' When the new screen appears, click on the ''Comment Now!'' button and type your comment into the text box on the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit.

If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

We will consider all comments and material received during the comment period and may develop a notice of proposed rulemaking (NPRM) based on your comments and other information and analysis.

B. Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov.* Insert the docket number, FMCSA–2014–0470, in the keyword box, and click ''Search.'' Next, click the ''Open Docket Folder'' button and choose the document to review. If you do not have access to the Internet, you may view the docket online by visiting the Docket Management Facility in Room W12–140 on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays.

C. Privacy Act

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in

the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

II. Legal Basis for the Rulemaking

Section 32710 of Motorcoach Enhanced Safety Act of 2012, enacted as part of MAP–21, requires that the Secretary of Transportation complete a rulemaking proceeding to consider requiring States to establish a program for annual inspections of vehicles designed or used to transport passengers (Pub. L. 112–141). As part of this proceeding, FMCSA must assess: (1) The risks associated with improperly maintained or inspected CMVs designed or used to transport passengers; (2) the effectiveness of existing Federal inspection standards in mitigating the risks associated with improperly maintained vehicles and ensuring safe and proper operation; and (3) the costs and benefits of a mandatory inspection program.

III. Background

Section 210 of the Motor Carrier Safety Act of 1984 required the Secretary of Transportation to prescribe standards for the inspection of CMVs. *See* 49 U.S.C. 31142. Under the Federal Motor Carrier Safety Regulations (FMCSR), a CMV, including qualifying passenger vehicles,[1] must be inspected at least once every 12 months. *See* 49 CFR 396.17. Subject to exceptions under § 396.23, a motor carrier must either conduct the inspection using its own qualified personnel or use a qualified third party that maintains appropriate facilities and employs inspectors qualified under § 396.19. In lieu of conducting a self-inspection or relying on a third-party inspector under § 396.17, a motor carrier may satisfy the FMCSR annual inspection requirement through a State or other jurisdiction's inspection program in accordance with § 396.23(a), provided that the inspection satisfies regulatory requirements.

However, in those States that have a mandatory State inspection requirement that the FMCSA Administrator has determined to be as effective as inspections under § 396.17, a motor carrier may rely on the State inspection process in order to satisfy the annual inspection requirement. 49 CFR 396.23(b)(1). A State inspection under this provision might be conducted by State personnel, at a State-authorized commercial facility, or by the motor carrier under the auspices of a State-authorized self-inspection program. *Id.* According to the latest list published by FMCSA, 22 States are among the governmental entities that have mandatory inspections programs recognized by the FMCSA Administrator. 73 FR 63040 (October 22, 2008).[2]

In 2012, Congress enacted legislation requiring the Secretary of Transportation to complete a rulemaking proceeding to consider requiring States to establish an annual inspection program as discussed under the Legal Basis section, above. Subsequently, FMCSA conducted three public listening sessions that provided interested parties with the opportunity to share their views on the merits of requiring State inspections of passenger CMVs.[3] Transcripts of these sessions are available in the public docket noted above. Stakeholders' presentations proved valuable in developing the questions posed in today's ANPRM. While the Agency received a broad range of comments, recurring themes included the costs of mandatory inspection programs, the value of a nation-wide uniform inspection standard, and the need for national training of inspectors to eliminate inconsistencies in how inspection standards are applied. Both industry and the enforcement community identified concerns about the cost of the inspection programs. Stakeholders' estimates of costs for program administration and individual inspections varied significantly. Industry stakeholders expressed concern about inconsistent inspections under existing programs.

Section 32710 of MAP–21 did not address the Agency's authority to require mandatory State inspection programs. While Congress has granted the Secretary broad regulatory authority over the interstate operation of CMVs, under Federalism principles and the 10th Amendment, the Federal government may not compel the States to enact or administer a Federal regulatory program (*New York* v. *United States,* 505 U.S. 144, 188 (1992)), or compel State officers to administer or enforce a Federal regulatory program (*Printz* v. *United States,* 521 U.S. 898, 935 (1997)). Thus, FMCSA assumes Congress intended that State participation would be required as a condition of receiving Federal funds. *See, e.g., South Dakota* v. *Dole,* 483 U.S. 203, 206–207 (1987). However, Congress neither established a new financial assistance program for funding State inspection programs nor specified what existing financial assistance program FMCSA might employ to incentivize States to adopt inspection programs. Thus, in posing its final question below, the Agency is seeking its State partners' views on how to implement and incentivize a required State inspection program, should the Agency propose such a program.

IV. Questions

FMCSA is considering a rulemaking under which States would establish a program for annual inspections of CMVs designed or used to transport passengers. The Agency will use information gathered through this ANPRM to quantify the economic benefits and costs of this action if it issues an NPRM. The Agency encourages parties with knowledge of the industry to provide information about the impact that such a rule would have on current regulations, operating costs, business practices, safety, and any other areas that would be affected by a rule requiring States to establish inspection programs.

FMCSA also requests responses to the following issues and questions. Again, whenever possible, commenters should provide data. FMCSA also encourages stakeholders to describe any applicable regulatory inspection process under which they operate. FMCSA recognizes that an individual commenter may choose to respond to all of the issues or only a subset, based on his or her interest or area of expertise.

[1] A CMV is defined, in part, for purposes of this regulation as a ''motor vehicle used on a highway in interstate commerce to transport passengers . . . when the vehicle—(1) [h]as a gross vehicle weight rating or gross combination weight rating, or gross vehicle weight or gross combination weight, of 4,536 kg (10,001 pounds) or more, whichever is greater; or (2) [i]s designed or used to transport more than 8 passengers (including the driver) for compensation; or (3) [i]s designed or used to transport more than 15 passengers, including the driver, and is not used to transport passengers for compensation . . .'' 49 CFR 390.5.

[2] At the time of publication, the list of State inspection programs determined comparable to, or as effective as, the FMCSA periodic inspection program included California, Connecticut, Hawaii, Illinois, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Texas, Utah, Vermont, Virginia, West Virginia, and Wisconsin. Other jurisdictions and agencies with approved programs are the District of Columbia, the Alabama LPG Board, the 10 Canadian Provinces, and the Yukon Territory. However FMCSA does not collect inspection data on passenger CMVs that are not subject to FMCSAs regulatory authority.

[3] The listening sessions were conducted at the American Bus Association Marketplace in St. Louis, Missouri on January 13, 2015, a United Motor Coach Association meeting in New Orleans, Louisiana on January 18, 2015, and a Commercial Vehicle Safety Alliance workshop in Jacksonville, Florida on April 14, 2015.

Existing State Mandatory Vehicle Inspection Programs for Passenger-Carrying Commercial Motor Vehicles (CMVs)

1. Does your State or the States in which you register your passenger-carrying CMV conduct mandatory inspections of such vehicles? Please indicate the State(s) in which your passenger-carrying CMVs are registered.

2. What vehicle types are included in the mandatory passenger-carrying CMV inspection program (*e.g.,* motorcoaches, school buses, mini-buses, 9–15 passenger vans, etc.) and which are not included?

3. If your State has a mandatory program, briefly describe your inspection procedures and indicate which vehicle components are inspected.

4. How many total inspections are performed by your State annually for each of the following types of vehicles?

a. Motorcoaches
b. School buses
c. Mini-buses
d. 9–15 passenger vans
e. Other

5. What is the estimated time required to complete each vehicle inspection?

6. What procedures are used to record the vehicle inspection?

7. If a vehicle does not pass an inspection, who addresses the issues? If it is done by someone other than the inspecting entity, is there a second inspection after the issues are addressed? On average, how many follow up inspections does it take to pass a vehicle?

8. Are mandatory vehicle inspections performed by State employees, by third-party inspectors authorized by the State, or by passenger carrier employees through a State-authorized self-inspection program?

9. If vehicle inspections are conducted by a State-authorized third party or by passenger-carrier employees authorized by the State, are there differences in safety outcomes between those conducted by State employees and those conducted by third-party inspectors or through a passenger carrier's State-authorized self-inspection facilities?

10. Are there any specific benefits or concerns related to using third-party inspectors or by others?

11. If inspections are conducted by third-party inspectors or by passenger carrier-employed mechanics or technicians, what oversight is or should be required?

12. Should self-inspection or third-party inspections be options for compliance with a mandatory State inspection?

13. How does/would the cost of inspections differ between those conducted by State employees or by third-party inspectors?

14. What might be other preferable options?

Measuring Effectiveness of Inspection Programs

15. Does your State have information on violations discovered during inspections that are attributable to maintenance issues that should have been found during a required vehicle inspection?

16. Has your State considered implementing a mandatory passenger-carrying CMV inspection program, but declined to do so? If so, what are your State's reasons for not implementing a program?

17. If your State imposes mandatory inspection of passenger-carrying CMVs, how is the effectiveness of that program measured?

18. What are the most common vehicle defects discovered during these mandatory vehicle inspections? What safety conclusions do you draw from the results of these inspections?

19. Has your State or organization collected data related to crashes, injuries, or fatalities attributable to improperly maintained or inspected passenger-carrying CMVs? If so, please provide summary information or links to detailed data associated with these areas.

20. Has the occurrence of passenger-carrying CMV-involved crashes, injuries, or fatalities before and after the implementation of a mandatory inspection requirement been evaluated? If so, please provide summary information or links to detailed data associated with these areas.

21. After a State inspection requirement was instituted, what changes were observed over time in the number of safety violations discovered during inspections, if any.

22. Do programs that inspect only a sample of vehicles have significantly different outcomes than those where all vehicles are inspected, please provide examples of how they differ?

Inspection Facilities and Locations

23. Where does your State conduct mandatory passenger-carrying CMV inspections (*e.g.,* State owned/leased facility, third party facility, carrier's place of business, or other type of facility)?

24. Where should mandatory passenger-carrying CMV inspections be performed?

25. If mandatory passenger-carrying CMV inspections are conducted at the carrier's place of business, what accommodations must be made to ensure appropriate access (*e.g.,* pits, lifts, etc.) to conduct full inspections of motorcoaches and other large passenger vehicles?

26. How does facility location or accessibility for mandatory inspections impact inspections or compliance?

27. What delays may the State experience in completing mandatory inspections (*e.g.* lack of sufficient number of inspection facilities)?

Costs

28. What is the cost per mandatory vehicle inspection to the carrier?

29. Do inspection fees differ based on the type of vehicle being inspected?

30. Do vehicle inspection fees differ based on location of the inspections?

31. How much does it cost the State to establish and run inspection programs on an annual basis?

32. If a vehicle does not pass an inspection, is there an additional cost for the second inspection?

33. If fees are collected by the State, does the State dedicate the revenue to the administration of the program?

Uniformity of Mandatory Vehicle Inspection Programs

34. What qualifications should be applicable to individuals authorized to perform mandatory passenger-carrying CMV inspections?

35. Should minimum training elements be required for passenger-carrying CMV inspections? If so, how much training should be required and who should administer the training?

36. What should be the minimum vehicle components inspected under a mandatory bus inspection program?

37. How does the existence of different vehicle inspection requirements among the States affect carrier business practices?

38. How might business practices change under a uniform mandatory bus inspection program?

Current Federal Standards

39. How effective are existing Federal standards for the inspection of passenger-carrying CMVs in (1) mitigating the risks associated with improperly maintained vehicles and (2) ensuring the safe and proper operating condition of the vehicles?

40. What is an effective and efficient way for the FMCSA to track inspected carriers to reduce burden on States and carriers?

Federal Authority

41. How should FMCSA incentivize the States to establish mandatory

passenger-carrying CMV inspection programs?

Issued under the authority of delegation in 49 CFR 1.87 on April 20, 2016.

T.F. Scott Darling, III,

Acting Administrator.

BILLING CODE 4910–EX–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 300

[Docket No. 160205084–6084–01]

RIN 0648–BF76

International Fisheries; Western and Central Pacific Fisheries for Highly Migratory Species; Purse Seine Observer Requirements, and Fishing Restrictions and Limits in Purse Seine and Longline Fisheries for 2016–2017

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS seeks comments on this proposed rule issued under authority of the Western and Central Pacific Fisheries Convention Implementation Act (WCPFC Implementation Act). The proposed rule would, first, require that U.S. purse seine vessels carry observers on fishing trips in the western and central Pacific Ocean (WCPO); second, establish restrictions in 2016 and 2017 on the use of fish aggregating devices (FADs) by U.S. purse seine vessels in the WCPO; and third, establish limits in 2016 and 2017 on the amount of bigeye tuna that may be captured by U.S. longline vessels in the WCPO. This action is necessary to satisfy the obligations of the United States under the Convention on the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (Convention), to which it is a Contracting Party.

DATES: Comments on the proposed rule must be submitted in writing by May 12, 2016.

ADDRESSES: You may submit comments on the proposed rule and the regulatory impact review (RIR) prepared for the proposed rule, identified by NOAA–NMFS–2016–0031, by either of the following methods:

- *Electronic submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal.

1. Go to *www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2016-0031,*

2. Click the ''Comment Now!'' icon, complete the required fields, and

3. Enter or attach your comments.

—OR—

- *Mail:* Submit written comments to Michael D. Tosatto, Regional Administrator, NMFS, Pacific Islands Regional Office (PIRO), 1845 Wasp Blvd., Building 176, Honolulu, HI 96818.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, might not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name and address), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

An initial regulatory flexibility analysis (IRFA) prepared under authority of the Regulatory Flexibility Act is included in the Classification section of the **SUPPLEMENTARY INFORMATION** section of this document.

Copies of the RIR and the programmatic environmental assessment (PEA) prepared for National Environmental Policy Act (NEPA) purposes are available at *www.regulations.gov* or may be obtained from Michael D. Tosatto, Regional Administrator, NMFS PIRO (see address above).

FOR FURTHER INFORMATION CONTACT: Tom Graham, NMFS PIRO, 808–725–5032.

SUPPLEMENTARY INFORMATION:

Background on the Convention

The Convention focuses on the conservation and management of fisheries for highly migratory species (HMS). The objective of the Convention is to ensure, through effective management, the long-term conservation and sustainable use of HMS in the WCPO. To accomplish this objective, the Convention established the Commission for the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (Commission or WCPFC), which includes Members, Cooperating Non-members, and Participating Territories (collectively referred to here as ''members''). The United States of America is a Member. American Samoa, Guam, and the Commonwealth of the Northern Mariana Islands (CNMI) are Participating Territories.

As a Contracting Party to the Convention and a Member of the Commission, the United States implements conservation and management measures and other decisions adopted by the Commission. The WCPFC Implementation Act (16 U.S.C. 6901 *et seq.*), authorizes the Secretary of Commerce, in consultation with the Secretary of State and the Secretary of the Department in which the United States Coast Guard is operating (currently the Department of Homeland Security), to promulgate such regulations as may be necessary to carry out the obligations of the United States under the Convention, including the decisions of the Commission. The WCPFC Implementation Act further provides that the Secretary of Commerce shall ensure consistency, to the extent practicable, of fishery management programs administered under the WCPFC Implementation Act and the Magnuson-Stevens Fishery Conservation and Management Act (MSA; 16 U.S.C. 1801 *et seq.*), as well as other specific laws (see 16 U.S.C. 6905(b)). The Secretary of Commerce has delegated the authority to promulgate regulations under the WCPFC Implementation Act to NMFS. A map showing the boundaries of the area of application of the Convention (Convention Area), which comprises the majority of the WCPO, can be found on the WCPFC Web site at: *www.wcpfc.int/doc/convention-area-map.*

Proposed Action

This proposed rule includes three elements, described in detail below, that would be included in regulations at 50 CFR part 300, subpart O. The three elements would implement specific provisions of the Commission's Conservation and Management Measure (CMM) 2015–01, ''Conservation and Management Measure for Bigeye, Yellowfin, and Skipjack Tuna in the Western and Central Pacific Ocean.'' CMM 2015–01 was adopted by the Commission at its twelth regular annual session, in December 2015, went into effect February 6, 2016, and is generally applicable for the 2016–2017 period. CMM 2015–01 is the latest in a series of CMMs devoted to the conservation and management of tropical tuna stocks, particularly stocks of bigeye tuna (*Thunnus obesus*), yellowfin tuna (*Thunnus albacares*), and skipjack tuna (*Katsuwonus pelamis*). CMM 2015–01

maintains the provisions of its predecessor, CMM 2014–01. The stated objective of CMM 2015–01 and several of its predecessor CMMs is to ensure that the stocks of bigeye tuna, yellowfin tuna, and skipjack tuna in the WCPO are, at a minimum, maintained at levels capable of producing their maximum sustainable yield as qualified by relevant environmental and economic factors. The CMM includes specific objectives for each of the three stocks: For each, the fishing mortality rate is to be reduced to or maintained at levels no greater than the fishing mortality rate associated with maximum sustainable yield.

1. Purse Seine Observer Requirements

CMM 2015–01 requires that each member of the Commission ensure that any of its flagged purse seine vessels fishing in the Convention Area between the latitudes of 20° N. and 20° S.—with the exception of fishing exclusively in waters under the jurisdiction of a single nation—carry a WCPFC observer. Additionally, CMM 2015–01 requires that each member of the Commission ensure that any purse seine vessel fishing exclusively in that member's waters in the Convention Area between the latitudes of 20° N. and 20° S. carry an observer (not necessarily a WCPFC observer). A WCPFC observer is an observer deployed from an observer program that has been authorized by the Commission to be part of the WCPFC Regional Observer Programme (see 50 CFR 300.211).

NMFS proposes to satisfy these provisions of CMM 2015–01 by prohibiting U.S. purse seine vessels from fishing in the Convention Area between the latitudes of 20° N. and 20° S. without a WCPFC observer on board, with the exception of fishing trips during which any fishing in the Convention Area takes place entirely within areas under the jurisdiction of a single nation other than the United States. Although U.S. purse seine vessels would be exempt from this requirement on trips in which fishing occurs only in the waters of a single foreign nation, it is expected that such foreign nations would require that U.S. purse seine vessels carry observers if fishing in their waters.

Currently, the Pacific Islands Forum Fisheries Agency (FFA) observer program, from which observers for the U.S. WCPO purse seine fleet have traditionally been deployed, and the NMFS observer program, among others, are authorized as part of the WCPFC Regional Observer Programme. Thus, observers deployed by these programs are considered WCPFC observers.

The Commission has had purse seine observer requirements similar to those in CMM 2015–01 since 2008, when it adopted CMM 2008–01. In recent years, NMFS has been implementing those requirements through the regulation at 50 CFR 300.215(c), which authorizes NMFS to direct owners and operators of fishing vessels to carry WCPFC observers on fishing trips during which the vessel at any time enters or is within the Convention Area. NMFS has been issuing directives annually, by letter to the owners of affected purse seine vessels. To help ensure that all affected parties have effective notice of the requirement, NMFS proposes here to establish specific observer requirements for purse seine vessels in the regulations, rather than by letter directives issued under 50 CFR 300.215(c).

2. Purse Seine FAD Restrictions for 2016–2017

Paragraphs 14–19 of CMM 2015–01 require WCPFC members to implement certain restrictions on the use of FADs by purse seine fishing vessels. All the restrictions are to be applied in the Convention Area between the latitudes of 20° N. and 20° S.

Under paragraph 14, Commission members are to prohibit their purse seine vessels from setting on FADs during the three-month period July through September in each of 2016 and 2017. Under paragraphs 15–18, members have the option of applying either: (1) Two additional FAD closure months (January and February in addition to July through September), or (2) in addition to the three-month FAD closure referenced in paragraph 14, limiting the total number of FAD sets by its vessels to the number listed in Column B of Attachment A of CMM 2015–01 (*i.e.,* for the United States, 2,202 sets for each of 2015 and 2016).

Importantly, however, under paragraph 15, the provisions regarding a fifth FAD closure month and the annual FAD set limits identified in paragraph 17 do not take effect until the Commission adopts arrangements to ensure that the action does not result in transferring, directly or indirectly, a disproportionate burden of conservation action onto small island developing states. The Commission has not yet adopted such arrangements. Until these decisions are taken, NMFS construes the obligations of the United States under paragraphs 15–18 to require either adding a fourth month, October, to the July-September FAD prohibition period in each of 2016 and 2017, or alternatively, limiting the number of FAD sets in each of those two years to 2,522 (from Column A of Attachment A of CMM 2015–01).

Finally, under paragraph 18, Commission members are to prohibit setting on FADs on the high seas in the Convention Area in 2017.

In accordance with paragraph 14 of the CMM, NMFS proposes to establish a FAD prohibition period from July through September in each of 2016 and 2017. Regarding the choice between an additional month of closure in October each year and a limit of 2,522 FAD sets each year, the Commission designed the CMM such that the two options were roughly equivalent in terms of their expected effects on the fishing mortality of bigeye tuna. The Commission provides no guidance to inform the selection of either option, which is left to the discretion of individual Commission members. After considering the objectives of CMM 2015–01, the expected economic impacts on U.S. fishing operations and the nation as a whole, and expected environmental and other effects, NMFS expects that for both 2016 and 2017, a limit of 2,522 FAD sets is likely to be somewhat more cost-effective than a FAD prohibition period in October. For this reason, NMFS is proposing to implement this option for 2016 and 2017. We specifically seek public comment on which option is more appropriate. A comparison of the two options' expected economic impacts on affected fishing businesses is provided in the IRFA.

Finally, this proposed rule would establish specific measures that NMFS deems necessary to implement the prohibition on FAD sets on the high seas for 2017, in accordance with paragraph 18 of CMM 2015–01. As currently defined in 50 CFR 300.211, a FAD is ''any artificial or natural floating object, whether anchored or not and whether situated at the water surface or not, that is capable of aggregating fish, as well as any object used for that purpose that is situated on board a vessel or otherwise out of the water. The definition of FAD does not include a vessel.'' Under this proposed rule, the regulatory definition of a FAD would not change. Although the definition of a FAD does not include a vessel, the restrictions during the FAD prohibition periods would include certain activities related to fish that have aggregated in association with a vessel, or drawn by a vessel, as described below.

In summary, this proposed rule would establish: FAD prohibition periods from July 1 through September 30 in each of 2016 and 2017; a limit of 2,522 FAD sets that may be made in each of 2016 and 2017; and specific measures that are

necessary to implement the United States' obligation to prohibit its purse seine vessels from setting on FADs on the high seas throughout 2017. The prohibitions applicable to these proposed FAD-related measures are in existing regulations at 50 CFR 300.223(b)(1)(i)–(v). Specifically, during the July–September FAD prohibition periods in each of 2016 and 2017, after the 2,522 FAD set limit is reached in either 2016 or 2017 (until the end of the respective calendar year), and on the high seas throughout 2017, owners, operators, and crew of fishing vessels of the United States would be prohibited from doing any of the following activities in the Convention Area in the area between 20° N. latitude and 20° S. latitude:

(1) Set a purse seine around a FAD or within one nautical mile of a FAD.

(2) Set a purse seine in a manner intended to capture fish that have aggregated in association with a FAD or a vessel, such as by setting the purse seine in an area from which a FAD or a vessel has been moved or removed within the previous eight hours, setting the purse seine in an area in which a FAD has been inspected or handled within the previous eight hours, or setting the purse seine in an area into which fish were drawn by a vessel from the vicinity of a FAD or a vessel.

(3) Deploy a FAD into the water.

(4) Repair, clean, maintain, or otherwise service a FAD, including any electronic equipment used in association with a FAD, in the water or on a vessel while at sea, except that: a FAD may be inspected and handled as needed to identify the FAD, identify and release incidentally captured animals, un-foul fishing gear, or prevent damage to property or risk to human safety; and a FAD may be removed from the water and if removed may be cleaned, provided that it is not returned to the water.

(5) From a purse seine vessel or any associated skiffs, other watercraft or equipment, submerge lights under water; suspend or hang lights over the side of the purse seine vessel, skiff, watercraft or equipment, or direct or use lights in a manner other than as needed to illuminate the deck of the purse seine vessel or associated skiffs, watercraft or equipment, to comply with navigational requirements, and to ensure the health and safety of the crew. These prohibitions would not apply during emergencies as needed to prevent human injury or the loss of human life, the loss of the purse seine vessel, skiffs, watercraft or aircraft, or environmental damage.

3. Longline Bigeye Tuna Catch Limits for 2016–2017

Under paragraphs 40–42 CMM 2015–01, Commission members are to limit catches by their longline vessels of bigeye tuna in the Convention Area to specified levels in each of 2016 and 2017. The applicable limits for the United States in 2016 and 2017 are 3,554 metric tons (mt) and 3,345 mt, respectively. In addition, paragraph 40 of the CMM states that any catch overage in a given year shall be deducted from the catch limit for the following year. This provision was also in CMM 2014–01, the predecessor to CMM 2015–01, so it pertains to the catch limit for 2016 as well as 2017. The Commission has not adopted limits for the longline fisheries of any of the U.S. Participating Territories, American Samoa, Guam, and the CNMI.

As stated above, the Commission-adopted limit for 2016 is 3,554 mt less any overage of the limit applicable in 2015. The limit for 2015 was 3,502 mt (see the final rule that established the 2015 limit at 80 FR 43634; published July 23, 2015). NMFS has not yet made the final estimate of bigeye tuna catches in 2015 with respect to the 2015 limit. NMFS anticipates being able to do so sometime in April of 2016. Because that estimate is not yet available, NMFS proposes here a limit for 2016 set at 3,554 mt, which assumes there was no overage in 2015. If NMFS later determines that there was an overage in 2015, NMFS would adjust the 2016 limit as follows: an amount equal to that overage will be subtracted from 3,554 mt to determine the annual limit for 2016. NMFS also proposes here a limit for 2017 set at 3,345 mt, which similarly assumes that there will be no overage of the 2016 limit. If NMFS, when it makes its final estimate of the 2016 catch in early 2017, determines that an overage has occurred, it would revise the 2017 limit accordingly.

These proposed limits for 2016 and 2017 would be applied in the manner set out in existing regulations at 50 CFR 300.224(b)–(f), which would not be revised by this proposed rule. Following is a description of the application of these existing regulations, subject to the proposed limits for 2016 and 2017.

The 2016 and 2017 longline bigeye tuna catch limits would apply only to U.S-flagged longline vessels operating as part of the U.S. longline fisheries. The limits would not apply to U.S. longline vessels operating as part of the longline fisheries of American Samoa, the CNMI, or Guam. Existing regulations at 50 CFR 300.224(b), (c), and (d) detail the manner in which longline-caught bigeye tuna is attributed among the fisheries of the United States and the U.S. Participating Territories.

Consistent with the basis for the limits prescribed in CMM 2015–01 and with previous rules issued by NMFS to implement bigeye tuna catch limits in U.S. longline fisheries, the catch limits would be measured in terms of retained catches—that is, bigeye tuna that are caught by longline gear and retained on board the vessel.

As set forth under the existing regulations at 50 CFR 300.224(e), if NMFS determines that the 2016 or 2017 limit is expected to be reached before the end of the respective calendar year, NMFS would publish a notice in the **Federal Register** to announce specific fishing restrictions that would be effective from the date the limit is expected to be reached until the end of that calendar year. NMFS would publish the notice of the restrictions at least 7 calendar days before the effective date to provide vessel owners and operators with advance notice. Periodic forecasts of the date the limit is expected to be reached would be made available to the public on the Web site of the NMFS Pacific Islands Regional Office, at *www.fpir.noaa.gov/SFD/SFD_regs_3.html,* to help vessel owners and operators plan for the possibility of the limit being reached.

As set forth under the existing regulations at 50 CFR 300.224(f), if the 2016 or 2017 limit is reached, the following restrictions would go into effect:

(*1) Retaining on board, transshipping, or landing bigeye tuna:* Starting on the effective date of the restrictions and extending through December 31 of the applicable year, it would be prohibited to use a U.S. fishing vessel to retain on board, transship, or land bigeye tuna captured in the Convention Area by longline gear, with three exceptions, as described below.

First, any bigeye tuna already on board a fishing vessel upon the effective date of the restrictions may be retained on board, transshipped, and/or landed, provided that they are landed within 14 days after the restrictions become effective. A vessel that had declared to NMFS pursuant to 50 CFR 665.803(a) that the current trip type is shallow-setting would not be subject to this 14-day landing restriction, so these vessels would be able to land bigeye tuna more than 14 days after the restrictions become effective.

Second, bigeye tuna captured by longline gear may be retained on board, transshipped, and/or landed if they are caught by a fishing vessel registered for use under a valid American Samoa

Longline Limited Access Permit, or if they are landed in American Samoa, Guam, or the CNMI. However, the bigeye tuna must not be caught in the portion of the U.S. EEZ surrounding the Hawaiian Archipelago, and must be landed by a U.S. fishing vessel operated in compliance with a valid permit issued under 50 CFR 660.707 or 665.801.

Third, bigeye tuna captured by longline gear may be retained on board, transshipped, and/or landed if they are caught by a vessel that is included in a valid specified fishing agreement under 50 CFR 665.819(d), in accordance with 50 CFR 300.224(f)(1)(iv).

(*2) Transshipping bigeye tuna to certain vessels:* To the extent authorized under the prohibition described above on ''retaining on board, transshipping, or landing bigeye tuna,'' starting on the effective date of the restrictions and extending through December 31 of the applicable year, it would be prohibited to transship bigeye tuna caught by longline gear in the Convention Area to any vessel other than a U.S. fishing vessel operated in compliance with a valid permit issued under 50 CFR 660.707 or 665.801.

(3) Fishing inside and outside the Convention Area: To help ensure compliance with the restrictions related to bigeye tuna caught by longline gear in the Convention Area, the proposed rule would establish two additional, related prohibitions that would go into effect starting on the effective date of the restrictions and extending through December 31 of the applicable year. First, vessels would be prohibited from fishing with longline gear both inside and outside the Convention Area during the same fishing trip, with the exception of a fishing trip that is in progress at the time the announced restrictions go into effect. In the case of a fishing trip that is in progress at the time the restrictions go into effect, the vessel still must land any bigeye tuna taken in the Convention Area within 14 days of the effective date of the restrictions, as described above. Second, if a vessel is used to fish using longline gear outside the Convention Area and enters the Convention Area at any time during the same fishing trip, the longline gear on the fishing vessel must be stowed in a manner so as not to be readily available for fishing while the vessel is in the Convention Area. These two prohibitions would not apply to vessels on declared shallow-setting trips pursuant to 50 CFR 665.803(a), or vessels operating for the purposes of this rule as part of the longline fisheries of American Samoa, Guam, or the CNMI. This second group includes vessels registered for use under valid American Samoa Longline Limited Access Permits; vessels landing their bigeye tuna catch in one of the three U.S. Participating Territories, so long as these vessels conduct fishing activities in accordance with the conditions described above; and vessels included in a specified fishing agreement under 50 CFR 665.819(d), in accordance with 50 CFR 300.224(f)(1)(iv).

Classification

The Administrator, Pacific Islands Region, NMFS, has determined that this proposed rule is consistent with the WCPFC Implementation Act and other applicable laws, subject to further consideration after public comment.

Executive Order 12866

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

Regulatory Flexibility Act (RFA)

An initial regulatory flexibility analysis (IRFA) was prepared, as required by section 603 of the RFA. The IRFA describes the economic impact this proposed rule, if adopted, would have on small entities. A description of the action, why it is being considered, and the legal basis for this action are contained in the **SUMMARY** section of the preamble and in other sections of this **SUPPLEMENTARY INFORMATION** section of the preamble. The analysis follows:

Estimated Number of Small Entities Affected

Small entities include ''small businesses,'' ''small organizations,'' and ''small governmental jurisdictions.'' The Small Business Administration (SBA) has established size standards for all major industry sectors in the United States, including commercial finfish harvesters (NAICS code 114111). A business primarily involved in finfish harvesting is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of $20.5 million for all its affiliated operations worldwide.

The proposed rule would apply to owners and operators of U.S. purse seine and longline vessels used for fishing for HMS in the Convention Area. The number of purse seine vessels that would be affected by the rule is approximated by the number with WCPFC Area Endorsements, which are the NMFS-issued authorizations required to use a vessel to fish commercially for HMS on the high seas in the Convention Area. As of March 2016 the number of purse seine vessels with WCPFC Area Endorsements was 41.

The proposed rule would apply to U.S. longline vessels used to fish for HMS in the Convention Area, except those operating as part of the longline fisheries of American Samoa, the CNMI, or Guam. The total number of affected longline vessels is approximated by the number of vessels with Hawaii Longline Limited Access Permits (issued under 50 CFR 665.13), although some such vessels might be able to operate as part of the longline fisheries of the U.S. Participating Territories and thus not be affected. Under the Hawaii longline limited access program, no more than 164 permits may be issued. During 2006–2012 the number of permitted vessels ranged from 130 to 145. The current number of permitted vessels (as of March 2016) is 113, but NMFS expects the number to increase to more typical historical levels soon, as vessel owners renew their permits, which expire in March each year. U.S. longline vessels based on the U.S. west coast without Hawaii Longline Limited Access Permits also could be affected by this proposed rule if they fish in the Convention Area. However, the number of such vessels is very small and fishing in the Convention Area by such vessels is rare, so it is expected that very few, if any, such vessels would be affected.

Most of the Hawaii longline fleet targets bigeye tuna using deep sets, and during certain parts of the year, portions of the fleet target swordfish using shallow sets. In the years 2005 through 2012, the estimated numbers of Hawaii longline vessels that actually fished ranged from 124 to 129. Of the vessels that fished, the number of vessels that engaged in deep-setting in the years 2005 through 2012 ranged from 122 to 129, and the number of vessels that engaged in shallow-setting ranged from 18 to 35. The number of vessels that engaged in both deep-setting and shallow-setting ranged from 17 to 35. The number of vessels that engaged exclusively in shallow-setting ranged from zero to two.

Based on limited available financial information about the affected fishing vessels and the SBA's small entity size standards for commercial finfish harvesters, and using individual vessels as proxies for individual businesses, NMFS believes that all the affected fish harvesting businesses—in both the purse seine and longline sectors—are small entities. NMFS used average per-vessel returns over recent years to estimate annual revenue, because gross receipts and ex-vessel price information

specific to the individual affected vessels are not available to NMFS.

For the affected purse seine vessels, 2013 is the most recent year for which complete catch data are available, and NMFS estimates that the average annual receipts over 2011–2013 for each purse seine vessel were less than the $20.5 million threshold for finfish harvesting businesses. The greatest was about $20 million, and the average was about $12 million. This is based on the estimated catches of each vessel in the purse seine fleet during that period, and indicative regional cannery prices developed by the FFA (available at *https://www.ffa.int/node/425*). Since 2013, cannery prices for purse seine-caught tuna have declined dramatically, so the vessels' revenues in 2014 and 2015 very likely declined as well.

For the longline fishery, the ex-vessel value of catches by the Hawaii longline fleet in 2012 was about $87 million. With 129 active vessels in that year, per-vessel average revenues were about $0.7 million, well below the $20.5 million threshold for finfish harvesting businesses.

Recordkeeping, Reporting, and Other Compliance Requirements

The recordkeeping, reporting, and other compliance requirements are discussed below for the proposed purse seine observer requirements, as described earlier in the **SUPPLEMENTARY INFORMATION** section of the preamble. Fulfillment of these requirements is not expected to require any professional skills that the affected vessel owners and operators do not already possess. The costs of complying with the proposed requirements are described below to the extent possible:

1. Purse Seine Observer Requirements

This element of the proposed rule would not establish any new reporting or recordkeeping requirements. The new compliance requirement would be for affected vessel owners and operators to carry WCPFC observers on all fishing trips in the Convention Area between the latitudes of 20° N. and 20° S., with the exception of fishing trips during which any fishing in the Convention Area takes place entirely within areas under the jurisdiction of a single nation other than the United States.

Fulfillment of this requirement is not expected to require any professional skills that the vessel owners and operators do not already possess. The expected costs of complying with this requirement are described below.

Under the South Pacific Tuna Treaty (SPTT), U.S. purse seine vessels operating in the Treaty Area (which is almost entirely in the Convention Area) are required to carry observers on about 20 percent of their fishing trips, which equates to roughly one trip per year per vessel. The observers required under the terms of the SPTT are deployed by the FFA, which acts as the SPTT Administrator on behalf of the Pacific Island Parties to the SPTT. The FFA observer program has been authorized to be part of the WCPFC observer program, so FFA-deployed observers are also WCPFC observers. Thus, in a typical year for a typical U.S. purse seine vessel, the cost of carrying observers to satisfy requirements under the SPTT can be expected to constitute 20 percent of the costs of the proposed requirement considered here. However, recent events associated with the SPTT make 2016 an atypical year. Because of late negotiations among the SPTT parties on the terms of access in foreign zones in the SPTT Area for 2016, no U.S. vessels were licensed under the SPTT until March of 2016, and thus none were authorized to fish in foreign zones or on the high seas in the Treaty Area until then. The terms of access for future years, and the SPTT itself, are uncertain. Given this uncertainty, an upper-bound estimate of the costs of compliance is provided here. For this purpose, it is assumed that fishing patterns in the Convention Area will be similar to the pattern in recent years, and that observer coverage under the terms of the SPTT will not contribute at all to the costs of complying with this proposed requirement.

Based on the U.S. purse seine fleet's fishing patterns in 2011–2013, it is expected that each vessel will spend about 252 days at sea per year, on average, with some vessels spending as many as about 354 days at sea per year.

The compliance costs of the proposed requirement can be broken into two parts: (1) The costs of providing food, accommodation, and medical facilities to observers (observer accommodation costs); and (2) the fees imposed by observer providers for deploying observers (observer deployment costs). Observer accommodation costs are expected to be about $20 per vessel per day-at-sea.

With respect to observer deployment costs, affected fishing companies could use observers from any program that has been authorized by the Commission to be part of the WCPFC Regional Observer Programme. In other words, they would not be required to use FFA observers, which they have traditionally used until now. Nonetheless, the costs of deploying FFA observers are probably good indications of observer deployment costs in the region generally, and they are used for this analysis. Based on budgets and arrangements for the deployment of observers under the FFA observer program, observer deployment costs are expected to be about $230 per vessel per day-at-sea. Thus, combined observer accommodation costs and observer deployment costs are expected to be about $250 per vessel per day-at-sea. For the average vessel, which is expected to spend about 252 days at sea per year, the total cost of compliance would therefore be about $63,000 per year. The cost for vessels that spend fewer days at sea would be accordingly less. At the other extreme, if a vessel spends 354 days at sea (the top of the range in 2011–2013), the total cost of compliance would be about $88,500 per year. Both of these figures are upper-bound estimates. If arrangements under the SPTT return to something like they have been in the past, then the numbers of days spent at sea on fishing trips in the Convention Area are likely be close to the levels described above, but the compliance costs would be about 20 percent less than estimated above because observer coverage under the SPTT would satisfy about 20 percent of the coverage required under this rule. If arrangements under the SPTT do not return to something like they have been in the recent past, then the number of days spent at sea on fishing trips in the Convention Area could be substantially lower than as described above, and the costs of complying with this proposed requirement would be accordingly less.

2. Purse Seine FAD Restrictions for 2016–2017

This element of the proposed rule would not establish any new reporting or recordkeeping requirements. The new requirement would be for affected vessel owners and operators to comply with the FAD restrictions described earlier in the **SUPPLEMENTARY INFORMATION** section of the preamble, including FAD prohibition periods from July 1 through September 30 in each of 2016 and 2017; limits of 2,522 FAD sets that may be made in each of 2016 and 2017; and prohibitions on specific uses of FADs on the high seas in 2017.

Compliance with these restrictions is not expected to require any professional skills that the vessel owners and operators do not already possess. The expected costs of complying with this requirement are described below to the extent possible.

The proposed FAD restrictions would substantially constrain the manner in which purse seine fishing could be conducted in the specified areas and periods in the Convention Area; in those

areas and during those periods, vessels would be able to set only on free, or ''unassociated,'' schools.

The costs associated with the proposed FAD restrictions cannot be quantitatively estimated, but the fleet's historical use of FADs can give a qualitative indication of the costs. In the years 1997–2013, the proportion of sets made on FADs in the U.S. purse seine fishery ranged from less than 30 percent in some years to more than 90 percent in others. Thus, the importance of FAD sets in terms of profits appears to be quite variable over time, and is probably a function of many factors, including fuel prices (unassociated sets involve more searching time and thus tend to bring higher fuel costs than FAD sets) and market conditions (*e.g.,* FAD fishing, which tends to result in greater catches of lower-value skipjack tuna and smaller yellowfin tuna and bigeye tuna than unassociated sets, might be more attractive and profitable when canneries are not rejecting small fish). Thus, the costs of complying with the FAD restrictions would depend on a variety of factors.

In 2010–2013, the last 4 years for which complete data are available and for which there was 100 percent observer coverage, the U.S. WCPO purse seine fleet made about 39 percent of its sets on FADs. During the months when setting on FADs was allowed, the percentage was about 58 percent. The fact that the fleet has made such a substantial portion of its sets on FADs indicates that prohibiting the use of FADs in the specified areas and periods could bring substantial costs and/or revenue losses.

To mitigate these impacts, vessel operators might choose to schedule their routine vessel and equipment maintenance during the FAD prohibition periods. However, the limited number of vessel maintenance facilities in the region might constrain vessel operators' ability to do this. It also is conceivable that some vessels might choose not to fish at all during the FAD prohibition periods rather than fish without the use of FADs. Observations of the fleet's behavior in 2009–2013, when FAD prohibition periods were in effect, do not suggest that either of these responses occurred to an appreciable degree. The proportion of the fleet that fished during the two- and three-month FAD prohibition periods of 2009–2013 did not appreciably differ from the proportion that fished during the same months in the years 1997–2008, when no FAD prohibition periods were in place.

The proposed FAD restrictions for 2016 would be similar to those in place in 2013–2015, except that there would be a limit of 2,522 FAD sets instead of the October FAD prohibition period that was in place in 2013–2015. 2016 is an unusual year in that SPTT licenses for 2016 were not issued until March, and the number of licensed vessels (34 as of March 2016) is fewer than in recent years. Thus, there has been relatively little purse seine fishing effort to date in the Convention Area in 2016. As a result, the expected amount of fishing effort in the Convention Area in 2016 is expected to be substantially less than in recent years. Consequently, the 2,522 FAD set limit would be less constraining than it would be if fishing effort were greater. For example, if total fishing effort in 2016 is 5,000 fishing days (about 62% of the average in 2010–2013), and the average number of sets made per fishing day is the same as in 2010–2013 (0.97), and the average number of all sets that are FAD sets (''FAD set ratio'') during periods when FAD sets are allowed is the same as in 2010–2013 (58%), and if fishing effort is evenly distributed through the year, then the number of FAD sets expected in 2016 under the proposed rule would be about 2,130, somewhat less than the limit of 2,522. Under the assumptions described above, the limit of 2,522 FAD sets would start to become constraining at a total fishing effort level of 5,900 fishing days.

The effects of the proposed FAD restrictions in 2017 would likely be greater than in 2016 because of the additional prohibition on setting on FADs on the high seas. The magnitude of that additional impact cannot be predicted, but as an indication of the additional impact, in 2010–2013, about 10 percent of the fleet's fishing effort occurred on the high seas. As in 2016, the impact of the 2,522 FAD set limit in 2017 would be primarily a function of the fleet's total level of fishing effort. Given the uncertainty related to the future of the SPTT, fishing effort in 2017 is very difficult to predict. As described above for 2016, the limit would start to become constraining at a fishing effort level of about 5,900 fishing days, but in 2017 that threshold would be applicable only in the portion of the Convention Area that is not high seas (again, about 10 percent of fishing effort has occurred on the high seas in recent years).

In summary, the economic impacts of the FAD prohibition periods and FAD set limits in 2016 and 2017 and the prohibition on using FADs on the high seas throughout 2017 cannot be quantified, but they could be substantial. Their magnitude would depend in part on market conditions, oceanic conditions, and the fleet's fishing effort in 2016 and 2017, which will be determined in part by any limits on allowable levels of fishing effort in foreign EEZs and on the high seas in the Convention Area.

3. Longline Bigeye Tuna Catch Limits for 2016–2017

This element of the proposed rule would not establish any new reporting or recordkeeping requirements. The new compliance requirement would be for affected vessel owners and operators to cease retaining, landing, and transshipping bigeye tuna caught with longline gear in the Convention Area if and when the bigeye tuna catch limit is reached in 2016 (3,554 mt) or 2017 (3,345 mt), for the remainder of the calendar year, subject to the exceptions and provisos described in other sections of this **SUPPLEMENTARY INFORMATION** section of the preamble. Although the restrictions that would come into effect in the event the catch limit is reached would not prohibit longline fishing, *per se,* they are sometimes referred to in this analysis as constituting a fishery closure.

Fulfillment of this requirement is not expected to require any professional skills that the vessel owners and operators do not already possess. The costs of complying with this requirement are described below to the extent possible.

Complying with this element of the proposed rule could cause foregone fishing opportunities and result in associated economic losses in the event that the bigeye tuna catch limit is reached in 2016 or 2017 and the restrictions on retaining, landing, and transshipping bigeye tuna are imposed for portions of either or both of those years. These costs cannot be projected quantitatively with any certainty. The proposed limits of 3,554 mt for 2016 and 3,345 mt for 2017 can be compared to catches in 2005–2008, before limits were in place. The average annual catch in that period was 4,709 mt. Based on that history, as well as fishing patterns in 2009–2015, when limits were in place, there appears to be a relatively high likelihood of the proposed limits being reached in 2016 and 2017. 2015 saw exceptionally high catches of bigeye tuna. Although final estimates for 2015 are not available, the limit of 3,502 mt was estimated to have been reached by, and the fishery was closed on, August 5 (see temporary rule published July 28, 2015; 80 FR 44883). The fishery was subsequently re-opened for vessels included in agreements with the governments of the CNMI and Guam under regulations implementing Amendment 7 to the Fishery Ecosystem

Plan for Pelagic Fisheries of the Western Pacific Region (Pelagics FEP) (50 CFR 665.819). If bigeye tuna catch patterns in 2016 or 2017 are like those in 2005–2008, the limits would likely be reached in the fourth quarter of the year. If catches are more accelerated, as in 2015, the limit could be reached in the third quarter of the year.

If the bigeye tuna limit is reached before the end of 2016 or 2017 and the Convention Area longline bigeye tuna fishery is consequently closed for the remainder of the calendar year, it can be expected that affected vessels would shift to the next most profitable fishing opportunity (which might be not fishing at all). Revenues from that next best alternative activity reflect the opportunity costs associated with longline fishing for bigeye tuna in the Convention Area. The economic cost of the proposed rule would not be the direct losses in revenues that would result from not being able to fish for bigeye tuna in the Convention Area, but rather the difference in benefits derived from that activity and those derived from the next best activity. The economic cost of the proposed rule on affected entities is examined here by first estimating the direct losses in revenues that would result from not being able to fish for bigeye tuna in the Convention Area as a result of the catch limit being reached. Those losses represent the upper bound of the economic cost of the proposed rule on affected entities. Potential next-best alternative activities that affected entities could undertake are then identified in order to provide a (mostly qualitative) description of the degree to which actual costs would be lower than that upper bound.

Upper bounds on potential economic costs can be estimated by examining the projected value of longline landings from the Convention Area that would not be made as a result of reaching the limit. For this purpose, it is assumed that, absent this proposed rule, bigeye tuna catches in the Convention Area in each of 2016 and 2017 would be 5,000 mt, slightly more than the average in 2005–2008. Under this scenario, imposition of limits of 3,554 mt for 2016 and 3,345 mt for 2017 would result in 29 percent and 33 percent less bigeye tuna being caught in those two years, respectively, than under no action. In the deep-set fishery, catches of marketable species other than bigeye tuna would likely be affected in a similar way if vessels do not shift to alternative activities. Assuming for the moment that ex-vessel prices would not be affected by a fishery closure, under the proposed rule, revenues in 2016 and 2017 to entities that participate exclusively in the deep-set fishery would be approximately 29 and 33 percent less than under no action in 2016 and 2017, respectively. Average annual ex-vessel revenues (from all species) per mt of bigeye tuna caught during 2005–2008 were about $14,190/mt (in 2014 dollars, derived from the latest available annual report on the pelagic fisheries of the western Pacific Region (Western Pacific Regional Fishery Management Council, 2014, Pelagic Fisheries of the Western Pacific Region: 2012 Annual Report. Honolulu, Western Pacific Fishery Management Council). If there are 128 active vessels in the fleet, as there were during 2005–2008, on average, then under the no-action scenario of fleet-wide anuual catches of 5,000 mt, each vessel would catch 39 mt/yr, on average. Reductions of 29 percent and 33 percent in 2016 and 2017, respectively, as a result of the proposed limits would be about 11 mt and 13 mt, respectively. Applying the average ex-vessel revenues (from all species) of $14,190 per mt of bigeye tuna caught, the reductions in ex-vessel revenue per vessel would be $160,000 and $183,000, on average, for 2016 and 2017, respectively.

In the shallow-set fishery, affected entities would bear limited costs in the event of the limit being reached (but most affected entities also participate in the deep-set fishery and might bear costs in that fishery, as described below). The cost would be about equal to the revenues lost from not being able to retain or land bigeye tuna captured while shallow-setting in the Convention Area, or the cost of shifting to shallow-setting in the eastern Pacific Ocean (EPO), which is to the east of 150 degrees W. longitude, whichever is less. In the fourth calendar quarters of 2005–2008, almost all shallow-setting effort took place in the EPO, and 97 percent of bigeye tuna catches were made there, so the cost of a bigeye tuna fishery closure to shallow-setting vessels would appear to be very limited. During 2005–2008, the shallow-set fishery caught an average of 54 mt of bigeye tuna per year from the Convention Area. If the proposed bigeye tuna catch limit is reached even as early as July 31 in 2016 or 2017, the Convention Area shallow-set fishery would have caught at that point, based on 2005–2008 data, on average, 99 percent of its average annual bigeye tuna catches. Imposition of the landings restriction at that point in 2016 or 2017 would result in the loss of revenues from approximately 0.5 mt (1 percent of 54 mt) of bigeye tuna, which, based on recent ex-vessel prices, would be worth no more than $5,000. Thus, expecting about 27 vessels to engage in the shallow-set fishery (the annual average in 2005–2012), the average of those potentially lost annual revenues would be no more than $200 per vessel. The remainder of this analysis focuses on the potential costs of compliance in the deep-set fishery.

It should be noted that the impacts on affected entities' profits would be less than impacts on revenues when considering the costs of operating vessels, because costs would be lower if a vessel ceases fishing after the catch limit is reached. Variable costs can be expected to be affected roughly in proportion to revenues, as both variable costs and revenues would stop accruing once a vessel stops fishing. But affected entities' costs also include fixed costs, which are borne regardless of whether a vessel is used to fish—*e.g.,* if it is tied up at the dock during a fishery closure. Thus, profits would likely be adversely impacted proportionately more than revenues.

As stated previously, actual compliance costs for a given entity might be less than the upper bounds described above, because ceasing fishing would not necessarily be the most profitable alternative opportunity when the catch limit is reached. Two alternative opportunities that are expected to be attractive to affected entities include: (1) Deep-set longline fishing for bigeye tuna in the Convention Area in a manner such that the vessel is considered part of the longline fishery of American Samoa, Guam, or the CNMI; and (2) deep-set longline fishing for bigeye tuna and other species in the EPO. These two opportunities are discussed in detail below. Four additional opportunities are: (3) Shallow-set longline fishing for swordfish (for deep-setting vessels that would not otherwise do so), (4) deep-set longline fishing in the Convention Area for species other than bigeye tuna, (5) working in cooperation with vessels operating as part of the longline fisheries of the Participating Territories—specifically, receiving transshipments at sea from them and delivering the fish to the Hawaii market, and 6) vessel repair and maintenance. A study by NMFS of the effects of the WCPO bigeye tuna longline fishery closure in 2010 (Richmond, L., D. Kotowicz, J. Hospital and S. Allen, 2015, Monitoring socioeconomic impacts of Hawai'i's 2010 bigeye tuna closure: Complexities of local management in a global fishery, Ocean & Coastal Management 106:87–96) did not identify the occurrence of any alternative activities that vessels

engaged in during the closure, other than deep-setting for bigeye tuna in the EPO, vessel maintenance and repairs, and granting lengthy vacations to employees. Based on those findings, NMFS expects that alternative opportunities (3), (4), (5) and (6) are probably unattractive relative to the first two alternatives, and are not discussed here in any further detail. NMFS recognizes that vessel maintenance and repairs and granting lengthy vacations to employees are two alternative activities that might be taken advantage of if the fishery is closed, but no further analysis of their mitigating effects is provided here.

Before examining in detail the two potential alternative fishing opportunities that would appear to be the most attractive to affected entities, it is important to note that under the proposed rule, once the limit is reached and the WCPO bigeye tuna fishery is closed, fishing with longline gear both inside and outside the Convention Area during the same trip would be prohibited (except in the case of a fishing trip that is in progress when the limit is reached and the restrictions go into effect). For example, after the restrictions go into effect, during a given fishing trip, a vessel could be used for longline fishing for bigeye tuna in the EPO or for longline fishing for species other than bigeye tuna in the Convention Area, but not for both. This reduced operational flexibility would bring costs, since it would constrain the potential profits from alternative opportunities. Those costs cannot be quantified.

A vessel could take advantage of the first alternative opportunity (deep-setting for bigeye tuna in a manner such that the vessel is considered part of the longline fishery of one of the three U.S. Participating Territories), by three possible methods: (a) Landing the bigeye tuna in one of the three Participating Territories, (b) holding an American Samoa Longline Limited Access Permit, or (c) being considered part of a Participating Territory's longline fishery, by agreement with one or more of the three Participating Territories under the regulations implementing Amendment 7 to the Pelagics FEP (50 CFR 665.819). In the first two circumstances, the vessel would be considered part of the longline fishery of the Participating Territory only if the bigeye tuna were not caught in the portion of the U.S. EEZ around the Hawaiian Islands and were landed by a U.S. vessel operating in compliance with a permit issued under the regulations implementing the Pelagics FEP or the Fishery Management Plan for U.S. West Coast Fisheries for Highly Migratory Species.

With respect to the first method of engaging in alternative opportunity 1 (1.a.) (landing the bigeye tuna in one of the Participating Territories), there are three potentially important constraints. First, whether the fish are landed by the vessel that caught the fish or by a vessel to which the fish were transshipped, the costs of a vessel transiting from the traditional fishing grounds in the vicinity of the Hawaiian Archipelago to one of the Participating Territories would be substantial. Second, none of these three locales has large local consumer markets to absorb substantial additional landings of fresh sashimi-grade bigeye tuna. Third, transporting the bigeye tuna from these locales to larger markets, such as markets in Hawaii, the U.S. west coast, or Japan, would bring substantial additional costs and risks. These cost constraints suggest that this alternative opportunity has limited potential to mitigate the economic impacts of the proposed rule on affected small entities.

The second method of engaging in the first alternative opportunity (1.b.) (having an American Samoa Longline Limited Access Permit), would be available only to the subset of the Hawaii longline fleet that has both Hawaii and American Samoa longline permits (dual permit vessels). Vessels that do not have both permits could obtain them if they meet the eligibility requirements and pay the required costs. For example, the number of dual permit vessels increased from 12 in 2009, when the first WCPO bigeye tuna catch limit was established, to 20 in both 2011 and 2012. The previously cited NMFS study of the 2010 fishery closure (Richmond et al. 2015) found that bigeye tuna landings of dual permit vessels increased substantially after the start of the closure on November 22, 2010, indicating that this was an attractive opportunity for dual permit vessels, and suggesting that those entities might have benefitted from the catch limit and the closure.

The third method of engaging in the first alternative opportunity (1.c.) (entering into an Amendment 7 agreement), was also available in 2011–2015 (in 2011–2013, under section 113(a) of Public Law 112–55, 125 Stat. 552 *et seq.,* the Consolidated and Further Continuing Appropriations Act, 2012, continued by Public Law 113–6, 125 Stat. 603, section 110, the Department of Commerce Appropriations Act, 2013; hereafter, ''section 113(a)''). As a result of agreements that were in place in 2011–2014, the WCPO bigeye tuna fishery was not closed in any of those four years because the annual limit for U.S. longline fisheries adopted by the WCPFC was not reached. In 2015 the fishery was closed in August but then reopened when agreements with the CNMI, and later with Guam, went into effect. Participation in an Amendment 7 agreement would likely not come without costs to fishing businesses. As an indication of the possible cost, the terms of the agreement between American Samoa and the members of the Hawaii Longline Association (HLA) in effect in 2011 and 2012 included payments totaling $250,000 from the HLA to the Western Pacific Sustainable Fisheries Fund, equal to $2,000 per vessel. It is not known how the total cost was allocated among the members of the HLA, so it is possible that the owners of particular vessels paid substantially more than or less than $2,000.

The second alternative opportunity (2) (deep-set fishing for bigeye tuna in the EPO), would be an option for affected entities only if it is allowed under regulations implementing the decisions of the Inter-American Tropical Tuna Commission (IATTC). Annual longline bigeye tuna catch limits have been in place for the EPO in most years since 2004. Since 2009, a bigeye tuna catch limit of 500 mt for 2016 has applied to U.S. longline vessels greater than 24 meters (m) in length (50 CFR 300.25), and the limits were reached in 2013 (November 11), 2014 (October 31), and 2015 (August 12). The highly seasonal nature of bigeye tuna catches in the EPO and the relatively high inter-annual variation in catches prevents NMFS from making a useful prediction of whether and when the limit in 2016 is likely to be reached. However, the trend in 2013–2015 suggests a relatively high likelihood of it being reached in 2016. If it is reached, this alternative opportunity would not be available for large longline vessels, which constitute about a quarter of the fleet. Currently there is no limit in place for 2017; the IATTC would have to take further action to adopt a limit for 2017, which NMFS would then need to implement.

Historical fishing patterns can provide an indication of the likelihood of affected entities making use of the opportunity of deep-setting in the EPO in the event of a closure in the WCPO. The proportion of the U.S. fishery's annual bigeye tuna catches that were captured in the EPO from 2005 through 2008 ranged from 2 percent to 22 percent, and averaged 11 percent. In 2005–2007, that proportion ranged from 2 percent to 11 percent, and may have been constrained by the IATTC-adoped

bigeye tuna catch limits established by NMFS (no limit was in place for 2008). Prior to 2009, most of the U.S. annual bigeye tuna catch by longline vessels in the EPO typically was made in the second and third quarters of the year; in 2005–2008 the percentages caught in the first, second, third, and fourth quarters were 14, 33, 50, and 3 percent, respectively. These data demonstrate two historical patterns—that relatively little of the bigeye tuna catch in the longline fishery was typically taken in the EPO (11 percent in 2005–2008, on average), and that most EPO bigeye tuna catches were made in the second and third quarters, with relatively few catches in the fourth quarter when the proposed catch limit would most likely be reached. These two patterns suggest that there could be substantial costs for at least some affected entities that shift to deep-set fishing in the EPO in the event of a closure in the WCPO. On the other hand, fishing patterns since 2008 suggest that a substantial shift in deep-set fishing effort to the EPO could occur. In 2009, 2010, 2011, 2012, 2013, and 2014, the proportions of the fishery's annual bigeye tuna catches that were captured in the EPO were about 16, 27, 23, 19, 36, and 36 percent, respectively, and most bigeye tuna catches in the EPO were made in the latter half of the calendar years.

The NMFS study of the 2010 closure (Richmond et al. 2015) found that some businesses—particularly those with smaller vessels—were less inclined than others to fish in the EPO during the closure because of the relatively long distances that would need to be travelled in the relatively rough winter ocean conditions. The study identified a number of factors that likely made fishing in the EPO less lucrative than fishing in the WCPO during that part of the year, including fuel costs and the need to limit trip length in order to maintain fish quality and because of limited fuel storage capacity.

In addition to affecting the volume of landings of bigeye tuna and other species, the proposed catch limits could affect fish prices, particularly during a fishery closure. Both increases and decreases appear possible. After a limit is reached and landings from the WCPO are prohibited, ex-vessel prices of bigeye tuna (*e.g.,* that are caught in the EPO or by vessels in the longline fisheries of the three U.S. Participating Territories), as well as of other species landed by the fleet, could increase as a result of the constricted supply. This would mitigate economic losses for vessels that are able to continue fishing and landing bigeye tuna during the closure. For example, the NMFS study of the 2010 closure (Richmond et al. 2015) found that ex-vessel prices during the closure in December were 50 percent greater than the average during the previous five Decembers. (It is emphasized that because it was an observational study, neither this nor other observations of what occurred during the closure can be affirmatively linked as effects of the fishery closure.)

Conversely, a WCPO bigeye tuna fishery closure could cause a decrease in ex-vessel prices of bigeye tuna and other products landed by affected entities if the interruption in the local supply prompts the Hawaii market to shift to alternative (*e.g.,* imported) sources of bigeye tuna. Such a shift could be temporary—that is, limited to 2016 and/or 2017—or it could lead to a more permanent change in the market (*e.g.,* as a result of wholesale and retail buyers wanting to mitigate the uncertainty in the continuity of supply from the Hawaii longline fisheries). In the latter case, if locally caught bigeye tuna fetches lower prices because of stiffer competition with imported bigeye tuna, then ex-vessel prices of local product could be depressed indefinitely. The NMFS study of the 2010 closure (Richmond et al. 2015) found that a common concern in the Hawaii fishing community prior to the closure in November 2010 was retailers having to rely more heavily on imported tuna, causing imports to gain a greater market share in local markets. The study found this not to have been borne out, at least not in 2010, when the evidence gathered in the study suggested that few buyers adapted to the closure by increasing their reliance on imports, and no reports or indications were found of a dramatic increase in the use of imported bigeye tuna during the closure. The study concluded, however, that the 2010 closure caused buyers to give increased consideration to imports as part of their business model, and it was predicted that tuna imports could increase during any future closure. To the extent that ex-vessel prices would be reduced by this action, revenues earned by affected entities would be affected accordingly, and these impacts could occur both before and after the limit is reached, and as described above, possibly after 2017.

The potential economic effects identified above would vary among individual business entities, but it is not possible to predict the range of variation. Furthermore, the impacts on a particular entity would depend on both that entity's response to the proposed rule and the behavior of other vessels in the fleet, both before and after the catch limit is reached. For example, the greater the number of vessels that take advantage—before the limit is reached—of the first alternative opportunity (1), fishing as part of one of the Participating Territory's fisheries, the lower the likelihood that the limit would be reached. The fleet's behavior in 2011 and 2012 is illustrative. In both those years, most vessels in the Hawaii fleet were included in a section 113(a) arrangement with the government of American Samoa, and as a consequence, the U.S. longline catch limit was not reached in either year. Thus, none of the vessels in the fleet, including those not included in the section 113(a) arrangements, were prohibited from fishing for bigeye tuna in the Convention Area at any time during those two years. The fleet's experience in 2010 (before opportunities under section 113(a) or Amendment 7 to the Pelagics FEP were available) provides another example of how economic impacts could be distributed among different entities. In 2010 the limit was reached and the WCPO bigeye tuna fishery was closed on November 22. As described above, dual permit vessels were able to continue fishing outside the U.S. EEZ around the Hawaiian Archipelago and benefit from the relatively high ex-vessel prices that bigeye tuna fetched during the closure.

In summary, based on potential reductions in ex-vessel revenues, NMFS has estimated that the upper bound of potential economic impacts of the proposed rule on affected longline fishing entities could be roughly $160,000 per vessel, on average, in 2016 and $183,000 per vessel, on average, in 2017. The actual impacts to most entities are likely to be substantially less than those upper bounds, and for some entities the impacts could be neutral or positive (*e.g.,* if one or more Amendment 7 agreements are in place in 2016 and 2017 and the terms of the agreements are such that the U.S. longline fleet is effectively unconstrained by the catch limits).

Disproportionate Impacts

As indicated above, all affected entities are believed to be small entities, so small entities would not be disproportionately affected relative to large entities. Nor would there be disproportionate economic impacts based on home port.

Purse seine vessels would be impacted differently than longline vessels, but whether the impacts would be disproportional between the two gear types cannot be determined.

For the longline sector, as described above, there could be disproportionate impacts according to vessel type and size and the type of fishing permits

held. A vessel with both a Hawaii Longline Limited Access Permit and an American Samoa Longline Limited Access Permit would be considered part of the American Samoa longline fishery (except when fishing in the U.S. EEZ around the Hawaiian Archipelago), so it would not be subject to the proposed catch limits. Because the EPO bigeye tuna catch limit for 2016 applies only to vessels greater than 24 m in length, in the event that the WCPO bigeye tuna fishery is closed and the 500 mt limit is reached in the EPO, only vessels 24 m or less in length would be able to take advantage of the alternative opportunity of deep-setting for bigeye tuna in the EPO. On the other hand, smaller vessels can be expected to find it more difficult, risky, and/or costly to fish in the EPO during the relatively rough winter months than larger vessels. If there are any large entities among the affected entities, and if the vessels of the large entities are larger than those of small entities, then it is possible that small entities could be disproportionately affected relative to large entities.

Duplicating, Overlapping, and Conflicting Federal Regulations

NMFS has not identified any Federal regulations that duplicate, overlap with, or conflict with the proposed regulations.

Alternatives to the Proposed Rule

NMFS has sought to identify alternatives that would minimize the proposed rule's economic impact on small entities (''significant alternatives''). Taking no action could result in lesser adverse economic impacts than the proposed action for affected entities in the purse seine and longline fisheries (but as described below, for some affected longline entities, the proposed rule could be more economically beneficial than no-action), but NMFS does not prefer the no-action alternative, because it would be inconsistent with the United States' obligations under the Convention. Alternatives identified for each of the three elements of the proposed rule are discussed below.

1. Purse Seine Observer Requirements

NMFS has not identified any significant alternatives to the proposed purse seine observer requirements that would comport with U.S. obligations to implement the Commission decisions regarding observer coverage.

2. Purse Seine FAD Restrictions for 2016–2017

NMFS considered in detail one set of alternatives to the proposed restrictions on the use of FADs. Under CMM 2015–01, the United States could use either of two options in either of 2016 and 2017 (in addition to the three-month FAD closure periods in both years and the prohibition on FAD sets on the high seas in 2017). One option is a fourth-month FAD prohibition period, in October. The second option, proposed in this rule, is an annual limit of 2,522 FAD sets. The relative effects of the two options would depend on the total amount of fishing effort exerted by the U.S. purse seine fleet in the Convention Area in a given year. If total fishing effort is relatively high, an October FAD prohibition period would likely allow for more FAD sets than a limit of 2,522 FAD sets, and thus likely cause lesser adverse impacts. The opposite would be the case for relatively low levels of total fishing effort. For example, given the fleet's recent historical average FAD set ratio of 58 percent when FAD-setting is allowed (2010–2013), and assuming an even distribution of sets throughout the year, the estimated ''breakeven'' point between the two options is 6,502 total sets for the year. The levels of fishing effort in 2016 and 2017 are very difficult to predict; they will be determined largely by the level of participation in the fishery (number of vessels) and any limits imposed on fishing effort. Fishing effort in foreign zones and on the high seas in the SPTT Area is likely to be limited by the terms of arrangements under the SPTT. Fishing effort elsewhere in the Convention Area (*e.g.,* in the U.S. EEZ and on the high seas outside the Treaty Area) would be constrained by any limits established by NMFS to implement the provisions of CMM 2015–01. NMFS has not yet established or proposed any such limits for 2016 or 2017, and cannot speculate what limits it might propose, but a point of reference are the limits that were in place in 2009–2015. Those limits applied to the Effort Limit Area for Purse Seine, or ELAPS, which consists of all areas of high seas and U.S. exlusive economic zone in the Convention Area between the latitudes of 20° N. and 20° S. The limits in 2009–2013 were 2,588 fishing days per year. The limits in 2014–2015 were 1,828 fishing days per year. With respect to numbers of vessels and allowable fishing effort limits under the SPTT, 2016 is an unusual year in that SPTT licenses for 2016 were not issued until March, and the number of licensed vessels (34 as of March 2016) is fewer than in recent years. Thus, there has been relatively little purse seine fishing effort to date in the Convention Area in 2016, and NMFS expects that total fishing effort in 2016 is likely to be less than 6,502 sets (the estimated breakeven point between the two options). For reference, the average number of sets made annually in 2010–2013, when an average of 38 vessels were active in the fishery, was 7,835. The average number of fishing days made annually in 2010–2013 was 8,030, so the average number of sets made per fishing day was 0.97. Predicting the situation for 2017 is even more difficult than for 2016, but current circumstances suggest that participation in 2017 could be less than in recent years. Also, because setting on FADs on the high seas would be prohibited in 2017 under this proposed rule, the estimated breakeven point of 6,502 total sets applies not everywhere in the Convention Area, but only those portions that are not high seas. Assuming that about 10 percent of fishing effort takes place on the high seas, as in 2010–2013, the breakeven point for the Convention Area as a whole is about 7,224 total sets. Assuming 0.97 sets per fishing day, on average, as occurred in 2010–2013, this equates roughly to 7,371 fishing days. This is slightly less than the average annual fishing effort in 2010–2013 (7,835 sets; 8,030 fishing days), but again, given current circumstances and uncertainty surrounding the future of the SPTT, NMFS expects that total fishing effort in 2017 is likely to be less than that breakeven level. Based on the above expectations and assumptions for conditions in 2016 and 2017, an annual limit of 2,522 FAD sets is likely to have lesser adverse impacts on fishing businesses than a FAD prohibition period in October, in both 2016 and 2017, and NMFS prefers the proposed action for that reason.

3. Longline Bigeye Tuna Catch Limits

NMFS has not identified any significant alternatives to this element of the proposed rule, other than the no-action alternative.

Administrative practice and procedure, Fish, Fisheries, Fishing, Marine resources, Reporting and recordkeeping requirements, Treaties.

Dated: April 22, 2016.

Eileen Sobeck,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 300 is proposed to be amended as follows:

PART 300—INTERNATIONAL FISHERIES REGULATIONS

■ 1. The authority citation for 50 CFR part 300, continues to read as follows:

Authority: 16 U.S.C. 951 *et seq.,* 16 U.S.C. 1801 *et seq.,* 16 U.S.C. 5501 *et seq.,* 16 U.S.C. 2431 *et seq.,* 31 U.S.C. 9701 *et seq.*

■ 2. In § 300.222, add paragraph (ww) to read as follows:

§ 300.222 Prohibitions.

* * * * *

(ww) Fail to carry an observer as required in § 300.223(e).

* * * * *

■ 3. In § 300.223:

■ a. Revise paragraph (b)(1) introductory text and paragraphs (b)(2)(i) and (ii); and

■ b. Add paragraphs (b)(2)(iii) and (iv), and paragraph (e) to read as follows:

§ 300.223 Purse seine fishing restrictions.

* * * * *

(b) * * *

(1) During the periods and in the areas specified in paragraph (b)(2) of this section, owners, operators, and crew of fishing vessels of the United States shall not do any of the activities described below in the Convention Area in the area between 20° N. latitude and 20° S. latitude:

* * * * *

(2) * * *

(i) From July 1 through September 30, 2016;

(ii) From July 1 through September 30, 2017;

(iii) During any period specified in a **Federal Register** notice issued by NMFS announcing that NMFS has determined that U.S. purse seine vessels have collectively made, or are projected to make, 2,522 sets on FADs in the Convention Area in the area between 20° N. latitude and 20° S. latitude in 2016 or 2017. The **Federal Register** notice will be published at least seven days in advance of the start of the period announced in the notice. NMFS will estimate and project the number of FAD sets using vessel logbooks, and/or other information sources that it deems most appropriate and reliable for the purposes of this section; and

(iv) In any area of high seas, from January 1 through December 31, 2017.

* * * * *

(e) *Observer coverage.*

(1) A fishing vessel of the United States may not be used to fish with purse seine gear in the Convention Area without a WCPFC observer on board. This requirement does not apply to fishing trips that meet either of the following conditions:

(i) The portion of the fishing trip within the Convention Area takes place entirely within areas under the jurisdiction of a single nation other than the United States; or,

(ii) No fishing takes place during the fishing trip in the Convention Area in the area between 20° N. latitude and 20° S. latitude.

(2) Owners, operators, and crew of fishing vessels subject to paragraph (e)(1) of this section must accommodate WCPFC observers in accordance with the provisions of § 300.215(c).

(3) Meeting either of the conditions in paragraphs (e)(1)(i) and (e)(1)(ii) of this section does not exempt a fishing vessel from having to carry and accommodate a WCPFC observer pursuant to § 300.215 or other applicable regulations.

* * * * *

■ 4. In § 300.224, revise paragraph (a) to read as follows:

§ 300.224 Longline fishing restrictions.

(a) *Establishment of bigeye tuna catch limits.*

(1) During calendar year 2016 there is a limit of 3,554 metric tons of bigeye tuna that may be captured in the Convention Area by longline gear and retained on board by fishing vessels of the United States.

(2) During calendar year 2017 there is a limit of 3,345 metric tons of bigeye tuna that may be captured in the Convention Area by longline gear and retained on board by fishing vessels of the United States.

* * * * *

Notices

Federal Register
Vol. 81, No. 81
Wednesday, April 27, 2016

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Newspapers for Publication of Legal Notices in the Eastern Region

AGENCY: Forest Service, USDA.

ACTION: Notice.

SUMMARY: Forest Service administrative review procedures at 36 CFR parts 218 and 219 require agency officials to publish legal notices in newspapers of record for certain opportunities to comment and opportunities to file pre-decisional objections. Forest Service officials in the Eastern Region will publish those legal notices in the newspapers listed in the **SUPPLEMENTARY INFORMATION** section of this notice. The Eastern Region consists of Illinois, Indiana, Ohio, Michigan, Minnesota, Missouri, New Hampshire, Maine, Pennsylvania, Vermont, New York, West Virginia, and Wisconsin. As provided in 36 CFR 218 and 36 CFR 219, the public shall be advised through **Federal Register** notice, of the newspaper of record to be utilized for publishing legal notice of comment and objection opportunities required by those Parts and their associated procedures. This notice fulfills that requirement for the Eastern Region.

DATES: Use of these newspapers for purposes of publishing legal notice of opportunities to comment on proposals subject under 36 CFR part 218 and 36 CFR part 219, and notices of the opportunity to object under 36 CFR part 218 and 36 CFR part 219 shall begin the first day after the date of this publication.

FOR FURTHER INFORMATION CONTACT: Michael Tighe; Writer/Editor; 626 E. Wisconsin Avenue, Milwaukee, WI 53202. Phone: (414) 297–3439.

SUPPLEMENTARY INFORMATION: Responsible Officials in the Eastern Region will publish legal notice regarding proposed land management plans as required under 36 CFR 219.16 and legal notice regarding an opportunity to comment on proposed projects as required under 36 CFR 218.24 in the newspapers that are listed in this section by Forest Service administrative unit. Additionally, Responsible Officials in the Eastern Region will publish legal notice of the opportunity to object to a proposed project under 36 CFR part 218 or to object to a land management plan developed, amended, or revised under 36 CFR part 219 in the legal notice section of the following newspapers. Additional notice regarding an opportunity to comment or object under the above mentioned regulations may be provided in other newspapers not listed below at the sole discretion of the Responsible Official. Legal notice published in a newspaper of record of an opportunity to object is in addition to direct notice to those who have requested it and to those who have participated in planning for the project or land management plan proposal.

The timeframe for comment on a proposed action shall be based on the date of publication of the legal notice of the proposed action in the newspaper of record. The timeframe for objection shall be based on the date of publication of the legal notice of the opportunity to object in the newspaper of record.

The following newspapers will be used to provide legal notice.

BILLING CODE 3411–15–P

DEPARTMENT OF AGRICULTURE

Forest Service

San Juan Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The San Juan Resource Advisory Committee (RAC) will meet in Durango Colorado. The committee is authorized under the Secure Rural Schools and Community Self-Determination Act (the Act) and operates in compliance with the Federal Advisory Committee Act. The purpose of the committee is to improve collaborative relationships and to provide advice and recommendations to the Forest Service concerning projects and funding consistent with Title II of the Act. RAC information can be found at the following Web site: *http://cloudapps-usda-gov.force.com/FSSRS/RAC_Page?id=001t0000002JcvFAAS.*

DATES: The meeting will be held at 9:00 a.m. on Tuesday, May 24, 2016.

All RAC meetings are subject to cancellation. For status of meeting prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

ADDRESSES: The meeting will be held at the San Juan Public Lands Center, Sonoran Meeting Rooms, 15 Burnett Court, Durango, Colorado.

Written comments may be submitted as described under **SUPPLEMENTARY INFORMATION**. All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received at San Juan Public Lands Center. Please call ahead to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Ann Bond, RAC Coordinator, by phone at 970–385–1219 or via email at *abond@fs.fed.us.*

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to:

1. Review previously approved projects, and

2. Review current project proposals to be recommended for funding under the Title II provision of the Secure Rural Schools Act.

The meeting is open to the public. The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should request in writing by May 10, 2016, to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the committee may file written statements with the committee staff before or after the meeting. Written comments and requests for time for oral comments must be sent to Ann Bond, RAC Coordinator, San Juan Public Lands Center, 15 Burnett Court, Durango, Colorado 81301; by email to *abond@fs.fed.us,* or via facsimile to 970–375–2331.

Meeting Accommodations: If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices, or other reasonable accommodation. For access to the facility or proceedings, please contact the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**. All reasonable accommodation requests are managed on a case by case basis.

Dated: April 21, 2016.

Richard Bustamante,

Acting San Juan National Forest Supervisor.

DEPARTMENT OF AGRICULTURE

Forest Service

RIN 0596–AC82

Ecosystem Restoration Policy

AGENCY: Forest Service, USDA.

ACTION: Notice of final directive.

SUMMARY: The Forest Service is issuing a permanent Ecosystem Restoration policy that replaces the Interim Directive, ''Ecological Restoration and Resilience Policy,'' in Forest Service Manual (FSM) 2020. The policy provides broad guidance for restoring ecosystems on National Forest System lands so that they are self-sustaining and, if subject to disturbances or environmental change, have the ability to reorganize and renew themselves. This policy recognizes the adaptive capacity of restored ecosystems, the role of natural disturbances, and uncertainty related to climate and other environmental factors.

DATES: This directive is in effect May 27, 2016.

FOR FURTHER INFORMATION CONTACT: Jim Alegria, Forest Management Staff, USDA Forest Service, Mailstop 1103, 1400 Independence Avenue SW., Washington, DC 20250; phone: 202–205–1787.

Individuals who use telecommunications devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Background and Need for the Directive

The need for reestablishing and retaining resilience of National Forest System lands and resources to achieve sustainable management and provide a broad range of ecosystem services is widely recognized, and the Forest Service has conducted restoration-related activities for decades. In 2008, the Chief of the Forest Service determined that a national policy was needed to ensure a consistent and cohesive approach to reestablish and retain ecological resilience on National Forest System lands and for National Forest System resources. An interim directive was first issued on September 22, 2008, and was reissued on March 3,

2010, August 30, 2011, May 13, 2013, November 17, 2014, and October 15, 2015.

A notice of availability of a proposed Ecological Restoration Policy (78 FR 56202) was published in the **Federal Register** on September 12, 2013 for public review and comment. A total of 16 comments were received: Five from non-affiliated members of the public, two from State government agencies, four from the timber industry, and five from non-governmental organizations.

The Agency believes that a comprehensive policy that includes standard definitions would provide a tool for sustaining the health, diversity, and productivity of the Nation's forests and grasslands to meet the needs of present and future generations. The Forest Service is amending its directives by establishing a new title in the Forest Service Manual, FSM 2020: Ecosystem Restoration. The ecosystem restoration directive applies to all National Forest System resource management programs. The intent is to provide a clear, science-based policy to guide management actions where restoration is appropriate.

This policy provides that ''ecosystem restoration'' can be carried out through the processes of ecological restoration and functional restoration. Ecological restoration typically focuses on recreating the ecosystem conditions that were present prior to European influences. However, some ecosystems may have been altered to such an extent that reestablishing pre-European conditions may be ecologically or economically infeasible. In such circumstances, management goals and activities should create functioning ecosystems in the context of changing conditions through the process called functional restoration.

Ecosystem restoration can be achieved by a range of management activities, such as forest thinning to reduce tree density, prescribed fire to reduce fuel buildup, replacing culverts to better connect streams, or fencing to restrict disturbances. Ecosystem restoration may include manipulating or protecting terrestrial and aquatic ecosystems to assist in their recovery or adaptation to changing environmental conditions. Monitoring and evaluation of restoration projects are essential adaptive management steps for achieving sustainable ecosystems. Ecosystem restoration is a process that can help to achieve the multiple-use mission of the Forest Service, but not all management activities on National Forests and Grasslands require a restoration objective. For example, hazardous fuels reduction to reduce wildfire risk to communities may require a silvicultural treatment that is not restoration. Additionally, not all NFS lands need to be restored. Restoration activities will complement management to maintain conditions in areas with ecological integrity. The Agency may incorporate restoration objectives to the extent that they are ecologically and economically feasible and support achieving desired conditions or management objectives including multiple uses and ecosystem services such as carbon storage, energy development, recreation use, livestock grazing, hazardous fuels reduction, soil formation, watershed, wildlife, and timber production conducted in accordance with applicable laws, regulations, and policies.

Restoration may be helpful in managing for climate change by maintaining carbon stocks provided by the national forests. The relationship between restoration and carbon is complex. The Forest Service manages carbon through managing the health and promoting the adaptive capacity of our forests in the face of frequent, intense, and severe disturbances. Management can also be designed to recover, maintain, and enhance carbon stocks, through restoration management practices. The Forest Service also maintains and restores carbon through treatment activities that restore the age and size-class patterns across the landscape. Some of the activities that the Forest Service undertakes for restoring resiliency and function in the National Forest System, such as thinning of forest stands and prescribed burning, can result in a release of carbon in the short term. In the long term, however, these activities should make the forest more resilient to disturbances such as wildfire, insects, and drought therefore reducing the risk to carbon stocks.

The expectation is that forest restoration treatments will lead to forest resilience and a lower probability of a catastrophic disturbance and that consequently, more carbon will continue to be sequestered than would otherwise occur without the treatment. How quickly the carbon pools sequester carbon depends on several factors including the amount of carbon removed or lost in the treatment, the productivity of the ecosystem, the site conditions, the climate variables following the treatment, and the stand structure. Due to the many variables and assumptions regarding post-treatment carbon capture, research on whether restoration increases carbon stocks is inconclusive. Some studies indicate that post-treatment forest stands never catch up to the carbon stocks in untreated stands. However, other studies have concluded that treated stands lose less overall carbon in subsequent wildfire events compared to untreated stands and that reductions in wildfire severity have a significant impact on future carbon pools. Other studies have demonstrated that forest harvesting can reduce atmospheric CO_2 if the carbon accounting considers avoided emissions from fossil fuels when biomass is used for energy, or the avoided emissions and carbon storage when long-lived harvested wood products are substituted for high embodied energy materials such as steel and concrete.

The Ecosystem Restoration policy has identical definitions for key terms that are in the 2015 National Forest System, Land Management Planning Directive (FSH 1909.12, zero code, section 05). By using identical definitions, the policy ensures that within the Agency, and in dealing with the public, terms will be used and understood in the same way. The terms and definitions are: Adaptation, adaptive capacity, adaptive management, carbon pool, carbon stocks, disturbance, disturbance regime, ecological restoration (see ''restoration—ecological''), functional restoration (see ''restoration—functional''), ecological integrity, ecosystem, ecosystem services, landscape, natural range of variation (NRV), resilience, stressors, and sustainability.

Some of the terms defined in 2015 National Forest System, Land Management Planning Directive (FSH 1909.12, zero code, section 05) such as ecological and functional restoration, natural range of variation and resilience, merit further discussion on how they interrelate to one another. In order to construct a desired future condition for an area, one should assess past and current conditions as well as how these conditions may change into the future. Ecological restoration focuses on reestablishing the composition, structure, pattern, and ecological processes necessary to facilitate terrestrial and aquatic ecosystem sustainability, resilience, and health under current and future conditions. Assessing current and potential future conditions should result in a detailed description of the composition, structure, pattern, and ecological processes of the ecosystem as it moves along an ecological trajectory through time. Moving along a trajectory means that ecosystems are not static and may have changing characteristics.

The desired future condition of an ecosystem should be informed by an assessment of spatial and temporal variation in ecosystem characteristics under historic disturbance regimes during a specified reference period. The

spatial and temporal variation of characteristics in the specified reference period is often called the natural range of variation (NRV). The NRV should be used to inform an understanding of ecosystem function and biophysical capability, the dynamic nature of ecosystems associated natural and current disturbance regimes, and potential responses to future environments resulting from climate change and increasing human uses. The NRV does not define a management target or desired condition; it provides context for understanding ecological integrity. In some situations, the desired future condition may be a restored ecosystem similar to pre-disturbance conditions where degradation and stressors are limited and minimal changes to environmental conditions are anticipated in the near future. In other situations, the desired future condition may be a restored ecosystem that departs from the NRV along a continuum from only slight to substantial but still retains some ecological components within the NRV.

Like ecological restoration, functional restoration is a process to restore degraded biotic and abiotic processes to facilitate the creation of a desired future condition. A functionally restored ecosystem, however, may look quite different than the NRV in terms of structure and composition, where the disparities cannot be easily changed because some threshold of degradation has been crossed or significant environmental drivers, such as climate or invasive species, that influenced structural and (especially) compositional development have changed. The desired outcome of a restoration treatment may incorporate concepts from both ecological and functional restoration. For example, ecological conditions for some native species, due to insects and diseases, are no longer functioning as they once functioned and cannot be restored to their previous state. There are invasive species that have become so established that they cannot be economically eradicated. Climate change may affect components of the ecosystem differently so that some components should be restored to within the NRV and others should not or cannot be restored. In these situations the objective should be to restore the abiotic and biotic processes even if the components diverge from the NRV.

Resilience is the ability of an ecosystem and its component parts to absorb, or recover from, the effects of disturbances through preservation, restoration, or improvement of its essential structures, functions, and redundancy of ecological patterns across the landscape. It is a characteristic of healthy ecosystems and a desired characteristic of a restored ecosystem.

Response to Comments on the Proposed Policy

Changes Between the Proposed and Final Policy

Based on external and internal comments, there were changes between the proposed and final policy. The major changes are listed below.

1. The title has changed from ''Ecological Restoration'' to ''Ecosystem Restoration'' in the final policy, to better align the title with the content of the final policy and the mission of the Agency.

2. The final policy adds consideration for the recovery, maintenance, and enhancement of carbon stocks associated with National Forest System lands.

3. The final policy does not change the definition of ecological restoration but does clarify the relationship of ecological restoration to functional restoration and resilience.

4. The final policy facilitates achieving long-term ecological sustainability and a broad range of ecosystem services and multiple uses to society in Objectives (FSM 2020.2).

5. The final policy uses key terms that are in the 2015 National Forest System, Land Management Planning Directive and uses the same definitions for those terms. (FSH 1909.12, zero code.

6. The final policy retains the summaries of the principal legal authorities for the policy FSM 2020.11, but now lists other statutes, without summaries, in FSM 2020.61.

7. The Executive Orders (FSM 2020.12) descriptions are eliminated and replaced with the citations to those Executive Orders in FSM 2020.63.

8. The agency removed most of FSM 2020.4 because it was redundant with the general delegations of authorities of FSM 1230. The Agency has concluded that the responsibilities for restoration belongs to those Agency employees who have the delegated authority to approve land and resource management plans, project plans, or other Forest Service activities.

9. Definitions of key terms were deleted in the final policy and replaced with a reference to the definitions in planning rule (36 CFR 219.19) and planning handbook (FSH 1909.12, Zero Code chapter, section 05).

General Comments on the Proposed Policy

Comment: Respondents questioned how the directive will help achieve national forest management objectives or how not having the directive will prevent achieving national forest management objectives. Others questioned how the directive would increase Agency effectiveness, they questioned the need for a permanent ecological restoration policy, and they questioned why there is no attempt to prioritize ecological restoration within the context of relevant laws or ecosystem components.

Response: Restoration spans a number of initiatives in various program areas, including the invasive species strategy; recovery of areas affected by high-severity fires, hurricanes, and other catastrophic disturbances; fish habitat restoration and remediation; riparian area restoration; conservation of threatened, endangered, and sensitive species; and restoration of impaired watersheds and large-scale watershed restoration projects. There was no framework to unite these various program-specific initiatives with cohesive policies and definitions. While restoration has been a long-standing Agency practice, even without a restoration policy, a cohesive policy is expected to increase the Agency's efficiency in achieving management objectives. The authority for restoring National Forest System lands derives from laws enacted by Congress that define the purpose of national forests and grasslands and direct the Forest Service to administer and manage the lands for these purposes. The major authorities are cited in FSM 2020.1. The prioritization of ecological restoration is guided by the responsible official, which is usually the forest supervisor or district ranger.

Comment: Another respondent asked how this directive will affect implementation of the 2012 planning rule.

Response: The 2012 planning rule emphasizes restoration as it guides the Forest Service in the development, amendment, and revision of land management plans. The policies, ecological principles, and definitions in this final directive are consistent with the planning rule and will also guide activities on those units that have not yet developed, amended, or revised land management plans under the planning rule, and it provides further guidance on ecosystem restoration.

Comment: Some respondents felt that the term ''restoration'' was too limiting and that it may not be economically or ecologically possible to achieve NRV due to factors such as climate change or severely degraded environments. The terms ''ecological integrity'' and ''NRV'' are past-focused and ignore adaptation

to future climate and anthropogenic stressors.

Response: The policy has been clarified in the final directive. Emphasis has been placed on returning an impaired ecosystem to a condition of appropriate complexity and increased resilience through ecosystem restoration or functional restoration. The aim of both ecological and functional restoration is to restore degraded processes to facilitate the creation of a desired future condition. The final policy acknowledges that, when an ecosystem has been so degraded such that it is impossible or impractical to return conditions to those within the NRV, or that the projected environmental conditions will not support returning an ecosystem to be within the NRV, the *functional restoration* may be appropriate to restore ecological processes but achieve the essential functions of the ecosystem with different species composition and structure than pre-European settlement conditions. Functional restoration can sometimes serve as the best approach to restoring ecological integrity within the inherent capability of the planning area.

Comment: Other comments included that a broad-scale restoration policy fails to account for localized historic influences, that there is a lack of an active role for forest management in the policy, and that the policy would result in an underrepresentation of early seral stages on the national forests.

Response: The broad-scale or ecosystem restoration approach emphasized in the policy includes evaluating the current seral stage distribution and connectivity against the desired conditions, which may include early seral stages, specialized habitats, and historic influences. The mechanism to achieve the desired conditions are decided on a project-by-project basis and may include active forest management to restore the stand age distribution to be within NRV.

Comment: Another respondent stated that the definitions are circular: Ecological integrity is a set of conditions that are within the NRV and is relative to a historic reference period. Consequently, since the NRV defines ecological integrity, one could argue, any management action that strays from NRV is degrading the ecosystem.

Response: The management objective for any area is governed by the applicable land management plan. The land management plan must provide for social, economic, and ecological sustainability within Forest Service authority and consistent with the inherent capability of the plan area (36 CFR 219.8). NRV is ''The variation of ecological characteristics and processes over scales of time and space that are appropriate for a given management application.'' The definition of the term elaborates that ''The NRV is a tool for assessing the ecological integrity and does not necessarily constitute a management target or desired condition'' (FSM 2020.5, citing the planning handbook at FSH 1909.12, zero code, section 05). Consequently, management actions that are consistent with the inherent capability of the plan area are the best approach to restoring ecological integrity.

Specific Comments on the Proposed Policy

Comment: One commenter stated that contemporary ecology has abandoned the concept of NRV due to the arbitrary nature of agreeing on a time scale, or due to the implied exclusion of historic burning by Native Americans, and added that ecologists have advocated the term HRV (historic range of variability). Another commenter stated that the term ''Ecological Integrity'' is misleading by indiscriminately implying that ''species composition can withstand and recover from most perturbations imposed by natural environmental dynamics or human influence'' and adds, as an example, that this definition seems to have no coherent relevance to species whose survival has depended on burning by Native Americans.

Response: The final policy retains the concept of NRV. The time period used in the definition for natural range of variation is pre-European, and, therefore, includes historic burning by Native Americans. Therefore, this policy would apply to the restoration of species that were dependent on burning by the Native Americans.

Comment: The definition for ecosystem includes basic ecological functions such as hydrological and nutrient cycling. The definition should also include ''capture, storage, and release of water and nutrients.'' It could be argued that ''nutrient cycling'' includes all these processes, but our concern arises because both old growth forest and young plantation cycle nutrients, but there is a big and important difference between the nutrient capital stored in each. Restoration should include recovery of lost capital. In addition, if ''function'' and ''process'' are to be used synonymously, then ''growth and mortality'' should be added to the definition of ecosystem.

Response: The suggested text to add capture, storage, and release of water and nutrients to hydrological and nutrient cycling to differentiate between old growth forests and young plantations was not adopted in the final policy. Ecological restoration focuses on reestablishing the composition, structure, pattern, and ecological processes necessary to facilitate terrestrial and aquatic ecosystem sustainability, resilience, and health under current and future conditions. The primary objective of restoration is to place the ecosystem along an ecological trajectory that is sustainable.

The recommendation to add ''growth and mortality'' was not adopted. Although they are important processes, they are sub-processes of energy flow and would not be at the same relative level as the basic ecological functions of energy flow, nutrient cycling and retention, soil development and retention, predation and herbivory, and natural disturbances.

Comment: One respondent wanted to add a definition of ecological composition to the list of definitions at FSM 2020.5 because composition is a critical component of ecological function, structure, and process.

Response: The definition of ecosystem, in the planning rule and planning handbook, at FSH 1909.12, zero code, secion 05, includes and explains the concept of composition. The addition of a separate definition for ecological composition is, therefore, unnecessary.

Comment: Revise the definition of ''Ecological Integrity'' to eliminate the requirement to manage within the NRV.

Response: The definition of ''ecological integrity'' was not changed in the final policy. There is no requirement to manage within the NRV. The NRV is a tool for assessing ecological integrity and does not necessarily constitute a management target or desired condition (FSM 2020.5, citing the planning handbook at FSH 19012.12, zero code, section 05).

Comment: Respondents were concerned that restoration and ecological sustainability were being placed above other forest uses and that all the activities on national forests will be required to have a restoration objective.

Response: The final policy has been clarified to state that not all activities on National Forest System lands are required to have a restoration objective.

Comment: FSM 2020.3(6) omits requirements for consultation with State and local government entities.

Response: There is no statutory, regulatory, or policy requirement to consult with State and local government entities, but the expectation to engage

with State and local governments has been added to FSM 2020.3(6).

Comment: The objectives fail to acknowledge the mandates of the Multiple-Use Sustained-Yield Act and the National Forest Management Act of 1976.

Response: Restoration is accomplished to ensure that resources are usable and sustainable into perpetuity; consequently this policy is wholly compatible with the Multiple-Use and Sustained-Yield Act and the National Forest Management Act of 1976. In addition, a statement has been added to the final policy that explicitly acknowledges that this policy must comply with all applicable laws and regulations, including the Multiple-Use and Sustained-Yield Act, the National Forest Management Act of 1976, and the principal statutes listed in FSM 2020.11.

Comment: The responsibilities of Forest Supervisors (FSM 2020.45) and District Rangers (FSM 2020.46) should be expanded to include incorporation of net restoration goals and outcomes in all forest management projects. If restoration is just one among many types of projects undertaken by District Rangers, while they also pursue non-restorative actions, there is no assurance of net progress toward restoration objectives.

Response: The final wording in the policy is unchanged. The Forest Service does not have net restoration goals and outcomes. Although restoration is a key objective for the Forest Service, there are other projects that are not restoration, such as fuels reduction treatments within the wildland urban interface. However, the Forest Supervisors and District Rangers are responsible for development and approval of projects to reestablish and retain ecological resilience of National Forest System lands and resources to achieve sustainable management and provide a broad range of ecosystem services that are consistent with regional and national policy.

Comment: The proposed policy states that restoration management activities for ecosystems should ''assist in their recovery from the impacts of human uses.'' This statement implies that human uses should be removed to accomplish objectives.

Response: The policy statements in the final directive have been revised to provide that ''restoration activities should be evaluated within the context of NRV, the potential future climate trajectories, and to counter detrimental human uses.''

Comment: Respondents suggested that the Policy section (FSM 2020.3) should also promote ecosystem processes and function, biodiversity, and soils.

Response: No change to the policy is needed. Ecosystem restoration is the objective of the policy, and the definition of ''ecosystem'' states that it is commonly described in terms of its composition), and function, including soil development and retention (see FSM 2020.5 and the planning handbook at FSH 1909.12, zero code); consequently, the respondent's suggestions were already incorporated in the proposed as well as the final policy.

Comment: Respondents questioned the presumed link between historic system processes (implied by the use of the word ''reestablish'') with the processes required to support ''ecosystem sustainability, resilience, and health under current and future conditions.'' The respondents believe there will be confusion in the implementation of the policy due to the differences in processes necessary to support historic systems and those to support current and future conditions; one example is warming conditions.

Response: The final policy includes slight modifications to include the most recent research that more fully takes into account climate change. The term *functional restoration* has been added to acknowledge that in some situations it is not possible or desirable to reestablish key ecosystem characteristics within the NRV. The policy provides the flexibility to define desired conditions under warming conditions outside the NRV, if necessary.

Comment: Another respondent found that the Objective section focuses on building resiliency, whereas the Policy section focuses on restoration.

Response: Resilience is a desired property of a restored ecosystem. The use of the terms ''resilience'' and ''restoration'' are found in the Objective section (FSM 2020.2) and the Policy section (FSM 2020.3) by design. However, a definition of the term *resilience* has been listed as available in FSH 1909.12, zero code chapter, section 05 to clarify the meaning when the term is used in the policy.

Comment: A respondent was concerned that the proposed policy did not address the causes that contribute to ecological degradation, such as grazing and fire suppression. Another respondent stated that the policy should explicitly recognize the potential conflict between restoration goals, such as fuel reduction versus biomass accumulation, and that an objective of the policy should be to harmonize conflicting goals.

Response: The purpose of this policy is to establish broad direction for reestablishing and retaining ecological resilience of National Forest System lands and associated resources to achieve sustainable management and provide a broad range of ecosystem services. It is always the case that, as the Forest Service engages in day-to-day management of units of the National Forest System, the responsible official considers potential conflicts, which may include conflicts between restoration goals.

Comment: Some respondents were concerned that the policy has the potential to limit the available areas of Forest Service land for recreation and to arbitrarily close trails to off-highway-vehicle recreation, and that the Forest Service should recognize that recreation and other multiple uses are legitimate uses on NFS lands.

Response: A statement has been added in the Policy section (FSM 2020.3) that explicitly acknowledges that this policy must comply with all applicable laws and regulations, including the Multiple-Use Sustained-Yield Act (MUSYA) and the National Forest Management Act (NFMA) of 1976, and the statutes listed in FSM 2020.11. Managing for multiple-use and sustained-yield of goods and services has often required the Forest Service to deal with several conflicting factors and uses at the same time. In some instances, restoration may indeed limit some uses. But, this policy does not mandate restoration in all situations. When and how to restore specific ecosystems will still be a case-by-case matter for the Forest Service's responsible officials who will be informed by public involvement.

Comment: The Policy section (FSM 2020.3) in the proposed policy should be rewritten to focus on creating functioning systems.

Response: The language has been changed to emphasize that goals and activities should focus on restoring the underlying processes that create functioning ecosystems where appropriate.

Comment: The following sentence should be added within the final Policy section (FSM 2020.3): ''The NRV is a tool for assessing the ecological integrity and does not necessarily constitute a management target or desired condition.''

Response: Although the suggested text was not added to the final Policy section it is included in the definition of the NRV (FSM 2025, citing the planning handbook at FSH 1909.12, zero code, section 05).

Comment: The policy should stress functional restoration, not ecological restoration, or it should at least provide a logical link between functional restoration and ecological restoration; functional restoration should be defined in the policy.

Response: In the final directive, functional restoration has been added to the Policy (FSM 2020.3) and the Definition (FSM 2020.5) sections. An explanation of its use and relationship with ecological restoration is in the ''Background and Need for the Directive'' section of this document.

Comment: Reversing the order of the objectives would change the tone to a more forward-looking policy.

Response: The order of the objectives (FSM 2020.2) has been changed and the objectives themselves have been clarified in the final policy.

Comment: Respondents noted that social and economic sustainability as well as ecological factors should be emphasized within the policy.

Response: Consideration for public values and desires, and the contribution to ecological, social, and economic sustainability, among other considerations, has been added to the Policy section, FSM 2020.3(3)(b).

Interim Directives

The Forest Service has been using an interim directive since 2008. Below are the major differences between the interim directive and the permanent policy:

1. The title has changed from ''Ecological Restoration and Resilience'' to ''Ecosystem Restoration'' in the final policy, to better align its title with its content (establishing that not only ecological restoration but also functional restoration are appropriate approaches) and with the mission of the Agency.

2. The final policy adopted from the 2012 Planning Rule directives (FSH 1909.12) the concepts, terms, and definitions for the following: Functional restoration, natural range of variation, adaptation, disturbance, disturbance regime, landscape, stressors, and sustainability.

3. The final policy adds to the Policy section (FSM 2020.50 a requirement to give consideration for the recovery, maintenance, enhancement, and the resilience of carbon stocks associated with National Forest System lands.

4. The final policy adds in the Policy section public values and desires; contributions to ecological, social, and economic sustainability; the natural range of variation (NRV); and ecological integrity as matters to consider in development of restoration goals or objectives.

5. The contents of the Principles section (FSM 2020.6) in the interim directive was distributed to other sections of the final policy and the Principle section was dropped.

6. The final policy adds guidance for ecological and functional restoration activities.

Regulatory Certification

Environmental Impact

This final directive establishes policy for restoring and managing ecosystems on National Forest System lands, but does not direct that any specific action be taken. Forest Service NEPA procedures at 36 CFR 220.6(d)(2) excludes from documentation in an environmental assessment or environmental impact statement ''rules, regulations, or policies to establish Service-wide administrative procedures, program processes, or instructions.'' The Agency's conclusion is that this final directive falls within the category of actions in 36 CFR 220.6(d)(2); no extraordinary circumstances exist which would require preparation of an environmental assessment or environmental impact statement.

Regulatory Impact

This final directive has been reviewed under USDA procedures and Executive Order 12866, Regulatory Planning and Review. This is not an economically significant action. This action would not have an annual effect of $100 million or more on the economy nor adversely affect productivity, competition, jobs, the environment, public health or safety, nor State, local, or Tribal governments. This action would not interfere with an action taken or planned by another agency. This action would not alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients of such programs. However, this final directive has been designated as significant and therefore is subject to Office of Management and Budget review under Executive Order 12866.

In accordance with OMB circular A–4, ''Regulatory Analysis,'' a cost/benefit analysis was conducted comparing the costs and benefits associated with the ''no action'' alternative of not having an Agency policy and the alternative of adopting the final restoration policy. Many benefits and costs associated with the final Agency policy are not quantifiable. Benefits include providing consistent and uniform understanding and Service-wide application of restoration policies, principles, and terminology; increasing Agency effectiveness when planning and implementing ecosystem management activities; and fostering better understanding and collaboration among interests from local to national levels. It is anticipated that this final directive would reduce costs by providing clear policy, definitions, and principles for restoring or modifying ecosystems, thereby reducing ad hoc or inconsistent interpretation of terminology and policy.

This final directive has been reviewed in light of the Regulatory Flexibility Act, as amended (5 U.S.C. 601 *et seq.*), and this action will not have a significant economic impact on a substantial number of small entities as defined by that Act. A threshold regulatory flexibility analysis is not required, under the Regulatory Flexibility Act, because this directive is broad Agency policy that imposes no impacts or requirements on small or large entities. This directive will increase Agency effectiveness when planning and implementing restoration activities at the local level.

Federalism

The Agency considered this final directive under requirements of Executive Order 13132, Federalism. The Agency concludes this final directive conforms to the federalism principles set out in this Executive Order; will not impose any compliance costs on the States; and will not have substantial direct effects on the States or the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, the Agency has determined that no further assessment of federalism implications is necessary.

Consultation and Coordination With Indian Tribal Governments

Pursuant to Executive Order 13175 of November 6, 2000, ''Consultation and Coordination with Indian Tribal Governments,'' Tribes were invited to consult on the proposed directive prior to review and comment by the general public. The consultation process was initiated through written instructions from the Deputy Chief for the National Forest System to the Regional Foresters and subsequently to the Forest Supervisors. Upon request from the Tribes, formal consultation was conducted by the Forest Supervisors and/or District Rangers with assistance from staff. Tribal comments were submitted to the Washington Office staff designated as lead for this policy and

were addressed in the notice of proposed directive that was published in the **Federal Register**.

Implementation of this directive primarily occurs at the local level (national forest or grassland unit) through land management and project-level planning and accomplishment. When local actions are initiated, another level of consultation would occur with Tribes at the local level where site-specific land and resource management goals and objectives are established. Also, at that level, the design and effects of management activities are most effectively addressed in relation to the Agency's tribal trust responsibilities and Indian tribal treaty rights to assure Tribal interests are respected.

This final directive establishes broad policy for reestablishing and retaining ecological resilience of National Forest System lands and resources to achieve sustainable management and provide a broad range of ecosystem services but does not directly affect the occupancy and use of National Forest System land. The Agency has assessed the impact of this final directive on Indian Tribes through tribal consultation and determined that it does not have substantial direct or unique effects on Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes.

The Agency has also determined this final directive does not impose substantial direct compliance costs on Indian tribal governments or preempt tribal law.

No Takings Implications

This final directive has been analyzed in accordance with the principles and criteria contained in Executive Order 12630, Governmental Actions and Interference with *Constitutionally Protected Property Rights,* and it has been determined this final directive does not pose the risk of a taking of protected private property.

Civil Justice Reform

This final directive has been reviewed under Executive Order 12988 ''Civil Justice Reform.'' After adoption of the final directive, (1) all State and local laws and regulations that conflict with this final directive or that would impede full implementation of this directive would be preempted; (2) no retroactive effect would be given to this final directive; and (3) this final directive would not require the use of administrative proceedings before parties could file suit in court challenging its provisions.

Unfunded Mandates

Pursuant to Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538), signed into law on March 22, 1995, the Agency assessed the effects of this final directive on State, local, and tribal governments and the private sector. This final directive does not compel the annual expenditure of $100 million or more by any State, local, or tribal government in the aggregate or by anyone in the private sector. Therefore, a statement under section 202 of the act is not required.

Energy Effects

This final directive has been reviewed under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. It has been determined this final directive does not constitute a significant energy action as defined in the Executive Order.

Controlling Paperwork Burdens on the Public

This final directive does not contain any additional record keeping or reporting requirements or other information collection requirements as defined in 5 CFR part 1320 that are not already required by law and already approved for use, and therefore imposes no additional paperwork burden on the public. Accordingly, the review provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR part 1320 do not apply.

Forest Service Manual

The Forest Service policy is established in Forest Service Manual 2020 as follows:

Chapter 2020—Ecosystem Restoration

FSM 2020 provides policy for reestablishing and retaining ecological resilience of National Forest System lands and resources to achieve sustainable multiple use management and provide a broad range of ecosystem services. Resilient ecosystems have greater capacity to survive disturbances and large-scale threats, especially under changing and uncertain future environmental conditions, such as those driven by climate change and human uses. The directive reaches across all program areas and activities applicable to management of National Forest System lands and resources so as to ensure integration and coordination at all levels and organizational units. It does not directly affect land management plans or the occupancy and use of National Forest System lands, leaving to responsible officials the discretion to decide when and how to authorize restoration projects and activities. When applying or implementing this policy, the Forest Service must comply with applicable laws and regulations, including the National Forest Management Act (NFMA), Multiple-Use Sustained-Yield Act (MUSYA), and the principal statutes in section FSM 2020.11.

2020.1—Authority

The authority for sustainably managing the National Forest System derives from laws enacted by Congress that set out the purpose for which it has been established and is to be administered. These laws are cited throughout the Forest Service Manual and Handbooks. FSM 1010 lists the most significant laws and provides guidance on where to obtain copies of them.

The history of federal policies, treaties, statutes, court decisions, and Presidential direction regarding Indian Tribes and tribal rights and interests is extensive. FSM 1563.01a through FSM 1563.01i set out the legal authorities relevant to Forest Service relationships with Tribes.

The President issued direction through several Executive Orders relevant to protection of resources or restoration of ecosystem processes and functions (FSM 2020.12). Also, numerous regulations governing the sustainable management and restoration of National Forest System lands are found in the Code of Federal Regulations under Title 36, Chapter II, parts 200–299.

2020.11—Laws

The principal statutes governing the reestablishing and retaining of the ecological resilience of National Forest System lands and resources to achieve sustainable multiple use management and provide a broad range of ecosystem services, include but are not limited to, the following statutes, which are listed in alphabetical order. Except where specifically stated, these statutes apply to all National Forest System lands and resources.

1. *Forest and Rangeland Renewable Resources Planning Act (RPA) of 1974,* as amended by *National Forest Management Act* (NFMA) of 1976 (16 U.S.C. 1600–1614, 472a). This Act states that the development and administration of the renewable resources of the National Forest System are to be in full accord with the concepts for multiple use and sustained yield of products and services as set forth in the Multiple-Use Sustained-Yield Act of 1960. The Act establishes

the policy of the Congress that all forested lands in the National Forest System be maintained in appropriate forest cover with species of trees, degree of stocking, rate of growth, and stand conditions designed to secure the maximum benefits of multiple-use, sustained-yield management in accordance with land management plans. It sets forth the requirements for land and resource management plans for units of the National Forest System, including requiring guidelines to provide for diversity of plant and animal communities based on the suitability and capability of the specific land area in order to meet overall multiple-use objectives.

2. *Healthy Forests Restoration Act (HFRA) of 2003* (16 U.S.C. 6501–6591). This Act provides processes for developing and implementing hazardous fuel reduction projects on certain types of ''at-risk'' National Forest System and Bureau of Land Management (BLM) lands, and also provides other authorities and direction to help reduce hazardous fuels and protect, restore, and enhance healthy forest and rangeland ecosystems.

3. *Multiple-Use Sustained-Yield Act of 1960* (16 U.S.C. 528–531). This Act states that the National Forests are to be administered for outdoor recreation, range, timber, watershed, and wildlife and fish purposes, and adds that the establishment and maintenance of wilderness areas are consistent with this Act. This Act directs the Secretary to manage renewable surface resources of the National Forests for multiple use and sustained yield of the several products and services obtained therefrom. Multiple use means the management of all the various renewable surface resources of the National Forests in the combination that will best meet the needs of the American people; providing for periodic adjustments in use to conform to changing needs and conditions; and harmonious and coordinated management of the resources without impairment of the productivity of the land. Sustained yield of the several products and services means achieving and maintaining in perpetuity a high-level annual or regular periodic output of renewable resources without impairment of the productivity of the land.

4. *Organic Administration Act* (at 16 U.S.C. 475, 551). This Act states the purpose of the National Forests, and directs their control and administration to be in accord with such purpose, that is, ''[n]o national forest shall be established, except to improve and protect the forest within the boundaries, or for the purpose of securing favorable conditions of water flows, and to furnish a continuous supply of timber for the use and necessities of citizens of the United States.'' The Act authorizes the Secretary of Agriculture to ''make such rules and regulations . . . to preserve the [national] forests from destruction.''

Other statutes, regulations, and Executive Orders related to the policies in the restoration policy are referenced in FSM 2020.6.

2020.2—Objective

Ecosystems ecologically or functionally restored, so that over the long term they are resilient and can be managed for multiple use and provide ecosystem services, including but not limited to carbon storage and sequestration.

2020.3—Policy

1. The Forest Service will emphasize ecosystem restoration across the National Forest System and within its multiple use mandate.

2. The Forest Service land and resource management plans, project plans, and other Forest Service activities may include goals or objectives for restoration. The goals or objectives for ecosystem restoration must be consistent to all applicable laws and regulations. In development of restoration goals or objectives, the Forest Service should consider:

a. Factors such as the following:

(1) Public values and desires;

(2) the natural range of variation (NRV);

(3) ecological integrity;

(4) current and likely future ecological capabilities;

(5) a range of climate and other environmental change projections;

(6) the best available scientific information; and,

(7) detrimental human uses.

b. technical and economic feasibility to achieve desired future conditions.

c. ecological, social, and economic sustainability.

d. the recovery, maintenance, and enhancement of carbon stocks.

e. opporunities to incorporate restoration objectives into resource management projects to achieve complementary or synergistic results.

f. the concept that an ecological system is dynamic and follows an ecological trajectory

g. the social, economic and ecological influences of restoration activities at multiple scales.

3. The Forest Service may reestablish, maintain, or modify the composition, structure, function, and connectivity of aquatic and terrestrial ecosystems in order to sustain their resilience and adaptive capacity.

4. Activities with localized, short-term adverse effects may be acceptable in order to achieve long-term restoration objectives.

5. The definitions for following terms in this policy are identical to the definitions for the same terms in the National Forest System, Land Management Planning Directive: adaptation, adaptive capacity, adaptive management, disturbance, disturbance regime, ecological integrity, ecosystem, ecosystem services, landscape, natural range of variation (NRV), resilience, restoration–ecological, restoration–functional, stressors, and sustainability. (FSH 1909.12, zero code, section 05).

6. When ecosystems have been altered to such an extent that reestablishing key ecosystem characteristics within the NRV may not be ecologically or economically possible, the restoration focus should be to create functioning ecosystems.

7. Resource managers should consider ecological conditions across ownerships and jurisdictions to develop and achieve landscape restoration objectives by engaging the public, State and local governments, and consultation with Indian Tribes.

8. Not all natural resource management activities are required to include restoration, and not all National Forest System lands require restoration.

2020.4—Responsibility

The responsible officials to carry out the Ecosystem Restoration Policy are the Agency employees who have the delegated authority to approve land and resource management plans, project plans, or other Forest Service activities.

2020.5—Definitions

The definitions at the Land Management Planning Handbook, FSH 1909.12, zero code chapter, section 05 at *http://www.fs.fed.us/im/directives/fsh/1909.12/wo_1909.12_zero_code.docx* apply for the following terms in this policy: Adaptation, adaptive capacity, adaptive management, carbon pool, carbon stocks, disturbance, disturbance regime, ecological integrity, ecosystem, ecosystem services, landscape, natural range of variation (NRV), resilience, restoration–ecological, restoration–functional, stressors, and sustainability.

2020.6—References

This section displays references to statutes, regulations, and Executive Orders related to the policies in FSM 2020.

2020.61—References to Statutes

1. BILLING CODE 3411–15–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Bureau of Industry and Security.

Title: BIS Program Evaluation.

Form Number(s): N/A.

OMB Control Number: 0694–0125.

Type of Request: Regular.

Burden Hours: 500 hours.

Number of Respondents: 3,000 respondents.

Average Hours per Response: 10 minutes per response.

Needs and Uses: This collection of information is necessary to obtain feedback from seminar participants. This information helps BIS determine the effectiveness of its programs and identifies areas for improvement. The gathering of performance measures on the BIS seminar program is also essential in meeting the agency's responsibilities under the Government Performance and Results Act (GPRA).

Affected Public: Businesses and other for-profit institutions.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

This information collection request may be viewed at *www.reginfo.gov.*

Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Jasmeet Seehra, Office of Management and Budget (OMB), by email to *jseehra@omb.eop.gov,* or by fax to (202) 395–7285.

Dated: April 25, 2016.

Glenna Mickelson,

Management Analyst, Office of the Chief Information Officer.

[FR Doc. 2016–09811 Filed 4–26–16; 8:45 am]

BILLING CODE 3510–33–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

On behalf of the Committee for the Implementation of Textile Agreements (CITA), the Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Committee for the Implementation of Textile Agreements.

Title: Interim Procedures for Considering Requests from the Public for Textile and Apparel Safeguard Actions on Imports from Panama.

Form Number(s): N/A.

OMB Control Number: 0625–0274.

Type of Request: Regular submission.

Burden Hours: 24.

Number of Respondents: 6 (1 for Request; 5 for Comments).

Average Hours per Response: 4 hours for a Request; and 4 hours for each Comment.

Average Annual Cost to Public: $960.

Needs and Uses: Title III, Subtitle B, Section 321 through Section 328 of the United States-Panama Trade Promotion Agreement Implementation Act (the ''Act'') [Public Law 112–43] implements the textile and apparel safeguard provisions, provided for in Article 3.24 of the United States-Panama Trade Promotion Agreement (the ''Agreement''). This safeguard mechanism applies when, as a result of the elimination of a customs duty under the Agreement, a Panamanian textile or apparel article is being imported into the United States in such increased quantities, in absolute terms or relative to the domestic market for that article, and under such conditions as to cause serious damage or actual threat thereof to a U.S. industry producing a like or directly competitive article. In these circumstances, Article 3.24 permits the United States to increase duties on the imported article from Panama to a level that does not exceed the lesser of the prevailing U.S. normal trade relations (NTR)/most-favored-nation (MFN) duty rate for the article or the U.S. NTR/MFN duty rate in effect on the day the Agreement entered into force.

The Statement of Administrative Action accompanying the Act provides that the Committee for the Implementation of Textile Agreements (CITA) will issue procedures for requesting such safeguard measures, for making its determinations under section 322(a) of the Act, and for providing relief under section 322(b) of the Act.

In Proclamation No. 8894 (77 FR 66507, November 5, 2012), the President delegated to CITA his authority under Subtitle B of Title III of the Act with respect to textile and apparel safeguard measures.

CITA must collect information in order to determine whether a domestic textile or apparel industry is being adversely impacted by imports of these products from Panama, thereby allowing CITA to take corrective action to protect the viability of the domestic textile or apparel industry, subject to section 322(b) of the Act.

Affected Public: Individuals or households; businesses or other for-profit organizations.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or fax to (202) 395–5806.

Dated: April 25, 2016.

Glenna Mickelson,

Management Analyst, Office of the Chief Information Officer.

[FR Doc. 2016–09810 Filed 4–26–16; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

On behalf of the Committee for the Implementation of Textile Agreements (CITA), the Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: Committee for the Implementation of Textile Agreements.

Title: Interim Procedures for Considering Requests under the Commercial Availability

Provision of the United States-Panama Trade Promotion Agreement.

Form Number(s): N/A.

OMB Control Number: 0625–0273.

Type of Request: Regular submission.

Burden Hours: 89.

Number of Respondents: 16 (10 for Requests; 3 for Responses; 3 for Rebuttals).

Average Hours per Response: 8 hours per Request; 2 hours per Response; and 1 hour per Rebuttal.

Needs and Uses: Title II, Section 203(o) of the United States-Panama Trade Promotion Agreement Implementation Act (the ''Act'') [Pub. L. 112–43] implements the commercial availability provision provided for in Article 3.25 of the United States-Panama Trade Promotion Agreement (the ''Agreement''). The Agreement entered into force on October 31, 2012. Subject to the rules of origin in Annex 4.1 of the Agreement, and pursuant to the textile provisions of the Agreement, a fabric, yarn, or fiber produced in Panama or the United States and traded between the two countries is entitled to duty-free tariff treatment. Annex 3.25 of the Agreement also lists specific fabrics, yarns, and fibers that the two countries agreed are not available in commercial quantities in a timely manner from producers in Panama or the United States. The items listed in Annex 3.25 are commercially unavailable fabrics, yarns, and fibers. Articles containing these items are entitled to duty-free or preferential treatment despite containing inputs not produced in Panama or the United States.

The list of commercially unavailable fabrics, yarns, and fibers may be changed pursuant to the commercial availability provision in Chapter 3, Article 3.25, Paragraphs 4–6 of the Agreement. Under this provision, interested entities from Panama or the United States have the right to request that a specific fabric, yarn, or fiber be added to, or removed from, the list of commercially unavailable fabrics, yarns, and fibers in Annex 3.25 of the Agreement.

Pursuant to Chapter 3, Article 3.25, paragraph 6 of the Agreement, which requires that the President publish procedures for parties to exercise the right to make these requests, Section 203(o)(4) of the Act authorizes the President to establish procedures to

modify the list of fabrics, yarns, or fibers not available in commercial quantities in a timely manner in either the United States or Panama as set out in Annex 3.25 of the Agreement. The President delegated the responsibility for publishing the procedures and administering commercial availability requests to the Committee for the Implementation of Textile Agreements (''CITA''), which issues procedures and acts on requests through the U.S. Department of Commerce, Office of Textiles and Apparel (''OTEXA'') (See Proclamation No. 8894, 77 FR 66507, November 5, 2012).

The intent of the Commercial Availability Procedures is to foster the use of U.S. and regional products by implementing procedures that allow products to be placed on or removed from a product list, in a timely manner, and in a manner that is consistent with normal business practice. The procedures are intended to facilitate the transmission of requests; allow the market to indicate the availability of the supply of products that are the subject of requests; make available promptly, to interested entities and the public, information regarding the requests for products and offers received for those products; ensure wide participation by interested entities and parties; allow for careful review and consideration of information provided to substantiate requests and responses; and provide timely public dissemination of information used by CITA in making commercial availability determinations.

CITA must collect certain information about fabric, yarn, or fiber technical specifications and the production capabilities of Panamanian and U.S. textile producers to determine whether certain fabrics, yarns, or fibers are available in commercial quantities in a timely manner in the United States or Panama, subject to Section 203(o) of the Act.

Affected Public: Business or other for-profit.

Frequency: Varies.

Respondent's Obligation: Voluntary.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov* or fax to (202) 395–5806.

Dated: April 25, 2016.

Glenna Mickelson,

Management Analyst, Office of the Chief Information Officer.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Evaluation of State Coastal Management Program

AGENCY: Office for Coastal Management (OCM), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice.

SUMMARY: The National Oceanic and Atmospheric Administration (NOAA), Office for Coastal Management will hold a public meeting to solicit comments for the performance evaluation of the New Jersey Coastal Management Program.

DATES: The public meeting will be held on Thursday, June 9, 2016, and written comments must be received on or before June 24, 2016. For specific date, time, and location of the public meeting see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: You may submit comments on the coastal program NOAA intends to evaluate by any of the following methods:

Public Meeting and Oral Comments: A public meeting will be hold in Tuckerton, New Jersey. For specific locations, see **SUPPLEMENTARY INFORMATION**.

Written Comments: Please direct written comments to Carrie Hall Evaluator, Planning and Performance Measurement Program, Office for Coastal Management, NOS/NOAA, 1305 East-West Highway, 11th Floor, N/OCM1, Silver Spring, Maryland 20910, or *Carrie.Hall@noaa.gov.*

FOR FURTHER INFORMATION CONTACT: Carrie Hall, Evaluator, Planning and Performance Measurement Program, Office for Coastal Management, NOS/NOAA, 1305 East-West Highway, 11th Floor, N/OCM1, Silver Spring, Maryland 20910, or *Carrie.Hall@noaa.gov.*

Copies of the final evaluation findings and related material (including past performance reports and notices prepared by NOAA's Office for Coastal Management) may be obtained upon written request by contacting the person identified under **FOR FURTHER INFORMATION CONTACT**. Copies of the final evaluation findings may also be downloaded or viewed on the Internet at *https://coast.noaa.gov/czm/evaluations/evaluation_findings/index.html.*

SUPPLEMENTARY INFORMATION: Section 312 and 315 of the Coastal Zone Management Act (CZMA) require NOAA to conduct periodic evaluations of federally approved state and territorial coastal programs and national estuarine research reserves. The process includes a public meeting, consideration of written public comments and consultations with interested Federal, state, and local agencies and members of the public. During the evaluation, NOAA will consider the extent to which the state has met the national objectives, adhered to the final management plan approved by the Secretary of Commerce, and adhered to the terms of financial assistance under the CZMA. When the evaluation is completed, NOAA's Office for Coastal Management will place a notice in the **Federal Register** announcing the availability of the Final Evaluation Findings.

Specific information on the periodic evaluation of the state and territorial coastal programs and reserves that are the subject of this notice are detailed below as follows:

New Jersey Coastal Management Program Evaluation

You may participate or submit oral comments at the public meeting scheduled as follows:

Date: June 9, 2016.

Time: 5:00 p.m. local time.

Location: Jacques Cousteau National Estuarine Research Reserve, Jacques Cousteau Coastal Educational Center, 130 Great Bay Blvd., Tuckerton, New Jersey 08087.

Written public comments must be received on or before June 24, 2016.

Federal Domestic Assistance Catalog 11.419.

Coastal Zone Management Program Administration.

Dated: April 12, 2016.

John King,

Deputy Director, Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration.

BILLING CODE 3510–08–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XE374

Marine Fisheries Advisory Committee; Charter Renewal

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of renewed charter.

SUMMARY: Notice is hereby given of the 2 year renewed charter for the Marine Fisheries Advisory Committee (MAFAC), signed on April 14, 2016.

FOR FURTHER INFORMATION CONTACT: Jennifer Lukens, Federal Program Officer, MAFAC, 301–427–8041.

SUPPLEMENTARY INFORMATION: As required by Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1982), notice is hereby given of the renewed charter for MAFAC. MAFAC was established by the Secretary of Commerce (Secretary) on February 17, 1972, to advise the Secretary on all living marine resource matters that are the responsibility of the Department of Commerce. This Committee advises and reviews the adequacy of living marine resources policies and programs to meet the needs of commercial and recreational fisheries, aquaculture, and environmental, consumer, academic, State, tribal, and other national interests. The Committee's charter must be renewed every 2 years from the date of the last renewal. The charter can be accessed on line at *www.nmfs.noaa.gov/ocs/mafac.*

Dated: April 21, 2016.

Jennifer Lukens,

Federal Program Officer, Marine Fisheries Advisory Committee.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XE578

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of final determination and discussion of underlying biological analysis; notice of availability of a Record of Decision.

SUMMARY: NMFS has evaluated the joint resource management plans (RMPs) submitted to NMFS by the Washington Department of Fish and Wildlife, and the Jamestown S'Klallam Tribe, Lummi Nation, Nooksack Tribe, Stillaguamish Tribe of Indians, and Tulalip Tribes, pursuant to the limitation on take prohibitions for actions conducted under Limit 6 of the 4(d) Rule for salmon and steelhead promulgated under the Endangered Species Act (ESA). The RMPs specify the propagation of early winter steelhead to support recreational and tribal fishing in the Dungeness, Nooksack, Stillaguamish, Skykomish, and Snoqualmie River watersheds of Washington State. This document serves to notify the public that NMFS, by delegated authority from the Secretary of Commerce, has determined pursuant to Limit 6 of the 4(d) rule for salmon and steelhead that implementing and enforcing the RMPs will not appreciably reduce the likelihood of survival and recovery of Puget Sound Chinook salmon, Hood Canal summer-run chum salmon, and Puget Sound steelhead. In compliance with the National Environmental Policy Act (NEPA), NMFS also announces the availability of its Record of Decision (ROD) on its Final Environmental Impact Statement (FEIS) for the five early-winter steelhead hatchery programs in Puget Sound.

DATES: The final determination on the take limit under the ESA was made on April 15, 2016. The Record of Decision under NEPA was signed on April 15, 2016.

ADDRESSES: Written responses to the determinations should be sent to the Sustainable Fisheries Division, 1201 NE. Lloyd Boulevard, Suite 1100, Portland, OR 97232. The complete text of the determinations, the analysis of the effects of the plans, and the ROD, along with additional documents and information, are available on the NMFS West Coast Region Web site at *http://www.westcoast.fisheries.noaa.gov/hatcheries/salmon_and_steelhead_hatcheries.html.*

FOR FURTHER INFORMATION CONTACT: For ESA determinations, contact Tim Tynan at (360) 753–9579 or via email: *tim.tynan@noaa.gov.* For information on the ROD, contact Steve Leider at (360) 753–4650 or via email: *steve.leider@noaa.gov.*

SUPPLEMENTARY INFORMATION:

Species Covered in This Notice

Chinook salmon (*Oncorhynchus tshawytscha*): Threatened, Puget Sound, naturally produced and artificially propagated.

Chum salmon (*O. keta*): Threatened, Hood Canal summer-run, naturally produced and artificially propagated.

Steelhead (*O. mykiss*): Threatened, Puget Sound, naturally produced and artificially propagated.

Background

The RMPs are represented by five Hatchery and Genetics Management Plans (HGMPs). The HGMPs describe hatchery operations intended to produce early winter steelhead to mitigate for impacts on tribal and recreational fishing caused by past and on-going human developmental activities in the Dungeness, Nooksack, Stillaguamish, Skykomish, and Snoqualmie River watersheds. They would be implemented to provide hatchery fish to: (1) Meet regional recreational fisheries objectives for the citizens of Washington State, and (2) meet tribal fishery harvest allocations that are guaranteed through treaties, as affirmed in *United States* v. *Washington* (1974). Adult steelhead produced by the programs are not intended to spawn naturally. All five proposed hatchery programs would use only hatchery fish for broodstock, and all HGMPs include monitoring and evaluation actions to assess the performance of each program, and effects on ESA-listed Puget Sound Chinook salmon, Hood Canal summer chum salmon (Dungeness River only), and Puget Sound steelhead. NMFS has determined that implementing and enforcing the RMPs will not appreciably reduce the likelihood of survival and recovery of ESA-listed Puget Sound Chinook salmon, Hood Canal summer-run chum salmon, or Puget Sound steelhead.

NMFS West Coast Region was the lead agency responsible for preparing an FEIS to analyze the impacts of NMFS's 4(d) determination under Limit 6 for the five early winter steelhead hatchery programs. The FEIS evaluates five alternatives, including the proposed action and a no-action alternative. The notice of availability of the FEIS was published in the **Federal Register** on March 11, 2016 (81 FR 12898).

Discussion of the Biological Analysis Underlying the ESA Determination

The proposed hatchery activities described in the RMPs are intended to provide non-ESA-listed adult steelhead for harvest in recreational and tribal fisheries in the five watersheds where

the programs would operate. The RMPs provide the framework through which the State of Washington and the Tribes can jointly manage early winter steelhead hatchery, monitoring, and evaluation activities while meeting requirements specified under the ESA. The proposed action covers continued operation of the five hatchery programs to produce steelhead for harvest, while minimizing any impacts on the genetic integrity of natural steelhead populations, and ecological and demographic impacts on natural ESA-listed Chinook salmon, chum salmon, and steelhead.

All steelhead produced through the five programs are derived from broodstock native to Puget Sound but not native to the watersheds where the fish would be planted. The early-winter steelhead stock released through the programs is not included as part of the listed Puget Sound Steelhead Distinct Population Segment (DPS). Operational protocols applied through the five hatchery programs would minimize potential risks to associated listed natural-origin steelhead, Chinook salmon, and (for the Dungeness River program) summer chum salmon populations in each of the watersheds where the programs are located. Particular emphasis is placed on ensuring that returning adult hatchery early-winter steelhead do not interact to a substantial degree with natural-origin steelhead populations in natural spawning areas. Hatchery management measures are applied to reduce the risk of spatial and temporal overlap, straying, and interbreeding between early-winter steelhead and natural-origin steelhead. The five HGMPs share very low genetic effects on natural-origin steelhead—essentially no estimated hatchery fish contribution or gene flow—demonstrated by DNA sampling results and other analyses of genetic introgression.

As part of the proposed hatchery programs, monitoring and evaluation would be implemented to assess their effects on ESA-listed natural-origin steelhead, Chinook salmon, and summer chum salmon, and program performance in meeting harvest augmentation objectives. The hatchery plans emphasize monitoring and evaluation of genetic effects as a key objective to validate that effects are, and will remain, low and within levels identified as posing unsubstantial risks to listed natural-origin steelhead. Information gained through monitoring and evaluation will also be used to assess whether levels for other hatchery-related program impacts on listed fish (*e.g.,* hatchery facilities, competition, and predation) are unsubstantial. The RMPs include provisions for annual reports that will assess compliance with performance standards established in the plans. Review of the RMPs and reports by NMFS, Washington State, and the Tribes will occur annually to evaluate whether assumptions regarding hatchery plan effects and analyses remain valid, and whether the objectives of the plans are being accomplished. NMFS' evaluation is available on the NMFS West Coast Region Web site (see **ADDRESSES**).

Summary of Comments Received in Response to the Proposed Evaluation and Pending Determination

NMFS published two notices of its proposed evaluation and pending determinations for public review and comment on March 26, 2015 (80 FR 15984), and February 23, 2016 (81 FR 8941). The proposed evaluation and pending determination was available for public review and comment for 39 days. During the public comment period, NMFS received substantive comments specifically addressing the proposed evaluation and pending determination from two non-governmental organizations. None of the comments raised issues that required changes to the RMPs, or substantive modification of the NMFS proposed evaluation and pending determination document. In response to the comments, minor revisions were made in the NMFS document to clarify language included in the hatchery plan action description and effects evaluation sections. A detailed summary of the comments and NMFS' responses is also available on the NMFS West Coast Region Web site. Based on its evaluation and recommended determination and taking into account the public comments, NMFS issued its final determination on the early-winter steelhead hatchery RMPs.

Record of Decision—FEIS on Puget Sound Early-Winter Steelhead Programs

NMFS has decided to select Alternative 5 from the FEIS. Alternative 5 was the agency's preferred alternative in the FEIS. Under the selected alternative, NMFS would make a determination that the HGMPs submitted by the co-managers, including a revised HGMP for the Skykomish early-winter steelhead program, meet requirements of the ESA 4(d) rule. The early-winter steelhead hatchery programs proposed in the Dungeness, Nooksack, Stillaguamish, Skykomish, and Snoqualmie River watersheds would be implemented as described in the submitted HGMPs. The ROD documents NMFS's decision, identifies all alternatives considered in reaching the decision, specifies the alternative considered to be environmentally preferable, and identifies and discusses relevant factors which were balanced by NMFS in making its decision.

Authority

Under section 4 of the ESA, the Secretary of Commerce is required to adopt such regulations as she deems necessary and advisable for the conservation of species listed as threatened. The ESA salmon and steelhead 4(d) rule (65 FR 42422, July 10, 2000) specifies categories of activities that contribute to the conservation of listed salmonids and sets out the criteria for such activities. The rule further provides that the prohibitions of paragraph (a) of the rule do not apply to actions undertaken in compliance with an RMP developed jointly by the State of Washington and the Tribes and determined by NMFS to be in accordance with the salmon and steelhead 4(d) rule (65 FR 42422, July 10, 2000).

We also apply this notice in accordance with the requirements of NEPA as amended (42 U.S.C. 4371 *et seq.*) and its implementing regulations (40 CFR 1500 part 1506.6), and other appropriate Federal laws and regulations, and policies and procedures of NMFS for compliance with those regulations.

Dated: April 21, 2016.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Papahānaumokuākea Marine National Monument Permit Application and Reports for Permits (fka Northwestern Hawaiian Islands Marine National Monument)

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and

respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before June 27, 2016.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at *JJessup@doc.gov).*

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Tia Brown, (808) 397–2660 or *Tia.Brown@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for revision and extension of a currently approved information collection. There will be minor changes to the forms and instructions.

On June 15, 2006, President Bush established the Papahānaumokuākea Marine National Monument by issuing Presidential Proclamation 8031 (71 FR 36443, June 26, 2006) under the authority of the Antiquities Act (16 U.S.C. 431). The proclamation includes restrictions and prohibitions regarding activities in the monument consistent with the authority provided by the act. Specifically, the proclamation prohibits access to the monument except when passing through without interruption or as allowed under a permit issued by NOAA and the U.S. Fish and Wildlife Service (FWS). Vessels passing through the monument without interruption are required to notify NOAA and FWS upon entering into and leaving the monument. Individuals wishing to access the monument to conduct certain regulated activities must first apply for and be granted a permit issued by NOAA and FWS to certify compliance with vessel monitoring system requirements, monument regulations and best management practices. On August 29, 2006, NOAA and FWS published a final rule codifying the provisions of the proclamation (71 FR 51134).

II. Method of Collection

Respondents have a choice of either electronic or paper forms. Methods of submittal include email of electronic forms, and mail and facsimile transmission of paper forms.

III. Data

OMB Control Number: 0648–0548.

Form Number: None.

Type of Review: Regular submission (revision and extension of a currently approved information collection).

Affected Public: Individuals, not for profit institutions; Federal, State, local, government, Native Hawaiian organizations; business or other for-profit organizations.

Estimated Number of Respondents: 411.

Estimated Time per Response: Research, Conservation and Management and Education (''general'' permits), 5 hours; Special Ocean Use permits, 10 hours; Native Hawaiian Practices permits, 8 hours; Recreation permits, 6 hours; modification requests and final reports, 10 hours; annual reports, 5 hours.

Estimated Total Annual Burden Hours: 1,794.

Estimated Total Annual Cost to Public: $61,783 in recordkeeping/reporting costs and vessel monitoring system installation and maintenance.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: April 23, 2016.

Sarah Brabson,

NOAA PRA Clearance Officer.

[FR Doc. 2016–09922 Filed 4–26–16; 8:45 am]

BILLING CODE 3510–NK–P

DEPARTMENT OF COMMERCE

United States Patent and Trademark Office

Intellectual Property Education Outreach Council Survey

ACTION: Proposed collection; comment request.

SUMMARY: The United States Patent and Trademark Office (USPTO), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to comment on the proposed information collection as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before June 27, 2016.

ADDRESSES: You may submit comments by any of the following methods:

- *Email: InformationCollection@uspto.gov.* Include ''0651–00XX comment'' in the subject line of the message.
- *Federal Rulemaking Portal: http://www.regulations.gov.*
- *Mail:* Marcie Lovett, Records Management Division Director, Office of the Chief Information Officer, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Anthony Knight, Director, Office of Stakeholder Outreach, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450; by telephone at 571–272–3687; or by email to *Anthony.Knight@uspto.gov* with ''0651–00XX comment'' in the subject line. Additional information about this collection is also available at *http://www.reginfo.gov* under ''Information Collection Review.''

SUPPLEMENTARY INFORMATION:

I. Abstract

The United States Patent and Trademark Office (USPTO) Intellectual Property Education Outreach Council is responsible for conducting training for parties external to the USPTO. The Council is conducting a new survey to gather public feedback regarding their satisfaction with USPTO lectures and other outreach efforts.

Collecting feedback will allow for the Agency to have a pulse on customer satisfaction and adjust where necessary to meet and exceed expectations. This feedback collection will provide for ongoing, collaborative, and actionable

communication between the Agency and its customers and stakeholders. It also will enable the Agency to garner customer and stakeholder feedback in an efficient and timely manner, in accordance with the USPTO's commitment to improving services. The information collected from Agency customers and stakeholders will help ensure users have an opportunity to convey their experience with USPTO outreach efforts.

Improving Agency outreach efforts requires ongoing assessment. The Agency will collect, analyze, and interpret information gathered to identify strengths and weaknesses of current services. Based on feedback received, the Agency will identify changes needed to improve services. The Agency is committed to hearing feedback from its customers. If this information is not collected, then the Agency will miss opportunities to obtain vital feedback from its customers and stakeholders on ways to improve their program and services.

II. Method of Collection

Respondents can submit the information electronically by means of the internet, or in-person at the conclusion of a USPTO outreach event.

III. Data

OMB Number: 0651–00XX.

IC Instruments and Forms: There are no forms associated with this collection. The individual instruments in this collection are listed in the table below.

Type of Review: New.

Affected Public: Individuals or households, businesses or other for-profits; and not-for-profit institutions.

Estimated Number of Respondents: 10,000.

Estimated Time per Response: 5 minutes (.083 hours).

Estimated Total Annual Respondent Burden Hours: 833.33 hours.

Estimated Total Annual Respondent (Hourly) Cost Burden: $161,391.67. The USPTO expects that attorneys, paralegals and *pro se* applicants will complete these applications. The professional hourly rate for attorneys is $410, and the hourly rates for paralegals and *pro se* applicants are $141 and $30, respectively. The average of the combined respondent rate is $193.67. The time per response, estimated annual responses, and estimated annual burden associated with each instrument in this information collection is shown in the table below.

Number	Item	Estimated time for response (minutes) (a)	Estimated annual responses (b)	Estimated annual burden hours (a) × (b) / 60 = (c)	Rate ($/hr)
1	Survey	5 (0.083 hrs)	10,000	833.33	$193.67
Total			10,000	833.33	

Estimated Total Annual (Non-hour) Respondent Cost Burden: There are no capital start-up, maintenance, postage, or recordkeeping costs associated with this information collection. Additionally, there are no filing fees associated with this collection.

IV. Request for Comments

Comments are invited on:

(a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility;

(b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information;

(c) ways to enhance the quality, utility, and clarity of the information to be collected; and

(d) ways to minimize the burden of the collection of information on respondents, *e.g.,* the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: April 21, 2016.

Marcie Lovett,

Records Management Division Director, OCIO, Office of the Chief Information Officer, United States Patent and Trademark Office.

BILLING CODE 3510–16–P

CONSUMER PRODUCT SAFETY COMMISSION

[Docket No. CPSC–2012–0026]

Agency Information Collection Activities; Submission for OMB Review; Comment Request—Requirements Pertaining to Third Party Conformity Assessment Bodies

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with the requirements of the Paperwork Reduction Act (''PRA'') of 1995 (44 U.S.C. chapter 35), the Consumer Product Safety Commission (''Commission'' or ''CPSC'') announces that the Commission has submitted to the Office of Management and Budget (''OMB'') a request for extension of approval of a collection of information under the requirements pertaining to third party conformity assessment bodies (OMB No. 3041–0156). In the **Federal Register** of February 12, 2016 (81 FR 7511), the CPSC published a notice to announce the agency's intention to seek extension of approval of the collection of information. The Commission received no comments. Therefore, by publication of this notice, the Commission announces that CPSC has submitted to the OMB a request for extension of approval of that collection of information, without change.

DATES: Written comments on this request for extension of approval of information collection requirements should be submitted by May 27, 2016.

ADDRESSES: Submit comments about this request by email: *OIRA_submission@omb.eop.gov* or fax: 202–395–6881. Comments by mail should be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for the CPSC, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503. In addition, written comments that are sent to OMB also should be submitted electronically at *http://www.regulations.gov,* under Docket No. CPSC–2012–0026.

FOR FURTHER INFORMATION CONTACT: For further information contact: Robert H. Squibb, Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, MD 20814; (301) 504–7815, or by email to: *rsquibb@cpsc.gov.*

SUPPLEMENTARY INFORMATION: CPSC has submitted the following currently

approved collection of information to OMB for extension:

Title: Requirements Pertaining to Third Party Conformity Assessment Bodies.

OMB Number: 3041–0156.

Type of Review: Renewal of collection.

Frequency of Response: On occasion.

Affected Public: Third party conformity assessment bodies seeking acceptance of accreditation or continuing accreditation.

Estimated Burden:

- *New Applications From Third Party Conformity Assessment Bodies*

○ We estimate approximately 40 new applications from independent third party conformity assessment bodies will be submitted per year, taking an estimated 75 minutes to complete the initial application materials, with an estimated burden of 50 hours per year.

○ We estimate approximately 3 firewalled third party conformity assessment bodies will apply per year, taking an estimated 8.4 hours to complete the initial application materials, with an estimated burden of 25.2 hours per year.

○ We estimate approximately 4 governmental third party conformity assessment bodies will apply per year, taking an estimated 3 hours to complete the initial application materials, with an estimated burden of 12 hours per year.

- *Third party conformity assessment bodies updating information*

○ We estimate that approximately 5 third party conformity assessment bodies will take 15 minutes to update information for only those elements of information that need updating, with an estimated burden of 1.35 hours per year.

- *Third party conformity assessment bodies that subcontracts out tests*

○ We estimate that approximately 27 third party conformity assessment bodies will take 7 minutes to comply with the subcontracting recordkeeping requirement for an estimated 68,769 subcontract test, with an estimated of approximately 8,023 hours per year.

- *Third party conformity assessment bodies that voluntarily withdraw*

○ We estimate approximately 8 third party conformity assessment bodies will withdraw yearly, taking an estimated 30 minutes to create and submit the required documentation, with an estimated burden of 4 hours per year.

- *Third party conformity assessment bodies that are audited*

○ We estimate that approximately 228 independent third party conformity assessment bodies each year will be audited, taking approximately 4 minutes to resubmit their Form 223 and accreditation certificate, with an estimated burden of 15.2 hours per year.

○ We estimate that approximately 18 firewalled third party conformity assessment bodies will spend 226 minutes collecting and preparing the documentation to submit for an audit, with estimated burden of about 68 hours per year.

○ We estimate approximately 25 governmental third party conformity assessment bodies will spend 1 hour collecting and preparing the documentation to submit for an audit, with estimated burden of 25 hours per year.

- *Total Annual Burden*

Adding all of the annual estimated burden hours results in a total of 8,224 hours for third party conformity assessment bodies per year. At $38.78 per hour, the total cost of the recordkeeping associated with the Requirements Pertaining to Third Party Conformity Assessment Bodies is approximately $318,927 (8,224 hours × $38.78 = $318,927).

General Description of Collection: On March 12, 2013, the Commission issued a rule Pertaining to Third Party Conformity Assessment Bodies (78 FR 15836). The rule established the general requirements concerning third party conformity assessment bodies, such as the requirements and procedures for CPSC acceptance of the accreditation of a third party conformity assessment body, and prescribed adverse actions that may be imposed against CPSC-accepted third party conformity assessment bodies. The rule also amended the audit requirements for third party conformity assessment bodies and amends the Commission's regulation on inspections.

Dated: April 21, 2016.

Todd A. Stevenson,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–P

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Information Collection; Submission for OMB Review, Comment Request

AGENCY: Corporation for National and Community Service.

ACTION: Notice.

SUMMARY: The Corporation for National and Community Service (CNCS) has submitted a public information collection request (ICR) entitled AmeriCorps NCCC's Sponsor Survey for review and approval in accordance with the Paperwork Reduction Act of 1995, Public Law 104–13, (44 U.S.C. Chapter 35). Copies of this ICR, with applicable supporting documentation, may be obtained by calling the Corporation for National and Community Service, Barbara Lane, at 202–606–6867 or email to *blane@cns.gov.* Individuals who use a telecommunications device for the deaf (TTY–TDD) may call 1–800–833–3722 between 8:00 a.m. and 8:00 p.m. Eastern Time, Monday through Friday.

DATES: Comments may be submitted, identified by the title of the information collection activity, within May 27, 2016.

ADDRESSES: Comments may be submitted, identified by the title of the information collection activity, to the Office of Information and Regulatory Affairs, Attn: Ms. Sharon Mar, OMB Desk Officer for the Corporation for National and Community Service, by any of the following two methods within 30 days from the date of publication in the **Federal Register**:

(1) *By fax to:* 202–395–6974, Attention: Ms. Sharon Mar, OMB Desk Officer for the Corporation for National and Community Service; or

(2) *By email to: smar@omb.eop.gov.*

SUPPLEMENTARY INFORMATION: The OMB is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of CNCS, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Propose ways to enhance the quality, utility, and clarity of the information to be collected; and
- Propose ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments

A 60-day Notice requesting public comment was published in the **Federal Register** on December 28, 2105, at Volume 80 FR 80755–80756. This comment period ended February 26, 2016. No public comments were received from this Notice.

Description: This National Civilian Community Corps Sponsor Survey originally developed this Sponsor Survey to evaluate the program's performance impact on sponsoring organizations and communities. This

measurement instrument works to capture outputs and outcomes of the NCCC program on the organizations and communities it serves. Completion of this information collection is not required to be considered for or obtain grant or resource funding support from AmeriCorps NCCC. CNCS also seeks to continue using the current survey until the revised survey is approved by OMB. The current application is due to expire on 8/31/2017.

Type of Review: Renewal.

Agency: Corporation for National and Community Service.

Title: NCCC Sponsor Survey.

OMB Number: 3045–0138.

Agency Number: None.

Affected Public: The NCCC sponsor survey will be administered to the project sponsor for any NCCC service project. These sponsors apply to receive a NCCC team, typically made up of 8–12 Members, for a period of approximately six-eight weeks to implement local service projects. There are approximately 1,200 projects that NCCC perform each year. The project sponsors are uniquely able to provide the information sought in the NCCC Sponsor Survey.

Total Respondents: Based on the number of projects completed last fiscal year, NCCC expects to administer 2,400 surveys each fiscal year. These may not be unique responders as many sponsors receive teams on a rotating basis and thus may complete the survey more than once per year.

Frequency: Biweekly. Each sponsor will complete only one survey per team per project.

Average Time per Response: 30 minutes.

Estimated Total Burden Hours: 1,200 hours.

Total Burden Cost (capital/startup): None.

Total Burden Cost (operating/maintenance): None.

Dated: April 21, 2016.

Jacob Sgambati,

NCCC Director of Operations.

[FR Doc. 2016–09813 Filed 4–26–16; 8:45 am]

BILLING CODE 6050–28–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Charter Renewal of Department of Defense Federal Advisory Committees

AGENCY: Department of Defense.

ACTION: Renewal of Federal Advisory Committee.

SUMMARY: The Department of Defense (DoD) is publishing this notice to announce that it is renewing the charter for the United States Strategic Command Strategic Advisory Group (''the Group'').

FOR FURTHER INFORMATION CONTACT: Jim Freeman, Advisory Committee Management Officer for the Department of Defense, 703–692–5952.

SUPPLEMENTARY INFORMATION: The Group's charter is being renewed in accordance with the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended) and 41 CFR 102–3.50(d). The Group's charter and contact information for the Board's Designated Federal Officer (DFO) can be found at *http://www.facadatabase.gov/.* The Group provides the Secretary of Defense and the Deputy Secretary of Defense, through the Chairman of the Joint Chiefs of Staff and the Commander of the United States Strategic Command (USSTRATCOM), with independent advice and recommendations on: (a) Scientific, technical, intelligence, and policy-related matters of interest to the Joint Chiefs of Staff and the USSTRATCOM concerning the development and implementation of the Nation's strategic war plans; (b) Enhancements in USSTRATCOM's mission area responsibilities; and (c) Other matters related to the Nation's strategic forces, as requested by the Chairman of the Joint Chiefs of Staff or the Commander, USSTRATCOM.

The Board is composed of no more than 20 members who are eminent authorities in the fields of strategic policy formulation; nuclear weapon design; national command, control, communications, intelligence, and information operations; or other important aspects of the Nation's strategic forces. All members of the Group are appointed to provide advice on behalf of the Government on the basis of their best judgment without representing any particular point of view and in a manner that is free from conflict of interest. Except for reimbursement of official Group-related travel and per diem, Group members serve without compensation. The DoD, when necessary and consistent with the Group's mission and DoD policies and procedures, may establish subcommittees, task forces, or working groups to support the Board. Currently, the Chairman of the Joint Chiefs of Staff has approved one permanent subcommittee to the Group, the Stockpile Assessment Team (''the Team''). The Team is composed of no more than 15 members who are eminent authorities in the fields of strategic policy formulation; nuclear weapon design; national command, control, communications, intelligence, and information operations; or other important aspects of the Nation's strategic forces. The public or interested organizations may submit written statements to Group membership about the Group's mission and functions. Written statements may be submitted at any time or in response to the stated agenda of planned meeting of the Group. All written statements shall be submitted to the DFO for the Group, and this individual will ensure that the written statements are provided to the membership for their consideration.

Dated: April 21, 2016.

DEPARTMENT OF EDUCATION

National Assessment Governing Board Quarterly Board Meeting

AGENCY: National Assessment Governing Board, U.S. Department of Education.

ACTION: Announcement of open and closed meetings.

SUMMARY: This notice sets forth the agenda for the May 12–14, 2016 Quarterly Meeting of the National Assessment Governing Board (hereafter referred to as Governing Board). This notice provides information to members of the public who may be interested in attending the meeting or providing written comments on the meeting. The notice of this meeting is required under § 10(a)(2) of the Federal Advisory Committee Act (FACA).

DATES: The Quarterly Board meeting will be held on the following dates:

- May 12, 2016 from 8:30 a.m. to 6:00 p.m.
- May 13, 2016 from 8:30 a.m. to 5:00 p.m.
- May 14, 2016 from 7:30 a.m. to 12:00 p.m.

ADDRESSES: Marriott Tysons Corner, 8028 Leesburg Pike, Vienna, VA 22182.

FOR FURTHER INFORMATION CONTACT: Munira Mwalimu, Executive Officer/Designated Federal Official, 800 North Capitol Street NW., Suite 825, Washington, DC 20002, telephone: (202) 357–6938, fax: (202) 357–6945.

SUPPLEMENTARY INFORMATION:

Statutory Authority and Function: The National Assessment Governing Board is established under Title III—National Assessment of Educational Progress Authorization Act, Public Law 107–279. Information on the Board and its work can be found at *www.nagb.gov.*

The Board is established to formulate policy for the National Assessment of Educational Progress (NAEP). The Board's responsibilities include the following: Selecting subject areas to be assessed, developing assessment frameworks and specifications, developing appropriate student achievement levels for each grade and subject tested, developing standards and procedures for interstate and national comparisons, improving the form and use of NAEP, developing guidelines for reporting and disseminating results, and releasing initial NAEP results to the public.

May 12–15, 2016 Committee Meetings

The Board's standing committees will meet to conduct regularly scheduled work, based on agenda items planned for this quarterly Board meeting, and follow-up items as reported in the Board's committee meeting minutes available at *http://nagb.gov/what-we-do/board-committee-reports-and-agendas.html.*

Detailed Meeting Agenda: May 12–15, 2016

May 12: Assessment Development Committee: Closed Session: 8:30 a.m.–4:00 p.m.

May 12: Executive Committee: Open Session: 4:30 p.m.–6:00 p.m.

May 13: Full Board Meeting:

Full Board: Open Session: 8:30 a.m.–10:00 a.m.; Closed Session: 12:30 p.m.–2:00 p.m.; Open Session 2:30 p.m.–5:00 p.m.

May 13: Committee Meetings

Assessment Development Committee (ADC): Open Session: 10:00 a.m.–10:40 a.m.; Closed Session: 10:45 a.m.–12:15 p.m.

Reporting and Dissemination Committee (R&D): Open Session 10:00 a.m.–12:15 p.m.

Committee on Standards, Design and Methodology (COSDAM): Open Session: 10:00 a.m.–12:15 p.m.

May 14: Full Board and Committee Meetings

Nominations Committee: Closed Session: 7:30 a.m.–8:15 a.m.

Full Board: Open Session: 8:30 a.m.–12:00 p.m.

On May 12, 2016, the Assessment Development Committee will meet in closed session from 8:30 a.m.–4:00 p.m. to review secure test items for U.S. history, civics, geography at grade 8 for the 2018 operational assessment; reading at grades 4, 8, 12 for the 2019 pilot assessment; and mathematics at grades 4 and 8 for the 2019 pilot assessment. This meeting must be conducted in closed session because the test items are secure and have not been released to the public. Public disclosure of the secure test items would significantly impede implementation of the NAEP assessment program if conducted in open session. Such matters are protected by exemption 9(B) of § 552b(c) of Title 5 U.S.C.

Thereafter, on May 12, the Executive Committee will convene in open session from 4:30 p.m. to 6:00 p.m. to conduct regularly scheduled work.

On May 13, the Full Board will meet in open session from 8:30 a.m. to 10:00 a.m. The Board will review and approve the May 12–15, 2016 Board meeting agenda and meeting minutes from the March 2016 Quarterly Board meeting. This session will be followed by a report from the Executive Director of the Governing Board, William Bushaw, followed by an update on the work of the Institute of Education Sciences (IES) provided by Ruth Neild, Deputy Director for Policy and Research, IES. The National Center for Education Statistics (NCES) update will be provided by the Acting Commissioner of NCES, Peggy Carr. The Board will recess for committee meetings at 9:45 a.m. which are scheduled to take place from 10:00 a.m. to 12:15 p.m.

The Committee on Standards, Design and Methodology and the Reporting and Dissemination (R&D) Committee will meet in open session from 10:00 a.m. to 12:15 p.m.

The Assessment Development Committee (ADC) will meet in open session from 10:00 a.m. to 10:40 a.m., and thereafter in closed session from 10:45 a.m. to 12:15 p.m. During the closed session the ADC will continue its review of secure NAEP reading test questions in grades 4, 8, and 12 for the 2019 pilot assessment and mathematics test questions at grades 4 and 8 for the 2019 pilot assessment. These test questions have not been released to the public. Disclosure of the secure NAEP items would significantly impede implementation of the NAEP assessment program if conducted in open session. Such matters are protected by exemption 9(B) of § 552b(c) of Title 5 U.S.C.

The Committee on Standards, Design and Methodology (COSDAM) will meet in open session from 10:00 a.m. to 12:15 p.m.

Following the committee meetings, on May 13, the full Board will meet in closed session from 12:30 p.m. to 2:00 p.m. to receive a briefing and discuss the 2015 NAEP Science Report Card. Results from the science assessment—national results at grades 4, 8, and 12 and state results at grades 4 and 8 have not been released to the public. Following the science presentation, the Board will receive a briefing on the 2015 mathematics results for Puerto Rico at grades 4 and 8, which have not been released to the public. Premature disclosure of the results would significantly impede implementation of the NAEP assessment program if conducted in open session. Such matters are protected by exemption 9(B) of § 552b(c) of Title 5 U.S.C.

On May 13, from 2:30 p.m. to 3:30 p.m., the Board will meet in open session to discuss the Department of Education's STEM initiative.

This session will then be followed by an update on the Board's Strategic Plan, followed by breakout sessions convened to discuss the Strategic Plan in small groups of Board members. Members of the public are welcome to observe the breakout sessions. The May 13 session of the Board meeting will adjourn at 5:00 p.m.

On May 14, the Nominations Committee will meet in closed session from 7:30 a.m. to 8:15 a.m. The Nominations Committee will receive an update on the status of the nominations for terms beginning in October 2016. The committee will then discuss planning for the Board's annual call for nominations for Board terms beginning in October 2017. The 2017 call for nominations is scheduled to start in September 2016. The Nominations Committee's discussions pertain solely to internal personnel rules and practices of an agency and information of a personal nature where disclosure would constitute an unwarranted invasion of personal privacy. As such, the discussions are protected by exemptions 2 and 6 of § 552b(c) of Title 5 of the United States Code.

The full Board will meet in open session on May 14, from 8:30 a.m. to 9:45 a.m. to discuss the Governing Board's preparedness research program. Thereafter, from 10:00 a.m. to 10:45 a.m. the Board will receive an update on committee reports and take action on the release plan for the 2016 NAEP Science Report Card. From 11:00 a.m. to 12:00 p.m., the Board will receive briefings from each breakout session (convened on Friday to discuss the Board's Strategic Plan) and discuss next steps. The May 14, 2016 meeting is scheduled to adjourn at 12:00 p.m.

Access to Records of the Meeting: Pursuant to FACA requirements, the public may also inspect the meeting materials at *www.nagb.gov* on Thursday, May 13, 2016 by 10:00 a.m. ET. The official verbatim transcripts of the public meeting sessions will be available for public inspection no later than 30 calendar days following the meeting.

Reasonable Accommodations: The meeting site is accessible to individuals with disabilities. If you will need an auxiliary aid or service to participate in the meeting (*e.g.,* interpreting service, assistive listening device, or materials in an alternate format), notify the contact person listed in this notice at least two weeks before the scheduled meeting date. Although we will attempt to meet a request received after that date, we may not be able to make available the requested auxiliary aid or service because of insufficient time to arrange it.

Electronic Access to this Document: The official version of this document is the document published in the **Federal Register.** Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register,** in text or Adobe Portable Document Format (PDF). BILLING CODE P

DEPARTMENT OF EDUCATION

Service Contract Inventory for Fiscal Year (FY) 2015

AGENCY: Office of the Chief Financial Officer, Department of Education.

ACTION: Notice of availability—FY 2015 Service Contract Inventory.

SUMMARY: Through this notice, the Secretary announces the availability of the Department of Education's service contract inventory on its Web site, at *http://www2.ed.gov/fund/data/report/contracts/servicecontractinventoryappendix/servicecontractinventory.html.* A service contract inventory is a tool for assisting an agency in better understanding how contracted services are being used to support mission and operations and whether the contractors' skills are being utilized in an appropriate manner.

FOR FURTHER INFORMATION CONTACT: Pier Connors, U.S. Department of Education, 400 Maryland Avenue SW., Washington, DC 20202 by phone at 202–245–6919 or email at *Pier.Connors@ed.gov.*

If you use a telecommunications device for the deaf or a text telephone, call the Federal Relay Service, toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: Section 743 of Division C of the Consolidated Appropriations Act of 2010, Public Law 111–117, requires civilian agencies, other than the Department of Defense, that are required to submit an inventory in accordance with the Federal Activities Inventory Reform Act of 1998 (Pub. L. 105–270, 31 U.S.C. 501 note) to submit their inventories to the Office of Federal Procurement Policy (OFPP) in the Office of Management and Budget (OMB) by December 31, 2015. In addition, section 743 requires these agencies, which include the Department of Education, to (1) make the inventory available to the public, and (2) publish in the **Federal Register** a notice announcing that the inventory is available to the public along with the name, telephone number, and email address of an agency point of contact.

Through this notice, the Department announces the availability of its inventory on the following Web site: *http://www2.ed.gov/fund/data/report/contracts/servicecontractinventoryappendix/servicecontractinventory.html.* The point of contact for the inventory is provided under the **FOR FURTHER INFORMATION CONTACT** section in this notice.

Accessible Format: Individuals with disabilities can obtain this document in an accessible format (*e.g.,* Braille, large print, or audiotape, or compact disc) on request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: *www.gpo.gov/fdsys.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Authority: Section 743 of Division C of the Consolidated Appropriations Act of 2010, Pub. L. 111–117.

Dated: April 22, 2016.

Thomas P. Skelly,

Director of Budget Service, Delegated the Duties of the Chief Financial Officer.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Agency Information Collection Reinstatement

AGENCY: U.S. Department of Energy.

ACTION: Submission for Office of Management and Budget (OMB) review; public comment request.

SUMMARY: The Department of Energy (DOE), pursuant to the Paperwork Reduction Act of 1995), intends to extend for three years, an information collection request with the Office of Management and Budget (OMB). The information collection request, Historic Preservation for Energy Efficiency Programs, was initially approved on December 1, 2010 under OMB Control No. 1910–5155 and expired on September 30, 2015. The reinstatement will allow DOE to continue data collection on the status of the Weatherization Assistance Program (WAP), the State Energy Program (SEP), and the Energy Efficiency and Conservation Block Grant (EECBG) program.

Program activities will ensure compliance with Section 106 of the National Historic Preservation Act (NHPA). Comments are invited on: (a) Whether the extended collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Comments regarding this proposed information collection must be received on or before June 27, 2016. If you anticipate difficulty in submitting comments within that period, contact the person listed below as soon as possible.

ADDRESSES: Written comments may be sent to Sallie Glaize, EE–52, U.S. Department of Energy, 1000 Independence Ave. SW., Washington, DC 20585 or by email to *sallie.glaize@ee.doe.gov.*

FOR FURTHER INFORMATION CONTACT: James Carlisle, EE–5W, U.S. Department of Energy, 1000 Independence Ave. SW., Washington, DC 20585 or by email to *James.Carlisle@ee.doe.gov.*

Additional information and reporting guidance concerning the Historic Preservation reporting requirement for the WAP, SEP, and EECBG programs are available for review at: *http://www1.eere.energy.gov/wip/historic.preservation.html.*

SUPPLEMENTARY INFORMATION: This information collection request contains: (1) OMB No.: 1910–5155; (2) Information Collection Request Title: Historic Preservation for Energy Efficiency Programs; (3) Type of Review: Reinstatement; (4) Purpose: To collect data on the status of the WAP, SEP and EECBG Program activities to ensure compliance with Section 106 of the NHPA; (5) Annual Estimated Number of Respondents: 275; (6) Annual Estimated Number of Total Responses: 275; (7) Annual Estimated Number of Burden Hours: 662; (8) Annual Estimated Reporting and Recordkeeping Cost Burden: $0.

Statutory Authority: Pub. L. 89–665.

Issued in Washington, DC on April 20, 2016.

James Carlisle,

Supervisory Policy Advisor, Weatherization and Intergovernmental Office of Energy Efficiency and Renewable Energy, U.S. Department of Energy.

[FR Doc. 2016–09834 Filed 4–26–16; 8:45 am]

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Paducah

AGENCY: Department of Energy (DOE)

ACTION: Notice of open meeting.

SUMMARY: This notice announces a meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Paducah. The Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770) requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Thursday, May 19, 2016 6:00 p.m.

ADDRESSES: Barkley Centre, 111 Memorial Drive, Paducah, Kentucky 42001.

FOR FURTHER INFORMATION CONTACT: Jennifer Woodard, Deputy Designated Federal Officer, Department of Energy Paducah Site Office, Post Office Box 1410, MS–103, Paducah, Kentucky 42001, (270) 441–6825.

SUPPLEMENTARY INFORMATION: Purpose of the Board: The purpose of the Board is to make recommendations to DOE–EM and site management in the areas of environmental restoration, waste management and related activities.

Tentative Agenda

Board Meeting—6:00 p.m.

- Call to Order, Introductions, Review of Agenda
- Administrative Issues
- Public Comments (15 minutes)
- Adjourn

Environmental Remediation Subcommittee Meeting—7:00 p.m.

- Call to Order, Introductions, Review of Agenda
- Next Steps and Actions
- Public Comments (15 minutes)
- Adjourn

Breaks Taken as Appropriate

Public Participation: The EM SSAB, Paducah, welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Jennifer Woodard as soon as possible in advance of the meeting at the telephone number listed above. Written statements may be filed with the Board either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Jennifer Woodard at the telephone number listed above. Requests must be received as soon as possible prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to make public comments will be provided a maximum of five minutes to present their comments. The EM SSAB, Paducah, will hear public comments pertaining to its scope (clean-up standards and environmental restoration; waste management and disposition; stabilization and disposition of non-stockpile nuclear materials; excess facilities; future land use and long-term stewardship; risk assessment and management; and clean-up science and

technology activities). Comments outside of the scope may be submitted via written statement as directed above.

Minutes: Minutes will be available by writing or calling Jennifer Woodard at the address and phone number listed above. Minutes will also be available at the following Web site: *http://www.pgdpcab.energy.gov/2016_meetings.htm.*

Issued at Washington, DC, on April 20, 2016.

LaTanya R. Butler

Deputy Committee Management Officer.

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Nevada

AGENCY: Department of Energy.

ACTION: Notice of open meeting.

SUMMARY: This notice announces a meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Nevada. The Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770) requires that public notice of this meeting be announced in the **Federal Register.**

DATES: Wednesday, May 18, 2016, 5:00 p.m.

ADDRESSES: Frank H. Rogers Science and Technology Building, 755 East Flamingo, Las Vegas, Nevada 89119.

FOR FURTHER INFORMATION CONTACT: Barbara Ulmer, Board Administrator, 232 Energy Way, M/S 167, North Las Vegas, Nevada 89030. Phone: (702) 630–0522; Fax (702) 295–2025 or Email: *NSSAB@nnsa.doe.gov.*

SUPPLEMENTARY INFORMATION: Purpose of the Board: The purpose of the Board is to make recommendations to DOE–EM and site management in the areas of environmental restoration, waste management, and related activities.

Tentative Agenda

1. Briefing and Recommendation Development for Proposed Change to Long-Term Monitoring at Closed Sites at Tonopah Test Range—Work Plan Item #2
2. Briefing and Recommendation Development for Revegetation at Corrective Action Unit 111—Work Plan Item #3
3. Recommendation Development for Radioactive Waste Acceptance Program Assessment Process—Work Plan Item #7

Public Participation: The EM SSAB, Nevada, welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Barbara Ulmer at least seven days in advance of the meeting at the phone number listed above. Written statements may be filed with the Board either before or after the meeting. Individuals who wish to make oral presentations pertaining to agenda items should contact Barbara Ulmer at the telephone number listed above. The request must be received five days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to make public comments can do so during the 15 minutes allotted for public comments.

Minutes: Minutes will be available by writing to Barbara Ulmer at the address listed above or at the following Web site: *http://nv.energy.gov/nssab/MeetingMinutes.aspx.*

Issued at Washington, DC, on April 21, 2016.

DEPARTMENT OF ENERGY

Office of Energy Efficiency and Renewable Energy

State Energy Advisory Board (STEAB)

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of open teleconference.

SUMMARY: This notice announces a teleconference call of the State Energy Advisory Board (STEAB). The Federal Advisory Committee Act (Pub. L. 92–463; 86 Stat.770) requires that public notice of these meetings be announced in the **Federal Register**.

DATES: Thursday, May 19, 2016 from 3:30 p.m. to 4:30 p.m. (EDT). To receive the call-in number and passcode, please contact the Board's Designated Federal Officer at the address or phone number listed below.

FOR FURTHER INFORMATION CONTACT: Michael Li, Policy Advisor, Office of Energy Efficiency and Renewable Energy, U.S. Department of Energy, 1000 Independence Ave. SW., Washington, DC 20585. Phone number 202–287–5718, and email: *michael.li@ee.doe.gov.*

SUPPLEMENTARY INFORMATION:

Purpose of the Board: To make recommendations to the Assistant Secretary for the Office of Energy Efficiency and Renewable Energy regarding goals and objectives, programmatic and administrative policies, and to otherwise carry out the Board's responsibilities as designated in the State Energy Efficiency Programs Improvement Act of 1990 (Pub. L. 101–440).

Tentative Agenda: Receive STEAB Task Force updates on action items and revised objectives for FY 2016, discuss follow-up opportunities and engagement with EERE and other DOE staff as needed to keep Task Force work moving forward, continue engagement with DOE, EERE and EPSA staff regarding energy efficiency and renewable energy projects and initiatives, and receive updates on member activities within their states. Recap March meeting and follow-up on action items from that meeting.

Public Participation: The meeting is open to the public. Written statements may be filed with the Board either before or after the meeting. Members of the public who wish to make oral statements pertaining to agenda items should contact Michael Li at the address or telephone number listed above. Requests to make oral comments must be received five days prior to the meeting; reasonable provision will be made to include requested topic(s) on the agenda. The Chair of the Board is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business.

Minutes: The minutes of the meeting will be available for public review and copying within 60 days on the STEAB Web site at: *http://www.energy.gov/eere/steab/state-energy-advisory-board.*

Issued at Washington, DC, on April 20, 2016.

LaTanya R. Butler,

Deputy Committee Management Officer.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Availability of the Draft Environmental Impact Statement for the Proposed Leach XPress Project and Rayne XPress Expansion Project

	Docket No.
Columbia Gas Transmission, LLC	CP15–514–000
Columbia Gulf Transmission, LLC	CP15–539–000

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared a draft environmental impact statement (EIS) for the Leach XPress and Rayne XPress Expansion Projects (Projects), proposed by Columbia Gas Transmission, LLC (Columbia Gas) and Columbia Gulf Transmission, LLC (Columbia Gulf), respectively, in the above-referenced dockets. Columbia Gas requests authorization to construct, operate, abandon in-place, replace, and operate certain natural gas pipeline facilities to transport about 1.5 million dekatherms of natural gas per day of firm transportation service to natural gas consumers served by the Columbia Gas pipeline systems. Columbia Gulf requests authorization to add new compression and provide about 621,000 dekatherms per day of firm transportation on Columbia Gulf's system.

The draft EIS assesses the potential environmental effects of the construction and operation of the Projects in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the Projects would result in limited adverse environmental impacts, with the exception of impacts on forested land; however, these impacts would be reduced to less than significant levels with the implementation of Columbia Gas' and Columbia Gulf's proposed mitigation and the additional measures recommended by staff in the draft EIS.

The U.S. Environmental Protection Agency, the U.S. Army Corps of Engineers, U.S. Fish and Wildlife Service, the Pennsylvania Department of Environmental Protection, the Pennsylvania Department of Conservation and Natural Resources, the Ohio Environmental Protection Agency, the West Virginia Department of Environmental Protection, the West Virginia Department of Natural Resources, and the Kentucky Department for Environmental Protection participated as cooperating agencies in the preparation of the EIS. Cooperating agencies have jurisdiction by law or special expertise with respect to resources potentially affected by the proposals and participate in the NEPA analysis. Although the cooperating agencies provided input to the conclusions and recommendations presented in the draft EIS, the agencies will present their own conclusions and recommendations in their respective Records of Decision for the Projects.

The draft EIS addresses the potential environmental effects of the construction and operation of the following facilities:

- 133 miles of new 30- and 36-inch-diameter natural gas pipeline, 27 miles of 36-inch-diameter looping pipeline [1] in Pennsylvania (Greene County), Ohio (Fairfield, Hocking, Monroe, Morgan, Muskingum, Noble, Perry and Vinton Counties) and West Virginia (Marshall County), 28 miles of 20-inch-diameter pipeline to be abandoned in place in Ohio (Fairfield, Hocking, and Vinton Counties), three new compressor stations, three existing compressor station modifications, four new and one modified regulator stations, 13 pig launcher and receiver facilities,[2] nine mainline valves, and four odorization facilities proposed by Columbia Gas; and
- the new Grayson Compressor Station in Carter County, Kentucky, the new Means Compressor Station in Menifee and Montgomery Counties, Kentucky, and modification of the existing Means Measurement and Regulation Station in Montgomery County, Kentucky proposed by Columbia Gulf.

The FERC staff mailed copies of the draft EIS to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; newspapers and libraries in the project area; and parties to this proceeding. Paper copy versions of this EIS were mailed to those specifically requesting them; all others received a CD version. In addition, the draft EIS is available for public viewing on the FERC's Web site (*www.ferc.gov*) using the eLibrary link. A limited number of copies are available for distribution and public inspection at: Federal Energy Regulatory Commission, Public Reference Room, 888 First Street NE., Room 2A, Washington, DC 20426, (202) 502–8371.

Any person wishing to comment on the draft EIS may do so. To ensure consideration of your comments on the proposal in the final EIS, it is important that the Commission receive your comments on or before June 13, 2016.

For your convenience, there are four methods you can use to submit your comments to the Commission. The Commission will provide equal consideration to all comments received, whether filed in written form or provided verbally. The Commission encourages electronic filing of comments and has expert staff available to assist you at (202) 502–8258 or *efiling@ferc.gov*. Please carefully follow these instructions so that your comments are properly recorded.

(1) You can file your comments electronically using the eComment feature on the Commission's Web site (*www.ferc.gov*) under the link to Documents and Filings. This is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the eFiling feature on the Commission's Web site (*www.ferc.gov*) under the link to Documents and Filings. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''eRegister.'' If you are filing a comment on a particular project, please select ''Comment on a Filing'' as the filing type; or

(3) You can file a paper copy of your comments by mailing them to the following address. Be sure to reference the applicable project docket number (CP15–514–000 or CP15–539–000) with your submission: Nathaniel J. Davis, Sr., Deputy Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Room 1A, Washington, DC 20426.

(4) In lieu of sending written or electronic comments, the Commission invites you to attend one of the public comment meetings its staff will conduct in the project area to receive comments on the draft EIS, scheduled as follows:

[1] A pipeline loop is a segment of pipe constructed parallel to an existing pipeline to increase capacity.

[2] A pig is an internal tool that can be used to clean and dry a pipeline and/or to inspect it for damage or corrosion.

Date	Location
Wednesday, May 18, 2016	Noble County Community Center, Noble County Fairgrounds, (Fairground Road), Caldwell, OH 43724, 740–509–8077.
Thursday, May 19, 2016	Grand Vue Park (Banquet Hall), 250 Trail Drive, Moundsville, WV 26041, 304–845–9810.
Tuesday, May 24, 2016	Lee's Banquet Haus, 580 Radio Lane, Logan, OH 43138, 740–603–7639.
Wednesday, May 25, 2016	Oak Hill Elementary School, 401 East Evans Street, Oak Hill, OH 45656, 740–682–7096.
Thursday, May 26, 2016	Huntington High School, 1 Highlander Way, Huntington, WV 25701, 304–528–6400.

We will begin our sign up of speakers at 5:30 p.m. The comments meetings will begin at 6:00 p.m. with a description of our environmental review process by Commission staff, after which speakers will be called. The meetings will end once all speakers have provided their comments or at 10:00 p.m., whichever comes first. The meetings will be recorded by a court reporter to ensure comments are accurately recorded. Transcripts will be entered into the formal record of the Commission proceeding.

Any person seeking to become a party to the proceeding must file a motion to intervene pursuant to Rule 214 of the Commission's Rules of Practice and Procedures (18 CFR Part 385.214).[3] Only intervenors have the right to seek rehearing of the Commission's decision. The Commission grants affected landowners and others with environmental concerns intervenor status upon showing good cause by stating that they have a clear and direct interest in this proceeding which no other party can adequately represent. Simply filing environmental comments will not give you intervenor status, but you do not need intervenor status to have your comments considered.

Questions?

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC Web site (*www.ferc.gov*) using the eLibrary link. Click on the eLibrary link, click on ''General Search,'' and enter the docket number excluding the last three digits in the Docket Number field (*i.e.*, CP15–514 or CP15–539). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at *FercOnlineSupport@ferc.gov* or toll free at (866) 208–3676; for TTY, contact (202) 502–8659. The eLibrary link also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription that allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to *www.ferc.gov/docs-filing/esubscription.asp.*

[3] See the previous discussion on the methods for filing comments.

Dated: April 21, 2016.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OGC–2016–0237; FRL 9945–73–OGC]

Proposed Consent Decree, Clean Air Act Citizen Suit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed consent decree; request for public comment.

SUMMARY: In accordance with section 113(g) of the Clean Air Act, as amended (''CAA'' or the ''Act''), notice is hereby given of a proposed consent decree to address a lawsuit filed by Sierra Club and the Louisiana Environmental Action Network (collectively

''Plaintiffs'') in the United States District Court for the Middle District of Louisiana: *Louisiana Environmental Action Network* v. *McCarthy,* Civil Action No. 3:15–cv–00858–JJB–RLB (M.D. L.A.). On December 23, 2015, Plaintiffs filed a complaint and amended complaint alleging that Gina McCarthy, in her official capacity as Administrator of the United States Environmental Protection Agency (''EPA''), failed to perform a non-discretionary duty to grant or deny within 60 days a petition submitted by Plaintiffs on May 19, 2015 requesting that EPA object to a CAA Title V permit issued by the Louisiana Department of Environmental Quality (''LDEQ''), to Yuhuang Chemical Inc., authorizing the construction and operation of the Yuhuang methanol manufacturing plant in St. James, Louisiana. The proposed consent decree would establish a deadline for EPA to take such action.

DATES: Written comments on the proposed consent decree must be received by May 27, 2016.

ADDRESSES: Submit your comments, identified by Docket ID number EPA–HQ–OGC–2016–0237, online at *http://www.regulations.gov* (EPA's preferred method); by email to *oei.docket@epa.gov;* by mail to EPA Docket Center, Environmental Protection Agency, Mailcode: 2822T, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; or by hand delivery or courier to EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC, between 8:30 a.m. and 4:30 p.m. Monday through Friday, excluding legal holidays. Comments on a disk or CD–ROM should be formatted in Word or ASCII file, avoiding the use of special characters and any form of encryption, and may be mailed to the mailing address above.

FOR FURTHER INFORMATION CONTACT: John Krallman, Air and Radiation Law Office (2344A), Office of General Counsel, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone: (202) 564–0904; fax number (202) 564–5603; email address: *krallman.john@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. Additional Information About the Proposed Consent Decree

The proposed consent decree would resolve a lawsuit filed by the Plaintiffs seeking to compel the Administrator to take actions under CAA section 505(b)(2). Under the terms of the proposed consent decree, EPA would agree to sign its response granting or denying the petition filed by Plaintiffs regarding the Yuhuang methanol manufacturing plant located in St. James, Louisiana, pursuant to section 505(b)(2) of the CAA, on or before September 1, 2016.

Under the terms of the proposed consent decree, EPA would expeditiously deliver notice of EPA's response to the Office of the Federal Register for review and publication following signature of such response. In addition, the proposed consent decree outlines the procedure for the Plaintiffs to request costs of litigation, including attorney fees.

For a period of thirty (30) days following the date of publication of this notice, the Agency will accept written comments relating to the proposed consent decree from persons who are not named as parties or intervenors to the litigation in question. EPA or the Department of Justice may withdraw or withhold consent to the proposed consent decree if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act. Unless EPA or the Department of Justice determines that consent to this consent decree should be withdrawn, the terms of the consent decree will be affirmed.

II. Additional Information About Commenting on the Proposed Consent Decree

A. How can I get a copy of the consent decree?

The official public docket for this action (identified by Docket ID No EPA–HQ–OGC–2016–0237) contains a copy of the proposed consent decree. The official public docket is available for public viewing at the Office of Environmental Information (OEI) Docket in the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The EPA Docket Center Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OEI Docket is (202) 566–1752.

An electronic version of the public docket is available through *http://www.regulations.gov.* You may use *http://www.regulations.gov* to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select ''search.''

It is important to note that EPA's policy is that public comments, whether submitted electronically or in paper, will be made available for public viewing online at *http://www.regulations.gov* without change, unless the comment contains copyrighted material, confidential business information (CBI), or other information whose disclosure is restricted by statute. Information claimed as CBI and other information whose disclosure is restricted by statute is not included in the official public docket or in the electronic public docket. EPA's policy is that copyrighted material, including copyrighted material contained in a public comment, will not be placed in EPA's electronic public docket but will be available only in printed, paper form in the official public docket. Although not all docket materials may be available electronically, you may still access any of the publicly available docket materials through the EPA Docket Center.

B. How and to whom do I submit comments?

You may submit comments as provided in the **ADDRESSES** section. Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment and with any disk or CD–ROM you submit. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the *http://www.regulations.gov* Web site to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an ''anonymous access'' system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment.

In contrast to EPA's electronic public docket, EPA's electronic mail (email) system is not an ''anonymous access'' system. If you send an email comment directly to the Docket without going through *www.regulations.gov,* your email address is automatically captured and included as part of the comment that is placed in the official public docket, and made available in EPA's electronic public docket.

Dated: April 19, 2016.

Lorie J. Schmidt,

Associate General Counsel.

BILLING CODE P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OECA–2012–0691; FRL–9945–32–OEI]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Mercury Cell Chlor-Alkali Plants (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), ''NESHAP for Mercury Cell Chlor-Alkali Plants (40 CFR part 63, subpart IIIII) (Renewal)'' (EPA ICR No. 2046.08, OMB Control No. 2060–0542), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through April 30, 2016. Public comments were previously requested via the **Federal Register** (80 FR 32116) on June 5, 2015 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may neither conduct nor sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before May 27, 2016.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA–HQ–OECA–2012–0691, to: (1) EPA online using *www.regulations.gov* (our preferred method), or by email to *docket.oeca@epa.gov,* or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460; and (2) OMB via email to *oira_submission@omb.eop.gov.* Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460; telephone number: (202) 564–2970; email address: *yellin.patrick@epa.gov.*

SUPPLEMENTARY INFORMATION: Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at *www.regulations.gov* or in person at the EPA Docket Center, EPA West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202–566–1744. For additional information about EPA's public docket, visit: *http://www.epa.gov/dockets.*

Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the general provisions of 40 CFR part 63, subpart A, as well as for the specific requirements at 40 CFR part 63, subpart IIIII. This includes submitting initial notification reports, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with these standards.

Form Numbers: None.

Respondents/affected entities: Mercury cell chlor-alkali plants.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart IIIII).

Estimated number of respondents: 2 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 3,760 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: $394,000 (per year), which includes in $16,400 annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is a small adjustment increase in the respondent labor hours as currently identified in the OMB Inventory of Approved Burdens. The increase is due to a change in assumption. In this ICR, we assume all existing sources will take some time each year to re-familiarize themselves with the regulatory requirements.

Courtney Kerwin,

Acting-Director, Collection Strategies Division.

FEDERAL DEPOSIT INSURANCE CORPORATION

Sunshine Act Meeting

Pursuant to the provisions of the ''Government in the Sunshine Act'' (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance

Corporation's Board of Directors will meet in open session at 10:00 a.m. on Tuesday, April 26, 2016, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous Board of Directors' Meetings.

Memorandum and resolution re: Notice of Final Rulemaking: Revisions to Part 341 of the FDIC's Rules and Regulations Requiring the Registration of Securities Transfer Agents.

Summary reports, status reports, and reports of actions taken pursuant to authority delegated by the Board of Directors.

Discussion Agenda

Memorandum and resolution re: Notice of Proposed Rulemaking: Incentive-based Compensation Arrangements.

Memorandum and resolution re: Deposit Insurance Assessments for Small Banks.

The meeting will be held in the Board Room located on the sixth floor of the FDIC Building located at 550 17th Street NW., Washington, DC.

This Board meeting will be Webcast live via the Internet and subsequently made available on-demand approximately one week after the event. Visit *https://fdic.primetime.mediaplatform.com/#!/channel/1232003497484/Board+Meetings* to view the event. If you need any technical assistance, please visit our Video Help page at: *https://www.fdic.gov/video.html.*

The FDIC will provide attendees with auxiliary aids (*e.g.,* sign language interpretation) required for this meeting. Those attendees needing such assistance should call 703–562–2404 (Voice) or 703–649–4354 (Video Phone) to make necessary arrangements.

Requests for further information concerning the meeting may be directed to Mr. Robert E. Feldman, Executive Secretary of the Corporation, at 202–898–7043.

Dated: April 20, 2016.

BILLING CODE P

FEDERAL MARITIME COMMISSION

Notice of Agreements Filed

The Commission hereby gives notice of the filing of the following agreements under the Shipping Act of 1984. Interested parties may submit comments on the agreements to the Secretary, Federal Maritime Commission, Washington, DC 20573, within twelve days of the date this notice appears in the **Federal Register**. Copies of the agreements are available through the Commission's Web site (*www.fmc.gov*) or by contacting the Office of Agreements at (202) 523–5793 or *tradeanalysis@fmc.gov.*

Agreement No.: 011961–021.
Title: The Maritime Credit Agreement.
Parties: Maersk Line A/S; Cosco Container Lines Company Limited; Hanjin Shipping Co., Ltd.; Kawasaki Kisen Kaisha Ltd.; United Arab Shipping Company; Wallenius Wilhelmsen Logistics AS; and Zim Integrated Shipping Services, Ltd.
Filing Party: Wayne R. Rohde, Esq.; Cozen O'Conner; 1200 19th Street NW., Washington, DC 20036.
Synopsis: The amendment deletes China Shipping Container Lines Co. Ltd. as a party to the Agreement.

Agreement No.: 012067–015.
Title: U.S. Supplemental Agreement to HLC Agreement.
Parties: BBC Chartering Carriers GmbH & Co. KG and BBC Chartering & Logistic GmbH & Co. KG, as a single member; Chipolbrok (Chinese-Polish Joint Stock Shipping Company); Hanssy Shipping Pte. Ltd.; Hyundai Merchant Marine Co., Ltd.; Industrial Maritime Carriers, L.L.C.; Nordana Line A/S; and Rickmers-Linie GmbH & Cie. KG.
Filing Party: Wade S. Hooker, Esq.; 211 Central Park W; New York, NY 10024.
Synopsis: The amendment deletes Safmarine MPV N.V. as a party to the U.S. Agreement and the worldwide HLC Agreement.

Agreement No.: 012327–003.
Title: ''K'' Line/WHL/WHS/PIL Space Charter and Sailing Agreement.
Parties: Kawasaki Kisen Kaisha, Ltd.; Wan Hai Lines (Singapore) PTE Ltd.; Wan Hai Lines Ltd.; Pacific International Lines (PTE) Ltd.
Filing Party: Eric. C. Jeffrey, Esq.; Nixon Peabody LLP; 799 9th Street NW., Suite 500; Washington, DC 20001.
Synopsis: The amendment adds Vietnam to the geographic scope of the Agreement.

Agreement No.: 012400.
Title: Trailer Bridge/Marinex Cargo Line Space Charter Agreement.
Parties: Trailer Bridge, Inc. and Marinex Cargo Line.
Filing Party: Keith B. Letourneau, Esq.; Blank Rome, LLP; 717 Texas Avenue; Suite 1400; Houston, TX 77002.
Synopsis: The agreement authorizes Marinex to charter space to Trailer Bridge in the trade between Puerto Rico on the one hand, and St. Maarten, St. Croix, St. Thomas, and Tortola on the other hand.

Agreement No.: 012401.
Title: Trailer Bridge/America Cruise Ferries Space Charter Agreement.
Parties: Trailer Bridge, Inc. and American Cruise Ferries, Inc.
Filing Party: Keith B. Letourneau, Esq.; Blank Rome, LLP; 717 Texas Avenue; Suite 1400; Houston, TX 77002.
Synopsis: The agreement authorizes American Cruise Ferries to charter space to Trailer Bridge in the trade between Puerto Rico and the Dominican Republic.

Agreement No.: 012402.
Title: APL/Hamburg Sud Space Charter Agreement.
Parties: Hamburg Sud; and APL Co. Pte Ltd. and American President Lines, Ltd. (collectively ''APL'').
Filing Party: Eric. C. Jeffrey, Esq.; Nixon Peabody LLP; 799 9th Street NW., Suite 500; Washington, DC 20001.
Synopsis: The agreement authorizes APL to charter space to Hamburg Sud in the trade from China, Hong Kong, and Korea to the United States Pacific Northwest.

Agreement No.: 012403.
Title: MOL/ZIM Slot Exchange Agreement.
Parties: Mitsui O.S.K. Lines, Ltd. and Zim Integrated Shipping Services Co., Ltd.
Filing Party: Mark E. Newcomb; ZIM American Integrated Shipping Services, Co. LLC; 5801 Lake Wright Dr.; Norfolk, VA 23508.
Synopsis: The agreement authorizes the parties to exchange slots on each other's services in the trade between the U.S. on the one hand; and China, Korea, Malaysia, Panama, Saudi Arabia, Singapore, Sri Lanka, Taiwan, and Vietnam on the other hand.

Agreement No.: 012404.
Title: COSCON/UASC Slot Charter Agreement Asia—USWC.
Parties: COSCO Container Lines Co. Ltd. and United Arab Shipping Co., S.A.G.
Filing Party: Eric. C. Jeffrey, Esq.; Nixon Peabody LLP; 799 9th Street NW., Suite 500; Washington, DC 20001.
Synopsis: The agreement provides for the exchange of slots between COSCON

and UASC on their respective services in the trade between the United States West Coast and China (including Hong Kong), Korea, Malaysia, Singapore, and Vietnam.

Agreement No.: 201232–001.

Title: NYSA–ILA Assessment Agreement.

Parties: International Longshoremen's Association and New York Shipping Association.

Filing Parties: Donato Caruso, Esq.; The Lambos Firm, LLP; 303 South Broadway,Suite 410; Tarrytown, NY 10591 and Andre Mazzola, Esq.; Marrinan & Mazzola Mardon, P.C.; 26 Broadway, 17th Floor; New York, NY 10004.

Synopsis: The amendment reduces the assessment for all House Containers Within 260 Miles to $89.00 per container in all trades except in the Bermuda Trade.

By Order of the Federal Maritime Commission.

Dated: April 22, 2016.

Rachel E. Dickon,

Assistant Secretary.

BILLING CODE 6731–AA–P

FEDERAL MARITIME COMMISSION

Agency Information Collection Activities: 60-Day Public Comment Request

AGENCY: Federal Maritime Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of our continuing effort to reduce paperwork and respondent burden, and as required by the Paperwork Reduction Act of 1995, the Federal Maritime Commission (Commission) invites comments on the continuing information collection (extension with no changes) listed below in this notice.

DATES: Written comments must be submitted on or before June 27, 2016.

ADDRESSES: Address all comments to: Vern W. Hill, Managing Director, Office of the Managing Director, Federal Maritime Commission, 800 North Capitol Street NW., Washington, DC 20573, Phone: (202) 523–5800, Email: *omd@fmc.gov.*

Please send separate comments for each specific information collection listed below. You must reference the information collection's title and OMB number in your comments.

FOR FURTHER INFORMATION CONTACT: Copies of the information collections and instructions, or copies of any comments received, may be obtained by contacting Donna Lee on (202) 523–5800 or email at *dlee@fmc.gov.*

SUPPLEMENTARY INFORMATION:

Request for Comments

The Commission, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to comment on the continuing information collection listed in this notice, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Comments submitted in response to this notice will be included or summarized in our request for Office of Management and Budget (OMB) approval of the relevant information collection. All comments are part of the public record and subject to disclosure. Please do not include any confidential or inappropriate material in your comments. We invite comments on: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Information Collection Open for Comment

Title: 46 CFR part 532—NVOCC Negotiated Rate Arrangements.

OMB Approval Number: 3072–0071 (Expires July 31, 2016).

Abstract: Section 16 of the Shipping Act of 1984, 46 U.S.C. 40103, authorizes the Commission to exempt by order or regulation ''any class of agreements between persons subject to this [Act] or any specified activity of those persons from any requirement of this [Act] if the Commission finds that the exemption will not result in substantial reduction in competition or be detrimental to commerce.'' The Commission may attach conditions to any exemption and may, by order, revoke an exemption. In 46 CFR part 532, the Commission exempted non-vessel-operating common carriers (NVOCCs) from the tariff rate publication requirements of Part 520, and allowed an NVOCC to enter into an NVOCC Negotiated Rate Arrangement (NRA) in lieu of publishing its tariff rate(s), provided the NVOCC posts a prominent notice in its rules tariff invoking the NRA exemption and provides electronic access to its rules tariff to the public free of charge. This information collection corresponds to the rules tariff prominent notice and the requirement to make its tariff publicly available free of charge.

Current Actions: There are no changes to this information collection, and it is being submitted for extension purposes only.

Type of Review: Extension.

Needs and Uses: The Commission uses the information filed by an NVOCC in its rules tariff to determine whether the NVOCC has invoked the exemption for a particular shipment or shipments. The Commission has used and will continue to use the information required to be maintained by NVOCCs for monitoring and investigatory purposes, and, in its proceedings, to adjudicate related issues raised by private parties.

Frequency: An NVOCC invokes the NRA exemption by publishing a prominent notice in its rules tariff once.

Type of Respondents: NVOCCs.

Number of Annual Respondents: 255. While there has been a substantial decrease in the number of annual responses, in 2013 the NRA exemption was extended to include foreign unlicensed NVOCCs, which resulted in a ''one-time'' increase in the number of annual respondents to 626. The Commission expects the number of annual respondents to remain at 255 in the future, as new NVOCCs enter the market and some invoke the exemption.

Estimated Time per Response: 15 minutes for those adding a tariff rule to use a combination of tariff rates and NRAs. One hour for those who make their tariff rules publicly available by opting to use NRAs exclusively and posting them to their Web site.

Total Annual Burden: Based on the number of NVOCCs who have filed a rule or prominent notice in their respective tariffs, we calculate that 25% of new NVOCCs will use the NRA exemption. Of those, about 3% will use NRAs exclusively. Almost all will likely use similar language invoking the exemption in their tariffs. For the 255 annual respondents, the total burden is calculated as follows:

8×1 hour = 8 hours (3% using NRAs exclusively)

$247 \times .25$ hour = 61.75 hours rounded to 62 (combination of tariff rates and NRAs)

Total annual burden is estimated to be 70 hours.

Rachel E. Dickon,

Assistant Secretary.

Submission for OMB Review; Schedules for Construction Contracts

AGENCY: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for public comment regarding an extension to an existing OMB clearance.

SUMMARY: Under the provisions of the Paperwork Reduction Act, the Regulatory Secretariat Division will be submitting to the Office of Management and Budget (OMB) a request to review and approve an extension of a previously approved information collection requirement concerning schedules for construction contracts. A notice was published in the **Federal Register** at 81 FR 7799 on February 16, 2016. No comments were received.

DATES: Submit comments on or before May 27, 2016.

ADDRESSES: Submit comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for GSA, Room 10236, NEOB, Washington, DC 20503. Additionally submit a copy to GSA by any of the following methods:

- *Regulations.gov: http://www.regulations.gov.*

Submit comments via the Federal eRulemaking portal by searching the OMB control number. Select the link ''Submit a Comment'' that corresponds with ''Information Collection 9000–0058, Schedules for Construction Contracts''. Follow the instructions provided at the ''Submit a Comment'' screen. Please include your name, company name (if any), and ''Information Collection 9000–0058, Schedules for Construction Contracts'' on your attached document.

- *Mail:* General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405. ATTN: Ms. Flowers/IC 9000–0058, Schedules for Construction Contracts.

Instructions: Please submit comments only and cite Information Collection 9000–0058, Schedules for Construction Contracts, in all correspondence related to this collection. Comments received generally will be posted without change to *http://www.regulations.gov,* including any personal and/or business confidential information provided. To confirm receipt of your comment(s), please check *www.regulations.gov,* approximately two to three days after submission to verify posting (except allow 30 days for posting of comments submitted by mail).

FOR FURTHER INFORMATION CONTACT: Mr. Curtis E. Glover, Sr., Procurement Analyst, Office of Acquisition Policy, 202–501–1448 or email *curtis.glover@gsa.gov.*

SUPPLEMENTARY INFORMATION:

A. Purpose

Federal construction contractors may be required to submit schedules, in the form of a progress chart, showing the order in which the Contractor proposes to perform the work. In accordance with FAR 52.236–15, Schedules for Construction Contracts, the Contractor shall, within five days after work commences on the contract or another period of time determined by the contracting officer, prepare and submit to the contracting officer for approval three copies of a practicable schedule showing the order in which the Contractor proposes to perform the work, and the dates on which the Contractor contemplates starting and completing the several salient features of the work (including acquiring materials, plants, and equipment). This information is used to monitor progress under a Federal construction contract when other management approaches for ensuring adequate progress are not used. If the Contractor fails to submit a schedule within the time prescribes, the Contracting Officer may withhold approval of progress payments until the Contractor submits the required schedule.

B. Annual Reporting Burden

Respondents: 3,804.

Responses per Respondent: 2.

Annual Responses: 7,608.

Hours per Response: 4.

Total Burden Hours: 30,432.

Affected Public: Businesses or other for-profit and not-for-profit institutions.

Frequency: On occasion.

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat (MVCB), 1800 F Street NW., Washington, DC 20405, telephone 202–501–4755. Please cite OMB Control No. 9000–0058, Schedules for Construction Contracts, in all correspondence.

Dated: April 21, 2016.

Lorin S. Curit,

Director, Federal Acquisition Policy Division, Office of Governmentwide Acquisition Policy, Office of Acquisition Policy, Office of Governmentwide Policy.

ADDRESSES: Submit comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for GSA, Room 10236, NEOB, Washington, DC 20503. Additionally submit a copy to GSA by any of the following methods:

• *Regulations.gov: http://www.regulations.gov.* Submit comments via the Federal eRulemaking portal by searching the OMB control number. Select the link ''Submit a Comment'' that corresponds with ''Information Collection 9000–0029, Extraordinary Contractual Action Requests''. Follow the instructions provided at the ''Submit a Comment'' screen. Please include your name, company name (if any), and ''Information Collection 9000–0029, Extraordinary Contractual Action Requests'' on your attached document.

• *Mail:* General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405. ATTN: Ms. Flowers/IC 9000–0029, Extraordinary Contractual Action Requests.

Instructions: Please submit comments only and cite Information Collection 9000–0029, Extraordinary Contractual Action Requests, in all correspondence related to this collection. Comments received generally will be posted without change to *http://www.regulations.gov,* including any personal and/or business confidential information provided. To confirm receipt of your comment(s), please check *www.regulations.gov,* approximately two to three days after submission to verify posting (except allow 30 days for posting of comments submitted by mail).

FOR FURTHER INFORMATION CONTACT: Ms. Cecelia L. Davis, Procurement Analyst, Office of Governmentwide Acquisition Policy, GSA, at 202–219–0202 or email at *cecelia.davis@gsa.gov.*

SUPPLEMENTARY INFORMATION:

A. Purpose

FAR subpart 50.1 prescribes policies and procedures that allow contracts to be entered into, amended, or modified in order to facilitate national defense under the extraordinary emergency authority granted under 50 U.S.C. 1431 *et seq.* and Executive Order (E.O.) 10789 dated November 14, 1958, *et seq.*

This authority applies to the Government Printing Office; the Department of Homeland Security; the Tennessee Valley Authority; the National Aeronautics and Space Administration; the Department of Defense; the Department of the Army; the Department of the Navy; the Department of the Air Force; the Department of the Treasury; the Department of the Interior; the Department of Agriculture; the Department of Commerce; and the Department of Transportation. Also included is the Department of Energy for functions transferred to that Department from other authorized agencies and any other agency that may be authorized by the President.

In order for a contractor to be granted relief under the FAR, specific evidence must be submitted which supports the firm's assertion that relief is appropriate and that the matter cannot be disposed of under the terms of the contract.

FAR 50.103–3 specifies the minimum information that a contractor must include in a request for contract adjustment in accordance with FAR 50–103–1 and 50.103–2.

FAR 50–103–4 sets forth additional information that the contracting officer or other agency official may request from the contractor to support any request made under FAR 50.103–3.

FAR 50.104–3 sets forth the information that the contractor shall include in a request for the indemnification clause to cover unusually hazardous or nuclear risks.

FAR 52.250–1, Indemnification under Public Law 850804, requires in paragraph (g) that the contractor shall promptly notify the contracting officer of any claim or action against, or loss by, the contractor or any subcontractors that may reasonably to involve indemnification under the clause.

The information is used by the Government to determine if relief can be granted under FAR and to determine the appropriate type and amount of relief.

B. Annual Reporting Burden

Respondents: 28.
Responses per Respondent: About 6.
Total Responses: 164.
Hours per Response: About 41.5.
Total Burden Hours: 6,800.

Obtaining Copies of Proposals: Requester may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW., Washington, DC 20405, telephone 202–501–4755. Please cite OMB Control No. 9000–0029, Extraordinary Contractual Action Requests, in all correspondence.

Dated: April 21, 2016.

Lorin S. Curit,

Director, Federal Acquisition Policy Division, Office of Governmentwide Acquisition Policy, Office of Acquisition Policy, Office of Governmentwide Policy.

BILLING CODE 4163–19–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Comment Request

Proposed Projects:

Title: Child Support Noncustodial Parent Employment Demonstration (CSPED).

OMB No.: 0970–439.

Description: The Office of Child Support Enforcement (OCSE) within the Administration for Children and Families (ACF) seeks an extension without change for an existing data collection called the Child Support Noncustodial Parent Employment Demonstration (CSPED) through September 30, 2018 (OMB no. 0970–439; expiration date September 30, 2016). OCSE is proposing that this information collection be extended to continue using 8 of the 10 currently approved information collection instruments with a reduction in burden hours to reflect only the extension period, estimated to be two years and three months, from July 1, 2016 to September 30, 2018.

In October 2012, OCSE issued grants to eight state child support agencies to provide employment, parenting, and child support services to noncustodial parents who are having difficulty meeting their child support obligation. The overall objective of the CSPED evaluation is to document and evaluate the effectiveness of the approaches taken by these eight CSPED grantees. This evaluation will yield information about effective strategies for improving child support payments by providing noncustodial parents employment and other services through child support programs. It will generate extensive information on how these programs operated, what they cost, the effects the programs had, and whether the benefits of the programs exceed their costs. The information gathered will be critical to informing decisions related to future investments in child support-led employment-focused programs for noncustodial parents who have difficulty meeting their child support obligations.

The CSPED evaluation includes the following two interconnected components or ''studies'':

1. Implementation and Cost Study. The goal of the implementation and cost study is to provide a detailed description of the programs—how they are implemented, their participants, the contexts in which they are operated, their promising practices, and their costs. The detailed descriptions will assist in interpreting program impacts, identifying program features and conditions necessary for effective program replication or improvement, and carefully documenting the costs of delivering these services. Key activities of the implementation and cost study include: (1) Conducting semi-structured interviews with program staff and selected community partner organizations to gather information on program implementation and costs; (2) conducting focus groups with program participants to elicit participation experiences; (3) administering a web-based survey to program staff and community partners to capture broader staff program experiences; and (4) collecting data on study participant service use, dosage, and duration of enrollment throughout the demonstration using a web-based Management Information System (MIS).

2. Impact Study. The goal of the impact study is to provide rigorous estimates of the effectiveness of the eight programs using an experimental research design. Program applicants who are eligible for CSPED services are randomly assigned to either a program group that is offered program services or a control group that is not. The study MIS that documents service use for the implementation study is also used by grantee staff to conduct random assignment for the impact study. The impact study relies on data from surveys of participants, as well as administrative records from state and county data systems. Survey data are collected twice from program applicants. Baseline information is collected from all noncustodial parents who apply for the program prior to random assignment. A follow-up survey is collected from sample members twelve months after random assignment. A wide range of measures are collected through surveys, including measures of employment stability and quality, barriers to employment, parenting and co-parenting, and demographic and socio-economic characteristics. In addition, data on child support obligations and payments, Temporary Assistance for Needy Families (TANF) and Supplemental Nutrition Assistance Program (SNAP) benefits, Medicaid receipt, involvement with the criminal justice system, and earnings and benefit data collected through the Unemployment Insurance (UI) system are obtained from state and county databases.

Two components of the data collection have been completed: (1) Focus groups with program participants; and (2) the web-based survey to document program staff and partner experiences. The following data collection activities are not yet complete: (1) The staff interview topic guide; (2) the study MIS functions for tracking participation in the program; (3) the introductory script which program staff use to introduce the study to participants; (4) the introductory script heard by program applicants; (5) the baseline survey; (6) the study MIS functions for conducting random assignment; (7) the protocol for collecting child support, benefit, earnings, and criminal justice data from state and county administrative data systems; and (8) the 12-month follow-up survey. As of January 1, 2016, 8,060 participants have been enrolled and completed the baseline survey and over 2,300 participants have completed the 12-month follow-up survey.

Respondents

Respondents to these activities include program applicants, study participants, grantee staff and community partners, as well as state and county staff responsible for extracting data from government databases for the evaluation. Specific respondents per instrument are noted in the burden tables below.

Annual Burden Estimates

The following instruments are proposed for public comment under this 60-Day **Federal Register** Notice. The following table provides the burden

estimates for the implementation and cost study and the impact study components of the current request. The requested extension period is estimated to be two years and three months, from July 1, 2016 to September 30, 2018. Thus, burden hours for all components are annualized over two years and three months.

IMPLEMENTATION AND COST STUDY

Instrument	Total number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours	Total annual burden hours [a]
Staff interview topic guide	120	1	1	120	53
Study MIS to track program participation	200	468.75	0.0333	3,125	1,390
Impact Study					
Introductory script:					
Grantee staff	120	9	0.1667	180	80
Program applicants [b]	1,050	1	0.1667	175	78
Baseline survey	1,000	1	0.5833	583	259
Study MIS to conduct random assignment	120	9	0.1667	180	80
Protocol for collecting administrative records	32	1	8	256	114
12 month follow-up survey	1,476	1	0.75	1,107	492

[a] All burden estimates are annualized over 2.25 years.
[b] Five percent of program applicants are not expected to agree to participate in the study; thus there are 5% more program applicants than study participants.

Estimated Total Annual Burden Hours: 2,546.

In compliance with the requirements of Section 506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Administration for Children and Families is soliciting public comment on the specific aspects of the information collection described above. Copies of the proposed collection of information can be obtained and comments may be forwarded by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation, 330 C Street SW., Washington, DC 20201. Attn: ACF Reports Clearance Officer. Email address: *infocollection@acf.hhs.gov.* All requests should be identified by the title of the information collection.

The Department specifically requests comments on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Robert Sargis,

Reports Clearance Officer.

[FR Doc. 2016–09803 Filed 4–26–16; 8:45 am]

BILLING CODE 4184–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–N–2016–1134]

Public Meeting on Patient-Focused Drug Development for Patients Who Have Received an Organ Transplant

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public meeting; request for comments.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing a public meeting and an opportunity for public comment on Patient-Focused Drug Development for patients who have received an organ transplant. Patient-Focused Drug Development is part of FDA's performance commitments made as part of the fifth authorization of the Prescription Drug User Fee Act (PDUFA V). The public meeting is intended to allow FDA to obtain patient perspectives on the impact of receiving an organ transplant on daily life and patient views on treatment approaches; the input from this public meeting will help in developing topics for further discussion. FDA is also interested in discussing issues related to scientific challenges in developing drugs to manage organ transplantation. In the afternoon, FDA will hold a workshop and provide information for and gain perspective from patients and patient advocacy organizations, health care providers, academic experts, and industry on various aspects of clinical development of drug products intended to manage organ transplantation.

DATES: The public meeting will be held on September 27, 2016, from 9 a.m. to 5 p.m. Please register here for the meeting by September 20, 2016: *http://organtransplantpfdd.eventbrite.com.* Submit electronic or written comments to the public docket by November 27, 2016.

ADDRESSES: The meeting and workshop will be held at the FDA White Oak Campus, 10903 New Hampshire Ave., Bldg. 31 Conference Center, the Great Room (Rm.1503), Silver Spring, MD 20993–0002. Participants must enter through Building 1 and undergo security screening. For more information on parking and security procedures, please refer to *http://www.fda.gov/AboutFDA/WorkingatFDA/BuildingsandFacilities/WhiteOakCampusInformation/ucm241740.htm.*

You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or

anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand delivery/Courier (for written/paper submissions):*Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2016–N–1134 for ''Public Meeting on Patient-Focused Drug Development for Patients Who Have Received an Organ Transplant.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION''. The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FDA will post the agenda approximately 5 days before the meeting at: *http://www.fda.gov/ForIndustry/UserFees/PrescriptionDrugUserFee/ucm495933.htm.*

FOR FURTHER INFORMATION CONTACT: Graham Thompson, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 1146, Silver Spring, MD 20993, 301–796–5003, FAX: 301–847–8443, *graham.thompson@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background on Patient-Focused Drug Development

FDA has selected patients who have received an organ transplant as the focus of a public meeting under Patient-Focused Drug Development, an initiative that involves obtaining a better understanding of patient perspectives on the severity of a disease and the available therapies for these conditions. Patient-Focused Drug Development is being conducted to fulfill FDA performance commitments that are part of the reauthorization of the PDUFA under Title I of the Food and Drug Safety and Innovation Act (Pub. L. 112–144). The full set of performance commitments is available at *http://www.fda.gov/downloads/forindustry/userfees/prescriptiondruguserfee/ucm270412.pdf.*

FDA committed to obtain the patient perspective on 20 disease areas during the course of PDUFA V. For each disease area, the Agency will conduct a public meeting to discuss the disease and its impact on patients' daily lives, the types of treatment benefit that matter most to patients, and patients' perspectives on the adequacy of the available therapies. These meetings will include participation of FDA review divisions, the relevant patient communities, and other interested stakeholders.

On July 2, 2015, FDA published a notice (80 FR 32816) in the **Federal Register** announcing the disease areas for meetings in fiscal years 2016–2017, final 2 years of PDUFA V time frame. The Agency used several criteria outlined in that notice to develop the list of disease areas. FDA obtained public comment on the Agency's proposed criteria and potential disease areas through a public docket. In selecting the set of disease areas, FDA carefully considered the public comments received and the perspectives of review divisions at FDA. More information, including the list of disease areas and a general schedule of meetings, is posted at *http://www.fda.gov/ForIndustry/UserFees/PrescriptionDrugUserFee/ucm326192.htm.*

II. Public Meeting and Workshop Information

A. Purpose and Scope of the Meeting

The purpose of this Patient-Focused Drug Development meeting is to obtain input on organ transplantation and current approaches to management of organ transplantation. In 2015, over 25,000 people in the United States received an organ transplant. Organ transplantation requires pharmacologic and non-pharmacologic management before and after receipt. There are FDA-approved therapies used to assist the immune system in responding properly to the transplanted organ. Treatment requires a combination of drugs given for the lifetime of a transplanted organ. FDA is committed to working with all stakeholders to develop safe and effective therapies for affected individuals.

The questions that will be asked of patients and patient stakeholders at the meeting are listed in this section, organized by topic. For each topic, a brief initial patient panel discussion will begin the dialogue. This will be followed by a facilitated discussion inviting comments from other patient and patient stakeholder participants. In addition to input generated through this public meeting, FDA is interested in receiving patient input addressing these questions through written comments, which can be submitted to the public docket (see **ADDRESSES**). When submitting comments, if you are commenting on behalf of a child, please indicate that you are doing so and

answer the following questions as much as possible from the patient's perspective.

Topic 1: Disease Symptoms and Daily Impacts That Matter Most to Patients

1. What have been the most significant changes in your overall health since you received your transplanted organ?

(a) How long has it been since you received your transplant?

2. Focusing on symptoms related to your organ transplant and post-transplant effects, which 1–3 symptoms have the most significant impact on your life? (Examples may include pain, infection, anxiety, etc.)

3. Are there specific activities that are important to you but that you cannot do at all or as fully as you would like because of your transplant? (Examples of activities may include sleeping through the night, driving, walking/running, exercising, etc.)

(a) How do your symptoms and their negative impacts affect your daily life on the best days? On the worst days? (Examples may include limitations on the ability to undertake physically strenuous activities, restrictions on the ability to travel, lack of appetite, fatigue, etc.)

4. How has your experience with your transplanted organ changed over time? Do particular symptoms come and go as your duration of time with a transplanted organ has increased? If so, do you know of anything that makes your symptoms better? Worse?

5. What worries you most about your health post-transplant?

Topic 2: Patients' Perspectives on Transplant and Treatment Impacts

1. What are you currently doing to maintain your transplanted organ or treat related health concerns following transplantation? (Examples may include immunosuppressants, antibiotics, antivirals, over-the-counter products, and other therapies including non-drug therapies)

(a) How has your post-transplant treatment regimen changed over time, and why?

2. How well does your current treatment regimen manage the most significant symptoms you experience post-transplantation?

(a) How well do these treatments improve your ability to do specific activities that are important to you in your daily life?

(b) How well have these treatments worked for you as your experiences post-transplant have changed over time?

3. What are the most significant downsides to your current treatments, and how do they affect your daily life? (Examples of downsides may include bothersome side effects, need for multiple medications, risk of infection, need for hospitalization, etc.)

(a) What are the biggest challenges you face in maintaining your post-transplant treatment regimen? (Examples of challenges may be bothersome side effects, need for multiple medications, etc.)

4. What specific things would you look for in an ideal treatment for managing your transplanted organ?

In the afternoon, discussion will be related to scientific topics, with the goal of understanding issues that may affect the development of drugs for the treatment of organ transplantation and identifying topics for future discussion. Discussion topics for the afternoon will include the following: Current treatment considerations, adherence, clinical trial designs, and clinical trial endpoints.

B. Meeting Attendance and Participation

If you wish to attend this meeting, visit *http://organtransplantpfdd.eventbrite.com.* Please register by September 20, 2016. If you are unable to attend the meeting in person, you can register to view a live Webcast of the meeting. You will be asked to indicate in your registration if you plan to attend in person or via the Webcast. Seating will be limited, so early registration is recommended. Registration is free and will be on a first-come, first-served basis. However, FDA may limit the number of participants from each organization based on space limitations. Registrants will receive confirmation once they have been accepted. Onsite registration on the day of the meeting will be based on space availability. If you need special accommodations because of a disability, please contact Graham Thompson (see **FOR FURTHER INFORMATION CONTACT**) at least 7 days before the meeting.

Patients who are interested in presenting comments as part of the initial panel discussions will be asked to indicate in their registration which topic(s) they wish to address. These patients also must send to *PatientFocused@fda.hhs.gov* a brief summary of responses to the topic questions by September 12, 2016. Panelists will be notified of their selection approximately 7 days before the public meeting. We will try to accommodate all patients and patient stakeholders who wish to speak, either through the panel discussion or audience participation; however, the duration of comments may be limited by time constraints.

FDA will hold an open public comment period to give the public an opportunity to comment. Registration for open public comment will occur at the registration desk on the day of the meeting and workshop on a first-come, first-served basis.

Docket Comments: Regardless of if you attend the public meeting, you can submit electronic or written responses to the questions pertaining to Topics 1 and 2 to the public docket (see **ADDRESSES**) by November 27, 2016. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at *http://www.regulations.gov.*

Transcripts: As soon as a transcript is available, FDA will post it at *http://www.fda.gov/ForIndustry/UserFees/PrescriptionDrugUserFee/ucm495933.htm.*

Dated: April 21, 2016.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2013–N–0514]

Agency Information Collection Activities; Proposed Collection; Comment Request; Requests for Clinical Laboratory Improvement Amendments Categorization

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on requests for Clinical Laboratory Improvement Amendments of 1998 (CLIA) categorization of in vitro diagnostic tests when a premarket review is not needed.

DATES: Submit either electronic or written comments on the collection of information by June 27, 2016.

ADDRESSES: You may submit comments as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *http://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *http://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Division of Dockets Management, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2013–N–0514 for ''Agency Information Collection Activities; Proposed Collection; Comment Request; Requests for Clinical Laboratory Improvement Amendments Categorization.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *http://www.regulations.gov* or at the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *http://www.regulations.gov.* Submit both copies to the Division of Dockets Management. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *http://www.fda.gov/regulatoryinformation/dockets/default.htm.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: FDA PRA Staff, Office of Operations, Food and Drug Administration, 8455 Colesville Rd., COLE–14526, Silver Spring, MD 20993–0002, *PRAStaff@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Requests for Clinical Laboratory Improvement Amendments of 1988 Categorization—42 CFR 493.17—OMB Control Number 0910–0607—Extension

A guidance document entitled ''Guidance for Administrative Procedures for CLIA Categorization'' was released on May 7, 2008. The document describes procedures FDA uses to assign the complexity category to a device. Typically, FDA assigns complexity categorizations to devices at the time of clearance or approval of the device. In this way, no additional burden is incurred by the manufacturer because the labeling (including operating instructions) is included in the premarket notification (510(k)) or premarket approval application (PMA). In some cases, however, a manufacturer may request CLIA categorization even if FDA is not simultaneously reviewing a 510(k) or PMA. One example is when a manufacturer requests that FDA assign CLIA categorization to a previously cleared device that has changed names since the original CLIA categorization. Another example is when a device is exempt from premarket review. In such cases, the guidance recommends that manufacturers provide FDA with a copy of the package insert for the device and a cover letter indicating why the manufacturer is requesting a categorization (*e.g.* name change, exempt from 510(k) review). The guidance recommends that in the correspondence to FDA the manufacturer should identify the product code and classification as well as reference to the original 510(k) when this is available.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN [1]

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours	Total operating and maintenance costs
Request for CLIA Categorization	60	15	900	1	900	$46,800

[1] There are no capital costs associated with this collection of information.

The number of respondents is approximately 60. On average, each respondent will request categorizations (independent of a 510(k) or PMA) 15 times per year. The cost, not including personnel, is estimated at $52 per hour ($52 \times 900$), totaling $46,800. This includes the cost of copying and mailing copies of package inserts and a cover letter, which includes a statement of the reason for the request and reference to the original 510(k) numbers, including regulation numbers and product codes. The burden hours are based on FDA familiarity with the types of documentation typically included in a sponsor's categorization requests, and costs for basic office supplies (*e.g.,* paper).

Dated: April 21, 2016.

Leslie Kux,

Associate Commissioner for Policy.

[FR Doc. 2016–09769 Filed 4–26–16; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Office of Medical Products and Tobacco; Center for Drug Evaluation and Research; Statement of Organization, Functions, and Delegations of Authority

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA), Office of Medical Products and Tobacco, Center for Drug Evaluation and Research, Office of Medical Policy has modified its structure. This new organizational structure was approved by the Secretary of Health and Human Services on December 15, 2016, and effective on April 17, 2016.

FOR FURTHER INFORMATION CONTACT: Melanie Keller, Office of Management, Center for Drug Evaluation and Research, Office of Medical Products and Tobacco, Food and Drug Administration, 10903 New Hampshire Avenue, Silver Spring, MD 20993, 301–796–3291.

I. Summary

This organization will expand current activities in the Office of Medical Policy and foster efficient oversight of clinical trials conducted through policy initiatives that build quality upfront and science-based inspectional approaches. This will provide an oversight and direction for new and ongoing policy initiatives in broad-based medical and clinical policy areas, including initiatives to improve science and efficiency trials.

The Food and Drug Administration, Office of Medical Products and Tobacco, Center for Drug Evaluation and Research, Office of Medical Policy has been restructured as follows:

DKKNF. ORGANIZATION. The Office of Medical Policy is headed by the Director, Office of Medical Policy and includes the following organizational units:

Office of Medical Policy
Office of Prescription Drug Promotion
Division of Advertising and Promotion Review I
Division of Advertising and Promotion Review II

II. Delegations of Authority

Pending further delegation, directives, or orders by the Commissioner of Food and Drugs, all delegations and redelegations of authority made to officials and employees of affected organizational components will continue in them or their successors pending further redelegations, provided they are consistent with this reorganization.

III. Electronic Access

This reorganization is reflected in FDA's Staff Manual Guides (SMG). Persons interested in seeing the complete Staff Manual Guide can find it on FDA's Web site at: *http://www.fda.gov/AboutFDA/ReportsManualsForms/StaffManualGuides/default.htm.*

Authority: 44 U.S.C. 3101.

Dated: April 19, 2016.

Sylvia M. Burwell,

Secretary of Health and Human Services.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Proposed Collection: Public Comment Request

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public comment on proposed data collection projects (Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995), the Health Resources and Services Administration (HRSA) announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on this Information Collection Request must be received no later than June 27, 2016.

ADDRESSES: Submit your comments to *paperwork@hrsa.gov* or mail the HRSA Information Collection Clearance Officer, Room 14N39, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email *paperwork@hrsa.gov* or call the HRSA Information Collection Clearance Officer at (301) 443–1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the

information request collection title for reference.

Information Collection Request Title: Building Futures: Supporting Youth Living with HIV OMB No. 0915–xxxx New.

Abstract: The Ryan White HIV/AIDS Program (RWHAP), administered by the HRSA HIV/AIDS Bureau (HRSA/HAB), provides HIV-related services in the United States for people living with HIV (PLWH) who do not have sufficient health care coverage or financial resources to pay for HIV-related services. Fourteen percent of the approximately 512,000 RWHAP clients in 2014 were young adults between the ages of 13 and 30.[1] HRSA/HAB has awarded a contract, *Building Futures: Supporting Youth Living with HIV,* to identify and document best-practices and challenges associated with providing HIV care to youth living with HIV. Information learned from high performing and low performing sites serving young people living with HIV (aged 13–24 years) will help identify effective strategies and barriers for helping this population reach viral suppression. The high performing and low performing sites will be chosen from RWHAP-funded providers based on health outcome data from the 2014 Ryan White HIV/AIDS Services Report. Information gathered at these visits will help inform technical assistance (TA) conducted at low performing sites, as well as additional TA products to be made available to other RWHAP providers to improve health outcomes for young people living with HIV.

Need and Proposed Use of the Information: Youth (defined for the purposes of this project as age 13 through 24) in the United States are disproportionately impacted by HIV. In 2014, 9,731 (22 percent) of the 44,073 new HIV diagnoses in the U.S. were among youth between the ages of 13 and 24, with a large majority (81 percent) of these youth diagnoses among older youth aged 20–24.[2] Young people living with HIV also experience disparities in outcomes along the HIV care continuum.[3] Among RWHAP clients in 2014, older youth aged 20–24 had the lowest rates of retention in care and both 15–19 year olds and 20–24 year olds had notably lower rates of viral load suppression as compared to other age groups. Additionally, certain subpopulations such as young men who have sex with men (MSM) of color, lesbian, gay, bisexual, transgender and questioning youth (LGBTQ), and young women of color bear a disproportionate share of the disease burden and have poorer outcomes in the areas of retention in care and viral suppression.[4] [5]

The *Building Futures: Supporting Youth Living with HIV* project aims to strengthen RWHAP engagement with young people aged 13–24 living with HIV to improve their health outcomes. Through this project, HRSA/HAB will systematically document strategies used by providers funded by the RWHAP to achieve high rates of youth retention in care and viral suppression. HRSA/HAB will also learn about gaps and challenges from providers that have demonstrated poorer outcomes in these areas.

Specialized Site Visits will be conducted with 10 high performing providers to identify, understand, and document replicable evidence-based best practices and models of care. Interviews will be conducted with program support and clinical staff, in addition to HIV-positive youth patients. HIV-positive youth leaders will be engaged as consultants to the site visit team to pretest instruments, review site visit conclusions with the project team, and offer a perspective of young people living with HIV on the data gathered from the high-performing sites and implementation of changes to improve performance of lower performing sites.

Performance Improvement Site Visits will be conducted with 16 lower performing providers to better understand the gaps and challenges to providing RWHAP care to youth, share best practices and lessons learned from high performing providers, and provide action-oriented TA to overcome barriers and optimize health outcomes. Youth consultants will co-lead a panel/advisory board of young people living with HIV and a planning session to better understand technical assistance implementation issues.

Sampled providers will be selected based on viral load and retention in care rates and the diversity of client populations, as identified in 2014 Ryan White HIV/AIDS Services Report data.

Likely Respondents: Clinics funded by the Ryan White HIV/AIDS Program.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (hours)	Total burden hours
Online Questionnaire	26	1	26	0.5	13
Onsite Observational Tool	26	1	26	0.5	13
Program Manager and Clinical Director Interview Guide (High) *	20	1	20	1.5	30
Program Manager and Clinical Director Interview Guide (Low) **	32	1	32	1.5	48

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval; Public Comment Request

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: In compliance with Section 3507(a)(1)(D) of the Paperwork Reduction Act of 1995, the Health Resources and Services Administration (HRSA) has submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period.

DATES: Comments on this ICR must be received no later than May 27, 2016.

ADDRESSES: Submit your comments, including the Information Collection Request Title, to the desk officer for HRSA, either by email to *OIRA_submission@omb.eop.gov* or by fax to 202–395–5806.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email the HRSA Information Collection Clearance Officer at *paperwork@hrsa.gov* or call (301) 443–1984.

SUPPLEMENTARY INFORMATION:

Information Collection Request Title: HRSA AIDS Education and Training Centers Evaluation Activities

(OMB No. 0915–0281)—Revision

Abstract: The AIDS Education and Training Centers (AETC) Program, under the Title XXVI of the Public Health Service Act, as amended, supports a network of regional and national centers that conduct targeted, multi-disciplinary education and training programs for health care providers treating persons with HIV. The AETCs' purpose is to increase the number of health care providers who are effectively educated and motivated to counsel, diagnose, treat, and medically manage individuals with HIV infection, and to help prevent high risk behaviors that lead to HIV transmission.

Need and Proposed Use of the Information: As part of an ongoing effort to evaluate AETC activities, information is needed on AETC training sessions, consultations, and technical assistance activities. Each regional center collects information on AETC training events, and is required to report aggregate data on their activities to HRSA. The data provides information on the number of training events, including clinical trainings and consultations, as well as technical assistance activities conducted by each regional center, the number of health care providers receiving professional training or consultation, and the time and effort expended on different levels of training and consultation activities. In addition, information is obtained on the populations served by AETC trainees, and the increase in capacity achieved through training events. Collection of this information allows HRSA to provide information on training activities and types of education and training provided to Ryan White HIV/AIDS Program recipients, resource allocation, and capacity expansion.

Likely Respondents: Trainees are asked to complete the Participant Information Form once a year and trainers are asked to complete an Event Record for each training event they conduct during the year. In addition, each regional AETC (8 total) will compile these data into a data set and submit to HRSA once a year.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN—HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Participant Information	114,423	1	114,423	0.07	8,009.61
Event Record	14,445	1	14,445	0.14	2,022.30
Total	.....	.....	.....	.....	10,031.91

The Estimated Annual Burden to AETCs is as follows:

	Number of respondents	Responses per respondent	Total responses	Hours per response	Total burden hours
Aggregate Data Set	8	1	8	29	232

The total burden hours are 10,263.91 hours.

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Jackie Painter,

Director, Division of the Executive Secretariat.

Meeting Announcement for the Physician-Focused Payment Model Technical Advisory Committee Required by the Medicare Access and CHIP Reauthorization Act (MACRA) of 2015

ACTION: Notice of public meeting.

SUMMARY: This notice announces the meeting date for the Physician-Focused Payment Model Technical Advisory Committee (hereafter referred to as ''the Committee'') on Wednesday, May 4, 2016 in Washington, DC.

Table of Contents

DATES: The meeting will be held on Wednesday, May 4, 2016, from 12:00 p.m. to 3:00 p.m. Eastern Daylight Time (EDT) and it is open to the public.

ADDRESSES: The meeting will be held in Room 800 of the Hubert H. Humphrey Building, 200 Independence Ave. SW., Washington, DC, 20201.

Meeting Registration

The public may attend the meeting in-person or listen by phone via audio teleconference. Space is limited and registration is *required* in order to attend in-person or by phone. Registration may be completed online at *https://www.regonline.com/PTACMeetingsRegistration.* All the following information must be submitted when registering:

Name.

Company name.

Postal address.

Email address.

If sign language interpretation or other reasonable accommodation for a disability is needed, please contact Scott R. Smith, no later than April 25, 2016 at the contact information listed below.

FOR FURTHER INFORMATION CONTACT: Scott R. Smith, Ph.D., Designated Federal Officer, at the Office of Health Policy, Assistant Secretary for Planning and Evaluation, U.S. Department of Health and Human Services, 200 Independence Ave. SW., Washington, DC 20201, (202) 690–6870.

SUPPLEMENTARY INFORMATION:

I. Purpose

The Physician-Focused Payment Model Technical Advisory Committee (''the Committee'') is required by the Medicare Access and CHIP Reauthorization Act of 2015, 42 U.S.C 1395ee. This Committee is also governed by provisions of the Federal Advisory Committee Act, as amended (5 U.S.C App.), which sets forth standards for the formation and use of federal advisory committees. In accordance with its statutory mandate, the Committee is to review physician-focused payment model proposals and prepare recommendations regarding whether such models meet criteria that will be established through rulemaking by the Secretary of Health and Human Services (the Secretary). The Committee is composed of 11 members appointed by the Comptroller General with staggered terms of 1, 2, and 3 years.

II. Agenda

The Committee will have initial discussions about how physician-focused payment models proposals will be submitted and reviewed by the Committee after the Secretary establishes criteria for physician-focused payment models through rulemaking. There will be time allocated for public comment on a draft proposal review document. This document will be posted on the Committee Web site and distributed on the Committee listserv prior to the public meeting. The Committee will also discuss its activities in preparation for submission of proposals once the Secretarial criteria are finalized.

III. Meeting Attendance

The May 4, 2016 meeting is open to the public; however, in-person attendance is limited to space available. Priority to attend the meeting in-person will be given to those who pre-register. If the meeting venue reaches its seating capacity, other registrants will be limited to participating by telephone.

Persons wishing to attend this meeting, which is located on federal property, must register by following the instructions in the ''Meeting Registration'' section of this notice. A confirmation email will be sent to the registrants shortly after completing the registration process.

IV. Security and Building Guidelines

The following are the security and building guidelines:

Persons attending the meeting, including presenters, must be pre-registered and on the attendance list by the prescribed date.

Individuals who are not pre-registered in advance may not be permitted to enter the building and may be unable to attend the meeting.

Attendees must present a government-issued photo identification to the Federal Protective Service or Guard Service personnel before entering the building. Without a current, valid photo ID, persons may not be permitted entry to the building. All persons entering the building must pass through a metal detector.

All items brought into the Humphrey Building including personal items, for example, laptops and cell phones, are subject to physical inspection.

The public may enter the building 30 to 45 minutes before the meeting convenes.

V. Special Accommodations

Individuals requiring special accommodations must include the request for these services during registration.

VI. Copies of the Charter

The Secretary's Charter for the Physician-Focused Payment Model Technical Advisory Committee is available on the ASPE Web site at *https://aspe.hhs.gov/medicare-access-and-chip-reauthorization-act-2015.* Information about how to subscribe to the Committee's email listserv is found at *https://aspe.hhs.gov/contact-physician-focused-payment-model-technical-advisory-committee.*

Dated: April 8, 2016.

Richard G. Frank,

Assistant Secretary for Planning and Evaluation.

BILLING CODE 4150–45–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Meeting of the Secretary's Advisory Committee on Human Research Protections

AGENCY: Office of the Assistant Secretary for Health, Office of the Secretary, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: Pursuant to Section 10(a) of the Federal Advisory Committee Act, U.S.C. Appendix 2, notice is hereby given that the Secretary's Advisory Committee on Human Research Protections (SACHRP) will hold a meeting that will be open to the public. Information about SACHRP and the full meeting agenda will be posted on the SACHRP Web site at: *http://www.dhhs.gov/ohrp/sachrp/mtgings/index.html.*

DATES: The meeting will be held on Wednesday, May 18, 2016, from 8:30 a.m. until 5:00 p.m. and Thursday, May 19, 2016, from 8:30 a.m. until 4:30 p.m.

ADDRESSES: Fishers Lane Conference Center, Terrace Level, 5635 Fishers Lane, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Julia Gorey, J.D., Executive Secretary, SACHRP; U.S. Department of Health and Human Services, 1101 Wootton Parkway, Suite 200, Rockville, Maryland 20852; telephone: 240–453–8141; fax: 240–453–6909; email address: *SACHRP@hhs.gov.*

SUPPLEMENTARY INFORMATION: Under the authority of 42 U.S.C. 217a, Section 222 of the Public Health Service Act, as amended, SACHRP was established to provide expert advice and recommendations to the Secretary of Health and Human Services, through the Assistant Secretary for Health, on issues and topics pertaining to or associated with the protection of human research subjects.

The meeting will open to the public at 8:30 a.m., on Wednesday, May 18, followed by opening remarks from Dr. Jerry Menikoff, Director, Office for Human Research Protections (OHRP), and Dr. Jeffrey Botkin, SACHRP Chair. OHRP staff will begin the meeting by presenting a summary of public

comment received on the Notice of Proposed Rulemaking on Federal Policy for the Protection of Human Subjects. The Subpart A Subcommittee (SAS) will then present their draft work products, including considerations for single IRB review and minimal risk informed consent models. On Thursday, May 19, the Subcommittee on Harmonization (SOH) will present revisions to their recommendations on clustered randomized trials, the return of individual research results, and benchmarking.

SAS was established by SACHRP in October 2006 and is charged with developing recommendations for consideration by SACHRP regarding the application of subpart A of 45 CFR part 46 in the current research environment.

SOH was established by SACHRP at its July 2009 meeting and charged with identifying and prioritizing areas in which regulations and/or guidelines for human subjects research adopted by various agencies or offices within HHS would benefit from harmonization, consistency, clarity, simplification and/or coordination.

The meeting will adjourn at 4:30 p.m. May 19, 2016. Time for public comment sessions will be allotted both days.

Public attendance at the meeting is limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify one of the designated SACHRP points of contact at the address/phone number listed above at least one week prior to the meeting. Registration is required for participation in the on-site public comment session; individuals may register on the day of the meeting. Individuals who would like to submit written statements as public comment should email or fax their comments to SACHRP at *SACHRP@hhs.gov* at least five business days prior to the meeting. Note that public comment should be relevant to agenda topics.

Dated: April 21, 2016.

Julia Gorey,

Executive Secretary, Secretary's Advisory Committee on Human Research Protections, Office for Human Research Protections.

BILLING CODE 4150–36–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Meeting of the Chronic Fatigue Syndrome Advisory Committee

AGENCY: Office of the Secretary, Office of the Assistant Secretary for Health, Department of Health and Human Services.

ACTION: Notice.

SUMMARY: As stipulated by the Federal Advisory Committee Act, the U.S. Department of Health and Human Services (DHHS) is hereby giving notice that a meeting of the Chronic Fatigue Syndrome Advisory Committee (CFSAC) will take place via webinar and will be open to the public.

DATES: The CFSAC webinar will be held on Tuesday, May 17, 2016 and Wednesday, May 18, 2016, from 12:00 p.m. until 5:00 p.m. (ET).

ADDRESSES: The meeting will be conducted via webinar. This will not be an in-person meeting.

FOR FURTHER INFORMATION CONTACT: Nancy C. Lee, M.D., Designated Federal Officer, Chronic Fatigue Syndrome Advisory Committee, Department of Health and Human Services, 200 Independence Avenue SW., Room 712E, Washington, DC 20201. Please direct all inquiries to *cfsac@hhs.gov.*

SUPPLEMENTARY INFORMATION: The CFSAC is authorized under 42 U.S.C. 217a, Section 222 of the Public Health Service Act, as amended. The purpose of the CFSAC is to provide advice and recommendations to the Secretary of Health and Human Services (HHS), through the Assistant Secretary for Health (ASH), on issues related to myalgic encephalomyelitis/chronic fatigue syndrome (ME/CFS). The issues can include factors affecting access and care for persons with ME/CFS; the science and definition of ME/CFS; and broader public health, clinical, research, and educational issues related to ME/CFS.

The agenda for this meeting and call-in information will be posted on the CFSAC Web site *http://www.hhs.gov/advcomcfs/index.html.*

Thirty minutes of public comment via telephone will be scheduled for each day of the webinar. Individuals will have three minutes to present their comments. Priority will be given to individuals who have not provided public comment within the previous year. We are unable to place international calls for public comments. To request a time slot for public comment, please send an email to *cfsac@hhs.gov* by May 9, 2016. The email should contain the speaker's name and the phone number that will be used for public comment.

Individuals who would like for their testimony to be provided to the Committee members should submit a copy of the testimony prior to the meeting. It is preferred that the submitted testimony be prepared in digital format and typed using a 12-pitch typeface. It must not exceed 5 single-space pages and is preferred that the document be prepared in the MS Word format. Please note that PDF files, handwritten notes, charts, and photographs cannot be accepted. Materials submitted should not include sensitive personal information, such as social security number, birthdates, driver's license number, passport number, financial account number, or credit or debit card number. If you wish to remain anonymous the document must specify this. The Committee welcomes input on any topic related to ME/CFS.

Dated: April 21, 2016.

Nancy C. Lee,

Designated Federal Officer, Chronic Fatigue Syndrome Advisory Committee.

BILLING CODE 4150–42–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Notice of Interest Rate on Overdue Debts

Section 30.18 of the Department of Health and Human Services' claims collection regulations (45 CFR part 30) provides that the Secretary shall charge an annual rate of interest, which is determined and fixed by the Secretary of the Treasury after considering private consumer rates of interest on the date that the Department of Health and Human Services becomes entitled to recovery. The rate cannot be lower than the Department of Treasury's current value of funds rate or the applicable rate determined from the ''Schedule of Certified Interest Rates with Range of Maturities'' unless the Secretary waives interest in whole or part, or a different rate is prescribed by statute, contract, or repayment agreement. The Secretary of the Treasury may revise this rate quarterly. The Department of Health and Human Services publishes this rate in the **Federal Register**.

The current rate of 10.00%, as fixed by the Secretary of the Treasury, is certified for the quarter ended March 31, 2016. This rate is based on the Interest Rates for Specific Legislation, ''National Health Services Corps Scholarship Program (42 U.S.C. 254o(b)(1)(A))'' and ''National Research Service Award Program (42 U.S.C. 288(c)(4)(B)).'' This interest rate will be applied to overdue debt until the Department of Health and Human Services publishes a revision.

Dated: April 15, 2016.

David C. Horn,

Director, Office of Financial Policy and Reporting.

BILLING CODE 4150–04–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Indian Health Service

Office of Human Resources; Medical Professionals Recruitment and Continuing Education Programs

Announcement Type: New Limited Competition Cooperative Agreement

Funding Announcement Number: HHS–2016–IHS–HPR–0001

Catalog of Federal Domestic Assistance Number: 93.970

Key Dates

Application Deadline Date: June 27, 2016

Review Date: July 5–8, 2016

Earliest Anticipated Start Date: July 15, 2016

Proof of Non-Profit Status Due Date: June 27, 2016

I. Funding Opportunity Description

Statutory Authority

The Indian Health Service (IHS) is accepting competitive cooperative agreement applications for the Medical Professionals Recruitment and Continuing Education Program. This program is authorized under: The Snyder Act, 25 U.S.C. 13. This program is described in the Catalog of Federal Domestic Assistance (CFDA) under 93.970.

Background

The mission of the IHS is to raise the physical, mental, social and spiritual health of American Indians and Alaska Natives (AI/AN) to the highest level. The IHS, an agency within the Department of Health and Human Services (HHS), is responsible for providing Federal health services to AI/AN. The provision of health services to members of Federally-recognized Tribes grew out of the special government-to-government relationship between the Federal Government and Indian Tribes. The IHS is the principal Federal health care provider and health advocate for Indian people and its mission is to raise their health status to the highest possible level. The IHS provides a comprehensive health service delivery system for approximately 2.3 million AI/AN who belong to 567 Federally recognized Tribes in 35 states.

Purpose

The purpose of this IHS cooperative agreement is to enhance medical professional recruitment and continuing education programs, services and activities for AI/AN people. The agency wants to facilitate continuing medical education for AI/AN physicians, through annual meetings and other venues that are culturally competent and sensitive. Another purpose is to recruit AI/AN health professionals to pursue jobs that serve AI/AN people and improve the health care delivery system. A third purpose is to provide opportunities for AI/AN youth to learn about the various Federal agencies and possible careers within the Federal Government that will result in a national mentoring program and creation of a pipeline for AI/AN youth into health careers. IHS will provide funds in the amount of $105,000 in the first year (Fiscal Year 2016 only) to be used to complete the following Fiscal Year 2016 activities:

- To support a national Native American youth conference, designed to expose high school students to health care careers, as well as prepare them for college with the goal of becoming health care providers.
- To offer freshman and sophomore undergraduate students educational workshops to help them explore and prepare them for health education and careers in health care and/or research.
- To offer junior and senior undergraduate students, preparing to apply for medical and health professions schools, educational opportunities designed to provide guidance regarding personal statement reviews, mock interviews, and mentorship on the admission process.

The purpose of the activities listed above is to increase the number of AI/AN youth pursuing careers in the health professions, thereby increasing the number of AI/AN medical professionals available to manage the chronic health challenges of AI/AN patients, including diabetes, hypertension, heart disease, and obesity.

Limited Competition Justification

Competition is limited to organizations with expertise in advancing the health of AI/AN people. This limitation is necessary in order for IHS to ensure that the training, education, and outreach provided through this award are provided in a culturally competent manner. Additionally, applicants must have experience hosting healthcare forums and meetings combining modern medicine and traditional health practices to enhance health care delivery to AI/AN communities. Through such experience, applicants should have existing relationships with stakeholders that will encourage attendance at the meeting funded through this award. Applicants must offer educational programs, services and activities specifically tailored to motivating AI/AN students to remain in the academic pipeline and to pursue a career in the health professions and/or biomedical research. Finally, applicants must have experience in providing leadership and programs in various care arenas affecting AI/AN, such as diabetes mellitus, human immunodeficiency virus/acquired immunodeficiency syndrome (HIV/AIDS), domestic violence, and methamphetamine use, in order to address the most pressing healthcare needs of AI/AN communities.

Pre-Conference Grant Requirements: The awardee is required to comply with the ''HHS Policy on Promoting Efficient Spending: Use of Appropriated Funds for Conferences and Meeting Space, Food, Promotional Items, and Printing and Publications,'' dated December 16, 2013 (''Policy''), as applicable to conferences funded by grants and cooperative agreements. The Policy is available at *http://www.hhs.gov/grants/contracts/contract-policies-regulations/conference-spending/*

The awardee is required to:

Provide a separate detailed budget justification and narrative for each conference anticipated. The cost categories to be addressed are as follows: (1) Contract/Planner, (2) Meeting Space/Venue, (3) Registration Web site, (4) Audio Visual, (5) Speakers Fees, (6) Non-Federal Attendee Travel, (7) Registration Fees, (8) Other (explain in detail and cost breakdown). For additional questions please contact Nannette Bellini on 301–443–0049 or email at *Nannette.bellini@ihs.gov*

II. Award Information

Type of Award

Cooperative Agreement.

Estimated Funds Available

The total amount of funding identified for the current fiscal year (FY) 2016 is approximately $105,000. Individual award amounts are anticipated to be between $25,000 and $105,000. The amount of funding available for competing and continuation awards issued under this announcement are subject to the availability of appropriations and budgetary priorities of the Agency. The

IHS is under no obligation to make awards that are selected for funding under this announcement.

The funding amounts per FY for this three-year cooperative agreement are as follows:

- FY 2016 $105,000 ($80,000 to support activities to promote AI/AN youth in pursuing health related careers)
- FY 2017 $25,000
- FY 2018 $25,000

The total amount of funding for this three-year project period is $155,000.

Anticipated Number of Awards

One limited competition award will be issued under this program announcement.

Project Period

The project period will be for three (3) years and will run consecutively from June 15, 2016 to June 14, 2019.

Cooperative Agreement

Cooperative agreements awarded by the HHS are administered under the same policies as a grant. The funding agency (IHS) is required to have substantial programmatic involvement in the project during the entire award segment. Below is a detailed description of the level of involvement required for both IHS and the grantee. IHS will be responsible for activities listed under section A and the grantee will be responsible for activities listed under section B as stated:

Substantial Involvement Description for Cooperative Agreement

A. IHS Programmatic Involvement

(1) The IHS would like to support an annual meeting of AI/AN physicians and other health professionals. At least two IHS staff will be part of the planning committee for any meetings or training. They will work closely with the planning staff on all aspects of the meeting and training including development of the agenda, keynote speakers, and special educational sessions, etc. The IHS will also provide links to the applicant's Web site from the IHS Web site.

(2) IHS staff will also participate in any Federal meetings with HHS and AI/AN youth to help facilitate information about the various agencies and to encourage youth to consider careers within HHS. This will assist youth to become more knowledgeable about Federal programs and resources available to AI/AN communities.

(3) IHS Clinical Support Center (CSC) will provide a process for offering continuing education (CE) credits for the annual meeting participants. The CSC is accredited as a sponsor of CE by various medical professional organizations.

(4) IHS Division of Health Professions Support will share information on recruitment strategies and current program information with applicant's staff and members. This sharing and dialogue will enhance communications and improve efforts to reach out to more AI/AN physicians and medical professionals.

B. Grantee Cooperative Agreement Award Activities

(1) Provide overall coordination and management of the annual meeting of AI/AN physicians and other health professionals, including hosting the planning committee and setting up conference calls and meetings in preparation of the annual meeting.

(i) Manage registration and logistics for annual meeting.

(ii) Distribute flyers and brochures to promote the annual meeting.

(iii) Finalize the agenda and all materials.

(iv) Provide meeting information on applicant's Web site with links to IHS Web site.

(2) Implement a national Native American youth health careers conference, including organizing the planning committee and setting up conference calls and meetings in preparation for the conference.

(i) Manage registration and logistics for the conference.

(ii) Distribute flyers and brochures to promote the conference.

(iii) Finalize the agenda and all materials.

(3) Coordinate and implement educational workshops for freshman and sophomore undergraduate students to help them explore and prepare for careers in health care and/or research.

(4) Coordinate and implement educational workshops for junior and senior undergraduate students preparing to apply for medical and health professions schools. This workshop should help students with writing personal statements, conducting mock interviews, and providing mentorship on the admission process.

III. Eligibility Information

1. Eligibility

This new limited competition funding opportunity is limited to 501(c)(3) non-profit organizations. Proof of 501(c)(3) status must be provided. In addition, applicant organizations must meet the following criteria:

- Have as a core goal improving the health of AI/AN.
- Be committed to pursuing excellence in Native American health care by promoting education in the medical disciplines, honoring traditional health principles and restoring the balance of mind, body, and spirit.
- Offer educational programs, services, and activities that motivate AI/AN students to remain in the academic pipeline and to pursue a career in the health professions and/or biomedical research.
- Foster forums where modern medicine combines with traditional healing to enhance health care delivery to AI/AN communities.
- Provide leadership in various care arenas affecting AI/AN, such as diabetes mellitus, HIV/AIDS, domestic violence and methamphetamine use.

Note: Please refer to Section IV.2 (Application and Submission Information/ Subsection 2, Content and Form of Application Submission) for additional proof of applicant status documents required such as Tribal resolutions, proof of non-profit status, etc.

2. Cost Sharing or Matching

The IHS does not require matching funds or cost sharing for grants or cooperative agreements.

3. Other Requirements

If application budgets exceed the highest dollar amount outlined under the ''Estimated Funds Available'' section within this funding announcement, the application will be considered ineligible and will not be reviewed for further consideration. If deemed ineligible, IHS will not return the application. The applicant will be notified by email by the Division of Grants Management (DGM) of this decision.

Proof of Non-Profit Status

Organizations claiming non-profit status must submit proof. A copy of the 501(c)(3) Certificate must be received with the application submission by the Application Deadline Date listed under the Key Dates section on page one of this announcement.

Applicants submitting any of the above additional documentation after the initial application submission due date are required to ensure the information was received by the IHS by obtaining documentation confirming delivery (*i.e.,* FedEx tracking, postal return receipt, etc.).

IV. Application and Submission Information

1. Obtaining Application Materials

The application package and detailed instructions for this announcement can be found at *http://www.Grants.gov* or *http://www.ihs.gov/dgm/funding/.*

Questions regarding the electronic application process may be directed to Mr. Paul Gettys at (301) 443–2114 or (301) 443–5204.

2. Content and Form Application Submission

The applicant must include the project narrative as an attachment to the application package. Mandatory documents for all applicants include:

- Table of contents.
- Abstract (one page) summarizing the project.
- Application forms:
  - SF–424, Application for Federal Assistance.
  - SF–424A, Budget Information—Non-Construction Programs.
  - SF–424B, Assurances—Non-Construction Programs.
- Budget Justification and Narrative (must be single spaced and not exceed five pages).
- Project Narrative (must be single spaced and not exceed ten pages).
  - Background information on the organization.
  - Proposed scope of work, objectives, and activities that provide a description of what will be accomplished, including a one-page Timeframe Chart.
- 501(c)(3) Certificate (if applicable).
- Biographical sketches for all key personnel.
- Contractor/Consultant resumes or qualifications and scope of work.
- Disclosure of Lobbying Activities (SF–LLL).
- Certification Regarding Lobbying (GG–Lobbying Form).
- Copy of current Negotiated Indirect Cost (IDC) rate agreement (required) in order to receive IDC.
- Documentation of current Office of Management and Budget (OMB) Audit as required by 45 CFR part 75, subpart F or other required Financial Audit (if applicable).

Acceptable forms of documentation include:

- Email confirmation from Federal Audit Clearinghouse (FAC) that audits were submitted; or
- Face sheets from audit reports. These can be found on the FAC Web site: *http://harvester.census.gov/sac/dissem/accessoptions.html?submit=Go+To+Database.*

Public Policy Requirements:

All Federal-wide public policies apply to IHS grants and cooperative agreements with exception of the discrimination policy.

Requirements for Project and Budget Narratives

A. Project Narrative: This narrative should be a separate Word document that is no longer than ten pages and must: Be single-spaced, be type written, have consecutively numbered pages, use black type not smaller than 12 characters per one inch, and be printed on one side only of standard size 8½″ x 11″ paper.

Be sure to succinctly address and answer all questions listed under the narrative and place them under the evaluation criteria (refer to Section V.1, Evaluation criteria in this announcement) and place all responses and required information in the correct section (noted below), or they will not be considered or scored. These narratives will assist the Objective Review Committee (ORC) in becoming familiar with the applicant's activities and accomplishments prior to this cooperative agreement award. If the narrative exceeds the page limit, only the first ten pages will be reviewed. The ten-page limit for the narrative does not include the work plan, standard forms, table of contents, budget, budget justifications, and/or other appendix items.

There are three parts to the narrative: Part A—Program Information; Part B—Program Planning and Evaluation; and Part C—Program Report. See below for additional details about what must be included in the narrative.

Part A: Program Information (4 Page Limitation)

Section 1: Needs.

Describe the applicant's organizational commitment and administrative infrastructure to support this agreement. Explain the previous planning activities for any conferences, annual meetings and other forums or programs for AI/AN physicians and other health professionals. Describe the relationship with the IHS and the capacity to support this work.

Part B: Program Planning and Evaluation (3 Page Limitation)

Section 1: Program Plans.

Describe any conferences, annual meetings and other forums or program plans for AI/AN physicians and health professionals in clear detail including the proposed timelines and activities. The purpose of the meeting would be to provide continuing education for physicians and other health professionals on topics to improve the health of AI/AN patients, families and communities. Describe the anticipated impact of the meeting as it relates to improving the health services for AI/AN. In addition, describe plans to develop a mentoring program and pipeline for recruiting more AI/AN youth into the medical professions. Describe the target audience and goals of such programs to increase the number of AI/AN physicians and health care professionals providing health services to the Native American population.

Section 2: Program Evaluation.

Describe fully and clearly the plans for evaluating the impact of an annual meeting of AI/AN physicians and other health care professionals with anticipated results. Describe the plans for mentoring programs and preparing more AI/AN youth to enter the medical professionals in the workforce.

Part C: Program Report (3 Page Limitation)

Section 1: Describe major accomplishments over the last 24 months as it relates to recruiting more AI/AN youth into the medical professions and continuing to provide continuing education opportunities (meetings, conferences) for AI/AN physicians and other medical professionals. Please identify and describe significant program achievements associated with improving the health of the AI/AN population. Provide a comparison of the actual accomplishments to the goals established for the project.

B. Budget Narrative: This narrative must include a line item budget with a narrative justification for all expenditures identifying reasonable and allowable costs necessary to accomplish the goals and objectives as outlined in the project narrative. Budget should match the scope of work described in the project narrative. The budget narrative should not exceed five pages.

3. Submission Dates and Times

Applications must be submitted electronically through Grants.gov by 11:59 p.m. Eastern Daylight Time (EDT) on the Application Deadline Date listed in the Key Dates section on page one of this announcement. Any application received after the application deadline will not be accepted for processing, nor will it be given further consideration for funding. Grants.gov will notify the applicant via email if the application is rejected.

If technical challenges arise and assistance is required with the electronic application process, contact

Grants.gov Customer Support via email to *support@grants.gov* or at (800) 518–4726. Customer Support is available to address questions 24 hours a day, 7 days a week (except on Federal holidays). If problems persist, contact Mr. Paul Gettys (*Paul.Gettys@ihs.gov*), DGM Grant Systems Coordinator, by telephone at (301) 443–2114 or (301) 443–5204. Please be sure to contact Mr. Gettys at least ten days prior to the application deadline. Please do not contact the DGM until you have received a Grants.gov tracking number. In the event you are not able to obtain a tracking number, call the DGM as soon as possible.

If the applicant needs to submit a paper application instead of submitting electronically through Grants.gov, a waiver must be requested. Prior approval must be requested and obtained from Mr. Robert Tarwater, Director, DGM, (see Section IV.6 below for additional information). The waiver must: (1) Be documented in writing (emails are acceptable), *before* submitting a paper application, and (2) include clear justification for the need to deviate from the required electronic grants submission process. A written waiver request must be sent to *GrantsPolicy@ihs.gov* with a copy to *Robert.Tarwater@ihs.gov.* Once the waiver request has been approved, the applicant will receive a confirmation of approval email containing submission instructions and the mailing address to submit the application. A copy of the written approval *must* be submitted along with the hardcopy of the application that is mailed to DGM. Paper applications that are submitted without a copy of the signed waiver from the Director of the DGM will not be reviewed or considered for funding. The applicant will be notified via email of this decision by the Grants Management Officer of the DGM. Paper applications must be received by the DGM no later than 5:00 p.m., EDT, on the Application Deadline Date listed in the Key Dates section on page one of this announcement. Late applications will not be accepted for processing or considered for funding.

4. Intergovernmental Review

Executive Order 12372 requiring intergovernmental review is not applicable to this program.

5. Funding Restrictions

- Pre-award costs are not allowable.
- The available funds are inclusive of direct and appropriate indirect costs.
- Only one grant/cooperative agreement will be awarded per applicant.
- IHS will not acknowledge receipt of applications.

6. Electronic Submission Requirements

All applications must be submitted electronically. Please use the *http://www.Grants.gov* Web site to submit an application electronically and select the ''Find Grant Opportunities'' link on the homepage. Download a copy of the application package, complete it offline, and then upload and submit the completed application via the *http://www.Grants.gov* Web site. Electronic copies of the application may not be submitted as attachments to email messages addressed to IHS employees or offices.

If the applicant receives a waiver to submit paper application documents, they must follow the rules and timelines that are noted below. The applicant must seek assistance at least ten days prior to the Application Deadline Date listed in the Key Dates section on page one of this announcement.

Applicants that do not adhere to the timelines for System for Award Management (SAM) and/or *http://www.Grants.gov* registration or that fail to request timely assistance with technical issues will not be considered for a waiver to submit a paper application.

Please be aware of the following:

- Please search for the application package in *http://www.Grants.gov* by entering the CFDA number or the Funding Opportunity Number. Both numbers are located in the header of this announcement.
- If you experience technical challenges while submitting your application electronically, please contact Grants.gov Support directly at: *support@grants.gov* or (800) 518–4726. Customer Support is available to address questions 24 hours a day, 7 days a week (except on Federal holidays).
- Upon contacting Grants.gov, obtain a tracking number as proof of contact. The tracking number is helpful if there are technical issues that cannot be resolved and a waiver from the agency must be obtained.
- If it is determined that a waiver is needed, the applicant must submit a request in writing (emails are acceptable) to *GrantsPolicy@ihs.gov* with a copy to *Robert.Tarwater@ihs.gov.* Please include a clear justification for the need to deviate from the standard electronic submission process.
- If the waiver is approved, the application should be sent directly to the DGM by the Application Deadline Date listed in the Key Dates section on page one of this announcement.
- Applicants are strongly encouraged not to wait until the deadline date to begin the application process through Grants.gov as the registration process for SAM and Grants.gov could take up to fifteen working days.
- Please use the optional attachment feature in Grants.gov to attach additional documentation that may be requested by the DGM.
- All applicants must comply with any page limitation requirements described in this Funding Announcement.
- After electronically submitting the application, the applicant will receive an automatic acknowledgment from Grants.gov that contains a Grants.gov tracking number. The DGM will download the application from Grants.gov and provide necessary copies to the appropriate agency officials. Neither the DGM nor the Office of Human Resources will notify the applicant that the application has been received.
- Email applications will not be accepted under this announcement.

Dun and Bradstreet (D&B) Data Universal Numbering System (DUNS)

All IHS applicants and grantee organizations are required to obtain a DUNS number and maintain an active registration in the SAM database. The DUNS number is a unique 9-digit identification number provided by D&B which uniquely identifies each entity. The DUNS number is site specific; therefore, each distinct performance site may be assigned a DUNS number. Obtaining a DUNS number is easy, and there is no charge. To obtain a DUNS number, please access it through *http://fedgov.dnb.com/webform*, or to expedite the process, call (866) 705–5711.

All HHS recipients are required by the Federal Funding Accountability and Transparency Act of 2006, as amended (''Transparency Act''), to report information on sub-awards. Accordingly, all IHS grantees must notify potential first-tier sub-recipients that no entity may receive a first-tier sub-award unless the entity has provided its DUNS number to the prime grantee organization. This requirement ensures the use of a universal identifier to enhance the quality of information available to the public pursuant to the Transparency Act.

System for Award Management (SAM)

Organizations that were not registered with Central Contractor Registration and have not registered with SAM will need to obtain a DUNS number first and then access the SAM online registration

through the SAM home page at *https://www.sam.gov* (U.S. organizations will also need to provide an Employer Identification Number from the Internal Revenue Service that may take an additional 2–5 weeks to become active). Completing and submitting the registration takes approximately one hour to complete and SAM registration will take 3–5 business days to process. Registration with the SAM is free of charge. Applicants may register online at *https://www.sam.gov.*

Additional information on implementing the Transparency Act, including the specific requirements for DUNS and SAM, can be found on the IHS Grants Management, Grants Policy Web site: *http://www.ihs.gov/dgm/policytopics/.*

V. Application Review Information

The instructions for preparing the application narrative also constitute the evaluation criteria for reviewing and scoring the application. Weights assigned to each section are noted in parentheses. The ten page narrative should include only the first year of activities; information for multi-year projects should be included as an appendix. See ''Multi-year Project Requirements'' at the end of this section for more information. The narrative section should be written in a manner that is clear to outside reviewers unfamiliar with prior related activities of the applicant. It should be well organized, succinct, and contain all information necessary for reviewers to understand the project fully. Points will be assigned to each evaluation criteria adding up to a total of 100 points. A minimum score of 75 points is required for funding. Points are assigned as follows:

1. Criteria

A. Introduction and Need for Assistance (30 points)

This section should include an understanding of the need for assistance and collaboration for any meetings or trainings. Applicant should demonstrate demographic and health status of the AI/AN people; geographic and social factors including availability of health providers and access to care; funding streams and available resources and partners that can support this work; and organizational structure of the Indian health system. Applicant should also describe the current and projected demand for AI/AN providers.

B. Project Objective(s), Work Plan and Approach (40 points)

This section should demonstrate the soundness and effectiveness of the applicant's proposal. Describe how the planning will be managed and the role of all organizations.

C. Program Evaluation (10 points)

This section should show how the progress on this project will be assessed and how the success of the recruitment program will be evaluated. Specifically, list and describe the outcomes by which the program will be evaluated. Identify the individuals responsible for evaluation of the annual meeting and their qualifications.

D. Organizational Capabilities, Key Personnel and Qualifications (10 points)

This section outlines the broader capacity of the organization to complete the project outlined in the work plan. It includes the identification of personnel responsible for completing tasks and the chain of responsibility for successful completion of the program outlined in the work plan.

(1) Describe the structure of the organization.

(2) Describe the ability of the organization to manage the proposed projects.

(3) List key personnel who will work on the projects and annual meeting. In the Appendix, include position descriptions and resumes of key staff and their duties and experience. Describe who will be writing progress reports.

E. Categorical Budget and Budget Justification (10 points)

This section should provide a clear estimate of the program costs and justification for expenses for the cooperative agreement period. The budget and budget justification should be consistent with the tasks identified in the work plan. If indirect costs are claimed, indicate and apply the current negotiated rate to the budget. Include a copy of the rate agreement in the appendix. Categorical budget (Form SF 424A) should be completed for each of the budget periods requested.

Multi-Year Project Requirements

Projects requiring a second, third, fourth, and/or fifth year must include a brief project narrative and budget (one additional page per year) addressing the developmental plans for each additional year of the project.

Additional Documents Can Be Uploaded as Appendix Items in Grants.gov

- Work plan, logic model and/or time line for proposed objectives.
- Position descriptions for key staff.
- Resumes of key staff that reflect current duties.
- Consultant or contractor proposed scope of work and letter of commitment (if applicable).
- Current Indirect Cost Agreement.
- Additional documents to support narrative (*i.e.* data tables, key news articles, etc.).

2. Review and Selection

Each application will be prescreened by the DGM staff for eligibility and completeness as outlined in the funding announcement. Applications that meet the eligibility criteria shall be reviewed for merit by the ORC based on evaluation criteria in this funding announcement. The ORC could be composed of both Tribal and Federal reviewers appointed by the IHS program to review and make recommendations on these applications. The technical review process ensures selection of quality projects in a national competition for limited funding. Incomplete applications and applications that are non-responsive to the eligibility criteria will not be referred to the ORC. The applicant will be notified via email of this decision by the Grants Management Officer of the DGM. Applicants will be notified by DGM, via email, to outline minor missing components (*i.e.,* budget narratives, audit documentation, key contact form) needed for an otherwise complete application. All missing documents must be sent to DGM on or before the due date listed in the email of notification of missing documents required.

To obtain a minimum score for funding by the ORC, applicants must address all program requirements and provide all required documentation.

VI. Award Administration Information

1. Award Notices

The Notice of Award (NoA) is a legally binding document signed by the Grants Management Officer and serves as the official notification of the grant award. The NoA will be initiated by the DGM in our grant system, GrantSolutions (*https://www.grantsolutions.gov*). Each entity that is approved for funding under this announcement will need to request or have a user account in GrantSolutions in order to retrieve their NoA. The NoA is the authorizing document for which

funds are dispersed to the approved entities and reflects the amount of Federal funds awarded, the purpose of the grant, the terms and conditions of the award, the effective date of the award, and the budget/project period.

Disapproved Applicants

Applicants who received a score less than the recommended funding level for approval (75) and were deemed to be disapproved by the ORC, will receive an Executive Summary Statement from the IHS program office within 30 days of the conclusion of the ORC outlining the strengths and weaknesses of their application submitted. The IHS program office will also provide additional contact information as needed to address questions and concerns as well as provide technical assistance if desired.

Approved But Unfunded Applicants

Approved but unfunded applicants that met the minimum scoring range and were deemed by the ORC to be ''Approved'', but were not funded due to lack of funding, will have their applications held by DGM for a period of one year. If additional funding becomes available during the course of FY 2016 the approved but unfunded application may be re-considered by the awarding program office for possible funding. The applicant will also receive an Executive Summary Statement from the IHS program office within 30 days of the conclusion of the ORC.

Note: Any correspondence other than the official NoA signed by an IHS Grants Management Official announcing to the project director that an award has been made to their organization is not an authorization to implement their program on behalf of IHS.

2. Administrative Requirements

Cooperative agreements are administered in accordance with the following regulations, policies, and OMB cost principles:

A. The criteria as outlined in this program announcement.

B. Administrative Regulations for Grants: CFR.

- Uniform Administrative Requirements HHS Awards, located at 45 CFR part 75.

C. Grants Policy:

- HHS Grants Policy Statement, Revised 01/07.

D. Cost Principles:

- Uniform Administrative Requirements for HHS Awards, ''Cost Principles,'' located at 45 CFR part 75, subpart E.

E. Audit Requirements:

- Uniform Administrative Requirements for HHS Awards, ''Audit Requirements,'' located at 45 CFR part 75, subpart F.

3. Indirect Costs

This section applies to all grant recipients that request reimbursement of indirect costs (IDC) in their grant application. In accordance with HHS Grants Policy Statement, Part II–27, IHS requires applicants to obtain a current IDC rate agreement prior to award. The rate agreement must be prepared in accordance with the applicable cost principles and guidance as provided by the cognizant agency or office. A current rate covers the applicable grant activities under the current award's budget period. If the current rate is not on file with the DGM at the time of award, the IDC portion of the budget will be restricted. The restrictions remain in place until the current rate is provided to the DGM.

Generally, IDC rates for IHS grantees are negotiated with the Division of Cost Allocation (DCA) *https://rates.psc.gov/* and the Department of Interior (Interior Business Center) *https://www.doi.gov/ibc/services/finance/indirect-Cost-Services/indian-tribes.* For questions regarding the IDC policy, please call the Grants Management Specialist listed under ''Agency Contacts'' or the main DGM office at (301) 443–5204.

4. Reporting Requirements

The grantee must submit required reports consistent with the applicable deadlines. Failure to submit required reports within the time allowed may result in suspension or termination of an active grant, withholding of additional awards for the project, or other enforcement actions such as withholding of payments or converting to the reimbursement method of payment. Continued failure to submit required reports may result in one or both of the following: (1) The imposition of special award provisions; and (2) the non-funding or non-award of other eligible projects or activities. This requirement applies whether the delinquency is attributable to the failure of the grantee organization or the individual responsible for preparation of the reports. Per DGM policy, all reports are required to be submitted electronically by attaching them as a ''Grant Note'' in GrantSolutions. Personnel responsible for submitting reports will be required to obtain a login and password for GrantSolutions. Please see the Agency Contacts list in section VII for the systems contact information.

The reporting requirements for this program are noted below.

A. Progress Reports

Program progress reports are required semi-annually, within 30 days after the budget period ends. These reports must include a brief comparison of actual accomplishments to the goals established for the period, a summary of progress to date or, if applicable, provide sound justification for the lack of progress, and other pertinent information as required. A final report must be submitted within 90 days of expiration of the budget/project period.

The final report for budget/project year one (FY 2016 only) should include:

- The date of the national Native American youth conference; number of high school student attendees; basic information regarding the agenda; and a summary of the results of attendee evaluations.
- The total number of workshops conducted for freshman and sophomore undergraduate students to help them explore and prepare for health education and careers in health care and/or research; number of attendees at each workshop; basic information regarding the agenda; and a summary of the results of attendee evaluations.
- The total number of workshops conducted for junior and senior undergraduate students preparing to apply to medical and health professions schools; number of attendees at each workshop; basic information regarding the agenda; and a summary of the results of attendee evaluations.

B. Financial Reports

Federal Financial Report FFR (SF–425), Cash Transaction Reports are due 30 days after the close of every calendar quarter to the Payment Management Services, HHS at: *http://www.dpm.psc.gov.* It is recommended that the applicant also send a copy of the FFR (SF–425) report to the Grants Management Specialist. Failure to submit timely reports may cause a disruption in timely payments to the organization.

Grantees are responsible and accountable for accurate information being reported on all required reports: The Progress Reports and Federal Financial Report (FFR).

C. Post Conference Grant Reporting

The following requirements were enacted in Section 3003 of the Consolidated Continuing Appropriations Act, 2013, and Section 119 of the Continuing Appropriations Act, 2014; *Office of Management and Budget Memorandum M–12–12:* All HHS/IHS awards containing grants funds allocated for conferences will be

required to complete a mandatory post award report for all conferences. Specifically: The total amount of funds provided in this award/cooperative agreement that were spent for ''Conference X'', must be reported in final detailed actual costs *within 15 days of the completion of the conference.* Cost categories to address should be: *(1) Contract/Planner, (2) Meeting Space/Venue, (3) Registration Web site, (4) Audio Visual, (5) Speakers Fees, (6) Non-Federal Attendee Travel, (7) Registration Fees, (8) Other.*

D. Federal Sub-Award Reporting System (FSRS)

This award may be subject to the Transparency Act sub-award and executive compensation reporting requirements of 2 CFR part 170.

The Transparency Act requires the OMB to establish a single searchable database, accessible to the public, with information on financial assistance awards made by Federal agencies. The Transparency Act also includes a requirement for recipients of Federal grants to report information about first-tier sub-awards and executive compensation under Federal assistance awards.

IHS has implemented a Term of Award into all IHS Standard Terms and Conditions, NoAs and funding announcements regarding the FSRS reporting requirement. This IHS Term of Award is applicable to all IHS grant and cooperative agreements issued on or after October 1, 2010, with a $25,000 sub-award obligation dollar threshold met for any specific reporting period. Additionally, all new (discretionary) IHS awards (where the project period is made up of more than one budget period) and where: (1) The project period start date was October 1, 2010 or after and (2) the primary awardee will have a $25,000 sub-award obligation dollar threshold during any specific reporting period will be required to address the FSRS reporting. For the full IHS award term implementing this requirement and additional award applicability information, visit the DGM Grants Policy Web site at: *http://www.ihs.gov/dgm/policytopics/*.

E. Compliance With Executive Order 13166 Implementation of Services Accessibility Provisions for All Grant Application Packages and Funding Opportunity Announcements

Recipients of federal financial assistance (FFA) from HHS must administer their programs in compliance with federal civil rights law. This means that recipients of HHS funds must ensure equal access to their programs without regard to a person's race, color, national origin, disability, age and, in some circumstances, sex and religion. This includes ensuring your programs are accessible to persons with limited English proficiency. HHS provides guidance to recipients of FFA on meeting their legal obligation to take reasonable steps to provide meaningful access to their programs by persons with limited English proficiency. Please see *http://www.hhs.gov/civil-rights/for-individuals/special-topics/limited-english-proficiency/guidance-federal-financial-assistance-recipients-title-VI/.*

The HHS Office for Civil Rights also provides guidance on complying with civil rights laws enforced by HHS. Please see *http://www.hhs.gov/civil-rights/for-individuals/section-1557/index.html;* and *http://www.hhs.gov/civil-rights/index.html.* Recipients of FFA also have specific legal obligations for serving qualified individuals with disabilities. Please see *http://www.hhs.gov/civil-rights/for-individuals/disability/index.html.* Please contact the HHS Office for Civil Rights for more information about obligations and prohibitions under federal civil rights laws at *http://www.hhs.gov/civil-rights/for-individuals/disability/index.html* or call 1–800–368–1019 or TDD 1–800–537–7697. Also note it is an HHS Departmental goal to ensure access to quality, culturally competent care, including long-term services and supports, for vulnerable populations. For further guidance on providing culturally and linguistically appropriate services, recipients should review the National Standards for Culturally and Linguistically Appropriate Services in Health and Health Care at *http://minorityhealth.hhs.gov/omh/browse.aspx?lvl=2&lvlid=53.*

Pursuant to 45 CFR 80.3(d), an individual shall not be deemed subjected to discrimination by reason of his/her exclusion from benefits limited by federal law to individuals eligible for benefits and services from the Indian Health Service.

Recipients will be required to sign the HHS–690 Assurance of Compliance form which can be obtained from the following Web site: *http://www.hhs.gov/sites/default/files/forms/hhs-690.pdf,* and send it directly to the: U.S. Department of Health and Human Services, Office of Civil Rights, 200 Independence Ave. SW., Washington, DC 20201.

F. Federal Awardee Performance and Integrity Information System (FAPIIS)

The IHS is required to review and consider any information about the applicant that is in the Federal Awardee Performance and Integrity Information System (FAPIIS) before making any award in excess of the simplified acquisition threshold (currently $150,000) over the period of performance. An applicant may review and comment on any information about itself that a federal awarding agency previously entered. IHS will consider any comments by the applicant, in addition to other information in FAPIIS in making a judgment about the applicant's integrity, business ethics, and record of performance under federal awards when completing the review of risk posed by applicants as described in 45 CFR 75.205.

As required by 45 CFR part 75 Appendix XII of the Uniform Guidance, non-federal entities (NFEs) are required to disclose in FAPIIS any information about criminal, civil, and administrative proceedings, and/or affirm that there is no new information to provide. This applies to NFEs that receive federal awards (currently active grants, cooperative agreements, and procurement contracts) greater than $10,000,000 for any period of time during the period of performance of an award/project.

Mandatory Disclosure Requirements

As required by 2 CFR part 200 of the Uniform Guidance, and the HHS implementing regulations at 45 CFR part 75, effective January 1, 2016, the IHS must require a non-federal entity or an applicant for a federal award to disclose, in a timely manner, in writing to the IHS or pass-through entity all violations of federal criminal law involving fraud, bribery, or gratuity violations potentially affecting the federal award.

Submission is required for all applicants and recipients, in writing, to the IHS and to the HHS Office of Inspector General all information related to violations of federal criminal law involving fraud, bribery, or gratuity violations potentially affecting the federal award. 45 CFR 75.113

Disclosures must be sent in writing to: U.S. Department of Health and Human Services, Indian Health Service, Division of Grants Management, ATTN: Robert Tarwater, Director, 5600 Fishers Lane, Mail Stop 09E70, Rockville, Maryland 20857.

(Include ''Mandatory Grant Disclosures'' in subject line)

Ofc: (301) 443–5204

Fax: (301) 594–0899

Email: Robert.Tarwater@ihs.gov

AND

U.S. Department of Health and Human Services, Office of Inspector General, ATTN: Mandatory Grant

Disclosures, Intake Coordinator, 330 Independence Avenue SW., Cohen Building, Room 5527, Washington, DC 20201. URL: *http://oig.hhs.gov/fraud/report-fraud/index.asp*.

(Include ''Mandatory Grant Disclosures'' in subject line)

Fax: (202) 205–0604 (Include ''Mandatory Grant Disclosures'' in subject line) or.

Email: MandatoryGranteeDisclosures@oig.hhs.gov.

Failure to make required disclosures can result in any of the remedies described in 45 CFR 75.371 Remedies for noncompliance, including suspension or debarment (See 2 CFR parts 180 and 376 and 31 U.S.C. 3321).

VII. Agency Contacts

1. Questions on the programmatic issues may be directed to: Susan Karol, M.D., Chief Medical Officer, 5600 Fishers Lane, Mail Stop: 08E53, Rockville, MD 20857, *Phone:* 301–443–1083, *Fax:* 301–443–4794, *Email: Susan.Karol@ihs.gov*.

2. Questions on grants management and fiscal matters may be directed to: Ms. Cherron Smith, Grants Management Specialist, 5600 Fishers Lane, Mail Stop: 09E70, Rockville, MD 20857, *Phone:* 301–443–5204, *Fax:* 301–443–9602, *Email: Cherron.Smith@ihs.gov*.

3. Questions on systems matters may be directed to: Paul Gettys, Grant Systems Coordinator, 5600 Fishers Lane, Mail Stop: 09E70, Rockville, MD 20857, *Phone:* 301–443–2114; or the DGM main line 301–443–5204, *Fax:* 301–443–9602. *Email: Paul.Gettys@ihs.gov*.

VIII. Other Information

The Public Health Service strongly encourages all cooperative agreement and contract recipients to provide a smoke-free workplace and promote the non-use of all tobacco products. In addition, Public Law 103–227, the Pro-Children Act of 1994, prohibits smoking in certain facilities (or in some cases, any portion of the facility) in which regular or routine education, library, day care, health care, or early childhood development services are provided to children. This is consistent with the HHS mission to protect and advance the physical and mental health of the American people.

Dated: April 20, 2016.

Elizabeth A. Fowler,

Deputy Director for Management Operations, Indian Health Service.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Mental Health; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a meeting of the National Advisory Mental Health Council.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and/or contract proposals and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications and/or contract proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Mental Health Council.

Date: May 26, 2016.

Open: 9:00 a.m. to 1:00 p.m.

Agenda: Presentation of the NIMH Director's Report and discussion of NIMH program and policy issues.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852.

Closed: 2:00 p.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications and/or proposals.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Rockville, MD 20852.

Contact Person: Jean G. Noronha, Ph.D., Director, DEA, Division of Extramural Activities, National Institute of Mental Health, NIH, Neuroscience Center, 6001 Executive Blvd., Room 6154, MSC 9609, Bethesda, MD 20892–9609, 301–443–3367, *jnoronha@mail.nih.gov.*

Any member of the public interested in presenting oral comments to the committee may notify the Contact Person listed on this notice at least 10 days in advance of the meeting. Interested individuals and representatives of organizations may submit a letter of intent, a brief description of the organization represented, and a short description of the oral presentation. Only one representative of an organization may be allowed to present oral comments and if accepted by the committee, presentations may be limited to five minutes. Both printed and electronic copies are requested for the record. In addition, any interested person may file written comments with the committee by forwarding their statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

Information is also available on the Institute's/Center's home page: *www.nimh.nih.gov/about/advisory-boards-and-groups/namhc/index.shtml.,* where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

Automated Commercial Environment (ACE); Announcement of National Customs Automation Program Test of the In-Transit Manifest Pilot Program

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: General notice.

SUMMARY: This document announces that U.S. Customs and Border Protection (CBP) plans to conduct a National Customs Automation Program (NCAP) test relating to truck shipments of commercial goods that transit from a point of origination in Canada through the United States to a point of destination in Canada. Under the NCAP test, CBP will use a new filing code to identify shipments as being part of the In-Transit Manifest Pilot Program in CBP's Automated Commercial Environmental (ACE) Truck Manifest System. Test participants will submit electronically an in-transit manifest with a relaxed validation for the value data element and they will not have to provide the Harmonized Tariff Schedule (HTS) number. This notice provides a description of the NCAP test and specifies the duration and locations of the test. It also invites public comment on any aspect of the test.

DATES: The test will commence no earlier than May 27, 2016 and will run for approximately six months at the following ports: Port Huron, Michigan; Pembina, North Dakota; and Blaine, Washington. Comments concerning this notice and all aspects of the announced test may be submitted at any time during the test period.

ADDRESSES: Written comments concerning program, policy and technical issues should be submitted to Manuel Garza, Director, Manifest and Conveyance Security Division, U.S. Customs and Border Protection, via email at *manuel.a.garza@cbp.dhs.gov*.

SUPPLEMENTARY INFORMATION:

I. Background

A. CBP Regulations

Under CBP regulations, a truck with merchandise that transits the United States during a trip that originates and terminates in Canada must present a paper manifest form, the United States-Canada Transit Manifest, known as Customs Form 7512–B Canada 8½, to CBP when it crosses the border at the U.S. ports of arrival and exit. The procedures for these in-transit shipments are addressed in 19 CFR 123.42 (Truck shipments transiting the United States). Among other things, the regulation provides that trucks transiting the United States must be sealed at the U.S. port of arrival. The regulation also provides that merchandise transported in trucks shall be forwarded in accordance with the general provisions for transportation in-bond (19 CFR 18.1–18.8).

In addition to the requirement to present a paper manifest when a truck crosses the border, CBP also requires electronic filing of certain information regarding the cargo carried by a truck in advance of the truck's arrival at the border. Under 19 CFR 123.92(a), with a few exceptions, for any inbound truck required to report its arrival under 19 CFR 123.1(b) that will have commercial cargo aboard, CBP must electronically receive certain information regarding the cargo to a CBP-approved EDI system [1] no later than either 30 minutes [2] or one hour prior to the

[1] In a notice published in the **Federal Register** on October 27, 2006 (71 FR 62922), CBP designated the ACE Truck Manifest System as the approved EDI for the transmission of required data and announced that the requirement to transmit advance electronic cargo information through ACE would be phased in by groups of ports-of-entry. Through a series of **Federal Register** notices published from the October 27, 2006 notice and concluding with a November 13, 2007 notice (72 FR 63805), CBP mandated the use of ACE for the transmission of advance electronic truck cargo information at all land border ports-of-entry.

[2] As explained in the preamble of the final rule implementing section 123.92, published in the **Federal Register** on December 5, 2003 (68 FR 68140), the 30 minute timeframe applies to truck carriers arriving with shipments qualified for

Continued

carrier's reaching the first port of arrival in the United States. This includes cargo arriving by truck for transportation through the United States from one point to another in the same foreign country.

Truck carriers have been providing up to 69 data elements (including 1 optional data element) as part of their e-Manifest in the ACE Truck Manifest System, as a result of prior NCAP tests performed in conjunction with the Federal Motor Carrier Safety Administration. *See* 69 FR 55167 (September 13, 2004) and 70 FR 13514 (March 21, 2005) and related test notices identified therein. For the purposes of this test, the same data elements will be required, except as otherwise provided for in this notice. The ACE Truck Manifest System enables truck carriers with merchandise transiting the United States from point to point in Canada to file an e-Manifest and enter the merchandise as a Transportation & Exportation (T&E) in-bond entry.

B. Beyond the Border Initiative

On February 4, 2011, President Obama and Prime Minister Harper announced the United States-Canada joint declaration, *Beyond the Border: A Shared Vision for Perimeter Security and Economic Competitiveness* (''Beyond the Border''). Beyond the Border articulates a shared approach to security in which both countries work together to address threats within, at, and away from the U.S.-Canada border, while expediting lawful trade and travel.

On December 7, 2011, President Obama and Prime Minister Harper released the Beyond the Border Action Plan, which sets out joint priorities and specific initiatives for achieving this vision. The Beyond the Border Action Plan proposed a number of pilot projects to test new approaches to facilitating the secure movement of goods, including a U.S. pilot that would involve ''the testing of a new in-bond module for processing in-transit/in-bond (Canada-United States-Canada) cargo traveling by truck.'' *See* Beyond the Border Action Plan (December 7, 2011). CBP is conducting this NCAP test to assess a new automated process for in-transit shipments in the ACE Truck Manifest System.

clearance under the FAST (Free and Secure Trade) Program. The FAST program is a cooperative effort between CBP and the governments of Canada and Mexico which provides expedited border processing for known, low-risk commercial drivers at the U.S.-Canada and U.S.-Mexico borders.

II. Authorization for the NCAP Test

The National Customs Automation Program (NCAP) was established in Subtitle B of Title VI—Customs Modernization, in the North American Free Trade Agreement Implementation Act (Pub. L. 103–182, 107 Stat. 2057, 2170, December 8, 1993) (Customs Modernization Act). *See* 19 U.S.C. 1411. The Customs Modernization Act provides the Commissioner of CBP with authority to conduct limited test programs or procedures designed to evaluate planned components of the NCAP. The NCAP test of In-Transit Manifest Pilot Program (referred to hereafter as ''the NCAP test'' or ''the test'') is authorized pursuant to 19 CFR 101.9(b) which provides for the testing of NCAP programs or procedures. *See* T.D. 95–21.

III. In-Transit Manifest Pilot Program

This notice announces CBP's In-Transit Manifest Pilot Program to test a new electronic in-transit manifest in the ACE Truck Manifest System. The details are provided below.

A. Description of Test

The NCAP test applies to the transportation of commercial cargo from a point of origination in Canada through the United States to a point of destination in Canada (CAN-US-CAN in-transit shipments). These shipments are essentially domestic Canadian shipments that transit through the United States. Under the test, participating truck carriers transporting cargo in CAN-US-CAN in-transit shipments will be required to submit an e-Manifest in the ACE Truck Manifest System no later than 30 minutes [3] prior to arrival in the United States under a new filing type code for these in-transit shipments. Participating carriers must submit an e-Manifest to CBP using the ANSI X12 format or the ACE Secure Data Portal. Participating carriers will not be required to submit the paper manifest form, Customs Form 7512–B Canada 8½, that is required under 19 CFR 123.42. Participating carriers are still required to submit the paper manifest form required under Canadian law to Canadian ports of entry.

Currently, CAN-US-CAN in-transit shipments are filed under shipment release type 62 as Transportation & Exportation (T&E) in-bond entries, which includes a complete ANSI X12 manifest (referred to as a 309 manifest) with the following information: Trip, shipment (including the value of the merchandise and the Harmonized Tariff Schedule (HTS) number), conveyance, equipment, crew and passenger data. Under the test, a new shipment release type 70 for CAN-US-CAN in-transit shipments will be used by participating carriers. Under shipment release type 70, participating carriers will be required to submit the same set of data elements as a 309 manifest but with a relaxed validation for the value data element. They will not be required to provide the HTS number.

For the value data element, CBP will accept a value amount of $2 per pound when the actual value is not available. With regard to the HTS number, an e-Manifest filed under shipment release type 62 requires an HTS number to the 6-digit level under which the cargo will be classified and a description of the cargo. For an e-Manifest filed by test participants under shipment release type 70, only a precise description of the cargo will be required.

Trade associations for Canadian trucking companies have identified these two data elements—value and the HTS number—as being the most problematic for CAN-US-CAN in-transit shipments. Canadian truck carriers rarely know the value and/or the exact HTS classification number for such in-transit cargo and in practice often file incorrect data when filing an e-Manifest under shipment release type 62. By relaxing the validation for the value data and removing the HTS number requirement, CBP intends to reduce the reporting burden on the industry and improve trade efficiencies between Canada and the United States.

The in-transit manifest will be processed and retained in ACE in the same manner as a type 62 manifest. Upon arrival in the United States, CBP will generate a ''transit movement authorized'' message (referred to as a 350 message) that will be sent to the carrier. The shipment will then be able to transit the United States and proceed to the United States port of export as an in-transit entry. When the shipment arrives at the United States port of export, the carrier will report the arrival of the shipment to CBP via an EDI message or through the carrier's ACE portal account. CBP will issue another 350 message to the carrier notifying the carrier that the shipment has entered Canada and that the in-transit entry is closed.

Requiring participating carriers to file an in-transit manifest electronically under new shipment release type 70, along with relaxing the validation for

[3] Thirty minutes is the time-frame specified in 19 CFR 123.92(a) that applies to truck carriers using FAST commercial drivers. This is the applicable time-frame for participating truck carriers because as a condition of participation in this test, each carrier must use commercial drivers cleared under the FAST program. *See* part III.B of this notice.

the value data element and eliminating the HTS number requirement, will facilitate the in-transit manifest process for both the trade and CBP. Canadian carriers will be able to route certain domestic shipments through the United States with greater efficiency and CBP will benefit from an entirely electronic in-transit manifest.

B. Test Participants and Conditions of Participation

Participation in the In-Transit Manifest Pilot Program is currently limited to nine Canadian truck carriers that have been selected by CBP in consultation with the Canadian Border Services Agency (CBSA). Each participating carrier is a bonded carrier and a certified member of the Customs-Trade Partnership Against Terrorism (C–TPAT), a voluntary supply chain security program led by CBP that is focused on improving the security of private companies' supply chains with respect to terrorism. As a condition of participation, each carrier must use commercial drivers cleared under the FAST program. FAST driver identification provides CBP with a full set of identifying information regarding the driver, including the driver's name, date of birth, gender, citizenship, and address. Another condition of participation in this NCAP test is that no passengers are permitted on the Canadian trucks transiting the United States, with the exception of additional drivers also cleared under the FAST program. As provided in Section VI, participants are also required to take part in an evaluation of the test.

C. Test Duration and Locations

The NCAP test will be conducted for approximately six months from its start at the following ports of entry: Port Huron, Michigan; Pembina, North Dakota; and Blaine, Washington. Any future expansion of this NCAP test to additional ports and/or extension of the time period will be announced on CBP's Web site at *www.cbp.gov*. Participants will also be notified of any expansion.

IV. Regulatory Provisions Affected

Regulations in 19 CFR parts 18 and 123 that conflict with the terms and conditions of the NCAP test are suspended and overridden to the extent of the conflict for the duration of the test for test participants and only to the extent of their participation in this test.

V. Misconduct

If a test participant fails to abide by the rules, procedures, or term and conditions of this and all other applicable **Federal Register** notices, fails to exercise reasonable care in the execution of participant obligations, or otherwise fails to comply with all applicable laws and regulations, then the participant may be suspended from participation in this test and/or subjected to penalties, liquidated damages, and/or other administrative or judicial sanction. Additionally, CBP has the right to suspend a test participant based on a determination that an unacceptable compliance risk exists. Any decision proposing suspension may be appealed in writing to the Assistant Commissioner (Office of Field Operations) within 15 days of the decision date. Such proposed suspension will apprise the participant of the facts or conduct warranting suspension. Should the participant appeal the notice of proposed suspension, the participant should address the facts or conduct charges contained in the notice and state how he has or will achieve compliance. However, in the case of willfulness or where public health interests are concerned, the suspension may be effective immediately.

VI. Test Evaluation Criteria

All interested parties are invited to comment on any aspect of this test at any time. To ensure adequate feedback, participants are required to take part in an evaluation of this test. CBP needs comments and feedback on all aspects of this test, including the design, conduct and implementation of the test in order to determine whether to modify, alter, expand, limit, continue, end or implement this program by regulation. The final results of the evaluation will be published in the **Federal Register** and the Customs Bulletin as required by 19 CFR 101.9.

VII. Paperwork Reduction Act

As noted above, CBP is accepting only nine participants in the NCAP test. This means that fewer than ten persons will be subject to any information collections under the NCAP test. Accordingly, collections of information encompassed within this notice are exempted from the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3502 and 3507).

Dated: April 22, 2016.

Todd Owen,

Assistant Commissioner, Office of Field Operations.

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Customs and Border Protection

DEPARTMENT OF AGRICULTURE

Forest Service

Notice of intent to prepare a Joint Environmental Impact Statement and To Conduct Public Scoping

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security and Forest Service, USDA.

ACTION: Notice of intent to prepare a Joint Environmental Impact Statement concerning the repair and maintenance of Bog Creek Road and closure of certain roads within the Blue-Grass Bear Management Unit in the Selkirk Mountains in Boundary County, Idaho; request for comments; and notice of public scoping.

SUMMARY: This notice announces that U.S. Customs and Border Protection (CBP) and the U.S. Forest Service (Forest Service) Idaho Panhandle National Forests (IPNF) (collectively the ''Agencies'') intend to prepare a joint Environmental Impact Statement (EIS) to identify and assess potential impacts upon the environment of: Repairing and maintaining an approximately 5.6-mile section of the existing Bog Creek Road, which is located in the Selkirk Mountains in Boundary County, Idaho, within approximately two miles of the Canadian border, on land within the Blue-Grass Bear Management Unit (BMU) that is managed by the IPNF; and closing for motorized use additional roads within the Blue-Grass BMU to comply with the IPNF *Forest Plan Amendments for Motorized Access Management within the Selkirk and Cabinet-Yaak Grizzly Bear Recovery Zones* (Access Amendment) and reduce road density in the Blue-Grass BMU. This notice initiates the public scoping process for the preparation of the EIS. The purpose of the public scoping process is to solicit public comments regarding the potential environmental impacts that may be addressed. This notice commences the public scoping period for which CBP and IPNF are requesting written comments. This process is being conducted pursuant to the National Environmental Policy Act (NEPA), the Council on Environmental Quality Regulations for Implementing the NEPA (40 CFR parts 1500–1508), and CBP and Forest Service NEPA guidelines. Additionally, pursuant to Section 106 of the National Historic Preservation Act, the public scoping

process will allow members of the general public to provide CBP and IPNF comments on potential impacts to historic and cultural resources for the proposed action.

DATES: The scoping comment period will be 30 days. To ensure consideration, comments must be received by May 27, 2016.

Comments may be submitted as set forth in the **ADDRESSES** section of this document. This project implements a land management plan and is subject to 36 CFR part 218, subparts A and B of the Forest Service's Project-level Predecisional Administrative Review Process. Pursuant to 36 CFR part 218, only those who provide specific, written comments regarding the proposed project will be eligible to file an objection.

ADDRESSES: Comments may be submitted either by mail or by email at the addresses indicated below. To avoid duplication, please use only one of the following methods to provide written comments:

(a) *Via mail:* Bog Creek Road EIS, P.O. Box 643, Flagstaff, Arizona, 86002–0643.

(b) *Via email: SPWBogCreekEIS@cbp.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Paul Enriquez, CBP, Border Patrol Facilities & Tactical Infrastructure Program Management Office, by telephone at (949) 643–6365, or by email at *Paul.Enriquez@cbp.dhs.gov.* You may also visit the CBP public Web site for more information at: *http://www.cbp.gov/about/environmental-cultural-stewardship/nepa-documents/docs-review.* Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern Time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Background

Repairs and Maintenance to Bog Creek Road

U.S. Customs and Border Protection (CBP) protects the nation's borders from terrorism, human and drug smuggling, illegal migration, and agricultural pests while facilitating the flow of legitimate travel and trade. CBP does so by integrating modern technology, deploying highly trained law enforcement personnel, and developing public and private sector partnerships that advance its overall mission.

At 5,500 miles in length, the Northern Border of the United States stands as the longest common border in the world. The terrain ranges from densely forested lands on the west and east coasts to open plains in the middle of the country. To complement its efforts, CBP uses partnerships with other Federal, state, and local law enforcement agencies to meet the challenges of ensuring security while facilitating legitimate trade and travel along this expansive and complex border area.

The primary road that provides east-west access to the Northern Border in the Selkirk Mountains of Northern Idaho is Bog Creek Road. Bog Creek Road is situated on National Forest System lands that are a part of the Idaho Panhandle National Forests (IPNF). The area is managed by the IPNF unit of the Forest Service (also referred to as IPNF). The road is currently impassable to most vehicles.

Bog Creek Road was closed on both ends in the late 1980s, to meet grizzly bear habitat requirements. As a result of the closure, the road has only been maintained on a limited basis. By the mid-1990s, the road had experienced minor failures. Around the year 2000, a large failure occurred when a large culvert failed due to heavy surface water runoff. At that time, the road became impassable to most vehicles. Currently, the road is gated at the east end and barricaded at the west end. In recent years, the road has been infrequently used by Forest Service and CBP personnel traveling on all-terrain vehicles (ATVs) and horseback, but using ATVs requires a winch system to traverse the large culvert failure. Nearly the entire length of Bog Creek Road is now overgrown with alder brush, small trees, and other vegetation.

Without access to the Northern Border area via Bog Creek Road, CBP must use a lengthy detour to get to the border, including using state highways in Washington and Idaho and other forest roads. This alternative route is approximately 180 miles and adds approximately four hours one way (eight hours total) to CBP patrol response times.

Closing Additional Roads for Motorized Use

Bog Creek Road is located within the Blue-Grass Bear Management Unit (BMU) of the Selkirk Grizzly Bear Recovery Zone (SRZ) of the IPNF. The IPNF has been working since the late 1980s to create secure habitat for grizzly bears. For example, Bog Creek Road was closed in the late 1980s to allow for more effective management of grizzly bear habitat. The IPNF continues to manage habitat conditions of the SRZ. To further manage grizzly bear habitat conditions, in 2011, the IPNF issued a Record of Decision (ROD) for the *Forest Plan Amendments for Motorized Access Management within the Selkirk and Cabinet-Yaak Grizzly Bear Recovery Zones* (Access Amendment). The Access Amendment set motorized vehicle access and security standards in the zones to conserve and contribute to the recovery of grizzly bears, and to meet the agency's responsibilities under the Endangered Species Act (ESA). These standards limit the use of motorized vehicles within the Blue-Grass BMU area to a specified percentage of the land. By limiting high levels of human activity in the area, effective habitat can be created for grizzly bears. The ROD and accompanying biological opinion from the U.S. Fish and Wildlife Service require the standards in the Access Amendment to be met by 2019. Currently, the BMU is not meeting the motorized access standards set forth in the Access Amendment.

The status of all roads in the BMU area is of great interest to CBP since the entire Blue-Grass BMU is within 10 miles of the Northern Border. CBP needs good access to this area to execute its mission to protect the Northern Border. Because there are limited options regarding which roads to close for motorized use that meet the Access Amendment standards and the ESA, and which provide border access to CBP, the Agencies are working together to determine acceptable alternatives.

Purpose and Need for Action

The purpose and need of the proposed action is to provide improved east-west access across the Selkirk Mountains on National Forest System lands that would: (1) Enable CBP to execute its statutory mission to protect the U.S. Northern Border and provide for the safety of CBP and other law enforcement officers in carrying out their duties and (2) meet Access Amendment standards for motorized access in a grizzly bear habitat in the Blue-Grass BMU area.

Proposed Action

Repairs and Maintenance to Bog Creek Road

One aspect of the proposed action would involve the repair and maintenance of an approximately 5.6-mile section of the existing Bog Creek Road between Forest Road (FR) 1013 and FR 2450 within the Blue-Grass BMU of the SRZ of the IPNF. The road is located in the Selkirk Mountains in Boundary County, Idaho, within approximately two miles of the Canadian border.

The Agencies anticipate that the proposed action would likely involve replacing or repairing damaged culverts, grading and resurfacing areas that have been heavily eroded by surface water flows, infilling potholes, and removing protruding boulders. Although widening Bog Creek Road is not a part of the proposed action, there may be areas which no longer meet minimum width requirements and may require cut and fill work to achieve the desired road operating and safety standards. Trees and other vegetation within the roadway and to either side would likely be grubbed or cut back to facilitate safe vehicle passage.

The proposed action would also likely include gathering and transporting fill materials (riprap, mixed soil/rock, and crushed aggregate) from ''borrow'' pits to use in general resurfacing/fill and in installation of the culvert replacements. Some equipment would be needed to perform the repairs and maintenance, including a dozer, a grader, a hydraulic excavator, and a dump truck. In addition, several pickup trucks or SUVs would be needed to transport construction personnel to and from the area. The Agencies anticipate that upon completion of the proposed repairs and maintenance, the 5.6-mile section of Bog Creek Road would remain closed for public motorized use and would be limited to administrative use only.

Closing Additional Roads for Motorized Use

Another aspect of the proposed action would involve the closure of certain roads within the Blue-Grass BMU. Bog Creek Road is located in the Blue-Grass BMU within the SRZ. This BMU area is currently not meeting Access Amendment standards for motorized access in a grizzly bear habitat. The Agencies anticipate that other roads within the Blue-Grass BMU area would need to be closed for motorized use under this proposed action. The road closures would be necessary to mitigate the potential impacts to grizzly bear habitats associated with the repair and subsequent use of Bog Creek Road and to allow the Forest Service to meet the Access Amendment standards and its statutory obligations under the ESA. Because there are limited options regarding roads to close for motorized use to meet the Access Amendment standards, the Agencies are working together to determine alternatives that would meet CBP's requirements for border access as well as the Forest Service's requirements to comply with the Access Amendment standards and the ESA.

The Agencies have identified a preliminary list of roads that could be closed for motorized use. All of these roads are currently closed to public use and only open for limited administrative use. Roads that have been preliminarily identified for possible motorized closure include FR 2464 Upper, 2464 Lower, 1322, 1322A, 1013D, 1013C, 1388, 1388A, 2252, 636, and 2253. Approximately 26 miles of IPNF roads could be closed under the proposed action. As a part of the scoping process (discussed below), the Agencies are seeking further input on possible motorized road closure alternatives.

Lead and Cooperating Agencies

CBP and the Forest Service will work together as joint lead agencies on the EIS.

Responsible Official

The Executive Director, Facilities Management & Engineering, CBP, is the deciding official for CBP and the Forest Supervisor, IPNF, Forest Service, is the deciding official for the Forest Service.

Public Scoping Process

Public scoping for the Bog Creek Road repair and maintenance proposal was initially conducted by CBP in February and March of 2013. Information gathered from the previous scoping effort was used to inform the Agencies about what level of NEPA analysis was necessary to evaluate the proposed project. The initial scoping information included the possibility that road closures may become part of the proposed action, but did not include specific motorized road closure information. Using initial scoping information, the Agencies determined that the NEPA analysis would be conducted through an EIS process. All scoping comments submitted during the initial scoping will be included in issue development for the current EIS process. A Scoping Report that summarizes the initial scoping effort is available for review at *http://www.cbp.gov/about/environmental-cultural-stewardship/nepa-documents/docs-review.*

This Notice of Intent (NOI) initiates the public scoping process which will guide the development of the EIS. All interested parties are invited to participate in the scoping process. CBP and the Forest Service invite agencies, organizations, and the general public to provide input to this process of scoping environmental issues for consideration in the EIS. Written comments may be submitted as described in the **ADDRESSES** section of this document. When submitting comments, please include your name and address. Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. Comments submitted anonymously will also be accepted and considered.

After the public scoping period is complete and the Agencies have reviewed the results, a compilation list of comments will be included in an amendment to the initial Scoping Report (described above). The amended Scoping Report will be made available on the CBP public Web site: *http://www.cbp.gov/about/environmental-cultural-stewardship/nepa-documents/docs-review.*

Public Involvement in Historic Preservation Activities Under Section 106 of the National Historic Preservation Act

Section 106 of the National Historic Preservation Act (54 U.S.C. 306108) requires Federal agencies to review all actions which may affect resources listed on, or eligible for, the National Register of Historic Places in order to take into account the effects of their undertakings on historic properties, and to afford the Idaho State Historic Preservation Officer and tribal governments a reasonable opportunity to comment on such undertakings. During the process of public scoping and preparation of the EIS, the Agencies seek to identify interested parties and obtain public comments on historic preservation issues related to the road repair and closure of roads for motorized use.

Preliminary Issues

Based upon the initial project scoping, some preliminary issues have been identified as potential effects of the proposed project. These include effects on:

- Border security;
- threatened and endangered species including grizzly bear, caribou, lynx, and bull trout;
- Blue-Grass BMU grizzly bear core habitat requirement;
- National Forest access; and
- biological resources including fisheries, wildlife, sensitive plants, and noxious weeds.

Permits and Licenses Required

The proposed project would likely require a Clean Water Act Section 404 Permit. The Agencies will work with the Idaho Department of Environmental Quality and the U.S. Army Corps of Engineers to determine the necessary

permit process. All required permits would be obtained prior to project implementation.

Next Steps

In accordance with NEPA, the draft EIS will be made available to the public for review and comment through a Notice of Availability (NOA) in the **Federal Register**. The NOA will provide directions for obtaining copies of the draft EIS as well as dates and locations for any associated public participation meetings. After a public comment period on the draft EIS, CBP and the Forest Service will complete a final EIS.

Dated: April 21, 2016.

Karl H. Calvo,

Executive Director, Facilities Management and Engineering, Office of Administration.

Shanda Fallau Dekome,

Acting Forest Supervisor, Idaho Panhandle National Forests, U.S. Forest Service.

[FR Doc. 2016–09790 Filed 4–26–16; 8:45 am]

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2016–0002; Internal Agency Docket No. FEMA–B–1610]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings.

DATES: Comments are to be submitted on or before July 26, 2016.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

You may submit comments, identified by Docket No. FEMA–B–1610, to Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at *http://floodsrp.org/pdfs/srp_fact_sheet.pdf.*

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

[FR Doc. 2016–09820 Filed 4–26–16; 8:45 am]

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2016–0004; OMB No. 1660–0098]

Agency Information Collection Activities: Submission for OMB Review; Comment Request; Citizen Corps Council Registration

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: The Federal Emergency Management Agency (FEMA) will submit the information collection abstracted below to the Office of Management and Budget for review and clearance in accordance with the requirements of the Paperwork Reduction Act of 1995. The submission will describe the nature of the information collection, the categories of respondents, the estimated burden (*i.e.,* the time, effort and resources used by respondents to respond) and cost, and the actual data collection instruments FEMA will use.

DATES: Comments must be submitted on or before May 27, 2016.

ADDRESSES: Submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the Desk Officer for the Department of Homeland Security, Federal Emergency Management Agency, and sent via electronic mail to *oira.submission@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection should be made to Director, Records Management Division, 500 C Street SW., Washington, DC 20472–3100, or email address *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: This information collection previously published in the **Federal Register** on February 10, 2016, at 81 FR 7137 with a 60 day public comment period. No comments were received. The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.

Collection of Information

Title: Citizen Corps Council Registration.

Type of Information Collection: Revision of a currently approved information collection.

OMB Number: 1660–0098.

Form Titles and Numbers: FEMA Form 008–0–25, Citizen Corps Council Registration.

Abstract: FEMA's Community Preparedness Division would like to revise a currently approved collection for its registration of State, local, Tribal and territorial Councils and Community Emergency Response Teams (CERT). The registration process allows for new Councils to submit information on the Council or CERT to the State Citizen Corps Program Manager for approval. The revised registration process will allow for the collection of more valuable information and the tool is more user-friendly for Citizen Corps Councils and CERTs.

Affected Public: State, local or Tribal Government.

Estimated Number of Respondents: 3,900.

Estimated Total Annual Burden Hours: 3,900 hours.

Estimated Cost: The estimated annual cost to respondents for the hour burden is $93,249.00. There are no annual costs to respondents operations and maintenance costs for technical services. There is no annual start-up or capital costs. The cost to the Federal Government is $378,690.00.

Dated: April 20, 2016.

Richard W. Mattison,

Records Management Program Chief, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

[FR Doc. 2016–09843 Filed 4–26–16; 8:45 am]

BILLING CODE 9110–21–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2016–0002; Internal Agency Docket No. FEMA–B–1618]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice lists communities where the addition or modification of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or the regulatory floodway (hereinafter referred to as flood hazard determinations), as shown on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports, prepared by the Federal Emergency Management Agency (FEMA) for each community, is appropriate because of new scientific or technical data. The FIRM, and where applicable, portions of the FIS report, have been revised to reflect these flood hazard determinations through issuance of a Letter of Map Revision (LOMR), in accordance with Title 44, part 65 of the Code of Federal Regulations (44 CFR part 65). The LOMR will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings. For rating purposes, the currently effective community number is shown in the table below and must be used for all new policies and renewals.

DATES: These flood hazard determinations will become effective on the dates listed in the table below and revise the FIRM panels and FIS report in effect prior to this determination for the listed communities.

From the date of the second publication of notification of these changes in a newspaper of local circulation, any person has 90 days in which to request through the community that the Deputy Associate Administrator for Mitigation reconsider the changes. The flood hazard determination information may be changed during the 90-day period.

ADDRESSES: The affected communities are listed in the table below. Revised flood hazard information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

Submit comments and/or appeals to the Chief Executive Officer of the community as listed in the table below.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The specific flood hazard determinations are not described for each community in this notice. However, the online location and local community map repository address where the flood hazard determination information is available for inspection is provided.

Any request for reconsideration of flood hazard determinations must be submitted to the Chief Executive Officer of the community as listed in the table below.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.,* and with 44 CFR part 65.

The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. The flood hazard determinations are in accordance with 44 CFR 65.4.

The affected communities are listed in the following table. Flood hazard determination information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2016–0002]

Final Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final notice.

SUMMARY: Flood hazard determinations, which may include additions or modifications of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or regulatory floodways on the Flood Insurance Rate Maps (FIRMs) and where applicable, in the supporting Flood Insurance Study (FIS) reports have been made final for the communities listed in the table below.

The FIRM and FIS report are the basis of the floodplain management measures that a community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report are used by insurance agents and others to calculate appropriate flood insurance premium rates for buildings and the contents of those buildings.

DATES: The effective date of September 16, 2016 which has been established for the FIRM and, where applicable, the supporting FIS report showing the new or modified flood hazard information for each community.

ADDRESSES: The FIRM, and if applicable, the FIS report containing the final flood hazard information for each community is available for inspection at the respective Community Map Repository address listed in the tables below and will be available online through the FEMA Map Service Center at *www.msc.fema.gov* by the effective date indicated above.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the new or modified flood hazard information for each community listed. Notification of these changes has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Mitigation has resolved any appeals resulting from this notification.

This final notice is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the new or revised FIRM and FIS report available at the address cited below for each community or online through the FEMA Map Service Center at *www.msc.fema.gov.* The flood hazard determinations are made final in the watersheds and/or communities listed in the table below.

(Catalog of Federal Domestic Assistance No. 97.022, ''Flood Insurance.'')

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2015–0024; OMB No. 1660–0100]

Agency Information Collection Activities: Submission for OMB Review; Comment Request; General Admissions Applications (Long and Short) and Stipend Forms

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: The Federal Emergency Management Agency (FEMA) will submit the information collection abstracted below to the Office of Management and Budget for review and clearance in accordance with the requirements of the Paperwork Reduction Act of 1995. The submission will describe the nature of the information collection, the categories of respondents, the estimated burden (*i.e.,* the time, effort and resources used by respondents to respond) and cost, and the actual data collection instruments FEMA will use.

DATES: Comments must be submitted on or before May 27, 2016.

ADDRESSES: Submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the Desk Officer for the Department of Homeland Security, Federal Emergency Management Agency, and sent via electronic mail to *oira.submission@omb.eop.gov.*

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection should be made to Director, Records Management Division, 500 C Street SW., Washington, DC 20472–3100, or email address *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: This proposed information collection previously published in the **Federal Register** on January 26, 2016 at 81 FR 4330 with a 60 day public comment period. No comments were received. The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.

Collection of Information

Title: General Admissions Applications (Long and Short) and Stipend Forms.

Type of Information Collection: Revision of a currently approved information collection.

OMB Number: 1660–0100.

Form Titles and Numbers: The form numbers have changed in accordance with the Federal Enterprise Architecture (FEA) numbering system. FEMA Form 119–25–0–1, General Admissions Application; FEMA Form 119–25–0–3, Student Stipend Agreement; FEMA Form 119–25–0–4, Student Stipend Agreement (Amendment); FEMA Form 119–25–0–5, National Fire Academy Executive Fire Officer Program Application for Admission; and FEMA Form 119–25–0–6, Training Registration Form.

Abstract: FEMA provides training to advance the professional development of personnel engaged in fire prevention and control and emergency managemernt activities through its Center for Domestic Preparedness, Emergency Management Institute, National Fire Academy, National Training and Education Division, National Domestic Preparedness Consortium, and Rural Domestic Preparedness Consortium. FEMA Form 119–25–0–1 has an increase in the number of respondents from 25,000 to 52,000 (+27,000) because FEMA is replacing all existing General Admissions Application and Training Registration forms with a single FEMA-wide form which will be submitted as a paper version or using an on-line application process. There was also an adjustment increase for FEMA Form 119–25–0–1 from 3,750 hours to 7,800 (+4,050) hours. The FEMA Form 119–25–0–6 has been created for those courses where less information is required from the respondent. It is expected that 154,500 respondents will used this form requiring 15,450 burden hours. The FEMA Form 119–25–2 (reduction of 80,000 respondents and 8,000 burden hours) is being eliminated and being replaced by the FEMA Form 119–25–0–1.

Affected Public: State, Local or Tribal Government, Business or other for-profit, Not-for-profit institutions and Federal Government.

Estimated Number of Respondents: 214,300.

Estimated Total Annual Burden Hours: 24,400.

Estimated Cost: 2,063,978.

Dated: April 20, 2016.

Richard W. Mattison,

Records Management Program Chief, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

BILLING CODE 9111–72–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2016–0002]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final notice.

SUMMARY: New or modified Base (1-percent annual chance) Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, and/or regulatory floodways (hereinafter referred to as flood hazard determinations) as shown on the indicated Letter of Map Revision (LOMR) for each of the communities listed in the table below are finalized. Each LOMR revises the Flood Insurance

Rate Maps (FIRMs), and in some cases the Flood Insurance Study (FIS) reports, currently in effect for the listed communities. The flood hazard determinations modified by each LOMR will be used to calculate flood insurance premium rates for new buildings and their contents.

DATES: The effective date for each LOMR is indicated in the table below.

ADDRESSES: Each LOMR is available for inspection at both the respective Community Map Repository address listed in the table below and online through the FEMA Map Service Center at *www.msc.fema.gov.*

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final flood hazard determinations as shown in the LOMRs for each community listed in the table below. Notice of these modified flood hazard determinations has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Mitigation has resolved any appeals resulting from this notification.

The modified flood hazard determinations are made pursuant to section 206 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.,* and with 44 CFR part 65.

For rating purposes, the currently effective community number is shown and must be used for all new policies and renewals.

The new or modified flood hazard information is the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being already in effect in order to remain qualified for participation in the National Flood Insurance Program (NFIP).

This new or modified flood hazard information, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities.

This new or modified flood hazard determinations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings, and for the contents in those buildings. The changes in flood hazard determinations are in accordance with 44 CFR 65.4.

Interested lessees and owners of real property are encouraged to review the final flood hazard information available at the address cited below for each community or online through the FEMA Map Service Center at *www.msc.fema.gov.*

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4263–DR; Docket ID FEMA–2016–0001]

Louisiana; Amendment No. 5 to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster declaration for the State of Louisiana (FEMA–4263–DR), dated March 13, 2016, and related determinations.

DATES: *Effective Date:* April 7, 2016.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: The notice of a major disaster declaration for the State of Louisiana is hereby amended to include the following area among those areas determined to have been adversely affected by the event declared a major disaster by the President in his declaration of March 13, 2016.

Avoyelles Parish for Individual Assistance and assistance for debris removal and emergency protective measures (Categories A and B), including direct federal assistance, under the Public Assistance program.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050 Presidentially Declared Disaster Assistance to Individuals and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

W. Craig Fugate,

Administrator, Federal Emergency Management Agency.

BILLING CODE 9111–23–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2016–0002; Internal Agency Docket No. FEMA–B–1616]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings.

DATES: Comments are to be submitted on or before July 26, 2016.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

You may submit comments, identified by Docket No. FEMA–B–1616, to Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at *http://floodsrp.org/pdfs/srp_fact_sheet.pdf.*

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2016–0002]

Final Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Final notice.

SUMMARY: Flood hazard determinations, which may include additions or modifications of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or regulatory floodways on the Flood Insurance Rate Maps (FIRMs) and where applicable, in the supporting Flood Insurance Study (FIS) reports have been made final for the communities listed in the table below.

The FIRM and FIS report are the basis of the floodplain management measures that a community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report are used by insurance agents and others to calculate appropriate flood insurance premium rates for buildings and the contents of those buildings.

DATES: The effective date of July 20, 2016 which has been established for the FIRM and, where applicable, the supporting FIS report showing the new or modified flood hazard information for each community.

ADDRESSES: The FIRM, and if applicable, the FIS report containing the final flood hazard information for each community is available for inspection at the respective Community Map Repository address listed in the tables below and will be available online through the FEMA Map Service Center at *www.msc.fema.gov* by the effective date indicated above.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the new or modified flood hazard information for each community listed. Notification of these changes has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Mitigation has resolved any appeals resulting from this notification.

This final notice is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the new or revised FIRM and FIS report available at the address cited below for each community or online through the FEMA Map Service Center at *www.msc.fema.gov.* The flood hazard determinations are made final in the watersheds and/or communities listed in the table below.

(Catalog of Federal Domestic Assistance No. 97.022, ''Flood Insurance.'')

Dated: April 12, 2016.

Roy E. Wright,

Deputy Associate Administrator for Insurance and Mitigation, Department of Homeland Security, Federal Emergency Management Agency.

Federal Emergency Management Agency

[Internal Agency Docket No. FEMA–4263–DR; Docket ID FEMA–2016–0001]

Louisiana; Amendment No. 6 to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster declaration for the State of Louisiana (FEMA–4263–DR), dated March 13, 2016, and related determinations.

DATES: *Effective Date:* April 8, 2016.

FOR FURTHER INFORMATION CONTACT: Dean Webster, Office of Response and Recovery, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–2833.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the incident period for this disaster is closed effective April 8, 2016.

The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 97.030, Community Disaster Loans; 97.031, Cora Brown Fund; 97.032, Crisis Counseling; 97.033, Disaster Legal Services; 97.034, Disaster Unemployment Assistance (DUA); 97.046, Fire Management Assistance Grant; 97.048, Disaster Housing Assistance to Individuals and Households In Presidentially Declared Disaster Areas; 97.049, Presidentially Declared Disaster Assistance—Disaster Housing Operations for Individuals and Households; 97.050, Presidentially Declared Disaster Assistance to Individuals

and Households—Other Needs; 97.036, Disaster Grants—Public Assistance (Presidentially Declared Disasters); 97.039, Hazard Mitigation Grant.

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2016–0002; Internal Agency Docket No. FEMA–B–1603]

Proposed Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: Comments are requested on proposed flood hazard determinations, which may include additions or modifications of any Base Flood Elevation (BFE), base flood depth, Special Flood Hazard Area (SFHA) boundary or zone designation, or regulatory floodway on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports for the communities listed in the table below. The purpose of this notice is to seek general information and comment regarding the preliminary FIRM, and where applicable, the FIS report that the Federal Emergency Management Agency (FEMA) has provided to the affected communities. The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report, once effective, will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings.

DATES: Comments are to be submitted on or before July 26, 2016.

ADDRESSES: The Preliminary FIRM, and where applicable, the FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

You may submit comments, identified by Docket No. FEMA–B–1603, to Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov.*

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: FEMA proposes to make flood hazard determinations for each community listed below, in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR 67.4(a).

These proposed flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. These flood hazard determinations are used to meet the floodplain management requirements of the NFIP and also are used to calculate the appropriate flood insurance premium rates for new buildings built after the FIRM and FIS report become effective.

The communities affected by the flood hazard determinations are provided in the tables below. Any request for reconsideration of the revised flood hazard information shown on the Preliminary FIRM and FIS report that satisfies the data requirements outlined in 44 CFR 67.6(b) is considered an appeal. Comments unrelated to the flood hazard determinations also will be considered before the FIRM and FIS report become effective.

Use of a Scientific Resolution Panel (SRP) is available to communities in support of the appeal resolution process. SRPs are independent panels of experts in hydrology, hydraulics, and other pertinent sciences established to

review conflicting scientific and technical data and provide recommendations for resolution. Use of the SRP only may be exercised after FEMA and local communities have been engaged in a collaborative consultation process for at least 60 days without a mutually acceptable resolution of an appeal. Additional information regarding the SRP process can be found online at *http://floodsrp.org/pdfs/srp_fact_sheet.pdf.*

The watersheds and/or communities affected are listed in the tables below. The Preliminary FIRM, and where applicable, FIS report for each community are available for inspection at both the online location and the respective Community Map Repository address listed in the tables. For communities with multiple ongoing Preliminary studies, the studies can be identified by the unique project number and Preliminary FIRM date listed in the tables. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA–2016–0002; Internal Agency Docket No. FEMA–B–1619]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice lists communities where the addition or modification of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or the regulatory floodway (hereinafter referred to as flood hazard determinations), as shown on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports, prepared by the Federal Emergency Management Agency (FEMA) for each community, is appropriate because of new scientific or technical data. The

FIRM, and where applicable, portions of the FIS report, have been revised to reflect these flood hazard determinations through issuance of a Letter of Map Revision (LOMR), in accordance with Title 44, part 65 of the Code of Federal Regulations (44 CFR part 65). The LOMR will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings. For rating purposes, the currently effective community number is shown in the table below and must be used for all new policies and renewals.

DATES: These flood hazard determinations will become effective on the dates listed in the table below and revise the FIRM panels and FIS report in effect prior to this determination for the listed communities.

From the date of the second publication of notification of these changes in a newspaper of local circulation, any person has 90 days in which to request through the community that the Deputy Associate Administrator for Mitigation reconsider the changes. The flood hazard determination information may be changed during the 90-day period.

ADDRESSES: The affected communities are listed in the table below. Revised flood hazard information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

Submit comments and/or appeals to the Chief Executive Officer of the community as listed in the table below.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 500 C Street SW., Washington, DC 20472, (202) 646–7659, or (email) *patrick.sacbibit@fema.dhs.gov;* or visit the FEMA Map Information eXchange (FMIX) online at *www.floodmaps.fema.gov/fhm/fmx_main.html.*

SUPPLEMENTARY INFORMATION: The specific flood hazard determinations are not described for each community in this notice. However, the online location and local community map repository address where the flood hazard determination information is available for inspection is provided.

Any request for reconsideration of flood hazard determinations must be submitted to the Chief Executive Officer of the community as listed in the table below.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.,* and with 44 CFR part 65.

The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. The flood hazard determinations are in accordance with 44 CFR 65.4.

The affected communities are listed in the following table. Flood hazard determination information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at *www.msc.fema.gov* for comparison.

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0049]

Agency Information Collection Activities: Request for Verification of Naturalization, Form N–25; Extension, Without Change, of a Currently Approved Collection

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 60-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration (USCIS) invites the general public and other Federal agencies to comment upon this proposed extension of a currently approved collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until June 27, 2016.

ADDRESSES: All submissions received must include the OMB Control Number 1615–0049 in the subject box, the agency name and Docket ID USCIS–2005–0036. To avoid duplicate submissions, please use only *one* of the following methods to submit comments:

(1) *Online.* Submit comments via the Federal eRulemaking Portal Web site at *http://www.regulations.gov* under e-Docket ID number USCIS–2005–0036;

(2) *Email.* Submit comments to *USCISFRComment@uscis.dhs.gov;*

(3) *Mail.* Submit written comments to DHS, USCIS, Office of Policy and Strategy, Chief, Regulatory Coordination Division, 20 Massachusetts Avenue NW., Washington, DC 20529–2140.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Acting Chief, 20 Massachusetts Avenue NW., Washington, DC 20529–2140, telephone number 202–272–8377 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS Web site at *http://www.uscis.gov,* or call the USCIS National Customer Service Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Comments:

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2005–0036 in the search box. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Request for Verification of Naturalization.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* N–25; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* State, local or Tribal Government. This form will allow U.S. Citizenship and Immigration Services (USCIS) to obtain verification from the courts that a person claiming to be a naturalized citizen has, in fact, been naturalized.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection N–25 is 1,000 and the estimated hour burden per response is .25 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 250 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $500.00.

Dated: April 21, 2016.

Samantha Deshommes,

Acting Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

BILLING CODE 9111–97–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5913–N–09]

60-Day Notice of Proposed Information Collection: Applications for Housing Assistance Payments; Special Claims Processing

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested

parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: Comments Due Date: June 27, 2016.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW., Room 4176, Washington, DC 20410–5000; telephone 202–402–3400 (this is not a toll-free number) or email at *Colette.Pollard@hud.gov* for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION CONTACT: Lanier M. Hylton, Housing Program Manager, Office of Program Systems Management, Office of Multifamily Housing Programs, Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410, telephone (202) 402–2510 (this is not a toll free number) for copies of the proposed forms and other available information. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Applications for Housing Assistance Payments; Special Claims Processing.

OMB Approval Number: 2502–0182.

Type of Request: Revision or extension of currently approved collection.

Form Number(s): HUD 52670–A part 5, HUD–52671–C, HUD 52671–A, HUD–52671–D, 52670–A–PART–1, HUD 52671–B, HUD–52670, HUD 52670–A part 3, HUD–52670–A part 4, HUD 52670–A Part 2

Description of the need for the information and proposed use: HUD's Office of Multifamily Housing Programs needs to collect this information in order to establish an applicant's eligibility for admittance to subsidized housing, specify which eligible applicants may be given priority over others, and prohibit racial discrimination in conjunction with selection of tenants and unit assignments.

HUD must specify tenant eligibility requirements as well as how tenants' incomes, rents and assistance must be verified and computed so as to prevent HUD from making improper payments to owners on behalf of assisted tenants. These information collections are essential to ensure the reduction of improper payments standard in providing $9.5 billion in rental assistance to low-income families in HUD Multifamily properties.

a. These collections are authorized by the following statutes:

- Section 8 (42 U.S.C. 1437 *et seq.*).
- Rent Supplement (12 U.S.C. 1701s).
- Rental Assistance Payments (12 U.S.C. 1715z–1).
- Section 236 (12 U.S.C. 1172z–1).
- Section 221(d) (3) Below Market Interest Rate (12 U.S.C. 1715l).
- Title VI of the Civil Rights Act of 1964.
- Title VIII of the Civil Rights Act of 1968, as amended (Section 808).
- Executive Order 11063, Equal Opportunity in Housing.
- Social Security Numbers (42 U.S.C. 3543).
- Section 562 of the Housing and Community Development Act of 1987.
- Section 202 of the Housing Act of 1959, as amended.
- Section 811 of the National Affordable Housing Act of 1980.
- Computer Matching and Privacy Protection Act of 1988 (102 Statute 2507).
- Privacy Act of 1974 (5 U.S.C. 552a), Records Maintained on Individuals.
- Quality Housing and Work Responsibility Act of 1998 (QHWRA).
- Section 658 of Title VI of Subtitle D of the Housing and Community Development Act of 1992.
- Executive Order 13520 of November 20, 2009, The Improper Payments Elimination and Recovery Act (IPERA).
- Executive Order 13515 of October 14, 2009, Increasing Participation of Asian Americans and Pacific Islanders in Federal Programs.

b. These collections are covered by the following regulations:

- Section 8: 24 CFR part 5, 24 CFR 880, 24 CFR 884, 24 CFR 886, 24 CFR 891 Subpart E.
- Section 236 and Rental Assistance Payments: 24 CFR 236.
- Section 221(d) (3): 24 CFR 221.
- Racial, Sex, Ethnic Data: 24 CFR 121.
- Nondiscrimination and Equal Opportunity in Housing: 24 CFR 107.
- Nondiscrimination in Federal Programs: 24 CFR 1.
- Social Security Numbers: 24 CFR part 5.
- Procedures for Obtaining Wage and Claim Information Agencies: 24 CFR part 760.
- Implementation of the Privacy Act of 1974: 24 CFR part 16.
- Mandated use of HUD's Enterprise Income Verification (EIV) System: 24 CFR 5.233.

Respondents (*i.e.* affected public):

- Performance Based Contract Administrators
- Contract Administrators
- Owners and Property Management Agents
- State Housing Finance Agencies
- Public Housing Authorities (PHA)
- The Government Accountability Office
- U. S. Census Bureau
- Office of Management and Budget (OMB)
- Congress/Public Requests (Under FOIA)

Estimated Number of Respondents: 25,843.

Estimated Number of Responses: 322,116.

Frequency of Response: 12 per annum.

Average Hours per Response: 1.33.

Total Estimated Burden: 372,497.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: April 21, 2016.

Janet M. Golrick,

Associate General Deputy Assistant Secretary for Housing—Associate Deputy Federal Housing Commissioner.

Bureau of Land Management

[LLNV912000 L13400000.PQ0000 LXSS0006F0000; 12–08807; MO# 4500092196; TAS: 14X1109]

Notice of Public Meetings: Mojave-Southern Great Basin Resource Advisory Council, Nevada

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of public meetings.

SUMMARY: In accordance with the Federal Land Policy and Management Act (FLPMA) and the Federal Advisory Committee Act of 1972 (FACA), the U.S. Department of the Interior, Bureau of Land Management (BLM) Mojave-Southern Great Basin Resource Advisory Council (RAC), will hold three meetings in Nevada in fiscal year 2016. The meetings are open to the public.

DATES: May 19, and Sept. 22, 2016. Meeting times will be published in local and regional media sources at least 14 days before each meeting. All meetings will include a public comment period.

ADDRESSES: The May 19 meeting will be held at the Toll Brothers Clubhouse, 3190 Mantua Village, Henderson, Nevada; Aug. 9–10, Caliente Railroad Depot, 100 Depot Ave., Caliente, Nevada. The Sept. 22 meeting will be held at the Nye County Commission Chambers, 2100 E. Walt Williams Dr., Pahrump, Nevada.

FOR FURTHER INFORMATION CONTACT: Chris Hanefeld, Public Affairs Specialist, Ely District Office, 702 N. Industrial Way, Ely, NV 89301, telephone: (775) 289–1842, email: *chanefel@blm.gov.* Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The 15-member Council advises the Secretary of the Interior, through the BLM, on a variety of planning and management issues associated with public land management in Nevada. Topics for discussion at each meeting will include, but are not limited to:

- May 19 (Henderson)—Sloan Canyon National Conservation Area, and Southern Nevada Public Land Management Act.
- Aug. 9–10 (Caliente)—Ash Springs Recreation Site, Basin and Range National Monument, and Greater Sage-Grouse.
- September 22 (Pahrump)—Target Shooting on Public Lands, and Wild Horses.

Managers' reports of district office activities will be given at each meeting. The Council may raise other topics at the meetings.

Final agendas will be posted on-line at the BLM Mojave-Southern Great Basin RAC Web site at *http://www.blm.gov/nv/st/en/res/resource_advisory.html* and will be published in local and regional media sources at least 14 days before each meeting. Individuals who need special assistance such as sign language interpretation or other reasonable accommodations, or who wish to receive a copy of each agenda, may contact Chris Hanefeld no later than 10 days prior to each meeting.

Rudy Evenson,

Deputy Chief, Office of Communications.

Notice of Filing of Plats of Survey; Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of filing of plats of survey.

SUMMARY: The Bureau of Land Management (BLM) will file the plat of survey of the lands described below in the BLM Montana State Office, Billings, Montana, on May 27, 2016.

DATES: A notice of protest of the survey must be filed before May 27, 2016 to be considered. A statement of reasons for a protest may be filed with the notice of protest and must be filed within 30 days after the notice of protest is filed.

ADDRESSES: Protests of the survey should be sent to the Branch of Cadastral Survey, Bureau of Land Management, 5001 Southgate Drive, Billings, Montana 59101–4669.

FOR FURTHER INFORMATION CONTACT: Thomas Trzinski, Cadastral Surveyor, Branch of Cadastral Survey, Bureau of Land Management, 5001 Southgate Drive, Billings, Montana 59101–4669, telephone (406) 896–5364 or (406) 896–5003, *ttrzinsk@blm.gov.* Persons who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: This survey was executed at the request of the Bureau of Indian Affairs, Rocky Mountain Region, Billings, Montana, and was necessary to determine individual and tribal trust lands.

The lands we surveyed are:

Principal Meridian, Montana

T. 33 N., Rs. 55 and 56 E.

The plat, in two sheets, representing the dependent resurvey of a portion of the north boundary of the Fort Peck Indian Reservation, a portion of the west boundary (R.56E), a portion of the subdivisional lines, and the adjusted original meanders of the former left and right banks of Big Muddy Creek, (identical with the meanders of the present left and right banks of Big Muddy Creek), through section 7 and the survey of the medial line of Big Muddy Creek, and certain partition lines, Township 33 North, Ranges 55 and 56 East, Principal Meridian, Montana, was accepted March 24, 2016. We will place a copy of the plat, in two sheets, and related field notes we described in the open files. They will be available to the public as a matter of information. If the BLM receives a protest against this survey, as shown on this plat, in two sheets, prior to the date of the official filing, we will stay the filing pending our consideration of the protest. We will not officially file this plat, in two sheets, until the day after we have accepted or dismissed all protests and they have become final, including decisions or appeals. Before including your address, phone number, email address, or other personally identifying information in your comment, you should be aware that your entire comment—including your personally identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personally identifying information from public

review, we cannot guarantee that we will be able to do so.

Authority: 43 U.S.C. Chap. 3.

Joshua F. Alexander,

Acting Chief, Branch of Cadastral Survey, Division of Energy, Minerals and Realty.

Notice of Proposed Audit Delegation Renewal for the States of Alaska, California, Colorado, North Dakota, Texas, Utah, and Wyoming

AGENCY: Office of the Secretary, Office of Natural Resources Revenue (ONRR), Interior.

ACTION: Notice.

SUMMARY: The States of Alaska, California, Colorado, North Dakota, Texas, Utah, and Wyoming are requesting that ONRR renew current delegations of audit and investigation authority. This notice gives members of the public an opportunity to review and comment on the States' proposals.

DATES: Submit written comments on or before May 27, 2016.

ADDRESSES: You may submit comments on this notice by any of the following methods:

- Electronically go to *http://www.regulations.gov.* In the entry titled ''Enter Keyword or ID,'' enter ONRR–2011–0018, and then click search. Follow the instructions to submit public comments. ONRR will post all comments.
- Email comments to Luis Aguilar, Regulatory Specialist, at *Luis.Aguilar@onrr.gov.* Please reference the Docket No. ONRR–2011–0018 in your comments.
- Hand-carry comments or use an overnight courier service. Our courier address is Building 85, Room A–614, Denver Federal Center, West 6th Ave. and Kipling St., Denver, Colorado 80225. Please reference the Docket No. ONRR–2011–0018 in your comments.

FOR FURTHER INFORMATION CONTACT: Ms. Heidi Badaracco, State and Tribal Support, State and Indian Coordination, ONRR; telephone (303) 231–3434; or by email at *Heidi.Badaracco@onrr.gov*.

SUPPLEMENTARY INFORMATION: The following officials are the State contacts for their respective proposals:

State	Department	Contact information
Alaska	Division of Oil and Gas	Monica French, 550 West 7th Avenue, Suite 800, Anchorage, AK 99501–5313.
California	State Controller's Office	Elizabeth Gonzalez, 300 Capitol Mall, Suite 518, Sacramento, CA 94250–5874.
Colorado	Colorado Department of Revenue, Mineral Audit Section.	Brenda Petersen, 720 S. Colorado Blvd., Suite 400N, Denver, CO 80246–1968.
North Dakota	State Auditor's Office, Royalty Audit Section	Dennis Roller, 425 North 5th Street—3rd Floor, Bismarck, ND 58501–4033.
Texas	Texas General Land Office	Luke Decker, 1700 N. Congress Ave., Suite 640, Austin, TX 78701–1436.
Utah	Utah State Tax Commission	Jennifer Casady, 210 North 1950 West, Salt Lake City, Utah 64134–9000.
Wyoming	WY Dept. of Audit, Mineral Audit Division	Steve Dilsaver, 122 West 25th Street, Cheyenne, WY 82001–3004.

The States' new agreement application, including proposed budget and work plan, are due April 1, 2016. In accordance with 30 CFR 1227.101(b)(1), the States request that ONRR delegate the royalty management functions of conducting audits and investigations. The States request delegation of these functions for producing Federal oil and gas leases within the State boundaries, as applicable. This is for producing Federal oil and gas leases in the Outer Continental Shelf, subject to revenue sharing under 8(g) of the Outer Continental Shelf Lands Act, 43 U.S.C. 1337(g); and for other producing solid mineral or geothermal Federal leases within the State. The States do not request delegation of royalty and production reporting functions. In addition to audit and investigation authority, the State of Wyoming also requests to renew its authority under 30 CFR 1227.101(b)(2) to issue Orders to Pay, Orders to Perform, and tolling agreements as a result of an audit or compliance review; it also requests to renew its subpoena authority under the Royalty Simplification and Fairness Act related to oil and gas revenues owed to the United States and shared with the State, which are attributable to leased Federal onshore property within the State.

The States have asked ONRR to renew the delegations within the time required by 30 CFR 1227.110(b). The States of Alaska, California, and Utah request 100-percent funding of the delegated functions for a 3-year period beginning July 1, 2016, with the opportunity to extend for an additional 3-year period. The States of Colorado, North Dakota, Texas, and Wyoming request 100-

percent funding of the delegated functions for a 3-year period beginning October 1, 2016, with the opportunity to extend for an additional 3-year period. The States have a current audit delegation agreement with ONRR, as shown in the table below:

State	Agreement No.	Term
Alaska	D12AC70003	7/01/2010–6/30/2013 7/01/2013–6/30/2016.
California	D12AC70004	7/01/2010–6/30/2013 7/01/2013–6/30/2016.
Colorado	D12AC70005	10/01/2010–9/30/2013 10/01/2013–9/30/2016.
North Dakota	D12AC70007	10/01/2010–9/30/2013 10/01/2013–9/30/2016.
Texas	D12AC70009	10/01/2010–9/30/2013 10/01/2013–9/30/2016.
Utah	D12AC70010	7/01/2010–6/30/2013 7/01/2013–6/30/2016.
Wyoming	D12AC70012	10/01/2010–9/30/2013 10/01/2013–9/30/2016.

Therefore, ONRR has determined that we will not hold a formal hearing for comments under 30 CFR 1227.105.

Dated: April 22, 2016.

Gregory J. Gould,

Director, Office of Natural Resources Revenue.

BILLING CODE 4335–30–P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[OMB Control Number 1010–0176; MMAA104000]

Information Collection: Renewable Energy and Alternate Uses of Existing Facilities on the Outer Continental Shelf; Submitted for OMB Review; Comment Request

ACTION: 30-Day notice.

SUMMARY: To comply with the Paperwork Reduction Act of 1995 (PRA), the Bureau of Ocean Energy Management (BOEM) is notifying the public that we have submitted an information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval. This ICR concerns the paperwork requirements in the regulations under ''Renewable Energy and Alternate Uses of Existing Facilities on the Outer Continental Shelf.'' This notice provides the public a second opportunity to comment on the paperwork burden of this collection.

DATES: Submit written comments by May 27, 2016.

ADDRESSES: Submit comments on this ICR to the Desk Officer for the Department of the Interior at OMB–OIRA at (202) 395–5806 (fax) or *OIRA_submission@omb.eop.gov.* Please provide a copy of your comments to BOEM at OPRA Mail Stop: VA–DIR, 45600 Woodland Road, Sterling, VA 20166. Please reference ICR 1010–0176 in your comment and include your name and return address.

FOR FURTHER INFORMATION CONTACT: Office of Policy, Regulations, and Analysis at or (202) 208–6352. You may review the ICR online at *http://www.reginfo.gov.* Follow the instructions to review Department of the Interior collections under review by OMB.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 1010–0176.

Title: 30 CFR 585, Renewable Energy and Alternate Uses of Existing Facilities on the Outer Continental Shelf.

Forms: BOEM–0002, BOEM–0003, BOEM–0004, BOEM–0005, BOEM–0006.

Abstract: The Outer Continental Shelf (OCS) Lands Act, as amended (43 U.S.C. 1331 *et seq.* and 43 U.S.C. 1801 *et seq.*), authorizes the Secretary of the Interior to issue leases, easements, or rights-of-way on the OCS for activities that produce or support production, transportation, or transmission of energy from sources other than oil and gas (renewable energy). Specifically, subsection 8(p) of the OCS Lands Act, as amended (43 U.S.C. 1337(p)), directs the Secretary of the Interior to issue any necessary regulations to carry out the OCS renewable energy program. The Secretary delegated this authority to BOEM. BOEM has issued regulations for OCS renewable energy activities at 30 CFR part 585; this notice concerns the reporting and recordkeeping elements required by these regulations.

Respondents operate commercial and noncommercial technology projects that include installation, construction, operation and maintenance, and decommissioning of offshore facilities, as well as possible onshore support facilities. BOEM must ensure that these activities and operations on the OCS are performed in a safe manner which do not cause damage to the environment or endanger life or health, do not interfere with the rights of other users on the OCS, and balance the protection and development of OCS resources. Therefore, BOEM needs information concerning the proposed activities, facilities, safety equipment, inspections and tests, and natural and manmade hazards near the site, as well as assurance of fiscal responsibility.

BOEM uses forms to collect some information to ensure proper and efficient administration of OCS renewable energy leases and grants and to document the financial responsibility of lessees and grantees. Forms BOEM–0002, BOEM–0003, BOEM–0004, and BOEM–0006 are used by renewable energy entities on the OCS to assign a lease interest, designate an operator, and to assign or relinquish a lease or grant. Form BOEM–0005 was designed to guarantee the performance of sureties with respect to bonds issued on behalf of OCS renewable energy lessees, grantees, and operators. BOEM maintains the submitted forms as official lease and grant records pertaining to operating responsibilities, ownership, and financial responsibility.

We will protect information considered proprietary under the Freedom of Information Act (5 U.S.C. 552) and its implementing regulations (43 CFR part 2) and under regulations at 30 CFR 585.113, addressing disclosure

of data and information to be made available to the public and others. No items of a sensitive nature are collected. Responses are mandatory or required to obtain a benefit.

Frequency: On occasion or annually.

Description of Respondents: Companies interested in renewable energy-related uses on the OCS and holders of leases and grants under 30 CFR part 585.

Estimated Reporting and Recordkeeping Hour Burden: The estimated annual hour burden for this collection is 25,688 hours. The following table details the individual components and estimated hour burdens. In calculating the burdens, we assumed that respondents perform certain requirements in the normal course of their activities. We consider these to be usual and customary and took that into account in estimating the burden.

BURDEN TABLE

Section(s) in 30 CFR 585	Reporting and recordkeeping requirement [1]	Hour burden	Non-hour cost burdens	
			Average number of annual responses	Annual burden hours
Subpart A—General Provisions				
102; 105; 110	These sections contain general references to responsibilities, submitting comments, requests, applications, plans, notices, reports, and/or supplemental information for BOEM approval—burdens covered under specific requirements.			0
102(e)	State and local governments enter into task force or joint planning or coordination agreement with BOEM.	1	2 agreements	2
103; 904	Request general departures not specifically covered elsewhere in part 585..	2	6 requests	12
105(c)	Make oral requests or notifications and submit written follow up within 3 business days not specifically covered elsewhere in part 585.	1	5 requests	5
106; 107; 213(e); 230(f); 302(a); 408(b)(7); 409(c); 1005(d); 1007(c); 1013(b)(7).	Submit evidence of qualifications to hold a lease or grant; submit required supporting information (electronically if required).	2	20 submissions	40
106(b)(1)	Request exception from exclusion or disqualification from participating in transactions covered by Federal non-procurement debarment and suspension system.	1	1 exception	1
106(b)(2); 118(c); 225(b); 436; 437; 527(c); 705(c)(2); 1016.	Request reconsideration and/or hearing	Requirement not considered IC under 5 CFR 1320.3(h)(9).		0
108; 530(b)	Notify BOEM within 3 business days after learning of any action filed alleging respondent is insolvent or bankrupt.	1	1 notice	1
109	Notify BOEM in writing of merger, name change, or change of business form no later than 120 days after earliest of either the effective date or filing date.	Requirement not considered IC under 5 CFR 1320.3(h)(1).		0
111	Within 30 days of receiving bill, submit processing fee payments for BOEM document or study preparation to process applications and other requests.	.5	4 submissions	2
		4 payments × $4,000 = $16,000		
111(b)(2), (3)	Submit comments on proposed processing fee or request approval to perform or directly pay contractor for all or part of any document, study, or other activity, to reduce BOEM processing costs.	2	4 requests	8
111(b)(3)	Perform, conduct, develop, etc., all or part of any document, study, or other activity; and provide results to BOEM to reduce BOEM processing fee.	19,000	1 submission	19,000
111(b)(3)	Pay contractor for all or part of any document, study, or other activity, and provide results to BOEM to reduce BOEM processing costs.	3 contractor payments × $950,000 = $2,850,000		

BURDEN TABLE—Continued

Section(s) in 30 CFR 585	Reporting and recordkeeping requirement [1]	Hour burden	Non-hour cost burdens	
			Average number of annual responses	Annual burden hours
111(b)(7); 118(a); 436(c)	Appeal BOEM estimated processing costs, decisions, or orders pursuant to 30 CFR 590.	Exempt under 5 CFR 1320.4(a)(2), (c).		0
113(b)	Respond to the Freedom of Information Act release schedule.	4	1 agreement	4
115(c)	Request approval to use later edition of a document incorporated by reference or alternative compliance.	1	1 request	1
116	The Director may occasionally request information to administer and carry out the offshore renewable energy program via **Federal Register** Notices.	4	25 submissions	100
118(c); 225(b)	Within 15 days of bid rejection, request reconsideration of bid decision or rejection.	Requirement not considered IC under 5 CFR 1320.3(h)(9).		0
Subtotal			71 responses	19,176
			$2,866,000 non-hour costs	
Subpart B—Issuance of OCS Renewable Energy Leases				
200; 224; 231; 235; 236; 238.	These sections contain references to information submissions, approvals, requests, applications, plans, payments, etc., the burdens for which are covered elsewhere in part 585.			0
210; 211(a–c); 212 thru 216.	Submit nominations and general comments in response to **Federal Register** notices on Request for Interest in OCS Leasing, Call for Information and Nominations (Call), Area Identification, and Notices of Sale. Includes industry, State & local governments.	Not considered IC as defined in 5 CFR 1320.3(h)(4).		0
210; 211(a–c); 212 thru 216.	Submit comments and required information in response to **Federal Register** notices on Request for Interest in OCS Leasing, Call for Information and Nominations (Call), Area Identification, and Notices of Sale. Includes industry, State & local governments.	4	30 comments	120
211(d); 216; 220 thru 223; 231(c)(2).	Submit bid, payments, and required information in response to **Federal Register** Final Sale Notice.	5	12 bids	60
224	Within 10 business days, execute 3 copies of lease form and return to BOEM with required payments, including evidence that agent is authorized to act for bidder; if applicable, submit information to support delay in execution—competitive leases.	1	2 lease executions	2
230; 231(a)	Submit unsolicited request and acquisition fee for a commercial or limited lease.	5	2 requests	10
231(b)	Submit comments in response to **Federal Register** notice re interest of unsolicited request for a lease.	4	4 comments	16
231(g)	Within 10 business days of receiving lease documents, execute lease; file financial assurance and supporting documentation—noncompetitive leases.	2	2 leases	4
231(g)	Within 45 days of receiving lease copies, submit rent and rent information.	Burdens covered by information collections approved for ONRR 30 CFR Chapter XII.		0
235(b); 236(b)	Request additional time to extend preliminary or site assessment term of commercial or limited lease, including revised schedule for SAP, COP, or GAP submission.	1	3 requests	3
237(b)	Request lease be dated and effective 1st day of month in which signed.	1	1 request	1

BURDEN TABLE—Continued

Section(s) in 30 CFR 585	Reporting and recordkeeping requirement [1]	Hour burden	Non-hour cost burdens	
			Average number of annual responses	Annual burden hours
238	Submit other renewable energy research activities	Burden covered under SAPs & GAPs § 585.600(a), (c).		0
Subtotal			56 responses	216
Subpart C—ROW Grants and RUE Grants for Renewable Energy Activities				
306; 309; 315; 316	These sections contain references to information submissions, approvals, requests, applications, plans, payments, etc., the burdens for which are covered elsewhere in part 585.			0
302(a); 305; 306	Submit copies of a request for a new or modified ROW or RUE and required information, including qualifications to hold a grant, in format specified.	5	1 request	5
307; 308(a)(1)	Submit information in response to **Federal Register** notice of proposed ROW or RUE grant area or comments on notice of grant auction.	4	2 comments	8
308(a)(2), (b); 315; 316	Submit bid and payments in response to **Federal Register** notice of auction for a ROW or RUE grant.	5	1 bid	5
309	Submit decision to accept or reject terms and conditions of noncompetitive ROW or RUE grant.	2	1 submission	2
Subtotal			5 responses	20
Subpart D—Lease and Grant Administration				
400; 401; 402; 405; 409; 416, 433.	These sections contain references to information submissions, approvals, requests, applications, plans, payments, etc., the burdens for which are covered elsewhere in part 585.			0
401(b)	Take measures directed by BOEM in cessation order and submit reports in order to resume activities.	100	1 report	100
405(d)	Submit written notice of change of address	Requirement not considered IC under 5 CFR 1320.3(h)(1).		0
405(e); Form BOEM–0006.	If designated operator (DO) changes, notify BOEM and identify new DO for BOEM approval.	1	1 notice	1
408 thru 411; Forms BOEM–0002 and BOEM–0003.	Within 90 days after last party executes a transfer agreement, submit copies of a lease or grant assignment application, including originals of each instrument creating or transferring ownership of record title, eligibility and other qualifications; and evidence that agent is authorized to execute assignment, in format specified.	1 (30 minutes per form × 2 forms = 1 hour).	2 requests/submissions.	2
415(a)(1); 416; 420(a), (b); 428(b).	Submit request for suspension and required information/payment no later than 90 days prior to lease or grant expiration.	10	1 request	10
417(b)	Conduct, and if required pay for, site-specific study to evaluate cause of harm or damage; and submit copies of study and results, in format specified.	100	1 study/submission	100
		1 study × $950,000 = $950,000		
425 thru 428; 652(a); 235(a), (b).	Request lease or grant renewal no later than 180 days before termination date of your limited lease or grant, or no later than 2 years before termination date of operations term of commercial lease. Submit required information.	6	1 requests	6
435; 658(c)(2); Form BOEM–0004.	Submit copies of application to relinquish lease or grant, in format specified.	1	1 submission	1

BURDEN TABLE—Continued

Section(s) in 30 CFR 585	Reporting and recordkeeping requirement [1]	Hour burden	Non-hour cost burdens	
			Average number of annual responses	Annual burden hours
436; 437	Provide information for reconsideration of BOEM decision to contract or cancel lease or grant area.	Requirement not considered IC under 5 CFR 1320.3(h)(9).		0
Subtotal			8 responses	220
			$950,000 non-hour costs	
Subpart E—Payments and Financial Assurance Requirements				
An * indicates the primary cites for providing bonds or other financial assurance, and the burdens include any previous or subsequent references throughout part 585 to furnish, replace, or provide additional bonds, securities, or financial assurance (including riders, cancellations, replacements). This subpart contains references to other information submissions, approvals, requests, applications, plans, etc., the burdens for which are covered elsewhere in part 585. In the future BOEM may require electronic filings of certain submissions.				0
500 thru 509; 1011	Submit payor information, payments and payment information, and maintain auditable records according to ONRR regulations or guidance.	Burdens covered by information collections approved for ONRR 30 CFR Chapter XII.		0
506(c)(4)	Submit documentation of the gross annual generation of electricity produced by the generating facility on the lease—use same form as authorized by the EIA.	Burden covered under DOE/EIA OMB Control Number 1905–0129.		0
510; 506(c)(3)	Submit application and required information for waiver or reduction of rental or other payment.	1	1 submission	1
*515; 516; 525(a) thru (f).	Execute and provide $100,000 minimum lease-specific bond or other approved security; or increase bond level if required.	1	2 bonds	2
*516(a)(2), (3), (b), (c); 517; 525(a) thru (f).	Execute and provide commercial lease supplemental bonds in amounts determined by BOEM.	1	2 bonds	2
516(a)(4); 521(c)	Execute and provide decommissioning bond or other financial assurance; schedule for providing the appropriate amount.	1	1 bond	1
517(c)(1)	Submit comments on proposed adjustment to bond amounts.	1	1 submission	1
517(c)(2)	Request bond reduction and submit evidence to justify.	5	1 request	5
*520; 521; 525(a) thru (f); Form BOEM–0005.	Execute and provide $300,000 minimum limited lease or grant-specific bond or increase financial assurance and required information.	1	1 bond	1
525(g)	Surety notice to lessee or ROW/RUE grant holder and BOEM within 5 business days after initiating surety insolvency or bankruptcy proceeding, or Treasury decertifies surety.	1	1 surety notice	1
*526 Form BOEM–0005	In lieu of surety bond, pledge other types of securities, including authority for BOEM to sell and use proceeds and submit required information (1 hour for form).	2	1 pledge	2
526(c)	Provide annual certified statements describing the nature and market value, including brokerage firm statements/reports.	1	1 statement	1
*527; 531	Demonstrate financial worth/ability to carry out present and future financial obligations, annual updates, and related or subsequent actions/records/reports, etc.	10	1 demonstration	10

BURDEN TABLE—Continued

Section(s) in 30 CFR 585	Reporting and recordkeeping requirement [1]	Hour burden	Non-hour cost burdens	
			Average number of annual responses	Annual burden hours
528	Provide third-party indemnity; financial information/statements; additional bond info; executed guarantor agreement and supporting information/documentation/agreements.	10	1 submission	10
528(c)(6); 532(b)	Guarantor/Surety requests BOEM terminate period of liability and notifies lessee or ROW/RUE grant holder, etc.	1	1 request	1
* 529	In lieu of surety bond, request authorization to establish decommissioning account, including written authorizations and approvals associated with account.	2	1 request	2
530	Notify BOEM promptly of lapse in bond or other security/action filed alleging lessee, surety or guarantor et al is insolvent or bankrupt.	1	1 notice	1
533(a)(2)(ii), (iii)	Provide agreement from surety issuing new bond to assume all or portion of outstanding liabilities.	3	1 submission	3
536(b)	Within 10 business days following BOEM notice, lessee, grant holder, or surety agrees to and demonstrates to BOEM that lease will be brought into compliance.	16	1 demonstration every 2 years.	8
Subtotal			21 responses	52
Subpart F—Plans and Information Requirements				
Two ** indicate the primary cites for Site Assessment Plans (SAPs), Construction and Operations Plans (COPs), and General Activities Plans (GAPs); and the burdens include any previous or subsequent references throughout part 585 to submission and approval. This subpart contains references to other information submissions, approvals, requests, applications, plans, etc., the burdens for which are covered elsewhere in part 585.				0
** 600(a); 601(a), (b); 605 thru 614; 238; 810.	Within time specified after issuance of a competitive lease or grant, or within time specified after determination of no competitive interest, submit copies of SAP, including required information to assist BOEM to comply with NEPA/CZMA such as hazard info, air quality, SEMS, and all required information, certifications, requests, etc., in format specified.	240	2 SAPs	480
** 600(b); 601(c), (d)(1); 606(b); 618; 620 thru 629; 632; 633; 810.	If requesting an operations term for commercial lease, within time specified before the end of site assessment term, submit copies of COP, or FERC license application, including required information to assist BOEM to comply with NEPA/CZMA such as hazard info, air quality, SEMS, and all required information, surveys and/or their results, reports, certifications, project easements, supporting data and information, requests, etc., in format specified.	1,000	2 COPs	2,000
** 600(c); 601(a), (b); 640 thru 648; 651; 238; 810.	Within time specified after issuance of a competitive lease or grant, or within time specified after determination of no competitive interest, submit copies of GAP, including required information to assist BOEM to comply with NEPA/CZMA such as hazard info, air quality, SEMS, and all required information, surveys and reports, certifications, project easements, requests, etc., in format specified.	240	2 GAP	480
** 601(d)(2); 622; 628(f); 632; 634; 658(c)(3); 907.	Submit revised or modified COPs, including project easements, and all required additional information.	50	1 revised or modified COP.	50

BURDEN TABLE—Continued

Section(s) in 30 CFR 585	Reporting and recordkeeping requirement [1]	Hour burden	Non-hour cost burdens	
			Average number of annual responses	Annual burden hours
602 [2]	Until BOEM releases financial assurance, respondents must maintain, and provide to BOEM if requested, all data and information related to compliance with required terms and conditions of SAP, COP, or GAP.	2	9 records/submissions	18
** 613(a), (d), (e); 617	Submit revised or modified SAPs and required additional information.	50	1 revised or modified SAP.	50
612; 647	Submit copy of SAP or GAP consistency certification and supporting documentation, including non-competitive leases.	1	2 leases	2
615(a)	Notify BOEM in writing within 30 days of completion of construction and installation activities under SAP.	1	2 notices	2
615(b)	Submit annual report summarizing findings from site assessment activities.	30	4 reports	120
615(c)	Submit annual, or at other time periods as BOEM determines, SAP compliance certification, effectiveness statement, recommendations, reports, supporting documentation, etc.	40	4 certifications	160
617(a)	Notify BOEM in writing before conducting any activities not approved, or provided for, in SAP; provide additional information if requested.	10	1 notice	10
627(c)	Submit oil spill response plan as required by BSEE 30 CFR part 254.	Burden covered under BSEE 1014–0007.		0
631	Request deviation from approved COP schedule	2	1 request	2
633(b)	Submit annual, or at other time periods as BOEM determines, COP compliance certification, effectiveness statement, recommendations, reports, supporting documentation, etc.	50	9 certifications	450
634(a)	Notify BOEM in writing before conducting any activities not approved or provided for in COP, and provide additional information if requested.	10	1 notice	10
635	Notify BOEM any time commercial operations cease without an approved suspension.	1	1 notice	1
636(a)	Notify BOEM in writing no later than 30 days after commencing activities associated with placement of facilities on lease area.	1	2 notices	2
636(b)	Notify BOEM in writing no later than 30 days after completion of construction and installation activities.	1	2 notices	2
636(c)	Notify BOEM in writing at least 7 days before commencing commercial operations.	1	1 notices	1
** 642(b); 648; 655; 658(c)(3).	Submit revised or modified GAPs and required additional information.	50	1 revised or modified GAP.	50
651	Before beginning construction of OCS facility described in GAP, complete survey activities identified in GAP and submit initial findings. [This only includes the time involved in submitting the findings; it does not include the survey time as these surveys would be conducted as good business practice.].	30	2 surveys/reports	60

BURDEN TABLE—Continued

Section(s) in 30 CFR 585	Reporting and recordkeeping requirement [1]	Hour burden	Non-hour cost burdens	
			Average number of annual responses	Annual burden hours
653(a)	Notify BOEM in writing within 30 days of completing installation activities under the GAP.	1	2 notices	2
653(b)	Submit annual report summarizing findings from activities conducted under approved GAP.	30	4 reports	120
653(c)	Submit annual, or at other time periods as BOEM determines, GAP compliance certification, recommendations, reports, etc.	40	4 certifications	160
655(a)	Notify BOEM in writing before conducting any activities not approved or provided for in GAP, and provide additional information if requested.	10	1 notice	10
656	Notify BOEM any time approved GAP activities cease without an approved suspension.	1	1 notice	1
658(c)(1)	If after construction, cable or pipeline deviate from approved COP or GAP, notify affected lease operators and ROW/RUE grant holders of deviation and provide BOEM evidence of such notices.	3	1 notice/evidence	3
659	Determine appropriate air quality modeling protocol, conduct air quality modeling, and submit 3 copies of air quality modeling report and 3 sets of digital files as supporting information to plans.	70	5 reports/information	350
Subtotal			68 responses	4,596
Subpart G—Facility Design, Fabrication, and Installation				
Three *** indicate the primary cites for the reports discussed in this subpart, and the burdens include any previous or subsequent references throughout part 585 to submitting and obtaining approval. This subpart contains references to other information submissions, approvals, requests, applications, plans, etc., the burdens for which are covered elsewhere in part 585.				0
*** 700(a)(1), (b), (c); 701.	Submit Facility Design Report, including copies of the cover letter, certification statement, and all required information (1–3 paper or electronic copies as specified).	200	1 report	200
*** 700(a)(2), (b), (c); 702.	Submit copies of a Fabrication and Installation Report, certification statement and all required information, in format specified.	160	1 report	160
705(a)(3); 707; 712	Certified Verification Agent (CVA) conducts independent assessment of the facility design and submits copies of all reports/certifications to lessee or grant holder and BOEM—interim reports if required, in format specified.	100	1 interim report	100
		100	1 final report	100
705(a)(3); 708; 709; 710; 712.	CVA conducts independent assessments/inspections on the fabrication and installation activities, informs lessee or grant holder if procedures are changed or design specifications are modified; and submits copies of all reports/certifications to lessee or grant holder and BOEM—interim reports if required, in format specified.	100	1 interim report	100
		100	1 final report	100
*** 703; 705(a)(3); 712; 815.	CVA/project engineer monitors major project modifications and repairs and submits copies of all reports/certifications to lessee or grant holder and BOEM—interim reports if required, in format specified.	20	1 interim report	20
		15	1 final report	15

BURDEN TABLE—Continued

Section(s) in 30 CFR 585	Reporting and recordkeeping requirement [1]	Hour burden	Non-hour cost burdens	
			Average number of annual responses	Annual burden hours
705(c)	Request waiver of CVA requirement in writing; lessee must demonstrate standard design and best practices.	40	1 waiver	40
706	Submit for approval with SAP, COP, or GAP, initial nominations for a CVA or new replacement CVA nomination, and required information.	16	2 nominations	32
708(b)(2)	Lessee or grant holder notify BOEM if modifications identified by CVA/project engineer are accepted.	1	1 notice	1
709(a)(14); 710(a)(2), (e) [2].	Make fabrication quality control, installation towing, and other records available to CVA/project engineer for review (retention required by § 585.714).	1	3 records retention	3
713	Notify BOEM within 10 business days after commencing commercial operations.	1	1 notice	1
714 [2]	Until BOEM releases financial assurance, compile, retain, and make available to BOEM and/or CVA the as-built drawings, design assumptions/analyses, summary of fabrication and installation examination records, inspection results, and records of repairs not covered in inspection report. Record original and relevant material test results of all primary structural materials; retain records during all stages of construction.	100	1 lessee	100
Subtotal			17 responses	972
Subpart H—Environmental and Safety Management, Inspections, and Facility Assessments for Activities Conducted Under SAPs, COPs, and GAPs				
801(c), (d)	Notify BOEM if endangered or threatened species, or their designated critical habitat, may be in the vicinity of the lease or grant or may be affected by lease or grant activities.	1	2 notices	2
801(e), (f)	Submit information to ensure proposed activities will be conducted in compliance with the Endangered Species Act (ESA) and Marine Mammal Protection Act (MMPA); including agreements and mitigating measures designed to avoid or minimize adverse effects and incidental take of endangered species or critical habitat.	6	2 submissions	12
802; 902(e)	Notify BOEM of archaeological resource within 72 hours of discovery.	3	1 notice	3
802(b), (c)	If requested, conduct further archaeological investigations and submit report/information.	10	1 report	10
802(d)	If applicable, submit payment for BOEM costs in carrying out National Historic Preservation Act responsibilities.	.5	1 payment	1
803	If required, conduct additional surveys to define boundaries and avoidance distances and submit report.	15	2 survey/report	30
*** 810; 614; 627; 632(b); 651.	Submit safety management system description with the SAP, COP, or GAP.	35	2 submissions	70
813(b)(1)	Report within 24 hours when any required equipment taken out of service for more than 12 hours; provide written confirmation if reported orally.	.5	2 reports	1
		1	1 written confirmation	1

BURDEN TABLE—Continued

Section(s) in 30 CFR 585	Reporting and recordkeeping requirement [1]	Hour burden	Non-hour cost burdens	
			Average number of annual responses	Annual burden hours
813(b)(3)	Notify BOEM when equipment returned to service; provide written confirmation if reported orally.	.5	2 notices	1
815(c)	When required, analyze cable, P/L, or facility damage or failures to determine cause and as soon as available submit comprehensive written report.	1.5	1 report	2
816	Submit plan of corrective action report on observed detrimental effects on cable, P/L, or facility within 30 days of discovery; take remedial action and submit report of remedial action within 30 days after completion.	2	1 plan/report	2
822(a)(2)(iii), (b)	Maintain records of design, construction, operation, maintenance, repairs, and investigation on or related to lease or ROW/RUE area; make available to BOEM for inspection.	1	4 records retention	4
823	Request reimbursement within 90 days for food, quarters, and transportation provided to BOEM reps during inspection.	2	1 request	2
824(a) [2]	Develop annual self-inspection plan covering all facilities; retain with records, and make available to BOEM upon request.	24	2 plans	48
824(b)	Conduct annual self-inspection and submit report by November 1.	36	2 reports	72

1010(c)	Request renewal of Alternate Use RUE	6	1 request	6
1012; 1016(b)	Provide financial assurance as BOEM determines in approving RUE for an existing facility, including additional security if required.	1	1 submission	1
1013	Submit request for assignment of an alternative use RUE for an existing facility, including all required information.	1	1 request	1
1015	Request relinquishment of RUE for an existing facility.	1	1 request	1
Subtotal			8 responses	20
Total Burden			290 responses	25,688
			$3,816,000 Non-Hour Cost Burdens	

[1] In the future, BOEM may require electronic filing of certain submissions.
[2] Retention of these records is usual and customary business practice; the burden is primarily to make them available to BOEM and CVAs.

Estimated Reporting and Recordkeeping Non-Hour Cost Burden: The estimated non-hour cost burdens total $3,816,000. The non-hour cost burdens consist of service fees for BOEM document/study preparation, costs for paying a contractor instead of BOEM, and costs for a site-specific study and report to evaluate the cause of harm to natural resources.

Public Disclosure Statement: The PRA (44 U.S.C. 3501, *et seq.*) provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information, you are not obligated to respond.

Comments: Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3501, *et seq.,*) requires each agency ''. . . to provide notice . . . and otherwise consult with members of the public and affected agencies concerning each proposed collection of information . . .'' Agencies must specifically solicit comments to: (a) Evaluate whether the collection is necessary or useful; (b) evaluate the accuracy of the burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of technology.

To comply with the public consultation process, on December 17, 2015, BOEM published a **Federal Register** notice (80 FR 78756) announcing that we would submit this ICR to OMB for approval. This notice provided the required 60-day comment period. BOEM received no comments.

Public Availability of Comments: Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that

your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: March 7, 2016.

BILLING CODE 4310–MR–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–986]

Certain Diaper Disposal Systems and Components Thereof, Including Diaper Refill Cassettes; Notice of Commission Determination Not To Review an Initial Determination Granting Complainants' Motion To Amend the Complaint and the Notice of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (''ID'') (Order No. 7) issued by the presiding administrative law judge (''ALJ'') on April 8, 2016, granting the complainants' unopposed motion to amend the complaint and notice of investigation to add two respondents.

FOR FURTHER INFORMATION CONTACT: Robert Needham, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 708–5468. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone (202) 205–2000. General information concerning the Commission may also be obtained by accessing its Internet server (*http://www.usitc.gov*). The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on February 29, 2016, based on a complaint filed by Edgewell Personal Care Brands, LLC, of Chesterfield, Missouri, and International Refills Company, Ltd., of Christ Church, Barbados (collectively, ''Complainants''). 81 *FR* 10277–78. The complaint alleges violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 (''section 337''), in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain diaper disposal systems and components thereof, including diaper refill cassettes, by reason of infringement of certain claims of U.S. Patent Nos. 6,974,029 and 8,899,420. *Id.* at 10277. The Commission's notice of investigation named as respondents Munchkin, Inc., of Van Nuys, California; Munchkin Baby Canada Ltd., of Brampton, Canada; and Lianyungang Brilliant Daily Products Co. Ltd., of Lianyungang, China. *Id.* at 10278. The Office of Unfair Import Investigations is not participating in this investigation. *Id.*

On March 31, 2016, Complainants filed an unopposed motion to amend the complaint and the notice of investigation in order to add two respondents: Lianyungang Rainbow Daily Products Co., Ltd., of Lianyungang, China; and Munchkin Asia Limited, of Hong Kong, China. Complainants argue that they learned through discovery that these parties are involved in the manufacture and/or sale for importation of the accused products in this investigation.

On April 8, 2016, the ALJ issued the subject ID and granted Complainants' motion to amend the complaint and the notice of investigation. No petitions for review were filed.

The Commission has determined not to review the subject ID.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: April 22, 2016.

William R. Bishop,

Supervisory Hearings and Information Officer.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Antitrust Division

United States v. Len Blavatnik; Proposed Final Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. 16(b)–(h), that a proposed Final Judgment, Stipulation, and Competitive Impact Statement have been filed with the United States District Court for the District of Columbia in *United States of America* v. *Len Blavatnik,* Civil Action No. 1:15–cv–01631–RDM. On October 6, 2015, the United States filed a Complaint alleging that Len Blavatnik violated the premerger notification and waiting period requirements of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, 15 U.S.C. 18a, with respect to his acquisition of voting securities of TangoMe, Inc. The proposed Final Judgment, filed at the same time as the Complaint, requires Blavatnik to pay a civil penalty of $656,000.

Copies of the Complaint, proposed Final Judgment, and Competitive Impact Statement are available for inspection on the Antitrust Division's Web site at *http://www.justice.gov/atr* and at the Office of the Clerk of the United States District Court for the District of Columbia. Copies of these materials may be obtained from the Antitrust Division upon request and payment of the copying fee set by Department of Justice regulations.

Public comment is invited within 60 days of the date of this notice. Such comments, including the name of the submitter, and responses thereto, will be posted on the Antitrust Division's Web site, filed with the Court, and, under certain circumstances, published in the **Federal Register**. Comments should be directed to Daniel P. Ducore, Special Attorney, c/o Federal Trade Commission, 600 Pennsylvania Avenue NW., CC–8416, Washington, DC 20580 (telephone: 202–326–2526; email: *dducore@ftc.gov*).

Patricia A. Brink,

Director of Civil Enforcement.

IN THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

UNITED STATES OF AMERICA c/o Department of Justice, Washington, D.C. 20530, Plaintiff, v. LEN BLAVATNIK c/o Access Industries, 28 Kensington Church Street, 4th Floor, London, United Kingdom W8 4EP, Defendant.

CASE NO.: 1:15–cv–01631

JUDGE: Randolph D. Moss

FILED: 10/06/2015

COMPLAINT FOR CIVIL PENALTIES FOR FAILURE TO COMPLY WITH THE PREMERGER REPORTING AND WAITING REQUIREMENTS OF THE HART-SCOTT-RODINO ACT

The United States of America, Plaintiff, by its attorneys, acting under the direction of the Attorney General of the United States and at the request of the Federal Trade Commission, brings this civil antitrust action to obtain monetary relief in the form of civil penalties against Defendant Len Blavatnik (''Blavatnik''). Plaintiff alleges as follows:

NATURE OF THE ACTION

1. Blavatnik violated the notice and waiting period requirements of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, 15 U.S.C. 18a (''HSR Act'' or ''Act''), with respect to the acquisition of voting securities of TangoMe, Inc. (''TangoMe'') in August 2014.

JURISDICTION AND VENUE

2. This Court has jurisdiction over the subject matter of this action pursuant to Section 7A(g) of the Clayton Act, 15 U.S.C. 18a(g), and pursuant to 28 U.S.C. 1331, 1337(a), 1345, and 1355 and over the Defendant by virtue of Defendant's consent, in the Stipulation relating hereto, to the maintenance of this action and entry of the Final Judgment in this District.

3. Venue is properly based in this District by virtue of Defendant's consent, in the Stipulation relating hereto, to the maintenance of this action and entry of the Final Judgment in this District.

THE DEFENDANT

4. Defendant Blavatnik is a natural person with his principal office and place of business care of Access Industries, 28 Kensington Church Street, 4th Floor, London, United Kingdom W8 4EP. Blavatnik is engaged in commerce, or in activities affecting commerce, within the meaning of Section 1 of the Clayton Act, 15 U.S.C. 12, and Section 7A(a)(1) of the Clayton Act, 15 U.S.C. 18a(a)(1). At all times relevant to this complaint, Blavatnik had sales or assets in excess of $151.7 million. Blavatnik is the ultimate parent entity of Access Industries (''Access'').

OTHER ENTITIES

5. TangoMe is a corporation organized under the laws of Delaware with its principal place of business at 475 Ellis Street, Mountain View, CA 94043. TangoMe is engaged in commerce, or in activities affecting commerce, within the meaning of Section 1 of the Clayton Act, 15 U.S.C. 12, and Section 7A(a)(1) of the Clayton Act, 15 U.S.C. 18a(a)(1). At all times relevant to this complaint, TangoMe had sales or assets in excess of $15.2 million.

6. LyondellBasell Industries N.V. (''LyondellBasell'') is a corporation organized under the laws of The Netherlands with its principal place of business at 1221 McKinney Street, Suite 700, Houston, TX 77010. LyondellBasell is engaged in commerce, or in activities affecting commerce, within the meaning of Section 1 of the Clayton Act, 15 U.S.C. 12, and Section 7A(a)(1) of the Clayton Act, 15 U.S.C. 18a(a)(1). At all times relevant to this complaint, LyondellBasell had sales or assets in excess of $12.7 million.

THE HART-SCOTT-RODINO ACT AND RULES

7. The HSR Act requires certain acquiring persons and certain persons whose voting securities or assets are acquired to file notifications with the federal antitrust agencies and to observe a waiting period before consummating certain acquisitions of voting securities or assets. 15 U.S.C. 18a(a) and (b). These notification and waiting period requirements apply to acquisitions that meet the HSR Act's thresholds, which are adjusted annually. During the period of 2014 pertinent to this complaint, the HSR Act's reporting and waiting period requirements applied to transactions that would result in the acquiring person holding more than $75.9 million, if certain sales and asset thresholds were met, and all transactions (regardless of the size of the acquiring or acquired persons) where the acquiring person would hold more than $303.4 million of the acquired person's voting securities and/or assets, except for certain exempted transactions.

8. The HSR Act's notification and waiting period are intended to give the federal antitrust agencies prior notice of, and information about, proposed transactions. The waiting period is also intended to provide the federal antitrust agencies with an opportunity to investigate a proposed transaction and to determine whether to seek an injunction to prevent the consummation of a transaction that may violate the antitrust laws.

9. Pursuant to Section (d)(2) of the HSR Act, 15 U.S.C. 18a(d)(2), rules were promulgated to carry out the purposes of the HSR Act. 16 CFR 801–803 (''HSR Rules''). The HSR Rules, among other things, define terms contained in the HSR Act.

10. Pursuant to section 801.13(a)(1) of the HSR Rules, 16 CFR 801.13(a)(1), ''all voting securities of [an] issuer which will be held by the acquiring person after the consummation of an acquisition''—including any held before the acquisition—are deemed held ''as a result of'' the acquisition at issue.

11. Pursuant to sections 801.13(a)(2) and 801.10(c)(1) of the HSR Rules, 16 CFR 801.13(a)(2) and 801.10(c)(1), the value of publicly traded voting securities already held is the market price, defined to be the lowest closing price within 45 days prior to the subsequent acquisition.

12. Section 7A(g)(1) of the Clayton Act, 15 U.S.C. 18a(g)(1), provides that any person, or any officer, director, or partner thereof, who fails to comply with any provision of the HSR Act is liable to the United States for a civil penalty for each day during which such person is in violation. For violations occurring on or after February 10, 2009, the maximum amount of civil penalty is $16,000 per day, pursuant to the Debt Collection Improvement Act of 1996, Public Law 104–134, 31001(s) (amending the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. 2461 note), and Federal Trade Commission Rule 1.98, 16 CFR 1.98, 74 FR 857 (Jan. 9, 2009).

DEFENDANT'S PRIOR VIOLATION OF THE HSR ACT

13. On August 23, 2010, Blavatnik acquired 133,400 voting securities of LyondellBasell. At the time of the acquisition, Blavatnik already held voting securities of LyondellBasell. The value of the voting securities held by Blavatnik after the acquisition was approximately $634 million.

14. Although he was required to do so, Blavatnik did not file under the HSR Act prior to acquiring LyondellBasell voting securities on August 23, 2010.

15. Blavatnik continued to acquire LyondellBasell voting securities in August and September of 2010, acquiring a total of 3,270,500 additional voting securities.

16. On December 1, 2010, Access, acting on Blavatnik's behalf, made a corrective filing under the HSR Act for the August 23, 2010, acquisition of LyondellBasell voting securities, and the subsequent acquisitions in August and September of 2010. In a letter accompanying the corrective filing, Blavatnik acknowledged that the transaction was reportable under the HSR Act, but asserted that the failure to file and observe the waiting period was inadvertent. Blavatnik also committed that he and Access would consult with HSR counsel before making any

additional acquisitions of voting securities.

17. On January 4, 2011, the Premerger Notification Office of the Federal Trade Commission sent a letter to Access indicating that it would not recommend a civil penalty action regarding the August 23, 2010, LyondellBasell acquisition, but stating that Blavatnik ''still must bear responsibility for compliance with the Act. In addition, he is accountable for instituting an effective program to ensure full compliance with the Act's requirements.''

VIOLATION

18. On August 6, 2014, Blavatnik, through Access, acquired 2,818,182 shares of TangoMe voting securities. Blavatnik's voting securities represented approximately 29.1% of TangoMe's outstanding voting securities and were valued at approximately $228 million.

19. Prior to acquiring the TangoMe voting securities, neither Access nor Blavatnik conducted any HSR review of the proposed acquisition or consulted with HSR counsel, notwithstanding their commitments to do so made in connection with the LyondellBasell corrective filing.

20. On December 17, 2014, Blavatnik made a corrective filing under the HSR Act for the August 6, 2014, acquisition of TangoMe voting securities. The waiting period on the corrective filing expired on January 16, 2015.

21. Blavatnik was in continuous violation of the HSR Act from August 6, 2014, when it acquired the TangoMe voting securities valued in excess of the HSR Act's $75.9 million size-of-transaction threshold, through January 16, 2015, when the waiting period expired.

REQUEST FOR RELIEF

Wherefore, Plaintiff requests:

a. That the Court adjudge and decree that Defendant Blavatnik's acquisition of TangoMe voting securities on August 6, 2014, was a violation of the HSR Act, 15 U.S.C. 18a; and that Defendant Blavatnik was in violation of the HSR Act each day from August 6, 2014, through January 16, 2015.

b. That the Court order Defendant Blavatnik to pay to the United States an appropriate civil penalty as provided by the HSR Act, 15 U.S.C. 18a(g)(1), the Debt Collection Improvement Act of 1996, Public Law 104–134, 31001(s) (amending the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. 2461 note), and Federal Trade Commission Rule 1.98, 16 CFR 1.98, 74 FR 857 (Jan. 9, 2009).

c. That the Court order such other and further relief as the Court may deem just and proper.

d. That the Court award the Plaintiff its costs of this suit.

UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

UNITED STATES OF AMERICA, Plaintiff, v. LEN BLAVATNIK, Defendant.

CASE NO.: 1:15–cv–01631
JUDGE: Randolph D. Moss
FILED: 04/20/2016

COMPETITIVE IMPACT STATEMENT

The United States, pursuant to the Antitrust Procedures and Penalties Act (''APPA''), 15 U.S.C. 16(b)–(h), files this Competitive Impact Statement to set forth the information necessary to enable the Court and the public to evaluate the proposed Final Judgment that would terminate this civil antitrust proceeding.

I. NATURE AND PURPOSE OF THIS PROCEEDING

On October 6, 2015, the United States filed a Complaint against Defendant Len Blavatnik (''Blavatnik''), related to Blavatnik's acquisition of voting securities of TangoMe Inc. (''TangoMe'') in 2014. The Complaint alleges that Blavatnik violated Section 7A of the Clayton Act, 15 U.S.C. 18a, commonly known as the Hart-Scott-Rodino Antitrust Improvements Act of 1976 (the ''HSR Act''). The HSR Act states that ''no person shall acquire, directly or indirectly, any voting securities of any person'' exceeding certain thresholds until that person has filed pre-acquisition notification and report forms with the Department of Justice and the Federal Trade Commission (collectively, the ''federal antitrust agencies'' or ''agencies'') and the post-filing waiting period has expired.[1] The purpose of the notification and waiting period is to allow the agencies an opportunity to conduct an antitrust review of proposed transactions before they are consummated.

The Complaint alleges that Blavatnik, via an entity he controls, acquired voting securities of TangoMe in excess of the statutory threshold ($75.9 million at the time of acquisition) without making the required pre-acquisition filings with the agencies and without observing the waiting period, and that Blatvatnik and TangoMe each met the statutory size of person threshold at the time of the acquisition (Blavatnik and TangoMe had sales or assets in excess of $151.7 million and $15.2 million, respectively).

The Complaint further alleges that Blavatnik previously violated the HSR Act's notification requirements when he acquired shares in LyondellBasell Industries N.V. (''LyondellBasell'') in 2010. In August and September of 2010, Blavatnik made several acquisitions of LyondellBasell voting securities without making appropriate HSR filings and observing the required waiting periods. On December 1, 2010, Blavatnik made a corrective filing for these acquisitions. In a letter accompanying the corrective filing, Blavatnik acknowledged that these transactions were reportable under the HSR Act, but asserted that the failure to file and observe the waiting period was inadvertent. Blavatnik also committed that he would consult with HSR counsel before making any additional acquisitions of voting securities. On January 4, 2011, the Premerger Notification Office of the Federal Trade Commission sent a letter to Blavatnik indicating that it would not recommend a civil penalty action regarding the 2010 LyondellBasell acquisition, but stated that Blavatnik would be ''accountable for instituting an effective program to ensure full compliance with the [HSR] Act's requirements.'' [2]

At the same time the Complaint was filed, the United States also filed a Stipulation and proposed Final Judgment that eliminates the need for a trial in this case. The proposed Final

[1] 15 U.S.C. 18a(a).

[2] Complaint, ¶ 17.

Judgment is designed to deter Blavatnik's HSR Act violations. Under the proposed Final Judgment, Blavatnik must pay a civil penalty in the amount of $656,000.

The United States and the Defendant have stipulated that the proposed Final Judgment may be entered after compliance with the APPA, unless the United States first withdraws its consent. Entry of the proposed Final Judgment would terminate this case, except that the Court would retain jurisdiction to construe, modify, or enforce the provisions of the proposed Final Judgment and punish violations thereof. Entry of this judgment would not constitute evidence against, or an admission by, any party with respect to any issue of fact or law involved in the case and is conditioned upon the Court's finding that entry is in the public interest.

II. DESCRIPTION OF THE EVENTS GIVING RISE TO THE ALLEGED VIOLATIONS OF THE ANTITRUST LAWS

A. Len Blavatnik and the Acquisitions of TangoMe Voting Securities

Len Blavatnik is a British businessman, investor, and philanthropist. In 1986, Blavatnik founded Access Industries (''Access''), a private international conglomerate company located in New York. Access, in turn, controls multiple entities engaged in three primary industries: natural resources and chemicals; media and telecommunications; and real estate.

TangoMe is a California based technology start-up known largely for its smartphone application *Tango.* With approximately 200 million registered users, *Tango* is a messaging app offering free video calls, texting, and photo sharing.

On August 6, 2014, Blavatnik, through Access, acquired shares of TangoMe voting securities. Blavatnik's voting securities represented approximately 29.1% of TangoMe's outstanding voting securities and were valued at approximately $228 million. This exceeded the HSR Act's $75.9 million size-of-transaction threshold then in effect.

Prior to acquiring the TangoMe voting securities, neither Access nor Blavatnik conducted any HSR review of the proposed acquisition or consulted with HSR counsel, notwithstanding Blavatnik's commitments made in connection with the 2010 LyondellBasell corrective filing. Blavatnik became aware of the missed HSR filing when Access conducted a periodic review of the company-wide holdings of TangoMe. After discovering the missed filing, Blavatnik promptly made a corrective filing on December 17, 2014. The waiting period expired on January 16, 2015.

B. Blavatnik's Violation of HSR

As alleged in the Complaint, Blavatnik acquired in excess of the $75.9 million in voting securities of TangoMe without complying with the pre-acquisition notification and waiting period requirements of the HSR Act. Blavatnik's failure to comply undermined the statutory scheme and the purpose of the HSR Act. Blavatnik's December 17, 2014, corrective filing included a letter acknowledging that the acquisitions were reportable under the HSR Act.

III. EXPLANATION OF THE PROPOSED FINAL JUDGMENT

The proposed Final Judgment imposes a $656,000 civil penalty designed to deter this Defendant and others from violating the HSR Act. The United States adjusted the penalty downward from the maximum because the violation was unintentional, the Defendant promptly self-reported the violation after discovery, and the Defendant is willing to resolve the matter by consent decree and avoid prolonged investigation and litigation. The penalty also reflects Defendant's previous violation of the HSR Act after pledging to consult counsel in order to prevent such violations. The United States expects this penalty to deter Blavatnik and others from violating the HSR Act. The relief will have a beneficial effect on competition because the agencies will be properly notified of acquisitions, in accordance with the law. At the same time, the penalty will not have any adverse effect on competition.

IV. REMEDIES AVAILABLE TO POTENTIAL PRIVATE LITIGANTS

There is no private antitrust action for HSR Act violations; therefore, entry of the proposed Final Judgment will neither impair nor assist the bringing of any private antitrust action.

V. PROCEDURES AVAILABLE FOR MODIFICATION OF THE PROPOSED FINAL JUDGMENT

The United States and Defendant have stipulated that the proposed Final Judgment may be entered by this Court after compliance with the provision of the APPA, provided that the United States has not withdrawn its consent. The APPA conditions entry of the decree upon this Court's determination that the proposed Final Judgment is in the public interest.

The APPA provides a period of at least sixty (60) days preceding the effective date of the proposed Final Judgment within which any person may submit to the United States written comments regarding the proposed Final Judgment. Any person who wishes to comment should do so within sixty (60) days of the date of publication of this Competitive Impact Statement in the **Federal Register**, or the last date of publication in a newspaper of the summary of this Competitive Impact Statement, whichever is later. All comments received during this period will be considered by the United States, which remains free to withdraw its consent to the proposed Final Judgment at any time prior to entry. The comments and the response of the United States will be filed with the Court. In addition, comments will be posted on the U.S. Department of Justice, Antitrust Division's internet Web site and, under certain circumstances, published in the **Federal Register**. Written comments should be submitted to:

Daniel P. Ducore

Special Attorney, United States

c/o Federal Trade Commission,

600 Pennsylvania Avenue NW.,

CC–8416

Washington, DC 20580

Email: *dducore@ftc.gov*

The proposed Final Judgment provides that this Court retains jurisdiction over this action, and the parties may apply to this Court for any order necessary or appropriate for the modification, interpretation, or enforcement of the Final Judgment.

VI. ALTERNATIVES TO THE PROPOSED FINAL JUDGMENT

As an alternative to the proposed Final Judgment, the United States considered pursuing a full trial on the merits against the Defendant. The United States is satisfied, however, that the proposed relief is an appropriate remedy in this matter. Given the facts of this case, including the Defendant's self-reporting of the violation and willingness to settle quickly, the United States is satisfied that the proposed civil penalty is sufficient to address the violation alleged in the Complaint and to deter violations by similarly situated entities in the future, without the time, expense, and uncertainty of a full trial on the merits.

VII. STANDARD OF REVIEW UNDER THE APPA FOR THE PROPOSED FINAL JUDGMENT

The APPA requires that remedies contained in proposed consent judgments in antitrust cases brought by the United States be subject to a sixty (60) day comment period, after which the court shall determine whether entry of the proposed Final Judgment is ''in the public interest.'' 15 U.S.C. 16(e)(1). In making that determination, the court, in accordance with the statute as amended in 2004, is required to consider:

> (A) the competitive impact of such judgment, including termination of alleged violations, provisions for enforcement and modification, duration of relief sought, anticipated effects of alternative remedies actually considered, whether its terms are ambiguous, and any other competitive considerations bearing upon the adequacy of such judgment that the court deems necessary to a determination of whether the consent judgment is in the public interest; and
>
> (B) the impact of entry of such judgment upon competition in the relevant market or markets, upon the public generally and individuals alleging specific injury from the violations set forth in the complaint including consideration of the public benefit, if any, to be derived from a determination of the issues at trial.

15 U.S.C. 16(e)(1)(A) & (B). In considering these statutory factors, the court's inquiry is necessarily a limited one, as the government is entitled to ''broad discretion to settle with the defendant within the reaches of the public interest.'' *United States* v. *Microsoft Corp.,* 56 F.3d 1448, 1461 (D.C. Cir. 1995); *see generally United States* v. *SBC Commc'ns, Inc.,* 489 F. Supp. 2d 1 (D.D.C. 2007) (assessing public interest standard under the Tunney Act); *United States v, U.S. Airways Group, Inc.,* 38 F. Supp. 3d 69, 75 (D.D.C. 2014) (noting the court has broad discretion of the adequacy of the relief at issue); *United States* v. *InBev N.V./S.A.,* No. 08–1965 (JR), 2009–2 Trade Cas. (CCH) ¶ 76,736, 2009 U.S. Dist. LEXIS 84787, at *3, (D.D.C. Aug. 11, 2009) (noting that the court's review of a consent judgment is limited and only inquires ''into whether the government's determination that the proposed remedies will cure the antitrust violations alleged in the complaint was reasonable, and whether the mechanism to enforce the final judgment are clear and manageable.'').[3]

As the United States Court of Appeals for the District of Columbia Circuit has held, under the APPA a court considers, among other things, the relationship between the remedy secured and the specific allegations set forth in the government's complaint, whether the decree is sufficiently clear, whether enforcement mechanisms are sufficient, and whether the decree may positively harm third parties. *See Microsoft,* 56 F.3d at 1458–62. With respect to the adequacy of the relief secured by the decree, a court may not ''engage in an unrestricted evaluation of what relief would best serve the public.'' *United States* v. *BNS, Inc.,* 858 F.2d 456, 462 (9th Cir. 1988) (quoting *United States* v. *Bechtel Corp.,* 648 F.2d 660, 666 (9th Cir. 1981)); *see also Microsoft,* 56 F.3d at 1460–62; *United States* v. *Alcoa, Inc.,* 152 F. Supp. 2d 37, 40 (D.D.C. 2001); *InBev,* 2009 U.S. Dist. LEXIS 84787, at *3. Courts have held that:

> [t]he balancing of competing social and political interests affected by a proposed antitrust consent decree must be left, in the first instance, to the discretion of the Attorney General. The court's role in protecting the public interest is one of insuring that the government has not breached its duty to the public in consenting to the decree. The court is required to determine not whether a particular decree is the one that will best serve society, but whether the settlement is ''*within the reaches of the public interest.''* More elaborate requirements might undermine the effectiveness of antitrust enforcement by consent decree.

Bechtel, 648 F.2d at 666 (emphasis added) (citations omitted).[4] In determining whether a proposed settlement is in the public interest, a district court ''must accord deference to the government's predictions about the efficacy of its remedies, and may not require that the remedies perfectly match the alleged violations.'' *SBC Commc'ns,* 489 F. Supp. 2d at 17; *see also U.S. Airways,* 38 F. Supp. 3d at 75 (noting that a court should not reject the proposed remedies because it believes others are preferable); *Microsoft,* 56 F.3d at 1461 (noting the need for courts to be ''deferential to the government's predictions as to the effect of the proposed remedies''); *United States* v. *Archer-Daniels-Midland Co.,* 272 F. Supp. 2d 1, 6 (D.D.C. 2003) (noting that the court should grant due respect to the United States' prediction as to the effect of proposed remedies, its perception of the market structure, and its views of the nature of the case).

Courts have greater flexibility in approving proposed consent decrees than in crafting their own decrees following a finding of liability in a litigated matter. ''[A] proposed decree must be approved even if it falls short of the remedy the court would impose on its own, as long as it falls within the range of acceptability or is 'within the reaches of public interest.''' *United States* v. *Am. Tel. & Tel. Co.,* 552 F. Supp. 131, 151 (D.D.C. 1982) (citations omitted) (quoting *United States* v. *Gillette Co.,* 406 F. Supp. 713, 716 (D. Mass. 1975)), *aff'd sub nom. Maryland* v. *United States,* 460 U.S. 1001 (1983); *see also U.S. Airways,* 38 F. Supp. 3d at 76 (noting that room must be made for the government to grant concessions in the negotiation process for settlements (citing *Microsoft,* 56 F.3d at 1461)); *United States* v. *Alcan Aluminum Ltd.,* 605 F. Supp. 619, 622 (W.D. Ky. 1985) (approving the consent decree even though the court would have imposed a greater remedy). To meet this standard, the United States ''need only provide a factual basis for concluding that the settlements are reasonably adequate remedies for the alleged harms.'' *SBC Commc'ns,* 489 F. Supp. 2d at 17.

Moreover, the court's role under the APPA is limited to reviewing the remedy in relationship to the violations that the United States has alleged in its Complaint, and does not authorize the court to ''construct [its] own hypothetical case and then evaluate the decree against that case.'' *Microsoft,* 56 F.3d at 1459; *see also U.S. Airways,* 38 F. Supp. 3d at 75 (noting that the court must simply determine whether there is a factual foundation for the government's decisions such that its conclusions regarding the proposed settlements are reasonable); *InBev,* 2009 U.S. Dist. LEXIS 84787, at *20 (''the 'public interest' is not to be measured by comparing the violations alleged in the complaint against those the court believes could have, or even should have, been alleged''). Because the ''court's authority to review the decree depends entirely on the government's exercising its prosecutorial discretion by bringing a case in the first place,'' it follows that ''the court is only authorized to review the decree itself,'' and not to ''effectively redraft the

---

[3] The 2004 amendments substituted ''shall'' for ''may'' in directing relevant factors for court to consider and amended the list of factors to focus on competitive considerations and to address potentially ambiguous judgment terms. *Compare* 15 U.S.C. 16(e) (2004), *with* 15 U.S.C. 16(e)(1) (2006); *see also SBC Commc'ns,* 489 F. Supp. 2d at 11 (concluding that the 2004 amendments ''effected minimal changes'' to Tunney Act review).

[4] *Cf. BNS,* 858 F.2d at 464 (holding that the court's ''ultimate authority under the [APPA] is limited to approving or disapproving the consent decree''); *United States* v. *Gillette Co.,* 406 F. Supp. 713, 716 (D. Mass. 1975) (noting that, in this way, the court is constrained to ''look at the overall picture not hypercritically, nor with a microscope, but with an artist's reducing glass''). *See generally Microsoft,* 56 F.3d at 1461 (discussing whether ''the remedies [obtained in the decree are] so inconsonant with the allegations charged as to fall outside of the 'reaches of the public interest'''').

complaint'' to inquire into other matters that the United States did not pursue. *Microsoft,* 56 F.3d at 1459–60. As this Court recently confirmed in *SBC Communications,* courts ''cannot look beyond the complaint in making the public interest determination unless the complaint is drafted so narrowly as to make a mockery of judicial power.'' *SBC Commc'ns,* 489 F. Supp. 2d at 15.

In its 2004 amendments, Congress made clear its intent to preserve the practical benefits of utilizing consent decrees in antitrust enforcement, adding the unambiguous instruction that ''[n]othing in this section shall be construed to require the court to conduct an evidentiary hearing or to require the court to permit anyone to intervene.'' 15 U.S.C. 16(e)(2); *see also U.S. Airways,* 38 F. Supp. 3d at 76 (indicating that a court is not required to hold an evidentiary hearing or to permit intervenors as part of its review under the Tunney Act). The language wrote into the statute what Congress intended when it enacted the Tunney Act in 1974, as Senator Tunney explained: ''[t]he court is nowhere compelled to go to trial or to engage in extended proceedings which might have the effect of vitiating the benefits of prompt and less costly settlement through the consent decree process.'' 119 Cong. Rec. 24,598 (1973) (statement of Sen. Tunney). Rather, the procedure for the public interest determination is left to the discretion of the court, with the recognition that the court's ''scope of review remains sharply proscribed by precedent and the nature of Tunney Act proceedings.'' *SBC Commc'ns,* 489 F. Supp. 2d at 11.[5] A court can make its public interest determination based on the competitive impact statement and response to public comments alone. *U.S. Airways,* 38 F. Supp. 3d at 76.

VIII. DETERMINATIVE DOCUMENTS

There are no determinative materials or documents within the meaning of the APPA that were considered by the United States in formulating the proposed Final Judgment.

Date: April 20, 2016

Respectfully Submitted,

Kenneth A. Libby
Special Attorney

IN THE UNITED STATES DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

UNITED STATES OF AMERICA c/o Department of Justice Washington, D.C. 20530, Plaintiff, v. LEN BLAVATNIK c/o Access Industries, 28 Kensington Church Street, 4th Floor, London, United Kingdom W8 4EP, Defendant.

CASE NO.: 1:15–cv–01631
JUDGE: Randolph D. Moss
FILED: 10/06/2015

FINAL JUDGMENT

Plaintiff, the United States of America, having commenced this action by filing its Complaint herein for violation of Section 7A of the Clayton Act, 15 U.S.C. 18a, commonly known as the Hart-Scott-Rodino Antitrust Improvements Act of 1976, and Plaintiff and Defendant Len Blavatnik, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law herein, and without this Final Judgment constituting any evidence against or an admission by the Defendant with respect to any such issue:

Now, therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law herein, and upon the consent of the parties hereto, it is hereby Ordered, Adjudged, and Decreed as follows:

I.

The Court has jurisdiction of the subject matter of this action and of the Plaintiff and the Defendant. The Complaint states a claim upon which relief can be granted against the Defendant under Section 7A of the Clayton Act, 15 U.S.C. 18a.

II.

Judgment is hereby entered in this matter in favor of Plaintiff United States of America and against Defendant, and, pursuant to Section 7A(g)(1) of the Clayton Act, 15 U.S.C. 18a(g)(1), the Debt Collection Improvement Act of 1996, Pub. L. 104–134 § 31001(s) (amending the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. 2461), Federal Trade Commission Rule 1.98, 16 CFR 1.98, 61 FR 54549 (Oct. 21, 1996), and 74 FR 857 (Jan. 9, 2009), Defendant Len Blavatnik is hereby ordered to pay a civil penalty in the amount of six hundred fifty six thousand dollars ($656,000). Payment of the civil penalty ordered hereby shall be made by wire transfer of funds or cashier's check. If the payment is made by wire transfer, Defendant shall contact Janie Ingalls of the Antitrust Division's Antitrust Documents Group at (202) 514–2481 for instructions before making the transfer. If the payment is made by cashier's check, the check shall be made payable to the United States Department of Justice and delivered to:

Janie Ingalls
United States Department of Justice
Antitrust Division, Antitrust Documents Group
450 5th Street NW., Suite 1024
Washington, DC 20530

Defendant shall pay the full amount of the civil penalty within thirty (30) days of entry of this Final Judgment. In the event of a default or delay in payment, interest at the rate of eighteen (18) percent per annum shall accrue thereon from the date of the default or delay to the date of payment.

III.

Each party shall bear its own costs of this action.

IV.

Entry of this Final Judgment is in the public interest.

Dated: _____

United States District Judge

BILLING CODE P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act and the Resource Conservation and Recovery Act

On April 20, 2016, the Department of Justice and the State of California on behalf of the California Department of Toxic Substances Control and Toxic Substances Control Account (''DTSC'') filed a complaint and lodged a proposed Consent Decree with the United States District Court for the Central District of California pertaining to environmental contamination at Operable Unit 2 (''OU2'') of the Omega Chemical Corporation Superfund Site (''Site'') in Los Angeles County, California. The complaint and proposed Consent Decree were filed contemporaneously in the matter of *United States of America and State of California on behalf of the Department of Toxic Substances Control*

[5] *See United States* v. *Enova Corp.,* 107 F. Supp. 2d 10, 17 (D.D.C. 2000) (noting that the ''Tunney Act expressly allows the court to make its public interest determination on the basis of the competitive impact statement and response to comments alone''); *United States* v. *Mid-Am. Dairymen, Inc.,* No. 73–CV–681–W–1, 1977–1 Trade Cas. (CCH) ¶ 61,508, at 71,980, *22 (W.D. Mo. 1977) (''Absent a showing of corrupt failure of the government to discharge its duty, the Court, in making its public interest finding, should . . . carefully consider the explanations of the government in the competitive impact statement and its responses to comments in order to determine whether those explanations are reasonable under the circumstances.''); S. Rep. No. 93–298, at 6 (1973) (''Where the public interest can be meaningfully evaluated simply on the basis of briefs and oral arguments, that is the approach that should be utilized.'').

and Toxic Substances Control Account v. *Abex Aerospace et al.,* Civil Action No. 2:16–cv–02696 (C.D. Cal.).

The proposed Consent Decree resolves certain claims under Sections 106 and 107 of the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9606, 9607 and Section 7003 of the Resource Conservation and Recovery Act, 42 U.S.C. 6973, as well as related state law claims, in connection with environmental contamination at OU2. The Consent Decree requires the settling defendants, which include as Settling Work Defendants the members of the Omega PRP Organized Group (''OPOG'') and McKesson Corporation, and also include various Settling Cash Defendants, to perform work at OU2 and to make a payment of $8 million toward the United States' unreimbursed OU2 past costs, and a payment of $70,000 towards DTSC's unreimbursed OU2 past costs. The proposed Consent Decree also requires the settling defendants to pay the United States' and DTSC's future response costs for overseeing the work the settling defendants will be performing at OU2.

The publication of this notice opens a period for public comment on the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States of America and State of California on behalf of the Department of Toxic Substances Control and Toxic Substances Control Account* v. *Abex Aerospace et al.,* D.J. Ref. No. 90–11–3–06529/10. A hearing will be held on the proposed settlement if requested in writing within the public comment period. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov.*
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the Consent Decree may be examined and downloaded at this Justice Department Web site: *https://www.usdoj.gov/enrd/consent-decrees.* We will provide a paper copy of the Consent Decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $86.50 (25 cents per page reproduction cost) for the Consent Decree, payable to the United States Treasury. For a paper copy without the exhibits and signature pages, the cost is $22.75.

Henry S. Friedman,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

Office of Justice Programs

[OJP (OJJDP) Docket No. 1710]

Webinar Meeting of the Federal Advisory Committee on Juvenile Justice

AGENCY: Office of Juvenile Justice and Delinquency Prevention, Justice.

ACTION: Notice of webinar meeting.

SUMMARY: The Office of Juvenile Justice and Delinquency Prevention (OJJDP) has scheduled a webinar meeting of the Federal Advisory Committee on Juvenile Justice (FACJJ).

DATES: The webinar meeting will take place online on Wednesday May 18, 2016 at 2:00 p.m. EDT.

FOR FURTHER INFORMATION CONTACT: Jeff Slowikowski, Designated Federal Official, OJJDP, *Jeff.Slowikowski@usdoj.gov,* or (202) 616–3646. [This is not a toll-free number.]

SUPPLEMENTARY INFORMATION: FACJJ, established pursuant to Section 3(2)A of the Federal Advisory Committee Act (5 U.S.C. App.2), will meet to carry out its advisory functions under Section 223(f)(2)(C–E) of the Juvenile Justice and Delinquency Prevention Act of 2002. The FACJJ is composed of representatives from the states and territories. FACJJ member duties include: Reviewing Federal policies regarding juvenile justice and delinquency prevention; advising the OJJDP Administrator with respect to particular functions and aspects of OJJDP; and advising the President and Congress with regard to State perspectives on the operation of OJJDP and Federal legislation pertaining to juvenile justice and delinquency prevention. More information on the FACJJ may be found at *www.facjj.org.*

Meeting Agenda: The proposed agenda includes: (a) Opening Introductions, and Webinar Logistics; (b) Remarks of Robert L. Listenbee, Administrator, OJJDP; (c) FACJJ Subcommittee Reports (Legislation; Expungement/Sealing of Juvenile Court Records; Research/Publications)); (d) FACJJ Administrative Business; and (e) Summary, Next Steps, and Meeting Adjournment.

To participate in or view the webinar meeting, FACJJ members and the public must pre-register online. Members and interested persons must link to the webinar registration portal through *www.facjj.org,* no later than Monday, May 16, 2016. Upon registration, information will be sent to you at the email address you provide to enable you to connect to the webinar. Should problems arise with webinar registration, please call Callie Long Murray at 571–308–6617. [This is not a toll-free telephone number.] Note: Members of the public will be able to listen to and view the webinar as observers, but will not be able to participate actively in the webinar.

An on-site room is available for members of the public interested in viewing the webinar in person. If members of the public wish to view the webinar in person, they must notify Melissa Kanaya by email message at *mkanaya@aeioonline.com* no later than Friday, May 13, 2016.

FACJJ members will not be physically present in Washington, DC for the webinar. They will participate in the webinar from their respective home jurisdictions.

Written Comments: Interested parties may submit written comments by email message in advance of the webinar to Jeff Slowikowski, Designated Federal Official, at *Jeff.Slowikowski@usdoj.gov,* no later than Monday, May 16, 2016. In the alternative, interested parties may fax comments to 202–307–2819 and contact Yasmeen Hines at 202–598–9785 to ensure that they are received. [These are not toll-free numbers.]

Robert L. Listenbee,

Administrator, Office of Juvenile Justice and Delinquency Prevention.

DEPARTMENT OF JUSTICE

Office of Justice Programs

[OJP (OJJDP) Docket No. 1707]

Meeting of the Coordinating Council on Juvenile Justice and Delinquency Prevention

AGENCY: Coordinating Council on Juvenile Justice and Delinquency Prevention, Justice.

ACTION: Notice of meeting.

SUMMARY: The Coordinating Council on Juvenile Justice and Delinquency Prevention (''Council'') announces its next meeting.

DATES: Friday, June 17, 2016 from 10:00 a.m. to 12:00 p.m. (Eastern Time).

ADDRESSES: The meeting will take place in the third floor main conference room at the U.S. Department of Justice, Office of Justice Programs, 810 7th St. NW., Washington, DC 20531.

FOR FURTHER INFORMATION CONTACT: Visit the Web site for the Coordinating Council at *www.juvenilecouncil.gov* or contact Jeff Slowikowski, Designated Federal Official (DFO), OJJDP, by telephone at (202) 616–3646 (not a toll-free number) or via email: *jeff.slowikowski@usdoj.gov.* The meeting is open to the public.

SUPPLEMENTARY INFORMATION: The Council, established by statute in the Juvenile Justice and Delinquency Prevention Act of 1974 (42 U.S.C. 5616(a)), will meet to carry out its advisory functions. Documents such as meeting announcements, agendas, minutes, and reports will be available on the Council's Web page, *www.juvenilecouncil.gov* where you may also obtain information on the meeting.

Although designated agency representatives may attend, the Council membership consists of the Attorney General (Chair), the Administrator of the Office of Juvenile Justice and Delinquency Prevention (Vice Chair), the Secretary of Health and Human Services (HHS), the Secretary of Labor (DOL), the Secretary of Education (DOE), the Secretary of Housing and Urban Development (HUD), the Director of the Office of National Drug Control Policy, the Chief Executive Officer of the Corporation for National and Community Service, and the Assistant Secretary of Homeland Security for U.S. Immigration and Customs Enforcement. The nine additional members are appointed by the Speaker of the U.S. House of Representatives, the U.S. Senate Majority Leader, and the President of the United States. Other federal agencies take part in Council activities, including the Departments of Agriculture, Defense, Interior, and the Substance and Mental Health Services Administration of HHS.

Meeting Agenda: The agenda will include: (a) Opening remarks and introductions; (b) Discussion of the Overview of National, State and Local Efforts to Reduce and Prevent Youth Violence; and (c) Council member announcements.

Registration: For security purposes, members of the public who wish to attend the meeting must pre-register online at *www.juvenilecouncil.gov* no later than Tuesday, June 14, 2016. Should problems arise with web registration, contact Melissa Kanaya, Senior Program Manager/Federal Contractor, at (202) 280–8874 or (202) 514–9373 or send a request to register to Ms. Kanaya. Please include name, title, organization or other affiliation, full address and phone, fax and email information and send to her attention either by fax to (866) 854–6619, or by email to *mkanaya@aeioonline.com.* Note that these are not toll-free telephone numbers. Additional identification documents may be required. Meeting space is limited.

Note: Photo identification will be required for admission to the meeting.

Written Comments: Interested parties may submit written comments and questions in advance by Tuesday, June 14, 2016, to Mr. Slowikowski, at *jeff.slowikowski@usdoj.gov.* Alternatively, fax your comments to (866) 854–6619 and contact Ms. Kanaya at (202) 280–8874 or (202) 514–9373 to ensure that they are received.

The Council expects that the public statements submitted will not repeat previously submitted statements. Written questions from the public are also invited at the meeting.

Robert L. Listenbee,

Administrator, Office of Juvenile Justice and Delinquency Prevention.

BILLING CODE 4410–18–P

DEPARTMENT OF LABOR

Employee Benefits Security Administration

Agency Information Collection Activities; Announcement of OMB Approvals

AGENCY: Employee Benefits Security Administration, Department of Labor.

ACTION: Notice.

SUMMARY: The Employee Benefits Security Administration (EBSA) announces that the Office of Management and Budget (OMB) has approved certain collections of information, listed in the **SUPPLEMENTARY INFORMATION** below, following EBSA's submission of requests for such approvals under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501 *et seq.*). This notice describes the information collections that have been approved or re-approved, their OMB control numbers, and their current expiration dates.

FOR FURTHER INFORMATION CONTACT: G. Christopher Cosby, Office of Policy and Research, Employee Benefits Security Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Room N–5718, Washington, DC 20210. Telephone: (202) 693–8410; Fax: (202) 219–4745. These are not toll-free numbers.

SUPPLEMENTARY INFORMATION: The PRA and its implementing regulations require Federal agencies to display OMB control numbers and inform respondents of their legal significance after OMB has approved an agency's information collections. In accordance with those requirements, EBSA hereby notifies the public that the following information collections have been re-approved by OMB following EBSA's submission of an information collection request (ICR) for extension of a prior approval:

- OMB Control No. 1210–0059, Employee Retirement Income Security Act Prohibited Transaction Exemption 1986–128 For Securities Transactions Involving Employee Benefit Plans and Broker-Dealers. The expiration date for this information collection is March 31, 2018.
- OMB Control No. 1210–0066, Employee Retirement Income Security Act Procedure 1976–1; Advisory Opinion Procedure. The expiration date for this information collection is August 31, 2018.
- OMB Control No. 1210–0083, PTE 1990–1; Insurance Company Pooled Separate Accounts. The expiration date for this information collection is December 31, 2018.
- OMB Control No. 1210–0084, Employee Retirement Income Security Act of 1974 Technical Release 91–1. The expiration date for this information collection is August 31, 2018.
- OMB Control No. 1210–0091, Settlement Agreements Between a Plan and a Party in Interest. The expiration date for this information collection is December 31, 2018.
- OMB Control No. 1210–0110, Annual Information Return/Report of Employee Benefit Plan. The expiration date for this information collection is August 31, 2018.
- OMB Control No. 1210–0112, Furnishing Documents to the Secretary of Labor on Request Under ERISA Section 104(a)(6). The expiration date for this information collection is April 30, 2018.
- OMB Control No. 1210–0114, Disclosures by Insurers to General

Account Policyholders. The expiration date for this information collection is August 31, 2018.

• OMB Control No. 1210–0115, Prohibited Transaction Class Exemption for Cross-Trades of Securities by Index and Model-Driven Funds (PTCE 2002–12). The expiration date for this information collection is December 31, 2018.

• OMB Control No. 1210–0117, Registration for EFAST–2 Credentials. The expiration date for this information collection is September 30, 2018.

• OMB Control No. 1210–0118, Voluntary Fiduciary Correction Program. The expiration date for this information collection is December 31, 2018.

• OMB Control No. 1210–0121, Consent to Receive Employee Benefit Plan Disclosures Electronically. The expiration date for this information collection is March 31, 2018.

• OMB Control No. 1210–0122, Employee Retirement Income Security Act Blackout Period Notice. The expiration date for this information collection is August 31, 2018.

• OMB Control No. 1210–0124, Acquisition and Sale of Trust Real Estate Investment Trust Shares by Individual Account Plans Sponsored by Trust Real Estate Investment Trusts. The expiration date for this information collection is December 31, 2018.

• OMB Control No. 1210–0127, Abandoned Individual Account Plan Termination. The expiration date for this information collection is December 31, 2018.

• OMB Control No. 1210–0133, Employee Retirement Income Security Act Section 408(b)(2) Regulation. The expiration date for this information collection is May 31, 2018.

• OMB Control No. 1210–0144, Affordable Care Act Internal Claims and Appeals and External Review Procedures for Non-Grandfathered Plans. The expiration date for this information collection is March 31, 2019.

• OMB Control No. 1210–0147, Affordable Care Act Section 2715 Summary Disclosures. The expiration date for this information collection is April 30, 2019.

EBSA hereby notifies the public that the following information collections have been approved by OMB following EBSA's submission of an information collection request (ICR) for a revision of a currently approved collection:

• OMB Control No. 1210–0126, Annual Funding Notice for Defined Benefit Pension Plans. The expiration date for this information collection is April 30, 2018.

• OMB Control No. 1210–0150, Coverage of Certain Preventive Services Under the Affordable Care Act. The expiration date for this information collection is September 30, 2018.

EBSA hereby notifies the public that the following new information collections have been approved by OMB following EBSA's submission of an information collection request (ICR):

• OMB Control No. 1210–0152, Coverage of Certain Preventive Services Under the Affordable Care Act—For-Profit Entities. The expiration date for this information collection is September 30, 2018.

• OMB Control No. 1210–0154, Focus Groups for Evaluating the Effectiveness of Employee Retirement Income Security Act Section 408(b)(2) Disclosure Requirements. The expiration date for this information collection is January 31, 2018.

The PRA provides that an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Publication of this notice satisfies this requirement with respect to the above-listed information collections, as provided in 5 CFR 1320.5(b)(2)(C).

Joseph S. Piacentini,

Director, Office of Policy and Research, Employee Benefits Security Administration.

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; ETA Workforce Innovation and Opportunity Act Performance Accountability, Information, and Reporting System

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Employment and Training Administration sponsored information collection request (ICR) proposal titled, ''ETA Workforce Innovation and Opportunity Act Performance Accountability, Information, and Reporting System,'' to the Office of Management and Budget (OMB) for review and approval for use in accordance with the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501 *et seq.*). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before May 27, 2016.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the RegInfo.gov Web site at *http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201604-1205-003* (this link will only become active on the day following publication of this notice) or by contacting Michel Smyth by telephone at 202–693–4129 (this is not a toll-free number) or by email at *DOL_PRA_PUBLIC@dol.gov.*

Submit comments about this request by mail or courier to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL–ETA, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503; by Fax: 202–395–5806 (this is not a toll-free number); or by email: *OIRA_submission@omb.eop.gov.* Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor—OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: *DOL_PRA_PUBLIC@dol.gov.*

FOR FURTHER INFORMATION CONTACT: Michel Smyth by telephone at 202–693–4129 (this is not a toll-free number) or by email at *DOL_PRA_PUBLIC@dol.gov.*

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks PRA authority for the ETA Workforce Innovation and Opportunity Act (WIOA) Performance Accountability, Information, and Reporting System information collection. The following programs will be required to report through this system: WIOA Adult, Dislocated Worker and Youth, Wagner Peyser Employment Service, National Farmworker Jobs, Trade Adjustment Assistance, YouthBuild, Indian and Native American, Job Corps, and Jobs for Veterans' State Grants. Requiring these programs to use a standard set of data elements, definitions, and specifications at all levels of the workforce system helps improve the quality of the performance information that is received by the DOL. While H1–B grants, the Reintegration of Ex-Offenders program, and the Trade Adjustment Assistance program are not authorized under the WIOA, these programs will be utilizing the data element definitions and reporting templates proposed in this ICR. The accuracy, reliability, and

comparability of program reports submitted by states and grantees using Federal funds are fundamental elements of good public administration, and are necessary tools for maintaining and demonstrating system integrity. This ICR includes several information collection instruments—Program Performance Report, WIOA Pay-for-Performance Report, Participant Individual Record Layout, WIOA Data Element Specifications, and Job Openings Report. WIOA section 185 authorizes this information collection. *See* 29 U.S.C. 3245.

This proposed information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information if the collection of information does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6. For additional information, see the related notices published in the **Federal Register** on April 16, 2015 (80 FR 20573), and September 1, 2015 (80 FR 52798).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB ICR Reference Number 201604–1205–003. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: DOL–ETA.

Title of Collection: ETA Workforce Innovation and Opportunity Act Performance Accountability, Information, and Reporting System.

OMB ICR Reference Number: 201604–1205–003.

Affected Public: State, Local, and Tribal Governments; Private Sector.

Total Estimated Number of Respondents: 1,801.

Total Estimated Number of Responses: 17,261,469.

Total Estimated Annual Time Burden: 4,471,044 hours.

Total Estimated Annual Other Costs Burden: $6,791,395.

Dated: April 21, 2016.

Michel Smyth,

Departmental Clearance Officer.

[FR Doc. 2016–09807 Filed 4–26–16; 8:45 am]

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Occupational Safety and Health State Plans

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting Occupational Safety and Health Administration (OSHA) sponsored information collection request (ICR) titled, ''Occupational Safety and Health State Plans,'' to the Office of Management and Budget (OMB) for review and approval for continued use, without change, in accordance with the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501 *et seq.* Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before May 27, 2016.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the RegInfo.gov Web site at *http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=20201601-1218-001* (this link will only become active on the day following publication of this notice) or by contacting Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_PUBLIC@dol.gov.*

Submit comments about this request by mail or courier to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL–OSHA, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503; by Fax: 202–395–5806 (this is not a toll-free number); or by email: *OIRA_submission@omb.eop.gov.* Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor-OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: *DOL_PRA_PUBLIC@dol.gov.*

FOR FURTHER INFORMATION CONTACT: Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_PUBLIC@dol.gov.*

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Occupational Safety and Health State Plans information collection. Occupational Safety and Health Act of 1970 section 18 encourages States to assume responsibility for the development and enforcement of State occupational safety and health standards through the mechanism of an approved State plan. Absent a plan approved by the OSHA, a State is preempted from asserting authority over any occupational safety and health issue with respect to which a Federal standard has been promulgated. Section 18 establishes the basic criteria for State plan approval; provides for the discretionary exercise of concurrent Federal enforcement jurisdiction for a period of time following initial approval; provides that State standards and enforcement must be, and continue to be, at least as effective as the Federal program, including any change thereto; and requires the OSHA to make a continuing evaluation of the State plan to take action to withdraw plan approval should there be a failure to substantially comply with any provision of the State Plan. A State choosing to operate an OSHA-approved plan must provide information to document the State program is at least as effective as the Federal OSHA program. In order to obtain and maintain State Plan approval, a State must submit various documents to the OSHA describing the Plan program structure and operation, including any modification thereto as it

occurs, in accordance with the identified regulations.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218–0247.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on April 30, 2016. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on January 27, 2016 (81 FR 4672).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1218–0247.

The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: DOL–OSHA.

Title of Collection: Occupational Safety and Health State Plans.

OMB Control Number: 1218–0247.

Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Respondents: 28.

Total Estimated Number of Responses: 1,309.

Total Estimated Annual Time Burden: 11,519 hours.

Total Estimated Annual Other Costs Burden: $0.

Dated: April 21, 2016.

Michel Smyth,

Departmental Clearance Officer.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petitions for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations Part 44 govern the application, processing, and disposition of petitions for modification. This notice is a summary of petitions for modification submitted to the Mine Safety and Health Administration (MSHA) by the parties listed below.

DATES: All comments on the petitions must be received by the MSHA's Office of Standards, Regulations, and Variances on or before May 27, 2016.

ADDRESSES: You may submit your comments, identified by ''docket number'' on the subject line, by any of the following methods:

1. *Electronic Mail: zzMSHA-comments@dol.gov.* Include the docket number of the petition in the subject line of the message.
2. *Facsimile:* 202–693–9441.
3. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452, Attention: Sheila McConnell, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk in Suite 4E401. Individuals may inspect copies of the petitions and comments during normal business hours at the address listed above.

MSHA will consider only comments postmarked by the U.S. Postal Service or proof of delivery from another delivery service such as UPS or Federal Express on or before the deadline for comments.

FOR FURTHER INFORMATION CONTACT: Barbara Barron, Office of Standards, Regulations, and Variances at 202–693–9447 (Voice), *barron.barbara@dol.gov* (Email), or 202–693–9441 (Facsimile). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or
2. That the application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M–2016–001–M.

Petitioner: The Doe Run Company, Three Gateway Center, Suite 1500, 401 Liberty Avenue, Pittsburgh, Pennsylvania 15222–1000.

Mines: Buick Mine/Mill, MSHA I.D. No. 23–00457 and Viburnum No. 35 (Casteel Mine), MSHA I.D. No. 23–01800, located in Iron County, Missouri; Sweetwater Mine/Mill, MSHA I.D. No. 23–00458, Fletcher Mine/Mill, MSHA I.D. No. 23–00409, and Brushy Creek Mine/Mill, MSHA I.D. No. 23–00499, located in Reynolds County, Missouri; and Viburnum No. 29 Mine, MSHA I.D. No. 23–00495, located in Washington County, Missouri.

Regulation Affected: 30 CFR 57.11050 (Escapeways and refuges).

Modification Request: The petitioner requests a modification of the existing standard to permit an alternative method of compliance with respect to escapeways. The petitioner states that:

(1) The Doe Run Company operates six underground lead mines near Viburnum, Missouri. The Buick Mine is

currently considered ''inactive'' by MSHA but mining is occurring within the boundaries of the mine. The mines consist of both development and production headings. Activities include drilling, blasting, scaling, loading, and hauling of ore.

(2) All of Doe Run's mines access the elevation where the ore bodies are located by means of shafts. The ore body is accessed horizontally from such shafts. Each mine has two escapeways from what would be considered the lowest levels of each mine.

(3) Provision of two escapeways from each working area will be difficult, burdensome and unnecessarily costly. It will involve, in part, mining areas where there is no ore present and it will consume extensive periods of time. There are numerous areas at issue and abatement may involve millions of dollars of expense in certain areas.

(4) As an alternative to compliance to the existing standard 30 CFR 57.11050, the petitioner proposes the following:

(a) All active mining headings or development headings with more than 1000 feet of single access drift in the roadway leading to it will have a Designated Point of Safety (DPOS) within 1000 feet of every working heading.

(b) In cases where the mining area opens up to multiple drifts inby the 1000 feet of single access, the DPOS will be placed inby the last point of single access but not necessarily within 1000 feet of all working faces.

(c) Portable escape hoist vent shafts and roadways to other mines ''inby'' the 1000 feet of single access will eliminate the need for a DPOS.

(d) The DPOS for each work area that does not have two escapeways from the work area will comply with requirements for refuge alternatives in 30 CFR part 7, specifically as follows:

(i) Prefabricated self-contained units, including the structural breathable air, air monitoring, and harmful gas removal components of the unit will be approved under 30 CFR part 7.

(ii) Refuge alternatives will provide at least 15 square feet of floor space per person and 30 to 60 cubic feet of volume per person. The airlock can be included in the space and volume if waste is disposed outside the refuge alternative.

(iii) The operator will protect the refuge alternative and contents from damage during transportation, installation, and storage.

(iv) A refuge alternative will be removed from service if examination reveals damage that interferes with the functioning of the refuge alternative or any component.

(a) If a refuge alternative is removed from service, the operator will withdraw all persons from the area serviced by the refuge alternative, except those persons referred to in § 104(c) of the Mine Act.

(b) Refuge alternative components removed from service will be replaced or be repaired for return to service in accordance with the manufacturer's specifications.

(v) At all times, the site and area around the refuge alternative will be kept clear of machinery, materials, and obstructions that could interfere with the deployment or use of the refuge alternative.

(vi) Each refuge alternative will be conspicuously identified with a sign or marker as follows:

(a) A sign or marker made of a reflective material with the word ''Refuge'' will be posted conspicuously at each refuge alternative.

(b) Directional signs made of a reflective material will be posted leading to each refuge alternative location.

(vii) During the use of the refuge alternative, the atmosphere within the refuge alternative will be monitored. Changers or adjustments will be made to reduce the concentration of carbon dioxide to 1 percent or less and excursions not exceeding 2.5 percent; and to reduce the concentration of carbon monoxide to 25 ppm or less. Oxygen will be maintained at 18.5 to 23 percent.

(viii) Refuge alternatives will contain a fire extinguisher that:

(a) Meets the requirements for portable fire extinguishers used in underground coal mines under this part;

(b) Is appropriate for extinguishing fires involving the chemical used for harmful gas removal; and

(c) Uses of low-toxicity extinguishing agent that does not produce a hazardous by-product when activated.

The petitioner asserts that the proposed alternative method will at all times guarantee no less than the same measure of protection afforded by the existing standard.

Sheila McConnell,

Director, Office of Standards, Regulations, and Variances.

Mine Safety and Health Administration

Petitions for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations Part 44 govern the application, processing, and disposition of petitions for modification. This notice is a summary of petitions for modification submitted to the Mine Safety and Health Administration (MSHA) by the parties listed below.

DATES: All comments on the petitions must be received by the MSHA's Office of Standards, Regulations, and Variances on or before May 27, 2016.

ADDRESSES: You may submit your comments, identified by ''docket number'' on the subject line, by any of the following methods:

1. *Electronic Mail: zzMSHA-comments@dol.gov.* Include the docket number of the petition in the subject line of the message.

2. *Facsimile:* 202–693–9441.

3. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452, Attention: Sheila McConnell, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist's desk in Suite 4E401. Individuals may inspect copies of the petitions and comments during normal business hours at the address listed above.

MSHA will consider only comments postmarked by the U.S. Postal Service or proof of delivery from another delivery service such as UPS or Federal Express on or before the deadline for comments.

FOR FURTHER INFORMATION CONTACT: Barbara Barron, Office of Standards, Regulations, and Variances at 202–693–9447 (Voice), *barron.barbara@dol.gov* (Email), or 202–693–9441 (Facsimile). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION:

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or

other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. That the application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements and procedures for filing petitions for modification.

II. Petitions for Modification

Docket Number: M–2016–010–C.

Petitioner: Buckingham Coal Company, P.O. Box 400, Corning, Ohio 43730–0400.

Mine: Buckingham Mine #6, MSHA I.D. No. 33–04526, located in Perry County, Ohio.

Regulation Affected: 30 CFR 75.1101–1(b) (Deluge-type water spray systems).

Modification Request: The petitioner requests a modification of the existing standard to allow the mine not to provide blow-off dust covers on deluge-type system nozzles under existing 30 CFR 75.1101–1(b). The functional tests required of the deluge system each year will instead be done weekly. The petitioner states that the #6 Mine maintains more than adequate pressure and flow rates for the deluge system, and in some tests, the dust covers do not come off all sprays. The petitioner further states that:

(1) By doing the functional test weekly, all sprays can be inspected and maintained on a weekly basis.

(2) The dust covers provide protection for sprays which are tested yearly and by testing weekly the covers are not necessary.

The petitioner asserts that the proposed alternative method will at all times guarantee no less than the same measure or protection afforded by the existing standard.

Sheila McConnell,

Director, Office of Standards, Regulations, and Variances.

BILLING CODE 4520–43–P

LIBRARY OF CONGRESS

U.S. Copyright Office

[Docket No. 2015–7]

Section 512 Study: Notice of Location Change for California Public Roundtables

AGENCY: U.S. Copyright Office, Library of Congress.

ACTION: Notice of location change for California public roundtables.

SUMMARY: The United States Copyright Office has changed the location of the May 12 and 13, 2016 public roundtables on the section 512 study. The Office announced the public roundtables in New York and California by notice in the **Federal Register** on March 18, 2016. *See* 81 FR 14896. The May 12 and 13, 2016 public roundtables in California will now be held in Courtroom 4 of the Ninth Circuit James R. Browning Courthouse, 95 Seventh Street, San Francisco, California 94103.

Dates and Addresses

The California roundtable will take place on May 12 and 13, 2016, from 9:00 a.m. to 5:00 p.m. on both days, and will be held in Courtroom 4 of the Ninth Circuit James R. Browning Courthouse, 95 Seventh Street, San Francisco, California 94103.

FOR FURTHER INFORMATION CONTACT: Jacqueline C. Charlesworth, General Counsel and Associate Register of Copyrights, *jcharlesworth@loc.gov;* or Karyn Temple Claggett, Director of the Office of Policy and International Affairs and Associate Register of Copyrights, *kacl@loc.gov.* Both can be reached by telephone at 202–707–8350.

SUPPLEMENTARY INFORMATION: On December 31, 2015, the Copyright Office issued a Notice of Inquiry seeking public comment on thirty topics concerning the efficiency and effectiveness of section 512 of Title 17. *See* 80 FR 81862. The Office then issued a notice of public roundtables on March 18, 2016 announcing two two-day public roundtables on section 512 to be held in New York, New York on May 2 and 3, 2016, and Stanford, California on May 12 and 13, 2016. *See* 81 FR 14896. Interested members of the public were directed to submit participation requests through forms posted on the Office's Web site no later than April 11, 2016.

Due to the significant level of interest in the proceeding, the Office has decided to move the location of the California roundtable to Courtroom 4 of the Ninth Circuit James R. Browning Courthouse, 95 Seventh Street, San Francisco, California 94103.

Please note that the roundtable hearing rooms, in New York and California, will have a limited number of seats for participants and observers. For individuals who wish to observe a roundtable, the Office will provide public seating on a first-come, first-served basis on the days of the roundtables.

Individuals selected for participation in one or more of the roundtable sessions have been notified directly by the Office. For additional information about the specific topics to be covered at the roundtables, please see *http://copyright.gov/policy/section512/public-roundtable/participate-request.html.*

Dated: April 22, 2016.

Jacqueline C. Charlesworth,

General Counsel and Associate Register of Copyrights, U.S. Copyright Office.

BILLING CODE 1410–30–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: 16–030]

Aerospace Safety Advisory Panel; Meeting

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Public Law 92–463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the Aerospace Safety Advisory Panel.

DATES: Thursday, May 12, 2016, 10:30 a.m. to 11:45 a.m., Central Time.

ADDRESSES: NASA Marshall Space Flight Center, Building 4200, Room 600, Huntsville, Alabama 35812.

FOR FURTHER INFORMATION CONTACT: Ms. Marian Norris, Aerospace Safety Advisory Panel Administrative Officer, NASA Headquarters, Washington, DC 20546, (202) 358–4452 or *mnorris@nasa.gov.*

SUPPLEMENTARY INFORMATION: The Aerospace Safety Advisory Panel (ASAP) will hold its Second Quarterly Meeting for 2016. This discussion is pursuant to carrying out its statutory duties for which the Panel reviews, identifies, evaluates, and advises on those program activities, systems, procedures, and management activities that can contribute to program risk. Priority is given to those programs that involve the safety of human flight. The agenda will include:

—Updates on the Exploration Systems Development
—Updates on the Commercial Crew Program
— Updates on the International Space Station Program

The meeting will be open to the public up to the seating capacity of the room. Seating will be on a first-come basis. This meeting is also available telephonically. Any interested person may call the USA toll free conference call number (800) 857–7040; pass code 2708980. Attendees will be required to sign a visitor's register and to comply with NASA Marshall Space Flight Center security requirements, including the presentation of a valid picture ID and a secondary form of ID, before receiving an access badge. Due to the Real ID Act, Public Law 109–13, any attendees with drivers licenses issued from noncompliant states/territories must present a second form of ID. Noncompliant states/territories are American Samoa, Illinois, Minnesota, Missouri, New Mexico, and Washington. All U.S. citizens desiring to attend the Aerospace Safety Advisory Panel meeting at the Marshall Space Flight Center must provide their full name, company affiliation (if applicable), driver's license number and state, citizenship, place of birth, and date of birth to the Marshall Space Flight Center Protective Services and Export Control Office no later than close of business on May 9, 2016. All non-U.S. citizens must submit their name; current address; driver's license number and state (if applicable); citizenship; company affiliation (if applicable) to include address, telephone number, and title; place of birth; date of birth; U.S. visa information to include type, number, and expiration date; U.S. Social Security Number (if applicable); Permanent Residents (green card holders) number and expiration date (if applicable); place and date of entry into the U.S.; and Passport information to include Country of issue, number, and expiration date to the Marshall Space Flight Center Protective Services and Export Control Office no later than close of business on May 4, 2016. If the above information is not received by the noted dates, attendees should expect a minimum delay of four (4) hours. All visitors to this meeting will be required to process in through the Redstone/Marshall Space Flight Center Joint Visitor Control Center located on Rideout Road, north of Gate 9, prior to entering Marshall Space Flight Center. Please provide the appropriate data, via fax at (256) 544–2101, noting at the top of the page ''Public Admission to the ASAP Meeting at MSFC.'' For security questions, please call Becky Hopson at (256) 544–4541. At the beginning of the meeting, members of the public may make a verbal presentation to the Panel on the subject of safety in NASA, not to exceed 5 minutes in length. To do so, members of the public must contact Ms. Marian Norris at *mnorris@nasa.gov* or at (202) 358–4452 at least 48 hours in advance. Any member of the public is permitted to file a written statement with the Panel at the time of the meeting. Verbal presentations and written comments should be limited to the subject of safety in NASA. It is imperative that the meeting be held on this date to accommodate the scheduling priorities of the key participants.

Patricia D. Rausch,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

BILLING CODE 7510–13–P

NUCLEAR REGULATORY COMMISSION

[NRC–2016–0088]

Draft Standard Review Plan on Foreign Ownership, Control, or Domination, Revision 1

AGENCY: Nuclear Regulatory Commission.

ACTION: Standard review plan-draft section revision; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is soliciting public comment on the Draft Standard Review Plan on Foreign Ownership, Control, or Domination, Revision 1. The Standard Review Plan (SRP) provides guidance and establishes procedures for NRC staff to review the issue of whether an applicant for a nuclear facility license is owned, controlled, or dominated by an alien, a foreign corporation, or a foreign government. This SRP will be used as the basis for such reviews in connection with license applications for new facilities, or applications for approval of direct or indirect transfers of facility licenses.

DATES: Comments must be filed no later than May 27, 2016. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specific subject):

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0088. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Cindy Bladey, Office of Administration, Mail Stop: OWFN–12–H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Shawn W. Harwell, Office of Nuclear Reactor Regulation, telephone: 301–415–1309; email: *Shawn.Harwell@nrc.gov,* U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2016–0088 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0088.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents''* and then select ''*Begin Web-based ADAMS Search.''* For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The Draft Standard Review Plan on Foreign Ownership, Control, or Domination, Revision 1, is available in ADAMS under Accession No. ML16048A025.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2016–0088 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *http://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Discussion

The NRC is issuing this revision to the SRP on Foreign Ownership, Control, or Domination (FOCD), to provide guidance and establish procedures for NRC staff's review of whether an applicant for a nuclear facility license issued under sections 103.d., ''Commercial Licenses,'' or 104.d., ''Medical Therapy and Research and Development,'' of the Atomic Energy Act of 1954, as amended (AEA or Act), is owned, controlled, or dominated by an alien, a foreign corporation, or a foreign government (individually or collectively, a foreign entity). Specifically, this revision of the SRP establishes guidance on graded negation action plan (NAP) criteria; provides for the consideration of site-specific criteria, as necessary; allows for the use of license conditions to incorporate NAPs and the staff's ''totality of facts'' review approach; and incorporates provisions for analyzing foreign financing. This SRP will be used as the basis for the conduct of FOCD reviews associated with license applications for new facilities to be licensed under title 10 of the *Code of Federal Regulations* (10 CFR), parts 50 and 52; applications for the renewal of facility licenses; or applications for approval of direct or indirect transfers of facility licenses.

Where there are co-applicants, each intending to own an interest in a new facility as co-licensees, the reviewer should consider each applicant to determine whether it is owned, controlled, or dominated by a foreign entity. If a co-licensee of an existing facility owns a partial interest in the facility and is transferring that interest, the acquirer should also be considered to determine whether it is owned, controlled, or dominated by a foreign entity.

The FOCD determination is to be made with an orientation toward the common defense and security. The provisions in the AEA for FOCD and inimicality, and the staff's reviews of these areas under NRC regulations, are derived from the same national security concerns, but appear in separate and distinct language in the AEA. The FOCD provisions in the AEA and NRC regulations are country-neutral, whereas the staff's inimicality review and its findings directly account for a license applicant's country of origin and any ties or interests that could result in a determination of inimicality. As such, while FOCD and inimicality are closely related, this SRP does not address the determination of whether issuance of a license would be inimical to the common defense and security or to the health and safety of the public.

The previous revision of this SRP was approved by the Commission in its staff requirements memorandum on SECY–99–165, ''Final Standard Review Plan Regarding Foreign Ownership, Control, or Domination of Applicants for Reactor Licenses,'' dated August 31, 1999, and published in the **Federal Register** on September 28, 1999. Revision 1 to this SRP has been updated to reflect current NRC regulations and policy.

Dated at Rockville, Maryland, this 19th day of April 2016.

For the Nuclear Regulatory Commission.

William M. Dean,

Director, Office of Nuclear Reactor Regulation.

[FR Doc. 2016–09916 Filed 4–26–16; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards (ACRS) Meeting of the ACRS Subcommittee on Digital I&C Systems; Notice of Meeting

The ACRS Subcommittee on Digital I&C Systems will hold a meeting on May 17, 2016, Room T–2B1, 11545 Rockville Pike, Rockville, Maryland.

The meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Tuesday, May 17, 2016—1:00 p.m. until 5:00 p.m.

The Subcommittee will review the cyber security informational SECY paper on Control of Access. The Subcommittee will hear presentations by and hold discussions with the NRC staff and other interested persons regarding this matter. The Subcommittee will gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the Full Committee.

Members of the public desiring to provide oral statements and/or written comments should notify the Designated Federal Official (DFO), Christina Antonescu (Telephone 301–415–6792 or Email: *Christina.Antonescu@nrc.gov*) five days prior to the meeting, if possible, so that appropriate arrangements can be made. Thirty-five hard copies of each presentation or handout should be provided to the DFO thirty minutes before the meeting. In addition, one electronic copy of each presentation should be emailed to the DFO one day before the meeting. If an electronic copy cannot be provided within this timeframe, presenters should provide the DFO with a CD containing each presentation at least thirty minutes before the meeting. Electronic recordings will be permitted only during those portions of the meeting that are open to the public. Detailed procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 21, 2015, (80 FR 63846).

Detailed meeting agendas and meeting transcripts are available on the NRC Web site at *http://www.nrc.gov/reading-rm/doc-collections/acrs.* Information regarding topics to be discussed, changes to the agenda, whether the meeting has been canceled or rescheduled, and the time allotted to present oral statements can be obtained from the Web site cited above or by contacting the identified DFO. Moreover, in view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with these references if such rescheduling would result in a major inconvenience.

If attending this meeting, please enter through the One White Flint North building, 11555 Rockville Pike, Rockville, MD. After registering with security, please contact Mr. Theron Brown (Telephone 240–888–9835) to be escorted to the meeting room.

Dated: April 20, 2016.

Mark L. Banks,

Chief, Technical Support Branch, Advisory Committee on Reactor Safeguards.

[FR Doc. 2016–09914 Filed 4–26–16; 8:45 am]

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards (ACRS) Meeting of the ACRS Subcommittee on Regulatory Policies and Practices; Notice of Meeting

The ACRS Subcommittee on Regulatory Policies and Practices will hold a meeting on May 19, 2016, Room T–2B1, 11545 Rockville Pike, Rockville, Maryland.

The meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Thursday, May 19, 2016—8:30 a.m. until 5:00 p.m.

The Subcommittee will discuss the State-of-the-Art Reactor Consequence Analyses Project (SOARCA) Project, Sequoyah (a PWR with Ice-Condenser Containment) plant. The Subcommittee will hear presentations by and hold discussions with the NRC staff and other interested persons regarding this matter. The Subcommittee will gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the Full Committee.

Members of the public desiring to provide oral statements and/or written comments should notify the Designated Federal Official (DFO), Hossein Nourbakhsh (Telephone 301–415–5622 or Email: *Hossein.Nourbakhsh@nrc.gov*) five days prior to the meeting, if possible, so that appropriate arrangements can be made. Thirty-five hard copies of each presentation or handout should be provided to the DFO thirty minutes before the meeting. In addition, one electronic copy of each presentation should be emailed to the DFO one day before the meeting. If an electronic copy cannot be provided within this timeframe, presenters should provide the DFO with a CD containing each presentation at least thirty minutes before the meeting. Electronic recordings will be permitted only during those portions of the meeting that are open to the public. Detailed procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 21, 2015 (80 FR 63846).

Detailed meeting agendas and meeting transcripts are available on the NRC Web site at *http://www.nrc.gov/reading-rm/doc-collections/acrs.* Information regarding topics to be discussed, changes to the agenda, whether the meeting has been canceled or rescheduled, and the time allotted to present oral statements can be obtained from the Web site cited above or by contacting the identified DFO. Moreover, in view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with these references if such rescheduling would result in a major inconvenience.

If attending this meeting, please enter through the One White Flint North building, 11555 Rockville Pike, Rockville, MD. After registering with security, please contact Mr. Theron Brown (Telephone 240–888–9835) to be escorted to the meeting room.

Dated: April 20, 2016.

Mark L. Banks,

Chief, Technical Support Branch, Advisory Committee on Reactor Safeguards.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket No. 99901385; EA–15–212; NRC–2016–0086]

In the Matter of C&D Technologies, Inc.

AGENCY: Nuclear Regulatory Commission.

ACTION: Confirmatory order; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing a confirmatory order (Order) to C&D Technologies, Inc. (C&D), to memorialize the agreements reached during an alternative dispute resolution mediation session held on March 10, 2016. This Order will resolve the issues that were identified during an NRC inspection at the C&D facility located in Blue Bell, Pennsylvania. This Order is effective 30 calendar days after its issuance.

DATES: Effective Date: The confirmatory order becomes effective on May 20, 2016.

ADDRESSES: Please refer to Docket ID NRC–2016–0086 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web Site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0086. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For questions about this Order, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Gerald Gulla, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555–001; telephone: 301–415–2872, email: *Gerald.Gulla@nrc.gov.*

SUPPLEMENTARY INFORMATION: The text of the Order is attached.

Dated at Rockville, Maryland, this 20th day of April 2016.

For the Nuclear Regulatory Commission.

Patricia K. Holahan,

Director, Office of Enforcement.

UNITED STATES OF AMERICA NUCLEAR REGULATORY COMMISSION

In the Matter of) Docket No. 99901385
C&D Technologies, Inc.) EA–15–212

CONFIRMATORY ORDER

I

C&D Technologies, Inc., (C&D) provides Class 1E batteries for safety-related applications to nuclear power plants located in the United States. The C&D main office is located in Blue Bell, Pennsylvania.

This Confirmatory Order (Order) is the result of an agreement reached between C&D and the U.S. Nuclear Regulatory Commission (NRC) during an alternative dispute resolution (ADR)

mediation session conducted on March 10, 2016.

II

From September 21 to September 25, 2015, the NRC conducted an inspection at the C&D facility in Blue Bell. The purpose of this limited-scope inspection was to assess C&D's compliance with the provisions of selected portions of title 10 of the *Code of Federal Regulations* (10 CFR) Part 50, Appendix B ''Quality Assurance Criteria for Nuclear Power Plants and Fuel Reprocessing Plants,'' and 10 CFR part 21, ''Reporting of Defects and Noncompliance.''

On January 8, 2016, the NRC issued Inspection Report 99901385/2015–201 to C&D, which documented three apparent violations being considered for escalated enforcement action in accordance with the NRC Enforcement Policy.

The first apparent violation concerned C&D's failure to implement an adequate 10 CFR part 21 program to perform a timely and thorough evaluation of a deviation to identify defects, which if left uncorrected, could result in substantial safety hazards. The NRC identified that C&D's initial evaluation of a deviation in station battery cell separators lacked an adequate technical basis to support closing the evaluation in accordance with 10 CFR 21.21(a)(1). When C&D completed a more thorough evaluation of this deviation, a defect in the battery manufacturing process was identified. This defect was reported to the NRC in accordance with 10 CFR 21.21(d)(1); however, the report was made over 2½ years greater than the 60 day requirement. The second apparent violation concerned multiple additional instances where C&D failed to provide an adequate technical justification to support closing the evaluations of deviations in accordance with 10 CFR 21.21(a)(1). The third apparent violation concerned multiple additional instances where C&D failed to prepare and submit interim reports to the NRC when an evaluation could not be completed within 60 days from the date of discovery in accordance with 10 CFR 21.21(a)(2).

In response to the NRC's letter dated January 8, 2016, (Agencywide Documents Access and Management System (ADAMS) Accession No. ML15307A198), C&D requested the use of the NRC's ADR process to resolve these issues. Alternative Dispute Resolution is a process in which a neutral mediator with no decision-making authority assists the parties in reaching an agreement on resolving any differences regarding a dispute. This Order is being issued pursuant to the preliminary agreement reached between C&D and the NRC.

III

During the ADR mediation session, C&D and the NRC reached a preliminary settlement agreement. The elements of the agreement consisted of the following:

1. To ensure that C&D achieves full compliance for all currently identified violations, C&D will take the following actions:

A. By 30 calendar days from the issuance date of an Order, C&D shall confirm that all outstanding 10 CFR part 21 evaluations are complete and that all required interim reports are submitted in accordance with the timelines required by 10 CFR part 21.

B. By 45 calendar days from the issuance date of an Order, C&D shall review and revise, as necessary, all policies and procedures to provide reasonable assurance that Part 21 evaluations are conducted in accordance with 10 CFR 50, Appendix B quality assurance program requirements.

a. C&D shall define the Part 21 ''discovery date'' within their procedures as the date the issue is entered into the Part 21 process, corrective action system, nonconformance process, or reported in the customer complaint database, whichever occurs first.

b. C&D procedures shall provide reasonable assurance that the evaluation process of all deviations includes a documented technical evaluation and basis for why the identified deviation would or would not result in a substantial safety hazard, if left uncorrected.

C. By 45 calendar days from the issuance date of an Order, C&D shall contract an independent (not an employee or customer of C&D) third party expert to conduct an assessment of the C&D corrective action program (CAP), and the administrative controls and management controls in place to provide reasonable assurance of an effective part 21 program, including 10 CFR 50, Appendix B requirements. The initial assessment shall be completed by the end of the calendar year 2016 and assessments will continue annually.

D. C&D shall report the completion of items 1.A, 1.B and 1.C, in writing to the Director, Division of Construction Inspection and Operational Programs (DCIP), Nuclear Regulatory Commission (NRC), Office of New Reactors, no later than 75 calendar days from issuance of the Order.

2. To ensure that C&D senior management, first-line supervision and employees are committed to, and accountable for, complying with NRC requirements, and maintaining a robust safety culture, C&D will take the following actions:

A. By 30 calendar days from the issuance date of an Order, C&D shall issue a letter from President and Chief Executive Officer (CEO) [1] to employees in all C&D locations, working with nuclear-related activities, outlining C&D's management's expectations, including a commitment that all nuclear-related activities are performed and documented in a complete and accurate manner in accordance with approved procedures. C&D shall notify the DCIP Director no later than 30 calendar days after issuance of the letter and shall provide a copy of the letter to the DCIP Director. The letter shall address the following:

(1) Where the NRC inspection report can be found that describe the 2015 apparent violations;

(2) include a brief overview of the apparent violations;

(3) C&D senior management, mid-level managers and first-line supervisors expect all employees to follow approved policies and procedures; and

(4) C&D management has an expectation that all employees are to report procedure concerns to their supervisors (or to another appropriate level of management), and that supervisors are responsible for encouraging this reporting by staff and ensuring procedure issues are resolved appropriately and in a timely manner.

B. By 90 calendar days from the issuance date of an Order, Senior Management's commitment and expectations will be further reinforced through the use of conspicuously posted company-wide posters and/or other appropriate forms of communication. Communications will specifically discuss 10 CFR part 21 requirements, and best practices identified by C&D's evaluation of issues and violations (including root causes), corrective actions to prevent recurrence, and promote a strong safety culture.

C. Management expectations shall be further reinforced at the local level with an overt commitment from mid-level management and first-line supervisors regarding procedure adherence. Opportunities to communicate this commitment may include organizational all-hands meetings during which site

[1] In lieu of a letter to all employees, the NRC would consider it to be acceptable if C&D produced a video message from the CEO and other senior managers that would have wide-spread distribution and be shown at required all-hands meeting(s).

managers and/or supervisors can convey the lessons learned from NRC inspections and any applicable industry assessments (*e.g.,* Nuclear Procurement Issues Committee (NUPIC)), and explain how to handle similar situations if and when they should arise in their organization or group.

3. To ensure that C&D policies, procedures and work practices provide the necessary guidance to promote compliance with NRC requirements, C&D shall take the following actions:

A. By 180 calendar days of the issuance date of an Order, C&D shall enter the existing issue of procedure compliance into its corrective action program (CAP), and this issue shall be considered a significant condition adverse to quality. As a result, C&D shall conduct a formal root cause analysis of known procedure violations to determine the extent of condition of C&D work practices and identify corrective actions to improve procedure guidance. In addition, the extent of condition shall address the last five years of C&D's nuclear-related customer complaints, corrective actions, or nonconformances that meet the Part 21 definition of a deviation. C&D shall ensure that the extent of condition review is complete and that all 10 CFR part 21 deviations are identified and entered into C&D's Part 21 (A–14) procedure to ensure that they are adequately evaluated for reportable defects. By 30 calendar days of corrective action completion, C&D shall provide the results of its root cause and extent of condition report to the DCIP Director.

B. By 60 calendar days of the issuance date of an Order, C&Ds corrective action program shall be revised to have the ability to trend 10 CFR part 21 related issues, such as failure to follow 10 CFR part 21 procedure requirements or failure to enter a deviation into the 10 CFR part 21 process.

4. To ensure that all C&D employees understand their roles and responsibilities regarding compliance with NRC requirements, C&D will provide training and other forms of continuous reinforcement to its employees:

By 90 calendar days from the issuance date of an Order, C&D will complete the development of a training program as described below. The initial training shall be submitted to the NRC for review and comment before being implemented. The NRC will review the draft training provided by C&D within 10 business days. The Initial training shall then be conducted and documented for all current employees and supervisors no later than 30 calendar days from the completion of the NRC review. C&D shall report to the DCIP Director by telephone within 7 calendar days of completion of the initial training.

A. Training (initial and annual) shall cover the basic regulatory requirements of 10 CFR; the legal authority granted to the NRC to inspect for compliance; the enforcement actions that can be taken against the company, the customer and company employees for noncompliance; 10 CFR 50, Appendix B and 10 CFR part 21 requirements; and the associated C&D procedures. This shall be documented and provided to all employees involved in nuclear-related work activities, including management.

B. Develop, implement and document initial training and annual refresher training for item 4.A.

C. For employees involved in nuclear-related activities (including supervisors) hired after the date of initial training completion, the initial training shall be provided and documented within 45 calendar days of hire.

D. For 3 years following the effective date of the Order, C&D shall assess the effectiveness of training and procedure compliance by reviewing and trending information obtained from C&D's CAP.

In addition to the elements described above, C&D has taken or committed to take the following corrective actions.

1. Complete implementation of an improved process that customers use to report information (*i.e.,* the iSight system) to C&D for battery issues. This process shall assure prompt entry and classification of issues to determine if the issue is a deviation, if applicable.

2. Complete implementation of a new 10 CFR part 21 process that includes biweekly meetings that are attended by executive management, and logs of actions and schedules for reporting to the NRC.

3. Complete implementation of new qualification report documentation to reconstitute the design basis of the K and L battery product lines by linking the specification requirements to specific test results required by the Institute of Electrical and Electronics Engineers (IEEE) specifications.

4. Complete implementation of new internal reporting requirements. Quality assurance issues shall be reported to the CEO.

5. Hold monthly corrective action meetings with plant managers and the executive team to ensure timely correction of identified issues.

6. Complete implementation of more robust Safety Committee meetings conducted with particular attention paid to due dates. In addition, the process for initial reporting of customer identified issues has been established so that the Quality Systems manager conducts the first review of the issue as soon as correspondence begins with a nuclear customer.

7. Complete institution of a third party 10 CFR part 21 and Appendix B audit program, using experienced and qualified personnel reporting directly to the CEO and General Counsel. The audits shall be executed annually. Inputs to the audits will include all customer communications, customer complaint information, and 10 CFR part 21 and Safety Committee records. The initial audit shall occur by the end of March 2016 for the 10 CFR part 21 program and by September 2016 of Appendix B to 10 CFR part 50.

Based on the actions described above, and the commitments described in Section V below, the NRC agrees to the following conditions:

1. The NRC will consider this Order as an escalated enforcement action for the purposes of determining future enforcement action per the NRC Enforcement Policy,

2. The NRC will refrain from issuing a proposed imposition of a civil penalty and a Notice of Violation for the above-referenced apparent violations.

On April 12, 2016, C&D consented to issuing this Order with the commitments, as described in Section V below. C&D further agreed that this Order is to be effective 30 calendar days after its issuance, the agreement memorialized in this Order settles the matter between the parties, and that C&D has waived its right to a hearing.

IV

I find that C&D's actions completed or committed to take, as described in Section III above, combined with the commitments as set forth in Section V are acceptable and necessary, and conclude that with these commitments the public health and safety are reasonably assured. In view of the foregoing, I have determined that public health and safety require that C&D's commitments be confirmed by this Order. Based on the above and C&D's consent, this Order is effective 30 calendar days after its issuance.

V

Accordingly, pursuant to Sections 161b, 161i, 161o, 182 and 186 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR 2.202 and 10 CFR parts 21, and 50, *it is hereby ordered that:*

A. Compliance with 10 CFR part 21

1. By 45 calendar days from the issuance date of this Order, C&D shall

confirm that all outstanding 10 CFR part 21 evaluations are complete and that all required interim reports are submitted in accordance with the timelines required by 10 CFR part 21.

2. By 45 calendar days from the issuance date of this Order, C&D shall review and revise, as necessary, all policies and procedures to provide reasonable assurance that Part 21 evaluations are conducted in accordance with 10 CFR 50, Appendix B quality assurance program requirements.

a. C&D shall define the Part 21 ''discovery date'' within their procedures as ''the date the issue is entered into the Part 21 process, corrective action system, nonconformance process, or reported in the customer complaint database, whichever occurs first.''

b. C&D procedures shall provide reasonable assurance that the evaluation process used for all deviations includes a documented technical evaluation and basis for why the identified deviation would or would not result in a substantial safety hazard, if left uncorrected.

3. By 45 calendar days from the issuance date of this Order, C&D shall contract an independent third party expert (not an employee or customer of C&D) to conduct an assessment of the C&D corrective action program, and the administrative controls and management controls in place to provide reasonable assurance of an effective Part 21 program, including 10 CFR 50, Appendix B requirements. The initial assessment shall be completed by the end of the calendar year 2016 and assessments will continue annually thereafter.

4. C&D shall report the completion of items A.1, A.2, and A.3, in writing to the DCIP Director no later than 75 calendar days from issuance of this Order.

B. Communications

1. By 45 calendar days from the issuance date of this Order, C&D shall issue a letter and/or video message from the President and CEO to employees in all C&D locations working with nuclear-related activities, outlining C&D's management's expectations, including a commitment that all nuclear-related activities are performed and documented in a complete and accurate manner in accordance with approved procedures. C&D shall notify the DCIP Director no later than 30 calendar days after issuance of the letter and shall provide a copy of the letter to the DCIP Director. The letter shall address the following:

a. how to obtain the NRC inspection report that describes the 2015 apparent violations;

b. a brief overview of the apparent violations;

c. a statement that C&D senior management, mid-level managers, and first-line supervisors expect all employees to follow approved policies and procedures; and

d. a statement that C&D management has an expectation that all employees are to report procedure concerns to their supervisors, or to another appropriate level of management, and that supervisors are responsible for encouraging this reporting by staff, and ensuring procedure issues are resolved appropriately and in a timely manner.

2. By 90 calendar days from the issuance date of this Order, C&D senior management's commitment and expectations will be further reinforced through the use of conspicuously posted company-wide posters and/or other appropriate forms of communication. Communications will specifically discuss 10 CFR part 21 requirements, and best practices identified by C&D's evaluation of issues and violations (including root causes), corrective actions to prevent recurrence, and promote a strong safety culture.

C. Work Processes

1. C&D shall ensure that the existing issue of procedure compliance has been entered into its CAP, and this issue shall be considered a significant condition adverse to quality. As a result, within 180 days of the issuance date of this Order, C&D shall conduct a formal root cause analysis of known procedure violations to determine the extent of condition of C&D work practices and identify corrective actions to improve procedure guidance. In addition, the extent of condition shall address the last five years of C&D's nuclear-related customer complaints, corrective actions, or nonconformances that meet the Part 21 definition of a ''deviation.'' C&D shall ensure that the extent of condition review is complete and that all 10 CFR part 21 deviations are identified and entered into C&D's 10 CFR part 21 program to ensure that they are adequately evaluated for reportable defects. By 30 calendar days of corrective action completion, C&D shall provide the results of its root cause and extent of condition report to the DCIP Director.

2. By 60 calendar days of the issuance date of this Order, C&Ds CAP shall be revised to have the ability to trend 10 CFR part 21 related issues, such as failure to follow 10 CFR part 21 procedure requirements or failure to enter a deviation into the 10 CFR part 21 process.

D. Training

1. By 90 calendar days from the issuance date of this Order, C&D will develop a training program as described below. The training program, including the initial training, shall be submitted to the NRC for review and comment before being implemented. Within 10 business days of submission, the NRC will perform an initial review and provide comments to C&D. Within 30 days of receiving NRC comments, C&D shall adequately address these comments in writing, at which time the NRC will provide a final review of the program. The NRC will inform C&D of its approval of the training program in writing and by telephone within 10 days of re-submittal by C&D. The initial training shall then be conducted and documented for all current employees and supervisors no later than 30 calendar days from the NRC final approval date. C&D shall report to the DCIP Director in writing and by telephone within 7 calendar days of completion of the initial training.

a. Training (initial and annual) shall cover the basic requirements (*e.g.,* what they are and how they apply) of 10 CFR 50, Appendix B and 10 CFR part 21; the legal authority granted to the NRC to inspect for compliance; the enforcement actions that can be taken against the company, the customer and company employees for noncompliance; and the associated C&D procedures. This training shall be provided to all employees involved in nuclear-related work activities, including management.

b. Develop, implement and document initial training and annual refresher training for item D.1.a.

c. For employees involved in nuclear-related activities, including supervisors, who are hired after the date of initial training completion, the initial training shall be provided and documented within 45 calendar days of hire.

d. For three years following the effective date of this Order, C&D shall assess the effectiveness of training and procedure compliance by reviewing and trending information obtained from C&D's CAP.

The terms of this Order apply to the successors and assigns of C&D.

The Director, Office of Enforcement, may, in writing, relax or rescind any of the above conditions upon demonstration by C&D of good cause.

VI

In accordance with 10 CFR 2.202 and 10 CFR 2.309, any person adversely affected by this Order, other than C&D,

may request a hearing within 30 days of the issuance date of this Order. Where good cause is shown, consideration will be given to extending the time to request a hearing. A request for extension of time must be directed to the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, and include a statement of good cause for the extension.

All documents filed in NRC adjudicatory proceedings, including a request for hearing, a petition for leave to intervene, any motion or other document filed in the proceeding prior to the submission of a request for hearing or petition to intervene, and documents filed by interested governmental entities participating under 10 CFR 2.315(c), must be filed in accordance with the NRC's E-Filing rule (72 FR 49139; August 28, 2007), as amended by 77 FR 46562; August 3, 2012 (codified in pertinent part at 10 CFR part 2, subpart C). The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases to mail copies on electronic storage media. Participants may not submit paper copies of their filings unless they seek an exemption in accordance with the procedures described below.

To comply with the procedural requirements of E-Filing, at least ten (10) days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *hearing.docket@nrc.gov,* or by telephone at 301–415–1677, to (1) request a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign documents and access the E-Submittal server for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a request or petition for hearing (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital identification (ID) certificate. Based upon this information, the Secretary will establish an electronic docket for the hearing in this proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals.html.* System requirements for accessing the E-Submittal server are detailed in NRC's ''Guidance for Electronic Submission,'' which is available on the agency's public Web site at *http://www.nrc.gov/site-help/e-submittals.html.* Participants may attempt to use other software not listed on the Web site, but should note that the NRC's E-Filing system does not support unlisted software, and the NRC Meta System Help Desk will not be able to offer assistance in using unlisted software.

If a participant is electronically submitting a document to the NRC in accordance with the E-Filing rule, the participant must file the document using the NRC's online, Web-based submission form. In order to serve documents through the Electronic Information Exchange System, users will be required to install a Web browser plug-in from the NRC Web site. Further information on the Web-based submission form, including the installation of the Web browser plug-in, is available on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals.html.*

Once a participant has obtained a digital ID certificate and a docket has been created, the participant can then submit a request for hearing or petition for leave to intervene through the EIE. Submissions should be in Portable Document Format (PDF) in accordance with NRC guidance available on the NRC's public Web site at *http://www.nrc.gov/site-help/e-submittals.html.* A filing is considered complete at the time the documents are submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. Eastern Time (ET) on the due date. Upon receipt of a transmission, the E-Filing system time-stamps the document and sends the submitter an email notice confirming receipt of the document. The E-Filing system also distributes an email notice that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the documents on those participants separately. Therefore, any others who wish to participate in the proceeding (or their counsel or representative) must apply for and receive a digital ID certificate before a hearing request/petition to intervene is filed so that they can obtain access to the document via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC Meta System Help Desk through the ''Contact Us'' link located on the NRC's Web site at *http://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at (866) 672–7640. The NRC Meta System Help Desk is available between 8:00 a.m. and 8:00 p.m., ET, Monday through Friday, excluding government holidays.

Participants who believe that they have a good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing requesting authorization to continue to submit documents in paper format. Such filings must be submitted by: (1) First class mail addressed to the Office of the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemaking and Adjudications Staff; or (2) courier, express mail, or expedited delivery service to the Office of the Secretary, Sixteenth Floor, One White Flint North, 11555 Rockville Pike, Rockville, Maryland, 20852, Attention: Rulemaking and Adjudications Staff. Participants filing a document in this manner are responsible for serving the document on all other participants. Filing is considered complete by first-class mail as of the time of deposit in the mail, or by courier, express mail, or expedited delivery service upon depositing the document with the provider of the service. A presiding officer, having granted an exemption request from using E-Filing, may require a participant or party to use E-Filing if the presiding officer subsequently determines that the reason for granting the exemption from use of E-Filing no longer exists.

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket, which is available to the public at *http://ehd1.nrc.gov/ehd/,* unless excluded pursuant to an order of the Commission or the presiding officer. Participants are requested not to include personal privacy information, such as social security numbers, home addresses, or home phone numbers in their filings, unless an NRC regulation or other law requires submission of such information. However, in some instances, a request to intervene will require including information on local residence in order to demonstrate a proximity assertion of interest in the proceeding. With respect to copyrighted works, participants are requested not to include copyrighted materials in their submission, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application.

If a person other than the licensee requests a hearing, that person shall set forth with particularity the manner in which his interest is adversely affected by this Order and shall address the

criteria set forth in 10 CFR 2.309(d) and (f).

If a hearing is requested by a person whose interest is adversely affected, the Commission will issue a separate Order designating the time and place of any hearings, as appropriate. If a hearing is held, the issue to be considered at such hearing shall be whether this Order should be sustained.

In the absence of any request for hearing, or written approval of an extension of time in which to request a hearing, the provisions specified in Section V above shall be final 30 days after issuance of this Order without further order or proceedings. If an extension of time for requesting a hearing has been approved, the provisions specified in Section V shall be final when the extension expires if a hearing request has not been received.

Dated at Rockville, Maryland, this 20th day of April 2016.

For the Nuclear Regulatory Commission.

Patricia K. Holahan, Director,

Office of Enforcement.

BILLING CODE 7590–01–P

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 52–017; NRC–2008–0066]

Dominion Virginia Power; North Anna, Unit 3; Combined License Application

AGENCY: Nuclear Regulatory Commission.

ACTION: Combined license application; receipt.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is giving notice once each week for four consecutive weeks of the North Anna Unit 3 combined license (COL) application from Dominion Virginia Power (Dominion).

DATES: April 27, 2016.

ADDRESSES: Please refer to Docket ID NRC–2008–0066 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2008–0066. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: James Shea, Office of New Reactors, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–1388, email: *James.Shea@nrc.gov.*

SUPPLEMENTARY INFORMATION: The Virginia Electric and Power Company, doing business as Dominion Virginia Power (Applicant) has filed an application for a COL with the NRC under Section 103 of the Atomic Energy Act of 1954, as amended, and part 52 of title 10 of the *Code of Federal Regulations* (10 CFR), ''Licenses, Certifications, and Approvals for Nuclear Power Plants.'' Through the Application, which is currently under review by the NRC staff, the Applicant seeks to construct and operate an Economic Simplified Boiling-Water Reactor at the North Anna Power Station, which is located in Louisa County, Virginia. An applicant may seek a COL in accordance with subpart C of 10 CFR part 52. The information submitted by the applicant includes certain administrative information, such as financial qualifications submitted pursuant to 10 CFR 52.77, as well as technical information submitted pursuant to 10 CFR 52.79. These notices are being provided in accordance with the requirements in 10 CFR 50.43(a)(3).

Dated at Rockville, Maryland, this 21th day of April, 2016.

For the Nuclear Regulatory Commission.

Ronaldo Jenkins,

Chief, Licensing Branch 3, Division of New Reactor Licensing, Office of New Reactors.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–389; NRC–2016–0085]

Florida Power & Light Company; St. Lucie Plant, Unit No. 2

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing an exemption in response to a December 30, 2014, request from Florida Power & Light Company for the use of a different fuel rod cladding material (AREVA M5®).

ADDRESSES: Please refer to Docket ID NRC–2016–0085 when contacting the NRC about the availability of information regarding this document. You may obtain publicly-available information related to this document using any of the following methods:

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2016–0085. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents*'' and then select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *NRC's PDR:*You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Perry H. Buckberg; telephone: 301–415–1383; email: *Perry.Buckberg@nrc.gov*; or Robert L. Gladney; telephone: 301–415–1022; email: *Robert.Gladney@nrc.gov.* Both are staff of the Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

I. Background

Florida Power & Light Company (the licensee) is the holder of Renewed Facility Operating License No. NPF–16, which authorizes operation of the St. Lucie Plant, Unit No. 2 (PSL–2). The license provides, among other things, that the facility is subject to all rules, regulations, and orders of the NRC now or hereafter in effect. The facility consists of a pressurized-water reactor (PWR) located in St. Lucie County, Florida.

II. Request/Action

Pursuant to § 50.12, ''Specific exemptions,'' of title 10 of the *Code of Federal Regulations* (10 CFR), the licensee, by letter dated December 30, 2014 (ADAMS Accession No. ML15002A091), requested an exemption from the requirements of 10 CFR 50.46, ''Acceptance criteria for emergency core cooling systems [ECCS] for light-water nuclear power reactors,'' and 10 CFR part 50, Appendix K, ''ECCS Evaluation Models,'' to allow the use of fuel rods clad with the AREVA M5® zirconium alloy in future core reload applications for PSL–2. The regulations in 10 CFR 50.46 contain acceptance criteria for the ECCS for reactors fueled with Zircaloy or ZIRLO™ fuel rod cladding material. In addition, Appendix K to 10 CFR part 50 requires that the Baker-Just equation be used to predict the rates of energy release, hydrogen concentration, and cladding oxidation from the metal-water reaction. The Baker-Just equation assumes the use of a zirconium alloy, which is a material different from the M5® zirconium alloy. The licensee requested the exemption because these regulations do not have provisions for the use of fuel rods clad in a material other than Zircaloy or ZIRLO™. Since the material designations of M5® zirconium alloy are different from the designations for Zircaloy or ZIRLO™, a plant-specific exemption is required to support the reload applications for PSL–2.

The exemption request relates solely to the cladding material specified in these regulations (*i.e.,* fuel rods with Zircaloy or ZIRLO™ cladding material). In its letter dated December 30, 2014, the licensee stated that this exemption was requested in order, ''to allow the use of a zirconium alloy other than Zircaloy or [ZIRLO™] for fuel cladding material at St. Lucie Unit 2.'' This exemption would provide for the application of the acceptance criteria of 10 CFR 50.46 and Appendix K to 10 CFR part 50 to fuel assembly designs using M5® zirconium alloy fuel rod cladding material.

In addition to the exemption request in the letter dated December 30, 2014, the licensee also requested an amendment to revise the Technical Specifications (TSs) to allow for the use of AREVA fuel at PSL–2. The NRC staff has addressed the requested amendment in separate correspondence dated April 19, 2016 (ADAMS Accession No. ML16063A121).

III. Discussion

Pursuant to 10 CFR 50.12, the Commission may, upon application by any interested person, grant exemptions from the requirements of 10 CFR part 50, which are authorized by law, will not present an undue risk to the public health and safety, and are consistent with the common defense and security. Paragraph (a)(2)(ii) of 10 CFR 50.12 states that the Commission will not consider granting an exemption unless special circumstances are present, such as when application of the regulation in the particular circumstance is not necessary to achieve the underlying purpose of the rule.

A. Special Circumstances

Special circumstances, in accordance with 10 CFR 50.12(a)(2)(ii), are present whenever application of the regulation in the particular circumstances is not necessary to achieve the underlying purpose of the rule. The underlying purpose of 10 CFR 50.46 and Appendix K to 10 CFR part 50 is to establish acceptance criteria for ECCS performance. The regulations in 10 CFR 50.46 and Appendix K are not directly applicable to M5® cladding material because the M5® cladding material is not specified in 10 CFR 50.46 or presumed in the Baker-Just equation required by paragraph I.A.5 of 10 CFR part 50, Appendix K. The evaluations described in the following sections of this exemption, however, show that the intent of the regulation is met in that subject to certain conditions, the acceptance criteria are valid for M5® zirconium-based alloy cladding, the material is less susceptible to embrittlement, and the Baker-Just equation conservatively bounds scenarios following a loss-of-coolant accident (LOCA) for rods with M5® cladding material. Thus, a strict application of the rule (which would preclude the applicability of ECCS performance acceptance criteria to, and the use of, M5® clad fuel rods) is not necessary to achieve the underlying purposes of 10 CFR 50.46 and Appendix K of 10 CFR part 50. The purpose of these regulations is achieved through the application of the requirements for the use of M5® fuel rod cladding material. Therefore, the special circumstances required by 10 CFR 50.12(a)(2)(ii) for the granting of an exemption exist.

B. The Exemption Is Authorized by Law

This exemption would allow the use of fuel rods clad with the AREVA M5® fuel rod cladding material in future core reload applications for PSL–2. Section 50.12 of 10 CFR allows the NRC to grant exemptions from the requirements of 10 CFR part 50 provided that special circumstances are present. The NRC staff determined that granting the licensee's proposed exemption would not result in a violation of the Atomic Energy Act of 1954, as amended, or the Commission's regulations. Therefore, the exemption is authorized by law.

C. The Exemption Presents No Undue Risk to Public Health and Safety

Section 50.46 of 10 CFR requires that each boiling or pressurized light-water nuclear power reactor fueled with uranium oxide pellets within cylindrical Zircaloy or ZIRLO™ cladding must be provided with an ECCS that must be designed so that its calculated cooling performance following postulated LOCAs conforms to the criteria set forth in paragraph (b) of that section. The underlying purpose of 10 CFR 50.46 is to establish acceptance criteria for adequate ECCS performance at nuclear reactors.

Framatome Cogema Fuels (AREVA) submitted topical report BAW–10227P–A, Revision 0, ''Evaluation of Advanced Cladding and Structural Material (M5®) in PWR Reactor Fuel,'' to the NRC for review and approval by letter dated September 30, 1997. The NRC staff documented its approval of BAW–10227P–A, Revision 0 in a safety evaluation (SE) dated February 4, 2000 (ADAMS Accession No. ML003681490) and concluded that 10 CFR 50.46 and 10 CFR part 50, Appendix K criteria are applicable to M5® fuel cladding, subject to compliance with specified burnup conditions. The NRC-accepted version of BAW–10227P–A, Revision 0 was submitted to the NRC by letter dated February 11, 2000 (ADAMS Accession No. ML003685828). BAW–10227P–A, Revision 1, dated June 2003, as noted by letter dated April 19, 2004 (ADAMS Accession No. ML15162B047), is a subsequent revision to BAW–10227P–A, Revision 0 and incorporated the portion of the NRC's approval provided in the NRC SE for BAW–10186P–A, Revision 1, Supplement 1, ''Extended Burnup Evaluation,'' dated June 18, 2003 (ADAMS Accession No. ML031700090), in which the applicable restrictions on burnup were removed. Additionally, in

an SE dated May 5, 2004 (ADAMS Accession No. ML041260560), the NRC staff approved topical report BAW–10240(P), ''Incorporation of M5 Properties in Framatome ANP [AREVA] Approved Methods,'' which further addressed M5® material properties with respect to LOCA applications and included specified conditions.

The specific conditions that address the use of M5® under approved methods that were provided in the SE for BAW–10240(P) are: (1) The corrosion limit, as predicted by the best-estimate model, will remain below 100 microns for all locations of the fuel; (2) all of the conditions listed in the NRC SEs for all AREVA methodologies used for M5® fuel analysis will continue to be met; (3) all AREVA methodologies will be used only within the range for which M5® data was acceptable and for which the verifications discussed in the applicable topical reports were performed; and (4) the burnup limit for implementation of M5® is 62 gigawatt-days per metric ton uranium metal (GWd/MTU). The staff determined that the licensee has satisfied these conditions. The corrosion limit stated in condition (1) is verified by the licensee for each reload as required by TS 6.9.1.11, ''Core Operating Limits Report (COLR).'' The conditions from NRC-approved SEs stated in condition (2) are incorporated as restrictions in AREVA design procedures and guidelines that will control the core reload designs for PSL–2, which are also verified for each reload as required by the COLR. The restrictions on the use of AREVA methodologies stated as condition (3) are also incorporated as restrictions in AREVA design procedures and guidelines that will control the core reload designs for PSL–2, which are also verified for each reload as required by the COLR. Finally, the burnup limit stated in condition (4) is currently part of AREVA's design processes (as stated by the licensee), and is also verified as part of the cycle-specific reload analysis as required by the COLR.

In the exemption granted for PSL, Unit No. 1, for the application and use of AREVA M5® fuel rod cladding material, dated March 31, 2014 (ADAMS Accession No. ML14064A125), the NRC staff described the applicable results from the LOCA research program completed at the Argonne National Laboratory. The results showed that cladding corrosion and associated hydrogen pickup had a significant impact on post-quench ductility. The research also provided further evidence of favorable corrosion and hydrogen pickup characteristics of M5® as compared with standard Zircaloy and that, due to its favorable hydrogen pickup, fuel rods with M5® zirconium-based alloy cladding are less susceptible to hydrogen-enhanced beta layer embrittlement, a new embrittlement mechanism. In addition, the exemption documented that the 10 CFR 50.46(b) acceptance criteria (*i.e.,* 2200 degrees Fahrenheit and 17-percent equivalent cladding reacted) remain conservative up to the current burnup limit of 62 GWd/MTU and that the acceptance criteria within 10 CFR 50.46 remain valid for the M5® alloy material. As a result, the NRC staff found that the underlying purpose of the rule—to maintain a degree of post-quench ductility in the fuel cladding material through ECCS performance criteria—would be met if an exemption were granted to allow those criteria to apply to M5® clad fuel. This conclusion remains valid for an exemption for PSL–2 for the application and use of AREVA M5® fuel rod cladding material.

In addition, as stated by the licensee in its application, ''FPL [Florida Power & Light Company], in conjunction with AREVA NP Inc. (AREVA), will utilize NRC[-]approved methods for the reload design process, for PSL–2 reload cores containing M5® fuel rod cladding, to ensure safety analysis limits are met for operation within the operating limits specified in the Technical Specifications.'' The licensee also stated that it will ''ensure compliance with the respective acceptance criteria'' and that ''the intent of 10 CFR 50.46 and 10 CFR 50, Appendix K will continue to be satisfied.'' Therefore, for the reasons stated above, granting the exemption request will ensure that the underlying purpose of the rule is achieved for PSL–2.

Paragraph I.A.5 of Appendix K to 10 CFR part 50 states that the rate of energy release, hydrogen concentration, and cladding oxidation from the metal-water reaction shall be calculated using the Baker-Just equation. The approved AREVA topical reports show that due to the similarities in the chemical composition of the advanced zirconium-based M5® alloy and Zircaloy, the application of the Baker-Just equation in the analysis of the M5® clad fuel rods will continue to conservatively bound all post-LOCA scenarios. For the reasons stated above, granting the exemption request will ensure that the Baker-Just equation can be applied to M5® clad fuel and that the underlying purpose of the rule is achieved for PSL–2.

Based upon results of metal-water reaction testing and mechanical testing, which ensure the applicability of 10 CFR 50.46 acceptance criteria and 10 CFR part 50, Appendix K, methods, the NRC staff finds it acceptable to grant an exemption from the requirements of 10 CFR 50.46 and Appendix K to 10 CFR part 50 to allow these regulations to apply to, and enable the use of, fuel rods with M5® zirconium-based alloy at PSL–2. Therefore, the exemption presents no undue risk to public health and safety.

D. The Exemption Is Consistent With the Common Defense and Security

The licensee's exemption request is only to allow the application of the aforementioned regulations to an improved fuel rod cladding material. In its letter dated December 30, 2014, the licensee stated that all the requirements and acceptance criteria will be maintained and that it would continue to handle and control special nuclear material in the fuel product in accordance with its approved procedures. This change to the reactor core internals is adequately controlled by NRC requirements and is not related to security issues. Therefore, the NRC staff has determined that this exemption does not impact common defense and security and is consistent with the common defense and security.

E. Environmental Considerations

The NRC staff determined that the exemption discussed herein meets the eligibility criteria for the categorical exclusion set forth in 10 CFR 51.22(c)(9) because it is related to a requirement concerning the installation or use of a facility component located within the restricted area, as defined in 10 CFR part 20, and the granting of this exemption involves: (i) No significant hazards consideration, (ii) no significant change in the types or a significant increase in the amounts of any effluents that may be released offsite, and (iii) no significant increase in individual or cumulative occupational radiation exposure. Therefore, in accordance with 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the NRC's consideration of this exemption request. The basis for the NRC staff's determination is discussed as follows with an evaluation against each of the requirements in 10 CFR 51.22(c)(9)(i)–(iii).

Requirements in 10 CFR 51.22(c)(9)(i)

The NRC staff evaluated the issue of no significant hazards consideration, using the standards described in 10 CFR 50.92(c), as presented below:

1. Does the proposed exemption involve a significant increase in the

probability or consequences of an accident previously evaluated?

The proposed changes for PSL–2 revise TS 5.3.1 to include M5® cladding, delete the linear heat rate surveillance requirement with W(z) in TS 4.2.1.3, and include previously approved AREVA topical reports in the list of COLR methodologies in TS 6.9.1.11. [Another] change is in TS License Condition 3.N, which is related to future analysis of the current fuel and is considered an administrative change, all as a result of changing the fuel supplier.

The fuel assembly design is not an initiator to any accident previously evaluated. Therefore, there is no significant increase in the probability of any accident previously evaluated. However, the fuel design parameters and the correlations used in the analyses supporting the operation of PSL–2 with the new proposed AREVA fuel are dependent on the fuel assembly design. All the analyses, potentially impacted by the fuel design, have been re-analyzed using the correlations and the methodology applicable to the proposed fuel design and previously approved by the NRC for similar applications. There are no changes to any limits specified in the TSs. M5® cladding to be used in the proposed AREVA fuel design has been previously approved by the NRC for PWR applications, including the St. Lucie Plant, Unit No. 1. The core design peaking factors remain unchanged from the current analyses values, except for the large break LOCA, which is shown to meet all the 10 CFR 50.46 criteria with the increased peak linear heat rate limit.

Therefore, the proposed changes do not involve a significant increase in the probability or consequences of an accident previously evaluated.

2. Does the proposed exemption create the possibility of a new or different kind of accident from any accident previously evaluated?

No new or different accidents result from utilizing the proposed AREVA CE [Combustion Engineering] 16x16 fuel design [and M5® cladding]. Other than the fuel design change, the proposed exemption does not involve a physical alteration of the plant or plant systems (*i.e.,* no new or different type of equipment will be installed which would create a new or different kind of accident). The change to the linear heat rate surveillance requirement, when operating on excore detector monitoring system, and the use of M5® cladding do not affect or create any accident initiator. There is no change to the methods governing normal plant operation and the changes do not impose any new or different operating requirements. The core monitoring system remains unchanged.

Therefore, the proposed change does not create the possibility of a new or different kind of accident from any accident previously evaluated.

3. Does the proposed exemption involve a significant reduction in a margin of safety?

The changes proposed in this exemption are related to the fuel design with M5® cladding and the methodology supporting the analysis of accidents impacted by the fuel design change. The analysis methods used are previously approved by the NRC for similar applications. The change to the surveillance requirement for the linear heat rate does not change any accident analysis requirements. The fuel design limits related to the DNBR [departure from nucleate boiling ratio] and fuel centerline melt remain consistent with the limits previously approved for the proposed fuel design change. The overpressure limits for the reactor coolant system integrity and the containment integrity remain unchanged. All of the analyses performed to support the fuel design change meet all applicable acceptance criteria. The LOCA analyses, with the peak linear heat rate limit increase, continue to meet all of the applicable 10 CFR 50.46 acceptance criteria, and thus the proposed changes do not affect margin of safety for any accidents previously evaluated.

Therefore, the proposed changes do not involve a significant reduction in a margin of safety.

Based on the above, the NRC staff concludes that the proposed exemption presents no significant hazards consideration under the standards set forth in 10 CFR 50.92(c), and, accordingly, a finding of no significant hazards consideration is justified.

Requirements in 10 CFR 51.22(c)(9)(ii)

The proposed exemption would allow the use of M5® fuel rod cladding material in the PSL–2 reactor. M5® has essentially the same properties as the currently licensed Zircaloy fuel rod cladding. The use of the M5® fuel rod cladding material will not significantly change the types of effluents that may be released offsite, or significantly increase the amount of effluents that may be released offsite. Therefore, the provisions of 10 CFR 51.22(c)(9)(ii) are satisfied.

Requirements in 10 CFR 51.22(c)(9)(iii)

The proposed exemption would allow the use of the M5® fuel rod cladding material in the PSL–2 reactor core. M5® has essentially the same properties as the currently used Zircaloy cladding. The use of the M5® fuel rod cladding material will not significantly increase individual occupational radiation exposure, or significantly increase cumulative occupational radiation exposure. Therefore, the provisions of 10 CFR 51.22(c)(9)(iii) are satisfied.

IV. Conclusions

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, the exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Also, special circumstances, as required by 10 CFR 50.12(a)(2)(ii), are present. Therefore, the Commission hereby grants the licensee an exemption from the requirements of 10 CFR 50.46 and Appendix K to 10 CFR part 50, to allow the use of M5® fuel rod cladding material at PSL–2.

This exemption is effective upon issuance.

Dated at Rockville, Maryland, this 19th of April, 2016.

For the Nuclear Regulatory Commission.

Anne T. Boland,

Director, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2016–123 and CP2016–156; Order No. 3255]

New Postal Product

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing concerning the addition of Priority Mail Contract 208 to the competitive product list. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* April 28, 2016.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

In accordance with 39 U.S.C. 3642 and 39 CFR 3020.30-.35, the Postal Service filed a formal request and associated supporting information to add Priority Mail Contract 208 to the competitive product list.[1]

The Postal Service contemporaneously filed a redacted contract related to the proposed new product under 39 U.S.C. 3632(b)(3) and 39 CFR 3015.5. Request, Attachment B.

To support its Request, the Postal Service filed a copy of the contract, a copy of the Governors' Decision authorizing the product, proposed changes to the Mail Classification Schedule, a Statement of Supporting Justification, a certification of compliance with 39 U.S.C. 3633(a), and an application for non-public treatment of certain materials. It also filed supporting financial workpapers.

II. Notice of Commission Action

The Commission establishes Docket Nos. MC2016–123 and CP2016–156 to consider the Request pertaining to the proposed Priority Mail Contract 208 product and the related contract, respectively.

The Commission invites comments on whether the Postal Service's filings in the captioned dockets are consistent with the policies of 39 U.S.C. 3632, 3633, or 3642, 39 CFR part 3015, and 39 CFR part 3020, subpart B. Comments are due no later than April 28, 2016. The public portions of these filings can be accessed via the Commission's Web site (*http://www.prc.gov*).

The Commission appoints Christopher C. Mohr to serve as Public Representative in these dockets.

III. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket Nos. MC2016–123 and CP2016–156 to consider the matters raised in each docket.

2. Pursuant to 39 U.S.C. 505, Christopher C. Mohr is appointed to serve as an officer of the Commission to represent the interests of the general public in these proceedings (Public Representative).

3. Comments are due no later than April 28, 2016.

4. The Secretary shall arrange for publication of this order in the **Federal Register**.

By the Commission.

Stacy L. Ruble,

Secretary.

BILLING CODE 7710–FW–P

RAILROAD RETIREMENT BOARD

Proposed Collection; Comment Request

Summary: In accordance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 which provides opportunity for public comment on new or revised data collections, the Railroad Retirement Board (RRB) will publish periodic summaries of proposed data collections.

Comments are invited on: (a) Whether the proposed information collection is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the RRB's estimate of the burden of the collection of the information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden related to the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

1. Title and purpose of information collection: Evidence of Marital Relationship, Living with Requirements; OMB 3220–0021.

To support an application for a spouse or widow(er)'s annuity under Sections 2(c) or 2(d) of the Railroad Retirement Act, an applicant must submit proof of a valid marriage to a railroad employee. In some cases, the existence of a marital relationship is not formalized by a civil or religious ceremony. In other cases, questions may arise about the legal termination of a prior marriage of the employee, spouse, or widow(er). In these instances, the RRB must secure additional information to resolve questionable marital relationships. The circumstances requiring an applicant to submit documentary evidence of marriage are prescribed in 20 CFR 219.30.

In the absence of documentary evidence, the RRB needs to determine if a valid marriage existed between a spouse or widow(er) annuity applicant and a railroad employee. The RRB utilizes Forms G–124, Individual Statement of Marital Relationship; G–124a, Certification of Marriage Information; G–237, Statement Regarding Marital Status; G–238, Statement of Residence; and G–238a, Statement Regarding Divorce or Annulment, to secure the needed information. One response is requested of each respondent. Completion is required to obtain benefits. The RRB proposes minor non-burden impacting changes to the forms in the collection.

ESTIMATE OF ANNUAL RESPONDENT BURDEN

Form number	Annual responses	Time (minutes)	Burden (hours)
G–124 (in person)	125	15	31
G–124 (by mail)	75	20	25
G–124a	300	10	50
G–237 (in person)	75	15	19
G–237 (by mail)	75	20	25
G–238 (in person)	150	3	8
G–238 (by mail)	150	5	13
G–238a	150	10	25
Total	1,100		196

* Forms G–124, G–237, G–238, and G–238a can be completed either with assistance from RRB personnel during an in-office interview or by mail.

[1] Request of the United States Postal Service to Add Priority Mail Contract 208 to Competitive Product List and Notice of Filing (Under Seal) of Unredacted Governors' Decision, Contract, and Supporting Data, April 20, 2016 (Request).

2. Title and purpose of information collection: Voluntary Customer Surveys in Accordance with E.O. 12862; OMB 3220–0192.

In accordance with Executive Order 12862, the Railroad Retirement Board (RRB) conducts a number of customer surveys designed to determine the kinds and quality of services our beneficiaries, claimants, employers and members of the public want and expect, as well as their satisfaction with existing RRB services. The information collected is used by RRB management to monitor customer satisfaction by determining to what extent services are satisfactory and where and to what extent services can be improved. The surveys are limited to data collections that solicit strictly voluntary opinions, and do not collect information which is required or regulated. The information collection, which was first approved by the Office of Management and Budget (OMB) in 1997, provides the RRB with a generic clearance authority. This generic authority allows the RRB to submit a variety of new or revised customer survey instruments (needed to timely implement customer monitoring activities) to the Office of Management and Budget (OMB) for expedited review and approval.

The average burden per response for customer satisfaction activities is estimated to range from 2 minutes for a Web site questionnaire to 2 hours for participation in a focus group. The RRB estimates an annual burden of 1,620 annual respondents totaling 731 hours for the generic customer survey clearance.

Additional Information or Comments: To request more information or to obtain a copy of the information collection justification, forms, and/or supporting material, contact Dana Hickman at (312) 751–4981 or *Dana.Hickman@RRB.GOV.* Comments regarding the information collection should be addressed to Charles Mierzwa, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611–2092 or emailed to *Charles.Mierzwa@RRB.GOV.* Written comments should be received within 60 days of this notice.

Charles Mierzwa,

Chief of Information Resources Management.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–77680; File No. SR–NYSEMKT–2016–17]

Self-Regulatory Organizations; NYSE MKT LLC; Order Approving a Proposed Rule Change, as Modified by Amendment No. 1, To Establish Procedures for the Allocation of Cages to Co-Located Users, Including the Waiver of Certain Fees, and To Amend the Visitor Security Escort Fee

April 21, 2016.

I. Introduction

On February 23, 2016 NYSE MKT LLC (''the Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to establish procedures for the allocation of cages to co-located Users, including the waiver of certain fees, and to amend the visitor security escort fee. On March 1, 2016, the Exchange filed Amendment No. 1 to the proposed rule change. The proposed rule change, as modified by Amendment No. 1, was published for comment in the **Federal Register** on March 11, 2016.[3] There were no comments on the proposed rule change. This order approves the proposed rule change, as modified by Amendment No. 1.

II. Background and Description of the Proposal, as Modified by Amendment No. 1

The Exchange proposes to establish procedures for the allocation of cages to its co-located Users,[4] including the waiver of certain fees subject to specified conditions, and to amend the visitor security escort fee.[5] The Exchange proposes to amend the NYSE MKT Equities Price List (''Price List'') and the NYSE Amex Options Fee Schedule (''Fee Schedule'') to reflect the changes.[6]

As more fully set forth in the Notice, the Exchange offers Users the ability to rent cages to house their cabinets in the Data Center,[7] and historically has offered these cages on a first come/first serve basis.[8] The Exchange states that a cage typically is purchased by a User that has several cabinets within the Data Center and wishes to arrange its cabinets contiguously while also enhancing privacy around its cabinets.[9] The Exchange offers three cage sizes, corresponding to the number of cabinets housed therein, and charges fees for the cages based on the size.[10] The physical footprint of each cage is greater than that of the cabinets that it houses, as each cage is constructed so as to include aisles around the purchasing User's cabinets, for accessibility and to comply with safety regulations.[11] In order to offer the cages, the Exchange must have sufficient contiguous open space available for the cage.[12]

In 2015, the Exchange determined that to continue to be able to meet its obligation to accommodate demand, and in particular to make available more contiguous, larger spaces for new and existing Users, it would exercise its right to move some Users' equipment within the Data Center (the ''Migration'').[13] The Exchange established procedures to manage the Migration process, and continues to implement them.[14] The Exchange states that, notwithstanding the Migration, contiguous open space will still be limited, and may become more limited over time.[15]

Proposed Cage Allocation Procedure

The Exchange has proposed to establish procedures governing the allocation of cages should the currently available open contiguous space in the Data Center be insufficient to house a new cage or if the open contiguous

[3] *See* Securities Exchange Act Release No. 34–77304 (March 7, 2016), 81 FR 12981 (''Notice''). Amendment No.1 was included in the Notice and provided certain clarifications, including that that the proposed waiver of fees for two bundles of 24 cross connects, applicable while a User is on the waitlist, would only apply to cross-connects used to connect an individual User's non-contiguous cabinets.

[4] For purposes of the Exchange's co-location services, a ''User'' means any market participant that requests to receive co-location services directly from the Exchange. The Exchange provides co-location services to Users from its data center (''Data Center'') in Mahwah, New Jersey.

[15] *See* Notice, 81 FR at 12982.

space available is sufficiently limited such that the Exchange cannot both provide new cages and satisfy all User demand for other co-location services.[16] Specifically, the Exchange proposes that it will place Users seeking new cages on a waitlist: (1) The order of Users on the list will be based on the date the Exchange receives signed orders for the cages from each User; (2) once the list is established, Users, on a rolling basis, will be allocated a cage each time one becomes available; (3) if a cage becomes available and the User that is at the top of the waitlist turns it down because it requested a different size, that User will remain on the waitlist and the cage will be offered to the next User on the list, in order, until a User accepts it; (4) a User that turns down a cage that is the size that it requested will be removed from the waitlist; and (5) if a User requests two cages, that User will be moved to the bottom of the waitlist upon the receipt of its first cage.[17]

In connection with the proposed waitlist procedures, the Exchange further proposes to add General Note 3 to the Price List and Fee Schedule,[18] to provide that the Exchange would, subject to specified conditions, waive the initial and monthly fee for two bundles of 24 cross connects between a User's non-contiguous cabinets while it is on the waitlist.[19] Specifically, the initial and monthly charge for two bundles of 24 cross connects will be waived for a User that is waitlisted for a cage for the duration of the waitlist period, provided that the cross connects may only be used to connect the User's non-contiguous cabinets.[20] The charge will no longer be waived once a User is removed from the waitlist.[21] In addition, a User that is removed from the waitlist but subsequently requests a cage will be added back to the bottom of the waitlist, provided that, if the User was removed from the waitlist because it turned down a cage that is the size that it requested, it will not receive a second waiver of the charge.[22]

Visitor Security Escorts

The Exchange also proposes to amend its visitor security escort fee. Currently, a User visiting its cabinet(s) in the Data Center is required to pay a $75/hour fee for a security escort.[23] The Exchange proposes to eliminate this fee for Users visiting their own cage in the Data Center,[24] and change the fee for those not visiting their own cage from $75/hour to $75/visit.[25] The Exchange states that a security escort is not needed when a User visits its own cage because that User would have access only to its own cabinets locked within its own cage,[26] and that User will not have access to the cabinets of other Users or Exchange equipment, which are locked as well.[27]

III. Discussion and Commission Findings

After careful review and consideration of the Exchange's proposal, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[28] In particular, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with Section 6(b)(4) of the Act,[29] which requires that the rules of a national securities exchange provide for the equitable allocation of reasonable dues, fees and other charges among its members and issuers and other persons using its facilities, and with Section 6(b)(5) of the Act,[30] which requires, among other things, that the rules of a national securities exchange be designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest, and not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Commission believes that the proposed procedures for the allocation of cages to its co-located Users and associated waiver of fees subject to specified conditions are consistent with Sections 6(b)(4) and 6(b)(5) of the Act. In particular, the Commission believes that the proposed cage allocation and waitlist procedures are reasonably designed to assist the Exchange in offering cages to current and future Users in the Data Center on terms that are equitable and not unfairly discriminatory in the event that available open contiguous space in the Data Center is not sufficient to house a newly requested cage or sufficiently limited that the Exchange cannot both provide new cages and satisfy all User demand for other co-location services. The Commission further believes that the proposal to waive the initial and monthly fee for two bundles of 24 cross connects between a User's non-contiguous cabinets while a User is on the waitlist is consistent with the Act. Users can qualify for the fee waiver by requesting a cage and being placed on the waitlist until a cage becomes available to them. Once the Exchange offers the requested size cage to a User through the allocation procedure or when a User is removed from the waitlist, the fee would no longer be waived. In addition, if a User was removed from the waitlist because it turned down a cage that was the size that it requested, it would not receive a second waiver of the charge. The Commission believes that the proposed fee waiver and associated conditions are reasonably designed to alleviate the inconvenience for waitlisted Users of having cabinets in non-contiguous spaces by removing the cost that those Users would otherwise avoid if a cage were available.

The Commission also finds the proposed amendments to the visitor security escort fee consistent with Sections 6(b)(4) and 6(b)(5) of the Act. The Exchange represents that a security escort is not needed when a User visits its own cage because that User would have access only to its own cabinets locked within its own cage,[31] and will not have access to the cabinets of other Users or Exchange equipment, which are locked as well.[32] In addition, the proposed rate of $75/visit for the visitor security escort would be a fee reduction for any visit that lasted more than an hour, and so it would reduce the burden placed on Users that remain subject to the fee. Therefore, the Commission finds the proposed amendments to the visitor security escort fee to be reasonable, equitable, and not unfairly discriminatory.

For the foregoing reasons, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with the Act.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–77676; File No. SR–NYSEMKT–2016–31]

Self-Regulatory Organizations; NYSE MKT LLC; Notice of Designation of Longer Period for Commission Action on Proposed Rule Change Amending Rule 123C–Equities To Provide for How the Exchange Would Determine an Official Closing Price if the Exchange is Unable To Conduct a Closing Transaction

April 21, 2016.

On February 25, 2016, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend Rule 123C—Equities to provide for how the Exchange would determine an Official Closing Price if the Exchange is unable to conduct a closing transaction. The proposed rule change was published for comment in the **Federal Register** on March 11, 2016.[3] The Commission has received no comment letters on the proposal.[4]

Section 19(b)(2) of the Act [5] provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day for this filing is April 25, 2016.

The Commission is extending the 45-day time period for Commission action on the proposed rule change. The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider and take action on the Exchange's proposed rule change.

Accordingly, pursuant to section 19(b)(2)(A)(ii)(I) of the Act [6] and for the reasons stated above, the Commission designates June 9, 2016, as the date by which the Commission should either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR–NYSEMKT–2016–31).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[7]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–77677; File No. SR–NYSE–2016–18]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Designation of Longer Period for Commission Action on Proposed Rule Change Amending Rule 123C To Provide for How the Exchange Would Determine an Official Closing Price if the Exchange is Unable To Conduct a Closing Transaction

April 21, 2016.

On February 25, 2016, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend Rule 123C to provide for how the Exchange would determine an Official Closing Price if the Exchange is unable to conduct a closing transaction. The proposed rule change was published for comment in the **Federal Register** on March 11, 2016.[3] The Commission has received one comment letter on the proposal.[4]

Section 19(b)(2) of the Act [5] provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day for this filing is April 25, 2016.

The Commission is extending the 45-day time period for Commission action on the proposed rule change. The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider and take action on the Exchange's proposed rule change.

Accordingly, pursuant to section 19(b)(2)(A)(ii)(I) of the Act [6] and for the reasons stated above, the Commission designates June 9, 2016, as the date by which the Commission should either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR–NYSE–2016–18).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[7]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–77679; File No. 4–631]

Joint Industry Plan; Order Approving the Tenth Amendment to the National Market System Plan to Address Extraordinary Market Volatility by Bats BZX Exchange, Inc., Bats BYX Exchange, Inc., Chicago Stock Exchange, Inc., Bats EDGA Exchange, Inc., Bats EDGX Exchange, Inc., Financial Industry Regulatory Authority, Inc., NASDAQ BX, Inc., NASDAQ PHLX LLC, The Nasdaq Stock Market LLC, National Stock Exchange, Inc., New York Stock Exchange LLC, NYSE MKT LLC, and NYSE Arca, Inc.

April 21, 2016.

I. Introduction

On February 19, 2016, Nasdaq, Inc., on behalf of the other parties [1] to the National Market System Plan to Address Extraordinary Market Volatility (the ''Plan''), filed with the Securities and Exchange Commission (''Commission'') pursuant to Section 11A of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 608 thereunder,[3] a proposal to amend the Plan.[4] The proposal represents the tenth amendment to the Plan, and reflects proposed changes unanimously approved by the Participants (''Tenth Amendment''). The proposed Tenth Amendment was published for comment in the **Federal Register** on February 29, 2016.[5] The Commission received no comment letters regarding the amendment. This order approves the Tenth Amendment to the Plan.

II. Description of the Proposal

In the Tenth Amendment, the Participants propose to extend the pilot period of the Plan from April 22, 2016 to April 21, 2017 and make one modification to improve the operation of the Plan. Specifically, the Participants propose to modify the definition of Opening Price [6] in cases where the Primary Listing Exchange opens with quotations. Currently, the Opening Price for NMS Stocks that open on the Primary Listing Exchange with quotations is defined to be the midpoint of those quotations. The Participants propose to modify the definition of Opening Price in these circumstances to be the closing price of the NMS Stock on the Primary Listing Exchange on the previous trading day, or if no such closing price exists, the last sale on the Primary Listing Exchange reported by the SIP. The Opening Price is used under the Plan to determine the first Reference Price of the day.[7]

III. Discussion and Commission Findings

The Commission finds that the Tenth Amendment is consistent with the requirements of the Act and the rules and regulations thereunder. Specifically, the Commission finds that the Tenth Amendment is consistent with Section 11A of the Act [8] and Rule 608 thereunder [9] in that it is appropriate in the public interest, for the protection of investors and the maintenance of fair and orderly markets, and that it removes impediments to, and perfects the mechanism of, a national market system.

The Participants presented data in the Transmittal Letter and the Supplemental Joint Assessment [10] that shows that use of the Primary Listing Exchange's midpoint of the bid and ask often results in what the Participants believe is a skewed initial Reference Price.[11] The Participants also presented data that showed that most Trading Pauses occurred in securities that did not trade at or near the time of a Trading Pause (*i.e.,* those securities that opened on the midpoint of the bid and ask on the Primary Listing Exchange).[12] The Participants performed a back-testing analysis to determine the impact on Trading Pauses if the first Reference Price for the day was determined by using the Primary Listing Exchange's closing price instead of the midpoint of the Exchange's bid and ask.[13]

Based on their data, the Participants found that the majority of Trading Pauses could have been avoided if the previous day's closing price was used as the first Reference Price rather than the midpoint of the bid and ask for stocks that opened without transactions.[14] Therefore, the Participants recommend modifying the Plan to amend the definition of Opening Price so that the first Reference Price when there is no opening transaction is the Primary Listing Exchange's previous day's closing price.

The Commission believes that it is appropriate in the public interest, for the protection of investors and the maintenance of a fair and orderly market to approve the amendment to modify the definition of Opening Price. The Commission believes that the modification of the Opening Price definition is appropriate to potentially prevent Trading Pauses that are not indicative of extraordinary volatility.[15]

The Participants also propose to amend Section VIII(C) of the Plan to extend the pilot period through April 21, 2017. The Commission believes that it is appropriate in the public interest, for the protection of investors and the maintenance of a fair and orderly market to approve the amendment to extend the pilot period until April 21, 2017 because it will allow the Participants to conduct, and the Commission to consider, further analysis of data, including data related to the impact of the revised definition of Opening Price, regarding the operation of the Plan. An extension of the pilot period also will allow the Participants to finalize and file with the Commission any proposed amendments to the Plan resulting from such further analysis.

The Commission understands the Participants are conducting additional review of certain aspects of the operation of the Plan and expects that

---

[1] Nasdaq, Inc. filed on behalf of the following parties to the Plan: Bats BZX Exchange, Inc., Bats BYX Exchange, Inc., Chicago Stock Exchange, Inc., Bats EDGA Exchange, Inc., Bats EDGX Exchange, Inc., Financial Industry Regulatory Authority, Inc., NASDAQ BX, Inc., NASDAQ PHLX LLC, the Nasdaq Stock Market LLC, National Stock Exchange, Inc., the New York Stock Exchange LLC, NYSE MKT LLC, and NYSE Arca, Inc. (collectively, the ''Participants'').

[5] *See* Securities Exchange Act Release No. 77205 (February 22, 2016), 81 FR 10315 (''Notice'').

[6] Unless otherwise specified, the terms used herein have the same meaning as set forth in the Plan.

[7] Section V(B)(1) of the Plan provides that the first Reference Price for a Trading Day shall be the Opening Price on the Primary Listing Exchange in an NMS Stock if such Opening Price occurs less than five minutes after the start of Regular Trading Hours.

[8] 15 U.S.C. 78k–1.

[9] 17 CFR 242.608.

[10] On May 28, 2015, the Participants submitted a Supplemental Joint Assessment, as required under the Plan. The Supplemental Joint Assessment is available on the SEC Web site at *http://www.sec.gov/comments/4-631/4631-39.pdf.* Under the Plan, the Participants were required to provide the Commission with a joint assessment relating to the impact of the Plan and the calibration of the Percentage Parameters by assessing certain identified areas. *See* Appendix B.III.

[11] *See* Transmittal Letter, *supra* note 4 and Notice, *supra* note 5, at Chart 1, Table 9, Table 11, Table 12, and Table 13. *See also* Supplemental Joint Assessment Section V.

[12] *Id.* at Table 9, Table 11, Table 12, and Table 13.

[13] *Id.* at Table 10, Table 11, Table 12, and Table 13.

[14] *See* Transmittal Letter, *supra* note 4 and Notice, *supra* note 5.

[15] Consistent with their representations set forth in the Notice, the Commission expects the Participants to implement the amendment to the definition of Opening Price within three months of the date of this order.

the Participants will provide additional recommendations, as necessary, relating to: (i) The harmonization of current clearly erroneous execution rules with the Plan, such that clearly erroneous execution rules could not be used to break trades occurring within the Price Bands absent a legitimate technical failure at a Self-Regulatory Organization; (ii) a review of exchange-traded products (ETPs), to determine whether adjustments should be made to the Plan to account for the particular trading characteristics of ETPs; (iii) a review of other issues with the operation of the Plan that may have been revealed by the events of August 24, 2015, including the impact of double-wide Price Bands during the opening period, and the advisability of coordinated reopening procedures; and (iv) potential enhancements to the categorization of securities into different tiers. An extension of the pilot period of the Plan will allow the Participants' ongoing review and analysis to take place and inform any subsequent amendments to the Plan. The Commission believes that a one-year extension of the Pilot will provide the Participants with sufficient time to analyze the impact of change to the definition of Opening Price on the Plan's operation, as well as complete analyses of the other outstanding matters described above.

For the reasons noted above, the Commission finds that the Tenth Amendment to the Plan is consistent with Section 11A of the Act [16] and Rule 608 thereunder.[17] The Commission reiterates its expectation that the Participants will continue to monitor the scope and operation of the Plan and study the data produced, and will propose any modifications to the Plan that may be necessary or appropriate.[18]

IV. Conclusion

It is therefore ordered, pursuant to Section 11A of the Act [19] and Rule 608 thereunder,[20] that the Tenth Amendment to the Plan (File No. 4–631) be, and it hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[21]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–77678; File No. SR–NASDAQ–2016–035]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Designation of Longer Period for Commission Action on Proposed Rule Change To Establish a Secondary Contingency Procedure To Enable the Exchange To Report an Official Closing Price on Behalf of an Impaired Primary Listing Exchange

April 21, 2016.

On March 2, 2016, The Nasdaq Stock Market LLC (''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to establish a Secondary Contingency Procedure for its closing cross. The proposed rule change was published for comment in the **Federal Register** on March 11, 2016.[3] The Commission has received one comment letter on the proposal.[4]

Section 19(b)(2) of the Act [5] provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day for this filing is April 25, 2016.

The Commission is extending the 45-day time period for Commission action on the proposed rule change. The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change.

Accordingly, pursuant to Section 19(b)(2) of the Act [6] and for the reasons stated above, the Commission designates June 9, 2016, as the date by which the Commission should either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR–NASDAQ–2016–035).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[7]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–77673; File No. SR–Phlx–2016–51]

Self-Regulatory Organizations; NASDAQ PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Qualified Contingent Cross Pricing

April 21, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1], and Rule 19b–4 thereunder,[2] notice is hereby given that on April 14, 2016, NASDAQ PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's Pricing Schedule at Section II, entitled ''Multiply Listed Options Fees.'' Specifically, the Exchange is proposing to amend the Qualified Contingent Cross (''QCC'') pricing.

The text of the proposed rule change is available on the Exchange's Web site at *http://nasdaqomxphlx.cchwallstreet.com/,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the Exchange's Pricing Schedule at Section II, entitled ''Multiply Listed Options Fees.'' Specifically, the Exchange is proposing to amend QCC pricing.

QCC Transaction Fee

Today, the Exchange assesses a QCC Transaction Fee of $0.20 per contract to a Specialist,[3] Market Maker,[4] Professional,[5] Firm [6] and Broker-Dealer.[7] Customers are not assessed a QCC Transaction Fee. The Exchange proposes to no longer assess Professionals a QCC Transaction Fee.

QCC Rebate

The Exchange also pays rebates on QCC Orders.[8] Rebates are paid for all qualifying executed QCC Orders, as defined in Rule 1080(o) [9] and Floor QCC Orders, as defined in Rule 1064(e),[10] except where the transaction is either: (i) Customer-to-Customer; or (ii) a dividend, merger, short stock interest or reversal or conversion strategy execution.[11] The maximum QCC Rebate to be paid in a given month will not exceed $450,000.[12] The Exchange pays rebates to market participants acting as agent on qualifying QCC Orders. The Exchange proposes to no longer pay QCC Rebates on Customer-to-Professional orders.[13]

QCC Orders are an order to buy or sell at least 1,000 contracts, or 10,000 contracts in the case of Mini Options.[14] These large-sized contingent orders are complex in nature and have a stock-tied component, which requires the option leg to be executed at the NBBO or better. The parties to a contingent trade are focused on the spread or ratio between the transaction prices for each of the component instruments (*i.e.,* the net price of the entire contingent trade), rather than on the absolute price of any single component. Permitting Professional orders to be treated similar to Customer orders with respect to this order type is reasonable because of the characteristics of the QCC Order which are described above.

The differentiation between a Customer and Professional is not necessary with respect to QCC Orders because these orders are exempt from requirements regarding order exposure.[15] Further, QCC Orders are not executed pursuant to a priority scheme.[16] Also, as explained above, because of the size of the order, sophistication of the investor and complexity of the transaction, it is difficult to distinguish as between a Customer and Professional with respect to QCC Orders.[17]

Finally, the Exchange believes that treating Customer orders and Professional orders in a similar manner with respect to fees, when transacting QCC Orders, will attract more QCC Orders to the Exchange because there would be no fee for Professional orders.

2. Statutory Basis

The proposal is consistent with Section 6(b) of the Act,[18] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[19] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system which the Exchange operates or controls, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [20]

Likewise, in *NetCoalition* v. *Securities and Exchange Commission* (''NetCoalition'') [21] the D.C. Circuit upheld the Commission's use of a market-based approach in evaluating the fairness of market data fees against a challenge claiming that Congress mandated a cost-based approach.[22] As the court emphasized, the Commission ''intended in Regulation NMS that 'market forces, rather than regulatory requirements' play a role in determining the market data . . . to be made available to investors and at what cost.'' [23]

[3] A ''Specialist'' is an Exchange member who is registered as an options specialist pursuant to Rule 1020(a).

[4] The term ''Market Maker'' includes Registered Options Traders (''ROT''). *See* Exchange Rule 1014(b)(i) and (ii). A ROT includes a Streaming Quote Trader or ''SQT,'' a Remote Streaming Quote Trader or ''RSQT'' and a Non-SQT, which by definition is neither a SQT nor a RSQT. A ROT is defined in Exchange Rule 1014(b) as a regular member or a foreign currency options participant of the Exchange located on the trading floor who has received permission from the Exchange to trade in options for his own account. An SQT is an ROT who has received permission from the Exchange to generate and submit option quotations electronically in options to which such SQT is assigned. *See* Rule 1014(b)(ii)(A). An RSQT is an ROT that is a member affiliated with and Remote Streaming Quote Organization with no physical trading floor presence who has received permission from the Exchange to generate and submit option quotations electronically in options to which such RSQT has been assigned. *See* Rule 1014(b)(ii)(B).

[5] The term ''Professional'' means any person or entity that (i) is not a broker or dealer in securities, and (ii) places more than 390 orders in listed options per day on average during a calendar month for its own beneficial account(s). *See* Rule 1000(b)(14).

[6] The term ''Firm'' applies to any transaction that is identified by a member or member organization for clearing in the Firm range at The Options Clearing Corporation.

[7] The term ''Broker-Dealer'' applies to any transaction which is not subject to any of the other transaction fees applicable within a particular category.

[8] *See* Section II of the Pricing Schedule.

[9] A QCC Order is comprised of an originating order to buy or sell at least 1,000 contracts, or 10,000 contracts in the case of Mini Options, that is identified as being part of a qualified contingent trade, as that term is defined in Rule 1080(o)(3), coupled with a contra-side order or orders totaling an equal number of contracts. *See* Rule 1080(o).

[10] A Floor QCC Order must: (i) Be for at least 1,000 contracts; (ii) meet the six requirements of Rule 1080(o)(3) which are modeled on the QCT Exemption; (iii) be executed at a price at or between the National Best Bid and Offer (''NBBO''); and (iv) be rejected if a Customer order is resting on the Exchange book at the same price. In order to satisfy the 1,000-contract requirement, a Floor QCC Order must be for 1,000 contracts and could not be, for example, two 500-contract orders or two 500-contract legs.

[11] *See* Section II of the Pricing Schedule.

[12] *Id.*

[13] At this time, the Exchange will continue to pay a QCC Rebate where the transaction is Professional-to-Professional.

[14] *See* notes 9 and 10 above.

[15] *See* Rule 1080(c)(ii)(C).

[16] By way of comparison, Customers receive priority over other market participants with respect to the execution of their order within the Exchange's order book or on the Floor.

[17] A Professional transacting a QCC Order would count that order toward the 390 orders in listed options per day. *See* note 5 above.

[18] 15 U.S.C. 78f(b).

[19] 15 U.S.C. 78f(b)(4) and (5).

[20] *See* Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37497, 37499 (June 29, 2005) (''Regulation NMS Adopting Release'').

[21] *See* Securities Exchange Act Release No. 51808 (June 9, 2005) at 534–535.

[22] *See* Securities Exchange Act Release No. 51808 (June 9, 2005) at 534.

[23] *See* Securities Exchange Act Release No. 51808 (June 9, 2005) at 537.

Further, ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers' . . . .'' [24] Although the court and the SEC were discussing the cash equities markets, the Exchange believes that these views apply with equal force to the options markets.

It is reasonable to no longer assess a QCC Transaction Fee for Professional orders and to not pay a QCC Rebate on Customer-to-Professional orders because the distinction that necessitated the differentiation as between Customer and Professional orders is not meaningful with respect to QCC Orders. QCC Orders are orders to buy or sell at least 1,000 contracts, or 10,000 contracts in the case of Mini Options.[25] These large-sized contingent orders are complex in nature and have a stock-tied component, which requires the option leg to be executed at the NBBO or better. The parties to a contingent trade are focused on the spread or ratio between the transaction prices for each of the component instruments (*i.e.,* the net price of the entire contingent trade), rather than on the absolute price of any single component. Also, no Customer priority exists with respect to QCC Orders as with orders transacted within the order book or on the Floor. Permitting Professional orders to be treated similar to Customer orders with respect to this order type will attract more QCC Orders to the Exchange because the Exchange would no longer assess a QCC Transaction Fee for Professional orders.

Further, the Exchange recently amended its definition of a Professional to add specificity with respect to the manner in which the volume threshold will be calculated to determine if orders should be treated as Professional.[26] Currently, member organizations are required to review their Customers' activity on at least a quarterly basis to determine whether orders that are not for the account of a broker-dealer should be represented as Customer orders or Professional orders.[27] The Exchange anticipates that the specificity added to the Professional definition may cause current market participants that mark orders as Customer to be required to mark those orders as Professional as the calendar quarter comes to a close. Orders that were marked Customer were not subject to a fee. With this proposal, Professional orders would not be assessed a QCC Transaction Fee. Furthermore, when a QCC Order is Customer-to-Customer or Customer-to-Professional the agent transacting the QCC Order will not be eligible to receive a QCC Rebate.

The Exchange believes that no longer assessing a QCC Transaction Fee for Professional orders and not paying a QCC Rebate on Customer-to-Professional orders is equitable and not unfairly discriminatory because QCC Orders are distinctive as compared to transactions executed within the order book or on the Floor, which orders are subject to exposure and grant Customers priority over other market participants. The original purpose for the distinction between a Customer and a Professional was to prevent market professionals [28] with access to sophisticated trading systems that contain functionality not available to retail Customers, from taking advantage of Customer priority, where Customer orders are given execution priority over non-Customer orders. The Exchange noted at the time that it adopted the Professional designation that identifying Professional accounts based upon the average number of orders entered for a beneficial account was an appropriate objective approach that would reasonably distinguish such persons and entities from retail investors.[29] QCC Orders are by definition large-sized contingent orders which have a stock-tied component.

With respect to QCC transactions, the Commission noted in an order approving a qualified contingent cross order type on International Securities Exchange, LLC (''ISE'') that ''The Commission believes that those customers participating in QCC Orders will likely be sophisticated investors who should understand that, without a requirement of exposure for QCC Orders, their order would not be given an opportunity for price improvement on the Exchange. These customers should be able to assess whether the net prices they are receiving for their QCC Order are competitive, and who will have the ability to choose among broker-dealers if they believe the net price one broker-dealer provides is not competitive. Further, broker-dealers are subject to a duty of best execution for their customers' orders, and that duty does not change for QCC Orders.'' [30] The intent behind the Professional designation does not apply in the context of transacting QCC Orders, because of the size of the order, sophistication of the investor and complexity of the transaction, and therefore the pricing differentiation is not necessary. For these reasons the Exchange believes that distinguishing a Customer order from a Professional order is not necessary with respect to QCC Orders.

With respect to distinguishing Professional orders from other Non-Customer participant orders, the Exchange notes that these other market participants are distinct from a Professional for purposes of assessing QCC Transaction fees for the below reasons. With respect to Firms, these market participants are eligible for the Monthly Firm Fee Cap of $75,000 per month.[31] Firms are not subject to QCC Transaction Fees once the Monthly Firm Fee Cap is met in a given month. Specialists and Market Makers are eligible for the Monthly Market Maker

[24] *See* Securities Exchange Act Release No. 51808 (June 9, 2005) at 539 (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782–83 (December 9, 2008) (SR–NYSEArca–2006–21).

[26] *See* Securities Exchange Act Release No. 77054 (February 4, 2016), 81 FR 7166 (February 10, 2016) (SR–Phlx–2016–10) (Notice of Filing of Proposed Rule Change Relating to Professional Customer Definition). This rule change became operative on April 1, 2016.

[27] Orders for any Customer that had an average of more than 390 orders per day during any month of a calendar quarter must be represented as Professional orders for the next calendar quarter. Member organizations are required to conduct a quarterly review and make any appropriate changes to the way in which they are representing orders within five days after the end of each calendar quarter. While member organizations will only be required to review their accounts on a quarterly basis, if during a quarter the Exchange identifies a Customer for which orders are being represented as Customer orders but that has averaged more than 390 orders per day during a month, the Exchange will notify the member organization and the member organization will be required to change the manner in which it is representing the Customer's orders within five days. *See Id.* at 7165, n.5.

[28] The Exchange noted in its filing that market professionals have access to functionality, including things such as continuously updated pricing models based upon real-time streaming data, access to multiple markets simultaneously and order and risk management tools. *See* Securities and Exchange Act Release No. 61426 (January 26, 2010), 75 FR 5360 (February 2, 2010) (SR–Phlx–2010–05).

[29] *See* Securities and Exchange Act Release No. 61426 (January 26, 2010), 75 FR 5360 (February 2, 2010) (SR–Phlx–2010–05).

[30] *See* Securities and Exchange Act Release No. 63955 (February 24, 2011), 76 FR 11533 (March 2, 2011) (SR–ISE–2010–73).

[31] Firms are subject to a maximum fee of $75,000 (''Monthly Firm Fee Cap''). Firm Floor Option Transaction Charges and QCC Transaction Fees, in the aggregate, for one billing month will not exceed the Monthly Firm Fee Cap per member organization when such members are trading in their own proprietary account. *See* Section II of the Pricing Schedule.

Cap of $500,000 per month.[32] Specialists and Market Makers are not subject to QCC Transaction Fees once the Monthly Market Maker Cap is met in a given month. Professionals are not subject to similar caps. With respect to Broker-Dealers, the Exchange notes that members may choose to register as a Broker-Dealer. This category of market participant transacts QCC Orders on an agency basis and receives eligible rebates pursuant to the QCC Rebate Schedule.[33] By way of example, presume a Customer order to buy 10,000 contracts eligible as a QCC Order. Presume the selling contra-parties to this order are a Customer, Professional, Firm, Specialist and Broker-Dealer each with 2,000 contracts. In this example, the Customer buying order will not be subject to a QCC Transaction Fee. The Customer selling order would not be subject to a fee or rebate. The Professional selling order would not be subject to a fee or rebate as proposed herein. Orders for Firms, Specialists and Broker-Dealers would be assessed a $0.20 per contract QCC Transaction Fee and would be eligible for rebates pursuant to the QCC Rebate Schedule. Market participants acting as agent, as compared to market participants trading for their own account, are eligible to receive QCC Rebates. The Exchange pays QCC Rebates to market participants acting as agent for QCC Orders, subject to the QCC Rebate Schedule.

The Exchange believes that distinguishing Professional orders from other Non-Customer orders is equitable and not unfairly discriminatory because with respect to QCC Orders it is difficult to distinguish a Customer order from a Professional order. QCC Orders are an exception to the general distinctions drawn as between Customer orders and Professional orders. Aside from the lack of priority for QCC Orders, the size of the order, sophistication of the investor and complexity of the transaction make it difficult to distinguish a Customer order from a Professional order. For purposes of the QCC Order, the Exchange believes that such distinction is not necessary.

Further, the Exchange's proposal would continue to assess all other market participants a QCC Transaction Fee of $0.20 per contract. Also, Customer-to-Professional orders will not be eligible for a QCC Rebate for the reasons explained herein.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. In terms of inter-market competition, the Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, that the degree to which fee changes in this market may impose any burden on competition is extremely limited.

The initial purpose of the distinction between a Customer order and a Professional order was to prevent market professionals with access to sophisticated trading systems that contain functionality not available to retail customers, from taking advantage of Customer priority, where Customer orders are given execution priority over Non-Customer orders. Professional orders are identified based upon the average number of orders entered for a beneficial account.[34]

QCC Orders are by definition large-sized contingent orders which have a stock-tied component. The parties to a contingent trade are focused on the spread or ratio between the transaction prices for each of the component instruments (*i.e.,* the net price of the entire contingent trade), rather than on the absolute price of any single component. Treating Customer orders and Professional orders in the same manner in terms of pricing with respect to QCC Orders does not provide any advantage to a Professional. The distinction does not create an opportunity to burden competition, for the reasons stated herein with respect to priority as well as the reasons below.

With respect to distinguishing Professional orders from other Non-Customer orders, the Exchange notes that Non-Customer orders are distinct from Professional orders for purposes of assessing QCC Transaction fees. Firms are eligible for the Monthly Firm Fee Cap and not subject to QCC Transaction Fees once the Monthly Firm Fee Cap is met in a given month.[35] Specialists and Market Makers are eligible for the Monthly Market Maker Cap and not subject to QCC Transaction Fees once the Monthly Market Maker Cap is met in a given month.[36] Professionals are not subject to similar caps. With respect to Broker-Dealers, the Exchange notes that members may choose to register as a Broker-Dealer. This category of market participant transacts QCC Orders on an agency basis and is eligible to receive QCC Rebates. Further, the Exchange's proposal would continue to assess Specialist, Marker Maker, Firm and Broker-Dealer orders similar to QCC Transaction Fee of $0.20 per contract. Also, Customer-to-Professional orders do not impose an undue burden on intra-market competition for the reasons explained herein.

The Exchange's proposal does not place on undue burden on inter-market competition because the QCC order type is similar on other options exchanges [37] and these exchanges may also file to eliminate the distinction between Customers and Professionals for the QCC order type.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.[38]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such

[32] Specialists and Market Makers are subject to a ''Monthly Market Maker Cap'' of $500,000 for: (i) Electronic Option Transaction Charges; and (ii) QCC Transaction Fees (as defined in Exchange Rule 1080(o) and Floor QCC Orders, as defined in 1064(e)). The trading activity of separate Specialist and Market Maker member organizations will be aggregated in calculating the Monthly Market Maker Cap if there is Common Ownership between the member organizations. *See* Section II of the Pricing Schedule.

[33] QCC Rebates are paid by volume. There are currently six tiers which pay a QCC Rebate between $0.00 and $0.11 per contract. *See* Section II of the Pricing Schedule. Of note, market participants may transact QCC Orders on an agency basis and be eligible for a QCC Rebate.

[34] *See* note 5.

[35] Market participants acting as agents would be eligible to receive a QCC Rebate.

[36] Specialists and Market Makers trade only for their own account.

[37] *See* Chicago Board Options Exchange, Incorporated's Fees Schedule and Miami International Securities Exchange LLC's Pricing Schedule.

[38] 15 U.S.C. 78s(b)(3)(A)(ii).

action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–Phlx–2016–51 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–Phlx–2016–51. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*).

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR–Phlx–2016–51 and should be submitted on or before May 18, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[39]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–77682; File No. SR–NYSEARCA–2016–21]

Self-Regulatory Organizations; NYSE Arca, Inc.; Order Approving a Proposed Rule Change, as Modified by Amendment No. 1, To Establish Procedures for the Allocation of Cages to Co-Located Users, Including the Waiver of Certain Fees, and To Amend the Visitor Security Escort Fee

April 21, 2016.

I. Introduction

On February 23, 2016 NYSE Arca, Inc. (''the Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to establish procedures for the allocation of cages to co-located Users, including the waiver of certain fees, and to amend the visitor security escort fee. On March 1, 2016, the Exchange filed Amendment No. 1 to the proposed rule change. The proposed rule change, as modified by Amendment No. 1, was published for comment in the **Federal Register** on March 11, 2016.[3] There were no comments on the proposed rule change.[4] This order approves the proposed rule change, as modified by Amendment No. 1.

II. Background and Description of the Proposal, as Modified by Amendment No. 1

The Exchange proposes to establish procedures for the allocation of cages to its co-located Users,[5] including the waiver of certain fees subject to specified conditions, and to amend the visitor security escort fee.[6] The Exchange proposes to amend the NYSE Arca Equities Schedule of Fees and Charges for Exchange Services (''Schedule of Fees'') and the NYSE Arca Options Fee Schedule (''Fee Schedule'') to reflect the changes.[7]

As more fully set forth in the Notice, the Exchange offers Users the ability to rent cages to house their cabinets in the Data Center,[8] and historically has offered these cages on a first come/first serve basis.[9] The Exchange states that a cage typically is purchased by a User that has several cabinets within

Data Center and wishes to arrange its cabinets contiguously while also enhancing privacy around its cabinets.[10] The Exchange offers three cage sizes, corresponding to the number of cabinets housed therein, and charges fees for the cages based on the size.[11] The physical footprint of each cage is greater than that of the cabinets that it houses, as each cage is constructed so as to include aisles around the purchasing User's cabinets, for accessibility and to comply with safety regulations.[12] In order to offer the cages, the Exchange must have sufficient contiguous open space available for the cage.[13]

In 2015, the Exchange determined that to continue to be able to meet its obligation to accommodate demand, and in particular to make available more contiguous, larger spaces for new and existing Users, it would exercise its right to move some Users' equipment within the

Data Center (the ''Migration'').[14] The Exchange established procedures to manage the Migration process, and

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 34–77303 (March 7, 2016), 81 FR 13003 (''Notice''). Amendment No.1 was included in the Notice and provided certain clarifications, including that the proposed waiver of fees for two bundles of 24 cross connects, applicable while a User is on the waitlist, would only apply to cross-connects used to connect an individual User's non-contiguous cabinets.

[4] The Commission notes that it received one letter referencing this filing that addresses issues outside the scope of this proposal.

[5] For purposes of the Exchange's co-location services, a ''User'' means any market participant that requests to receive co-location services directly from the Exchange. The Exchange provides co-location services to Users from its data center (''Data Center'') in Mahwah, New Jersey.

continues to implement them.[15] The Exchange states that, notwithstanding the Migration, contiguous open space will still be limited, and may become more limited over time.[16]

Proposed Cage Allocation Procedure

The Exchange has proposed to establish procedures governing the allocation of cages should the currently available open contiguous space in the Data Center be insufficient to house a new cage or if the open contiguous space available is sufficiently limited such that the Exchange cannot both provide new cages and satisfy all User demand for other co-location services.[17] Specifically, the Exchange proposes that it will place Users seeking new cages on a waitlist: (1) The order of Users on the list will be based on the date the Exchange receives signed orders for the cages from each User; (2) once the list is established, Users, on a rolling basis, will be allocated a cage each time one becomes available; (3) if a cage becomes available and the User that is at the top of the waitlist turns it down because it requested a different size, that User will remain on the waitlist and the cage will be offered to the next User on the list, in order, until a User accepts it; (4) a User that turns down a cage that is the size that it requested will be removed from the waitlist; and (5) if a User requests two cages, that User will be moved to the bottom of the waitlist upon the receipt of its first cage.[18]

In connection with the proposed waitlist procedures, the Exchange further proposes to add General Note 3 to the Schedule of Fees and Fee Schedule,[19] to provide that the Exchange would, subject to specified conditions, waive the initial and monthly fee for two bundles of 24 cross connects between a User's non-contiguous cabinets while it is on the waitlist.[20] Specifically, the initial and monthly charge for two bundles of 24 cross connects will be waived for a User that is waitlisted for a cage for the duration of the waitlist period, provided that the cross connects may only be used to connect the User's non-contiguous cabinets.[21] The charge will no longer be waived once a User is removed from the waitlist.[22] In addition, a User that is removed from the waitlist but subsequently requests a cage will be added back to the bottom of the waitlist, provided that, if the User was removed from the waitlist because it turned down a cage that is the size that it requested, it will not receive a second waiver of the charge.[23]

Visitor Security Escorts

The Exchange also proposes to amend its visitor security escort fee. Currently, a User visiting its cabinet(s) in the Data Center is required to pay a $75/hour fee for a security escort.[24] The Exchange proposes to eliminate this fee for Users visiting their own cage in the Data Center,[25] and change the fee for those not visiting their own cage from $75/hour to $75/visit.[26] The Exchange states that a security escort is not needed when a User visits its own cage because that User would have access only to its own cabinets locked within its own cage,[27] and that User will not have access to the cabinets of other Users or Exchange equipment, which are locked as well.[28]

III. Discussion and Commission Findings

After careful review and consideration of the Exchange's proposal, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[29] In particular, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with Section 6(b)(4) of the Act,[30] which requires that the rules of a national securities exchange provide for the equitable allocation of reasonable dues, fees and other charges among its members and issuers and other persons using its facilities, and with Section 6(b)(5) of the Act,[31] which requires, among other things, that the rules of a national securities exchange be designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest, and not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Commission believes that the proposed procedures for the allocation of cages to its co-located Users and associated waiver of fees subject to specified conditions are consistent with Sections 6(b)(4) and 6(b)(5) of the Act. In particular, the Commission believes that the proposed cage allocation and waitlist procedures are reasonably designed to assist the Exchange in offering cages to current and future Users in the Data Center on terms that are equitable and not unfairly discriminatory in the event that available open contiguous space in the Data Center is not sufficient to house a newly requested cage or sufficiently limited that the Exchange cannot both provide new cages and satisfy all User demand for other co-location services. The Commission further believes that the proposal to waive the initial and monthly fee for two bundles of 24 cross connects between a User's non-contiguous cabinets while a User is on the waitlist is consistent with the Act. Users can qualify for the fee waiver by requesting a cage and being placed on the waitlist until a cage becomes available to them. Once the Exchange offers the requested size cage to a User through the allocation procedure or when a User is removed from the waitlist, the fee would no longer be waived. In addition, if a User was removed from the waitlist because it turned down a cage that was the size that it requested, it would not receive a second waiver of the charge. The Commission believes that the proposed fee waiver and associated conditions are reasonably designed to alleviate the inconvenience for waitlisted Users of having cabinets in non-contiguous spaces by removing the cost that those Users would otherwise avoid if a cage were available.

The Commission also finds the proposed amendments to the visitor security escort fee consistent with Sections 6(b)(4) and 6(b)(5) of the Act. The Exchange represents that a security escort is not needed when a User visits its own cage because that User would have access only to its own cabinets locked within its own cage,[32] and will not have access to the cabinets of other Users or Exchange equipment, which

[15] *See* Notice, 81 FR at 13004; *see also* Migration Filing *supra* note 14.

[16] *See* Notice, 81 FR at 13004.

[21] *See id.*

[22] As noted above, a User that turns down a cage because it is not the correct size will remain on the waitlist. A User that requests to be removed or that turns down a cage that is the size that it requested will be removed from the waitlist. *See supra* note 18 and accompanying text.

[23] *See* Notice, 81 FR at 13004.

[24] *See* Notice, 81 FR at 13005.

[25] *See id.* The Exchange is also making a technical change to the visitor fee on the Schedule of Fees and Fee Schedule to add clarity. *See id.*

[26] *See id.* The Exchange stated that many of the escorted visits lasted an hour or less. *See id.*

[27] *See* Notice, 81 FR at 13004.

[28] *See id.*

[29] In approving this proposed rule change, as modified by Amendment No. 1, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[30] 15 U.S.C. 78f(b)(4).

[31] 15 U.S.C. 78f(b)(5).

[32] *See supra* notes 27–28 and accompanying text.

are locked as well.[33] In addition, the proposed rate of $75/visit for the visitor security escort would be a fee reduction for any visit that lasted more than an hour, and so it would reduce the burden placed on Users that remain subject to the fee. Therefore, the Commission finds the proposed amendments to the visitor security escort fee to be reasonable, equitable, and not unfairly discriminatory.

For the foregoing reasons, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with the Act.

VII. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[34] that the proposed rule change, as modified by Amendment No.1, (File No. SR–NYSEARCA–2016–21) be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[35]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–77681; File No. SR–NYSE–2016–13]

Self-Regulatory Organizations; New York Stock Exchange LLC; Order Approving a Proposed Rule Change, as Modified by Amendment No. 1, To Establish Procedures for the Allocation of Cages to Co-Located Users, Including the Waiver of Certain Fees, and To Amend the Visitor Security Escort Fee

April 21, 2016.

I. Introduction

On February 23, 2016 New York Stock Exchange LLC (''the Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to establish procedures for the allocation of cages to co-located Users, including the waiver of certain fees, and to amend the visitor security escort fee. On March 1, 2016, the Exchange filed Amendment No. 1 to the proposed rule change. The proposed rule change, as modified by Amendment No. 1, was published for comment in the **Federal Register** on March 11, 2016.[3] There were no comments on the proposed rule change. This order approves the proposed rule change, as modified by Amendment No. 1.

II. Background and Description of the Proposal, as Modified by Amendment No. 1

The Exchange proposes to establish procedures for the allocation of cages to its co-located Users,[4] including the waiver of certain fees subject to specified conditions, and to amend the visitor security escort fee.[5] The Exchange proposes to amend its Price List (''Price List'') to reflect the changes.[6]

As more fully set forth in the Notice, the Exchange offers Users the ability to rent cages to house their cabinets in the Data Center,[7] and historically has offered these cages on a first come/first serve basis.[8] The Exchange states that a cage typically is purchased by a User that has several cabinets within the Data Center and wishes to arrange its cabinets contiguously while also enhancing privacy around its cabinets.[9] The Exchange offers three cage sizes, corresponding to the number of cabinets housed therein, and charges fees for the cages based on the size.[10] The physical footprint of each cage is greater than that of the cabinets that it houses, as each cage is constructed so as to include aisles around the purchasing User's cabinets, for accessibility and to comply with safety regulations.[11] In order to offer the cages, the Exchange must have sufficient contiguous open space available for the cage.[12]

In 2015, the Exchange determined that to continue to be able to meet its obligation to accommodate demand, and in particular to make available more contiguous, larger spaces for new and existing Users, it would exercise its right to move some Users' equipment within the Data Center (the ''Migration'').[13] The Exchange established procedures to manage the Migration process, and continues to implement them.[14] The Exchange states that, notwithstanding the Migration, contiguous open space will still be limited, and may become more limited over time.[15]

Proposed Cage Allocation Procedure

The Exchange has proposed to establish procedures governing the allocation of cages should the currently available open contiguous space in the Data Center be insufficient to house a new cage or if the open contiguous space available is sufficiently limited such that the Exchange cannot both provide new cages and satisfy all User demand for other co-location services.[16] Specifically, the Exchange proposes that it will place Users seeking new cages on a waitlist: (1) The order of Users on the list will be based on the date the Exchange receives signed orders for the cages from each User; (2) once the list is established, Users, on a rolling basis, will be allocated a cage each time one becomes available; (3) if a cage becomes available and the User that is at the top of the waitlist turns it down because it requested a different size, that User will remain on the waitlist and the cage will be offered to the next User on the list, in order, until a User accepts it; (4) a User that turns down a cage that is the size that it requested will be removed from the waitlist; and (5) if a User requests two cages, that User will be moved to the bottom of the waitlist upon the receipt of its first cage.[17]

In connection with the proposed waitlist procedures, the Exchange further proposes to add General Note 3 to the Price List,[18] to provide that the Exchange would, subject to specified conditions, waive the initial and monthly fee for two bundles of 24 cross connects between a User's non-contiguous cabinets while it is on the

waitlist.[19] Specifically, the initial and monthly charge for two bundles of 24 cross connects will be waived for a User that is waitlisted for a cage for the duration of the waitlist period, provided that the cross connects may only be used to connect the User's non-contiguous cabinets.[20] The charge will no longer be waived once a User is removed from the waitlist.[21] In addition, a User that is removed from the waitlist but subsequently requests a cage will be added back to the bottom of the waitlist, provided that, if the User was removed from the waitlist because it turned down a cage that is the size that it requested, it will not receive a second waiver of the charge.[22]

Visitor Security Escorts

The Exchange also proposes to amend its visitor security escort fee. Currently, a User visiting its cabinet(s) in the Data Center is required to pay a $75/hour fee for a security escort.[23] The Exchange proposes to eliminate this fee for Users visiting their own cage in the Data Center,[24] and change the fee for those not visiting their own cage from $75/hour to $75/visit.[25] The Exchange states that a security escort is not needed when a User visits its own cage because that User would have access only to its own cabinets locked within its own cage,[26] and that User will not have access to the cabinets of other Users or Exchange equipment, which are locked as well.[27]

III. Discussion and Commission Findings

After careful review and consideration of the Exchange's proposal, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange.[28] In particular, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with Section 6(b)(4) of the Act,[29] which requires that the rules of a national securities exchange provide for the equitable allocation of reasonable dues, fees and other charges among its members and issuers and other persons using its facilities, and with Section 6(b)(5) of the Act,[30] which requires, among other things, that the rules of a national securities exchange be designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest, and not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Commission believes that the proposed procedures for the allocation of cages to its co-located Users and associated waiver of fees subject to specified conditions are consistent with Sections 6(b)(4) and 6(b)(5) of the Act. In particular, the Commission believes that the proposed cage allocation and waitlist procedures are reasonably designed to assist the Exchange in offering cages to current and future Users in the Data Center on terms that are equitable and not unfairly discriminatory in the event that available open contiguous space in the Data Center is not sufficient to house a newly requested cage or sufficiently limited that the Exchange cannot both provide new cages and satisfy all User demand for other co-location services. The Commission further believes that the proposal to waive the initial and monthly fee for two bundles of 24 cross connects between a User's non-contiguous cabinets while a User is on the waitlist is consistent with the Act. Users can qualify for the fee waiver by requesting a cage and being placed on the waitlist until a cage becomes available to them. Once the Exchange offers the requested size cage to a User through the allocation procedure or when a User is removed from the waitlist, the fee would no longer be waived. In addition, if a User was removed from the waitlist because it turned down a cage that was the size that it requested, it would not receive a second waiver of the charge. The Commission believes that the proposed fee waiver and associated conditions are reasonably designed to alleviate the inconvenience for waitlisted Users of having cabinets in non-contiguous spaces by removing the cost that those Users would otherwise avoid if a cage were available.

The Commission also finds the proposed amendments to the visitor security escort fee consistent with Sections 6(b)(4) and 6(b)(5) of the Act. The Exchange represents that a security escort is not needed when a User visits its own cage because that User would have access only to its own cabinets locked within its own cage,[31] and will not have access to the cabinets of other Users or Exchange equipment, which are locked as well.[32] In addition, the proposed rate of $75/visit for the visitor security escort would be a fee reduction for any visit that lasted more than an hour, and so it would reduce the burden placed on Users that remain subject to the fee. Therefore, the Commission finds the proposed amendments to the visitor security escort fee to be reasonable, equitable, and not unfairly discriminatory.

For the foregoing reasons, the Commission finds that the proposed rule change, as modified by Amendment No. 1, is consistent with the Act.

VII. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[33] that the proposed rule change, as modified by Amendment No.1, (File No. SR–NYSE–2016–13) be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[34]

Brent J. Fields,

Secretary.

from rule 23c–3 under the Act, and for an order pursuant to section 17(d) of the Act and rule 17d–1 under the Act.

SUMMARY OF APPLICATION: Applicants request an order to permit certain registered closed-end management investment companies to issue multiple classes of shares and to impose asset-based distribution fees and early withdrawal charges (''EWCs'').

APPLICANTS: ABS Long/Short Strategies Fund (the ''Fund'') and ABS Investment Management LLC (the ''Adviser'').

FILING DATES: The application was filed on December 10, 2015 and amended April 1, 2016.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on May 17, 2016, and should be accompanied by proof of service on the applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090; Applicants: ABS Long/Short Strategies Fund and ABS Investment Management LLC, c/o Edward C. Lawrence, Esq., Bernstein Shur, 100 Middle Street NW., Portland, ME 04104–5029.

FOR FURTHER INFORMATION CONTACT: Jean E. Minarick, Senior Counsel, at (202) 551–8811, or Daniele Marchesani, Branch Chief, at (202) 551–6821 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or for an applicant using the Company name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Applicants' Representations

1. The Fund is a Delaware statutory trust that is registered under the Act as a non-diversified, closed-end management investment company. The Fund's investment objective is to seek capital appreciation over a full market cycle while maintaining a lower level of volatility when compared to the global equity markets.

2. The Adviser is a Delaware limited liability company and is registered as an investment adviser under the Investment Advisers Act of 1940. The Adviser serves as investment adviser to the Fund.

3. The applicants seek an order to permit the Fund to issue multiple classes of shares, each having its own fee and expense structure, and to impose asset-based distribution fees and EWCs.

4. Applicants request that the order also apply to any continuously-offered registered closed-end management investment company that may be organized in the future for which the Adviser or any entity controlling, controlled by, or under common control with the Adviser, or any successor in interest to any such entity,[1] acts as investment adviser and which operates as an interval fund pursuant to rule 23c–3 under the Act or provides periodic liquidity with respect to its shares pursuant to rule 13e–4 under the Securities Exchange Act of 1934 (''Exchange Act'') (each, a ''Future Fund'' and together with the Fund, the ''Funds'').[2]

5. The Fund is currently making a continuous public offering of its common shares (''Founders' Shares''). Applicants state that additional offerings by any Fund relying on the order may be on a private placement or public offering basis. Shares of the Funds will not be listed on any securities exchange, nor quoted on any quotation medium. The Funds do not expect there to be a secondary trading market for their shares.

6. If the requested relief is granted, the Fund intends to continuously offer at least one additional class of shares (''Institutional Shares'') and may also offer additional classes of shares in the future. Because of the different distribution fees, services and any other class expenses that may be attributable to a class of a Fund's shares, the net income attributable to, and the dividends payable on, each class of shares may differ from each other.

7. Applicants state that, from time to time, the Fund may create additional classes of shares, the terms of which may differ from the Founders' Shares and Institutional Shares in the following respects: (i) The amount of fees permitted by different distribution plans or different service fee arrangements; (ii) voting rights with respect to a distribution plan of a class; (iii) different class designations; (iv) the impact of any class expenses directly attributable to a particular class of shares allocated on a class basis as described in the application; (v) any differences in dividends and net asset value resulting from differences in fees under a distribution plan or in class expenses; (vi) any EWC or other sales load structure; and (vii) exchange or conversion privileges of the classes as permitted under the Act.

8. Applicants state that the Fund may provide periodic liquidity with respect to its shares pursuant to rule 13e–4 under the Exchange Act.[3] A Future Fund may adopt a fundamental investment policy to repurchase a specified percentage of its shares in compliance with rule 23c–3 and make quarterly repurchase offers to its shareholders or provide periodic liquidity with respect to its shares pursuant to rule 13e–4 under the Exchange Act. Any repurchase offers made by the Funds will be made to all holders of shares of each such Fund.

9. Applicants represent that any asset-based service and distribution fees for each class of shares will comply with the provisions of NASD Rule 2830(d) (''NASD Sales Charge Rule'').[4] Applicants also represent that each Fund will disclose in its prospectus the fees, expenses and other characteristics of each class of shares offered for sale by the prospectus, as is required for open-end multiple class funds under Form N–1A. As is required for open-end funds, each Fund will disclose its expenses in shareholder reports, and describe any arrangements that result in breakpoints in or elimination of sales loads in its prospectus.[5] In addition,

[1] A successor in interest is limited to an entity that results from a reorganization into another jurisdiction or a change in the type of business organization.

[2] Any Fund relying on this relief in the future will do so in a manner consistent with the terms and conditions of the application. Applicants represent that each entity presently intending to rely on the requested relief is listed as an applicant.

[3] Applicants submit that rule 23c–3 and Regulation M under the Exchange Act permit an interval fund to make repurchase offers to repurchase its shares while engaging in a continuous offering of its shares pursuant to Rule 415 under the Securities Act of 1933.

[4] Any reference to the NASD Sales Charge Rule includes any successor or replacement rule that may be adopted by the Financial Industry Regulatory Authority (''FINRA'').

[5] *See* Shareholder Reports and Quarterly Portfolio Disclosure of Registered Management Investment Companies, Investment Company Act Release No. 26372 (Feb. 27, 2004) (adopting release) (requiring open-end investment companies to disclose fund expenses in shareholder reports); and Disclosure of Breakpoint Discounts by Mutual Funds, Investment Company Act Release No. 26464 (June 7, 2004)

Continued

applicants will comply with applicable enhanced fee disclosure requirements for fund of funds, including registered funds of hedge funds.[6]

10. Each of the Funds will comply with any requirements that the Commission or FINRA may adopt regarding disclosure at the point of sale and in transaction confirmations about the costs and conflicts of interest arising out of the distribution of open-end investment company shares, and regarding prospectus disclosure of sales loads and revenue sharing arrangements, as if those requirements applied to the Fund. In addition, each Fund will contractually require that any distributor of the Fund's shares comply with such requirements in connection with the distribution of such Fund's shares.

11. Each Fund will allocate all expenses incurred by it among the various classes of shares based on the net assets of the Fund attributable to each class, except that the net asset value and expenses of each class will reflect distribution fees, service fees, and any other incremental expenses of that class. Expenses of the Fund allocated to a particular class of shares will be borne on a pro rata basis by each outstanding share of that class. Applicants state that each Fund will comply with the provisions of rule 18f–3 under the Act as if it were an open-end investment company.

12. Applicants state that each Fund may impose an EWC on shares submitted for repurchase that have been held less than a specified period and may waive the EWC for certain categories of shareholders or transactions to be established from time to time. Applicants state that each of the Funds will apply the EWC (and any waivers, scheduled variations, or eliminations of the EWC) uniformly to all shareholders in a given class and consistently with the requirements of rule 22d–1 under the Act as if the Funds were open-end investment companies.

13. Each Fund operating as an interval fund pursuant to rule 23c–3 under the Act may offer its shareholders an exchange feature under which the shareholders of the Fund may, in connection with the Fund's periodic repurchase offers, exchange their shares of the Fund for shares of the same class of (i) registered open-end investment companies or (ii) other registered closed-end investment companies that comply with rule 23c–3 under the Act and continuously offer their shares at net asset value, that are in the Fund's group of investment companies (collectively, ''Other Funds''). Shares of a Fund operating pursuant to rule 23c–3 that are exchanged for shares of Other Funds will be included as part of the amount of the repurchase offer amount for such Fund as specified in rule 23c–3 under the Act. Any exchange option will comply with rule 11a–3 under the Act, as if the Fund were an open-end investment company subject to rule 11a–3. In complying with rule 11a–3, each Fund will treat an EWC as if it were a contingent deferred sales load (''CDSL'').

Applicants' Legal Analysis

Multiple Classes of Shares

1. Section 18(c) of the Act provides, in relevant part, that a closed-end investment company may not issue or sell any senior security if, immediately thereafter, the company has outstanding more than one class of senior security. Applicants state that the creation of multiple classes of shares of the Funds may be prohibited by section 18(c), as a class may have priority over another class as to payment of dividends because shareholders of different classes would pay different fees and expenses.

2. Section 18(i) of the Act provides that each share of stock issued by a registered management investment company will be a voting stock and have equal voting rights with every other outstanding voting stock. Applicants state that multiple classes of shares of the Funds may violate section 18(i) of the Act because each class would be entitled to exclusive voting rights with respect to matters solely related to that class.

3. Section 6(c) of the Act provides that the Commission may exempt any person, security or transaction or any class or classes of persons, securities or transactions from any provision of the Act, or from any rule or regulation under the Act, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicants request an exemption under section 6(c) from sections 18(c) and 18(i) to permit the Funds to issue multiple classes of shares.

4. Applicants submit that the proposed allocation of expenses relating to distribution and voting rights among multiple classes is equitable and will not discriminate against any group or class of shareholders. Applicants submit that the proposed arrangements would permit a Fund to facilitate the distribution of its shares and provide investors with a broader choice of shareholder services. Applicants assert that the proposed closed-end investment company multiple class structure does not raise the concerns underlying section 18 of the Act to any greater degree than open-end investment companies' multiple class structures that are permitted by rule 18f–3 under the Act. Applicants state that each Fund will comply with the provisions of rule 18f–3 as if it were an open-end investment company.

Early Withdrawal Charges

1. Section 23(c) of the Act provides, in relevant part, that no registered closed-end investment company shall purchase securities of which it is the issuer, except: (a) On a securities exchange or other open market; (b) pursuant to tenders, after reasonable opportunity to submit tenders given to all holders of securities of the class to be purchased; or (c) under other circumstances as the Commission may permit by rules and regulations or orders for the protection of investors.

2. Rule 23c–3 under the Act permits a registered closed-end investment company (an ''interval fund'') to make repurchase offers of between five and twenty-five percent of its outstanding shares at net asset value at periodic intervals pursuant to a fundamental policy of the interval fund. Rule 23c–3(b)(1) under the Act permits an interval fund to deduct from repurchase proceeds only a repurchase fee, not to exceed two percent of the proceeds, that is paid to the interval fund and is reasonably intended to compensate the fund for expenses directly related to the repurchase.

3. Section 23(c)(3) provides that the Commission may issue an order that would permit a closed-end investment company to repurchase its shares in circumstances in which the repurchase is made in a manner or on a basis that does not unfairly discriminate against any holders of the class or classes of securities to be purchased.

4. Applicants request relief under section 6(c), discussed above, and section 23(c)(3) from rule 23c–3 to the extent necessary for the Funds to impose EWCs on shares of the Funds submitted for repurchase that have been held for less than a specified period.

5. Applicants state that the EWCs they intend to impose are functionally similar to CDSLs imposed by open-end investment companies under rule 6c–10

(adopting release) (requiring open-end investment companies to provide prospectus disclosure of certain sales load information).

[6] Fund of Funds Investments, Investment Company Act Rel. Nos. 26198 (Oct. 1, 2003) (proposing release) and 27399 (Jun. 20, 2006) (adopting release). *See* also Rules 12d1–1, *et seq.* of the Act.

under the Act. Rule 6c–10 permits open-end investment companies to impose CDSLs, subject to certain conditions. Applicants note that rule 6c–10 is grounded in policy considerations supporting the employment of CDSLs where there are adequate safeguards for the investor and state that the same policy considerations support imposition of EWCs in the interval fund context. In addition, applicants state that EWCs may be necessary for the distributor to recover distribution costs. Applicants represent that any EWC imposed by the Funds will comply with rule 6c–10 under the Act as if the rule were applicable to closed-end investment companies. The Funds will disclose EWCs in accordance with the requirements of Form N–1A concerning CDSLs.

Asset-Based Distribution Fees

1. Section 17(d) of the Act and rule 17d–1 under the Act prohibit an affiliated person of a registered investment company, or an affiliated person of such person, acting as principal, from participating in or effecting any transaction in connection with any joint enterprise or joint arrangement in which the investment company participates unless the Commission issues an order permitting the transaction. In reviewing applications submitted under section 17(d) and rule 17d–1, the Commission considers whether the participation of the investment company in a joint enterprise or joint arrangement is consistent with the provisions, policies and purposes of the Act, and the extent to which the participation is on a basis different from or less advantageous than that of other participants.

2. Rule 17d–3 under the Act provides an exemption from section 17(d) and rule 17d–1 to permit open-end investment companies to enter into distribution arrangements pursuant to rule 12b–1 under the Act. Applicants request an order under section 17(d) and rule 17d–1 under the Act to the extent necessary to permit the Funds to impose asset-based distribution fees. Applicants have agreed to comply with rules 12b–1 and 17d–3 as if those rules applied to closed-end investment companies, which they believe will resolve any concerns that might arise in connection with a Fund financing the distribution of its shares through asset-based distribution fees.

3. For the reasons stated above, applicants submit that the exemptions requested under section 6(c) are necessary and appropriate in the public interest and are consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicants further submit that the relief requested pursuant to section 23(c)(3) will be consistent with the protection of investors and will insure that applicants do not unfairly discriminate against any holders of the class of securities to be purchased. Finally, applicants state that the Funds' imposition of asset-based distribution fees is consistent with the provisions, policies and purposes of the Act and does not involve participation on a basis different from or less advantageous than that of other participants.

Applicants' Condition

Applicants agree that any order granting the requested relief will be subject to the following condition:

Each Fund relying on the order will comply with the provisions of rules 6c–10, 12b–1, 17d–3, 18f–3, 22d–1, and, where applicable, 11a–3 under the Act, as amended from time to time, as if those rules applied to closed-end management investment companies, and will comply with the NASD Sales Charge Rule, as amended from time to time, as if that rule applied to all closed-end management investment companies.

For the Commission, by the Division of Investment Management, under delegated authority.

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–77674; File No. SR–NYSE–2016–22)

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing of Proposed Rule Change Adopting Initial and Continued Listing Standards for the Listing of Equity Investment Tracking Stocks and Adopting Listing Fees Specific to Equity Investment Tracking Stocks

April 21, 2016.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on April 7, 2016, New York Stock Exchange LLC (''NYSE'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt initial and continued listing standards for the listing of Equity Investment Tracking Stocks. The Exchange also proposes to adopt listing fees specific to Equity Investment Tracking Stocks. The proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to adopt initial and continued listing standards for the listing of Equity Investment Tracking Stocks. The Exchange also proposes to adopt listing fees specific to Equity Investment Tracking Stocks.

For purposes of proposed new Section 102.07 of the Manual, an Equity Investment Tracking Stock refers to a class of common stock that is the listed company's sole class of common equity securities listed on the Exchange and that is designed solely to track the performance of an investment by the issuer in the common stock of another company listed on the Exchange.

In order to qualify for initial listing under proposed Section 102.07, an Equity Investment Tracking Stock will be required to meet the distribution and public float requirements currently applicable for initial public offerings set forth in Sections 102.01A and 102.01B

[1] 15 U.S.C.78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

of the Manual, respectively, and the quantitative requirements set forth in Section 102.01C. As such, as required under Section 102.01A, an Equity Investment Tracking Stock, at the time of initial listing, will be required to have at least 400 holders of 100 shares or more and 1,100,000 public held shares available for trading. Further, as required under Section 102.01B, an Equity Investment Tracking Stock must have an aggregated market value of publicly-held shares of $40,000,000 and a per share price of $4 at the time of initial listing. Under Section 102.01C, the issuer of an Equity Investment Tracking Stock will be required to meet either the Earnings Test or the Global Market Capitalization Test. Under the Earnings test, an issuer must have pre-tax earnings totaling (x) at least $10,000,000 in the aggregate for the last three fiscal years together with a minimum of $2,000,000 in each of the two most recent fiscal years, and positive amounts in all three years or (y) at least $12,000,000 in the aggregate for the last three fiscal years together with a minimum of $5,000,000 in the most recent fiscal year and $2,000,000 in the next most recent fiscal year.[4] Under the Global Market Capitalization Test, the issuer must have $200 million in global market capitalization at the time of initial listing.

The Exchange will not list an Equity Investment Tracking Stock if, at the time of the proposed listing, the issuer of the equity tracked by the Equity Investment Tracking Stock has been deemed below compliance with listing standards by the Exchange.

The Exchange proposes to subject the issuer of an Equity Investment Tracking Stock to the same continued listing standards under Sections 802.01A and 802.01B as are applicable to other companies listing common stocks on the Exchange. As such, these companies will be considered to be below compliance with Section 802.01A if (i) their number of total stockholders is less than 400 OR (ii) their number of total stockholders is less than 1,200 and their average monthly trading volume is less than 100,000 shares (for the most recent 12 months) OR (iii) their number of publicly-held shares is less than 600,000. Such companies will be deemed to be below compliance with Section 802.01B if their average global market capitalization over a consecutive 30 trading-day period is less than $50,000,000 and, at the same time stockholders' equity is less than $50,000,000 and (will be subject to immediate delisting if they are determined to have average global market capitalization over a consecutive 30 trading-day period of less than $15,000,000. In addition, the Exchange will promptly initiate suspension and delisting proceedings with respect to an Equity Investment Tracking Stock if the underlying equity security whose value is tracked by the Equity Investment Tracking Stock ceases to be listed on one of (i) the Exchange, (ii) the Nasdaq Stock Market, (iii) NYSE MKT or (iv) one of the markets listed in SEC Rule 146(b)[5] or is converted into or exchanged for another security that is not listed on one of the aforementioned markets.

The Exchange proposes to amend Sections 902.02 and 902.03 of the Manual to provide that, where an Equity Investment Tracking Stock is listed on the Exchange, listing and annual fees for such security will be subject to a single fee cap at the time of original listing and on an annual basis. The Exchange further proposes to amend Section 907.00 of the Manual to limit the products and services provided to the issuer of an Equity Investment Tracking Stock. The proposed fees would apply to the initial and continued listing on the Exchange of an Equity Investment Tracking Stock and to the products and services provided to issuers of such security for as long as the Equity Investment Tracking Stock is the only class of security that is listed on the Exchange.

Pursuant to Section 902.02 and 902.03 of the Manual, listed companies are charged an annual security fee for each class or series of security listed on the Exchange. The annual fee is calculated based on the number of shares issued and outstanding and is currently set at a rate of $0.001025 for the primary listed class of equity, subject to an annual minimum of $52,500. In its first year of listing, a company's annual fee is prorated from the date of initial listing through the year end. Listed companies also pay other fees to the Exchange, including fees associated with initial and supplemental listing applications. In any given calendar year, however, Section 902.02 of the Manual specifies that the total fees that the Exchange may bill a listed company are capped at $500,000 (the ''Total Maximum Fee''). For an Equity Investment Tracking Stock, the Exchange proposes to adopt a Total Maximum Fee of $200,000.

Section 902.03 of the Manual currently provides, in part, for listing fees the first time an issuer lists a class of common shares, charged on a per share basis based on tiers set forth in the rule. The first time that an issuer lists a class of common shares, the issuer is also subject to a one-time special charge of $50,000. Once listed, if an issuer lists additional shares of a class of previously listed securities, the issuer is subject to listing fees for such additional shares. The minimum and maximum listing fees applicable the first time an issuer lists a class of common shares are $125,000 and $250,000, respectively, which amounts include the special charge of $50,000. In lieu of the foregoing, the Exchange proposes to establish for Equity Investment Tracking Stocks a fixed initial listing fee (inclusive of the one-time charge) of $100,000. Subject to the Total Maximum Fee of $200,000 per year described above, the Exchange proposes to charge the same per share annual fee for Equity Investment Tracking Stocks as for the primary class of equity of a listed operating company (*i.e.,* currently $0.001025 per share).

Finally, Section 907.00 of the Manual sets forth certain complimentary products and services that are offered to certain currently and newly listed issuers. These products and services are developed or delivered by NYSE or by a third party for use by NYSE-listed companies. Some of these products are commercially available from such third-party vendors. All listed issuers receive some complimentary products and services through the NYSE Market Access Center. The Exchange proposes to exclude issuers of an Equity Investment Tracking Stock from receiving the products and services provided for under Section 907.00, with the exception that such issuers will receive the complimentary products and services and access to discounted third-party products and services through the NYSE Market Access Center available to all listed issuers.

The Exchange proposes to limit the fees that would be payable for the listing on an Equity Investment Tracking Stock as an incentive for the issuer to list such security on the Exchange. As described below, the Exchange proposes to make the aforementioned fee changes to better reflect the Exchange's costs related to listing Equity Investment Tracking Stocks and the corresponding value of such listing to issuers.

[4] A company that (i) qualifies as an emerging growth company as defined in Section 2(a)(19) of the Securities Act and Section 3(a)(80) of the Exchange Act and (ii) avails itself of the provisions of the Securities Act and the Exchange Act permitting emerging growth companies to report only two years of audited financial statements, can qualify under the Earnings Test by meeting the following requirements: Pre-tax earnings totaling at least $10,000,000 in the aggregate for the last two fiscal years together with a minimum of $2,000,000 in both years.

[5] 17 CFR 230.146(b).

The Exchange proposes to make three other minor changes in this filing: (i) To remove from Section 902.03 references to the annual fee schedule applicable to years prior to 2016; (ii) to update the web link included in Section 907.00 and (iii) to delete the word ''four'' from Section 802.01B, as there are no longer four continued listing standards referred to in that rule.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[6] in general, and furthers the objectives of Sections 6(b)(4)[7] and 6(b)(5)[8] of the Act, in particular.

The Exchange believes that the proposed initial and continued listing standards for Equity Investment Tracking Stocks further the objectives of Section 6(b)(5) of the Act,[9] in particular in that they are designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. In particular, the proposed listing standards are designed to protect investors and the public interest by ensuring that Equity Investment Tracking Stocks listed on the Exchange meet stringent quantitative and qualitative listing standards to qualify for initial and continued listing.

The proposed fee provisions further the objectives of Sections 6(b)(4) in that they are designed to provide for the equitable allocation of reasonable dues, fees, and other charges among its members and issuers and other persons using its facilities. The Exchange believes that the proposed fee provisions are consistent with Section 6(b)(5) of the Act in that they do not unfairly discriminate among listed companies because there is a reasonable justification for charging the issuer of an Equity Investment Tracking Stock different fees from those charged to other issuers as there are cost and regulatory efficiencies for the Exchange when the issuer of an Equity Investment Tracking Stock and the issuer of the underlying equity security are both listed on the Exchange. Under the Exchange's proposal, the issuer of an Equity Investment Tracking Stock would pay a fixed initial listing fee of $100,000, which is less than the minimum fee charged in connection with the listing of the primary class of equity of an operating company. In addition, Equity Investment Tracking Stocks would be billed annual fees at the same rate per share as the primary class of equity of an operating company, but subject to a lower annual fee cap that may cause an issuer of an Equity Investment Tracking Stock to be subject to a lower effective fee rate per share than if it were a regular operating company. Given the unique nature of an Equity Investment Tracking Stock, including especially the fact that its trading price will likely be primarily derivative of the trading price of the security of another company, most of the services provided by the Exchange under Section 907.00 would be of limited value and appeal to issuers of Equity Investment Tracking Stocks and the Exchange believes it is appropriate to exclude the issuers of Equity Investment Tracking Stocks from its services program. The Exchange believes that the fact that it will not provide these costly services makes it appropriate to charge lower fees. In addition, the Exchange believes there will be regulatory efficiencies when the same regulatory staff is responsible for oversight of an Equity Investment Tracking Stock and the underlying equity security. This would include, for example, the fact that news that is material to the issuer of the underlying security would also be material to an investment in the Equity Investment Tracking Stock.

The Exchange does not expect many issuers will seek to list an Equity Investment Tracking Stock. Accordingly, the Exchange does not anticipate that it will experience any meaningful diminution in revenue as a result of the proposed lower fees and therefore does not believe that the proposed fees would in any way negatively affect its ability to continue to adequately fund its regulatory program or the services the Exchange provides to issuers

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is designed to provide listing standards for Equity Investment Tracking Stocks that are appropriately protective of investors and is not designed to limit the ability of the issuers of those securities to list them on any other national securities exchange. The proposed rule change is designed to ensure that the fees charged by the Exchange accurately reflect the services provided and benefits realized by listed companies. The market for listing services is extremely competitive. Each listing exchange has a different fee schedule that applies to issuers seeking to list securities on its exchange. Issuers have the option to list their securities on these alternative venues based on the fees charged and the value provided by each listing. Because issuers have a choice to list their securities on a different national securities exchange, the Exchange does not believe that the proposed listing standards and fee changes impose a burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or *up to 90 days* (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2016–22 on the subject line.

[6] 15 U.S.C. 78f(b).
[7] 15 U.S.C. 78f(b)(4).
[8] 15 U.S.C. 78f(b)(5).
[9] 15 U.S.C. 78f(b)(5).

Paper Comments

• Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2016–22. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2016–22, and should be submitted on or before May 18, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[10]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–77675; File No. SR–FICC–2016–001]

Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of Filing of Proposed Rule Change Relating to the GCF Repo® Service

April 21, 2016.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on April 19, 2016, the Fixed Income Clearing Corporation (''FICC'' or the ''Corporation'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared primarily by FICC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change consists of amendments to the Government Securities Division (''GSD'') Rulebook[3] (''GSD Rules'') in order to: (1) Permanently adopt the pilot program (the ''2015 Pilot Program'')[4] that is currently in effect for the GCF Repo®[5] service and that is scheduled to expire on June 22, 2016; (2) add clarifying rule changes regarding a process that is currently in effect with respect to the GCF Repo service and that FICC refers to as the ''net-of-net'' settlement process; and (3) make technical changes to the GSD Rules. The proposed rule changes consist of changes to GSD Rule 1, GSD Rule 20 and the *Schedule of GCF Timeframes.*

Capitalized terms used herein and not otherwise defined shall have the meaning assigned to those terms in the GSD Rules.

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

i. Background: Description of the GCF Repo Service and History

(1) Development of the GCF Repo Service

The GCF Repo service was developed as part of a collaborative effort among the Government Securities Clearing Corporation (''GSCC'') (FICC's predecessor), its two clearing banks (The Bank of New York Mellon (''BNY'') and JPMorgan Chase Bank, National Association (''Chase'')) and industry representatives. GSCC introduced the GCF Repo service on an *intra*-clearing bank basis in 1998.[6] Under the intrabank service, Dealers[7] could only engage in GCF Repo Transactions[8] with other Dealers that cleared at the *same* clearing bank.

Currently, the GCF Repo service allows Netting Members[9] that participate in the service to trade general collateral repos[10] throughout the day without requiring intra-day, trade-for-trade settlement on a delivery-versus-payment (''DVP'') basis. The service allows Dealers to trade such general collateral repos, based on rate and term, throughout the day with Inter-Dealer Broker Netting Members[11] on a blind basis. Standardized Generic CUSIP Numbers[12] have been established exclusively for GCF Repo

[6] Securities Exchange Act Release No. 34–40623 (October 30, 1998) 63 FR 59831 (November 5, 1998) (SR–GSCC–98–02).

[7] Pursuant to the GSD Rules, the term ''Dealer'' means a member that is a registered Government Securities Dealer. GSD Rule 1, Definitions.

[8] Pursuant to the GSD Rules, the term ''GCF Repo Transaction'' means a Repo Transaction involving Generic CUSIP Numbers the data on which are submitted to the Corporation on a Locked-In-Trade basis pursuant to the provisions of Rule 6C, for netting and settlement by the Corporation pursuant to the provisions of Rule 20. GSD Rule 1, Definitions.

[9] Pursuant to the GSD Rules, the term ''Netting Member'' means a Member that is a Member of the Comparison System and the Netting System. GSD Rule 1, Definitions.

[10] A general collateral repo is a repo in which the underlying securities collateral is nonspecific, general collateral whose identification is at the option of the seller. This is in contrast to a specific collateral repo.

[11] Pursuant to the GSD Rules, the term ''Inter-Dealer Broker Netting Member'' shall have the meaning set forth in Section 2 of Rule 2A. GSD Rule 1, Definitions.

[12] Pursuant to the GSD Rules, the term ''Generic CUSIP Number'' means a Committee on Uniform Securities Identification Procedures identifying number established for a category of securities, as opposed to a specific security. The Corporation shall use separate Generic CUSIP Numbers for General Collateral Repo Transactions and GCF Repo Transactions. GSD Rule 1, Definitions.

processing and are used to specify the acceptable type of underlying Fedwire book-entry eligible collateral, which includes Treasuries, Agencies and certain mortgage-backed securities.

(2) Creation of the Interbank Version of the GCF Repo Service

In 1999, GSCC expanded the GCF Repo service to permit Dealers to engage in GCF Repo trading on an *inter*-clearing bank basis, meaning that Dealers using *different* clearing banks could enter into GCF Repo Transactions (on a blind brokered basis).[13] Because Dealers that participate in the GCF Repo service do not all clear at the same clearing bank, introducing the service as an interbank service necessitated the establishment of a mechanism to permit after-hours movements of securities between the two clearing banks to deal with the fact that GSCC would likely have unbalanced net GCF securities and cash positions within each clearing bank (meaning that, it is likely that at the end of GCF Repo processing each business day, the Dealers in one clearing bank will be net funds borrowers, while the Dealers at the other clearing bank will be net funds lenders). To address this issue, GSCC and its clearing banks established, and the Commission approved, a legal mechanism by which securities would ''move'' across the clearing banks without the use of the securities Fedwire.[14] Therefore, at the end of the day, after the GCF Net Settlement Position [15] results are produced, securities are pledged via a tri-party-like mechanism and the interbank cash component is moved via Fedwire. In the morning, the pledges are unwound (meaning that funds are returned to the net funds lenders and securities are returned to the net funds borrowers).

The following simplified example illustrates the manner in which the GCF Repo services works on an *interbank* basis:

Assume that Dealer B clears at BNY and Dealer C clears at Chase. Further assume that: (i) Outside of FICC, Dealer B engages in a tri-party repo transaction with Party X to obtain funds and seeks to invest such funds via a GCF Repo Transaction, (ii) outside of FICC, Dealer C engages in a DVP repo with Party Y to buy securities and seeks to finance these securities via a GCF Repo Transaction, and (iii) Dealer B and Dealer C enter into a GCF Repo Transaction (on a blind basis via a GCF Repo broker) and submit the trade details to FICC.

At the end of ''Day 1'', GCF Repo collateral must be allocated, *i.e.,* Dealer B must receive the securities. However, the securities that Dealer B is to receive are at Chase and the securities Fedwire is closed. The after-hours movement mechanism permits the securities to be ''sent'' to Dealer B as follows: FICC will instruct Chase to allocate to a special FICC clearance account at Chase securities in an amount equal to the net short securities position.

FICC has established on its own books and records two ''securities accounts'' as defined in Article 8 of the New York Uniform Commercial Code, one in the name of Chase (''FICC Account for Chase'') and one in the name of BNY (''FICC Account for BNY''). The FICC Account for Chase is comprised of the securities in FICC's special clearance account maintained by BNY (''FICC Special Clearance Account at BNY for Chase''), and the FICC Account for BNY is comprised of the securities in FICC's special clearance account maintained by Chase (''FICC Special Clearance Account at Chase for BNY'').[16] The establishment of these securities accounts by FICC in the name of the clearing banks enables the bank that is in the net long securities position to ''receive'' securities by pledge after the close of the securities Fedwire. Once the clearing bank has ''received'' the securities by pledge, it can credit them by book-entry to a FICC GCF Repo account at that clearing bank and then to the Dealers that clear at that bank that are net long the securities in connection with GCF Repo trades.

In the example, Chase, as agent for FICC, will transmit to BNY a description of the securities in the FICC Special Clearance Account at Chase for BNY. Based on this description, BNY will transfer funds equal to the funds borrowed position to the FICC GCF Repo account at Chase. Upon receipt of the funds by Chase, Chase will release any liens it may have on the FICC Special Clearance Account at Chase for BNY, and FICC will release any liens it may have on FICC Account for BNY (both of these accounts being comprised of the same securities). BNY will credit the securities in the FICC Account for BNY to FICC's GCF Repo account at BNY, and BNY will further credit these securities to Dealer B, who, as noted, is in a net long securities position. In the morning of ''Day 2,'' all securities and funds movements occurring on Day 1, are reversed (''unwind'').

(3) Issues With Morning Unwind Process

In 2003, FICC shifted the GCF Repo service back to intrabank status only.[17] By that time, the service had grown significantly in participation and volume. However, with the increase in use of the interbank service, certain payments systems risk issues arose from the inter-bank funds settlements related to the service, namely, the large interbank funds movement in the morning. FICC shifted the service back to intrabank status to enable management to study the issues presented and identify a satisfactory solution for bringing the service back to interbank status.

(4) The NFE Filing and Restoration of Service to Interbank Status

In 2007, FICC submitted a rule filing to address the issues raised by the interbank morning funds movement and return the GCF Repo service to interbank status (the ''2007 NFE Filing'').[18] The 2007 NFE Filing addressed these issues by using a hold against a Dealer's ''net free equity'' (''NFE'') at the clearing bank to collateralize its GCF Repo cash obligation to FICC on an intraday basis.[19]

ii. Annual Pilot Program, and Reasons for Adopting the Pilot Program Permanently

In July 2011, FICC submitted a rule filing to the Commission (SR–FICC–2011–05) [20] proposing to make certain

[13] Securities Exchange Act Release No. 34–41303 (April 16, 1999) 64 FR 20346 (April 26, 1999) (SR–GSCC–99–01).

[14] *See id.* for a detailed description of the clearing bank and FICC accounts needed to effect the after hour movement of securities. It should be noted that movements of cash do not present the same issue because the cash Fedwire is open later than the securities Fedwire.

[15] Pursuant to the GSD Rules, the term ''GCF Net Settlement Position'' means, on a particular Business Day as regards a Netting Member's GCF Repo Transaction activity in a particular Generic CUSIP Number, either a GCF Net Funds Lender Position or a GCF Net Funds Borrower Position, as the context requires. *See* GSD Rule 1, Definitions.

[16] FICC has appointed Chase as its agent to maintain FICC's books and records with respect to the BNY securities account, and FICC has appointed BNY as its agent to maintain FICC's books and records with respect to the Chase securities account.

[17] Securities Exchange Act Release No. 34–48006 (June 10, 2003), 66 FR 35745 (June 16, 2003) (SR–FICC–2003–04).

[18] Securities Exchange Act Release No. 34–57652 (April 11, 2008), 73 FR 20999 (April 17, 2008) (SR–FICC–2007–08).

[19] NFE is a methodology that clearing banks use to determine whether an account holder (such as a dealer) has sufficient collateral to enter a specific transaction. NFE allows the clearing bank to place a limit on its customer's activity by calculating a value on the customer's balances at the bank. Bank customers have the ability to monitor their NFE balance throughout the day.

[20] Securities Exchange Act Release No. 34–65213 (August 29, 2011), 76 FR 54824 (September 2, 2011) (SR–FICC–2011–05).

changes to its GCF Repo service in order to comply with the recommendations that had been made by the Tri-party Repo Infrastructure Reform Task Force (''TPR''),[21] an industry group formed and sponsored by the Federal Reserve Bank of New York to advance tri-party repo reform recommendations.[22] Because the GCF Repo service operates as a tri-party mechanism, FICC was requested to incorporate changes to the GCF Repo service to align the service with the other TPR recommended changes for the overall tri-party market. In SR–FICC–2011–05, FICC proposed the following rule changes with respect to the GCF Repo service to address the TPR's Recommendations:

(1) (a) To move the Day 2 unwind from 7:30 a.m. to 3:30 p.m., (b) to move the NFE process from morning to a time established by the Corporation as announced by notice to all members, (c) to move the cut-off time of GCF Repo submissions from 3:35 p.m. to 3:00 p.m., and (d) to move the cut-off time for dealer affirmation or disaffirmation from 3:45 p.m. to 3:00 p.m.; and

(2) To establish rules for intraday GCF Repo collateral substitutions.

The rule changes described in SR–FICC–2011–05 were proposed to be run as a pilot program for one year starting from the date on which the filing was approved by the Commission (the ''2011 Pilot Program'').[23] Throughout 2011 and the earlier half of 2012, FICC implemented the changes referred to in paragraphs *(1)*(c) and *(1)*(d) above. On June 8, 2012, FICC submitted a rule filing to continue the 2011 Pilot Program, with certain modifications (the ''2012 Pilot Program'').[24] Specifically, the 2012 Pilot Program adopted the following additional changes: (1) The cut-off time for GCF Repo trade submissions was moved from 3:35 p.m. to 3:00 p.m.; (2) the 3:45 p.m. cut-off time for Dealer affirmation or disaffirmation was moved from 3:45 p.m. to 3:00 p.m.; (3) Rule 20 Section 3 was amended to delete the reference to the ''morning'' timeframe on Day 2 with respect to the NFE process and to add language referencing ''at the time established by the Corporation''; (4) Rule 20 Section 3 was amended to provide that all requests for GCF Repo securities collateral substitutions must be submitted by the GCF Repo securities collateral provider by the applicable deadline on Day 2 (the ''substitution deadline''); (5) Rule 20 Section 7 was amended to change references to the term ''Security'' to ''security'' to conform to the use of ''security'' throughout the rule; and (6) a defined term for ''GCF Collateral Excess Account'' was introduced into the GSD Rules. For the next 3 years after that, FICC submitted and the Commission approved rule filings to extend the pilot while the industry was implementing Tri-Party Reform and adapting to the changes brought about by Tri-Party Reform.[25]

FICC is seeking the Commission's approval to permanently adopt the rule changes associated with the 2015 Pilot Program, which expires on June 22, 2016. In addition, FICC is also seeking to add a clarification to the GSD Rules to reflect the net-of-net settlement process in the GCF Repo service, as further explained below. The net-of-net settlement clarification is also a result of Tri-Party Reform and reflects current practice at the GSD. FICC would like to permanently adopt these changes because there is no longer a need to keep extending the pilot. The rule changes associated with the pilot have been in place since 2011 with certain additional modifications that were made in connection with the 2012 Pilot Program, and Netting Members are accustomed to them; this is also the case with the net-of-net settlement changes, which came into effect when the clearing banks implemented this process in 2014 and 2015. This change required no operational changes on the part of FICC; however, FICC is proposing to make changes to the GSD Rules in an effort to ensure that the Rules reflect the current net-of-net settlement process. Any future changes that arise as a result of Tri-Party Reform will constitute stand-alone rule changes and are not expected to affect the rule changes covered in this present filing.

In addition to the above, FICC is also proposing to amend the GSD Rules to include technical clean-up changes to the GSD Rules.

iii. The Manner in Which the Proposed Rule Change Will Affect GSD Netting Members

FICC does not believe that the permanent adoption of the rule changes associated with the 2015 Pilot Program will affect Netting Members because the proposed rule changes have been in place since the approval of the 2011 and 2012 pilot-related filings.[26] In addition, FICC does not believe that the inclusion of the rule changes associated with the net-of-net settlement will affect Netting Members because these changes are also in effect and reflect current practice.

The proposed technical changes will not affect Netting Members because they do not change the existing meaning of the GSD Rules.

These rule changes are as follows:

(1) Proposed Change Regarding the Morning Unwind and Related Rule Changes

At the beginning of the Tri-Party Reform effort, the TPR recommended that the daily unwind[27] for all tri-party transactions be moved from the morning to 3:30 p.m. The TPR made this recommendation in order to achieve the benefit of reducing the banks' intraday exposure to the Dealers. Because the GCF Repo service is essentially a tri-party mechanism, the TPR requested that FICC accommodate this time change. For the GSD Rules, this necessitated a change to the GSD's *Schedule of GCF Timeframes.* Specifically, the 7:30 a.m. time in the *Schedule of GCF Timeframes* was deleted and the language therein was moved to a new time of 3:30 p.m. Because the net-of-net settlement process has now replaced the unwind, as further described below, FICC is further amending the language for the 3:30 p.m. time slot to reflect the net-of-net settlement process.

At the same time as the change to the time of the unwind needed to be made, GSD was also required to make an additional change to its processes in conjunction with the move of the unwind to 3:30 p.m. As noted above, the NFE process works in conjunction with the unwind. The process utilizes a hold against a Netting Member's NFE at the clearing bank to collateralize the Netting Member's GCF Repo cash obligation to FICC on an intraday basis. As part of Tri-Party Reform, because the unwind moved from the morning to 3:30 p.m. and because the NFE process was tied to the moment of the unwind, the NFE process also was required to move to coincide with the new time. As part of

[21] Information about the Federal Reserve's Tri-party Repo Infrastructure Reform is available via *http://www.newyorkfed.org/banking/tpr_infr_reform.html.*

[22] The main purpose of the TPR was to develop recommendations to address the risk presented by tri-party repo transactions due to the morning reversal or ''unwind'' process and to move to a process by which transactions are collateralized all day. The TPR's efforts shall hereinafter be referred to as ''Tri-party Reform.''

[26] *See* footnotes 23 and 24 above.

[27] *See* footnote 22 above.

the pilot, the necessary rule change was made to the paragraph in Section 3 of GSD Rule 20 that addresses the NFE process to delete the reference to the ''morning'' timeframe and to replace it with general language referencing ''at the time established by the Corporation.'' Because the net-of-net settlement process has now replaced the unwind, as further described below, FICC is further amending the language in the NFE paragraph to reflect the net-of-net settlement process by deleting the reference to ''Day 2'' and replacing it with ''a particular Business Day.''

The change to the time of the unwind also necessitated a change to the cut-off time for GCF Repo trade submissions in the *Schedule of GCF Timeframes* to an earlier time of 3:00 p.m. in order to allow FICC time to submit files to the clearing banks which, in turn, provide files to Netting Members by 3:30 p.m. This permits Netting Members to have a complete picture of their positions as the unwind (now the net-of-net) occurs at 3:30 p.m. In addition, the 3:45 p.m. cut-off for Dealer affirmation or disaffirmation in the *Schedule of GCF Timeframes* was moved to 3:00 p.m. so that the new 3:00 p.m. cut-off for submissions also became the cut-off for Dealer affirmations and disaffirmations.

(2) Proposed Change Regarding Intraday GCF Repo Securities Collateral Substitutions

As a result of moving the time change of the unwind (which is now the net-of-net settlement process) to 3:30 p.m., the provider of the GCF Repo securities collateral needs a substitution mechanism for the return of its posted collateral in order to make securities deliveries for utilization of such securities in its business activities. The 2015 Pilot Program rule filing (and the previous pilot filings) added a paragraph to Section 3 of Rule 20 to accommodate intraday substitution of collateral. In this filing FICC is further amending this paragraph in Section 3 of Rule 20 to delete ''During Day 2'' and replace it with ''On any Business Day'' to accommodate the net-of-net settlement process.

If the GCF Repo Transaction is between Netting Member counterparties effecting the transaction through the same clearing bank (*i.e.,* intrabank), such clearing bank will process each substitution request of the provider of GCF Repo securities collateral submitted prior to the substitution deadline. Netting Members are able to substitute GCF Repo collateral during the day until such time as their new requirement for that day is fully satisfied and delivered to GSD. For a GCF Repo Transaction that was processed on an interbank basis, FICC initiates a debit of the securities in the account of the lender through the FICC GCF Repo account at the clearing bank of the lender and the FICC GCF Repo account at the clearing bank of the borrower. This movement is done so that a borrower who elects to substitute collateral will have access to the collateral for which it is substituting. This is reflected in the *Schedule of GCF Repo Timeframes* as the timeframe of 7:30 a.m. through 2:30 p.m. Once the debit has settled, borrowers can submit substitution requests until the substitution deadline.

(3) Proposed Changes Regarding the Net-of-Net Settlement Process

As stated above, as part of the Tri-party Reform effort, GCF Repo Transactions are no longer unwound in the sense of having a reversal of the activity of the previous day. Instead, new obligations and entitlements are netted with the previous day's obligations and entitlements, thereby requiring settlement of only the differential between the previous day's activity and the new activity. To illustrate, consider the scenario in which a Netting Member has on a Business Day a $100 million delivery obligation to FICC, and on the following Business Day, the same Netting Member has a $110 million delivery obligation to FICC in the same Generic CUSIP Number. Prior to the net-of-net implementation, to unwind the first Business Day's transaction, FICC would have returned the $100 million on the second Business Day, and the Netting Member would have also been required to deliver the $110 million on that Business Day to FICC. However, after net-of-net implementation, on the second Business Day, FICC's return of $100 million to the Netting Member is netted against the Netting Member's obligation to deliver $110 million to FICC, such that the Netting Member is only required to deliver the additional $10 million to FICC.

The net-of-net settlement process was implemented by the clearing banks in 2014–2015 and it became FICC's practice at that time. Thus, FICC is proposing to revise the references in Rule 20 to accurately reflect the net-of-net settlement process.

Some of the proposed rule changes necessary to reflect the net-of-net settlement process have already been discussed above. In addition to the changes in this regard discussed above, FICC is proposing to delete the ''Day 1/Day 2'' terminology in Section 3 of GSD Rule 20, delete terminology pertaining to ''reversal'' of obligations, and insert terminology regarding ''netting'' of obligations.

(4) Proposed Changes Regarding the Technical Changes

The technical clean-up changes will not affect Netting Members because these changes do not change the meaning of the GSD Rules as they apply to such Members.

iv. Any Significant Problems Known to FICC That Netting Members Are Likely To Have in Complying With the Proposed Rule Change

FICC does not believe that Netting Members will have problems in complying with the proposed rule changes that permanently adopt the 2015 Pilot and the net-of-net settlement process because these changes are already in effect and reflect current practice. In addition, FICC is not aware of any problems that Netting Members have in complying with these provisions today. FICC does not believe that Netting Members will have a problem complying with the technical changes because they do not change the manner in which the Rules apply to such Members.

v. Detailed Description of the Proposed Rule Changes in Exhibit 5

The proposed rule changes are as follows:

(1) Proposed Changes to Rule 1

The term ''GCF Collateral Excess Account'' means an account established by a GCF Custodian Bank in the name of the Corporation to hold securities it credits to the GCF Securities Account the Corporation establishes for another GCF Clearing Agent Bank.

(2) Proposed Changes to Rule 20 Section 3

(a) References to ''Day 1'' and ''Day 2'' are proposed to be replaced with references to ''particular'' or ''next'' Business Days in order to accommodate the net-of-net settlement clarification. Additional drafting changes are reflected, where necessary, to add clarity to this change.

(b) A new paragraph has been added to reflect the collateral substitution process.

(c) The second sentence of the fifth paragraph has been moved to the end of the paragraph for ease of reading. This change also necessitates the deletion of the last sentence of the existing paragraph, which reads as follows: ''subject to the provisions of the second sentence of this paragraph''.

(d) The seventh paragraph has been amended to delete the reference to ''the morning of Day 2'' and replace such reference with ''a particular Business Day at a time established by the Corporation. . . .'' This change reflects that the NFE process is no longer in the morning and also further accommodates the net-of-net settlement clarification.

(3) Proposed Change to Rule 20 Section 7

Rule 20 Section 7 is proposed to be amended to reflect the following technical clean-up changes:

(a) The term ''Security'' has been changed to ''security'' in order to conform to the use of ''security'' throughout this section.

(b) The term ''GCF Collateral Excess Account'' was inadvertently not included in the Rules thus, it is being introduced in this section in order to add clarity. This term is defined in Rule 1 as ''the account established by a GCF Custodian Bank in the name of the Corporation to hold securities it credits to the GCF Securities Account the Corporation establishes for another GCF Clearing Bank.''

(4) Proposed Changes to the Schedule of GCF Timeframes

The *Schedule of GCF Timeframes* is proposed to be amended as follows:

(a) To delete the 7:30 a.m. deadline for the return of collateral and replace it with a 3:30 p.m. time at which the net-of-net settlement process occurs.

(b) To add the 7:30 a.m. through 2:30 p.m. timeframe for the facilitation of interbank collateral substitutions.

(c) To change the cut-off time for GCF Repo Transaction submission from 3:35 p.m. to 3:00 p.m. and to also make 3:00 p.m. the deadline for Dealer trade affirmation or disaffirmation and to state that all unaffirmed trades will be automatically affirmed by FICC, that FICC will notify banks and Dealers of final positions and that collateral allocations begin.

(d) To delete the 3:45 p.m. deadline (all of whose processes are now referenced at the 3:00 p.m. timeframe).

2. Statutory Basis

This proposed rule change is designed to: (1) Permanently adopt the rules in the 2015 Pilot Program; (2) incorporate language into the GSD Rules to reflect the net-of-net settlement process; and (3) make technical changes to the GSD Rules. The 2015 Pilot Program has already been approved by the Commission as consistent with the Act.[28] The rules adopted in the 2015 Pilot Program were intended to advance the TPR's Tri-Party Reform recommendations to make the tri-party repo industry safer by moving the morning unwind process to the afternoon in an effort to ensure that such transactions are collateralized all day, thereby limiting the amount of intraday credit that is extended by clearing banks during the day. Permanently adopting these rules will serve to minimize systemic risk and bring certainty to market participants. Accordingly, the permanent adoption the 2015 Pilot Program rules will help to protect investors and the public interest, and help to assure the safeguarding of securities and funds which are in FICC's custody or control or for which FICC is responsible, consistent with Section 17A(b)(3)(F) of the Exchange Act.[29] Permanently adopting these rules will also avoid the need for FICC to renew the pilot program annually.

Codifying the net-of-net settlement process in the GSD Rules constitutes no change to FICC's current operations because the net-of-net settlement process was implemented by the clearing banks in 2014–2015. Changing the GSD Rules to reflect the net-of-net settlement process will eliminate obsolete language from the GSD Rules. Similarly, the technical changes proposed in this filing will make non-substantive corrections that will clarify the GSD Rules. Accordingly, the changes related to the net-of-net settlement process and the technical changes to the GSD Rules will provide for a more well-founded and transparent legal framework for FICC's activities, consistent with Exchange Act Rule 17Ad–22(d)(1).[30]

(B) Clearing Agency's Statement on Burden on Competition

FICC does not believe that the proposed rule change would impose any burden on competition. The proposed changes apply to all Netting Members participating in the GCF Repo service and reflect industry reform efforts that apply to similar transactions outside of FICC.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments on the proposed rule change have not yet been solicited or received. FICC will notify the Commission of any written comments received by FICC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change; or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*) or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–FICC–2016–001 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–FICC–2016–001. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official

[28] Securities Exchange Act Release No. 34–75258 (June 22, 2015), 80 FR 36879 (June 26, 2015) (SR–FICC–2015–002); 15 U.S.C. 78a *et seq.*

[29] 15 U.S.C. 78q–1(b)(3)(F).

[30] 17 CFR 240.17Ad–22(d)(1).

business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filings also will be available for inspection and copying at the principal office of FICC and on FICC's Web site at *http://www.dtcc.com/legal/sec-rule-filings.aspx.*

All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–FICC–2016–001 and should be submitted on or before May 18, 2016.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[31]

Brent J. Fields,

Secretary.

BILLING CODE 8011–01–P

SOCIAL SECURITY ADMINISTRATION

[Docket No: SSA–2016–0018]

Agency Information Collection Activities: Proposed Request

The Social Security Administration (SSA) publishes a list of information collection packages requiring clearance by the Office of Management and Budget (OMB) in compliance with Public Law 104–13, the Paperwork Reduction Act of 1995, effective October 1, 1995. This notice includes a new information collection and a revision of an OMB-approved information collection.

SSA is soliciting comments on the accuracy of the agency's burden estimate; the need for the information; its practical utility; ways to enhance its quality, utility, and clarity; and ways to minimize burden on respondents, including the use of automated collection techniques or other forms of information technology. Mail, email, or fax your comments and recommendations on the information collection(s) to the OMB Desk Officer and SSA Reports Clearance Officer at the following addresses or fax numbers.

(OMB) Office of Management and Budget, Attn: Desk Officer for SSA, Fax: 202–395–6974, Email address: *OIRA_Submission@omb.eop.gov*

(SSA) Social Security Administration, OLCA, Attn: Reports Clearance Director, 3100 West High Rise, 6401 Security Blvd., Baltimore, MD 21235, Fax: 410–966–2830, Email address: *OR.Reports.Clearance@ssa.gov*

Or you may submit your comments online through *www.regulations.gov,* referencing Docket ID Number [SSA–2016–0018].

I. The information collections below are pending at SSA. SSA will submit them to OMB within 60 days from the date of this notice. To be sure we consider your comments, we must receive them no later than June 27, 2016. Individuals can obtain copies of the collection instruments by writing to the above email address.

1. Report of Adult Functioning-Employer—20 CFR 404.1512 and 20 CFR 416.912—0960—NEW. Section 205(a), 223(d)(5)(A), 1631(d)(1), and 1631(e)(1) of the Social Security Act (Act) require claimants applying for Social Security Disability Insurance (SSDI) or Supplemental Security Income (SSI) benefits to provide SSA with medical and other evidence of their disability. 20 CFR 404.1512 and 20 CFR 416.912 of the Code of Federal Regulations provides detailed requirements of the types of evidence Social Security disability claimants and beneficiaries must provide showing how their impairment(s) affects their ability to work (*e.g.,* evidence of age, education and training, work experience, daily activities, efforts to work, and any other evidence). Past employers familiar with the claimant's ability to perform work activities complete Form SSA–385–BK, Report of Adult Functioning-Employer to provide SSA with information about the employees day-to-day functioning in the work setting. SSA and Disability Determination Services use the information Form SSA–3385–BK collects as the basis to determine eligibility or continued eligibility for disability benefits. The respondents are claimants' past employers.

Type of Request: This is a new information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
SSA–3385–BK	3,900	1	20	1,300

2. Work Incentives Planning and Assistance Program—0960–0629. As part of SSA's strategy to assist SSDI beneficiaries and SSI recipients who wish to return to work and achieve self-sufficiency, SSA established the Work Incentives Planning and Assistance (WIPA) program. This community based, work incentive, planning and assistance project collects identifying claimant information via project sites and community work incentives coordinators (CWIC). SSA uses this information to ensure proper management of the project, with particular emphasis on administration, budgeting, and training. In addition, project sites and CWIC's collect data from SSDI beneficiaries and SSI recipients on background employment, training, benefits, and work incentives. SSA is interested in identifying SSDI beneficiary and SSI recipient outcomes under the WIPA program, to determine the extent to which beneficiaries with disabilities and SSI recipients achieve their employment, financial, and healthcare goals. SSA will also use the data in its analysis for future planning for SSDI and SSI programs. Respondents are SSDI beneficiaries, SSI recipients, community project sites, and employment advisors.

Type of Request: Revision of an OMB-approved information collection.

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
Small WIPA Site (under 150 beneficiaries served)	4,800	1	20	1,600
Medium WIPA Site (150–599 beneficiaries served)	7,500	1	20	2,500

[31] 17 CFR 200.30–3(a)(12).

Modality of completion	Number of respondents	Frequency of response	Average burden per response (minutes)	Estimated total annual burden (hours)
Large WIPA Site (600 or more beneficiaries served)	17,700	1	20	5,900
Total WIPA Sites	30,000			10,000
SSDI & SSI Beneficiaries	30,000	1	25	12,500
Help Line	30,000	1	5	2,500
Total	60,000			15,000
Grand Total	90,000			25,000

Dated: April 22, 2016.

Naomi R. Sipple,

Reports Clearance Officer, Social Security Administration.

BILLING CODE 4191–02–P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36020]

Norfolk Southern Railway Company—Trackage Rights Exemption—Southern Electric Railroad Company

Southern Electric Railroad Company (SERC), pursuant to a written trackage rights agreement,[1] has agreed to grant Norfolk Southern Railway Company (NS) restricted overhead trackage rights over SERC's mainline, between milepost 0.0 and milepost 0.6 in the vicinity of Jefferson County, Ala., a distance of approximately 0.6 miles.

The transaction may be consummated on May 11, 2016, the effective date of the exemption (30 days after the exemption was filed).

NS states that the proposed trackage rights will allow NS to access four private storage tracks (APC Storage Yard) to serve the James H. Miller, Jr. Electric Generating Plant owned by Alabama Power Company near West Jefferson, in Jefferson County, Ala.

As a condition to this exemption, any employees affected by the trackage rights will be protected by the conditions imposed in *Norfolk & Western Railway—Trackage Rights—Burlington Northern, Inc.,* 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Railway—Lease & Operate—California Western Railroad,* 360 I.C.C. 653 (1980).

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void ab initio. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Petitions for stay must be filed by May 4, 2016 (at least seven days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. FD 36020, must be filed with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423–0001. In addition, a copy of each pleading must be served on Aarthy S. Thamodaran, Norfolk Southern Corporation, Three Commercial Place, Norfolk, VA 23510.

According to NS, this action is categorically excluded from environmental review under 49 CFR 1105.6(c).

Board decisions and notices are available on our Web site at ''*WWW.STB.DOT.GOV.*''

Decided: April 22, 2016.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

Tia Delano,

Clearance Clerk.

[FR Doc. 2016–09815 Filed 4–26–16; 8:45 am]

BILLING CODE 4915–01–P

SURFACE TRANSPORTATION BOARD

[Docket No. AB 55 (Sub-No. 756X)]

CSX Transportation, Inc.—Discontinuance of Service Exemption—in Letcher County, KY

CSX Transportation, Inc. (CSXT), filed a verified notice of exemption under 49 CFR part 1152 subpart F—*Exempt Abandonments and Discontinuances of Service* to discontinue service over an approximately 1.17-mile line of railroad (the Line), on its Southern Region, Huntington Division, Rockhouse Subdivision, Engineering Appalachian Division (also known as the Pat Kentucky Wye), from mileposts 0VM 280.36 and 0VM1 280.39 to milepost 0VM 281.32 in Camp Branch, Letcher County, KY.[1] The Line traverses United States Postal Service Zip Code 41858.

CSXT has certified that: (1) No local traffic has moved over the Line for at least two years; (2) there is no overhead traffic on the Line; (3) no formal complaint filed by a user of rail service on the Line (or by a state or local government entity acting on behalf of such user) regarding cessation of service over the Line either is pending before the Surface Transportation Board or any U.S. District Court or has been decided in favor of a complainant within the two-year period; and (4) the requirements at 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to this exemption, any employee adversely affected by the discontinuance shall be protected under *Oregon Short Line Railroad—Abandonment Portion Goshen Branch Between Firth & Ammon, in Bingham & Bonneville Counties, Idaho,* 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance (OFA) to subsidize continued rail service has been received, this exemption will become effective on May 27, 2016 (50 days after the filing of the exemption), unless stayed pending reconsideration. Petitions to stay that do not involve environmental issues and formal expressions of intent to file an OFA to subsidize continued rail service under 49 CFR 1152.27(c)(2)[2] must be

[1] A redacted version of the draft trackage rights agreement between SERC and NS was filed with the notice. NS states that an unredacted version of the agreement will be provided to any requesting party upon the issuance by the Board of an appropriate protective order. NS also states that it will submit an executed copy of the agreement within 10 days of its execution, pursuant to 49 CFR 1180.6(a)(7)(ii).

[1] CSXT states there is one station on the Line, Sapphire, at milepost 0VM 281.0 (FSAC 42918/OPSL 17470).

[2] Each OFA must be accompanied by the filing fee, which is currently set at $1,600. *See* 49 CFR 1002.2(f)(25).

filed by May 9, 2016.[3] Petitions to reopen must be filed by May 17, 2016, with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423–0001.

A copy of any petition filed with the Board should be sent to CSXT's representative: Louis E. Gitomer, 600 Baltimore Ave., Suite 301, Towson, MD 21204.

If the verified notice contains false or misleading information, the exemption is void ab initio.

Because there will be an environmental review during an abandonment, this discontinuance does not require an environmental review.

Board decisions and notices are available on our Web site at *WWW.STB.DOT.GOV.*

Decided: April 21, 2016.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

Kenyatta Clay,

Clearance Clerk.

BILLING CODE 4915–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Summary Notice No. PE–2016–56]

Petition for Exemption; Summary of Petition Received; O'Connor Aerial Videos Editing LLC

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice.

SUMMARY: This notice contains a summary of a petition seeking relief from specified requirements of Title 14 of the Code of Federal Regulations. The purpose of this notice is to improve the public's awareness of, and participation in, the FAA's exemption process. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of the petition or its final disposition.

DATES: Comments on this petition must identify the petition docket number and must be received on or before May 17, 2016.

ADDRESSES: Send comments identified by docket number FAA–2015–1928 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and follow the online instructions for sending your comments electronically.
- *Mail:* Send comments to Docket Operations, M–30; U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE., Room W12–140, West Building Ground Floor, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.
- *Fax:* Fax comments to Docket Operations at 202–493–2251.

Privacy: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *http://www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *http://www.dot.gov/privacy.*

Docket: Background documents or comments received may be read at *http://www.regulations.gov* at any time. Follow the online instructions for accessing the docket or go to the Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Federal Aviation Administration

Aviation Rulemaking Advisory Committee—New Task

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of a new task assignment for the Aviation Rulemaking Advisory Committee.

SUMMARY: The FAA assigned the Aviation Rulemaking Advisory Committee (ARAC) a new task to provide recommendations regarding bird strike protection rulemaking, policy, and guidance for normal category rotorcraft and to provide recommendations to enhance the existing bird strike protection standards for transport category rotorcraft. The FAA amended its regulations to incorporate bird strike protection rules for transport category rotorcraft in 1996. Data shows an increase in the bird population and weight has resulted in an increase in bird strikes with both normal category rotorcraft and transport category rotorcraft. The increase in bird strikes has led to more frequent bird penetration into the cockpit and cabin areas, elevating the risk of potential serious injuries or fatalities to occupants. Direct bird impact to the pilot has led to partial or complete pilot incapacitation in numerous cases, increasing the risk of fatalities.

This notice informs the public of the new ARAC activity and solicits membership for the Rotorcraft Bird Strike Working Group.

FOR FURTHER INFORMATION CONTACT: Gary B. Roach, Federal Aviation Administration, 10101 Hillwood Parkway, Fort Worth, TX 76177, *Gary.B.Roach@faa.gov,* phone number 817–222–5110, facsimile number 817–222–5961.

SUPPLEMENTARY INFORMATION:

ARAC Acceptance of Task

As a result of the March 23, 2016, ARAC meeting, the FAA assigned and ARAC accepted this task establishing the Rotorcraft Bird Strike Working Group. The Rotorcraft Bird Strike Working Group will serve as staff to the ARAC and provide advice and recommendations on the assigned task. The ARAC will review and accept the recommendation report and will submit it to the FAA.

Background

The FAA established the ARAC to provide information, advice, and recommendations on aviation-related

issues that could result in rulemaking, to the FAA Administrator, through the Associate Administrator of Aviation Safety.

In 1996, a bird strike protection rule (14 CFR 29.631) was adopted requiring that transport category rotorcraft be designed to ensure continued safe flight and landing (for Category A) or safe landing (for Category B) following an impact with a 2.2-pound bird. At that time, bird strike protection was not adopted for normal category rotorcraft. As of 2015, normal category rotorcraft comprise over 90% of rotorcraft operating in the U.S. The data from the FAA's Wildlife Strike Database indicates about 75% of reported bird strikes from 1990–2013 were with normal category rotorcraft. These percentages suggest that the absence of bird strike protective requirements for normal category rotorcraft results in increased risk for the majority of U.S. rotorcraft.

Further analysis of rotorcraft data from the FAA's Wildlife Strike Database indicates a 68% increase in bird strikes since 2009 and more than a 700% increase since the early 2000s. In raw numbers, the percentages translate from around 25 reports of rotorcraft bird strikes per year in the early 2000s, to 121 strikes in 2009, to 204 strikes in 2013. Using rotorcraft flight hours to perform a rate-based analysis, reported bird strikes increased 49% in the five year period from 2010 to 2014 (3.99 per 100,000 flight hours to 5.95 per 100,000 flight hours). Better event reporting accounts for some of this increase, but the rapid escalation goes beyond reporting improvements alone. One conjecture is the increase may be caused by the growing population of birds in general, a growing population of larger birds, quieter aircraft, and an increase in the number of rotorcraft operations.

In addition to the increased frequency of bird strikes, the FAA has observed increased strikes to the rotorcraft windscreen area with a force of impact that has directly endangered occupants and elevated the risk to safe rotorcraft operations. Bird penetration into the cockpit and cabin areas has become increasingly common, elevating the probability of potential serious injuries or fatalities to occupants. Moreover, direct bird impact to the pilot has led to partial or complete pilot incapacitation in numerous cases, often causing an increased risk for loss of control of the rotorcraft and fatalities. The typical scenario is that the bird strikes and shatters a portion of the front windscreen. The bird's remains, as well as damaged portions of the rotorcraft (such as the windscreen), either hit the pilot in the head, neck, or upper torso, or proceed through the cockpit to strike the passengers or crew.

These recent observations reinforce previous findings from the study, *Bird Strikes to Civil Helicopters in the United States, 1990–2005* (2006), by Cleary, Dolbeer, and Wright, based on 15 years of data from the FAA's National Wildlife Database. The study concluded that: (1) Helicopters were significantly more likely to be damaged by bird strikes than airplanes, (2) windshields on helicopters were more frequently struck and damaged than windshields on airplanes, and (3) helicopter bird strikes were more likely to lead to injuries to crew or passengers than airplane bird strikes. The NTSB referenced these same findings in its accident report of a 2009 fatal rotorcraft accident in Morgan City, LA, where a bird strike was determined to be the probable cause of the accident (NTSB Aircraft Accident Report No. CEN09MA117).

Some bird strike events where the bird penetrates the cockpit and cabin have received less attention either because the damage was limited to the windscreen or because the injury to the crew and passengers was minor. However, a superficial examination of the rotorcraft damage and occupant injury levels is misleading. The FAA has found that most of these cases had less to do with the sufficiency of aircraft design and equipage, and more to do with the crew's personal protective gear—such as helmets—that mitigated the potential event severity. Other cases of low severity are the result of fortuitous circumstance. One specific example occurred during a March 2015 police operation in Dallas, Texas, where a bird penetrated the cockpit and struck the pilot, who was not wearing a helmet. The pilot was incapacitated by the impact and—under ordinary circumstances—the event would likely have led to a fatal outcome from loss of rotorcraft control. However, the left seat occupant happened to be a rated helicopter pilot, something that was not typical for the police operation being conducted. The left seat occupant then assumed control of the rotorcraft and landed without incident. The result was an event with a low-severity outcome, but the underlying lesson from the relatively benign consequence cannot be dismissed.

While the absence of any bird strike requirements for normal category rotorcraft must be addressed, data shows that bird strikes with transport category rotorcraft are a growing concern, especially encounters with larger birds. Transport category rotorcraft are more likely to spend extended time in the en route phase of flight and fly at higher altitudes. While the higher altitude would appear to reduce the probability of encountering bird strike, data shows an increased altitude does not mitigate the severity of damage when a bird strike occurs. A United States Department of Agriculture (USDA) study found that, of the 32 damaging strikes that occurred to U.S. rotorcraft in 2014, 72% of those occurred *more than* 500 feet above ground level. The study opined that the more severe damage was likely attributable to the higher speed of the rotorcraft during the en route phase of flight. The increased exposure of transport category rotorcraft in this environment suggests the existing 2.2-pound bird strike requirement may not be adequate.

Whether normal category or transport category, the unique operating profile of a helicopter leads to a different exposure to bird strike risk than does fixed-wing aircraft. The study, *Wildlife strikes to civil helicopters in the U.S., 1990–2011* (2013) by Washburn, Cisar, and Default, discusses some of the differences. It concluded that, unlike with fixed-wing aircraft, helicopter bird strikes occur with greatest frequency during the en route phase of flight and in the off-airfield environment. It credits bird strikes that occur in the off-airfield environment as accounting for the majority of bird strike-related human injuries and fatalities for helicopters. Since helicopters operate at much lower altitudes than fixed-wing aircraft, the exposure to the risk of a bird strike is not limited to the departure and arrival phases of flight, but instead remains for the duration of the flight profile.

The Task

The Rotorcraft Bird Strike Working Group will provide advice and recommendations to the ARAC on bird strike protection rulemaking, policy, and guidance for parts 27 and 29. The Rotorcraft Bird Strike Working Group is tasked to:

1. For normal category rotorcraft, specifically advise and make written recommendations on how to incorporate bird strike protection requirements into the part 27 airworthiness standards for newly type certificated rotorcraft.

2. For normal category rotorcraft, specifically advise and make written recommendations on how the bird strike protection requirements in Task 1 should be made effective via § 27.2 for newly manufactured rotorcraft.

3. For transport category rotorcraft, specifically advise and make written recommendations on how to enhance

the § 29.631 bird strike protection airworthiness standard in light of increases in bird weight and increased exposure to bird strikes for newly type certificated rotorcraft.

4. For transport category rotorcraft, specifically advise and make written recommendations on how the bird strike protection requirements in Task 3 should be made effective via § 29.2 for newly manufactured rotorcraft.

5. For normal and transport category rotorcraft, specifically advise and make written recommendations on incorporating rotorcraft bird strike protection improvements and standards into the existing rotorcraft fleet.

6. For Tasks 1 through 5, consider existing non-traditional bird strike protection technology, including the use of aircraft flight manual limitations (such as requiring airspeed limitations at lower altitudes), when making the recommendations. These considerations must include: An evaluation of the effectiveness of such technology, assumptions used as part of that evaluation, validation of those assumptions, and any procedures to be used for operation with the technology or with the aircraft limitations.

7. Based on the recommendations in Tasks 1 through 6, specifically advise and make written recommendations for the associated policy and guidance.

8. Based on the Rotorcraft Bird Strike Working Group recommendations, perform the following:

a. Estimate what the regulated parties would do differently as a result of the proposed recommendation and how much it would cost.

b. Estimate the safety improvements of future bird encounters from the proposed recommendations.

c. Estimate any other benefits (*e.g.,* reduced administrative burden) or costs that would result from implementation of the recommendations.

9. Develop a report containing recommendations on the findings and results of the tasks explained above. The report should document:

a. Both majority and dissenting positions on the findings and the rationale for each position.

b. Any disagreements, including the rationale for each position and the reasons for the disagreement.

10. The working group may be reinstated to assist the ARAC in responding to the FAA's questions or concerns after the recommendation report has been submitted.

Schedule

The recommendation report should be submitted to the FAA for review and acceptance no later than 18 months after publication of this notice in the **Federal Register**.

Working Group Activity

The Rotorcraft Bird Strike Working Group must comply with the procedures adopted by the ARAC as follows:

1. Conduct a review and analysis of the assigned tasks and any other related materials or documents.

2. Draft and submit a work plan for completion of the task, including the rationale supporting such a plan, for consideration by the ARAC.

3. Provide a status report at each ARAC meeting.

4. Draft and submit the recommendation report based on review and analysis of the assigned tasks.

5. Present the recommendation report at the ARAC meeting.

Participation in the Working Group

The Rotorcraft Bird Strike Working Group will be comprised of technical experts having an interest in the assigned task. A working group member need not be a member representative of the ARAC. The FAA would like a wide range of members (normal category rotorcraft manufacturers, transport category rotorcraft manufacturers, and rotorcraft operators from various segments of the industry such as oil and gas exploration, emergency medical services, and air tour operators) to ensure all aspects of the tasks are considered in development of the recommendations. The provisions of the August 13, 2014, Office of Management and Budget guidance, ''Revised Guidance on Appointment of Lobbyists to Federal Advisory Committees, Boards, and Commissions'' (79 FR 47482), continues the ban on registered lobbyists participating on Agency Boards and Commissions if participating in their ''individual capacity.'' The revised guidance now allows registered lobbyists to participate on Agency Boards and Commissions in a ''representative capacity'' for the ''express purpose of providing a committee with the views of a nongovernmental entity, a recognizable group of persons or nongovernmental entities (an industry, sector, labor unions, or environmental groups, etc.) or state or local government.'' (For further information, see Lobbying Disclosure Act of 1995 as amended, 2 U.S.C. 1603, 1604, and 1605.)

If you wish to become a member of the Rotorcraft Bird Strike Working Group, write the person listed under the caption **FOR FURTHER INFORMATION CONTACT** expressing that desire. Describe your interest in the task and state the expertise you would bring to the working group. The FAA must receive all requests by May 27, 2016. The ARAC and the FAA will review the requests and advise you whether or not your request is approved.

If you are chosen for membership in the working group, you must actively participate in the working group, attend all meetings, and provide written comments when requested. You must devote the resources necessary to support the working group in meeting any assigned deadlines. You must keep your management and those you may represent advised of working group activities and decisions to ensure the proposed technical solutions do not conflict with the position of those you represent. Once the working group has begun deliberations, members will not be added or substituted without the approval of the ARAC Chair, the FAA, including the Designated Federal Officer, and the Working Group Chair.

The Secretary of Transportation determined the formation and use of the ARAC is necessary and in the public interest in connection with the performance of duties imposed on the FAA by law.

The ARAC meetings are open to the public. However, meetings of the Rotorcraft Bird Strike Working Group are not open to the public, except to the extent individuals with an interest and expertise are selected to participate. The FAA will make no public announcement of working group meetings.

Issued in Washington, DC, on April 19, 2016.

Lirio Liu,

Designated Federal Officer, Aviation Rulemaking Advisory Committee.

Issued in Washington, DC, on April 15, 2016.

Dale Bouffiou,

Acting Director, Office of Rulemaking.

Petition for Exemption

Docket No.: FAA–2016–2750.
Petitioner: Bombardier Aerospace.
Section(s) of 14 CFR Affected: § 25.901(c).

Description of Relief Sought: Bombardier Aerospace requests relief from the requirements of 14 CFR 25.901(c) as it relates to potential single failures within the throttle quadrant assembly of the Model BD–500–1A10 and BD–500–1A11 airplanes that could result in an engine uncontrolled high thrust event. Such an event can be catastrophic under certain takeoff and landing scenarios.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Summary Notice No. 2016–61]

Petition for Exemption; Summary of Petition Received: Airbus SAS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petition for exemption received.

SUMMARY: This notice contains a summary of a petition seeking relief from specified requirements of 14 CFR. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of the petition or its final disposition.

DATES: Comments on this petition must identify the petition docket number involved and must be received on or before May 9, 2016.

ADDRESSES: You may send comments identified by Docket Number FAA–2016–6120 using any of the following methods:

- *Government-wide rulemaking Web site:* Go to *http://www.regulations.gov* and follow the instructions for sending your comments electronically.
- *Mail:* Send comments to the Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590.
- *Fax:* Fax comments to the Docket Management Facility at 202–493–2251.
- *Hand Delivery:* Bring comments to the Docket Management Facility in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Privacy: We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. Using the search function of our docket Web site, anyone can find and read the comments received into any of our dockets, including the name of the individual sending the comment (or signing the comment for an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78).

Docket: To read background documents or comments received, go to *http://www.regulations.gov* at any time or to the Docket Management Facility in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Sandra Long, ARM–200, Office of Rulemaking, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591, phone (202) 493–5245, email *sandra.long@faa.gov.*

This notice is published pursuant to 14 CFR 11.85.

Issued in Washington, DC, on April 20, 2016.

James M. Crotty,

Acting Director, Office of Rulemaking.

Petition for Exemption

Docket No.: FAA–2016–6120.
Petitioner: Airbus SAS.
Section of 14 CFR Affected: 14 CFR 25.865, 25.901(c), 25.1181, and 25.1191.
Description of Relief Sought: Airbus seeks time-limited relief from the requirements for fire protection of flight controls, engine mounts, and other flight structure; and designated fire zones and firewalls.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2016–0102]

Broker and Freight Forwarder Financial Responsibility Roundtable

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of meeting, request for public comment.

SUMMARY: FMCSA announces that it will host an informal roundtable discussion pertaining to property broker and freight forwarder financial responsibility. The meeting will focus on the adequacy of existing trust fund industry practices, Federal requirements for such institutions, and the underlying instruments they issue for use by brokers and freight forwarders submitting the Broker's or Freight Forwarder's Trust Fund Agreement (FMCSA Form BMC–85) to satisfy the

Agency's financial responsibility rules. The Agency seeks information from motor carriers and shippers that have experienced challenges receiving compensation for claims against freight forwarders and brokers due to insufficient funds. The meeting will be public. Individuals with diverse experience, expertise, and perspectives are encouraged to attend. This meeting does not pertain to increasing motor carrier, broker, or freight forwarder minimum financial responsibility limits. If all comments have been exhausted prior to the end of the session, the session may conclude early.

DATES: The roundtable discussion will be held on Friday, May 20, 2016, from 9:30 a.m. to 4:30 p.m., Eastern Time (ET) at the U. S. Department of Transportation, Media Center, 1200 New Jersey Avenue SE., Ground Floor, Washington, DC 20590. The entire proceedings will be public.

ADDRESSES: You may submit comments bearing the Federal Docket Management System Docket ID (FMCSA–2016–0102) using any of the following methods:

Federal eRulemaking Portal: Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.

Mail: Docket Management Facility: U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590.

Hand Delivery or Courier: West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays.

Fax: 1–202–493–2251.

Each submission must include the Agency name and the docket number for this notice. Note that DOT posts all comments received without change to *www.regulations.gov,* including any personal information included in a comment. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments, go to *www.regulations.gov* at any time or visit Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The online Federal document management system is available 24 hours each day, 365 days each year. If you would like acknowledgment that the Agency received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments online. The docket FMCSA–2016–0102 will remain open indefinitely.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

FOR FURTHER INFORMATION CONTACT: *For information concerning this notice,* contact Dr. Gerald Folsom, Office of Registration and Safety Information, (202) 385–2405, or by email at *Gerald.folsom@dot.gov.*

For information about the public meeting: Ms. Shannon L. Watson, Senior Policy Advisor, Federal Motor Carrier Safety Administration, 1200 New Jersey Avenue SE., Washington, DC 20590, by telephone at 202–366–2551, or by email at *Shannon.Watson@dot.gov.* If you have questions on viewing or submitting material to the docket, contact Docket Services at 202–366–9826. Business hours are from 8:00 a.m. to 4:30 p.m. ET, Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages participation in the roundtable discussion and the submission of comments and related materials. Documents for discussion at the meeting should be submitted to the docket at least 7 business days in advance of the meeting.

A. Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2016–0102), indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these methods. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov* and put the docket number, ''FMCSA–2016–0102'' in the ''Keyword'' box and click ''Search.'' When the new screen appears, click on the ''Comment Now!''' button and type your comment into the text box in the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

Confidential Business Information

Confidential Business Information (CBI) is commercial or financial information that is customarily not made available to the general public by the submitter. Under the Freedom of Information Act, CBI is eligible for protection from public disclosure. If you have CBI that is relevant or responsive to this Notice, it is important that you clearly designate the submitted comments as CBI. Accordingly, please mark each page of your submission as ''confidential'' or ''CBI.'' Submissions designated as CBI and meeting the definition noted above will not be placed in the public docket of this Notice. Submissions containing CBI should be sent to Mr. Brian Dahlin, Chief, Regulatory Analysis Division, 1200 New Jersey Avenue SE., Washington, DC 20590. Any commentary that FMCSA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

FMCSA will consider all comments and materials received during the comment period.

B. Viewing Comments and Documents

To view comments, go to *http://www.regulations.gov* and insert the docket number, ''FMCSA–2016–0102'' in the ''Keyword'' box and click ''Search.'' Next, click the ''Open Docket Folder'' button and choose the document listed to review. If you do not have access to the internet, you may view the docket by visiting the Docket Management Facility in Room W12–140 on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

II. Background

MAP–21 Section 32918

In the Moving Ahead for Progress in the 21st Century Act (MAP–21) (Pub. L. 112–141), Congress enacted Section 32918, Financial Security of Brokers and Freight Forwarders. Section 32918

raised the financial security amount for brokers to $75,000 and extended the financial security requirement to freight forwarders for the first time. FMCSA implemented those requirements in a 2013 Omnibus rulemaking (78 FR 60226) (Oct. 1, 2013), codified at 49 CFR 387.307(a) (brokers) and 49 CFR 387.403(c) and 387.405 (freight forwarders). Brokers or Freight Forwarders are required to have either a BMC–84 Surety Bond or BMC–85 trust fund on file with the Agency as a condition of obtaining FMCSA operating authority.

MAP–21 added requirements pertaining to the composition of trust fund assets (49 U.S.C. 13906(b)(1)(C),(c)(1)(D)), the immediate suspension of broker or freight forwarder operating authority if their financial security falls below $75,000 (49 U.S.C. 13906(b)(5),(c)(6)), and the payment of claims in the event of financial failure or insolvency (49 U.S.C. 13906(b)(6),(c)(7)). Additionally, it gave FMCSA the authority to take direct enforcement action against surety providers, either through administrative proceedings, court action or suspending their ability to make financial security filings with the agency. (49 U.S.C. 13906(b)(7),(c)(8)).

Since MAP–21's enactment, various parties have filed numerous complaints with the agency pertaining to BMC–85 trust fund providers. Multiple entities have sought guidance from the Agency, pertaining to the portions of section 32918 not covered in the omnibus rule, particularly regarding procedures to be followed in connection with the insolvency or financial failure of a broker.

As an agency whose primary mission is to promote motor carrier safety, 49 U.S.C. 113(c), FMCSA requests additional input from stakeholders in connection with broker/freight forwarder financial security. The Agency seeks to ensure that shippers and motor carriers can collect on the required broker/freight forwarder financial instruments and that appropriate guidance on section 32918 is available to interested parties while avoiding the diversion of Agency resources from critical safety functions. The Agency believes that this roundtable discussion will help gather critical information on how to best meet its responsibilities pursuant to section 32918.

FMCSA seeks attendance or participation by all interested parties at the roundtable discussion, including but not limited to, various aspects of the brokerage and freight forwarding industries (including small business segments of the industry and their representatives), motor carriers (including the household goods industry), shippers, owner-operators, the surety bond industry, BMC–85 trust fund filers, groups representing small businesses, state regulators of loan and finance companies and insurance companies, Federal surety bond regulators and all other interested parties.

As a result of this roundtable discussion, FMCSA hopes to develop a clear path toward implementing fully section 32918 of MAP–21.

Topics for Roundtable Discussion

FMCSA welcomes comments or questions before and during the roundtable discussion. The roundtable will center on the following questions but may be expanded as necessary for a full discussion of the relevant issues:

(1) Which, if any, BMC–85 Trust Fund holders routinely deny claims made by shippers and motor carriers against those trust funds?

(2) What is the nature of the assets that are being held in BMC–85 trust funds and what is the most desirable composition of the assets? For example, should trust funds consist solely of cash or other highly liquid financial instruments? What types of instruments constitute ''highly liquid?'' Aside from cash, what else can satisfy MAP–21's mandate that trust funds consist of ''readily available assets . . . ?'' Should the Agency define the classes of investments held in trust relative to risk profile of the issuer and identify the relative liquidity of such assets or should it rely on other sources for such information?

(3) Aside from FMCSA, are BMC–85 trust fund filers being regulated by any other governmental entity? If so, what is the nature of their regulation by state or other authorities?

(4) What actions can FMCSA take to ensure that motor carriers and shippers are able to collect on BMC–85 trust funds where legitimate claims are filed with the financial institution?

(5) Should the Agency act to address potential issues associated with the solvency of BMC–85 trust funds? If so, what type of action would be most appropriate? What type of FMCSA action pertaining to 49 U.S.C. 13906(b)(6) and (c)(7)(payment in cases of financial failure or insolvency) is necessary? Would agency guidance, as opposed to rulemaking, be sufficient?

(6) Should FMCSA require brokers and freight forwarders to demonstrate the creditworthiness of the entity with whom brokers or freight forwarders intend to execute a trust fund, based on a determination of creditworthiness by the applicable state regulatory authority or the Department of Treasury Financial Management Service?

FMCSA will utilize the comments received in advance of the roundtable discussion to further frame the issues.

Accessibility Needs

The U.S. Department of Transportation is committed to providing equal access to the roundtable discussion. If you need special accommodations for the roundtable, such as sign language interpretation, please contact Ms. Shannon L. Watson, Senior Policy Advisor, FMCSA, by telephone at 202–366–2551, at least one week prior to the event to allow us sufficient time to arrange for such services. We will make every attempt to fulfill requested accommodations.

Issued on: April 21, 2016.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

Petition for Exemption from the Federal Motor Vehicle Theft Prevention Standard; BMW OF NORTH AMERICA, LLC

AGENCY: National Highway Traffic Safety Administration (NHTSA) Department of Transportation (DOT).

ACTION: Grant of petition for exemption.

SUMMARY: This document grants in full the BMW of North America, LLC's (BMW) petition for an exemption of the MINI Countryman multi-purpose passenger vehicle (MPV) line in accordance with 49 CFR part 543, *Exemption from the Theft Prevention Standard.* This petition is granted because the agency has determined that the antitheft device to be placed on the line as standard equipment is likely to be as effective in reducing and deterring motor vehicle theft as compliance with the parts-marking requirements of 49 CFR part 541, *Federal Motor Vehicle Theft Prevention Standard* (Theft Prevention Standard). BMW requested confidential treatment for specific information in its petition that the agency will address by separate letter.

DATES: The exemption granted by this notice is effective beginning with the 2017 model year (MY).

FOR FURTHER INFORMATION CONTACT: Ms. Carlita Ballard, Office of International

Policy, Fuel Economy and Consumer Programs, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE., West Building, Room W43–439, Washington, DC 20590. Ms. Ballard's telephone number is (202) 366–5222. Her fax number is (202) 493–2990.

SUPPLEMENTARY INFORMATION: In a petition dated March 25, 2016, BMW requested an exemption from the parts-marking requirements of the Theft Prevention Standard for the MINI Countryman MPV line beginning with MY 2017. The petition requested an exemption from parts-marking pursuant to 49 CFR part 543, *Exemption from Vehicle Theft Prevention Standard,* based on the installation of an antitheft device as standard equipment for the entire vehicle line.

Under 49 CFR part 543.5(a), a manufacturer may petition NHTSA to grant an exemption for one vehicle line per model year. In its petition, BMW provided a detailed description and diagram of the identity, design, and location of the components of the antitheft device for its MINI Countryman MPV line. Key features of the antitheft device will include a key with a transponder, loop antenna (coil), engine control unit (DME/DDE) with encoded start release input, an electronically coded vehicle immobilizer/car access system (EWS/CAS) control unit and a passive immobilizer. BMW stated that its MINI Countryman MPV line will be installed with a passive vehicle immobilizer device as standard equipment. BMW stated that the EWS immobilizer device prevents the vehicle from being driven away under its own engine power and also fulfills the requirements of European vehicle insurance companies. BMW will not offer an audible or visible alarm feature on the proposed device.

BMW's submission is considered a complete petition as required by 49 CFR 543.7, in that it meets the general requirements contained in § 543.5 and the specific content requirements of § 543.6.

In addressing the specific content requirements of Part 543.6, BMW provided information on the reliability and durability of its device. To ensure reliability and durability of the device, BMW conducted tests and believes that the device is reliable and durable because it complied with its own specific standards and is installed on other vehicle lines for which the agency has granted a parts-marking exemption. Further assuring the reliability and durability of the MINI Countryman's antitheft device, BMW stated that the vehicle's mechanical keys are unique because they require a special key blank, cutting machine and a unique vehicle code to allow for key duplication. BMW further stated that the new keys will only be issued to authorized persons and will incorporate special guide-way millings, making the locks almost impossible to pick and the keys impossible to duplicate on the open market.

BMW stated that activation of its immobilizer device occurs automatically when the engine is shut off and the vehicle key is removed from the ignition lock cylinder. Deactivation of the device occurs when the Start/Stop button is pressed and the vehicle starting process begins. BMW stated that deactivation cannot be carried out with a mechanical key, but must occur electronically. Specifically, BMW stated that its transponder sends key data to the EWS/CAS control unit. The correct key data must be recognized by the EWS/CAS control unit in order for the vehicle to start. The transponder contains a chip which is integrated in the key and powered by a battery. The transponder also consists of a transmitter/receiver which communicates with the EWS/CAS control unit. The EWS/CAS control unit provides the interface to the loop antenna (coil), engine control unit and starter. The ignition and fuel supply are only released when a correct coded release signal has been sent by the EWS/CAS control unit to deactivate the device and allow the vehicle to start. When the EWS/CAS control unit has sent a correct release signal, and after the initial starting value, the release signal becomes a rolling, ever-changing, random code that is stored in the DME/DDE and EWS/CAS control units. The DME/DDE must identify the correct release signal to release the ignition signal and fuel supply.

BMW stated that the vehicle is also equipped with a central-locking system that can be operated to lock and unlock all doors or to unlock only the driver's door, thereby preventing forced entry into the vehicle through the passenger doors. The vehicle can be further secured by locking the doors and hood using either the key lock cylinder on the driver's door or the remote frequency remote control. BMW stated that the frequency for the remote control constantly changes to prevent an unauthorized person from opening the vehicle by intercepting the signals of its remote control.

BMW further stated that all of its vehicles are currently equipped with antitheft devices as standard equipment, including its MINI Countryman MPV line. BMW compared the effectiveness of its antitheft device with devices which NHTSA has previously determined to be as effective in reducing and deterring motor vehicle theft as would compliance with the parts-marking requirements of Part 541. Specifically, BMW has installed its antitheft device on its X1 (MPV and passenger cars), X3, X4 and X5 vehicle lines, as well as its Carline 1, 3, 4, 5, 6, 7, Z4, and MINI vehicle lines, all which have been granted parts-marking exemptions by the agency. BMW asserts that theft data have indicated a decline in theft rates for vehicle lines that have been equipped with antitheft devices similar to that which it proposes to install on the MINI Countryman MPV line. BMW also stated that for MY/CY 2011, the agency's data show that theft rates for its lines are: 0.34 (1-series), 0.69 (3-series), 1.26 (5-series), 2.47 (6-series) 1.66 (7-series), 0.24 (X1), 0.68 (X3), 2.02 (Z4), and 0.32 (MINI Cooper). Using an average of 3 MYs data (2011–2013), NHTSA's theft rates for BMW's 1 series, 3 series, 5 series, 6 series, 7 series, X1, X3, Z4 and MINI Cooper vehicle lines are 0.4954, 0.6581, 0.9935, 2.8054, 1.4711, 0.2356, 0.4961, 1.2843 and 0.3385 respectively, all below the median theft rate of 3.5826.

Based on the supporting evidence submitted by BMW, the agency believes that the antitheft device for the BMW MINI Countryman MPV line is likely to be as effective in reducing and deterring motor vehicle theft as compliance with the parts-marking requirements of the Theft Prevention Standard (49 CFR part 541). The agency concludes that the device will provide four of the five types of performance listed in § 543.6(a)(3): Promoting activation; preventing defeat or circumvention of the device by unauthorized persons; preventing operation of the vehicle by unauthorized entrants; and ensuring the reliability and durability of the device.

Pursuant to 49 U.S.C. 33106 and 49 CFR 543.7(b), the agency grants a petition for exemption from the parts-marking requirements of Part 541, either in whole or in part, if it determines that, based upon supporting evidence, the standard equipment antitheft device is likely to be as effective in reducing and deterring motor vehicle theft as compliance with the parts-marking requirements of Part 541. The agency finds that BMW has provided adequate reasons for its belief that the antitheft device for the MINI Countryman MPV line is likely to be as effective in reducing and deterring motor vehicle theft as compliance with the parts-marking requirements of the Theft Prevention Standard (49 CFR part 541).

This conclusion is based on the information BMW provided about its device.

For the foregoing reasons, the agency hereby grants in full BMW's petition for exemption for the MY 2017 MINI Countryman MPV line from the parts-marking requirements of 49 CFR part 541. The agency notes that 49 CFR part 541, Appendix A–1, identifies those lines that are exempted from the Theft Prevention Standard for a given MY. 49 CFR part 543.7(f) contains publication requirements incident to the disposition of all Part 543 petitions. Advanced listing, including the release of future product nameplates, the beginning model year for which the petition is granted and a general description of the antitheft device is necessary in order to notify law enforcement agencies of new vehicle lines exempted from the parts-marking requirements of the Theft Prevention Standard.

If BMW decides not to use the exemption for this line, it must formally notify the agency. If such a decision is made, the line must be fully marked as required by 49 CFR parts 541.5 and 541.6 (marking of major component parts and replacement parts).

NHTSA notes that if BMW wishes in the future to modify the device on which this exemption is based, the company may have to submit a petition to modify the exemption. Part 543.7(d) states that a Part 543 exemption applies only to vehicles that belong to a line exempted under this part and equipped with the antitheft device on which the line's exemption is based. Further, § 543.9(c)(2) provides for the submission of petitions ''to modify an exemption to permit the use of an antitheft device similar to but differing from the one specified in that exemption.''

The agency wishes to minimize the administrative burden that Part 543.9(c)(2) could place on exempted vehicle manufacturers and itself. The agency did not intend Part 543 to require the submission of a modification petition for every change to the components or design of an antitheft device. The significance of many such changes could be *de minimis.* Therefore, NHTSA suggests that if the manufacturer contemplates making any changes the effects of which might be characterized as *de minimis,* it should consult the agency before preparing and submitting a petition to modify.

Issued in Washington, DC, on April 18, 2016 under authority delegated in 49 CFR part 1.95

Raymond R. Posten,

Associate Administrator for Rulemaking.

BILLING CODE 4910–59–P

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Agency Information Collection Activities: Information Collection Renewal; Comment Request; Interagency Guidance on Asset Securitization Activities

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995 (PRA).

In accordance with the requirements of the PRA, the OCC may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number.

The OCC is soliciting comment concerning renewal of its information collection titled, ''Interagency Guidance on Asset Securitization Activities.''

DATES: Comments must be submitted on or before June 27, 2016.

ADDRESSES: Because paper mail in the Washington, DC area and at the OCC is subject to delay, commenters are encouraged to submit comments by email, if possible. Comments may be sent to: Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, Attention: 1557–0217, 400 7th Street SW., Suite 3E–218, Mail Stop 9W–11, Washington, DC 20219. In addition, comments may be sent by fax to (571) 465–4326 or by electronic mail to *prainfo@occ.treas.gov.* You may personally inspect and photocopy comments at the OCC, 400 7th Street SW., Washington, DC 20219. For security reasons, the OCC requires that visitors make an appointment to inspect comments. You may do so by calling (202) 649–6700 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597. Upon arrival, visitors will be required to present valid government-issued photo identification and submit to security screening in order to inspect and photocopy comments.

All comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

FOR FURTHER INFORMATION CONTACT: Shaquita Merritt, OCC Clearance Officer, (202) 649–5490 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597, Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 400 7th Street SW., Suite 3E–218, Mail Stop 9W–11, Washington, DC 20219.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from OMB for each collection of information that they conduct or sponsor. ''Collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) to include agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the OCC is publishing notice of the proposed collection of information set forth in this document.

Title: Interagency Guidance on Asset Securitization Activities.

OMB Control No.: 1557–0217.

Type of Review: Regular.

Description: This information collection applies to institutions engaged in asset securitization activities and provides that any institution engaged in these activities should maintain a written asset securitization policy, document the fair value of retained interests, and maintain a management information system to monitor asset securitization activities. Institution management uses the information collected to ensure the safe and sound operation of the institution's asset securitization activities. The OCC uses the information to evaluate the quality of an institution's risk management practices.

Affected Public: Businesses or other for-profit.

Burden Estimates:

Estimated Number of Respondents: 35 national banks and Federal savings associations.

Estimated Annual Burden: 1,827 hours.

Frequency of Response: On occasion.

Comments: The comments submitted in response to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the OCC, including whether the information has practical utility;

(b) The accuracy of the OCC's estimate of the information collection burden;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: April 21, 2016.

Mary Hoyle Gottlieb,

Regulatory Specialist, Legislative and Regulatory Activities Division.

BILLING CODE 4810–33–P

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

FEDERAL RESERVE SYSTEM

FEDERAL DEPOSIT INSURANCE CORPORATION

Proposed Agency Information Collection Activities; Comment Request; Correction

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury; Board of Governors of the Federal Reserve System (Board); and Federal Deposit Insurance Corporation (FDIC).

ACTION: Joint notice and request for comment; correction.

SUMMARY: The OCC, the Board, and the FDIC (the agencies) published a notice in the **Federal Register**, 81 FR 22702 (April 18, 2016), concerning Regulatory Capital Reporting for Institutions Subject to the Advanced Capital Adequacy Framework (FFIEC 101). This document corrects the date cited for the initial reporting of the Legal Entity Identifier by advanced approaches banking organizations from March 31, 2016, to September 30, 2016. This notice also extends the comment due date.

DATES: The comment period for the notice published April 18, 2016 (81 FR 22702) is extended. Comments must be submitted on or before June 27, 2016.

FOR FURTHER INFORMATION CONTACT: For further information about the proposed revisions to regulatory reporting requirements discussed in this notice, please contact any of the agency clearance officers whose names appear below. In addition, copies of the proposed revised FFIEC 101 form and instructions can be obtained at the FFIEC's Web site (*http://www.ffiec.gov/ffiec_report_forms.htm*).

OCC: Shaquita Merritt, OCC Clearance Officer, (202) 649–5490, or for persons who are deaf or hard of hearing, TTY, (202) 649–5597, Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 400 7th Street SW., Washington, DC 20219.

Board: Nuha Elmaghrabi, Federal Reserve Board Clearance Officer, (202) 452–3829, Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551. Telecommunications Device for the Deaf (TDD) users may contact (202) 263–4869, Board of Governors of the Federal Reserve System, Washington, DC 20551.

FDIC: Gary A. Kuiper, Counsel, (202) 898–3877, or Manuel E. Cabeza, Counsel, (202) 898–3767, Federal Deposit Insurance Corporation, 550 17th Street NW., Washington, DC 20429.

Correction

In the **Federal Register** of April 18, 2016, in FR Doc. 2016–08892, on page 22706, at the 29th line of the third column, remove ''March 31, 2016'' and add in its place ''September 30, 2016''.

Dated: April 20, 2016.

Stuart Feldstein,

Director, Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency.

Board of Governors of the Federal Reserve System, April 20, 2016.

Robert deV. Frierson,

Secretary of the Board.

Dated at Washington, DC, this 19th day of April, 2016.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Executive Secretary.

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Agency Information Collection Activities: Information Collection Renewal; Submission for OMB Review; Leveraged Lending

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. chapter 35).

In accordance with the requirements of the PRA, the OCC may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number.

The OCC is soliciting comment concerning the renewal of its information collection titled, ''Leveraged Lending.'' The OCC also is giving notice that it has sent the collection to OMB for review.

DATES: Comments must be received by May 27, 2016.

ADDRESSES: Because paper mail in the Washington, DC area and at the OCC is subject to delay, commenters are encouraged to submit comments by email, if possible. Comments may be sent to: Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, Attention: 1557–0315, 400 7th Street SW., Suite 3E–218, Mail Stop 9W–11, Washington, DC 20219. In addition, comments may be sent by fax to (571) 465–4326 or by electronic mail to *prainfo@occ.treas.gov*. You may personally inspect and photocopy comments at the OCC, 400 7th Street SW., Washington, DC 20219. For security reasons, the OCC requires that visitors make an appointment to inspect comments. You may do so by calling (202) 649–6700 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597. Upon arrival, visitors will be required to present valid government-issued photo identification and submit to security screening in order to inspect and photocopy comments.

All comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not

include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

Additionally, please send a copy of your comments by mail to: OCC Desk Officer, 1557–0315, U.S. Office of Management and Budget, 725 17th Street NW., #10235, Washington, DC 20503, or by email to: *oira submission@omb.eop.gov*.

FOR FURTHER INFORMATION CONTACT: Shaquita Merritt, Clearance Officer, (202) 649–5490 or, for persons who are deaf or hard of hearing, TTY, (202) 649–5597, Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 400 7th Street SW., Washington, DC 20219.

SUPPLEMENTARY INFORMATION: The OCC is proposing to extend OMB approval of the following information collection:

Title: Leveraged Lending.

OMB Control No.: 1557–0315.

Description: On March 22, 2013, the agencies [1] issued guidance stating that they expected financial institutions [2] to properly evaluate and monitor underwritten credit risks in leveraged loans, to understand the effect of changes in borrowers' business valuations on credit portfolio quality, and to assess the sensitivity of future credit losses to these changes in business valuations.[3] In underwriting such credits, financial institutions should ensure that borrowers are able to repay credits when due and that borrowers have sustainable capital structures, including bank borrowings and other debt, to support their continued operations through economic cycles. Financial institutions also should be able to demonstrate they understand the risks and the potential impact of stressful events and circumstances on borrowers' financial condition.

The final guidance stated that financial institutions should have: (i) Underwriting policies for leveraged lending, including stress-testing procedures for leveraged credits; (ii) risk management policies, including stress-testing procedures for pipeline exposures; and, (iii) policies and procedures for incorporating the results of leveraged credit and pipeline stress tests into the firm's overall stress-testing framework.

[1] OCC, Board of Governors of the Federal Reserve System, and Federal Deposit Insurance Corporation.

[2] For the OCC, the term ''financial institution'' or ''institution'' includes national banks, Federal savings associations, and Federal branches and agencies supervised by the OCC.

[3] 78 FR 17766 (March 22, 2013).

Respondents are financial institutions with leveraged lending activities as defined in the guidance.

Title: Leveraged Lending.

OMB Control No.: 1557–0315.

Frequency of Response: Annual.

Affected Public: Financial institutions with leveraged lending.

Burden Estimates:

Estimated number of respondents: 29.

Estimated total annual burden: 39,162 hours to build; 49,462 hours for ongoing use.

Total estimated annual burden: 88,624 hours.

Comments: On February 17, 2016, the OCC published a notice for 60 days of comment regarding the collection, 81 FR 8126. The OCC received one comment on the 60-day notice from an individual. The commenter questioned the utility and benefit of the information collection aspects of the guidance compared with the burden. Specifically, the commenter stated the information collections on stress-testing for leveraged lending, including for pipeline exposures, is already contained in other OCC or interagency guidance. The commenter also suggested that the OCC should define a leveraged loan and clarify the limits of acceptable leveraged lending risk.

The OCC believes that the information collections provide utility and benefit, as they can allow banks to monitor more closely their leveraged lending activity. Increased monitoring can improve a bank's response to potential deteriorations in the leveraged lending portfolio. Regarding burden, the leveraged lending information collections are voluntary. If a bank decides that the burdens of certain collections would outweigh the costs, then the bank can choose not to implement those collections. While the OCC has issued other guidance documents on stress-testing, either standalone or on an interagency basis, those documents provide higher-level guidance for stress-testing of all assets and liabilities. The leveraged lending guidance provides additional considerations for stress-testing specifically related to leveraged lending, which is not present in other OCC or interagency guidance.

During the initial issuance of the leveraged lending guidance, the OCC considered whether to establish a single definition of leveraged loan or leveraged lending. However, the agencies concluded that leveraged lending is not homogenous across industries or banks, and did not believe that a ''one-size-fits-all'' definition was appropriate. The OCC continues to believe that those banks following the leveraged lending guidance should have this flexibility in setting the parameters of their leveraged lending and risk management programs.

Comments continue to be requested on:

(a) Whether the information collections are necessary for the proper performance of the OCC's functions, including whether the information has practical utility;

(b) The accuracy of the OCC's estimates of the burden of the information collections, including the validity of the methodology and assumptions used;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of information collections on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: April 21, 2016.

Mary Hoyle Gottlieb,

Regulatory Specialist, Office of the Comptroller of the Currency.

Internal Revenue Service

Open Meeting of the Taxpayer Advocacy Panel Taxpayer Communications Project Committee

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of meeting; correction.

SUMMARY: In the **Federal Register** notice that was originally published on April 14, 2016, (Volume 81, Number 72, Page 22166) the time was written as 3:00 p.m. EST instead of 2:00 p.m. EST. The meeting time is: 2:00 p.m. EST, Thursday, May 19, 2016.

DATES: The meeting will be held Thursday, May 19, 2016.

FOR FURTHER INFORMATION CONTACT: Antoinette Ross at 1–888–912–1227 or (202) 317–4110.

SUPPLEMENTARY INFORMATION: Notice is hereby given pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. (1988) that an open meeting of the Taxpayer Advocacy Panel Taxpayer Communications Project Committee will be held Thursday, May 19, 2016, at 2:00 p.m. Eastern Time via teleconference. The public is invited to make oral

comments or submit written statements for consideration. Due to limited conference lines, notification of intent to participate must be made with Antoinette Ross. For more information please contact: Antoinette Ross at 1–888–912–1227 or (202) 317–4110, or write TAP Office, 1111 Constitution Avenue NW., Room 1509—National Office, Washington, DC 20224, or contact us at the Web site: *http://www.improveirs.org.*

The committee will be discussing various issues related to Taxpayer Communications and public input is welcome.

Dated: April 21, 2016.

Antoinette Ross,

Acting Director, Taxpayer Advocacy Panel.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Multiemployer Pension Plan Application To Reduce Benefits

AGENCY: Department of the Treasury.

ACTION: Notice of availability; request for comments.

SUMMARY: The Board of Trustees of the Iron Workers Local Union 16 Pension Fund, a multiemployer pension plan, has submitted an application to Treasury to reduce benefits under the plan in accordance with the Multiemployer Pension Reform Act of 2014 (MPRA). The purpose of this notice is to announce that the application submitted by the Board of Trustees of the Iron Workers Local Union 16 Pension Fund has been published on the Web site of the Department of the Treasury (Treasury), and to request public comments on the application from interested parties, including contributing employers, employee organizations, and participants and beneficiaries of the Iron Workers Local Union 16 Pension Fund.

DATES: Comments must be received by June 9, 2016.

ADDRESSES: You may submit comments electronically through the Federal eRulemaking Portal at *http://www.regulations.gov,* in accordance with the instructions on that site. Electronic submissions through *www.regulations.gov* are encouraged.

Comments may also be mailed to the Department of the Treasury, MPRA Office, 1500 Pennsylvania Avenue, NW., Room 1224, Washington, DC 20220. Attn: Deva Kyle. Comments sent via facsimile and email will not be accepted.

Additional Instructions. All comments received, including attachments and other supporting materials, will be made available to the public. Do not include any personally identifiable information (such as Social Security number, name, address, or other contact information) or any other information in your comment or supporting materials that you do not want publicly disclosed. Treasury will make comments available for public inspection and copying on *www.regulations.gov* or upon request. Comments posted on the Internet can be retrieved by most Internet search engines.

FOR FURTHER INFORMATION CONTACT: For information regarding the application from the Board of Trustees of the Iron Workers Local Union 16 Pension Fund, please contact Treasury at (202) 622–1534 (not a toll-free number).

SUPPLEMENTARY INFORMATION: The Multiemployer Pension Reform Act of 2014 (MPRA) amended the Internal Revenue Code to permit a multiemployer plan that is projected to have insufficient funds to reduce pension benefits payable to participants and beneficiaries if certain conditions are satisfied. In order to reduce benefits, the plan sponsor is required to submit an application to the Secretary of the Treasury, which Treasury, in consultation with the Pension Benefit Guaranty Corporation (PBGC) and the Department of Labor, is required to approve or deny.

On March 26, 2016, the Board of Trustees of the Iron Workers Local Union 16 Pension Fund submitted an application for approval to reduce benefits under the plan. As required by MPRA, that application has been published on Treasury's Web site at *https://auth.treasury.gov/services/Pages/Plan-Applications.aspx.* Treasury is publishing this notice in the **Federal Register**, in consultation with PBGC and the Department of Labor, to solicit public comments on all aspects of the Iron Workers Local Union 16 Pension Fund application.

Comments are requested from interested parties, including contributing employers, employee organizations, and participants and beneficiaries of the Iron Workers Local Union 16 Pension Fund. Consideration will be given to any comments that are timely received by Treasury.

Dated: April 20, 2016.

David R. Pearl,

Executive Secretary, Department of the Treasury.

BILLING CODE 4810–25–P

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

April 22, 2016.

The Department of the Treasury will submit the following information collection requests to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, Public Law 104–13, on or after the date of publication of this notice.

DATES: Comments should be received on or before May 27, 2016 to be assured of consideration.

ADDRESSES: Send comments regarding the burden estimates, or any other aspect of the information collections, including suggestions for reducing the burden, to (1) Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Treasury, New Executive Office Building, Room 10235, Washington, DC 20503, or email at *OIRA_Submission@OMB.EOP.gov* and (2) Treasury PRA Clearance Officer, 1750 Pennsylvania Ave. NW., Suite 8117, Washington, DC 20220, or email at *PRA@treasury.gov.*

FOR FURTHER INFORMATION CONTACT: Copies of the submissions may be obtained by emailing *PRA@treasury.gov,* calling (202) 622–1295, or viewing the entire information collection request at *www.reginfo.gov.*

Internal Revenue Service (IRS)

OMB Control Number: 1545–0054.

Type of Review: Extension without change of a currently approved collection.

Title: Ownership Certificate.

Form: 1000.

Abstract: Form 1000, Ownership Certificate, is filed with a withholding agent for interest payments on bonds that have a tax-free covenant and that were issued before 1934 by a domestic corporation or a resident or nonresident foreign corporation.

Affected Public: Businesses or other for-profits.

Estimated Annual Burden Hours: 5,040.

OMB Control Number: 1545–0169.

Type of Review: Reinstatement without change of a previously approved collection.

Title: Form 4461: Application for Approval of Master or Prototype Defined Contribution Plan; Form 4461–A: Application for Approval of Master or Prototype Defined Benefit Plan; Form 4461–B: Application for Approval of Master or Prototype or Volume Submitter Plans.

Form: Forms 4461, 4461–A, 4461–B.

Abstract: Form 4461 is used to apply for approval of Master or Prototype (M&P) or Volume Submitter (VS) defined contribution plans. Form 4461–A is used to apply for approval of a M&P or VS defined benefit plan, and Attachment 1–A is submitted with the application. Form 4461–B is used to apply for approval of a plan submitted by a mass submitter on behalf of an adopting sponsor or practitioner, which is based on a plan submitted by the mass submitter.

Affected Public: Businesses or other for-profits.

Estimated Total Annual Burden Hours: 65,765.

OMB Control Number: 1545–1673.

Type of Review: Reinstatement with change of a previously approved collection.

Title: Employee Plans Compliance Resolution System (EPCRS).

Form: Form 14568, Forms 14568–A thru –I, Form 8950, Form 8951.

Abstract: The information requested in Revenue Procedure 2015–27 is required to enable the Internal Revenue Service to make determinations on the issuance of various types of closing agreements and compliance statements. The issuance of the agreements and statements allow individual plans to maintain their tax-qualified status. Applicants under the Voluntary Correction Program (VCP) must file Forms 8950 and 8951, and the appropriate schedule(s) to the applicable part of the model compliance statement, in order to request written approval from the IRS for a correction of a qualified plan that has failed to comply with the requirements of the Internal Revenue Code. Rev. Proc. 2015–28 contains modifications to Rev. Proc. 2013–12, reflecting new safe harbor EPCRS correction methods.

Affected Public: Businesses or other for-profits.

Estimated Annual Burden Hours: 190,941.

OMB Control Number: 1545–1842.

Type of Review: Extension without change of a currently approved collection.

Title: Health Coverage Tax Credit Registration Form.

Form: 13441, 13441–EZ.

Abstract: If eligible, section 35 of the Internal Revenue Code allows a credit for payments made to buy certain types of health coverage during the tax year. Information submitted on Form 13441, Health Coverage Tax Credit Registration Form, is used to determine if a taxpayer qualifies for the advance payment of the Health Coverage Tax Credit (HCTC). Form 13441–EZ is used during an HCTC Program-sponsored group registration for the monthly HCTC Program.

Affected Public: Individuals or Households.

Estimated Annual Burden Hours: 1,800.

OMB Control Number: 1545–1899.

Type of Review: Revision of a currently approved collection.

Title: Timely Mailing Treated As Timely Filing.

Abstract: The revenue procedure provides the criteria that will be used to determine whether a private delivery service (''PDS'') qualifies as a designated private delivery service (''designated PDS'') and also provides the procedures under which a PDS can apply to become a designated PDS. The regulations provide guidance as to the only ways to establish prima facie evidence of delivery of documents that have a filing deadline prescribed by the internal revenue laws, absent direct proof of actual delivery.

Affected Public: Individuals or Households, Businesses or other for-profits.

Estimated Annual Burden Hours: 1,087,834.

OMB Control Number: 1545–2004.

Type of Review: Extension without change of a currently approved collection.

Title: Deduction for Energy Efficient Commercial Buildings.

Abstract: Notice 2006–52 provides a process that allows a taxpayer who owns a commercial building and installs property as part of the commercial building's interior lighting systems, heating, cooling, ventilation, and hot water systems, or building envelope to obtain a certification that the property satisfies the energy efficiency requirements of § 179D(c)(1) and (d) of the Internal Revenue Code. Notice 2008–40 clarifies and amplifies 2006–52.

Affected Public: Businesses or other for-profits.

Estimated Annual Burden Hours: 3,761.

OMB Control Number: 1545–2014.

Type of Review: Extension without change of a currently approved collection.

Title: TD 9452, Application of Separate Limitations to Dividends from Noncontrolled Section 902 Corporations.

Abstract: Final regulations under section 904 of the Internal Revenue Code provide guidance relating to the application of section 904 to dividends paid by a foreign corporation that is a noncontrolled section 902 corporation as defined in section 904(d)(2)(E).

Affected Public: Businesses or other for-profits.

Estimated Annual Burden Hours: 25.

Medicare Program; Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System and Proposed Policy Changes and Fiscal Year 2017 Rates; Quality Reporting Requirements for Specific Providers; Graduate Medical Education; Hospital Notification Procedures Applicable to Beneficiaries Receiving Observation Services; and Technical Changes Relating to Costs to Organizations and Medicare Cost Reports

AGENCY: Centers for Medicare and Medicaid Services (CMS), HHS.

ACTION: Proposed rule.

SUMMARY: We are proposing to revise the Medicare hospital inpatient prospective payment systems (IPPS) for operating and capital-related costs of acute care hospitals to implement changes arising from our continuing experience with these systems for FY 2017. Some of the proposed changes would implement certain statutory provisions contained in the Pathway for Sustainable Growth (SGR) Reform Act of 2013, the Improving Medicare Post-Acute Care Transformation Act of 2014, the Notice of Observation Treatment and Implications for Care Eligibility Act of 2015, and other legislation. We also are providing the estimated market basket update to apply to the rate-of-increase limits for certain hospitals excluded from the IPPS that are paid on a reasonable cost basis subject to these limits for FY 2017.

We are proposing to update the payment policies and the annual payment rates for the Medicare prospective payment system (PPS) for inpatient hospital services provided by long-term care hospitals (LTCHs) for FY 2017.

In addition, we are proposing to make changes relating to direct graduate medical education (GME) and indirect medical education (IME) payments to hospitals with rural track training programs. We are proposing to establish new requirements or revise requirements for quality reporting by specific providers (acute care hospitals, PPS-exempt cancer hospitals, LTCHs, and inpatient psychiatric facilities) that are participating in Medicare, including related provisions for eligible hospitals and critical care hospitals (CAHs) participating in the Electronic Health Record (EHR) Incentive Program. We are proposing to update policies relating to the Hospital Value-Based Purchasing (VBP) Program, the Hospital Readmissions Reduction Program, and the Hospital-Acquired Condition (HAC) Reduction Program. We also are proposing to: Implement statutory provisions that require hospitals and CAHs to furnish notification to Medicare beneficiaries, including Medicare Advantage enrollees, when the beneficiaries receive outpatient observation services for more than 24 hours; announce the implementation of the Frontier Community Health Integration Project Demonstration; and make technical corrections and changes to regulations relating to costs to organizations and Medicare cost reports.

DATES: To be assured consideration, comments must be received at one of the addresses provided in the **ADDRESSES** section, no later than 5 p.m. EDT on June 17, 2016.

ADDRESSES: In commenting, please refer to file code CMS–1655–P. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (no duplicates, please):

1. *Electronically.* You may (and we encourage you to) submit electronic comments on this regulation to *http://www.regulations.gov*. Follow the instructions under the ''submit a comment'' tab.

2. *By regular mail.* You may mail written comments to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1655–P, P.O. Box 8011, Baltimore, MD 21244–1850.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments via express or overnight mail to the following address ONLY: Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1655–P, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

4. *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments before the close of the comment period to either of the following addresses:

a. For delivery in Washington, DC—Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal Government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244–1850.

If you intend to deliver your comments to the Baltimore address, please call the telephone number (410) 786–7195 in advance to schedule your arrival with one of our staff members.

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

For information on viewing public comments, we refer readers to the beginning of the **SUPPLEMENTARY INFORMATION** section.

Electronic Access

Inspection of Public Comments: All public comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all public comments received before the close of the comment period on the following Web site as soon as possible after they have been received: *http://www.regulations.gov*. Follow the search instructions on that Web site to view public comments.

Electronic Access

This **Federal Register** document is also available from the **Federal Register** online database through Federal Digital System (FDsys), a service of the U.S. Government Printing Office. This database can be accessed via the Internet at: *http://www.gpo.gov/fdsys*.

Tables Available Only Through the Internet on the CMS Web Site

In the past, a majority of the tables referred to throughout this preamble and in the Addendum to the proposed rule and the final rule were published in the **Federal Register** as part of the annual proposed and final rules. However, beginning in FY 2012, some of the IPPS tables and LTCH PPS tables are no longer published in the **Federal Register**. Instead, these tables generally will be available only through the Internet. The IPPS tables for this proposed rule are available through the Internet on the CMS Web site at: *http://www.cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*. Click on the link on the left side of the screen titled, ''FY 2017 IPPS Proposed Rule Home Page'' or ''Acute Inpatient—Files for Download''. The LTCHy PPS tables for this FY 2017 proposed rule are available through the Internyet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/LongTermCareHospitalPPS/index.html* under the list item for Regulation Number CMS–1655–P. For further details on the contents of the tables referenced in this proposed rule, we refer readers to section VI. of the Addendum to this proposed rule.

Readers who experience any problems accessing any of the tables that are posted on the CMS Web sites identified above should contact Michael Treitel at (410) 786–4552.

I. Executive Summary and Background

A. Executive Summary

1. Purpose and Legal Authority

This proposed rule would make payment and policy changes under the Medicare inpatient prospective payment systems (IPPS) for operating and capital-related costs of acute care hospitals as well as for certain hospitals and hospital units excluded from the IPPS. In addition, it would make payment and policy changes for inpatient hospital services provided by long-term care hospitals (LTCHs) under the long-term care hospital prospective payment system (LTCH PPS). It also would make policy changes to programs associated with Medicare IPPS hospitals, IPPS-excluded hospitals, and LTCHs.

We are proposing to establish new requirements or revise requirements for quality reporting by specific providers (acute care hospitals, PPS-exempt cancer hospitals, LTCHs, and inpatient psychiatric facilities) that are participating in Medicare, including related provisions for eligible hospitals and critical assess hospitals (CAHs) participating in the Electronic Health Record (EHR) Incentive Program. We are proposing to update policies relating to the Hospital Value-Based Purchasing (VBP) Program, the Hospital Readmissions Reduction Program, and the Hospital-Acquired Condition (HAC) Reduction Program. We also are proposing to: Implement statutory provisions that require hospitals and CAHs to furnish notification to Medicare beneficiaries, including Medicare Advantage enrollees, when the beneficiaries receive outpatient observation services for more than 24 hours; announce the implementation of the Frontier Community Health Integration Project Demonstration; make technical corrections and changes to regulations relating to costs to organizations and Medicare cost reports.

Under various statutory authorities, we are proposing to make changes to the Medicare IPPS, to the LTCH PPS, and to other related payment methodologies and programs for FY 2017 and subsequent fiscal years. These statutory authorities include, but are not limited to, the following:

- Section 1886(d) of the Social Security Act (the Act), which sets forth a system of payment for the operating costs of acute care hospital inpatient stays under Medicare Part A (Hospital Insurance) based on prospectively set rates. Section 1886(g) of the Act requires that, instead of paying for capital-related costs of inpatient hospital services on a reasonable cost basis, the Secretary use a prospective payment system (PPS).
- Section 1886(d)(1)(B) of the Act, which specifies that certain hospitals and hospital units are excluded from the IPPS. These hospitals and units are: Rehabilitation hospitals and units; LTCHs; psychiatric hospitals and units; children's hospitals; and cancer hospitals. Religious nonmedical health care institutions (RNHCIs) are also excluded from the IPPS.
- Sections 123(a) and (c) of Public Law 106–113 and section 307(b)(1) of Public Law 106–554 (as codified under section 1886(m)(1) of the Act), which provide for the development and implementation of a prospective payment system for payment for inpatient hospital services of long-term care hospitals (LTCHs) described in section 1886(d)(1)(B)(iv) of the Act.
- Sections 1814(l), 1820, and 1834(g) of the Act, which specify that payments are made to critical access hospitals (CAHs) (that is, rural hospitals or facilities that meet certain statutory requirements) for inpatient and outpatient services and that these payments are generally based on 101 percent of reasonable cost.
- Section 1866(k) of the Act, as added by section 3005 of the Affordable Care Act, which establishes a quality reporting program for hospitals described in section 1886(d)(1)(B)(v) of the Act, referred to as ''PPS-exempt cancer hospitals.''
- Section 1886(a)(4) of the Act, which specifies that costs of approved educational activities are excluded from the operating costs of inpatient hospital services. Hospitals with approved graduate medical education (GME) programs are paid for the direct costs of GME in accordance with section 1886(h) of the Act.
- Section 1886(b)(3)(B)(viii) of the Act, which requires the Secretary to reduce the applicable percentage increase in payments to a subsection (d) hospital for a fiscal year if the hospital does not submit data on measures in a form and manner, and at a time, specified by the Secretary.
- Section 1886(o) of the Act, which requires the Secretary to establish a Hospital Value-Based Purchasing (VBP) Program under which value-based incentive payments are made in a fiscal year to hospitals meeting performance standards established for a performance period for such fiscal year.
- Section 1886(p) of the Act, as added by section 3008 of the Affordable Care Act, which establishes a Hospital-Acquired Condition (HAC) Reduction Program, under which payments to applicable hospitals are adjusted to provide an incentive to reduce hospital-acquired conditions.
- Section 1886(q) of the Act, as added by section 3025 of the Affordable Care Act and amended by section 10309 of the Affordable Care Act, which establishes the ''Hospital Readmissions Reduction Program'' effective for discharges from an ''applicable hospital'' beginning on or after October 1, 2012, under which payments to those hospitals under section 1886(d) of the Act will be reduced to account for certain excess readmissions.
- Section 1886(r) of the Act, as added by section 3133 of the Affordable Care Act, which provides for a reduction to disproportionate share hospital (DSH) payments under section 1886(d)(5)(F) of the Act and for a new uncompensated care payment to eligible hospitals. Specifically, section 1886(r) of the Act requires that, for fiscal year 2014 and each subsequent fiscal year, subsection (d) hospitals that would otherwise receive a DSH payment made under section 1886(d)(5)(F) of the Act will receive two separate payments: (1) 25 percent of the amount they previously would have received under section 1886(d)(5)(F) of the Act for DSH (''the empirically justified amount''), and (2) an additional payment for the DSH hospital's proportion of uncompensated care, determined as the product of three factors. These three factors are: (1) 75 percent of the payments that would otherwise be made under section 1886(d)(5)(F) of the Act; (2) 1 minus the percent change in the percent of individuals under the age of 65 who are uninsured (minus 0.1 percentage points for FY 2014, and minus 0.2 percentage points for FY 2015 through FY 2017); and (3) a hospital's uncompensated care amount relative to the uncompensated care amount of all DSH hospitals expressed as a percentage.
- Section 1886(m)(6) of the Act, as added by section 1206(a)(1) of the Pathway for SGR Reform Act of 2013 (Pub. L. 113–67), which provided for the establishment of site neutral payment rate criteria under the LTCH PPS with implementation beginning in FY 2016.
- Section 1886(m)(5)(D)(iv) of the Act, as added by section 1206 (c) of the Pathway for SGR Reform Act of 2013, which provides for the establishment of a functional status quality measure under the LTCH QRP for change in

mobility among inpatients requiring ventilator support.

- Section 1899B of the Act, as added by the Improving Medicare Post-Acute Care Transformation Act of 2014 (the IMPACT Act), which imposes data reporting requirements for certain post-acute care providers, including LTCHs.
- Section 1886(d)(12) of the Act, as amended by section 204 of the Medicare Access and CHIP Reauthorization Act of 2015, which extended, through FY 2017, changes to the inpatient hospital payment adjustment for certain low-volume hospitals; and section 1886(d)(5)(G) of the Act, as amended by section 205 of the Medicare Access and CHIP Reauthorization Act of 2015, which extended, through FY 2017, the Medicare-dependent, small rural hospital (MDH) program.

2. Summary of the Major Provisions

a. MS–DRG Documentation and Coding Adjustment

Section 631 of the American Taxpayer Relief Act (ATRA, Pub. L. 112–240) amended section 7(b)(1)(B) of Public Law 110–90 to require the Secretary to make a recoupment adjustment to the standardized amount of Medicare payments to acute care hospitals to account for changes in MS–DRG documentation and coding that do not reflect real changes in case-mix, totaling $11 billion over a 4-year period of FYs 2014, 2015, 2016, and 2017. This adjustment represents the amount of the increase in aggregate payments as a result of not completing the prospective adjustment authorized under section 7(b)(1)(A) of Public Law 110–90 until FY 2013. Prior to the ATRA, this amount could not have been recovered under Public Law 110–90.

While our actuaries estimated that a −9.3 percent adjustment to the standardized amount would be necessary if CMS were to fully recover the $11 billion recoupment required by section 631 of the ATRA in one year, it is often our practice to delay or phase in rate adjustments over more than one year, in order to moderate the effects on rates in any one year. Therefore, consistent with the policies that we have adopted in many similar cases, we made a −0.8 percent recoupment adjustment to the standardized amount in FY 2014, FY 2015, and FY 2016. For FY 2017, we are proposing to make an additional −1.5 percent recoupment adjustment to the standardized amount.

b. Adjustment to IPPS Rates Resulting From 2-Midnight Policy

In this proposed rule, we are proposing a permanent adjustment of (1/0.998) to the standardized amount, the hospital-specific payment rates, and the national capital Federal rate using our authority under sections 1886(d)(5)(I)(i) and 1886(g) of the Act to prospectively remove the 0.2 percent reduction to the rate put in place in FY 2014 to offset the estimated increase in IPPS expenditures as a result of the 2-midnight policy. In addition, we are proposing a temporary one-time prospective increase to the FY 2017 standardized amount, the hospital-specific payment rates, and the national capital Federal rate of 0.6 percent by including a temporary one-time factor of 1.006 in the calculation of the standardized amount, the hospital-specific payment rates, and the national capital Federal rate using our authority under sections 1886(d)(5)(I)(i) and 1886(g) of the Act, to address the effects of the 0.2 percent reduction to the rate for the 2-midnight policy in effect for FYs 2014, 2015, and 2016.

c. Reduction of Hospital Payments for Excess Readmissions

We are proposing to make changes to policies for the Hospital Readmissions Reduction Program, which is established under section 1886(q) of the Act, as added by section 3025 of the Affordable Care Act, as amended by section 10309 of the Affordable Care Act. The Hospital Readmissions Reduction Program requires a reduction to a hospital's base operating DRG payment to account for excess readmissions of selected applicable conditions. For FY 2017 and subsequent years, the reduction is based on a hospital's risk-adjusted readmission rate during a 3-year period for acute myocardial infarction (AMI), heart failure (HF), pneumonia, chronic obstructive pulmonary disease (COPD), total hip arthroplasty/total knee arthroplasty (THA/TKA), and coronary artery bypass graft (CABG). In this proposed rule, to align with other quality reporting programs and allow us to post data as soon as possible, we are clarifying our public reporting policy so that excess readmission rates will be posted to the *Hospital Compare* Web site as soon as feasible following the preview period, and we are proposing the methodology to include the addition of the CABG applicable condition in the calculation of the readmissions payment adjustment for FY 2017.

d. Hospital Value-Based Purchasing (VBP) Program

Section 1886(o) of the Act requires the Secretary to establish a Hospital VBP Program under which value-based incentive payments are made in a fiscal year to hospitals based on their performance on measures established for a performance period for such fiscal year.

In this proposed rule, we are proposing to refine two previously adopted measures beginning with the FY 2019 program year, to update one previously adopted measure beginning with the FY 2021 program year, to adopt two new measures beginning with the FY 2021 program year, and to adopt one new measure beginning with the FY 2022 program year. We also are proposing to change the performance period for one previously adopted measure for the FY 2018 program year and to change the name of the Patient- and Caregiver-Centered Experience of Care/Care Coordination domain to the Person and Community Engagement domain beginning with the FY 2019 program year. In addition, we are proposing changes to the immediate jeopardy citation policy.

e. Hospital-Acquired Condition (HAC) Reduction Program

Section 1886(p) of the Act, as added under section 3008(a) of the Affordable Care Act, establishes an incentive to hospitals to reduce the incidence of hospital-acquired conditions by requiring the Secretary to make an adjustment to payments to applicable hospitals effective for discharges beginning on October 1, 2014. This 1-percent payment reduction applies to a hospital whose ranking is in the top quartile (25 percent) of all applicable hospitals, relative to the national average, of conditions acquired during the applicable period and on all of the hospital's discharges for the specified fiscal year. In this proposed rule, we are proposing the following HAC Reduction Program policies: (1) Establishing NHSN CDC HAI data submission requirements for newly opened hospitals; (2) a clarification of data requirements for Domain 1 scoring; (3) establishing performance periods for the FY 2018 and FY 2019 HAC Reduction Programs, including revising our regulations to accommodate variable timeframes; (4) adopting the refined PSI 90: Patient Safety and Adverse Events Composite (NQF #0531); and (5) changing the program scoring methodology from the current decile-based scoring to a continuous scoring methodology.

f. DSH Payment Adjustment and Additional Payment for Uncompensated Care

Section 3133 of the Affordable Care Act modified the Medicare disproportionate share hospital (DSH) payment methodology beginning in FY

2014. Under section 1886(r) of the Act, which was added by section 3133 of the Affordable Care Act, starting in FY 2014, DSHs will receive 25 percent of the amount they previously would have received under the statutory formula for Medicare DSH payments in section 1886(d)(5)(F) of the Act. The remaining amount, equal to 75 percent of what otherwise would have been paid as Medicare DSH payments, will be paid as additional payments after the amount is reduced for changes in the percentage of individuals that are uninsured. Each Medicare DSH will receive an additional payment based on its share of the total amount of uncompensated care for all Medicare DSHs for a given time period.

In this proposed rule, we are proposing to update our estimates of the three factors used to determine uncompensated care payments for FY 2017 and proposing to continue our methodology of using a hospital's share of insured low-income days for purposes of determining Factor 3. For Puerto Rico hospitals, we are proposing to use 14 percent of Medicaid days as a proxy for SSI days in the calculation of Factor 3. We are proposing to continue to use the methodology we established in FY 2015 to calculate the uncompensated care payment amounts for merged hospitals such that we combine uncompensated care data for the hospitals that have undergone a merger in order to calculate their relative share of uncompensated care. We are proposing to expand the time period of the data used to calculate the uncompensated care payment amounts to be distributed, from one cost reporting period to three cost reporting periods. We also are proposing a future transition to using Worksheet S–10 data to determine the amounts and distribution of uncompensated care payments. Specifically, we are proposing a 3-year transition beginning in FY 2018 where we use a combination of Worksheet S–10 and proxy data until FY 2020 when all data used in computing the uncompensated care payment amounts to be distributed would come from Worksheet S–10.

g. Payments for Capital-Related Costs for Hospitals Located in Puerto Rico

Capital IPPS payments to hospitals located in Puerto Rico are currently computed based on a blend of 25 percent of the capital IPPS Puerto Rico rate and 75 percent of the capital IPPS Federal rate. Section 601 of the Consolidated Appropriations Act, 2016 (Pub. L. 114–113) increased the applicable Federal percentage of the operating IPPS payment for hospitals located in Puerto Rico from 75 percent to 100 percent and decreased the applicable Puerto Rico percentage of the operating IPPS payments for hospitals located in Puerto Rico from 25 percent to zero percent, applicable to discharges occurring on or after January 1, 2016. In this proposed rule, we are proposing to revise the calculation of capital IPPS payments to hospitals located in Puerto Rico to parallel the change in the statutory calculation of operating IPPS payments to hospitals located in Puerto Rico, beginning in FY 2017.

h. Proposed Changes to the LTCH PPS

In this proposed rule, we are proposing to revise and rebase the market basket used under the LTCH PPS (currently the 2009-based LTCH-specific market basket) to reflect a 2013 base year. In addition, in this proposed rule, we are proposing to change our 25-percent threshold policy by proposing to sunset our existing regulations at 42 CFR 412.534 and 412.536 and replace them with a single consolidated 25-percent threshold policy at proposed § 412.538. We also are proposing to change our existing regulations limiting allowable charges to beneficiaries for Subclause (II) LTCHs and proposing to make technical corrections to § 412.503.

i. Hospital Inpatient Quality Reporting (IQR) Program

Under section 1886(b)(3)(B)(viii) of the Act, hospitals are required to report data on measures selected by the Secretary for the Hospital IQR Program in order to receive the full annual percentage increase in payments. In past years, we have established measures for reporting data and the process for submittal and validation of the data.

In this proposed rule, we are making several proposals. First, we are proposing to remove 15 measures for the FY 2019 payment determination and subsequent years. Thirteen of these measures are electronic clinical quality measures (eCQMs), two of which we are proposing also to remove in their chart-abstracted form, because they are ''topped-out,'' and two others are structural measures.

Second, we are proposing to refine two previously adopted measures beginning with the FY 2018 payment determination: (1) The Hospital-level, Risk-standardized Payment Associated with a 30-day Episode-of-Care for Pneumonia (NQF #2579); and (2) the Patient Safety and Adverse Events Composite (NQF #0531).

Third, we are proposing to add four new claims-based measures: (1) Aortic Aneurysm Procedure Clinical Episode-Based Payment Measure; (2) Cholecystectomy and Common Duct Exploration Clinical Episode-Based Payment Measure; (3) Spinal Fusion Clinical Episode-Based Payment Measure; and (4) Excess Days in Acute Care after Hospitalization for Pneumonia for the FY 2019 payment determination and subsequent years.

Fourth, we are inviting public comment on potential new quality measures under consideration for future inclusion in the Hospital IQR Program: (1) A refined version of the NIH Stroke Scale for the Hospital 30-Day Mortality Following Acute Ischemic Stroke Hospitalization Measure beginning as early as the FY 2022 payment determination; (2) the National Healthcare Safety Network (NHSN) Antimicrobial Use Measure (NQF #2720); and (3) one or more measures of behavioral health for the inpatient hospital setting, including measures previously adopted for the IPFQR Program (80 FR 46417). Also, we are seeking public comment on the possibility of future stratification of Hospital IQR Program data by race, ethnicity, sex, and disability on *Hospital Compare*, as well as on potential future hospital quality measures that incorporate health equity.

Fifth, we are proposing to require hospitals to submit all available eCQMs included in the Hospital IQR Program measure set for four quarters of data, on an annual basis, beginning with the CY 2017 reporting period/FY 2019 payment determination, in order to align the Hospital IQR Program with the Medicare and Medicaid EHR Incentive Programs. Also, we are proposing related eCQM submission requirements beginning with the FY 2019 payment determination.

Sixth, we are proposing to modify the existing validation process for Hospital IQR Program data to include validation of eCQMs beginning with the FY 2020 payment determination.

Seventh, we are proposing to update our Extraordinary Circumstances Extensions or Exemptions (ECE) policy by: (1) Extending the ECE request deadline for non-eCQM circumstances from 30 to 90 calendar days following an extraordinary circumstance, beginning in FY 2017 as related to extraordinary circumstance events that occur on or after October 1, 2016; and (2) establishing a separate submission deadline of April 1 following the end of the reporting calendar year for ECEs related to eCQMs beginning with an April 1, 2017 deadline and applying for subsequent eCQM reporting years.

j. Long-Term Care Hospital Quality Reporting Program (LTCH QRP)

Section 3004(a) of the Affordable Care Act amended section 1886(m)(5) of the Act to require the Secretary to establish the Long-Term Care Hospital Quality Reporting Program (LTCH QRP). This program applies to all hospitals certified by Medicare as LTCHs. Beginning with the FY 2014 payment determination and subsequent years, the Secretary is required to reduce any annual update to the LTCH PPS standard Federal rate for discharges occurring during such fiscal year by 2 percentage points for any LTCH that does not comply with the requirements established by the Secretary.

The Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act) amended the Act in ways that affect the LTCH QRP. Specifically, section 2(a) of the IMPACT Act amended title XVIII of the Act by adding section 1899B, titled Standardized Post-Acute Care (PAC) Assessment Data for Quality, Payment, and Discharge Planning. The Act requires that each LTCH submit, for FYs beginning on or after the specified application date (as defined in section 1899B(a)(2)(E) of the Act), data on quality measures specified under section 1899B(c)(1) of the Act and data on resource use and other measures specified under section 1899B(d)(1) of the Act in a manner and within the timeframes specified by the Secretary. In addition, each LTCH is required to submit standardized patient assessment data required under section 1899B(b)(1) of the Act in a manner and within the timeframes specified by the Secretary. Sections 1899B(c)(1) and 1899B(d)(1) of the Act require the Secretary to specify quality measures and resource use and other measures with respect to certain domains no later than the specified application date in section 1899B(a)(2)(E) of the Act that applies to each measure domain and PAC provider setting.

In this proposed rule, we are proposing three new measures for the FY 2018 payment determination and subsequent years to meet the requirements as set forth by the IMPACT Act. These proposed measures are: (1) MSPB–PAC LTCH QRP; (2) Discharge to Community-PAC LTCH QRP; and (3) Potentially Preventable 30-Day Post-Discharge Readmission Measure for the PAC LTCH QRP. We also are proposing one new quality measure to meet the requirements of the IMPACT Act for the FY 2020 determination and subsequent years. The proposed measure, Drug Regimen Review Conducted with Follow-Up for Identified Issues-PAC LTCH QRP, addresses the IMPACT Act domain of Medication Reconciliation.

In addition, we will publicly report LTCH quality data beginning in fall 2016, on a CMS Web site, such as *Hospital Compare.* We will initially publicly report quality data on four quality measures. In this proposed rule, we are proposing to publicly report data in 2017 on four additional measures. We are proposing additional details regarding procedures that would allow individual LTCHs to review and correct their data and information on measures that are to be made public before those measure data are made public. We also are proposing to provide confidential feedback reports to LTCHs on their performance on the specified measures, beginning 1 year after the specified application date that applies to such measures and LTCHs.

Finally, we are proposing to change the timing for submission of exception and extension requests from 30 days to 90 days from the date of the qualifying event which is preventing an LTCH from submitting their quality data for the LTCH QRP.

k. Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program

Section 1886(s)(4) of the Act, as added and amended by sections 3401(f) and 10322(a) of the Affordable Care Act, requires the Secretary to implement a quality reporting program for inpatient psychiatric hospitals and psychiatric units. Section 1886(s)(4)(C) of the Act requires that, for FY 2014 (October 1, 2013 through September 30, 2014) and each subsequent year, each psychiatric hospital and psychiatric unit must submit to the Secretary data on quality measures as specified by the Secretary. The data must be submitted in a form and manner and at a time specified by the Secretary. In this proposed rule, for the IPFQR Program, we are making several proposals. We are proposing two new measures beginning with the FY 2019 payment determination:

- SUB–3 Alcohol & Other Drug Use Disorder Treatment Provided or Offered at Discharge and SUB–3a Alcohol and Other Drug Use Disorder Treatment at Discharge (NQF #1664); and
- Thirty-day all-cause unplanned readmission following psychiatric hospitalization in an IPF.

We also are proposing a technical update to the previously finalized measure, ''Screening for Metabolic Disorder.'' In addition, we are proposing to no longer specify in rulemaking the date of the public display of the program's data or that the preview period will be approximately 12 weeks before the public display date.

3. Summary of Costs and Benefits

- Adjustment for MS–DRG Documentation and Coding Changes. We are proposing to make a −1.5 percent recoupment adjustment to the standardized amount for FY 2017 to implement, in part, the requirement of section 631 of the ATRA that the Secretary make an adjustment totaling $11 billion over a 4-year period of FYs 2014, 2015, 2016, and 2017. This recoupment adjustment represents the amount of the increase in aggregate payments as a result of not completing the prospective adjustment authorized under section 7(b)(1)(A) of Public Law 110–90 until FY 2013. Prior to the ATRA, this amount could not have been recovered under Public Law 110–90.

While our actuaries estimated that a −9.3 percent recoupment adjustment to the standardized amount would be necessary if CMS were to fully recover the $11 billion recoupment required by section 631 of the ATRA in FY 2014, it is often our practice to delay or phase in rate adjustments over more than one year, in order to moderate the effects on rates in any one year. Taking into account the cumulative effects of this proposed adjustment and the adjustments made in FYs 2014, 2015, and 2016, we estimate that we would recover the full $11 billion required under section 631 of the ATRA by the end of FY 2017. We note that section 414 of the MACRA (Pub. L. 114–10), enacted on April 16, 2015, requires us to not make the single positive adjustment we intended to make in FY 2018, but instead make a 0.5 percent positive adjustment for each of FYs 2018 through 2023. The provision under section 414 of the MACRA does not impact our proposed FY 2017 recoupment adjustment, and we will address this MACRA provision in future rulemaking.

- Proposed Adjustment to IPPS Payment Rates as a Result of the 2-Midnight Policy. The proposed adjustment to IPPS rates resulting from the 2-midnight policy would increase IPPS payment rates by (1/0.998) * 1.006 for FY 2017. The 1.006 is a one-time factor that would be applied to the standardized amount, the hospital-specific rates, and the national capital Federal rate for FY 2017 only. Therefore, for FY 2018, we would apply a one-time factor of (1/1.006) in the calculation of the rates to remove this one-time prospective increase.
- Proposed Changes to the Hospital Readmissions Reduction Program. For FY 2017 and subsequent years, the

reduction is based on a hospital's risk-adjusted readmission rate during a 3-year period for acute myocardial infarction (AMI), heart failure (HF), pneumonia, chronic obstructive pulmonary disease (COPD), total hip arthroplasty/total knee arthroplasty (THA/TKA), and coronary artery bypass graft (CABG). Overall, in this proposed rule, we estimate that 2,603 hospitals will have their base operating DRG payments reduced by their proposed proxy FY 2017 hospital-specific readmission adjustment. As a result, we estimate that the Hospital Readmissions Reduction Program will save approximately $532 million in FY 2017, an increase of approximately $100 million over the estimated FY 2016 savings. This increase in the estimated savings for the Hospital Readmissions Reduction Program in FY 2017 as compared to FY 2016 is primarily due to the inclusion of the refinement of the pneumonia readmissions measure, which expanded the measure cohort, along with the addition of the CABG readmission measure, in the calculation of the payment adjustment.

• Value-Based Incentive Payments under the Hospital VBP Program. We estimate that there will be no net financial impact to the Hospital VBP Program for the FY 2017 program year in the aggregate because, by law, the amount available for value-based incentive payments under the program in a given year must be equal to the total amount of base operating MS–DRG payment amount reductions for that year, as estimated by the Secretary. The estimated amount of base operating MS–DRG payment amount reductions for the FY 2017 program year and, therefore, the estimated amount available for value-based incentive payments for FY 2017 discharges is approximately $1.7 billion.

• Proposed Changes to the HAC Reduction Program. In regard to the five proposed changes to existing HAC Reduction Program policies described earlier, because a hospital's Total HAC score and its ranking in comparison to other hospitals in any given year depends on several different factors, any significant impact due to the HAC Reduction Program proposed changes for FY 2017, including which hospitals receive the adjustment, would depend on actual experience.

• Medicare DSH Payment Adjustment and Additional Payment for Uncompensated Care. Under section 1886(r) of the Act (as added by section 3133 of the Affordable Care Act), DSH payments to hospitals under section 1886(d)(5)(F) of the Act are reduced and an additional payment for uncompensated care is made to eligible hospitals beginning in FY 2014. Hospitals that receive Medicare DSH payments will receive 25 percent of the amount they previously would have received under the current statutory formula for Medicare DSH payments in section 1886(d)(5)(F) of the Act. The remainder, equal to an estimate of 75 percent of what otherwise would have been paid as Medicare DSH payments, will be the basis for determining the additional payments for uncompensated care after the amount is reduced for changes in the percentage of individuals that are uninsured and additional statutory adjustments. Each hospital that receives Medicare DSH payments will receive an additional payment for uncompensated care based on its share of the total uncompensated care amount reported by Medicare DSHs. The reduction to Medicare DSH payments is not budget neutral.

For FY 2017, we are providing that the 75 percent of what otherwise would have been paid for Medicare DSH is adjusted to approximately 56.74 percent of the amount to reflect changes in the percentage of individuals that are uninsured and additional statutory adjustments. In other words, approximately 42.56 percent (the product of 75 percent and 56.74 percent) of our estimate of Medicare DSH payments, prior to the application of section 3133 of the Affordable Care Act, is available to make additional payments to hospitals for their relative share of the total amount of uncompensated care. We project that estimated Medicare DSH payments, and additional payments for uncompensated care made for FY 2017, would reduce payments overall by approximately 0.3 percent as compared to the estimate of Medicare DSH payments and uncompensated care payments that will be distributed in FY 2016. The additional payments have redistributive effects based on a hospital's uncompensated care amount relative to the uncompensated care amount for all hospitals that are estimated to receive Medicare DSH payments, and the proposed payment amount is not directly tied to a hospital's number of discharges.

• Proposed Update to the LTCH PPS Payment Rates and Other Payment Factors. Based on the best available data for the 419 LTCHs in our data base, we estimate that the proposed changes to the payment rates and factors that we are presenting in the preamble and Addendum of this proposed rule, which includes the second year under the transition of the statutory application of the new site neutral payment rate required by section 1886(m)(6)(A) of the Act, the proposed update to the LTCH PPS standard Federal payment rate for FY 2017, the proposed update to the LTCH PPS adjustment for differences in area wage levels (which includes the proposed update to the labor-related share based on the proposed revised and rebased LTCH PPS market basket) and estimated changes to the site neutral payment rate and short-stay outlier (SSO) and high-cost outlier (HCO) payments would result in an estimated decrease in payments from FY 2016 of approximately $355 million.

• Hospital Inpatient Quality Reporting (IQR) Program. In this proposed rule, we are proposing to remove 15 measures for the FY 2019 payment determination and subsequent years. We are proposing to add four new claims-based measures to the Hospital IQR Program for the FY 2019 payment determination and subsequent years. We also are proposing to require hospitals to report on all Hospital IQR Program electronic clinical quality measures that align with the Medicare EHR Incentive Program for four quarters of data on an annual basis for the FY 2019 payment determination and subsequent years. In addition, we are proposing to modify the existing validation process for the Hospital IQR Program data to include a random sample of up to 200 hospitals for validation of eCQMs. We estimate that our policies for the adoption and removal of measures will result in total hospital costs of $30 million across 3,300 IPPS hospitals.

• Proposed Changes Related to the LTCH QRP. In this proposed rule, we are proposing four quality measures for the LTCH QRP. We estimate that the total cost related to one of these proposed measures, the Drug Regimen Review Conducted with Follow-up for Identified Issues-PAC measure, would be $3,080 per LTCH annually, or $1,330,721 for all LTCHs annually. We also estimate that while there will be some additional burden associated with our proposal to expand data collection for the measure NQF #0680 Percent of Residents or Patients Who Were Assessed and Appropriately Given the Seasonal Influenza Vaccine (77 FR 53624 through 53627), this burden has been previously accounted for in PRA submissions approved under OMB control number 0938–1163. For a detailed explanation, we refer readers to section I.M. of Appendix A (Economic Analyses) of this proposed rule. There is no additional burden for the three other claims-based measures proposed for adoption. Overall, we estimate the total cost for the 13 previously adopted measures and the four proposed new

measures would be $27,905 per LTCH annually or $12,054,724 for all LTCHs annually. These estimates were based on 432 LTCHs that are currently certified by Medicare. This is an average increase of 14 percent over the burden for FY 2016. This increase includes all quality measures that LTCHs are required to report, with the exception of the four proposed measures for FY 2017. Section VIII.C. of this proposed rule includes a detailed discussion of the policies.

• Proposed Changes to the IPFQR Program. In this proposed rule, we are proposing to add two new measures beginning with the FY 2019 payment determination and for subsequent years. One of these measures, the 30-Day All-Cause Unplanned Readmissions following Psychiatric Hospitalization in an Inpatient Psychiatric Facility measure, is calculated from administrative claims data. For the second measure, we estimate that our proposed policies would result in total costs of $11,834,748 for 1,684 IPFs nationwide.

B. Summary

1. Acute Care Hospital Inpatient Prospective Payment System (IPPS)

Section 1886(d) of the Social Security Act (the Act) sets forth a system of payment for the operating costs of acute care hospital inpatient stays under Medicare Part A (Hospital Insurance) based on prospectively set rates. Section 1886(g) of the Act requires the Secretary to use a prospective payment system (PPS) to pay for the capital-related costs of inpatient hospital services for these ''subsection (d) hospitals.'' Under these PPSs, Medicare payment for hospital inpatient operating and capital-related costs is made at predetermined, specific rates for each hospital discharge. Discharges are classified according to a list of diagnosis-related groups (DRGs).

The base payment rate is comprised of a standardized amount that is divided into a labor-related share and a nonlabor-related share. The labor-related share is adjusted by the wage index applicable to the area where the hospital is located. If the hospital is located in Alaska or Hawaii, the nonlabor-related share is adjusted by a cost-of-living adjustment factor. This base payment rate is multiplied by the DRG relative weight.

If the hospital treats a high percentage of certain low-income patients, it receives a percentage add-on payment applied to the DRG-adjusted base payment rate. This add-on payment, known as the disproportionate share hospital (DSH) adjustment, provides for a percentage increase in Medicare payments to hospitals that qualify under either of two statutory formulas designed to identify hospitals that serve a disproportionate share of low-income patients. For qualifying hospitals, the amount of this adjustment varies based on the outcome of the statutory calculations. The Affordable Care Act revised the Medicare DSH payment methodology and provides for a new additional Medicare payment that considers the amount of uncompensated care beginning on October 1, 2013.

If the hospital is training residents in an approved residency program(s), it receives a percentage add-on payment for each case paid under the IPPS, known as the indirect medical education (IME) adjustment. This percentage varies, depending on the ratio of residents to beds.

Additional payments may be made for cases that involve new technologies or medical services that have been approved for special add-on payments. To qualify, a new technology or medical service must demonstrate that it is a substantial clinical improvement over technologies or services otherwise available, and that, absent an add-on payment, it would be inadequately paid under the regular DRG payment.

The costs incurred by the hospital for a case are evaluated to determine whether the hospital is eligible for an additional payment as an outlier case. This additional payment is designed to protect the hospital from large financial losses due to unusually expensive cases. Any eligible outlier payment is added to the DRG-adjusted base payment rate, plus any DSH, IME, and new technology or medical service add-on adjustments.

Although payments to most hospitals under the IPPS are made on the basis of the standardized amounts, some categories of hospitals are paid in whole or in part based on their hospital-specific rate, which is determined from their costs in a base year. For example, sole community hospitals (SCHs) receive the higher of a hospital-specific rate based on their costs in a base year (the highest of FY 1982, FY 1987, FY 1996, or FY 2006) or the IPPS Federal rate based on the standardized amount. SCHs are the sole source of care in their areas. Specifically, section 1886(d)(5)(D)(iii) of the Act defines an SCH as a hospital that is located more than 35 road miles from another hospital or that, by reason of factors such as isolated location, weather conditions, travel conditions, or absence of other like hospitals (as determined by the Secretary), is the sole source of hospital inpatient services reasonably available to Medicare beneficiaries. In addition, certain rural hospitals previously designated by the Secretary as essential access community hospitals are considered SCHs.

Under current law, the Medicare-dependent, small rural hospital (MDH) program is effective through FY 2017. Through and including FY 2006, an MDH received the higher of the Federal rate or the Federal rate plus 50 percent of the amount by which the Federal rate was exceeded by the higher of its FY 1982 or FY 1987 hospital-specific rate. For discharges occurring on or after October 1, 2007, but before October 1, 2017, an MDH receives the higher of the Federal rate or the Federal rate plus 75 percent of the amount by which the Federal rate is exceeded by the highest of its FY 1982, FY 1987, or FY 2002 hospital-specific rate. MDHs are a major source of care for Medicare beneficiaries in their areas. Section 1886(d)(5)(G)(iv) of the Act defines an MDH as a hospital that is located in a rural area, has not more than 100 beds, is not an SCH, and has a high percentage of Medicare discharges (not less than 60 percent of its inpatient days or discharges in its cost reporting year beginning in FY 1987 or in two of its three most recently settled Medicare cost reporting years).

Section 1886(g) of the Act requires the Secretary to pay for the capital-related costs of inpatient hospital services ''in accordance with a prospective payment system established by the Secretary.'' The basic methodology for determining capital prospective payments is set forth in our regulations at 42 CFR 412.308 and 412.312. Under the capital IPPS, payments are adjusted by the same DRG for the case as they are under the operating IPPS. Capital IPPS payments are also adjusted for IME and DSH, similar to the adjustments made under the operating IPPS. In addition, hospitals may receive outlier payments for those cases that have unusually high costs.

The existing regulations governing payments to hospitals under the IPPS are located in 42 CFR part 412, subparts A through M.

2. Hospitals and Hospital Units Excluded From the IPPS

Under section 1886(d)(1)(B) of the Act, as amended, certain hospitals and hospital units are excluded from the IPPS. These hospitals and units are: Inpatient rehabilitation facility (IRF) hospitals and units; long-term care hospitals (LTCHs); psychiatric hospitals and units; children's hospitals; and cancer hospitals. Religious nonmedical health care institutions (RNHCIs) are also excluded from the IPPS. Various sections of the Balanced Budget Act of

1997 (BBA, Pub. L. 105–33), the Medicare, Medicaid and SCHIP [State Children's Health Insurance Program] Balanced Budget Refinement Act of 1999 (BBRA, Pub. L. 106–113), and the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA, Pub. L. 106–554) provide for the implementation of PPSs for IRF hospitals and units, LTCHs, and psychiatric hospitals and units (referred to as inpatient psychiatric facilities (IPFs)). (We note that the annual updates to the LTCH PPS are now included as part of the IPPS annual update document. Updates to the IRF PPS and IPF PPS are issued as separate documents.) Children's hospitals, cancer hospitals, and RNHCIs continue to be paid solely under a reasonable cost-based system subject to a rate-of-increase ceiling on inpatient operating costs.

The existing regulations governing payments to excluded hospitals and hospital units are located in 42 CFR parts 412 and 413.

3. Long-Term Care Hospital Prospective Payment System (LTCH PPS)

The Medicare prospective payment system (PPS) for LTCHs applies to hospitals described in section 1886(d)(1)(B)(iv) of the Act effective for cost reporting periods beginning on or after October 1, 2002. The LTCH PPS was established under the authority of sections 123 of the BBRA and section 307(b) of the BIPA (as codified under section 1886(m)(1) of the Act). During the 5-year (optional) transition period, a LTCH's payment under the PPS was based on an increasing proportion of the LTCH Federal rate with a corresponding decreasing proportion based on reasonable cost principles. Effective for cost reporting periods beginning on or after October 1, 2006, all LTCHs are paid 100 percent of the Federal rate. Section 1206(a) of Public Law 113–67 established the site neutral payment rate under the LTCH PPS, which made the LTCH PPS a dual rate payment system beginning in FY 2016. Under this statute, based on a rolling effective date that is linked to the date on which a given LTCH's Federal FY 2016 cost reporting period begins, LTCHs are paid for LTCH discharges at the site neutral payment rate unless the discharge meets the patient criteria for payment at the LTCH PPS standard Federal payment rate. The existing regulations governing payment under the LTCH PPS are located in 42 CFR part 412, subpart O. Beginning October 1, 2009, we issue the annual updates to the LTCH PPS in the same documents that update the IPPS (73 FR 26797 through 26798).

4. Critical Access Hospitals (CAHs)

Under sections 1814(l), 1820, and 1834(g) of the Act, payments made to critical access hospitals (CAHs) (that is, rural hospitals or facilities that meet certain statutory requirements) for inpatient and outpatient services are generally based on 101 percent of reasonable cost. Reasonable cost is determined under the provisions of section 1861(v)(1)(A) of the Act and existing regulations under 42 CFR parts 413 and 415.

5. Payments for Graduate Medical Education (GME)

Under section 1886(a)(4) of the Act, costs of approved educational activities are excluded from the operating costs of inpatient hospital services. Hospitals with approved graduate medical education (GME) programs are paid for the direct costs of GME in accordance with section 1886(h) of the Act. The amount of payment for direct GME costs for a cost reporting period is based on the hospital's number of residents in that period and the hospital's costs per resident in a base year. The existing regulations governing payments to the various types of hospitals are located in 42 CFR part 413.

C. Summary of Provisions of Recent Legislation Proposed To Be Implemented in This Proposed Rule

1. American Taxpayer Relief Act of 2012 (ATRA) (Pub. L. 112–240)

The American Taxpayer Relief Act of 2012 (ATRA) (Pub. L. 112–240), enacted on January 2, 2013, made a number of changes that affect the IPPS. In this proposed rule, we are proposing to make policy changes to implement section 631 of the American Taxpayer Relief Act of 2012, which amended section 7(b)(1)(B) of Public Law 110–90 and requires a recoupment adjustment to the standardized amounts under section 1886(d) of the Act based upon the Secretary's estimates for discharges occurring in FY 2014 through FY 2017 to fully offset $11 billion (which represents the amount of the increase in aggregate payments from FYs 2008 through 2013 for which an adjustment was not previously applied).

2. Pathway for SGR Reform Act of 2013 (Pub. L. 113–67)

The Pathway for SGR Reform Act of 2013 (Pub. L. 113–67) introduced new payment rules in the LTCH PPS. Under section 1206 of this law, discharges in cost reporting periods beginning on or after October 1, 2015 under the LTCH PPS will receive payment under a site neutral rate unless the discharge meets certain patient-specific criteria. In this proposed rule, we are providing clarifications to prior policy changes that implemented provisions under section 1206 of the Pathway for SGR Reform Act.

3. Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act) (Pub. L. 113–185)

The Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act (Pub. L. 113–185), enacted on October 6, 2014, made a number of changes that affect the Long-Term Care Quality Reporting Program (LTCH QRP). In this proposed rule, we are continuing to implement portions of section 1899B of the Act, as added by section 2 of the IMPACT Act, which, in part, requires LTCHs, among other postacute care providers, to report standardized patient assessment data, data on quality measures, and data on resource use and other measures.

4. The Medicare Access and CHIP Reauthorization Act of 2015 (Pub. L. 114–10)

The Medicare Access and CHIP Reauthorization Act of 2015 (Pub. L. 114–10) extended the MDH program and changes to the payment adjustment for low-volume hospitals through FY 2017. In this proposed rule, we are proposing to update the low-volume hospital payment adjustment for FY 2017 under the extension of the temporary changes to the low-volume hospital payment adjustment provided for by section 204 of Public Law 114–10. We also state our intention to finalize in the FY 2017 IPPS/LTCH PPS final rule the provisions of the FY 2016 IPPS/LTCH PPS interim final rule with comment period (80 FR 49594 through 49597) that implemented sections 204 and 205 of Public Law 114–10.

5. The Consolidated Appropriations Act, 2016 (Pub. L. 114–113)

The Consolidated Appropriations Act, 2016 (Pub. L. 114–113), enacted on December 18, 2015, made changes that affect the IPPS and the LTCH PPS. Section 231 of Public Law 114–113 provides for a temporary exception for certain wound care discharges from the application of the site neutral payment rate under the LTCH PPS for certain LTCHs, which is being implemented in an interim final rule with comment period. Section 601 of Public Law 114–113 made changes to the payment calculation for operating IPPS payments for hospitals located in Puerto Rico. Section 602 of Public Law 114–113 specifies that Puerto Rico hospitals are eligible for incentive payments for the

meaningful use of certified EHR technology, effective beginning FY 2016, and also applies the adjustments to the applicable percentage increase under the statute for Puerto Rico hospitals that are not meaningful EHR users, effective FY 2022. In this proposed rule, we are proposing conforming changes to our regulations to reflect the provisions of section 601 of Public Law 114–113, which increased the applicable Federal percentage of the operating IPPS payment for hospitals located in Puerto Rico from 75 percent to 100 percent and decreased the applicable Puerto Rico percentage of the operating IPPS payments for hospitals located in Puerto Rico from 25 percent to zero percent, applicable to discharges occurring on or after January 1, 2016.

6. The Notice of Observation Treatment and Implication for Care Eligibility Act (the NOTICE Act) (Pub. L. 114–42)

The Notice of Observation Treatment and Implication for Care Eligibility Act (the NOTICE Act) (Pub. L. 114–42) enacted on August 6, 2015, amended section 1866(a)(1) of the Act by adding new subparagraph (Y) that requires hospitals and CAHs to provide written notification and an oral explanation of such notification to individuals receiving observation services as outpatients for more than 24 hours at the hospitals or CAHs. In this proposed rule, we are proposing to implement the provisions of Public Law 114–42.

D. Summary of the Provisions of This Proposed Rule

In this proposed rule, we are setting forth proposed payment and policy changes to the Medicare IPPS for FY 2017 operating costs and for capital-related costs of acute care hospitals and certain hospitals and hospital units that are excluded from IPPS, including proposed changes relating to payments for IME and direct GME to certain hospitals that continue to be excluded from the IPPS and paid on a reasonable cost basis. In addition, in this proposed rule, we are setting forth proposed changes to the payment rates, factors, and other payment and policy-related changes to programs associated with payment rate policies under the LTCH PPS for FY 2017.

Below is a summary of the major changes that we are proposing to make:

1. Proposed Changes to MS–DRG Classifications and Recalibrations of Relative Weights

In section II. of the preamble of the proposed rule, we include—

- Proposed changes to MS–DRG classifications based on our yearly review for FY 2017.
- Proposed application of the documentation and coding adjustment for FY 2017 resulting from implementation of the MS–DRG system.
- Proposed recalibrations of the MS–DRG relative weights.
- A discussion of the FY 2017 status of new technologies approved for add-on payments for FY 2016 and a presentation of our evaluation and analysis of the FY 2017 applicants for add-on payments for high-cost new medical services and technologies (including public input, as directed by Public Law 108–173, obtained in a town hall meeting).

2. Proposed Changes to the Hospital Wage Index for Acute Care Hospitals

In section III. of the preamble to this proposed rule, we are proposing revisions to the wage index for acute care hospitals and the annual update of the wage data. Specific issues addressed include, but not limited to, the following:

- The proposed FY 2017 wage index update using wage data from cost reporting periods beginning in FY 2013.
- Calculation of the proposed occupational mix adjustment for FY 2017 based on the 2013 Occupational Mix Survey.
- Analysis and implementation of the proposed FY 2017 occupational mix adjustment to the wage index for acute care hospitals.
- Proposed application of the rural floor, the proposed imputed floor, and the proposed frontier State floor.
- Transitional wage indexes relating to the continued use of the revised OMB labor market area delineations based on 2010 Decennial Census data.
- Proposed revisions to the wage index for acute care hospitals based on hospital redesignations and reclassifications under sections 1886(d)(8)(B), (d)(8)(E), and (d)(10) of the Act.
- Notification regarding proposed CMS ''lock-in'' date for urban to rural reclassifications under § 412.103.
- The proposed adjustment to the wage index for acute care hospitals for FY 2017 based on commuting patterns of hospital employees who reside in a county and work in a different area with a higher wage index.
- Determination of the labor-related share for the proposed FY 2017 wage index.
- Solicitation of Comments on Treatment of Overhead and Home Office Costs in the Wage Index Calculation

3. Other Decisions and Proposed Changes to the IPPS for Operating Costs and GME Costs

In section IV. of the preamble of this proposed rule, we discuss proposed changes or clarifications of a number of the provisions of the regulations in 42 CFR parts 412 and 413, including the following:

- Proposed conforming changes to our regulations to reflect the changes to operating payments for subsection (d) Puerto Rico hospitals in accordance with the provisions of section 601 of Public Law 114–113.
- Proposed changes to the inpatient hospital update for FY 2017.
- Proposed updated national and regional case-mix values and discharges for purposes of determining RRC status.
- Proposed payment adjustment for low-volume hospitals for FY 2017.
- The statutorily required IME adjustment factor for FY 2017.
- Proposed changes to the methodologies for determining Medicare DSH payments and the additional payments for uncompensated care.
- Proposed changes to the rules for payment adjustments under the Hospital Readmissions Reduction Program based on hospital readmission measures and the process for hospital review and correction of those rates for FY 2017.
- Proposed changes to the requirements and provision of value-based incentive payments under the Hospital Value-Based Purchasing Program for FY 2017.
- Proposed requirements for payment adjustments to hospitals under the HAC Reduction Program for FY 2017.
- Proposed changes relating to direct GME and IME payments to urban hospitals with rural track training programs.
- Discussion of the Rural Community Hospital Demonstration Program and a proposal for making a budget neutrality adjustment for the demonstration program.
- Proposed implementation of the Notice of Observation Treatment and Implications for Care Eligibility Act (the NOTICE Act) for hospitals and CAHs.
- Proposed technical changes and corrections to regulations relating to cost to related organizations and Medicare cost reports.

4. Proposed FY 2017 Policy Governing the IPPS for Capital-Related Costs

In section V. of the preamble to this proposed rule, we discuss the proposed payment policy requirements for capital-related costs and capital

payments to hospitals for FY 2017. In addition, we discuss proposed changes to the calculation of capital IPPS payments to hospitals located in Puerto Rico to parallel the change in the statutory calculation of operating IPPS payments to hospitals located in Puerto Rico, beginning in FY 2017.

5. Proposed Changes to the Payment Rates for Certain Excluded Hospitals: Rate-of-Increase Percentages

In section VI. of the preamble of this proposed rule, we discuss—

- Proposed changes to payments to certain excluded hospitals for FY 2017.
- Proposed implementation of the Frontier Community Health Integration Project (FCHIP) Demonstration.

6. Proposed Changes to the LTCH PPS

In section VII. of the preamble of this proposed rule, we set forth—

- Proposed changes to the LTCH PPS Federal payment rates, factors, and other payment rate policies under the LTCH PPS for FY 2017.
- Proposals to sunset our existing 25-percent threshold policy regulations, and replace them with single consolidated 25 percent threshold policy regulation.
- Proposed changes to the limitation on charges (LOC) to beneficiaries and related billing requirements for ''subclause (II)'' LTCHs to align those LTCH PPS payment adjustment policies with the LOC policies applied in the TEFRA payment context.
- Proposed technical corrections to certain definitions to correct and clarify their use under the application of the site neutral payment rate and proposed additional definitions in accordance with our proposed modifications to the 25-percent policy.
- Proposed rebasing and revising of the LTCH market basket to update the LTCH PPS, effective for FY 2017.

7. Proposed Changes Relating to Quality Data Reporting for Specific Providers and Suppliers

In section VIII. of the preamble of the proposed rule, we address—

- Proposed requirements for the Hospital Inpatient Quality Reporting (IQR) Program as a condition for receiving the full applicable percentage increase.
- Proposed changes to the requirements for the quality reporting program for PPS-exempt cancer hospitals (PCHQR Program).
- Proposed changes to the requirements under the LTCH Quality Reporting Program (LTCH QRP).
- Proposed changes to the requirements under the Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program.
- Proposed changes relating to clinical quality measures for the Medicare Electronic Health Record (EHR) Incentive Program and eligible hospitals and CAHs.

8. Determining Prospective Payment Operating and Capital Rates and Rate-of-Increase Limits for Acute Care Hospitals

In the Addendum to this proposed rule, we set forth proposed changes to the amounts and factors for determining the proposed FY 2017 prospective payment rates for operating costs and capital-related costs for acute care hospitals. We are proposing to establish the threshold amounts for outlier cases. In addition, we address the update factors for determining the rate-of-increase limits for cost reporting periods beginning in FY 2017 for certain hospitals excluded from the IPPS.

9. Determining Prospective Payment Rates for LTCHs

In the Addendum to this proposed rule, we set forth proposed changes to the amounts and factors for determining the proposed FY 2017 LTCH PPS standard Federal payment rate and other factors used to determine LTCH PPS payments under both the LTCH PPS standard Federal payment rate and the site neutral payment rate in FY 2017. We are proposing to establish the adjustments for wage levels, the labor-related share, the cost-of-living adjustment, and high-cost outliers, including the applicable fixed-loss amounts and the LTCH cost-to-charge ratios (CCRs) for both payment rates. We also are providing the estimated market basket update to apply to the ceiling used to determine payments under the existing payment adjustment for ''subclause (II)'' LTCHs for cost reporting periods beginning in FY 2017.

10. Impact Analysis

In Appendix A of this proposed rule, we set forth an analysis of the impact that the proposed changes would have on affected acute care hospitals, CAHs, LTCHs, PCHs, and IPFs.

11. Recommendation of Update Factors for Operating Cost Rates of Payment for Hospital Inpatient Services

In Appendix B of this proposed rule, as required by sections 1886(e)(4) and (e)(5) of the Act, we provided our recommendations of the appropriate percentage changes for FY 2017 for the following:

- A single average standardized amount for all areas for hospital inpatient services paid under the IPPS for operating costs of acute care hospitals (and hospital-specific rates applicable to SCHs and MDHs).
- Target rate-of-increase limits to the allowable operating costs of hospital inpatient services furnished by certain hospitals excluded from the IPPS.
- The LTCH PPS standard Federal payment rate and the site neutral payment rate for hospital inpatient services provided for LTCH PPS discharges.

12. Discussion of Medicare Payment Advisory Commission Recommendations

Under section 1805(b) of the Act, MedPAC is required to submit a report to Congress, no later than March 15 of each year, in which MedPAC reviews and makes recommendations on Medicare payment policies. MedPAC's March 2016 recommendations concerning hospital inpatient payment policies address the update factor for hospital inpatient operating costs and capital-related costs for hospitals under the IPPS. We addressed these recommendations in Appendix B of this proposed rule. For further information relating specifically to the MedPAC March 2016 report or to obtain a copy of the report, contact MedPAC at (202) 220–3700 or visit MedPAC's Web site at: *http://www.medpac.gov*.

II. Proposed Changes to Medicare Severity Diagnosis-Related Group (MS–DRG) Classifications and Relative Weights

A. Background

Section 1886(d) of the Act specifies that the Secretary shall establish a classification system (referred to as diagnosis-related groups (DRGs)) for inpatient discharges and adjust payments under the IPPS based on appropriate weighting factors assigned to each DRG. Therefore, under the IPPS, Medicare pays for inpatient hospital services on a rate per discharge basis that varies according to the DRG to which a beneficiary's stay is assigned. The formula used to calculate payment for a specific case multiplies an individual hospital's payment rate per case by the weight of the DRG to which the case is assigned. Each DRG weight represents the average resources required to care for cases in that particular DRG, relative to the average resources used to treat cases in all DRGs.

Congress recognized that it would be necessary to recalculate the DRG relative weights periodically to account for changes in resource consumption. Accordingly, section 1886(d)(4)(C) of

the Act requires that the Secretary adjust the DRG classifications and relative weights at least annually. These adjustments are made to reflect changes in treatment patterns, technology, and any other factors that may change the relative use of hospital resources.

B. MS–DRG Reclassifications

For general information about the MS–DRG system, including yearly reviews and changes to the MS–DRGs, we refer readers to the previous discussions in the FY 2010 IPPS/RY 2010 LTCH PPS final rule (74 FR 43764 through 43766), the FY 2011 IPPS/LTCH PPS final rule (75 FR 50053 through 50055), the FY 2012 IPPS/LTCH PPS final rule (76 FR 51485 through 51487), the FY 2013 IPPS/LTCH PPS final rule (77 FR 53273), the FY 2014 IPPS/LTCH PPS final rule (78 FR 50512), the FY 2015 IPPS/LTCH PPS final rule (79 FR 49871), and the FY 2016 IPPS/LTCH PPS final rule (80 FR 49342).

C. Adoption of the MS–DRGs in FY 2008

For information on the adoption of the MS–DRGs in FY 2008, we refer readers to the FY 2008 IPPS final rule with comment period (72 FR 47140 through 47189).

D. Proposed FY 2017 MS–DRG Documentation and Coding Adjustment

1. Background on the Prospective MS–DRG Documentation and Coding Adjustments for FY 2008 and FY 2009 Authorized by Public Law 110–90

In the FY 2008 IPPS final rule with comment period (72 FR 47140 through 47189), we adopted the MS–DRG patient classification system for the IPPS, effective October 1, 2007, to better recognize severity of illness in Medicare payment rates for acute care hospitals. The adoption of the MS–DRG system resulted in the expansion of the number of DRGs from 538 in FY 2007 to 745 in FY 2008. (Currently, for FY 2016, there are 756 MS–DRGs.) By increasing the number of MS–DRGs and more fully taking into account patient severity of illness in Medicare payment rates for acute care hospitals, MS–DRGs encourage hospitals to improve their documentation and coding of patient diagnoses.

In the FY 2008 IPPS final rule with comment period (72 FR 47175 through 47186), we indicated that the adoption of the MS–DRGs had the potential to lead to increases in aggregate payments without a corresponding increase in actual patient severity of illness due to the incentives for additional documentation and coding. In that final rule with comment period, we exercised our authority under section 1886(d)(3)(A)(vi) of the Act, which authorizes us to maintain budget neutrality by adjusting the national standardized amount, to eliminate the estimated effect of changes in coding or classification that do not reflect real changes in case-mix. Our actuaries estimated that maintaining budget neutrality required an adjustment of −4.8 percent to the national standardized amount. We provided for phasing in this −4.8 percent adjustment over 3 years. Specifically, we established prospective documentation and coding adjustments of −1.2 percent for FY 2008, −1.8 percent for FY 2009, and −1.8 percent for FY 2010.

On September 29, 2007, Congress enacted the TMA [Transitional Medical Assistance], Abstinence Education, and QI [Qualifying Individuals] Programs Extension Act of 2007 (Pub. L. 110–90). Section 7(a) of Public Law 110–90 reduced the documentation and coding adjustment made as a result of the MS–DRG system that we adopted in the FY 2008 IPPS final rule with comment period to −0.6 percent for FY 2008 and −0.9 percent for FY 2009, and we finalized the FY 2008 adjustment through rulemaking, effective October 1, 2007 (72 FR 66886).

For FY 2009, section 7(a) of Public Law 110–90 required a documentation and coding adjustment of −0.9 percent, and we finalized that adjustment through rulemaking effective October 1, 2008 (73 FR 48447). The documentation and coding adjustments established in the FY 2008 IPPS final rule with comment period, which reflected the amendments made by section 7(a) of Public Law 110–90, are cumulative. As a result, the −0.9 percent documentation and coding adjustment for FY 2009 was in addition to the −0.6 percent adjustment for FY 2008, yielding a combined effect of −1.5 percent.

2. Adjustment to the Average Standardized Amounts Required by Public Law 110–90

a. Prospective Adjustment Required by Section 7(b)(1)(A) of Public Law 110–90

Section 7(b)(1)(A) of Public Law 110–90 requires that, if the Secretary determines that implementation of the MS–DRG system resulted in changes in documentation and coding that did not reflect real changes in case-mix for discharges occurring during FY 2008 or FY 2009 that are different than the prospective documentation and coding adjustments applied under section 7(a) of Public Law 110–90, the Secretary shall make an appropriate adjustment under section 1886(d)(3)(A)(vi) of the Act.

Section 1886(d)(3)(A)(vi) of the Act authorizes adjustments to the average standardized amounts for subsequent fiscal years in order to eliminate the effect of such coding or classification changes. These adjustments are intended to ensure that future annual aggregate IPPS payments are the same as the payments that otherwise would have been made had the prospective adjustments for documentation and coding applied in FY 2008 and FY 2009 reflected the change that occurred in those years.

b. Recoupment or Repayment Adjustments in FYs 2010 Through 2012 Required by Section 7(b)(1)(B) Public Law 110–90

If, based on a retroactive evaluation of claims data, the Secretary determines that implementation of the MS–DRG system resulted in changes in documentation and coding that did not reflect real changes in case-mix for discharges occurring during FY 2008 or FY 2009 that are different from the prospective documentation and coding adjustments applied under section 7(a) of Public Law 110–90, section 7(b)(1)(B) of Public Law 110–90 requires the Secretary to make an additional adjustment to the standardized amounts under section 1886(d) of the Act. This adjustment must offset the estimated increase or decrease in aggregate payments for FYs 2008 and 2009 (including interest) resulting from the difference between the estimated actual documentation and coding effect and the documentation and coding adjustment applied under section 7(a) of Public Law 110–90. This adjustment is in addition to making an appropriate adjustment to the standardized amounts under section 1886(d)(3)(A)(vi) of the Act as required by section 7(b)(1)(A) of Public Law 110–90. That is, these adjustments are intended to recoup (or repay, in the case of underpayments) spending in excess of (or less than) spending that would have occurred had the prospective adjustments for changes in documentation and coding applied in FY 2008 and FY 2009 matched the changes that occurred in those years. Public Law 110–90 requires that the Secretary only make these recoupment or repayment adjustments for discharges occurring during FYs 2010, 2011, and 2012.

3. Retrospective Evaluation of FY 2008 and FY 2009 Claims Data

In order to implement the requirements of section 7 of Public Law 110–90, we performed a retrospective

evaluation of the FY 2008 data for claims paid through December 2008 using the methodology first described in the FY 2009 IPPS/LTCH PPS final rule (73 FR 43768 and 43775) and later discussed in the FY 2010 IPPS/RY 2010 LTCH PPS final rule (74 FR 43768 through 43772). We performed the same analysis for FY 2009 claims data using the same methodology as we did for FY 2008 claims (75 FR 50057 through 50068). The results of the analysis for the FY 2011 IPPS/LTCH PPS proposed and final rules, and subsequent evaluations in FY 2012, supported that the 5.4 percent estimate accurately reflected the FY 2009 increases in documentation and coding under the MS–DRG system. We were persuaded by both MedPAC's analysis (as discussed in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50064 through 50065)) and our own review of the methodologies proposed by various commenters that the methodology we employed to determine the required documentation and coding adjustments was sound.

As in prior years, the FY 2008, FY 2009, and FY 2010 MedPAR files are available to the public to allow independent analysis of the FY 2008 and FY 2009 documentation and coding effects. Interested individuals may still order these files through the CMS Web site at: *http://www.cms.gov/Research-Statistics-Data-and-Systems/Files-for-Order/LimitedDataSets/* by clicking on MedPAR Limited Data Set (LDS)—Hospital (National). This CMS Web page describes the file and provides directions and further detailed instructions for how to order.

Persons placing an order must send the following: A Letter of Request, the LDS Data Use Agreement and Research Protocol (refer to the Web site for further instructions), the LDS Form, and a check (refer to the Web site for the required payment amount) to:

Mailing address if using the U.S. Postal Service:

Centers for Medicare & Medicaid Services, RDDC Account, Accounting Division, P.O. Box 7520, Baltimore, MD 21207–0520.

Mailing address if using express mail:

Centers for Medicare & Medicaid Services, OFM/Division of Accounting—RDDC, 7500 Security Boulevard, C3–07–11, Baltimore, MD 21244–1850.

4. Prospective Adjustments for FY 2008 and FY 2009 Authorized by Section 7(b)(1)(A) of Public Law 110–90

In the FY 2010 IPPS/RY 2010 LTCH PPS final rule (74 FR 43767 through 43777), we opted to delay the implementation of any documentation and coding adjustment until a full analysis of case-mix changes based on FY 2009 claims data could be completed. We refer readers to the FY 2010 IPPS/RY LTCH PPS final rule for a detailed description of our proposal, responses to comments, and finalized policy. After analysis of the FY 2009 claims data for the FY 2011 IPPS/LTCH PPS final rule (75 FR 50057 through 50073), we found a total prospective documentation and coding effect of 5.4 percent. After accounting for the −0.6 percent and the −0.9 percent documentation and coding adjustments in FYs 2008 and 2009, we found a remaining documentation and coding effect of 3.9 percent. As we have discussed, an additional cumulative adjustment of −3.9 percent would be necessary to meet the requirements of section 7(b)(1)(A) of Public Law 110–90 to make an adjustment to the average standardized amounts in order to eliminate the full effect of the documentation and coding changes that do not reflect real changes in case-mix on future payments. Unlike section 7(b)(1)(B) of Public Law 110–90, section 7(b)(1)(A) does not specify when we must apply the prospective adjustment, but merely requires us to make an ''appropriate'' adjustment. Therefore, as we stated in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50061), we believed the law provided some discretion as to the manner in which we applied the prospective adjustment of −3.9 percent. As we discussed extensively in the FY 2011 IPPS/LTCH PPS final rule, it has been our practice to moderate payment adjustments when necessary to mitigate the effects of significant downward adjustments on hospitals, to avoid what could be widespread, disruptive effects of such adjustments on hospitals. Therefore, we stated that we believed it was appropriate to not implement the −3.9 percent prospective adjustment in FY 2011 because we finalized a −2.9 percent recoupment adjustment for that fiscal year. Accordingly, we did not propose a prospective adjustment under section 7(b)(1)(A) of Public Law 110–90 for FY 2011 (75 FR 23868 through 23870). We noted that, as a result, payments in FY 2011 (and in each future fiscal year until we implemented the requisite adjustment) would be higher than they would have been if we had implemented an adjustment under section 7(b)(1)(A) of Public Law 110–90.

In the FY 2012 IPPS/LTCH PPS final rule (76 FR 51489 and 51497), we indicated that, because further delay of this prospective adjustment would result in a continued accrual of unrecoverable overpayments, it was imperative that we implement a prospective adjustment for FY 2012, while recognizing CMS' continued desire to mitigate the effects of any significant downward adjustments to hospitals. Therefore, we implemented a −2.0 percent prospective adjustment to the standardized amount instead of the full −3.9 percent.

In the FY 2013 IPPS/LTCH PPS final rule (77 FR 53274 through 53276), we completed the prospective portion of the adjustment required under section 7(b)(1)(A) of Public Law 110–90 by finalizing a −1.9 percent adjustment to the standardized amount for FY 2013. We stated that this adjustment would remove the remaining effect of the documentation and coding changes that do not reflect real changes in case-mix that occurred in FY 2008 and FY 2009. We believed that it was imperative to implement the full remaining adjustment, as any further delay would result in an overstated standardized amount in FY 2013 and any future fiscal years until a full adjustment was made.

We noted again that delaying full implementation of the prospective portion of the adjustment required under section 7(b)(1)(A) of Public Law 110–90 until FY 2013 resulted in payments in FY 2010 through FY 2012 being overstated. These overpayments could not be recovered by CMS, as section 7(b)(1)(B) of Public Law 110–90 limited recoupments to overpayments made in FY 2008 and FY 2009.

5. Recoupment or Repayment Adjustment Authorized by Section 7(b)(1)(B) of Public Law 110–90

Section 7(b)(1)(B) of Public Law 110–90 requires the Secretary to make an adjustment to the standardized amounts under section 1886(d) of the Act to offset the estimated increase or decrease in aggregate payments for FY 2008 and FY 2009 (including interest) resulting from the difference between the estimated actual documentation and coding effect and the documentation and coding adjustments applied under section 7(a) of Public Law 110–90. This determination must be based on a retrospective evaluation of claims data. Our actuaries estimated that there was a 5.8 percentage point difference resulting in an increase in aggregate payments of approximately $6.9 billion. Therefore, as discussed in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50062 through 50067), we determined that an aggregate adjustment of −5.8 percent in FYs 2011 and 2012 would be necessary in order to meet the requirements of section 7(b)(1)(B) of Public Law 110–90

to adjust the standardized amounts for discharges occurring in FYs 2010, 2011, and/or 2012 to offset the estimated amount of the increase in aggregate payments (including interest) in FYs 2008 and 2009.

It is often our practice to phase in payment rate adjustments over more than one year in order to moderate the effect on payment rates in any one year. Therefore, consistent with the policies that we have adopted in many similar cases, in the FY 2011 IPPS/LTCH PPS final rule, we made an adjustment to the standardized amount of −2.9 percent, representing approximately half of the aggregate adjustment required under section 7(b)(1)(B) of Public Law 110–90, for FY 2011. An adjustment of this magnitude allowed us to moderate the effects on hospitals in one year while simultaneously making it possible to implement the entire adjustment within the timeframe required under section 7(b)(1)(B) of Public Law 110–90 (that is, no later than FY 2012). For FY 2012, in accordance with the timeframes set forth by section 7(b)(1)(B) of Public Law 110–90, and consistent with the discussion in the FY 2011 IPPS/LTCH PPS final rule, we completed the recoupment adjustment by implementing the remaining −2.9 percent adjustment, in addition to removing the effect of the −2.9 percent adjustment to the standardized amount finalized for FY 2011 (76 FR 51489 and 51498). Because these adjustments, in effect, balanced out, there was no year-to-year change in the standardized amount due to this recoupment adjustment for FY 2012. In the FY 2013 IPPS/LTCH PPS final rule (77 FR 53276), we made a final +2.9 percent adjustment to the standardized amount, completing the recoupment portion of section 7(b)(1)(B) of Public Law 110–90. We note that with this positive adjustment, according to our estimates, all overpayments made in FY 2008 and FY 2009 have been fully recaptured with appropriate interest, and the standardized amount has been returned to the appropriate baseline.

6. Proposed Recoupment or Repayment Adjustment Authorized by Section 631 of the American Taxpayer Relief Act of 2012 (ATRA)

Section 631 of the ATRA amended section 7(b)(1)(B) of Public Law 110–90 to require the Secretary to make a recoupment adjustment or adjustments totaling $11 billion by FY 2017. This adjustment represents the amount of the increase in aggregate payments as a result of not completing the prospective adjustment authorized under section 7(b)(1)(A) of Public Law 110–90 until FY 2013. As discussed earlier, this delay in implementation resulted in overstated payment rates in FYs 2010, 2011, and 2012. The resulting overpayments could not have been recovered under Public Law 110–90.

Similar to the adjustments authorized under section 7(b)(1)(B) of Public Law 110–90, the adjustment required under section 631 of the ATRA is a one-time recoupment of a prior overpayment, not a permanent reduction to payment rates. Therefore, we anticipated that any adjustment made to reduce payment rates in one year would eventually be offset by a positive adjustment in 2018, once the necessary amount of overpayment was recovered. However, section 414 of the Medicare Access and CHIP Reauthorization Act (MACRA) of 2015, Public Law 114–10, enacted on April 16, 2015, replaced the single positive adjustment we intended to make in FY 2018 with a 0.5 percent positive adjustment for each of FYs 2018 through 2023. We stated in the FY 2016 IPPS/LTCH PPS final rule (80 FR 49345) that we will address this MACRA provision in future rulemaking.

As we stated in the FY 2014 IPPS/LTCH PPS final rule (78 FR 50515 through 50517), our actuaries estimate that a −9.3 percent adjustment to the standardized amount would be necessary if CMS were to fully recover the $11 billion recoupment required by section 631 of the ATRA in FY 2014. It is often our practice to phase in payment rate adjustments over more than one year, in order to moderate the effect on payment rates in any one year. Therefore, consistent with the policies that we have adopted in many similar cases, and after consideration of the public comments we received, in the FY 2014 IPPS/LTCH PPS final rule (78 FR 50515 through 50517), we implemented a −0.8 percent recoupment adjustment to the standardized amount in FY 2014. We stated that if adjustments of approximately −0.8 percent are implemented in FYs 2014, 2015, 2016, and 2017, using standard inflation factors, we estimate that the entire $11 billion will be accounted for by the end of the statutory 4-year timeline. As estimates of any future adjustments are subject to slight variations in total savings, we did not provide for specific adjustments for FYs 2015, 2016, or 2017 at that time. We stated that we believed that this level of adjustment for FY 2014 was a reasonable and fair approach that satisfies the requirements of the statute while mitigating extreme annual fluctuations in payment rates.

Consistent with the approach discussed in the FY 2014 rulemaking for recouping the $11 billion required by section 631 of the ATRA, in the FY 2015 IPPS/LTCH PPS final rule (79 FR 49874) and the FY 2016 IPPS/LTCH PPS final rule (80 FR 49345), we implemented additional −0.8 percent recoupment adjustments to the standardized amount in FY 2015 and FY 2016, respectively. We estimated that these adjustments, combined with leaving the prior −0.8 percent adjustments in place, would recover up to $2 billion in FY 2015 and another $3 billion in FY 2016. When combined with the approximately $1 billion adjustment made in FY 2014, we estimated that approximately $5 to $6 billion would be left to recover under section 631 of the ATRA by the end of FY 2016.

However, due to lower than previously estimated inpatient spending, an adjustment of −0.8 percent in FY 2017 would not recoup the $11 billion under section 631 of the ATRA. Based on the FY 2017 President's Budget, our actuaries currently estimate that FY 2014 through FY 2016 spending subject to the documentation and coding recoupment adjustment in the absence of the −0.8 percent adjustments made in FYs 2014 through 2016 would have been $123.783 billion in FY 2014, $124.361 billion in FY 2015, and $127.060 billion in FY 2016. As shown in the following table, the amount recouped in each of those fiscal years is therefore calculated as the difference between those amounts and the amounts determined to have been spent in those years with the −0.8 percent adjustment applied, namely $122.801 billion in FY 2014, $122.395 billion in FY 2015, and $124.059 billion in FY 2016. This yields an estimated total recoupment through the end of FY 2016 of $5.950 billion.

RECOUPMENT MADE UNDER SECTION 631 OF THE AMERICAN TAXPAYER RELIEF ACT OF 2012 (ATRA)

	IPPS Spending * (billions)	Cumulative adjustment factor	Adjusted IPPS spending (billions)	Recoupment amount (billions)
FY 2014	$122.801	1.00800	$123.783	$0.98

RECOUPMENT MADE UNDER SECTION 631 OF THE AMERICAN TAXPAYER RELIEF ACT OF 2012 (ATRA)—Continued

	IPPS Spending * (billions)	Cumulative adjustment factor	Adjusted IPPS spending (billions)	Recoupment amount (billions)
FY 2015	122.395	1.01606	124.361	1.97
FY 2016	124.059	1.02419	127.060	3.00
Total	.....	.....	.....	5.95

* Based on FY 2017 President's Budget, including capital, IME, and DSH payments.

These estimates and the estimate of FY 2017 spending subject to the documentation and coding recoupment adjustment also will be contained in a memorandum from the Office of the Actuary that we will make publicly available on the CMS Web site. A description of the President's Budget for FY 2017 is currently available on the OMB Web site at: *https://www.whitehouse.gov/omb/budget*.

Our actuaries currently estimate that the FY 2017 spending subject to the documentation and coding recoupment adjustment (including capital, IME, and DSH payment) would be $129.625 billion in the absence of any documentation and recoupment adjustments from FY 2014 through FY 2017. Therefore, our actuaries currently estimate that, to the nearest tenth of a percent, the FY 2017 documentation and coding adjustment factor that will recoup as closely as possible $11 billion from FY 2014 through FY 2017 without exceeding this amount is −1.5 percent. This adjustment factor yields an estimated spending amount in FY 2017 of $124.693 billion, calculated as $129.625/(1.008*1.008*1.008*1.015). This estimated −1.5 percent adjustment factor will be updated for the final rule based on the FY 2017 President's Budget Midsession Review. It is possible that, based on updated estimates, the necessary adjustment factor to the nearest tenth of a percent could be different than our actuaries' current estimate of −1.5 percent. The proposed −1.5 percent adjustment would be the final adjustment required under section 631 of the ATRA, and when combined with the effects of previous adjustments made in FY 2014, FY 2015, and FY 2016, we estimate will satisfy the section 631 of the ATRA recoupment. As stated earlier, once the recoupment was complete, we had anticipated making a single positive adjustment in FY 2018 to offset the reductions required to recoup the $11 billion under section 631 of the ATRA. However, as stated earlier, section 414 of the MACRA requires that we not make the single positive adjustment we intended to make in FY 2018, but instead make a 0.5 percent positive adjustment for each of FYs 2018 through 2023. The provision under section 414 of the MACRA does not impact our proposed FY 2017 adjustment, and we will address this MACRA provision in future rulemaking.

E. Refinement of the MS–DRG Relative Weight Calculation

1. Background

Beginning in FY 2007, we implemented relative weights for DRGs based on cost report data instead of charge information. We refer readers to the FY 2007 IPPS final rule (71 FR 47882) for a detailed discussion of our final policy for calculating the cost-based DRG relative weights and to the FY 2008 IPPS final rule with comment period (72 FR 47199) for information on how we blended relative weights based on the CMS DRGs and MS–DRGs.

As we implemented cost-based relative weights, some public commenters raised concerns about potential bias in the weights due to ''charge compression,'' which is the practice of applying a higher percentage charge markup over costs to lower cost items and services, and a lower percentage charge markup over costs to higher cost items and services. As a result, the cost-based weights would undervalue high-cost items and overvalue low-cost items if a single cost-to-charge ratio (CCR) is applied to items of widely varying costs in the same cost center. To address this concern, in August 2006, we awarded a contract to the Research Triangle Institute, International (RTI) to study the effects of charge compression in calculating the relative weights and to consider methods to reduce the variation in the CCRs across services within cost centers. For a detailed summary of RTI's findings, recommendations, and public comments that we received on the report, we refer readers to the FY 2009 IPPS/LTCH PPS final rule (73 FR 48452 through 48453). In addition, we refer readers to RTI's July 2008 final report titled ''Refining Cost to Charge Ratios for Calculating APC and MS–DRG Relative Payment Weights'' (*http://www.rti.org/reports/cms/HHSM-500-2005-0029I/PDF/Refining_Cost_to_Charge_Ratios_200807_Final.pdf*).

In the FY 2009 IPPS final rule (73 FR 48458 through 48467), in response to the RTI's recommendations concerning cost report refinements, we discussed our decision to pursue changes to the cost report to split the cost center for Medical Supplies Charged to Patients into one line for ''Medical Supplies Charged to Patients'' and another line for ''Implantable Devices Charged to Patients.'' We acknowledged, as RTI had found, that charge compression occurs in several cost centers that exist on the Medicare cost report. However, as we stated in the FY 2009 IPPS final rule, we focused on the CCR for Medical Supplies and Equipment because RTI found that the largest impact on the MS–DRG relative weights could result from correcting charge compression for devices and implants. In determining the items that should be reported in these respective cost centers, we adopted the commenters' recommendations that hospitals use revenue codes established by the AHA's National Uniform Billing Committee to determine the items that should be reported in the ''Medical Supplies Charged to Patients'' and the ''Implantable Devices Charged to Patients'' cost centers. Accordingly, a new subscripted line for ''Implantable Devices Charged to Patients'' was created in July 2009. This new subscripted cost center has been available for use for cost reporting periods beginning on or after May 1, 2009.

As we discussed in the FY 2009 IPPS final rule (73 FR 48458) and in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68519 through 68527), in addition to the findings regarding implantable devices, RTI found that the costs and charges of computed tomography (CT) scans, magnetic resonance imaging (MRI), and cardiac catheterization differ significantly from the costs and charges of other services included in the standard associated cost center. RTI also concluded that both the IPPS and the

OPPS relative weights would better estimate the costs of those services if CMS were to add standard cost centers for CT scans, MRIs, and cardiac catheterization in order for hospitals to report separately the costs and charges for those services and in order for CMS to calculate unique CCRs to estimate the costs from charges on claims data. In the FY 2011 IPPS/LTCH PPS final rule (75 FR 50075 through 50080), we finalized our proposal to create standard cost centers for CT scans, MRIs, and cardiac catheterization, and to require that hospitals report the costs and charges for these services under new cost centers on the revised Medicare cost report Form CMS–2552–10. (We refer readers to the FY 2011 IPPS/LTCH PPS final rule (75 FR 50075 through 50080) for a detailed discussion of the reasons for the creation of standard cost centers for CT scans, MRIs, and cardiac catheterization.) The new standard cost centers for CT scans, MRIs, and cardiac catheterization are effective for cost reporting periods beginning on or after May 1, 2010, on the revised cost report Form CMS–2552–10.

In the FY 2009 IPPS final rule (73 FR 48468), we stated that, due to what is typically a 3-year lag between the reporting of cost report data and the availability for use in ratesetting, we anticipated that we might be able to use data from the new ''Implantable Devices Charged to Patients'' cost center to develop a CCR for ''Implantable Devices Charged to Patients'' in the FY 2012 or FY 2013 IPPS rulemaking cycle. However, as noted in the FY 2010 IPPS/RY 2010 LTCH PPS final rule (74 FR 43782), due to delays in the issuance of the revised cost report Form CMS 2552–10, we determined that a new CCR for ''Implantable Devices Charged to Patients'' might not be available before FY 2013. Similarly, when we finalized the decision in the FY 2011 IPPS/LTCH PPS final rule to add new cost centers for CT scans, MRIs, and cardiac catheterization, we explained that data from any new cost centers that may be created will not be available until at least 3 years after they are first used (75 FR 50077). In preparation for the FY 2012 IPPS/LTCH PPS rulemaking, we checked the availability of data in the ''Implantable Devices Charged to Patients'' cost center on the FY 2009 cost reports, but we did not believe that there was a sufficient amount of data from which to generate a meaningful analysis in this particular situation. Therefore, we did not propose to use data from the ''Implantable Devices Charged to Patients'' cost center to create a distinct CCR for ''Implantable Devices Charged to Patients'' for use in calculating the MS–DRG relative weights for FY 2012. We indicated that we would reassess the availability of data for the ''Implantable Devices Charged to Patients'' cost center for the FY 2013 IPPS/LTCH PPS rulemaking cycle and, if appropriate, we would propose to create a distinct CCR at that time.

During the development of the FY 2013 IPPS/LTCH PPS proposed and final rules, hospitals were still in the process of transitioning from the previous cost report Form CMS–2552–96 to the new cost report Form CMS–2552–10. Therefore, we were able to access only those cost reports in the FY 2010 HCRIS with fiscal year begin dates on or after October 1, 2009, and before May 1, 2010; that is, those cost reports on Form CMS–2552–96. Data from the Form CMS–2552–10 cost reports were not available because cost reports filed on the Form CMS–2552–10 were not accessible in the HCRIS. Further complicating matters was that, due to additional unforeseen technical difficulties, the corresponding information regarding charges for implantable devices on hospital claims was not yet available to us in the MedPAR file. Without the breakout in the MedPAR file of charges associated with implantable devices to correspond to the costs of implantable devices on the cost report, we believed that we had no choice but to continue computing the relative weights with the current CCR that combines the costs and charges for supplies and implantable devices. We stated in the FY 2013 IPPS/LTCH PPS final rule (77 FR 53281 through 53283) that when we do have the necessary data for supplies and implantable devices on the claims in the MedPAR file to create distinct CCRs for the respective cost centers for supplies and implantable devices, we hoped that we would also have data for an analysis of creating distinct CCRs for CT scans, MRIs, and cardiac catheterization, which could then be finalized through rulemaking. In the FY 2013 IPPS/LTCH PPS final rule (77 FR 53281), we stated that, prior to proposing to create these CCRs, we would first thoroughly analyze and determine the impacts of the data, and that distinct CCRs for these new cost centers would be used in the calculation of the relative weights only if they were first finalized through rulemaking.

At the time of the development of the FY 2014 IPPS/LTCH PPS proposed rule (78 FR 27506 through 27507), we had a substantial number of hospitals completing all, or some, of these new cost centers on the FY 2011 Medicare cost reports, compared to prior years. We stated that we believed that the analytic findings described using the FY 2011 cost report data and FY 2012 claims data supported our original decision to break out and create new cost centers for implantable devices, MRIs, CT scans, and cardiac catheterization, and we saw no reason to further delay proposing to implement the CCRs of each of these cost centers. Therefore, beginning in FY 2014, we proposed a policy to calculate the MS–DRG relative weights using 19 CCRs, creating distinct CCRs from cost report data for implantable devices, MRIs, CT scans, and cardiac catheterization.

We refer readers to the FY 2014 IPPS/LTCH PPS proposed rule (78 FR 27507 through 27509) and final rule (78 FR 50518 through 50523) in which we presented data analyses using distinct CCRs for implantable devices, MRIs, CT scans, and cardiac catheterization. The FY 2014 IPPS/LTCH PPS final rule also set forth our responses to public comments we received on our proposal to implement these CCRs. As explained in more detail in the FY 2014 IPPS/LTCH PPS final rule, we finalized our proposal to use 19 CCRs to calculate MS–DRG relative weights beginning in FY 2014—the then existing 15 cost centers and the 4 new CCRs for implantable devices, MRIs, CT scans, and cardiac catheterization. Therefore, beginning in FY 2014, we calculate the IPPS MS–DRG relative weights using 19 CCRs, creating distinct CCRs for implantable devices, MRIs, CT scans, and cardiac catheterization.

2. Discussion of Policy for FY 2017

Consistent with our established policy, we calculated the proposed MS–DRG relative weights for FY 2017 using two data sources: The MedPAR file as the claims data source and the HCRIS as the cost report data source. We adjusted the charges from the claims to costs by applying the 19 national average CCRs developed from the cost reports. The description of the calculation of the proposed 19 CCRs and the proposed MS–DRG relative weights for FY 2017 is included in section II.G. of the preamble of this proposed rule. As we did with the FY 2016 IPPS/LTCH PPS final rule, we are providing the version of the HCRIS from which we calculated these proposed 19 CCRs on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html.* Click on the link on the left side of the screen titled, ''FY 2017 IPPS Proposed Rule Home Page'' or ''Acute Inpatient Files for Download.''

F. Proposed Changes to Specific MS–DRG Classifications

1. Discussion of Changes to Coding System and Basis for MS–DRG Updates

a. Conversion of MS–DRGs to the International Classification of Diseases, 10th Revision (ICD–10)

As of October 1, 2015, providers use the International Classification of Diseases, 10th Revision (ICD–10) coding system to report diagnoses and procedures for Medicare hospital inpatient services under the MS–DRG system instead of the ICD–9–CM coding system, which was used through September 30, 2015. The ICD–10 coding system includes the International Classification of Diseases, 10th Revision, Clinical Modification (ICD–10–CM) for diagnosis coding and the International Classification of Diseases, 10th Revision, Procedure Coding System (ICD–10–PCS) for inpatient hospital procedure coding, as well as the Official ICD–10–CM and ICD–10–PCS Guidelines for Coding and Reporting. The ICD–10 coding system was initially adopted for transactions conducted on or after October 1, 2013, as described in the Health Insurance Portability and Accountability Act of 1996 (HIPAA) Administrative Simplification: Modifications to Medical Data Code Set Standards to Adopt ICD–10–CM and ICD–10–PCS Final Rule published in the **Federal Register** on January 16, 2009 (74 FR 3328 through 3362) (hereinafter referred to as the ''ICD–10–CM and ICD–10–PCS final rule''). However, the Secretary of Health and Human Services (the Secretary) issued a final rule that delayed the compliance date for ICD–10 from October 1, 2013, to October 1, 2014. That final rule, entitled ''Administrative Simplification: Adoption of a Standard for a Unique Health Plan Identifier; Addition to the National Provider Identifier Requirements; and a Change to the Compliance Date for ICD–10–CM and ICD–10–PCS Medical Data Code Sets,'' CMS–0040–F, was published in the **Federal Register** on September 5, 2012 (77 FR 54664) and is available for viewing on the Internet at: *http://www.gpo.gov/fdsys/pkg/FR-2012-09-05/pdf/2012-21238.pdf*. On April 1, 2014, the Protecting Access to Medicare Act of 2014 (PAMA) (Pub. L. 113–93) was enacted, which specified that the Secretary may not adopt ICD–10 prior to October 1, 2015. Accordingly, the U.S. Department of Health and Human Services released a final rule in the **Federal Register** on August 4, 2014 (79 FR 45128 through 45134) that included a new compliance date that required the use of ICD–10 beginning October 1, 2015. The rule also required HIPAA-covered entities to continue to use ICD–9–CM through September 30, 2015.

The anticipated move to ICD–10 necessitated the development of an ICD–10–CM/ICD–10–PCS version of the MS–DRGs. CMS began a project to convert the ICD–9–CM-based MS–DRGs to ICD–10 MS–DRGs. In response to the FY 2011 IPPS/LTCH PPS proposed rule, we received public comments on the creation of the ICD–10 version of the MS–DRGs to be implemented at the same time as ICD–10 (75 FR 50127 and 50128). While we did not propose an ICD–10 version of the MS–DRGs in the FY 2011 IPPS/LTCH PPS proposed rule, we noted that we have been actively involved in converting current MS–DRGs from ICD–9–CM codes to ICD–10 codes and sharing this information through the ICD–10 (previously ICD–9–CM) Coordination and Maintenance Committee. We undertook this early conversion project to assist other payers and providers in understanding how to implement their own conversion projects. We posted ICD–10 MS–DRGs based on Version 26.0 (FY 2009) of the MS–DRGs. We also posted a paper that describes how CMS went about completing this project and suggestions for other payers and providers to follow. Information on the ICD–10 MS–DRG conversion project can be found on the ICD–10 MS–DRG Conversion Project Web site at: *http://cms.hhs.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*. We have continued to keep the public updated on our maintenance efforts for ICD–10–CM and ICD–10–PCS coding systems, as well as the General Equivalence Mappings that assist in conversion through the ICD–10 (previously ICD–9–CM) Coordination and Maintenance Committee. Information on these committee meetings can be found on the CMS Web site at: *http://www.cms.hhs.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/index.html*.

During FY 2011, we developed and posted Version 28.0 of the ICD–10 MS–DRGs based on the FY 2011 MS–DRGs (Version 28.0) that we finalized in the FY 2011 IPPS/LTCH PPS final rule on the CMS Web site. This ICD–10 MS–DRGs Version 28.0 also included the CC Exclusion List and the ICD–10 version of the hospital-acquired conditions (HACs), which was not posted with Version 26. We also discussed this update at the September 15–16, 2010 and the March 9–10, 2011 meetings of the ICD–9–CM Coordination and Maintenance Committee. The minutes of these two meetings are posted on the CMS Web site at: *http://www.cms.hhs.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/index.html*.

We reviewed comments on the ICD–10 MS–DRGs Version 28 and made updates as a result of these comments. We called the updated version the ICD–10 MS–DRGs Version 28–R1. We posted a Definitions Manual of ICD–10 MS–DRGs Version 28–R1 on our ICD–10 MS–DRG Conversion Project Web site. To make the review of Version 28–R1 updates easier for the public, we also made available pilot software on a CD ROM that could be ordered through the National Technical Information Service (NTIS). A link to the NTIS ordering page was provided on the CMS ICD–10 MS–DRGs Web site. We stated that we believed that, by providing the ICD–10 MS–DRGs Version 28–R1 Pilot Software (distributed on CD ROM), the public would be able to more easily review and provide feedback on updates to the ICD–10 MS–DRGs. We discussed the updated ICD–10 MS–DRGs Version 28–R1 at the September 14, 2011 ICD–9–CM Coordination and Maintenance Committee meeting. We encouraged the public to continue to review and provide comments on the ICD–10 MS–DRGs so that CMS could continue to update the system.

In FY 2012, we prepared the ICD–10 MS–DRGs Version 29, based on the FY 2012 MS–DRGs (Version 29.0) that we finalized in the FY 2012 IPPS/LTCH PPS final rule. We posted a Definitions Manual of ICD–10 MS–DRGs Version 29 on our ICD–10 MS–DRG Conversion Project Web site. We also prepared a document that describes changes made from Version 28 to Version 29 to facilitate a review. The ICD–10 MS–DRGs Version 29 was discussed at the ICD–9–CM Coordination and Maintenance Committee meeting on March 5, 2012. Information was provided on the types of updates made. Once again the public was encouraged to review and comment on the most recent update to the ICD–10 MS–DRGs.

CMS prepared the ICD–10 MS–DRGs Version 30 based on the FY 2013 MS–DRGs (Version 30) that we finalized in the FY 2013 IPPS/LTCH PPS final rule. We posted a Definitions Manual of the ICD–10 MS–DRGs Version 30 on our ICD–10 MS–DRG Conversion Project Web site. We also prepared a document that describes changes made from Version 29 to Version 30 to facilitate a review. We produced mainframe and computer software for Version 30, which was made available to the public in February 2013. Information on ordering the mainframe and computer software through NTIS was posted on the ICD–10 MS–DRG Conversion Project

Web site. The ICD–10 MS–DRGs Version 30.0 computer software facilitated additional review of the ICD–10 MS–DRGs conversion.

We provided information on a study conducted on the impact of converting the MS–DRGs to ICD–10. Information on this study is summarized in a paper entitled ''Impact of the Transition to ICD–10 on Medicare Inpatient Hospital Payments.'' This paper was posted on the CMS ICD–10 MS–DRGs Conversion Project Web site and was distributed and discussed at the September 15, 2010 ICD–9–CM Coordination and Maintenance Committee meeting. The paper described CMS' approach to the conversion of the MS–DRGs from ICD–9–CM codes to ICD–10 codes. The study was undertaken using the ICD–9–CM MS–DRGs Version 27.0 (FY 2010), which was converted to the ICD–10 MS–DRGs Version 27.0. The study estimated the impact on aggregate payment to hospitals and the distribution of payments across hospitals. The impact of the conversion from ICD–9–CM to ICD–10 on Medicare MS–DRG hospital payments was estimated using FY 2009 Medicare claims data. The study found a hospital payment increase of 0.05 percent using the ICD–10 MS–DRGs Version 27.

CMS provided an overview of this hospital payment impact study at the March 5, 2012 ICD–9–CM Coordination and Maintenance Committee meeting. This presentation followed presentations on the creation of ICD–10 MS–DRGs Version 29.0. A summary report of this meeting can be found on the CMS Web site at: *http://www.cms.hhs.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/index.html*. At this March 2012 meeting, CMS announced that it would produce an update on this impact study based on an updated version of the ICD–10 MS–DRGs. This update of the impact study was presented at the March 5, 2013 ICD–9–CM Coordination and Maintenance Committee meeting. The study found that moving from an ICD–9–CM-based system to an ICD–10 MS–DRG replicated system would lead to DRG reassignments on only 1 percent of the 10 million MedPAR sample records used in the study. Ninety-nine percent of the records did not shift to another MS–DRG when using an ICD–10 MS–DRG system. For the 1 percent of the records that shifted, 45 percent of the shifts were to a higher-weighted MS–DRG, while 55 percent of the shifts were to lower-weighted MS–DRGs. The net impact across all MS–DRGs was a reduction by 4/10000 or minus 4 pennies per $100. The updated paper is posted on the CMS Web site at: *http://cms.hhs.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html* under the ''Downloads'' section. Information on the March 5, 2013 ICD–9–CM Coordination and Maintenance Committee meeting can be found on the CMS Web site at: *http://cms.hhs.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/ICD-9-CM-C-and-M-Meeting-Materials.html*. This update of the impact paper and the ICD–10 MS–DRG Version 30 software provided additional information to the public who were evaluating the conversion of the MS–DRGs to ICD–10 MS–DRGs.

CMS prepared the ICD–10 MS–DRGs Version 31 based on the FY 2014 MS–DRGs (Version 31) that we finalized in the FY 2014 IPPS/LTCH PPS final rule. In November 2013, we posted a Definitions Manual of the ICD–10 MS–DRGs Version 31 on the ICD–10 MS–DRG Conversion Project Web site at: *http://www.cms.hhs.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*. We also prepared a document that described changes made from Version 30 to Version 31 to facilitate a review. We produced mainframe and computer software for Version 31, which was made available to the public in December 2013. Information on ordering the mainframe and computer software through NTIS was posted on the CMS Web site at: *http://cms.hhs.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html* under the ''Related Links'' section. This ICD–10 MS–DRGs Version 31.0 computer software facilitated additional review of the ICD–10 MS–DRGs conversion. We encouraged the public to submit to CMS any comments on areas where they believed the ICD–10 MS–DRGs did not accurately reflect grouping logic found in the ICD–9–CM MS–DRGs Version 31.

We reviewed public comments received and developed an update of ICD–10 MS–DRGs Version 31, which we called ICD–10 MS–DRGs Version 31–R. We posted a Definitions Manual of the ICD–10 MS–DRGs Version 31–R on the ICD–10 MS–DRG Conversion Project Web site at: *http://www.cms.hhs.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*. We also prepared a document that describes changes made from Version 31 to Version 31–R to facilitate a review. We continued to share ICD–10 MS–DRG conversion activities with the public through this Web site.

CMS prepared the ICD–10 MS–DRGs Version 32 based on the FY 2015 MS–DRGs (Version 32) that we finalized in the FY 2015 IPPS/LTCH PPS final rule. In November 2014, we made available a Definitions Manual of the ICD–10 MS DRGs Version 32 on the ICD–10 MS–DRG Conversion Project Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*. We also prepared a document that described changes made from Version 31–R to Version 32 to facilitate a review. We produced mainframe and computer software for Version 32, which was made available to the public in January 2015. Information on ordering the mainframe and computer software through NTIS was made available on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html* under the ''Related Links'' section. This ICD–10 MS–DRGs Version 32 computer software facilitated additional review of the ICD–10 MS–DRGs conversion. We encouraged the public to submit to CMS any comments on areas where they believed the ICD–10 MS–DRGs did not accurately reflect grouping logic found in the ICD–9–CM MS–DRGs Version 32. We discussed five requests from the public to update the ICD–10 MS–DRGs Version 32 to better replicate the ICD–9–CM MS–DRGs in section II.G.3., 4., and 5. of the preamble of the FY 2016 IPPS/LTCH PPS final rule. In the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24351), we proposed to implement the MS–DRG code logic in the ICD–10 MS–DRGs Version 32 along with any finalized updates to the ICD–10 MS–DRGs Version 32 for the final ICD–10 MS–DRGs Version 33. In the proposed rule, we proposed the ICD–10 MS–DRGs Version 33 as the replacement logic for the ICD–9–CM based MS–DRGs Version 32 as part of the proposed MS–DRG updates for FY 2016. We invited public comments on how well the ICD–10 MS–DRGs Version 32 replicated the logic of the MS–DRGs Version 32 based on ICD–9–CM codes.

In the FY 2016 IPPS/LTCH PPS final rule (80 FR 49356 through 49357 and 49363 through 49407), we addressed the public comments we received on the replication in the ICD–10 MS–DRGs Version 32 of the logic of the MS–DRGs Version 32 based on ICD–9–CM codes. We refer readers to that final rule for a discussion of the changes we made in response to public comments.

b. Basis for Proposed FY 2017 MS–DRG Updates

CMS encourages input from our stakeholders concerning the annual IPPS updates when that input is made available to us by December 7 of the year prior to the next annual proposed rule update. For example, to be considered for any updates or changes

in FY 2017, comments and suggestions should have been submitted by December 7, 2015. The comments that were submitted in a timely manner for FY 2017 are discussed in this section of the proposed rule. Interested parties should submit any comments and suggestions for FY 2018 by December 7, 2016, via the new CMS MS–DRG Classification Change Requests Mailbox located at: *MSDRGClassificationChange@cms.hhs.gov*.

Following are the changes we are proposing to the MS–DRGs for FY 2017. We are inviting public comment on each of the MS–DRG classification proposed changes described in this rule, as well as our proposals to maintain certain existing MS–DRG classifications, which are also discussed later in this section of the proposed rule. In some cases, we are proposing changes to the MS–DRG classifications based on our analysis of claims data. In other cases, we are proposing to maintain the existing MS–DRG classification based on our analysis of claims data. For this FY 2017 proposed rule, our MS–DRG analysis is based on claims data from the December 2015 update of the FY 2015 MedPAR file, which contains hospital bills received through September 30, 2015, for discharges occurring through September 30, 2015. In our discussion of the proposed MS–DRG reclassification changes that follows, we refer to our analysis of claims data from the ''December 2015 update of the FY 2015 MedPAR file.''

As explained in previous rulemaking (76 FR 51487), in deciding whether to propose to make further modification to the MS–DRGs for particular circumstances brought to our attention, we consider whether the resource consumption and clinical characteristics of the patients with a given set of conditions are significantly different than the remaining patients in the MS–DRG. We evaluate patient care costs using average costs and lengths of stay and rely on the judgment of our clinical advisors to decide whether patients are clinically distinct or similar to other patients in the MS–DRG. In evaluating resource costs, we consider both the absolute and percentage differences in average costs between the cases we select for review and the remainder of cases in the MS–DRG. We also consider variation in costs within these groups; that is, whether observed average differences are consistent across patients or attributable to cases that are extreme in terms of costs or length of stay, or both. Further, we consider the number of patients who will have a given set of characteristics and generally prefer not to create a new MS–DRG unless it would include a substantial number of cases.

In our examination of the claims data, we apply the following criteria established in FY 2008 (72 FR 47169) to determine if the creation of a new complication or comorbidity (CC) or major complication or comorbidity (MCC) subgroup within a base MS–DRG is warranted:

- A reduction in variance of costs of at least 3 percent.
- At least 5 percent of the patients in the MS–DRG fall within the CC or MCC subgroup.
- At least 500 cases are in the CC or MCC subgroup.
- There is at least a 20-percent difference in average costs between subgroups.
- There is a $2,000 difference in average costs between subgroups.

In order to warrant creation of a CC or MCC subgroup within a base MS–DRG, the subgroup must meet all five of the criteria.

We note that some of the issues being evaluated for the FY 2017 MS–DRGs update continue to relate to the need for the ICD–10 MS–DRGs to accurately replicate the logic of the ICD–9–CM based version of the MS–DRGs. Replication is important because both the logic for the proposed MS–DRGs and the data source used to calculate and develop proposed relative payment weights are based on the same MedPAR claims data. In other words, as the logic for the proposed FY 2017 ICD–10 MS–DRGs is based upon the FY 2015 ICD–9–CM MedPAR claims data, the data source used to calculate and develop the proposed FY 2017 relative payment weights is also based on the FY 2015 ICD–9–CM MedPAR claims data, including any proposed MS–DRG classification changes discussed in this proposed rule. This is consistent with how the current FY 2016 relative payment weights are based on the ICD–9–CM diagnosis and procedure codes from the FY 2014 MedPAR claims data that were grouped through the ICD–9–CM version of the FY 2016 GROUPER Version 33. We note that we made the MS–DRG GROUPER and Medicare Code Editor (MCE) ICD–9–CM Software Version 33 available to the public for use in analyzing ICD–9–CM data to create relative payment weights using ICD–9–CM data on our CMS Web site at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2016-IPPS-Final-Rule-Home-Page.html?DLSort=0&DLEntries=10&DLPage=1&DLSortDir=ascending*. Therefore, as discussed in section II.G. of the preamble of this proposed rule, ICD–9–CM data were used for computing the proposed FY 2017 MS–DRG relative payment weights. If the ICD–9 and ICD–10 versions of MS–DRGs cease to be replications of each other, the relative payment weights computed using the ICD–9 claims data and MS–DRGs would be inconsistent with the relative payment weights assigned for the ICD–10 MS–DRGs, causing unintended payment redistributions. Thus, if the findings of our data analyses and the recommendations of our clinical advisors supported modifications to the current ICD–10 MS–DRG structure, prior to proposing any changes, we first evaluated whether the requested change could be replicated in the ICD–9–CM MS–DRGs. If the answer was ''yes,'' from a replication perspective, the change was considered feasible. If the answer was ''no,'' we examined whether the change in the ICD–10 MS–DRGs was likely to cause a significant number of patient cases to change or ''shift'' ICD–10 MS–DRGs. If relatively few patient cases would be impacted, we evaluated if it would be feasible to propose the change even though it could not be replicated by the ICD–9 MS–DRGs because it would not cause a material payment redistribution. For the ICD–10 MS–DRG classification change requests that could not be replicated in ICD–9–CM and that would cause a significant number of patient cases to shift MS–DRG assignment, we considered other alternatives.

2. Pre-Major Diagnostic Category (Pre-MDC): Total Artificial Heart Replacement

An ICD–10 MS–DRG replication issue regarding the assignment of two ICD–10–PCS procedure codes was identified after the October 1, 2015 implementation of the Version 33 ICD–10 MS–DRGs. ICD–10–PCS procedure codes 02RK0JZ (Replacement of right ventricle with synthetic substitute, open approach) and 02RL0JZ (Replacement of left ventricle with synthetic substitute, open approach), when reported together, describe a biventricular heart replacement (artificial heart). Under the Version 32 ICD–9–CM based MS–DRGs, this procedure was described by ICD–9–CM procedure code 37.52 (Implantation of total internal biventricular heart replacement system) and grouped to MS–DRGs 001 and 002 (Heart Transplant or Implant of Heart Assist System with and without MCC, respectively).

As discussed in section II.F.1.a. of the preamble of this proposed rule, to assist in the conversion from the ICD–9–CM

based MS–DRGs to ICD–10, beginning in FY 2011, draft versions of the ICD–10 based MS–DRGs were developed and made available for public comment. The two ICD–10–PCS procedure codes (02RK0JZ and 02RL0JZ) were assigned as a ''cluster'' to the draft ICD–10 based MS–DRGs 001 and 002 in prior draft versions of the ICD–10 MS–DRGs. In ICD–10–PCS, a cluster is the term used to describe when a combination of ICD–10–PCS procedure codes are needed to fully satisfy the equivalent meaning of an ICD–9–CM procedure code for it to be considered a plausible translation. Upon review of prior draft versions of the ICD–10 MS–DRGs, it was determined that Version 30 was the last version to include ICD–10–PCS procedure codes 02RK0JZ and 02RL0JZ as a code cluster (from ICD–9–CM procedure code 37.52) that grouped to the draft ICD–10 based MS–DRGs 001 and 002. Subsequent draft versions of the ICD–10 MS–DRGs inadvertently omitted this code cluster from those MS–DRGs.

Therefore, for FY 2017, we are proposing to assign ICD–10–PCS procedure codes 02RK0JZ and 02RL0JZ as a code cluster to ICD–10 Version 34 MS–DRGs 001 and 002 (Heart Transplant or Implant of Heart Assist System with and without MCC, respectively) to accurately replicate the Version 32 ICD–9–CM based MS–DRG logic of procedure code 37.52. We are inviting public comments on our proposal.

3. MDC 1 (Diseases and Disorders of the Nervous System)

a. Endovascular Embolization (Coiling) or Occlusion of Head and Neck Procedures

We received a repeat request to change the MS–DRG assignment for procedure codes describing endovascular embolization (coiling) or occlusion of the head and neck. This topic was discussed in the FY 2015 IPPS/LTCH PPS proposed rule (79 FR 28005 through 28007); the FY 2015 IPPS/LTCH PPS final rule (79 FR 49883 through 49886); the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24351 through 24356); and the FY 2016 IPPS/LTCH PPS final rule (80 FR 49358 through 49363). For these 2 fiscal years, we did not change the MS–DRG assignment for procedure codes describing endovascular embolization (coiling) or occlusion of the head and neck for the reasons discussed in these proposed and final rules.

For FY 2017, the requestor again asked that CMS change the MS–DRG assignment for procedure codes describing endovascular embolization or occlusion of the head and neck as well as several other codes describing endovascular procedures of the head and neck.

The ICD–10–PCS procedure codes listed in the following table capture endovascular embolization or occlusion of the head and neck procedures that are assigned to the following MS–DRGs in ICD–10 Version 33 MS–DRGs: MS–DRG 020 (Intracranial Vascular Procedures with Principal Diagnosis of Hemorrhage with MCC); MS–DRG 021 (Intracranial Vascular Procedures with Principal Diagnosis of Hemorrhage with CC); MS–DRG 022 (Intracranial Vascular Procedures with Principal Diagnosis of Hemorrhage without CC/MCC); MS–DRG 023 (Craniotomy with Major Device Implant/Acute Complex CNS Principal Diagnosis with MCC or Chemo Implant); MS–DRG 024 (Craniotomy with Major Device Implant/Acute Complex CNS Principal Diagnosis without MCC); MS–DRG 025 (Craniotomy and Endovascular Intracranial Procedures with MCC); MS–DRG 026 (Craniotomy and Endovascular Intracranial Procedures with CC); and MS–DRG 027 (Craniotomy and Endovascular Intracranial Procedures without CC/MCC):

ICD–10–PCS Codes for Endovascular Embolization or Occlusion of the Head and Neck Procedures Assigned to MS–DRGs 020 Through 027 in ICD–10 MS–DRGs Version 33

ICD–10–PCS code	Code description
03LG3BZ	Occlusion of intracranial artery with bioactive intraluminal device, percutaneous approach.
03LG3DZ	Occlusion of intracranial artery with intraluminal device, percutaneous approach.
03LG4BZ	Occlusion of intracranial artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LG4DZ	Occlusion of intracranial artery with intraluminal device, percutaneous endoscopic approach.
03LH3BZ	Occlusion of right common carotid artery with bioactive intraluminal device, percutaneous approach.
03LH3DZ	Occlusion of right common carotid artery with intraluminal device, percutaneous approach.
03LH4BZ	Occlusion of right common carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LH4DZ	Occlusion of right common carotid artery with intraluminal device, percutaneous endoscopic approach.
03LJ3BZ	Occlusion of left common carotid artery with bioactive intraluminal device, percutaneous approach.
03LJ3DZ	Occlusion of left common carotid artery with intraluminal device, percutaneous approach.
03LJ4BZ	Occlusion of left common carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LJ4DZ	Occlusion of left common carotid artery with intraluminal device, percutaneous endoscopic approach.
03LK3BZ	Occlusion of right internal carotid artery with bioactive intraluminal device, percutaneous approach.
03LK3DZ	Occlusion of right internal carotid artery with intraluminal device, percutaneous approach.
03LK4BZ	Occlusion of right internal carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LK4DZ	Occlusion of right internal carotid artery with intraluminal device, percutaneous endoscopic approach.
03LL3BZ	Occlusion of left internal carotid artery with bioactive intraluminal device, percutaneous approach.
03LL3DZ	Occlusion of left internal carotid artery with intraluminal device, percutaneous approach.
03LL4BZ	Occlusion of left internal carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LL4DZ	Occlusion of left internal carotid artery with intraluminal device, percutaneous endoscopic approach.
03LM3BZ	Occlusion of right external carotid artery with bioactive intraluminal device, percutaneous approach.
03LM3DZ	Occlusion of right external carotid artery with intraluminal device, percutaneous approach.
03LM4BZ	Occlusion of right external carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LM4DZ	Occlusion of right external carotid artery with intraluminal device, percutaneous endoscopic approach.
03LN3BZ	Occlusion of left external carotid artery with bioactive intraluminal device, percutaneous approach.
03LN3DZ	Occlusion of left external carotid artery with intraluminal device, percutaneous approach.
03LN4BZ	Occlusion of left external carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LN4DZ	Occlusion of left external carotid artery with intraluminal device, percutaneous endoscopic approach.
03LP3BZ	Occlusion of right vertebral artery with bioactive intraluminal device, percutaneous approach.
03LP3DZ	Occlusion of right vertebral artery with intraluminal device, percutaneous approach.
03LP4BZ	Occlusion of right vertebral artery with bioactive intraluminal device, percutaneous endoscopic approach.

ICD–10–PCS CODES FOR ENDOVASCULAR EMBOLIZATION OR OCCLUSION OF THE HEAD AND NECK PROCEDURES ASSIGNED TO MS–DRGS 020 THROUGH 027 IN ICD–10 MS–DRGS VERSION 33—Continued

ICD–10–PCS code	Code description
03LP4DZ	Occlusion of right vertebral artery with intraluminal device, percutaneous endoscopic approach.
03LQ3BZ	Occlusion of left vertebral artery with bioactive intraluminal device, percutaneous approach.
03LQ3DZ	Occlusion of left vertebral artery with intraluminal device, percutaneous approach.
03LQ4BZ	Occlusion of left vertebral artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LQ4DZ	Occlusion of left vertebral artery with intraluminal device, percutaneous endoscopic approach.
03LR3DZ	Occlusion of face artery with intraluminal device, percutaneous approach.
03LR4DZ	Occlusion of face artery with intraluminal device, percutaneous endoscopic approach.
03LS3DZ	Occlusion of right temporal artery with intraluminal device, percutaneous approach.
03LS4DZ	Occlusion of right temporal artery with intraluminal device, percutaneous endoscopic approach.
03LT3DZ	Occlusion of left temporal artery with intraluminal device, percutaneous approach.
03LT4DZ	Occlusion of left temporal artery with intraluminal device, percutaneous endoscopic approach.
03VG3BZ	Restriction of intracranial artery with bioactive intraluminal device, percutaneous approach.
03VG3DZ	Restriction of intracranial artery with intraluminal device, percutaneous approach.
03VG4BZ	Restriction of intracranial artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VG4DZ	Restriction of intracranial artery with intraluminal device, percutaneous endoscopic approach.
03VH3BZ	Restriction of right common carotid artery with bioactive intraluminal device, percutaneous approach.
03VH3DZ	Restriction of right common carotid artery with intraluminal device, percutaneous approach.
03VH4BZ	Restriction of right common carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VH4DZ	Restriction of right common carotid artery with intraluminal device, percutaneous endoscopic approach.
03VJ3BZ	Restriction of left common carotid artery with bioactive intraluminal device, percutaneous approach.
03VJ3DZ	Restriction of left common carotid artery with intraluminal device, percutaneous approach.
03VJ4BZ	Restriction of left common carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VJ4DZ	Restriction of left common carotid artery with intraluminal device, percutaneous endoscopic approach.
03VK3BZ	Restriction of right internal carotid artery with bioactive intraluminal device, percutaneous approach.
03VK3DZ	Restriction of right internal carotid artery with intraluminal device, percutaneous approach.
03VK4BZ	Restriction of right internal carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VK4DZ	Restriction of right internal carotid artery with intraluminal device, percutaneous endoscopic approach.
03VL3BZ	Restriction of left internal carotid artery with bioactive intraluminal device, percutaneous approach.
03VL3DZ	Restriction of left internal carotid artery with intraluminal device, percutaneous approach.
03VL4BZ	Restriction of left internal carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VL4DZ	Restriction of left internal carotid artery with intraluminal device, percutaneous endoscopic approach.
03VM3BZ	Restriction of right external carotid artery with bioactive intraluminal device, percutaneous approach.
03VM3DZ	Restriction of right external carotid artery with intraluminal device, percutaneous approach.
03VM4BZ	Restriction of right external carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VM4DZ	Restriction of right external carotid artery with intraluminal device, percutaneous endoscopic approach.
03VN3BZ	Restriction of left external carotid artery with bioactive intraluminal device, percutaneous approach.
03VN3DZ	Restriction of left external carotid artery with intraluminal device, percutaneous approach.
03VN4BZ	Restriction of left external carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VN4DZ	Restriction of left external carotid artery with intraluminal device, percutaneous endoscopic approach.
03VP3BZ	Restriction of right vertebral artery with bioactive intraluminal device, percutaneous approach.
03VP3DZ	Restriction of right vertebral artery with intraluminal device, percutaneous approach.
03VP4BZ	Restriction of right vertebral artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VP4DZ	Restriction of right vertebral artery with intraluminal device, percutaneous endoscopic approach.
03VQ3BZ	Restriction of left vertebral artery with bioactive intraluminal device, percutaneous approach.
03VQ3DZ	Restriction of left vertebral artery with intraluminal device, percutaneous approach.
03VQ4BZ	Restriction of left vertebral artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VQ4DZ	Restriction of left vertebral artery with intraluminal device, percutaneous endoscopic approach.
03VR3DZ	Restriction of face artery with intraluminal device, percutaneous approach.
03VR4DZ	Restriction of face artery with intraluminal device, percutaneous endoscopic approach.
03VS3DZ	Restriction of right temporal artery with intraluminal device, percutaneous approach.
03VS4DZ	Restriction of right temporal artery with intraluminal device, percutaneous endoscopic approach.
03VT3DZ	Restriction of left temporal artery with intraluminal device, percutaneous approach.
03VT4DZ	Restriction of left temporal artery with intraluminal device, percutaneous endoscopic approach.
03VU3DZ	Restriction of right thyroid artery with intraluminal device, percutaneous approach.
03VU4DZ	Restriction of right thyroid artery with intraluminal device, percutaneous endoscopic approach.
03VV3DZ	Restriction of left thyroid artery with intraluminal device, percutaneous approach.
03VV4DZ	Restriction of left thyroid artery with intraluminal device, percutaneous endoscopic approach.

Cases reporting any of the ICD–10–PCS procedures codes listed in the table above that are assigned to MS–DRGs 020, 021, and 022 under MDC 1 require a principal diagnosis of hemorrhage. Cases reporting any of the ICD–10–PCS procedure codes listed in the table above that are assigned to MS–DRGs 023 and 024 require the insertion of a major implant or an acute complex central nervous system (CNS) principal diagnosis. Cases reporting any of the ICD–10–PCS procedure codes listed in the table above that are assigned to MS–DRGs 025, 026, and 027 do not have a principal diagnosis of hemorrhage, an acute complex CNS principal diagnosis, or a major device implant.

The requestor expressed concerns about the appropriateness of the MS–DRG assignment for the endovascular embolization or occlusion of head and neck procedures. The requestor stated that past data demonstrated that the cost of cases involving endovascular coils

exceeds the average cost of all cases within each of the MS–DRGs to which these procedures are assigned. The requestor pointed out that these procedures were formerly captured by the following ICD–9–CM codes that were assigned to MS–DRGs 020 through 027:

- 39.72 (Endovascular (total) embolization or occlusion of head and neck vessels);
- 39.75 (Endovascular embolization or occlusion of vessel(s) of head or neck using bare coils); and
- 39.76 (Endovascular embolization or occlusion of vessel(s) of head or neck using bioactive coils).

The commenter also expressed concern about the appropriateness of the current ICD–10 MS–DRG assignment of the following ICD–9–CM codes that describe other endovascular procedures of head and neck that were previously assigned to MS–DRGs 023 through 027 in the ICD–9–CM MS–DRGs Version 32. The commenter stated that these procedures are more clinically complex than other procedures assigned to these MS–DRGs.

- 00.62 (Percutaneous angioplasty of intracranial vessels(s));
- 39.74 (Endovascular removal of obstruction from head and neck vessel(s)); and
- 39.79 (Other endovascular procedures on other vessels).

We examined claims data from the December 2015 update of the FY 2015 MedPAR file for the endovascular embolization or occlusion of the head and neck procedures or other endovascular procedures reported under ICD–9–CM procedure codes 00.62, 39.72, 39.74, 39.75, 39.76, and 39.79 in MS–DRGs 020 through 027. The table below shows our findings.

ENDOVASCULAR EMBOLIZATION OR OCCLUSION OF THE HEAD AND NECK PROCEDURES AND OTHER ENDOVASCULAR PROCEDURES

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 020—All cases	1,213	16.44	$70,716
MS–DRG 020—Cases with procedure code 00.62, 39.72, 39.74, 39.75, 39.76, or 39.79	895	16.15	72,357
MS–DRG 021—All cases	350	13.74	53,289
MS–DRG 021—Cases with procedure code 00.62, 39.72, 39.74, 39.75, 39.76, or 39.79	272	13.21	53,478
MS–DRG 022—All cases	84	7.83	33,598
MS–DRG 022—Cases with procedure code 00.62, 39.72, 39.74, 39.75, 39.76, or 39.79	63	7.27	33,606
MS–DRG 023—All cases	6,360	10.63	38,204
MS–DRG 023—Cases with procedure code 00.62, 39.72, 39.74, 39.75, 39.76, or 39.79	2,183	8.57	38,935
MS–DRG 024—All cases	2,376	5.52	28,270
MS–DRG 024—Cases with procedure code 00.62, 39.72, 39.74, 39.75, 39.76, or 39.79	1,402	5.46	28,543
MS–DRG 025—All cases	17,756	9.19	29,657
MS–DRG 025—Cases with procedure code 00.62, 39.72, 39.74, 39.75, 39.76 or 39.79	671	9.20	47,579
MS–DRG 026—All cases	7,630	5.80	21,441
MS–DRG 026—Cases with procedure code 00.62, 39.72, 39.74, 39.75, 39.76, or 39.79	825	3.11	27,429
MS–DRG 027—All cases	9,628	2.99	17,158
MS–DRG 027—Cases with procedure code 00.62, 39.72, 39.74, 39.75, 39.76 or 39.79	1,847	1.62	22,845

As can be seen from the table, most of the cases of endovascular embolization or occlusion of the head and neck procedures and other endovascular procedures reported with procedure codes 00.62, 39.72, 39.74, 39.75, 39.76, and 39.79 occur in MS–DRGs 023, 024, and 027. There were 2,183 of these procedure cases reported in MS–DRG 023 with an average length of stay of 8.57 days and average costs of $38,935, compared to an average length of stay of 10.63 days and average costs of $38, 204 for all 6,360 cases reported in MS–DRG 023. There were 1,402 of these cases reported in MS–DRG 024 with an average length of stay of 5.46 days and average costs of $28,543, compared to an average length of stay of 5.52 days and average costs of $28,270 for all 2,376 cases reported in MS–DRG 024. There were 1,847 of these cases reported in MS–DRG 027 with an average length of stay of 1.62 days and average costs of $22,845, compared to an average length of stay of 2.99 days and average costs of $17,158 for all 9,628 cases reported in MS–DRG 027. The average costs for endovascular embolization or occlusion of the head and neck procedures and other endovascular procedures cases reported in MS–DRGs 023 and 024 are not significantly different from the average costs for all cases reported in MS–DRGs 023 and 024. The average costs for endovascular embolization or occlusion of the head and neck procedures and other endovascular procedures cases reported in MS–DRG 027 are higher ($22,845) than the average costs of all cases reported in MS–DRG 027 ($17,158). However, average costs are not significantly different for the endovascular embolization or occlusion of the head and neck procedures and other endovascular procedures cases reported in MS–DRG 020 ($72,357) compared to the average costs for all cases ($70,716) reported in MS–DRS 020; for the endovascular embolization or occlusion of the head and neck procedures and other endovascular procedures cases reported in MS–DRG 021 ($53,478) compared to the average costs for all cases ($53,289) reported in MS–DRG 021; and for the endovascular embolization or occlusion of the head and neck procedures and other endovascular procedures cases reported in MS–DRG 022 ($33,606) compared to the average costs for all cases ($33,598) reported in MS–DRG 022.

Average costs were higher for the 671 endovascular embolization or occlusion of the head and neck procedures and other endovascular procedures cases reported in MS–DRG 025 ($47,579) compared to the average costs for all 17,756 cases ($29,657) reported in MS–DRG 025. The average costs also were higher for the 825 endovascular embolization or occlusion of the head and neck procedures and other endovascular procedures cases reported in MS–DRG 26 ($27,429) compared to the average costs for all 7,630 cases ($21,441) reported in MS–DRG 26. Given that average costs are similar for most endovascular embolization or occlusion of the head and neck

procedures and other endovascular procedures cases reported in MS–DRGs 020, 021, 022, 023, 024, 025, 026, and 027, we do not believe that all endovascular embolization or occlusion of the head and neck procedures and other endovascular procedures should be reassigned from these eight MS–DRGs.

We also examined the average costs for each specific ICD–9–CM code compared to the average costs of all cases within each of the eight MS–DRGs. The following table shows our findings.

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 020—All cases	1,213	16.44	$70,716
MS–DRG 020—Cases with code 00.62	11	16.09	95,422
MS–DRG 020—Cases with code 39.72	422	16.31	74,951
MS–DRG 020—Cases with code 39.74	9	16.78	71,478
MS–DRG 020—Cases with code 39.75	424	15.79	69,081
MS–DRG 020—Cases with code 39.76	39	18.26	71,630
MS–DRG 020—Cases with code 39.79	25	16.64	73,043
MS–DRG 021—All cases	350	13.74	53,289
MS–DRG 021—Cases with code 00.62	1	11.00	75,492
MS–DRG 021—Cases with code 39.72	130	13.12	54,715
MS–DRG 021—Cases with code 39.74	1	11.00	75,492
MS–DRG 021—Cases with code 39.75	133	13.46	52,819
MS–DRG 021—Cases with code 39.76	7	10.57	48,749
MS–DRG 021—Cases with code 39.79	3	12.00	40,458
MS–DRG 022—All cases	84	7.83	33,598
MS–DRG 022—Cases with code 00.62	0	0	0
MS–DRG 022—Cases with code 39.72	40	6.43	32,598
MS–DRG 022—Cases with code 39.74	0	0	0
MS–DRG 022—Cases with code 39.75	21	8.81	32,690
MS–DRG 022—Cases with code 39.76	3	10.00	62,417
MS–DRG 022—Cases with code 39.79	0	0	0
MS–DRG 023—All cases	6,360	10.63	38,204
MS–DRG 023—Cases with code 00.62	67	9.30	43,741
MS–DRG 023—Cases with code 39.72	56	11.14	52,589
MS–DRG 023—Cases with code 39.74	2,016	8.30	38,047
MS–DRG 023—Cases with code 39.75	20	12.65	53,837
MS–DRG 023—Cases with code 39.76	3	23.00	84,947
MS–DRG 023—Cases with code 39.79	71	13.08	50,720
MS–DRG 024—All cases	2,376	5.52	28,270
MS–DRG 024—Cases with code 00.62	76	6.74	32,415
MS–DRG 024—Cases with code 39.72	31	6.35	29,977
MS–DRG 024—Cases with code 39.74	1,284	5.35	28,268
MS–DRG 024—Cases with code 39.75	8	6.50	50,333
MS–DRG 024—Cases with code 39.76	2	1.50	19,567
MS–DRG 024—Cases with code 39.79	27	6.74	28,019
MS–DRG 025—All cases	17,756	9.19	29,657
MS–DRG 025—Cases with code 00.62	17	5.88	29,036
MS–DRG 025—Cases with code 39.72	380	9.46	51,082
MS–DRG 025—Cases with code 39.74	55	9.87	45,895
MS–DRG 025—Cases with code 39.75	139	8.94	52,188
MS–DRG 025—Cases with code 39.76	25	5.84	38,654
MS–DRG 025—Cases with code 39.79	82	11.04	39,839
MS–DRG 026—All cases	7,630	5.80	21,441
MS–DRG 026—Cases with code 00.62	31	3.48	25,611
MS–DRG 026—Cases with code 39.72	481	3.00	27,180
MS–DRG 026—Cases with code 39.74	16	4.69	27,519
MS–DRG 026—Cases with code 39.75	253	2.77	26,863
MS–DRG 026—Cases with code 39.76	31	3.32	27,891
MS–DRG 026—Cases with code 39.79	45	5.42	37,410
MS–DRG 027—All cases	9,628	2.99	17,158
MS–DRG 027—Cases with code 00.62	61	2.23	21,337
MS–DRG 027—Cases with code 39.72	1,159	1.58	22,893
MS–DRG 027—Cases with code 39.74	13	1.62	69,081
MS–DRG 027—Cases with code 39.75	580	1.63	23,296
MS–DRG 027—Cases with code 39.76	61	1.74	27,403
MS–DRG 027—Cases with code 39.79	30	1.53	17,740

As can be seen from the table above, there are a large number of cases reporting procedure code 39.74 in MS–DRGs 023 and 024. There were 2,016 cases that reported procedure code 39.74 in MS–DRG 023 compared to 6,360 total cases reported in the MS–DRG. The cases that reported procedure code 39.74 in MS–DRG 023 had an average length of stay of 8.30 days and average costs of $38,047, compared to an average length of stay of 10.63 days and average costs of $38,204 for all cases reported in MS–DRG 023. There were 1,284 cases that reported

procedure code 39.74 in MS–DRG 024 compared to 2,376 total cases reported in MS–DRG 024. The cases that reported procedure code 39.74 in MS–DRG 024 had an average length of stay of 5.35 days and average costs of $28,268, compared to an average length of stay of 5.52 days and average costs of $28,270 for all cases reported in MS–DRG 024. The average length of stay and average costs for cases that reported procedure code 39.74 are very similar to the average length of stay and average costs for all cases reported in MS–DRGs 023 and 024. The only other group of endovascular embolization or occlusion of the head and neck procedures and other endovascular procedures cases that exceeded 1,000 in number was reported in MS–DRG 027. There were 1,159 cases that reported procedure code 39.72 in MS–DRG 027, compared to 9,628 total cases reported in MS–DRG 027. The cases that reported procedure code 39.72 in MS–DRG 027 had an average length of stay of 1.58 days and average costs of $22,893, compared to an average length of stay of 2.99 days and average costs of $17,158 for all cases reported in MS–DRG 027. In other words, the cases that reported procedure code 39.72 in MS–DRG 027 had a shorter average length of stay and average costs that were $5,735 higher than the average costs for all cases reported in MS–DRG 027. The cases that reported procedure code 39.72 in MS–DRG 020 had a shorter average length of stay and average costs that were $4,235 higher than the average costs for all cases reported in MS–DRG 020. However, the average costs for the cases that reported procedure code 39.72 in MS–DRGs 021, 022, and 024 were close to the average costs for all cases reported in the three MS–DRGs ($54,715 compared to $53,289 in MS–DRG 021; $32,598 compared to $33,598 in MS–DRG 022; and $29,997 compared to $28,270 in MS–DRG 024).

Our clinical advisors reviewed this issue and advised us that the endovascular embolization or occlusion of head and neck procedures and other endovascular procedures currently are appropriately assigned to MS–DRGs 020 through 027. They did not support reassigning these procedures from MS–DRGs 020 through 027 to another MS–DRG or creating a new MS–DRG for these procedures. Our clinical advisors stated that these procedures are all clinically similar to other procedures in these MS–DRGs. In addition, they stated that the surgical techniques are all designed to correct the same clinical problem and advised us against reassigning the procedures from MS–DRGs 020 through 027.

Based on the findings from our data analyses and the recommendations from our clinical advisors, we are not proposing to reassign the cited endovascular embolization or occlusion of head and neck procedures and other endovascular procedures from MS–DRGs 020 through 027 to another MS–DRG or to create a new MS–DRG for these procedures for FY 2017. We are inviting public comments on our proposal to maintain the current MS–DRG assignments of these procedures in MS–DRGs 020 through 027.

b. Mechanical Complication Codes

We received a request to reassign the following four ICD–10–CM diagnosis codes from MDC 21 (Injuries, Poisonings and Toxic Effects of Drugs) under MS–DRGs 919, 920, and 921 (Complications of Treatment with MCC, with CC, and without CC/MCC, respectively) to MDC 1 (Diseases and Disorders of the Nervous System) under MS–DRGs 091, 092, and 093 (Other Disorders of the Nervous System with MCC, with CC, and without CC/MCC, respectively):

- T85.610A (Breakdown (mechanical) of epidural and subdural infusion catheter, initial encounter);
- T85.620A (Displacement of epidural and subdural infusion catheter, initial encounter);
- T85.630A (Leakage of epidural and subdural infusion catheter, initial encounter); and
- T85.690A (Other mechanical complication of epidural and subdural infusion catheter, initial encounter).

The requestor stated that these ICD–10–CM diagnosis code titles clearly describe mechanical complications of nervous system devices, implants, or grafts and are unquestionably nervous system codes. Therefore, the requestor recommended that these diagnosis codes be reassigned to MDC 1 under MS–DRGs 091, 092, and 093.

We examined ICD–10–CM diagnosis codes T85.610A, T85.620A, T85.630A, and T85.690A that are currently assigned to MDC 21 under MS–DRGs 919, 920, and 921. We note that the predecessor ICD–9–CM diagnosis code for these four ICD–10–CM diagnosis codes was diagnosis code 996.59 (Mechanical complication due to other implant and internal device, not elsewhere classified), which also was assigned to MDC 21 under MS–DRGs 919, 920, and 921. ICD–9–CM diagnosis code 996.59 did not describe the location of the device. However, ICD–10–CM diagnosis codes T85.610A, T85.620A, T85.630A, and T85.690A provide additional detail that describes the location of the mechanical complication as being within the nervous system.

Based on the results of our examination, we agree with the requestor that ICD–10–CM diagnosis codes T85.610A, T85.620A, T85.630A, and T85.690A describe conditions occurring within the nervous system. Within the ICD–9–CM MS–DRGs, codes describing nervous system disorders were assigned to MDC 1. The prior ICD–9–CM codes for mechanical complications did not indicate the type of complication and therefore could not be assigned to a specific MDC. Therefore, the nonspecific complication codes were assigned to MDC 21. These new ICD–10–CM diagnosis codes describe concepts not previously captured by the ICD–9–CM codes and capture nervous system conditions. Therefore, ICD–10–CM diagnosis codes T85.610A, T85.620A, T85.630A, and T85.690A should be reassigned from MDC 21 under MS–DRGs 919, 920, and 921 to MDC 1 under MS–DRGs 091, 092, and 093. Our clinical advisors reviewed this issue and also agree that the four ICD–10–CM diagnosis codes describe conditions occurring within the nervous system and therefore should be reassigned from MDC 21 to MDC 1. Based on the results of our analysis and the recommendations of our clinical advisors, we are proposing to reassign ICD–10–CM diagnosis codes T85.610A, T85.620A, T85.630A, and T85.690A from MDC 21 under MS–DRGs 919, 920, and 921 to MDC 1 under MS–DRGs 091, 092, and 093.

We are inviting public comments on our proposal.

4. MDC 4 (Diseases and Disorders of the Ear, Nose, Mouth and Throat)

a. Proposed Reassignment of Diagnosis Code R22.2 (Localized Swelling, Mass and Lump, Trunk)

We received a request to reassign ICD–10–CM diagnosis code R22.2 (Localized swelling, mass and lump, trunk) from MDC 4 (Diseases and Disorders of the Respiratory System) to MDC 9 (Diseases and Disorders of the Skin, Subcutaneous Tissue and Breast). The requestor stated that this code is used to capture a buttock mass. The requestor pointed out that the ICD–10–CM index for localized swelling and localized mass directs the coder to diagnosis code R22.2 for both the chest and the trunk as sites.

We reviewed this issue and note that diagnosis code R22.2 is included in a category of ICD–10–CM codes describing symptoms and signs

involving the skin and subcutaneous tissue (categories R20 through R23). Diagnosis code R22.2 is clearly designated within the ICD–10 coding system as a code that describes a condition of the skin and subcutaneous tissue. Therefore, we agree with the requester that ICD–10–CM diagnosis code R22.2 should be reassigned from MDC 4 to MDC 9. One of the predecessor ICD–9–CM codes for ICD–10–CM diagnosis code R22.2 was diagnosis code 782.2 (Localized superficial swelling, mass, or lump), which is assigned to MS–DRG 606 and 607 (Minor Skin Disorders with and without MCC, respectively). Our clinical advisors reviewed this issue and agree that ICD–10–CM diagnosis code R22.2 captures a skin diagnosis. Therefore, for FY 2017, we are proposing to reassign ICD–10–CM diagnosis code R22.2 from MDC 4 to MDC 9 under MS–DRGs 606 and 607 (Minor Skin Disorders with and without MCC, respectively).

We are inviting public comments on our proposal to reassign ICD–10–CM diagnosis code R22.2 from MDC 4 to MDC 9 under MS–DRGs 606 and 607.

b. Pulmonary Embolism With tPA or Other Thrombolytic Therapy

We received a request to create a new MS–DRG or to reassign cases with a principal diagnosis of pulmonary embolism where tPA or other thrombolytic therapy was administered from MS–DRGs 175 and 176 (Pulmonary Embolism with and without MCC, respectively) to a higher paying MS–DRG. The requestor suggested that CMS review cases reporting the following ICD–9–CM diagnosis codes describing pulmonary embolism: 415.11 (Iatrogenic pulmonary embolism and infarction), 415.12 (Septic pulmonary embolism), 415.13 (Saddle embolus of pulmonary artery), and 415.19 (Other pulmonary embolism and infarction), when reported in combination with ICD–9–CM procedure code 99.10 (Injection or infusion of thrombolytic agent), to identify that thrombolytic therapy was administered.

The comparable ICD–10–CM diagnosis code translations for the ICD–9–CM pulmonary embolism diagnosis codes to which the requestor cited consist of the following:

ICD–10–CM diagnosis code	Description
I26.01	Septic pulmonary embolism with acute cor pulmonale.
I26.02	Saddle embolus of pulmonary artery with acute cor pulmonale.
I26.09	Other pulmonary embolism with acute cor pulmonale.
I26.90	Septic pulmonary embolism without acute cor pulmonale.
I26.92	Saddle embolus of pulmonary artery without acute cor pulmonale.
I26.99	Other pulmonary embolism without acute cor pulmonale.

Thrombolytic therapy is identified with the following ICD–10–PCS procedure codes:

ICD–10–PCS procedure code	Description
3E03017	Introduction of other thrombolytic into peripheral vein, open approach.
3E03317	Introduction of other thrombolytic into peripheral vein, percutaneous approach.
3E04017	Introduction of other thrombolytic into central vein, open approach.
3E04317	Introduction of other thrombolytic into central vein, percutaneous approach.
3E05017	Introduction of other thrombolytic into peripheral artery, open approach.
3E05317	Introduction of other thrombolytic into peripheral artery, percutaneous approach.
3E06017	Introduction of other thrombolytic into central artery, open approach.
3E06317	Introduction of other thrombolytic into central artery, percutaneous approach.

A pulmonary embolism is an obstruction of pulmonary vasculature most commonly caused by a venous thrombus, and less commonly by fat or tumor tissue or air bubbles or both. Risk factors for a pulmonary embolism include prolonged immobilization from any cause, obesity, cancer, fractured hip or leg, use of certain medications such as oral contraceptives, presence of certain medical conditions such as heart failure, sickle cell anemia, or certain congenital heart defects. Common symptoms of pulmonary embolism include shortness of breath with or without chest pain, tachycardia, hemoptysis, low grade fever, pleural effusion, and depending on the etiology of the embolus, might include lower extremity pain or swelling, syncope, jugular venous distention, and finally a pulmonary embolus could be asymptomatic.

We examined the claims data from the December 2015 update of the FY 2015 MedPAR file for ICD–9–CM MS–DRGs 175 and 176 for cases with a principal diagnosis of pulmonary embolism where tPA or other thrombolytic therapy (procedure code 99.10) was administered and cases of a principal diagnosis of pulmonary embolism where no tPA or other thrombolytic therapy was administered. Our findings are shown in the table below.

PRINCIPAL DIAGNOSIS OF PULMONARY EMBOLISM WITH AND WITHOUT TPA OR OTHER THROMBOLYTIC THERAPY ADMINISTERED

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 175—All MCC cases	19,274	5.76	$10,479

PRINCIPAL DIAGNOSIS OF PULMONARY EMBOLISM WITH AND WITHOUT tPA OR OTHER THROMBOLYTIC THERAPY ADMINISTERED—Continued

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 175—MCC cases with principal diagnosis of pulmonary embolism with tPA or other thrombolytic therapy administered	630	6.31	19,419
MS–DRG 175—MCC cases with principal diagnosis of pulmonary embolism without tPA or other thrombolytic therapy administered	18,529	5.74	10,181
MS–DRG 176—All Without MCC cases	33,565	3.81	6,645
MS–DRG 176—Without MCC cases with principal diagnosis of pulmonary embolism with tPA or other thrombolytic therapy administered	544	5.07	16,345
MS–DRG 176—Without MCC cases with principal diagnosis of pulmonary embolism without tPA or other thrombolytic therapy administered	32,789	3.79	6,483

As shown in the table above, for MS–DRG 175, there were a total of 19,274 cases with an average length of stay of 5.76 days and average costs of $10,479. Of the 19,274 cases in MS–DRG 175, there were 630 cases that reported a principal diagnosis of pulmonary embolism where tPA or other thrombolytic therapy was also reported with an average length of stay of 6.31 days and average costs of $19,419. For MS–DRG 176, there were a total of 33,565 cases with an average length of stay of 3.81 days and average costs of $6,645. Of the 33,565 cases reported in MS–DRG 176, there were 544 cases that reported a principal diagnosis of pulmonary embolism where tPA or other thrombolytic therapy also was reported with an average length of stay of 5.07 days and average costs of $16,345.

To address the request we received to create a new MS–DRG, we reviewed the data for the 1,174 total cases (630 and 544, respectively) that reported a principal diagnosis of pulmonary embolism that received tPA or other thrombolytic therapy in MS–DRGs 175 and 176. As shown in the table above, our data analysis demonstrates the average costs for these cases are higher ($19,419 compared to $10,479 for MS–DRG 175, and $16,345 compared to $6,645 for MS–DRG 176) and the length of stay is slightly longer (6.31 days compared to 5.76 days for MS–DRG 175, and 5.07 days compared to 3.81 days for MS–DRG 176) compared to all cases reported in MS–DRGs 175 and 176. Out of a total of 52,492 cases (630 + 18,529 + 544 + 32,789) in MS–DRGs 175 and 176 reporting a principal diagnosis of pulmonary embolism, 1,174 (2.24 percent) of these cases also received tPA or other thrombolytic therapy. While we recognize the differences in average costs and length of stay for these cases, the volume of these cases as well as the potential creation of a new MS–DRG for this subset of patients raised some concerns with our clinical advisors. We present our clinical advisors' concerns following the additional data analysis discussions below.

We then conducted additional data analyses to determine if reassignment of cases with a principal diagnosis of pulmonary embolism where tPA or other thrombolytic therapy was administered to a higher paying MS–DRG was supported. As displayed in the data findings in the tables below, we explored reassigning cases with a principal diagnosis of pulmonary embolism that received tPA or other thrombolytic therapy from MS–DRG 176 to the higher severity level MS–DRG 175. The data do not adequately support this reassignment, as the cases with a principal diagnosis of pulmonary embolism where tPA or other thrombolytic therapy is administered would continue to be underpaid.

As shown in the data findings in the table below, the initial data analysis for MS–DRG 175 found the average costs for cases that reported a principal diagnosis of pulmonary embolism that received tPA or other thrombolytic therapy were $19,419, and for MS–DRG 176, the average costs for these cases were $16,345.

PRINCIPAL DIAGNOSIS OF PULMONARY EMBOLISM WITH tPA OR OTHER THROMBOLYTIC THERAPY ADMINISTERED

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 175—All MCC cases	19,274	5.76	$10,479
MS–DRG 175—MCC cases with principal diagnosis of pulmonary embolism with tPA or other thrombolytic therapy administered	630	6.31	19,419
MS–DRG 176—All without MCC cases	33,565	3.81	6,645
MS–DRG 176—Without MCC cases with principal diagnosis of pulmonary embolism with tPA or other thrombolytic therapy administered	544	5.07	16,345

As displayed in the table below, if we reassigned the 544 cases with a principal diagnosis of pulmonary embolism where tPA or other thrombolytic therapy is administered from the ''without MCC'' level, MS–DRG 176, to the ''with MCC'' severity level, MS–DRG 175, the average costs for all cases in MS–DRG 175 would be approximately $10,640. This figure continues to result in a difference of approximately $9,000 for the MCC cases and $6,000 for the without MCC cases when compared to findings for the average costs of these cases from the initial data analysis ($19,419 − $10,640 = $8,779 and $16,345 − $10,640 = $5,705, respectively). In addition, our clinical advisors had concerns about the prospect of moving the subset of 544 patients from the ''without MCC'' level to the ''with MCC'' level. We present these concerns following the additional data analysis discussion below.

OPTION OF REASSIGNMENT OF CASES OF PRINCIPAL DIAGNOSIS OF PULMONARY EMBOLISM WITH AND WITHOUT tPA

MS–DRG 175—Cases with pulmonary embolism with MCC or tPA or other thrombolytic therapy	19,818	5.74	$10,640
MS–DRG 176—Cases with pulmonary embolism without MCC	33,021	3.79	6,486

We also reviewed claims data in considering the option of adding another severity level to the current structure of MS–DRGs 175 and 176 and assigning the cases with a principal diagnosis of pulmonary embolism that receive tPA or other thrombolytic therapy to the highest level. This option would involve modifying the current 2-way severity level split of ''with MCC'' and ''without MCC'' to a 3-way severity level split of ''with MCC or tPA, with CC, and without CC/MCC.'' Therefore, it would include proposing new MS–DRGs if the data and our clinical advisors supported creation of new MS–DRGs. However, as displayed in the data findings in the table below, the data did not support this option. In addition to similar results from the previous option's discussion regarding continued differences in average costs for these cases, the data failed to meet the criterion that there be at least a $2,000 difference between the ''with CC'' and ''without CC/MCC'' subgroups. Our data analysis shows the average costs in the hypothetical ''with CC'' subgroup of $6,932 and the average costs in the hypothetical ''without CC/MCC'' subgroup of $5,309. The difference only amounts to $1,623 ($6,932 minus $5,309 = $1,623).

PRINCIPAL DIAGNOSIS OF PULMONARY EMBOLISM WITH AND WITHOUT tPA OR OTHER THROMBOLYTIC THERAPY

Optional new MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG XXX—Pulmonary embolism with MCC or tPA or other thrombolytic therapy	19,819	5.74	$10,641
MS–DRG XXX—Pulmonary embolism with CC	23,929	4.04	6,932
MS–DRG XXX—Pulmonary embolism without CC/MCC	9,091	3.13	5,309

Lastly, we explored reassigning cases with a principal diagnosis of pulmonary embolism that receive tPA or other thrombolytic therapy to other MS–DRGs within MDC 4. However, our review did not support reassignment of these cases to any other medical MS–DRGs as these cases would not be clinically coherent with the cases assigned to those other MS–DRGs.

In addition to the results of the various data analyses we performed for creating a new MS–DRG or for reassignment of cases of pulmonary embolism with tPA or other thrombolytic therapy to another higher paying MS–DRG, our clinical advisors also expressed a number of concerns. They pointed out that all patients with a diagnosis of pulmonary embolism are considered high risk and the small subset of patients receiving thrombolytic therapy does not necessarily warrant a separate MS–DRG or reassignment at this time. Our clinical advisors noted that it is unclear if: (1) The higher costs associated with receiving tPA or other thrombolytic therapy are due to a different subset of patients or complications; (2) if those patients treated with tPA or other thrombolytic therapy for pulmonary embolism are indeed sicker patients; (3) if the cost of tPA or other thrombolytic therapy for patients with pulmonary embolism is the reason for the higher costs seen with these cases; or (4) if the increased average costs for cases of pulmonary embolism with tPA or other thrombolytic therapy is a combination of numbers (1) through (3). They recommended maintaining the current structure of MS–DRGs 175 and 176 at this time.

As a result of the data analysis and the concerns expressed by our clinical advisors, we are not proposing to create a new MS–DRG or to reassign cases with a principal diagnosis of pulmonary embolism with tPA or other thrombolytic therapy for FY 2017. We are inviting public comment on our proposal.

5. MDC 5 (Diseases and Disorders of the Circulatory System)

a. Implant of Loop Recorder

We received a request to examine a potential ICD–9 to ICD–10 replication issue for procedures describing implantation or revision of loop recorder that were reported using ICD–9–CM procedure code 37.79 (Revision or relocation of cardiac device pocket). A loop recorder is also known as an implantable cardiac monitor. It is indicated for patients who experience episodes of unexplained syncope (fainting), heart palpitations, or patients at risk for various types of cardiac arrhythmias, such as atrial fibrillation or ventricular tachyarrhythmia. Loop recorders function by detecting and monitoring potential episodes of these kinds of conditions. The requestor acknowledged that these implantation procedures are frequently performed in the outpatient setting. However, the requestor also noted that the implantation procedures are often performed in the inpatient setting and suggested that they be recognized under the ICD–10 MS–DRGs as they had been under the ICD–9–CM based MS–DRG logic.

The requestor stated that, under the ICD–9–CM based MS–DRGs, procedure code 37.79 was designated as an operating room (O.R.) procedure in the Definitions Manual under Appendix E—Operating Room Procedures and Procedure Code/MS–DRG Index and grouped to MS–DRGs 040, 041, and 042 (Peripheral, Cranial Nerve and Other Nervous System Procedures with MCC, with CC or peripheral neurostimulator, and without CC/MCC, respectively); MS–DRGs 260, 261, and 262 (Cardiac Pacemaker Revision Except Device Replacement with MCC, with CC, and without CC/MCC, respectively); MS–DRGs 579, 580, and 581 (Other Skin, Subcutaneous Tissue and Breast Procedures with MCC, with CC and without CC/MCC, respectively); MS–DRGs 907, 908, and 909 (Other O.R. Procedures for Injuries with MCC, with CC, and without CC/MCC, respectively); and MS–DRGs 957, 958, and 959 (Other O.R. Procedures for Multiple Significant Trauma with MCC, with CC, and without CC/MCC, respectively).

Under the current Version 33 ICD–10 MS–DRGs, there are two comparable ICD–10–PCS code translations for ICD–9–CM code 37.79. They are procedure codes 0JWT0PZ (Revision of cardiac

rhythm related device in trunk subcutaneous tissue and fascia, open approach) and 0JWT3PZ (Revision of cardiac rhythm related device in trunk subcutaneous tissue and fascia, percutaneous approach), which are designated as O.R. procedures and group to the above listed MS–DRGs.

According to the requestor, the following six ICD–10–PCS procedure codes identify the implantation or revision of a loop recorder and were not replicated appropriately because they are currently designated as nonoperating room (non-O.R.) procedures under the ICD–10 MS–DRGs. The requestor suggested that these codes be designated as O.R. procedures and assigned to the same MS–DRGs as the former ICD–9–CM procedure code 37.79:

ICD–10–PCS procedure code	Description
0JH602Z	Insertion of monitoring device into chest subcutaneous tissue and fascia, open approach.
0JH632Z	Insertion of monitoring device into chest subcutaneous tissue and fascia, percutaneous approach.
0JH802Z	Insertion of monitoring device into abdomen subcutaneous tissue and fascia, open approach.
0JH832Z	Insertion of monitoring device into abdomen subcutaneous tissue and fascia, percutaneous approach.
0JWT02Z	Revision of monitoring device in trunk subcutaneous tissue and fascia, open approach.
0JWT32Z	Revision of monitoring device in trunk subcutaneous tissue and fascia, percutaneous approach.

We examined the six ICD–10–PCS procedure codes that the commenter recommended be designated as O.R. procedures and assigned to the same MS–DRGs as ICD–9–CM procedure code 37.79. As discussed in section II.F.1.b. of the preamble of this proposed rule, in evaluating requested MS–DRG changes, we determined if they could be replicated in the ICD–9–CM MS–DRGs so as not to affect the FY 2017 relative payment weights. If the answer was ''no,'' we examined whether the change in the ICD–10 MS–DRGs was likely to cause a significant number of patient cases to change or ''shift'' ICD–10 MS–DRGs. If relatively few patient cases would be impacted, we evaluated if it would be feasible to propose the change even though it could not be replicated by the ICD–9 MS–DRGs logic because it would not cause a material payment redistribution.

Under our review, we recognized that the six ICD–10–PCS procedure codes are currently identified as comparable translations of ICD–9–CM procedure code 86.09 (Other incision of skin and subcutaneous tissue), which was designated as a non-O.R. procedure code under the ICD–9–CM based MS–DRGs. Therefore, changing the designation of the six ICD–10–PCS procedure codes from non-O.R. to O.R. for the ICD–10 MS–DRGs cannot be replicated in the ICD–9–CM based MS–DRGs. In other words, we cannot designate ICD–9–CM procedure code 86.09 as an O.R. code. However, we believe that if we limit the change in designation to four of the six identified ICD–10–PCS procedure codes from non-O.R. to O.R., the change would not have any impact. We are not including the two ICD–10–PCS procedure codes that describe the insertion of a monitoring device into the abdomen in our proposal because a loop recorder is not inserted into that location and it would not be clinically appropriate.

Therefore, for FY 2017, we are proposing to designate the following four ICD–10–PCS codes as O.R. procedures within Appendix E of the Version 34 ICD–10 MS–DRG Definitions Manual:

- 0JH602Z (Insertion of monitoring device into chest subcutaneous tissue and fascia, open approach);
- 0JH632Z (Insertion of monitoring device into chest subcutaneous tissue and fascia, percutaneous approach);
- 0JWT02Z (Revision of monitoring device in trunk subcutaneous tissue and fascia, open approach); and
- 0JWT32Z (Revision of monitoring device in trunk subcutaneous tissue and fascia, percutaneous approach).

We also are proposing that the ICD–10 MS–DRG assignment for these four ICD–10–PCS codes replicate the ICD–9–CM based MS–DRG assignment for procedure code 37.79; that is, MS–DRGs 040, 041, 042, 260, 261, 262, 579,580, 581, 907, 908, 909, 957, 958, and 959 as cited earlier in this section.

We are inviting public comments on our proposals.

b. Endovascular Thrombectomy of the Lower Limbs

We received a comment stating that the logic for ICD–10 MS–DRGs Version 33 is not compatible with the ICD–9–CM MS–DRGs Version 32 for the assignment of procedures describing endovascular thrombectomy of the lower limbs. The commenter asked CMS to reconfigure the MS–DRG structure within the ICD–10 MS–DRGs for endovascular thrombectomy of the lower limbs, specifically MS–DRGs 270, 271, and 272 (Endovascular Thrombectomy of the Lower Limbs with MCC, with CC, and without CC/MCC, respectively). The commenter believed that this requested restructuring would be consistent with the MS–DRG assignments for the other procedures describing lower extremity thrombectomy, and would accurately replicate the logic of the ICD–9–CM MS–DRGs Version 32. Under the ICD–9–CM, endovascular thrombectomy of the lower limbs is described by procedure code 39.79 (Other endovascular procedures on other vessels). The commenter stated that, with deep vein thrombosis (DVT) or any other circulatory system disorders as the principal diagnosis, cases involving procedures described by procedure code 39.79 grouped to ICD–9–CM MS–DRGs 237 and 238 (Major Cardiovascular Procedures with and without MCC, respectively). However, the commenter pointed out that, for FY 2016, ICD–9–CM MS–DRGs 237 and 238 were deleted and replaced with ICD–10 Version 33 MS–DRGs 268 and 269 (Aortic and Heart Assist Procedures Except Pulsation Balloon with and without MCC, respectively), for the higher complexity procedures, and MS–DRGs 270, 271, and 272 (Other Major Cardiovascular Procedures with MCC, with CC, and without CC/MCC, respectively), for the lower complexity procedures (80 FR 49389). The commenter stated that ICD–9–CM procedure code 39.79 describes the lower complexity procedures assigned to ICD–10–PCS MS–DRGs 270, 271, and 272. The commenter believed that the comparable ICD–10–PCS procedure codes also should have been assigned to MS–DRGs 270, 271, and 272.

We agree with the requestor that procedures describing endovascular thrombectomy of the lower limbs should be assigned to ICD–10 MS–DRGs 270, 271, and 272. Therefore, for implementation October 1, 2016, we are proposing to restructure the ICD–10–PCS MS–DRG configuration and add the ICD–10–PCS code translations listed in the following chart (which would

capture procedures describing endovascular thrombectomy of the lower limbs) to ICD–10–PCS Version 34 MS–DRGs 270, 271, and 272.

ICD–10–PCS ENDOVASCULAR THROMBECTOMY PROCEDURE CODES PROPOSED TO BE ASSIGNED TO MS–DRGS 270, 271, AND 272 FOR FY 2017

03C53ZZ	Extirpation of matter from right axillary artery, percutaneous approach.
03C63ZZ	Extirpation of matter from left axillary artery, percutaneous approach.

05CB3ZZ	Extirpation of matter from right basilic vein, percutaneous approach.
05CC3ZZ	Extirpation of matter from left basilic vein, percutaneous approach.
05CD3ZZ	Extirpation of matter from right cephalic vein, percutaneous approach.
05CF3ZZ	Extirpation of matter from left cephalic vein, percutaneous approach.
05CG3ZZ	Extirpation of matter from right hand vein, percutaneous approach.
05CH3ZZ	Extirpation of matter from left hand vein, percutaneous approach.
05CL3ZZ	Extirpation of matter from intracranial vein, percutaneous approach.
05CM3ZZ	Extirpation of matter from right internal jugular vein, percutaneous approach.
05CN3ZZ	Extirpation of matter from left internal jugular vein, percutaneous approach.
05CP3ZZ	Extirpation of matter from right external jugular vein, percutaneous approach.
05CQ3ZZ	Extirpation of matter from left external jugular vein, percutaneous approach.
05CR3ZZ	Extirpation of matter from right vertebral vein, percutaneous approach.
05CS3ZZ	Extirpation of matter from left vertebral vein, percutaneous approach.
05CT3ZZ	Extirpation of matter from right face vein, percutaneous approach.
05CV3ZZ	Extirpation of matter from left face vein, percutaneous approach.
05CY3ZZ	Extirpation of matter from upper vein, percutaneous approach.
06C33ZZ	Extirpation of matter from esophageal vein, percutaneous approach.
06CM3ZZ	Extirpation of matter from right femoral vein, percutaneous approach.
06CN3ZZ	Extirpation of matter from left femoral vein, percutaneous approach.
06CP3ZZ	Extirpation of matter from right greater saphenous vein, percutaneous approach.
06CQ3ZZ	Extirpation of matter from left greater saphenous vein, percutaneous approach.
06CR3ZZ	Extirpation of matter from right lesser saphenous vein, percutaneous approach.
06CS3ZZ	Extirpation of matter from left lesser saphenous vein, percutaneous approach.
06CT3ZZ	Extirpation of matter from right foot vein, percutaneous approach.

We are inviting public comments on our proposal to assign the ICD–10–PCS procedures describing the endovascular thrombectomy of the lower limbs listed in the table above to ICD–10 Version 34 MS–DRGs 270, 271, and 272 for FY 2017.

c. Pacemaker Procedures Code Combinations

We received a request that CMS examine the list of ICD–10–PCS procedure code combinations that describe procedures involving pacemakers to determine if some procedure code combinations were excluded from the ICD–10 MS–DRG assignments for MS–DRGs 242, 243, and 244 (Permanent Cardiac Pacemaker Implant with MCC, with CC, and without CC/MCC). The requestor believed that some ICD–10–PCS procedure code combinations describing procedures involving pacemaker devices and leads are not included in the current list.

We reviewed the list of ICD–10–PCS procedure code combinations describing procedures involving pacemakers assigned to ICD–10 MS–DRGs 242, 243, and 244, and determined that our initial approach of using specified procedure code combinations to identify procedures involving pacemakers and leads was overly complex and may have led to inadvertent omissions of qualifying procedure code combinations. Under our initial approach, we developed a list of

possible ICD–10–PCS procedure code combinations that describe procedures involving pacemaker devices and leads as well as ICD–10–PCS procedure code combinations for procedures describing the removal and replacement of pacemaker devices. We now believe that a more appropriate approach would be to compile a list of all procedure codes describing procedures involving pacemaker devices and a list of all procedure codes describing procedures involving pacemaker leads. If a procedure code from the list of procedure codes describing procedures involving pacemaker devices and a procedure code from the list of procedure codes describing procedures involving pacemaker leads are reported in combination with one another, the case would be assigned to ICD–10 MS–DRGs 242, 243, and 244. We believe that this more generic approach would capture a wider range of possible reported procedure codes describing procedures involving pacemaker devices and leads. Therefore, we are proposing to modify the ICD–10 MS–DRG logic so that if one of the ICD–10–PCS procedure codes describing procedures involving pacemaker devices listed in column 1 of the table below is reported in combination with one of the ICD–10–PCS procedure codes describing procedures involving leads listed in column 3 of the table below, the case would be assigned to MS–DRGs 242, 243, and 244. We believe that this proposed simplified approach would capture all possible cases reporting procedure code combinations describing procedures involving pacemaker devices and leads to ensure that these cases would be assigned to MS–DRGs 242, 243, and 244.

			02HN0MZ	Insertion of cardiac lead into pericardium, open approach.
			02HN3JZ	Insertion of pacemaker lead into pericardium, percutaneous approach.
			02HN3MZ	Insertion of cardiac lead into pericardium, percutaneous approach.
			02HN4JZ	Insertion of pacemaker lead into pericardium, percutaneous endoscopic approach.
			02HN4MZ	Insertion of cardiac lead into pericardium, percutaneous endoscopic approach.

We are inviting public comments on our proposal to modify the MS–DRG logic for MS–DRGs 242, 243, and 244 to establish that cases reporting one ICD–10–PCS code from the list of procedure codes describing procedures involving pacemaker devices and one ICD–10–PCS code from the list of procedure codes describing procedures involving pacemaker leads in combination with one another would qualify the case for assignment to MS–DRGs 242, 243, and 244.

We also examined our GROUPER logic for MS–DRGs 258 and 259 (Cardiac Pacemaker Device Replacement with and without MCC, respectively). Assignments of cases to these MS–DRGs also include qualifying ICD–10–PCS procedure code combinations describing procedures that involve the removal of pacemaker devices and the insertion of new devices. We believe that this logic may also be overly complex. Moreover, we believe that a more simplified approach would be to compile a list of all ICD–10–PCS procedure codes describing procedures involving cardiac pacemaker device insertions. Therefore, we are proposing this approach for FY 2017. Under the proposed approach, if one of the procedure codes describing procedures involving pacemaker device insertions is reported, and there are no other procedure codes describing procedures involving the insertion of a pacemaker lead reported in combination with one of these procedures, the case would be assigned to MS–DRG 258 and 259. Cases reporting any one of the following ICD–10–PCS procedure codes describing procedures involving pacemaker device insertions would be assigned to MS–DRG 258 and 259.

PROCEDURE CODES DESCRIBING PROCEDURES INVOLVING CARDIAC PACEMAKER DEVICE INSERTIONS REPORTED WITHOUT ANY OTHER PACEMAKER DEVICE PROCEDURE CODE PROPOSED TO BE ASSIGNED TO ICD–10 MS–DRGS 258 AND 259

Procedure code	Description
0JH604Z	Insertion of pacemaker, single chamber into chest subcutaneous tissue and fascia, open approach.
0JH605Z	Insertion of pacemaker, single chamber rate responsive into chest subcutaneous tissue and fascia, open approach.
0JH606Z	Insertion of pacemaker, dual chamber into chest subcutaneous tissue and fascia, open approach.
0JH607Z	Insertion of cardiac resynchronization pacemaker pulse generator into chest subcutaneous tissue and fascia, open approach.
0JH60PZ	Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, open approach.
0JH634Z	Insertion of pacemaker, single chamber into chest subcutaneous tissue and fascia, percutaneous approach.
0JH635Z	Insertion of pacemaker, single chamber rate responsive into chest subcutaneous tissue and fascia, percutaneous approach.
0JH636Z	Insertion of pacemaker, dual chamber into chest subcutaneous tissue and fascia, percutaneous approach.
0JH637Z	Insertion of cardiac resynchronization pacemaker pulse generator into chest subcutaneous tissue and fascia, percutaneous approach.
0JH63PZ	Insertion of cardiac rhythm related device into chest subcutaneous tissue and fascia, percutaneous approach.
0JH804Z	Insertion of pacemaker, single chamber into abdomen subcutaneous tissue and fascia, open approach.
0JH805Z	Insertion of pacemaker, single chamber rate responsive into abdomen subcutaneous tissue and fascia, open approach.
0JH806Z	Insertion of pacemaker, dual chamber into abdomen subcutaneous tissue and fascia, open approach.
0JH807Z	Insertion of cardiac resynchronization pacemaker pulse generator into abdomen subcutaneous tissue and fascia, open approach.
0JH80PZ	Insertion of cardiac rhythm related device into abdomen subcutaneous tissue and fascia, open approach.
0JH834Z	Insertion of pacemaker, single chamber into abdomen subcutaneous tissue and fascia, percutaneous approach.
0JH835Z	Insertion of pacemaker, single chamber rate responsive into abdomen subcutaneous tissue and fascia, percutaneous approach.
0JH836Z	Insertion of pacemaker, dual chamber into abdomen subcutaneous tissue and fascia, percutaneous approach.
0JH837Z	Insertion of cardiac resynchronization pacemaker pulse generator into abdomen subcutaneous tissue and fascia, percutaneous approach.
0JH83PZ	Insertion of cardiac rhythm related device into abdomen subcutaneous tissue and fascia, percutaneous approach.

We are inviting public comments on our proposal to modify the GROUPER logic for MS–DRGs 258 and 259 to establish that a case reporting one procedure code from the above list of ICD–10–PCS procedure codes describing procedures involving pacemaker device insertions without any other procedure codes describing procedures involving pacemaker leads reported would be assigned to MS–DRGs 258 and 259.

We also examined our GROUPER logic for MS–DRGs 260, 261, and 262 (Cardiac Pacemaker Revision Except Device with MCC, with CC, and without CC/MCC, respectively). Cases assigned to MS–DRGs 260, 261, and 262 also include lists of procedure code combinations describing procedures involving the removal of pacemaker leads and the insertion of new leads, in addition to lists of single procedure codes describing procedures involving the insertion of pacemaker leads, removal of devices, and revision of devices. We believe that this logic may also be overly complex. Moreover, we believe that a more simplified approach would be to provide a single list of procedure codes describing procedures involving cardiac pacemaker lead insertions and other related procedures involving device insertions that would be assigned to MS–DRGs 260, 261, and 262. If one of these procedure codes describing procedures involving the insertion of pacemaker leads is reported, and there are no other procedure codes describing procedures involving the insertion of a device reported, the case would be assigned to MS–DRG 260, 261, and 262. We are proposing that the list of ICD–10–PCS procedure codes describing procedures involving pacemaker lead insertion, removal, or revisions and insertion of hemodynamic devices in the following table would be assigned to MS–DRGs 260, 261, and 262. We are simply proposing to use a single list of ICD–10–PCS procedure codes to determine the MS–DRG assignment.

LIST OF PROCEDURE CODES PROPOSED TO BE ASSIGNED TO MS–DRGS 260, 261, AND 262

Procedure code	Description
02H40JZ	Insertion of pacemaker lead into coronary vein, open approach.
02H40MZ	Insertion of cardiac lead into coronary vein, open approach.
02H43JZ	Insertion of pacemaker lead into coronary vein, percutaneous approach.
02H43MZ	Insertion of cardiac lead into coronary vein, percutaneous approach.
02H44JZ	Insertion of pacemaker lead into coronary vein, percutaneous endoscopic approach.
02H44MZ	Insertion of cardiac lead into coronary vein, percutaneous endoscopic approach.
02H60MZ	Insertion of pacemaker lead into right atrium, open approach.
02H63JZ	Insertion of cardiac lead into right atrium, open approach.
02H63MZ	Insertion of pacemaker lead into right atrium, percutaneous approach.
02H64JZ	Insertion of cardiac lead into right atrium, percutaneous approach.
02H64MZ	Insertion of pacemaker lead into right atrium, percutaneous endoscopic approach.
02H70JZ	Insertion of cardiac lead into right atrium, percutaneous endoscopic approach.
02H70MZ	Insertion of pacemaker lead into left atrium, open approach.
02H73JZ	Insertion of cardiac lead into left atrium, open approach.
02H73MZ	Insertion of pacemaker lead into left atrium, percutaneous approach.
02H74JZ	Insertion of cardiac lead into left atrium, percutaneous approach.
02H74MZ	Insertion of pacemaker lead into left atrium, percutaneous endoscopic approach.
02HK00Z	Insertion of cardiac lead into left atrium, percutaneous endoscopic approach.

LIST OF PROCEDURE CODES PROPOSED TO BE ASSIGNED TO MS–DRGS 260, 261, AND 262—Continued

Procedure code	Description
02HK02Z	Insertion of pressure sensor monitoring device into right ventricle, open approach.
02HK0JZ	Insertion of monitoring device into right ventricle, open approach.
02HK0MZ	Insertion of pacemaker lead into right ventricle, open approach.
02HK30Z	Insertion of cardiac lead into right ventricle, open approach.
02HK32Z	Insertion of pressure sensor monitoring device into right ventricle, percutaneous approach.
02HK3JZ	Insertion of monitoring device into right ventricle, percutaneous approach.
02HK3MZ	Insertion of pacemaker lead into right ventricle, percutaneous approach.
02HK40Z	Insertion of cardiac lead into right ventricle, percutaneous approach.
02HK42Z	Insertion of pressure sensor monitoring device into right ventricle, percutaneous endoscopic approach.
02HK4JZ	Insertion of monitoring device into right ventricle, percutaneous endoscopic approach.
02HK4MZ	Insertion of pacemaker lead into right ventricle, percutaneous endoscopic approach.
02HL0JZ	Insertion of cardiac lead into right ventricle, percutaneous endoscopic approach.
02HL0MZ	Insertion of pacemaker lead into left ventricle, open approach.
02HL3JZ	Insertion of cardiac lead into left ventricle, open approach.
02HL3MZ	Insertion of pacemaker lead into left ventricle, percutaneous approach.
02HL4JZ	Insertion of cardiac lead into left ventricle, percutaneous approach.
02HL4MZ	Insertion of pacemaker lead into left ventricle, percutaneous endoscopic approach.
02HN0JZ	Insertion of cardiac lead into left ventricle, percutaneous endoscopic approach.
02HN0MZ	Insertion of pacemaker lead into pericardium, open approach.
02HN3JZ	Insertion of cardiac lead into pericardium, open approach.
02HN3MZ	Insertion of pacemaker lead into pericardium, percutaneous approach.
02HN4JZ	Insertion of cardiac lead into pericardium, percutaneous approach.
02HN4MZ	Insertion of pacemaker lead into pericardium, percutaneous endoscopic approach.
02PA0MZ	Insertion of cardiac lead into pericardium, percutaneous endoscopic approach.
02PA3MZ	Removal of cardiac lead from heart, open approach.
02PA4MZ	Removal of cardiac lead from heart, percutaneous approach.
02PAXMZ	Removal of cardiac lead from heart, percutaneous endoscopic approach.
02WA0MZ	Revision of cardiac lead in heart, open approach.
02WA3MZ	Revision of cardiac lead in heart, percutaneous approach.
02WA4MZ	Revision of cardiac lead in heart, percutaneous endoscopic approach.
0JH600Z	Insertion of hemodynamic monitoring device into chest subcutaneous tissue and fascia, open approach.
0JH630Z	Insertion of hemodynamic monitoring device into chest subcutaneous tissue and fascia, percutaneous approach.
0JH800Z	Insertion of hemodynamic monitoring device into abdomen subcutaneous tissue and fascia, open approach.
0JH830Z	Insertion of hemodynamic monitoring device into abdomen subcutaneous tissue and fascia, percutaneous approach.
0JPT0PZ	Removal of cardiac rhythm related device from trunk subcutaneous tissue and fascia, open approach.
0JPT3PZ	Removal of cardiac rhythm related device from trunk subcutaneous tissue and fascia, percutaneous approach.
0JWT0PZ	Revision of cardiac rhythm related device in trunk subcutaneous tissue and fascia, open approach.
0JWT3PZ	Revision of cardiac rhythm related device in trunk subcutaneous tissue and fascia, percutaneous approach.

We are inviting public comments on our proposal to modify the GROUPER logic for MS–DRGs 260, 261, and 262 so that cases reporting any one of the ICD–10–PCS procedure codes describing procedures involving pacemakers and related procedures and associated devices listed in the table above would be assigned to MS–DRGs 260, 261, and 262.

d. Transcatheter Mitral Valve Repair With Implant

As we did for the FY 2015 IPPS/LTCH PPS proposed rule (79 FR 28008 through 28010), for FY 2017, we received a request to modify the MS–DRG assignment for transcatheter mitral valve repair with implant procedures. We refer readers to detailed discussions of the MitraClip® System (hereafter referred to as MitraClip®) for transcatheter mitral valve repair in previous rulemakings, including the FY 2012 IPPS/LTCH PPS proposed rule (76 FR 25822) and final rule (76 FR 51528 through 51529) and the FY 2013 IPPS/LTCH PPS proposed rule (77 FR 27902 through 27903) and final rule (77 FR 53308 through 53310), in response to requests for MS–DRG reclassification, as well as the FY 2014 IPPS/LTCH PPS proposed rule (78 FR 27547 through 27552), under the new technology add-on payment policy. In the FY 2014 IPPS/LTCH PPS final rule (78 FR 50575), the application for a new technology add-on payment for MitraClip® was unable to be considered further due to lack of FDA approval by the July 1, 2013 deadline.

In the FY 2015 IPPS/LTCH PPS final rule, we finalized our proposal to not create a new MS–DRG or to reassign cases reporting procedures involving the MitraClip® to another MS–DRG (79 FR 49890 through 49892). Under a separate process, the request for a new technology add-on payment for the MitraClip® System was approved (79 FR 49941 through 49946). As discussed in section II.I.4.e. of the preamble of this proposed rule, we are proposing to discontinue the new technology add-on payment for MitraClip® for FY 2017.

In the FY 2016 IPPS/LTCH PPS final rule (80 FR 49371), we finalized a modification to the MS–DRGs to which the procedure involving the MitraClip® System was assigned. For the ICD–10 based MS–DRGs to fully replicate the ICD–9–CM based MS–DRGs, ICD–10–PCS code 02UG3JZ (Supplement mitral valve with synthetic substitute, percutaneous approach), which identifies the use of the MitraClip® technology and is the ICD–10–PCS code translation for ICD–9–CM procedure code 35.97 (Percutaneous mitral valve repair with implant), was assigned to new MS–DRGs 273 and 274 (Percutaneous Intracardiac Procedures with and without MCC, respectively) and continued to be assigned to MS–DRGs 231 and 232 (Coronary Bypass with PTCA with MCC and without MCC, respectively). According to the requestor, there are substantial clinical and resource differences between the transcatheter mitral valve repair procedure and other procedures currently grouping to MS–DRGs 273 and 274, which are the focus of the request.

The requestor submitted three options for CMS to consider for FY 2017. The first option was to create a new MS–DRG for endovascular cardiac valve repair with implant; the second option was to reassign cases for the MitraClip® implant from MS–DRGs 273 and 274 to MS–DRGs 266 and 267 (Endovascular Cardiac Valve Replacement with and without MCC, respectively); and the third option was to reassign cases involving the MitraClip® system to another higher paying MS–DRG.

We analyzed claims data from the December 2015 update of the FY 2015 MedPAR file on reported cases of percutaneous mitral valve repair with implant (ICD–9–CM procedure code 35.97) in MS–DRGs 273 and 274. Our findings are shown in the table below.

PERCUTANEOUS MITRAL VALVE REPAIR WITH IMPLANT

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 273—All cases	6,620	8.01	$27,625
MS–DRG 273—Cases with procedure code 35.97	457	7.57	50,560
MS–DRG 274—All cases	14,220	3.46	19,316
MS–DRG 274—Cases with procedure code 35.97	693	2.67	37,686

As shown in the table, the total number of cases reported in MS–DRG 273 was 6,620 and had an average length of stay of 8.01 days and average costs of $27,625. The number of cases reporting the ICD–9–CM procedure code 35.97 in MS–DRG 273 totaled 457 and had an average length of stay of 7.57 days and average costs of $50,560. For MS–DRG 274, there were a total of 14,220 cases with an average length of stay of 3.46 days and average costs of $19,316. There were a total of 693 cases in MS–DRG 274 that reported procedure code 35.97; these cases had an average length of stay of 2.67 days and average costs of $37,686. We recognize that the cases reporting procedure code 35.97 had a shorter length of stay and higher average costs in comparison to all the cases within MS–DRGs 273 and 274.

As stated above, the first option of the requestor was that we create a new MS–DRG for endovascular cardiac valve repair with implant procedures for all cardiac valve repairs. We reviewed the following list of ICD–10–PCS procedure codes that the requestor submitted to comprise this proposed new MS–DRG.

ICD–10–PCS Code	Description
02UF37Z	Supplement aortic valve with autologous tissue substitute, percutaneous approach.
02UF38Z	Supplement aortic valve with zooplastic tissue, percutaneous approach.
02UF3JZ	Supplement aortic valve with synthetic substitute, percutaneous approach.
02UF3KZ	Supplement aortic valve with nonautologous tissue substitute, percutaneous approach.
02UG37Z	Supplement mitral valve with autologous tissue substitute, percutaneous approach.
02UG38Z	Supplement mitral valve with zooplastic tissue, percutaneous approach.
02UG3JZ	Supplement mitral valve with synthetic substitute, percutaneous approach.
02UG3KZ	Supplement mitral valve with nonautologous tissue substitute, percutaneous approach.
02UH37Z	Supplement pulmonary valve with autologous tissue substitute, percutaneous approach.
02UH38Z	Supplement pulmonary valve with zooplastic tissue, percutaneous approach.
02UH3JZ	Supplement pulmonary valve with synthetic substitute, percutaneous approach.
02UH3KZ	Supplement pulmonary valve with nonautologous tissue substitute, percutaneous approach.
02UJ37Z	Supplement tricuspid valve with autologous tissue substitute, percutaneous approach.
02UJ38Z	Supplement tricuspid valve with zooplastic tissue, percutaneous approach.
02UJ3JZ	Supplement tricuspid valve with synthetic substitute, percutaneous approach.
02UJ3KZ	Supplement tricuspid valve with nonautologous tissue substitute, percutaneous approach.

The above list of ICD–10–PCS procedure codes are currently assigned to MS–DRGs 216 through 221 (Cardiac Valve and Other Major Cardiovascular Procedures with and without Cardiac Catheterization with MCC, with CC, and without CC/MCC, respectively), with the exception of procedure code 02UG3JZ, which is assigned to MS–DRGs 273 and 274, as noted earlier in this section.

All 16 of the ICD–10–PCS procedure codes submitted by the requester are comparable translations of ICD–9–CM procedure code 35.33 (Annuloplasty), which also grouped to MS–DRGs 216 through 221. However, ICD–10–PCS procedure code 02UG3JZ (Supplement mitral valve with synthetic substitute, percutaneous approach) is the comparable translation for both ICD–9–CM procedure code 35.33 and ICD–9–CM procedure code 35.97 (Percutaneous mitral valve repair with implant), which grouped to MS–DRGs 273 and 274 as mentioned previously.

Upon review of the 16 ICD–10–PCS procedure codes submitted for consideration by the requestor, we determined that we cannot propose the suggested change because the resulting ICD–10 MS–DRG logic would not be an accurate replication of the ICD–9–CM based MS–DRG logic. Specifically, it is not possible to replicate reassigning the percutaneous annuloplasty codes from ICD–9–CM based MS–DRGs 216 through 221 to a new MS–DRG because we cannot isolate those cases from procedure code 35.33. Under ICD–9–CM, procedure code 35.33 does not differentiate the specific type of approach used to perform the procedure. This is in contrast to the 60 comparable ICD–10 code translations that do differentiate among various approaches (open, percutaneous, and percutaneous endoscopic).

As stated previously, if the ICD–9–CM and ICD–10 versions of the MS–DRGs cease to be replications of each other, the relative payment weights (computed using the ICD–9–CM based MS–DRGs) would be inconsistent with the ICD–10 MS–DRG assignment, which may cause unintended payment redistribution. Therefore, we are not proposing to

create a new MS–DRG for transcatheter mitral valve repair with implant procedures for FY 2017.

The second option in the request was to evaluate reassigning cases involving the MitraClip® to MS–DRGs 266 and 267. This option is not supported for the same reasons provided in previous rulemaking regarding differences between valve replacements and valve repairs. Our clinical advisors do not believe that these procedures are clinically coherent or similar in terms of resource consumption because the MitraClip® technology is utilized for a percutaneous mitral valve *repair,* while the other technologies assigned to MS–DRGs 266 and 267 are utilized for transcatheter/endovascular cardiac valve *replacements.* In addition, if cases involving the MitraClip® were reassigned to MS–DRGs 266 and 267, they would be overpaid by approximately $10,000 as shown in the table below. Our clinical advisors agree that we should not propose to reassign endovascular cardiac valve repair procedures to the endovascular cardiac valve replacement MS–DRGs.

ENDOVASCULAR CARDIAC VALVE REPLACEMENT WITH AND WITHOUT MCC

MS–DRG 266—All cases	7,436	8.54	$59,675
MS–DRG 267—All cases	8,480	4.45	47,013

Next, we analyzed claims data from the December 2015 update of the FY 2015 MedPAR file relating to the possible reassignment of cases involving the MitraClip® (identified by ICD–9–CM procedure code 35.97) to MS–DRGs 228, 229, and 230 (Other Cardiothoracic Procedures with MCC, with CC, and without CC/MCC, respectively). However, as shown in the findings in the table below, the claims data did not support this option under the current 3-way severity level split. That is, the data findings based on reassignment of MitraClip® cases (ICD–9–CM procedure code 35.97) to MS–DRGs 228, 229, and 230 did not support the required criterion that there be at least a $2,000 difference between subgroups. A reassignment would not meet the requirement for the ''with CC'' and ''without CC/MCC'' subgroups ($34,461 − $33,216 = $1,245).

OTHER CARDIOTHORACIC PROCEDURES (WITH PROCEDURE CODE 35.97)

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 228—with MCC	1,966	11.53	$51,634
MS–DRG 229—with CC	2,318	6.28	34,461
MS–DRG 230—without CC/MCC	709	3.76	33,216

We then performed additional analysis consisting of the base DRG report for MS–DRGs 228, 229 and 230. As shown in the table below, the average costs between the ''with CC'' and the ''without CC/MCC'' subgroups no longer meet the criterion that there be at least a 20-percent difference in average costs between subgroups. These data findings support collapsing MS–DRGs 228, 229, and 230 from a 3-way severity level split into a 2-way severity level split (with MCC and without MCC) based on 2 years (FY 2014 and FY 2015) of MedPAR data. This option would involve the deletion of an MS–DRG.

OTHER CARDIOTHORACIC PROCEDURES

MS–DRG	Number of cases FY 2015	Average length of stay FY 2015	Average costs FY 2015	Number of cases FY 2014	Average length of stay FY 2014	Average costs FY 2014
MS–DRG 228—with MCC	1,509	12.73	$51,960	1,486	12.75	$50,688
MS–DRG 229—with CC	1,835	7.16	33,786	1,900	7.46	33,277
MS–DRG 230—without CC/MCC	499	4.52	30,697	443	4.84	31,053

In the additional analysis, we evaluated if reassignment of cases reporting ICD–9–CM procedure code 35.97 to this proposed 2-way severity split was supported. We confirmed that the reassignment of ICD–9–CM procedure code 35.97 could be replicated under the ICD–9 MS–DRGs. We believe that deleting MS–DRG 230, revising MS–DRG 229, and reassigning cases with procedure code 35.97 from MS–DRGs 273 and 274 to this new structure would reflect these procedures more accurately in the ICD–10 MS–DRGs. Our clinical advisors agreed with a proposal to delete MS–DRG 230 and reassign cases involving percutaneous mitral valve repair with implant (MitraClip®) to MS–DRG 228 and revised MS–DRG 229. We believe that this approach would maintain clinical coherence for these MS–DRGs and reflect more appropriate payment for procedures involving percutaneous mitral valve repair. The proposed revisions to the MS–DRGs, which include the MitraClip® cases, are shown in the table below.

OTHER CARDIOTHORACIC PROCEDURES

Proposed revised MS–DRGs	Number of cases	Average length of stay	Average costs
MS–DRG 228—with MCC	1,966	11.53	$51,634
MS–DRG 229—without MCC	3,027	5.69	34,169

For FY 2017, we are proposing to collapse MS–DRGs 228, 229, and 230 from three severity levels to two severity levels by deleting MS–DRG 230 and revising MS–DRG 229. We also are proposing to reassign ICD–9–CM procedure code 35.97 and the cases reporting ICD–10–PCS procedure code 02UG3JZ (Supplement mitral valve with synthetic substitute, percutaneous approach) from MS–DRGs 273 and 274 to MS–DRG 228 and proposed revised MS–DRG 229. The title of MS–DRG 229 would be modified as follows to reflect the ''without MCC'' designation. The title of proposed revised MS–DRG 229 would be ''Other Cardiothoracic Procedures without MCC''. The title for MS–DRG 228 would remain the same: MS–DRG 228 (Other Cardiothoracic Procedures with MCC). We are inviting public comments on our proposals.

We also note that, as discussed earlier in this section, in the FY 2016 IPPS/LTCH PPS final rule (80 FR 49371), ICD–10–PCS code 02UG3JZ (Supplement mitral valve with synthetic substitute, percutaneous approach) was assigned to MS–DRGs 231 and 232 (Coronary Bypass with PTCA with MCC and without MCC, respectively), in addition to new MS–DRGs 273 and 274, to fully replicate the ICD–9–CM based MS–DRG logic for ICD–9–CM procedure code 35.97. If our proposal in this FY 2017 proposed rule to reassign ICD–10–PCS code 02UG3JZ to MS–DRGs 228 and proposed revised MS–DRG 229 is finalized in the FY 2017 IPPS/LTCH PPS final rule, it will eliminate the need to continue having ICD–10–PCS code 02UG3JZ and ICD–9–CM code 35.97 group to MS–DRGs 231 and 232. This is due to the fact that, currently, MS–DRGs 228, 229, and 230 are listed higher than MS–DRGs 231 through 236 in the surgical hierarchy, as shown in the ICD–9 and ICD–10 MS–DRGs Definitions Manual Files in Appendix D—MS–DRG Surgical Hierarchy by MDC and MS–DRG, which is available via the Internet on the CMS Web site at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2016-IPPS-Final-Rule-Home-Page-Items/FY2016-IPPS-Final-Rule-Data-Files.html?DLPage=1&DLEntries=10&DLSort=0&DLSortDir=ascending.* Therefore, if the proposal is finalized for FY 2017, cases reporting ICD–10–PCS procedure code 02UG3JZ will group to MS–DRGs 228 and revised MS–DRG 229 versus MS–DRGs 231 and 232 because of the surgical hierarchy GROUPER logic.

As a result, we are proposing to remove ICD–10–PCS procedure code 02UG3JZ and ICD–9–CM procedure code 35.97 from the PTCA list in MS–DRGs 231 and 232 (Coronary Bypass with PTCA with MCC and without MCC, respectively) for FY 2017 if the proposal to reassign ICD–9–CM procedure code 35.97 and the cases reporting ICD–10–PCS procedure codes 02UG3JZ from MS–DRGs 273 and 274 to MS–DRGs 228 and proposed revised MS–DRG 229 is finalized. We are inviting public comments on our proposals.

e. MS–DRG 245 (AICD Generator Procedures)

In the FY 2016 IPPS/LTCH PPS final rule (80 FR 49369), we stated that we would continue to monitor MS–DRG 245 (AICD Generator Procedures) to determine if the data supported subdividing this base MS–DRG into severity levels. As displayed in the table below, the results of the FY 2015 data analysis showed there were a total of 1,464 cases, with an average length of stay of 5.5 days and average costs of $34,564 for MS–DRG 245.

AICD GENERATOR PROCEDURES

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 245	1,464	5.5	$34,564

We applied the five criteria established in the FY 2008 IPPS final rule (72 FR 47169), as described in section II.F.1.b. of the preamble of this proposed rule to determine if it was appropriate to subdivide MS–DRG 245 into severity levels. The table below illustrates our findings.

AICD GENERATOR PROCEDURES

MS–DRG by suggested severity level	Number of cases	Average length of stay	Average costs
MS–DRG 245—with MCC	449	8.37	$40,175
MS–DRG 245—with CC	861	4.59	32,518
MS–DRG 245—without CC/MCC	154	2.86	29,646

Based on our analysis of claims data from the December 2015 update of the FY 2015 MedPAR file, the data findings do not support creating new severity levels. The findings show that the data do not meet the criteria for a 3-way severity level split as the criterion that there be at least a 20-percent difference in average costs between subgroups is

not met for the ''with CC'' and ''without CC/MCC'' severity levels. We also looked at the prospect of a 2-way severity level split.

AICD GENERATOR PROCEDURES

MS–DRG by suggested severity level	Number of cases	Average length of stay	Average costs
MS–DRG 245—with MCC	449	8.37	$40,175
MS–DRG 245—without MCC	1,015	4.33	32,081

The findings do show that the data are close to meeting the criteria for a 2-way severity level split of ''with MCC and without MCC.'' However, the required criterion that there must be at least 500 cases in the MCC group is not met.

Therefore, for FY 2017, we are not proposing to subdivide MS–DRG 245 into severity levels. We are inviting public comments on our proposal to maintain the current structure for MS–DRG 245.

6. MDC 6 (Diseases and Disorders of the Digestive System): Excision of Ileum

We received a request to analyze an MS–DRG replication issue from the ICD–9–CM based MS–DRGs to the ICD–10 based MS–DRGs for excision procedures performed on the ileum. Under ICD–9–CM, procedure code 45.62 (Other partial resection of small intestine) was assigned to MS–DRGs 329, 330 and 331 (Major Small and Large Bowel Procedures with MCC, with CC, and without CC/MCC, respectively). Under the current ICD–10 MS–DRGs Version 33, ICD–10–PCS procedure code 0DBB0ZZ (Excision of ileum, open approach) is assigned to MS–DRGs 347, 348, and 349 (Anal and Stomal Procedures with MCC, with CC, and without CC/MCC, respectively). The requestor indicated that, despite the variation in terms for ''excision'' and ''resection'' between the two code sets, the surgical procedure to remove a portion of the small intestine, whether it is the ileum, duodenum, or jejunum, has not changed and should not result in different MS–DRG assignments when translated from ICD–9–CM to ICD–10.

We agree that this is a replication error. In addition to ICD–10–PCS code 0DBB0ZZ, we also reviewed the MS–DRG assignments for ICD–10–PCS code 0DBA0ZZ (Excision of jejunum, open approach) and determined the MS–DRG assignment for this code resulted in the same replication error. Therefore, we are proposing to reassign ICD–10–PCS codes 0DBB0ZZ and 0DBA0ZZ from MS–DRGs 347, 348, and 349 to MS–DRGs 329, 330, and 331, effective with the ICD–10 MS–DRGs Version 34 on October 1, 2016.

We are inviting public comments on our proposal.

7. MDC 7 (Diseases and Disorders of the Hepatobiliary System and Pancreas): Bypass Procedures of the Veins

We received a request to assign ICD–10–PCS code 06183DY (Bypass portal vein to lower vein with intraluminal device, percutaneous approach) to MDC 7 (Diseases and Disorders of the Hepatobiliary System and Pancreas) under MS–DRGs 405, 406, and 407 (Pancreas Liver and Shunt Procedures with MCC, with CC, and without CC/MCC, respectively). The requestor described this code as capturing a transjugular intrahepatic portosystem shunt procedure. The requestor stated that, under ICD–9–CM, when a procedure for cirrhosis of the liver was performed, the procedure was assigned to ICD–9–CM code 39.1 (Intra-abdominal venous shunt). The requestor noted that when ICD–9–CM procedure code 39.1 is reported with a principal diagnosis of cirrhosis of the liver, the procedure was assigned to MS–DRG 405, 406, or 407 in the ICD–9–CM MS–DRGs.

Currently, ICD–10–PCS procedure code 06183DY is assigned to only MDC 5 (Diseases and Disorders of the Circulatory System) and MS–DRGs 270, 271, and 272 (Other Major Cardiovascular Procedures with MCC, with CC, and without CC/MCC, respectively) under ICD–10 MS–DRGs Version 33. The requestor stated that ICD–10–PCS procedure code 06183DY code should also be assigned to MDC 7 and MS–DRGs 405, 406, and 407 to be consistent with the ICD–9–CM MS–DRGs Version 32.

We analyzed this issue and agree that the ICD–10 MS–DRGs do not fully replicate the ICD–9–CM MS–DRGs. We agree that ICD–10–PCS procedure code 06183DY should be assigned to MDC 7 and MS–DRGs 405, 406, and 407 to replicate the ICD–9–CM MS–DRGs. Our clinical advisors reviewed this issue and also agree that ICD–10–PCS procedure code 06183DY should be assigned to MDC 7 and MS–DRGs 405, 406, and 407. Therefore, we are proposing to assign ICD–10–PCS procedure code 06183DY to MDC 7 and MS–DRGs 405, 406, and 407 for FY 2017.

We are inviting public comments on our proposal.

8. MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue)

a. Proposed Updates to MS–DRGs 469 and 470 (Major Joint Replacement or Reattachment of Lower Extremity With and Without MCC, respectively)

(1) Total Ankle Replacement (TAR) Procedures

We received a request to create a new MS–DRG for total ankle replacement (TAR) procedures, which are currently assigned to MS–DRGs 469 and 470 (Major Joint Replacement or Reattachment of Lower Extremity with and without MCC, respectively). We previously discussed requested changes to the MS–DRG assignment for TAR procedures in the FY 2015 IPPS/LTCH PPS proposed rule (79 FR 28013 through 28015) and in the FY 2015 IPPS/LTCH PPS final rule (79 FR 49896 through 49899). For FY 2015, we did not change the MS–DRG assignment for total ankle replacements. The requestor stated that reassigning total ankle replacement procedures from MS–DRGs 469 and 470 to a new MS–DRG would have an important benefit for the new Medicare Comprehensive Care for Joint Replacement (CJR) model. The commenter noted that because total ankle replacement cases currently are assigned to MS–DRGs 469 and 470, they are included in the model.

Ankle replacement procedures were captured by ICD–9–CM code 81.56 (Total ankle replacement). We examined claims data for total ankle procedures using the December 2015 update of the FY 2015 MedPAR file. Our findings are displayed in the table below.

TOTAL ANKLE REPLACEMENT CASES REPORTED IN MS–DRGS 469 AND 470

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 469—All cases	25,729	6.92	$22,358
MS–DRG 469—Total ankle replacement cases	30	5.40	34,889
MS–DRG 470—All cases	421,149	2.92	14,834
MS–DRG 470—Total ankle replacement cases	1,626	1.94	20,019

As the total ankle replacement claims data analysis showed, these procedures represent a small fraction of the total number of cases reported in MS–DRGs 469 and 470. There were 30 total ankle replacement cases reported in MS–DRG 469 and 1,626 total ankle replacement cases in MS–DRG 470, compared to 25,729 total cases reported in MS–DRG 469 and 421,149 total cases reported in MS–DRG 470. The average length of stay for total ankle replacement cases was 5.40 days and average costs for total ankle replacement cases were $34,889 reported in MS–DRG 469, compared to average length of stay of 6.92 days and average costs of $22,358 for all cases reported in MS–DRG 469. The average length of stay for total ankle replacement cases was 1.94 days and average costs of total ankle replacement cases were $20,019 reported in MS–DRG 470, compared to an average length of stay of 2.92 days and average costs of $14,834 for all cases reported in MS–DRG 470.

Given the low volume of cases, we believe that these cost data may not be a complete measure of actual differences in inpatient resource utilization for beneficiaries receiving total ankle replacements. In addition, these total ankle replacement cases may have been impacted by other factors such as complication or comorbidities. Several expensive cases could impact the average costs for a very small number of patients. The average cost of total ankle replacement cases reported in MS–DRG 469 was $12,531 higher than all cases reported in MS–DRG 469 ($34,889 compared to $22,358 for all reported cases), but there were only 30 cases compared to a total of 25,729 cases reported in MS–DRG 469. The average cost of total ankle replacement cases reported in MS–DRG 470 was $5,185 higher than all cases reported in MS–DRG 470. There were 1,626 total ankle replacement cases out of a total of 421,149 cases reported in MS–DRG 470. The average costs of the total ankle replacement cases were higher than those for all cases reported in MS–DRG 469 and 470. However, some cases have higher and some cases have lower average costs within any MS–DRG. MS–DRGs are groups of clinically similar cases that have similar overall costs. Within a group of cases, one would expect that some cases have costs that are higher than the overall average and some cases have costs that are lower than the overall average.

The data do not support creating a new total ankle replacement MS–DRG for this small number of cases. Also, our clinical advisors pointed out that creating a new MS–DRG for total ankle replacements would result in combining cases reporting an MCC with an average length of stay of 5.40 days and cases not reporting an MCC with an average length of stay of 1.94 days. Our clinical advisors did not recommend the creation of a new MS–DRG for this single procedure with such a small number of cases. They also stated that patients undergoing total ankle replacement have similar clinical features compared to other patients undergoing procedures included in MS–DRGs 469 and 470. Furthermore, we believe that the volume of total ankle replacement procedures performed relative to hip and knee replacement procedures minimizes the benefit that a new MS–DRG would have on the Medicare CJR model. Our clinical advisors determined that the cases involving total ankle replacements are more appropriately assigned to MS–DRGs 469 and 470 with the two severity levels.

Based on the findings from our data analysis and the recommendations from our clinical advisors, we are not proposing to create a new MS–DRG for total ankle replacement procedures. We are proposing to maintain the current MS–DRG structure for MS–DRGs 469 and 470.

We are inviting public comments on this proposal.

(2) Hip Replacement Procedures With Principal Diagnosis of Hip Fracture

We received several requests to remove hip replacement procedures with a principal diagnosis of hip fracture from MS–DRGs 469 and 470 (Major Joint Replacement or Reattachment of Lower Extremity with and without MCC, respectively) and to create a new MS–DRG for assignment of these hip replacement procedures. One requestor suggested that if such a new MS–DRG could not be created, CMS consider reassigning all hip replacement procedures with a principal diagnosis of hip fracture only to MS–DRG 469, even if there were no reported MCC.

The requestors stated that hip replacement procedures performed on patients with hip fractures involve a more fragile population of patients than the typical patient population who undergo elective hip or knee replacement and that these more fragile patient cases also are assigned to MS–DRGs 469 and 470. The requestors stated that cases of patients who have hip replacements with hip fractures may have significant comorbidities not present in patients who undergo elective hip replacements. One requestor stated that the absolute number of hospitalizations for hip fractures in the United States is currently more than 350,000 and the number is rising. The requestor stated that 90 percent of hip fractures result from a simple fall, and that hip fracture rates increase with age. According to the requestor, the 1-year mortality rate for patients who undergo hip replacement procedures after a hip fracture was approximately 20 percent, and the 3-year mortality rate was up to 50 percent. The requestor also stated that one out of three adults who lived independently before their hip fracture remains in a nursing home for at least a year after the hip fracture. In contrast, the requestor noted that patients under elective hip replacement procedures for arthritis have fewer comorbidities, improved health after the procedure, low rates of readmission, and less postacute needs. The requestor believed that there are many factors that impact the outcome of hip replacements for hip fractures, including patient factors, fracture type, surgeon and hospital factors, treatment decisions, complication rates, and rehabilitation factors/access. The requestor added that, despite the commitment to standardization, the use of protocol-driven care, early surgery (<24 hours) after surgical optimization, prevention of recurrent fractures, and comanagement with medical/surgical teams, many patients who undergo hip replacement procedures for hip

fractures have serious renal, cardiovascular, and liver disease, as well as multiple medical comorbidities. The rates of postoperative infections, readmissions, and postacute care for the patients who undergo hip replacements for hip fractures are higher than for patients who undergo elective hip replacement. Some requestors referenced the Bundled Payments for Care Improvement Initiative (BPCI) and believed that their requested changes to MS–DRGs 469 and 470 would support this effort. The requestors stated that the MS–DRG assignment for the hip replacement procedures with hip fractures has tremendous implications for successful participation in the BPCI because the BPCI's clinical episodes track to MS–DRG assignment, and the Major Joint Replacement of the Lower Extremity Clinical Episode encompasses procedures assigned to MS–DRGs 469 and 470. Alternatively, the requestors suggested that CMS reassign all cases of hip replacement procedures with a principal diagnosis of hip fracture to MS–DRG 469 to recognize the more significant adverse health profile of these types of cases.

We examined claims data for cases reporting hip replacement procedures for patients admitted with hip fractures under MS–DRGs 469 and 470 in the December 2015 update of the FY 2015 MedPAR file. We used the following list of ICD–9–CM diagnosis codes to identify cases representing hip replacements for hip fractures:

ICD–9–CM Diagnosis Codes Reviewed for Cases Representing Hip Replacement for Hip Fractures

ICD–9–CM diagnosis code	Descriptions
733.14	Pathological fracture of neck of femur.
733.15	Pathological fracture of other specified part of femur.
733.81	Malunion of fracture.
733.82	Nonunion of fracture.
733.96	Stress fracture of femoral neck.
808.0	Closed fracture of acetabulum.
808.1	Open fracture of acetabulum.
820.8	Fracture of unspecified part of neck of femur closed.
820.9	Fracture of unspecified part of neck of femur open.
820.00	Fracture of unspecified intracapsular section of neck of femur closed.
820.01	Fracture of epiphysis (separation) (upper) of neck of femur closed.
820.02	Fracture of midcervical section of femur closed.
820.03	Fracture of base of neck of femur closed.
820.09	Other transcervical fracture of femur closed.
820.10	Fracture of unspecified intracapsular section of neck of femur open.
820.11	Fracture of epiphysis (separation) (upper) of neck of femur open.
820.12	Fracture of midcervical section of femur open.
820.13	Fracture of base of neck of femur open.
820.19	Other transcervical fracture of femur open.
820.20	Fracture of unspecified trochanteric section of femur closed.
820.21	Fracture of intertrochanteric section of femur closed.
820.22	Fracture of subtrochanteric section of femur closed.
820.30	Fracture of unspecified trochanteric section of femur open.
820.31	Fracture of intertrochanteric section of femur open.
820.32	Fracture of subtrochanteric section of femur open.

Our findings from our examination of the data are shown in the table below.

Cases of Hip Replacements With and Without Principal Diagnosis of Hip Fracture

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 469—All cases	25,729	6.9	$22,358
MS–DRG 469—Hip replacement cases with hip fractures	14,459	7.9	22,852
MS–DRG 469—Hip replacement cases without hip fractures	4,714	5.7	22,430
MS–DRG 470—All cases	421,149	2.9	14,834
MS–DRG 470—Hip replacement cases with hip fractures	49,703	4.7	15,795
MS–DRG 470—Hip replacement cases without hip fractures	125,607	2.6	14,870

For MS–DRG 469, the average costs of all 25,729 reported cases were $22,358 and the average length of stay was 6.9 days. Within MS–DRG 469, there were 14,459 cases of hip replacements with hip fractures reported, with average costs of $22,852 and an average length of stay of 7.9 days. Within MS–DRG 469, there were 4,714 cases of hip replacements without hip fractures reported, with average costs of $22,430 and an average length of stay of 5.7 days. The average costs of reported cases of hip replacements with hip fractures are similar to the average costs of all cases reported within MS–DRG 469 ($22,852 compared to $22,358), and to the average costs of reported cases of hip replacements without hip fractures ($22,852 compared to $22,430). However, the average length of stay for cases of hip replacements with hip fractures reported in MS–DRG 469 is higher than the average length of stay for all cases reported in MS–DRG 469 and for cases of hip replacements without hip fractures reported in MS–

DRG 469 (7.9 days compared to 6.9 days and 5.7 days, respectively.)

For MS–DRG 470, the average costs of all 421,149 cases reported were $14,834 and the average length of stay was 2.9 days. Within MS–DRG 470, there were 49,703 reported cases of hip replacements with hip fractures, with average costs $15,795 and an average length of stay of 4.7 days. Within MS–DRG 470, there were 125,607 cases of hip replacements without hip fractures reported, with average costs of $14,870 and an average length of stay of 2.6 days. However, the average length of stay for cases of hip replacements with hip fractures reported in MS–DRG 470 was higher than the average length of stay for all cases and for cases of hip replacements without hip fractures reported in MS–DRG 470 (4.7 days compared to 2.9 days and 2.6 days, respectively). Therefore, the average costs of cases of hip replacements with hip fractures were similar for both MS–DRG 469 and MS–DRG 470 ($22,852 compared to $22,358 and $15,795 compared to $14,834, respectively). However, the average lengths of stay are longer for cases of hip replacements with hip fractures compared to all cases reported in both MS–DRGs 469 and 470 (7.9 days compared to 6.9 days and 4.7 days compared to 2.9 days, respectively).

The claims data do not support creating a new MS–DRG for the assignment of cases of hip replacements with hip fractures. As discussed earlier, the average costs for cases of hip replacements with hip fractures reported in MS–DRG 469 and MS–DRG 470 are similar to the average costs for all cases reported in MS–DRG 469 and MS–DRG 470. While the average length of stay is longer for cases of hip replacements with hip fractures than for cases of hip replacements without hip fractures reported within MS–DRGs 469 and 470, the increased length of stay did not impact the average costs of reported cases in either MS–DRG 469 or 470. The data showed that cases of hip replacement procedures are clearly influenced by the presence of an MCC. The average costs of all cases reported in MS–DRG 469, which identifies an MCC, were $22,358, compared to average costs of $14,834 for all cases reported in MS–DRG 470, which did not identify an MCC. The data showed that the presence of a principal diagnosis of a hip fracture did not impact the average costs of cases reported in either MS–DRG 469 or MS–DRG 470.

We also examined the data in relation to the request to reassign all procedures of hip replacement with hip fractures from MS–DRG 470 to MS–DRG 469, even if there is no MCC present. The data showed that the 49,703 cases of hip replacements with hip fractures reported in MS–DRG 470 have average costs of $15,795 and an average length of stay of 4.7 days. The 25,729 total cases of hip replacements reported in MS–DRG 469 have average costs of $22,358 and an average length of stays of 6.9 days. Therefore, the data for average costs and average length of stay for all cases involving hip replacement procedures with hip fractures reported in MS–DRG 470 do not support reassigning all cases of hip replacement procedures with hip fractures to MS–DRG 469, even if there is no MCC present.

Our clinical advisors reviewed this issue and agree that the hip replacement procedures performed for patients with hip fractures are appropriately assigned to MS–DRGs 469 and 470. They did not support reassigning these procedures from MS–DRGs 469 and 470 to a new MS–DRG or reassigning all cases of hip replacement procedures with hip fractures to MS–DRG 469, even if the case does not have an MCC. Our clinical advisors stated that the surgical techniques used for hip replacements are similar for all patients. They advised that the fact that some patients also had a hip fracture would not justify creating a new MS–DRG or reassigning all cases of hip replacement procedures with hip fractures to MS–DRG 469. Our clinical advisors noted that the costs of cases of hip replacements are more directly impacted by the presence or absence of an MCC than the presence or absence of a hip fracture.

Based on the findings from our data analyses and the recommendations from our clinical advisors, we are not proposing to create a new MS–DRG for the assignment of procedures involving hip replacement in patients who have hip fractures or to reassign all procedures involving hip replacements with hip fractures to MS–DRG 469 even if there is no MCC present. We are proposing to maintain the current MS–DRG structure for MS–DRGs 469 and 470.

We are inviting public comments on our proposals.

b. Revision of Total Ankle Replacement Procedures

(1) Revision of Total Ankle Replacement Procedures

We received a request to modify the MS–DRG assignment for revision of total ankle replacement procedures. Currently, these procedures are assigned to MS–DRGs 515, 516, and 517 (Other Musculoskeletal System and Connective Tissue O.R. Procedures with MCC, with CC and without CC/MCC, respectively). This topic was discussed in the FY 2015 IPPS/LTCH PPS proposed rule (79 FR 28013 through 28015) and the FY 2015 IPPS/LTCH PPS final rule (79 FR 49896 through 49899). However, at that time, we did not change the MS–DRG assignment for revisions of total ankle replacement procedures.

The requestor presented two options for consideration for modifying the MS–DRG assignment for the revisions of total ankle replacement procedures. The requestor's first option was to create a new MS–DRG for the assignment of revision of total ankle replacement procedures. The requestor believed that a new MS–DRG would be justified based on the distinct costs, resources, and utilization associated with ankle joint revision cases. The requestor's second option was to reassign revision of total ankle replacement procedures to MS–DRGs 466, 467, and 468 (Revision of Hip or Knee Replacement with MCC, with CC, and without CC/MCC, respectively) and rename MS–DRGs 466, 467, and 468 as ''Revision of Hip, Knee, or Ankle with MCC, with CC, and without CC/MCC'', respectively. The requestor believed that this second option would be justified because it is a reasonable, temporary approach until CMS has sufficient utilization and cost data for revision of total ankle replacement procedures based on the reporting of the new and more specific ICD–10–PCS procedure codes. The requestor pointed out that the following more specific ICD–10–PCS procedure codes were implemented effective October 1, 2015, with the implementation of ICD–10. The requestor stated that these new codes will provide improved data on these procedures that can be analyzed for future MS–DRG updates.

ICD–10–PCS procedure code	Description
0SWF0JZ	Revision of synthetic substitute in right ankle joint, open approach.
0SWF3JZ	Revision of synthetic substitute in right ankle joint, percutaneous approach.
0SWF4JZ	Revision of synthetic substitute in right ankle joint, percutaneous endoscopic approach.

ICD–10–PCS procedure code	Description
0SWFXJZ	Revision of synthetic substitute in right ankle joint, external approach.
0SWG0JZ	Revision of synthetic substitute in left ankle joint, open approach.
0SWG3JZ	Revision of synthetic substitute in left ankle joint, percutaneous approach.
0SWG4JZ	Revision of synthetic substitute in left ankle joint, percutaneous endoscopic approach.
0SWGXJZ	Revision of synthetic substitute in left ankle joint, external approach.

We agree with the requestor that the previous code used to identify revisions of total ankle replacement procedures, ICD–9–CM procedure code 81.59 (Revision of joint replacement of lower extremity, not elsewhere classified), is not as precise as the new ICD–10–PCS procedure codes that were implemented on October 1, 2015. As discussed in the FY 2015 IPPS/LTCH PPS proposed rule and final rule, ICD–9–CM procedure code 81.59 included procedures involving revisions of joint replacements of a variety of lower extremity joints, including the ankle, foot, and toe. Therefore, the ICD–9–CM procedure code does not provide precise information on the number of revisions of total ankle replacement procedures as do the ICD–10–PCS procedure codes listed above. We also agree that the ICD–10–PCS procedure codes will provide more precise data on revisions of ankle replacements.

We examined claims data from the December 2015 update of the FY 2015 MedPAR file on cases reporting procedure code 81.59 in MS–DRGs 515, 516, and 517. The table below shows our findings.

REVISIONS OF JOINT REPLACEMENTS PROCEDURES

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 515—All cases	3,852	8.54	$21,900
MS–DRG 515—Cases reporting procedure code 81.59	2	7.00	36,983
MS–DRG 516—All cases	8,567	5.24	14,839
MS–DRG 516—Cases reporting procedure code 81.59	19	3.74	14,957
MS–DRG 517—All cases	5,664	3.20	12,979
MS–DRG 517—Cases reporting procedure code 81.59	47	1.89	16,524

As can be seen from the data in the above table, there were only 68 total cases reported with procedure code 81.59 among MS–DRGs 515, 516, and 517: 2 Cases in MS–DRG 515; 19 cases in MS–DRG 516; and 47 in MS–DRG 517. We point out that while there were 68 total cases reported with procedure code 81.59 in MS–DRGs 515, 516, and 517, we are unable to determine how many of these cases were actually revisions of ankle replacements versus other revisions of joint replacement of lower extremities such as those of the foot or toe. This small number of cases does not justify creating a new MS–DRG as suggested by the requestor in its first option.

While the average costs of cases reporting procedure code 81.59 in MS–DRG 515 were $36,983, compared to $21,900 for all cases reported in MS–DRG 515, there were only 2 cases reporting procedure code 81.59 in MS–DRG 515, of the 3,852 total cases reported in MS–DRG 515. In MS–DRG 516, the average costs of the 19 cases reporting procedure code 81.59 cases were $14,957, which is very close to the average costs of $14,839 for all 8,567 cases reported in MS–DRG 516. The average costs for cases reporting procedure code 81.59 in MS–DRG 517 were higher than the average costs for all cases reported in MS–DRG 517 ($16,524 for cases reporting procedure code 81.59 cases compared to $12,979 for all cases reported in MS–DRG 517). While the average costs for cases reporting procedure code 81.59 were $3,545 higher than all cases reported in MS–DRG 517, we point out that there were only 47 cases that reported procedure code 81.59 out of the 5,664 total cases reported in MS–DRG 517. The relatively small number of cases may have been impacted by other factors. Several expensive cases could impact the average costs for a very small number of patients.

As stated by the requestor, we do not yet have data using the more precise ICD–10–PCS revisions of total ankle replacement procedure codes that were implemented on October 1, 2015. These new codes will more precisely identify the number of patients who had a revision of total ankle replacement procedure and the number of patients who had revisions of other lower joint replacement procedures such as the foot or toe. The available clinical data from the December 2015 update of the FY 2015 MedPAR file do not support the creation of a new MS–DRG for the assignment of revisions of total ankle replacement procedures or the reassignment of these cases to other MS–DRGs, such as MS–DRGs 466, 467, and 468, because there were so few cases and because we could not determine how many of these cases were revisions of ankle replacements. Claims data on the ICD–10–PCS codes will not be available until 2 years after the implementation of the codes, which was October 1, 2015.

Our clinical advisors reviewed this issue and determined that the revision of total ankle replacement procedures are appropriately classified within MS–DRGs 515, 516, and 517 along with other orthopedic procedures captured by nonspecific codes. They do not support reassignment of the procedures to MS–DRGs 466, 467, and 468 until such time as detailed data for ICD–10–PCS claims are available to evaluate revision of total ankle replacement procedures. Therefore, based on the findings of our analysis of claims data and the advice of our clinical advisors, we are proposing to maintain the current MS–DRG assignment for revision of total ankle replacement procedures for FY 2017.

We are inviting public comments on our proposal.

(2) Combination Codes for Removal and Replacement of Knee Joints

We received several requests asking CMS to examine whether additional combinations of procedure codes for the removal and replacements of knee joints should be added to MS–DRGs 466, 467,

and 468 (Revision of Hip or Knee Replacement with MCC, with CC, and without CC/MCC, respectively). This topic was discussed in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24379 through 24395) and the FY 2016 IPPS/LTCH PPS final rule (80 FR 49390 through 49406). One requestor stated that the procedure codes in the following table were not included in the code pairs that group to MS–DRGs 466, 467, and 468 in the ICD–10 MS–DRGs Version 33.

ICD–10–PCS procedure code	Description
0SPD08Z	Removal of spacer from left knee joint, open approach.
0SPD38Z	Removal of spacer from left knee joint, percutaneous approach.
0SPD48Z	Removal of spacer from left knee joint, percutaneous endoscopic approach.
0SPC08Z	Removal of spacer from right knee joint, open approach.
0SPC38Z	Removal of spacer from right knee joint, percutaneous approach.
0SPC48Z	Removal of spacer from right knee joint, percutaneous approach.

Other requestors stated that the procedure codes in the following table are not included in the list of combinations that group to MS–DRGs 466, 467, and 468 when reported in conjunction with an ICD–10–PCS code for the removal of synthetic substitute from the joint in the ICD–10 MS–DRGs Version 33.

ICD–10–PCS procedure code	Description
0SRC0J9	Replacement of right knee joint with synthetic substitute, cemented, open approach.
0SRC0JA	Replacement of right knee joint with synthetic substitute, uncemented, open approach.
0SRC0JZ	Replacement of right knee joint with synthetic substitute, open approach.
0SRC07Z	Replacement of right knee joint with autologous tissue substitute, open approach.
0SRC0KZ	Replacement of right knee joint with nonautologous tissue substitute, open approach.

We agree that the joint revision cases involving the removal of a spacer and subsequent insertion of a new knee joint prosthesis should be assigned to MS–DRGs 466, 467, and 468. We examined knee joint revision combination codes that are not currently assigned to MS–DRGs 466, 467, and 468 in ICD–10 MS–DRGs Version 33 and identified 58 additional combinations that also should be included so that the same logic is used in the ICD–10 version of the MS–DRGs as is used in the ICD–9–CM version. We are proposing to add the following 58 new code combinations that capture the joint revisions to the Version 34 MS DRG structure for MS–DRGs 466, 467, and 468, effective October 1, 2016.

ICD–10–PCS Code Pairs Proposed To Be Added to Version 34 ICD–10 MS–DRGs 466, 467, and 468: Proposed New Knee Revision ICD–10–PCS Combinations

Code	Code description		Code	Code description
0SPC08Z	Removal of Spacer from Right Knee Joint, Open Approach.	and	0SRC0J9	Replacement of Right Knee Joint with Synthetic Substitute, Cemented, Open Approach.
0SPC08Z	Removal of Spacer from Right Knee Joint, Open Approach.	and	0SRC0JA	Replacement of Right Knee Joint with Synthetic Substitute, Uncemented, Open Approach.
0SPC08Z	Removal of Spacer from Right Knee Joint, Open Approach.	and	0SRC0JZ	Replacement of Right Knee Joint with Synthetic Substitute, Open Approach.
0SPC08Z	Removal of Spacer from Right Knee Joint, Open Approach.	and	0SRT0J9	Replacement of Right Knee Joint, Femoral Surface with Synthetic Substitute, Cemented, Open Approach.
0SPC08Z	Removal of Spacer from Right Knee Joint, Open Approach.	and	0SRT0JA	Replacement of Right Knee Joint, Femoral Surface with Synthetic Substitute, Uncemented, Open Approach.
0SPC08Z	Removal of Spacer from Right Knee Joint, Open Approach.	and	0SRT0JZ	Replacement of Right Knee Joint, Femoral Surface with Synthetic Substitute, Open Approach.
0SPC08Z	Removal of Spacer from Right Knee Joint, Open Approach.	and	0SRV0J9	Replacement of Right Knee Joint, Tibial Surface with Synthetic Substitute, Cemented, Open Approach.
0SPC08Z	Removal of Spacer from Right Knee Joint, Open Approach.	and	0SRV0JA	Replacement of Right Knee Joint, Tibial Surface with Synthetic Substitute, Uncemented, Open Approach.
0SPC08Z	Removal of Spacer from Right Knee Joint, Open Approach.	and	0SRV0JZ	Replacement of Right Knee Joint, Tibial Surface with Synthetic Substitute, Open Approach.
0SPC38Z	Removal of Spacer from Right Knee Joint, Percutaneous Approach.	and	0SRC0J9	Replacement of Right Knee Joint with Synthetic Substitute, Cemented, Open Approach.
0SPC38Z	Removal of Spacer from Right Knee Joint, Percutaneous Approach.	and	0SRC0JA	Replacement of Right Knee Joint with Synthetic Substitute, Uncemented, Open Approach.
0SPC38Z	Removal of Spacer from Right Knee Joint, Percutaneous Approach.	and	0SRC0JZ	Replacement of Right Knee Joint with Synthetic Substitute, Open Approach.

ICD–10–PCS CODE PAIRS PROPOSED TO BE ADDED TO VERSION 34 ICD–10 MS–DRGS 466, 467, AND 468: PROPOSED NEW KNEE REVISION ICD–10–PCS COMBINATIONS—Continued

Code	Code description		Code	Code description
0SPC38Z	Removal of Spacer from Right Knee Joint, Percutaneous Approach.	and	0SRT0J9	Replacement of Right Knee Joint, Femoral Surface with Synthetic Substitute, Cemented, Open Approach.

0SPD48Z	Removal of Spacer from Left Knee Joint, Percutaneous Endoscopic Approach.	and	0SRU0JA	Replacement of Left Knee Joint, Femoral Surface with Synthetic Substitute, Uncemented, Open Approach.
0SPD48Z	Removal of Spacer from Left Knee Joint, Percutaneous Endoscopic Approach.	and	0SRU0JZ	Replacement of Left Knee Joint, Femoral Surface with Synthetic Substitute, Open Approach.
0SPD48Z	Removal of Spacer from Left Knee Joint, Percutaneous Endoscopic Approach.	and	0SRW0J9	Replacement of Left Knee Joint, Tibial Surface with Synthetic Substitute, Cemented, Open Approach.
0SPD48Z	Removal of Spacer from Left Knee Joint, Percutaneous Endoscopic Approach.	and	0SRW0JA	Replacement of Left Knee Joint, Tibial Surface with Synthetic Substitute, Uncemented, Open Approach.
0SPD48Z	Removal of Spacer from Left Knee Joint, Percutaneous Endoscopic Approach.	and	0SRW0JZ	Replacement of Left Knee Joint, Tibial Surface with Synthetic Substitute, Open Approach.
0SPD4JZ	Removal of Synthetic Substitute from Left Knee Joint, Percutaneous Endoscopic Approach.	and	0SRU0JZ	Replacement of Left Knee Joint, Femoral Surface with Synthetic Substitute, Open Approach.

We are inviting public comments on our proposal to add the joint revision code combinations listed above to the ICD–10 Version 34 MS–DRGs 466, 467, and 468.

c. Decompression Laminectomy

Currently, under ICD–10–PCS, the procedure describing a decompression laminectomy is coded for the ''release'' of a specified area of the spinal cord. These decompression codes are assigned to MS–DRGs 028, 029, and 030 (Spinal Procedures with MCC, with CC or Spinal Neurostimulators, or without CC/MCC, respectively) and to MS–DRGs 518, 519, and 520 (Back and Neck Procedures Except Spinal Fusion with MCC or Disc Device or Neurostimulator, with CC, or without CC/MCC, respectively) in the ICD–10 MS–DRGs Version 33. A commenter brought to our attention that codes describing release of specific peripheral nerve are assigned to MS–DRGs 515, 516, and 517 (Other Musculoskeletal System and Connective Tissue O.R. Procedures with MCC, with CC, and without CC/MCC, respectively). The commenter suggested that a subset of these codes also be assigned to MS–DRGs 028 through 030 and MS–DRGs 518 through 520 for clinical coherence purposes. The commenter stated, for example, that ICD–10–PCS procedure code 00NY0ZZ (Release lumbar spinal cord, open approach) is assigned to MS–DRGs 028 through 030 and MS–DRGs 518 through 520. However, ICD–10–PCS procedure code 01NB0ZZ (Release lumbar nerve, open approach) is assigned to MS–DRGs 515 through 517.

We agree with the commenter's suggestion. Therefore, for FY 2017, we are proposing to reassign the ICD–10–PCS procedure codes listed in the following table from MS–DRGs 515 through 517 to MS–DRGs 028 through 030 and MS–DRGs 518 through 520 under the ICD–10 MS–DRGs Version 34.

ICD–10–PCS procedure code	Description
01N00ZZ	Release cervical plexus, open approach.
01N03ZZ	Release cervical plexus, percutaneous approach.
01N04ZZ	Release cervical plexus, percutaneous endoscopic approach.
01N10ZZ	Release cervical nerve, open approach.
01N13ZZ	Release cervical nerve, percutaneous approach.

ICD–10–PCS procedure code	Description
01N14ZZ	Release cervical nerve, percutaneous endoscopic approach.
01N80ZZ	Release thoracic nerve, open approach.
01N83ZZ	Release thoracic nerve, percutaneous approach.
01N84ZZ	Release thoracic nerve, percutaneous endoscopic approach.
01N90ZZ	Release lumbar plexus, open approach.
01N93ZZ	Release lumbar plexus, percutaneous approach.
01N94ZZ	Release lumbar plexus, percutaneous endoscopic approach.
01NA0ZZ	Release lumbosacral plexus, open approach.
01NA3ZZ	Release lumbosacral plexus, percutaneous approach.
01NA4ZZ	Release lumbosacral plexus, percutaneous approach.
01NB0ZZ	Release lumbar nerve, open approach.
01NB3ZZ	Release lumbar nerve, percutaneous approach.
01NB4ZZ	Release lumbar nerve, percutaneous endoscopic approach.

We are inviting public comments on our proposal.

d. Lordosis

An ICD–10 replication issue involving four diagnosis codes related to lordosis (excessive curvature of the lower spine) was discovered in MS–DRGs 456, 457, and 458 (Spinal Fusion Except Cervical with Spinal Curvature or Malignancy or Infection or Extensive Fusions with MCC, with CC, and without CC/MCC). These MS–DRGs contain specific logic that requires a principal diagnosis describing a spinal curvature, a malignancy, or infection or a secondary diagnosis that describes a spinal curvature disorder related to another condition.

Under the ICD–10 MS–DRGs Version 33, the following diagnosis codes were listed on the principal diagnosis list and the secondary diagnosis list for MS–DRGs 456, 457, and 458:

- M40.50 (Lordosis, unspecified, site unspecified);
- M40.55 (Lordosis, unspecified, thoracolumbar region);
- M40.56 (Lordosis, unspecified, lumbar region); and
- M40.57 (Lordosis, unspecified, lumbosacral region).

We are proposing to remove the above four diagnosis codes from the secondary diagnosis list. We also are proposing to maintain these same four codes in the logic for the principal diagnosis list. This proposed change for MS–DRGs 456, 457, and 458 would be effective October 1, 2016, in the ICD–10 MS–DRGs Version 34.

We are inviting public comments on our proposals.

9. MDC 13 (Diseases and Disorders of the Female Reproductive System): Pelvic Evisceration

In the ICD–10 MS–DRG Definitions Manual Version 33, the GROUPER logic for ICD–10 MS–DRGs 332, 333, and 334 (Rectal Resection with MCC, with CC and without CC/MCC, respectively) under MDC 6 (Diseases and Disorders of the Digestive System) and the GROUPER logic for MS–DRGs 734 and 735 (Pelvic Evisceration, Radical Hysterectomy and Radical Vulvectomy with CC/MCC and without CC/MCC, respectively) under MDC 13 (Diseases and Disorders of the Female Reproductive System) include a ''cluster'' of ICD–10–PCS procedure codes that describe pelvic evisceration. A ''cluster'' is the term used to describe a circumstance when a combination of ICD–10–PCS procedure codes is needed to fully satisfy the equivalent meaning of an ICD–9–CM procedure code for it to be considered a plausible code translation. The code cluster in MS–DRGs 332, 333, and 334 and MS–DRGs 734 and 735 is shown in the table below.

ICD–10–PCS procedure code in cluster	Description
0TTB0ZZ	Resection of bladder, open approach.
0TTD0ZZ	Resection of urethra, open approach.
0UT20ZZ	Resection of bilateral ovaries, open approach.
0UT70ZZ	Resection of bilateral fallopian tubes, open approach.
0UT90ZZ	Resection of uterus, open approach.
0UTC0ZZ	Resection of cervix, open approach.
0UTG0ZZ	Resection of vagina, open approach.

Pelvic evisceration (or exenteration) is a procedure performed to treat gynecologic cancers (cervical, uterine, vulvar, and vaginal, among others) and involves resection of pelvic structures such as the procedures described by the cluster of procedure codes listed above.

Under the ICD–9–CM MS–DRGs Version 32, procedure code 68.8 (Pelvic evisceration) was used to report pelvic evisceration. ICD–9–CM procedure code 68.8 also was assigned to ICD–9–CM MS–DRGs 332, 333, and 334 and MS–DRGs 734 and 735 in MDCs 6 and 13, respectively. The inclusion term in the ICD–9–CM Tabular List of Diseases for pelvic evisceration (procedure code 68.8) was ''Removal of ovaries, tubes, uterus, vagina, bladder, and urethra (with removal of sigmoid colon and rectum).'' In the ICD–9–CM Tabular List, the terms shown in parentheses are called a ''non-essential modifier''. A ''non-essential modifier'' is used in the classification to identify a supplementary word that may, or may not, be present in the statement of a disease or procedure. In other words, the terms in parentheses do not have to be documented to report the code.

Because the removal of sigmoid colon and the removal of rectum were classified as non-essential modifiers under ICD–9–CM, documentation that identified that removal of those body sites occurred was not required to report the procedure code describing pelvic evisceration (procedure code 68.8). In other words, when a pelvic evisceration procedure was performed and included removal of other body sites (ovaries and tubes, among others) listed in the

inclusion term, *absent* the terms in parentheses, procedure code 68.8 could be reported and grouped appropriately to MDC 13 under MS–DRGs 734 and 735. When a pelvic evisceration procedure was performed and removal of the body sites listed in the inclusion term occurred, *including* the terms in parentheses, procedure code 68.8 could be reported and grouped appropriately to MDC 6 under MS–DRGs 332 through 334.

Under ICD–10–PCS, users are instructed to code separately the organs or structures that are actually removed and for which there is a distinctly defined body part. Therefore, the case of a patient who undergoes a pelvic evisceration (exenteration) that involves the removal of the sigmoid colon and rectum would have each of those procedure sites (sigmoid colon and rectum) coded and reported separately (in addition to the procedure codes displayed in the cluster). In this scenario, if the principal diagnosis is a condition from the MDC 6 diagnosis list, the case would group to MS–DRGs 332, 333, and 334, regardless of the code cluster. In other words, it would not be necessary to retain the code cluster describing procedures performed on female pelvic organs in MDC 6.

Therefore, for FY 2017, we are proposing to remove the procedure code cluster for pelvic evisceration procedures from MDC 6 under the ICD–10 MS–DRGs Version 34. The cluster would remain in ICD–10 MDC 13 under MS–DRGs 734 and 735 only. We are inviting public comments on our proposal.

10. MDC 19 (Mental Diseases and Disorders): Proposed Modification of Title of MS–DRG 884 (Organic Disturbances and Mental Retardation)

We received a request to change the title of MS–DRG 884 (Organic Disturbances and Mental Retardation) under MDC 19 (Mental Diseases and Disorders) to ''MS–DRG 884 (Organic Disturbances and Intellectual Disability)'' to reflect more recent terminology used to appropriately describe the latter medical condition in the MDC.

We agree with the requestor that the reference to the phrase ''Mental Retardation'' should be changed to ''Intellectual Disability'', to reflect the current terminology used to describe the condition. Therefore, we are proposing to change the title of MS–DRG 884 as requested by the requestor.

We are inviting public comments on our proposal to change the title of MS–DRG 884 from ''Organic Disturbances and Mental Retardation'' to ''Organic Disturbances and Intellectual Disability'', effective October 1, 2016, in the ICD–10 MS–DRGs Version 34.

11. MDC 23 (Factors Influencing Health Status and Other Contacts With Health Services): Logic of MS–DRGs 945 and 946 (Rehabilitation With and Without CC/MCC, Respectively)

We received several requests to examine the MS–DRG logic for MS–DRGs 945 and 946 (Rehabilitation with CC/MCC and without CC/MCC, respectively). The requestors were concerned that ICD–9–CM codes that clearly identified an encounter for rehabilitation services such as procedure codes V57.89 (Care involving other specified rehabilitation procedure) and V57.9 (Care involving unspecified rehabilitation procedure) were not included in ICD–10–CM Version 33. In addition, the requestors pointed out that ICD–10–CM has significantly changed the guidelines for coding of admissions/encounters for rehabilitation. The requestors pointed out that under ICD–9–CM, Section I.B.15. of the Official Guidelines for Coding and Reporting indicates that ''when the purpose for the admission/encounter is rehabilitation, sequence the appropriate V code from category V57, Care involving use of rehabilitation procedures, as the principal/first listed diagnosis.'' The requestors stated that the concept of the ICD–9–CM category V57 codes is no longer valid in ICD–10–CM and the guidelines have been revised to provide greater specificity. Instead, the requestors added, the ICD–10–CM guidelines state in Section II.K., ''When the purpose for the admission/encounter is rehabilitation, sequence first the code for the condition for which the service is being performed. For example, for an admission/encounter for rehabilitation for right-sided dominant hemiplegia following a cerebrovascular infarction, report code I69.351, Hemiplegia and hemiparesis following cerebral infarction affecting right dominant side, as the first-listed or principal diagnosis.''

Given this lack of ICD–10–CM codes to indicate that the reason for the encounter was for rehabilitation, some requesters asked that CMS review ICD–10–CM codes for conditions requiring rehabilitation (such as codes from category I69) and add them to MS–DRGs 945 and 946 when rehabilitation services are provided in order to replicate the logic found in the ICD–9–CM MS–DRG GROUPER. The requestors did not suggest any specific ICD–10–CM codes to add to MS–DRGs 945 and 946.

One requestor made a specific recommendation for updating MS–DRGs 945 and 946. The requestor previously recommended that CMS review diagnosis codes in ICD–10–CM category I69 for possible addition to MS–DRGs 945 and 946. The requestor stated that, upon further review, they believe that a great number of diagnosis codes beyond sequelae of stroke (ICD–10–CM category I69) would need to be added in order to replicate the logic of the ICD–9–CM MS–DRGs. Therefore, they modified their recommendation as follows:

- Designate MS–DRGs 945 and 946 as pre-major diagnostic categories (Pre-MDC) MS–DRGs so that cases are grouped to these MS–DRGs on the basis of the procedure code rather than the principal diagnosis. The requestor stated that the ICD–10–PCS rehabilitation codes (Section F, Physical Rehabilitation and Diagnostic Audiology, Body system 0, Rehabilitation) should be used to group cases to MS–DRGs 945 and 946 similar to how the MS–DRG GROUPER logic currently treats lung transplants and tracheostomies. This would ensure that the rehabilitation procedure codes drive the MS–DRG assignment.
- Revise ICD–10–PCS Official Guidelines for Coding and Reporting and designate that the ICD–10–PCS rehabilitation codes be used only for admissions for rehabilitation therapy.

We acknowledge that ICD–10–CM does not have clear diagnosis codes that indicate the reason for the encounter was for rehabilitation services. For that reason, CMS had to modify the MS–DRG logic using ICD–10–PCS procedure codes to assign these cases to MS–DRGs 945 and 946. The logic used in MS–DRGs 945 and 946 is shown in the Definitions Manual Version 33, which is posted on the CMS Web site at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2016-IPPS-Final-Rule-Home-Page-Items/FY2016-IPPS-Final-Rule-Data-Files.html?DLPage=1&DLEntries=10&DLSort=0&DLSortDir=ascending*. We also posted a Frequently Asked Question section to explain how inpatient admissions are assigned to MS–DRGs 945 and 946, which is posted on the CMS Web site at: *https://questions.cms.gov/faq.php?id=5005&faqId=12548*. As indicated in the Frequently Asked Question section, the ICD–10–CM codes required a different approach to make sure the same cases captured with ICD–9–CM codes would be captured with ICD–10–CM codes. As stated earlier, ICD–10–CM does not contain specific codes for encounters for rehabilitation such as ICD–9–CM procedure codes V57.89 and V57.9. In order to replicate the ICD–9–CM MS–DRG logic using ICD–10–CM and ICD–

10–PCS codes, CMS developed the new logic included in the MS–DRG Version 33 Definitions Manual.

The Frequently Asked Question section explains that, in order to be assigned to ICD–10 MS–DRG 945 or 946, a case must first have a principal diagnosis from MDC 23 (Factors Influencing Health Status and Other Contacts with Health Services), where MS–DRGs 945 and 946 are assigned. This is currently the logic with the ICD–9–CM MS–DRGs Version 33 where one would first have to have a MDC 23 principal diagnosis. A complete list of ICD–10–CM principal diagnoses for MDC 23 can be found in the ICD–10 MS–DRGs Version 33 Definitions Manual which is posted on the FY 2016 IPPS Final Rule Home Page under the link for the FY 2016 Final Rule Data Files at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2016-IPPS-Final-Rule-Home-Page-Items/FY2016-IPPS-Final-Rule-Data-Files.html*. Look under the Related Links section and select the ICD–10–CM/PCS MS–DRG v33 Definitions Manual Table of Contents Full Titles HTML Version file. Open this file and the Table of Contents page will appear. Click on the link for MDC 23 (Factors Influencing Health Status and Other Contacts with Health Services). On the next page that opens (MDC 23), click on the link titled ''MDC 23 Assignment of Diagnosis Codes'' on the upper left side of the screen. By using the navigation arrows at the top right hand side of the page, users can review the 24 pages listing all of the principal diagnosis codes assigned to MDC 23, including many injury codes for subsequent encounters.

Under the GROUPER Logic, cases are assigned to MS–DRGs 945 and 946 in one of two ways as described in the Definitions Manual as follows:

- The encounter has a principal diagnosis code Z44.8 (Encounter for fitting and adjustment of other external prosthetic devices) or Z44.9 (Encounter for fitting and adjustment of unspecified external prosthetic device). Both of these codes are included in the list of principal diagnosis codes assigned to MDC 23.
- The encounter has an MDC 23 principal diagnosis code and one of the rehabilitation procedure codes listed under MS–DRGs 945 and 946.

If the case does not have a principal diagnosis code from the MDC 23 list, but does have a procedure code from the list included under the Rehabilitation Procedures for MS–DRGs 945 and 946, the case will not be assigned to MS–DRGs 945 or 946. The case will instead be assigned to a MS–DRG within the MDC where the principal diagnosis code is found.

Example: The encounter has a principal diagnosis code of S02119D (Unspecified fracture of occiput, subsequent encounter for fracture with routine healing). This code is included in MDC 8. Therefore, diagnosis code S02119D and a procedure code from the MS–DRG 945 and 946 Rehabilitation Procedure list, such as procedure code F0706GZ (Therapeutic Exercise Treatment of Neurological System—Head and Neck using Aerobic Endurance and Conditioning Equipment) would not lead to assignment of the case to MS–DRGs 945 and 946 because the principal diagnosis code is not included in MDC 23.

Diagnosis code S02119D is included in MDC 8 as was the ICD–9–CM predecessor code, V54.19 (Aftercare for healing traumatic fracture of other bone). Therefore, these cases would be assigned to MS–DRGs 559, 560, and 561 (Aftercare, Musculoskeletal System and Connective Tissue with MCC, with CC, and without MCC/CC, respectively) within MDC 8.

At this time, we do not have any claims data that indicate how well this MS–DRG logic is working. We are hesitant to simply add more codes from category I69 without evaluating the impact of doing so using claims data. We also do not have claims data to indicate whether or not there have been changes in the types or numbers of cases assigned to MS–DRGs 945 and 946. We welcome specific suggestions of codes to be added to MS–DRGs 945 and 946 based on hospitals' experience in coding these cases. We would evaluate these suggestions once we have claims data to study the impact.

We have major concerns about the recommendation to revise the ICD–10–PCS Official Guidelines for Coding and Reporting and designate that the ICD–10–PCS rehabilitation codes be assigned and reported only for admissions for rehabilitation therapy. This would be a major new precedent for developing coding and reporting guidelines based on one specific payer's payment polices, in this case Medicare inpatient acute care prospective payment system policies. Hospitals would need to know who the payer was prior to knowing whether or not they could assign a code for a rehabilitation service that they provided. If those payment policies change, the hospital coder would need to be aware of those changes in order to determine whether or not they could submit a code that captures the fact that a rehabilitation service was provided. CMS has worked with the Centers for Disease Control and Prevention (CDC), the American Hospital Association (AHA), and the American Health Information Management Association (AHIMA) to make ICD–10–PCS guidelines generic and applicable to all types of inpatient facilities and for all payer types. The current ICD–10–PCS Guidelines for Coding and Reporting do not support this recommendation that rehabilitation services could only be coded and reported if the admission was specifically for rehabilitation therapy. The ICD–10–PCS codes were created to accurately capture services provided.

We also have concerns about designating MS–DRGs 945 and 946 as pre-MDCs so that cases are grouped to these MS–DRGs on the basis of a rehabilitation procedure code rather than a principal diagnosis. Pre-MDCs were an addition to Version 8 of the Diagnosis Related Groups. This was the first departure from the use of principal diagnosis as the initial variable in DRG and subsequently MS–DRG assignment. For Pre-MDC DRGs, the initial step in DRG assignment was not the principal diagnosis, but was instead certain surgical procedures with extremely high costs such as heart transplant, liver transplant, bone marrow transplant, and tracheostomies performed on patients on long-term ventilation. These types of services were viewed as being very resource intensive. Recognizing these resource intensive services and assigning them to one of the high-cost MS–DRGs assures appropriate payment even if the patient is admitted for a variety of principal diagnoses. We believe it is inappropriate to consider rehabilitation services in the same group as high-cost procedures such as heart transplants. There is the significant potential of patients being classified out of higher paying surgical MS–DRGs in other MDCs and into the lower paying MS–DRGs 945 and 946 based on the reporting of a rehabilitation procedure code if these MS–DRGs are moved to the Pre-MDCs. We examined claims data for cases reporting a rehabilitation therapy code and found cases assigned to a wide variety of both medical and surgical MS–DRGs. The current coding and reporting of rehabilitation procedure codes for services provided suggest the potential of significant payment problems if MS–DRGs 945 and 946 were assigned to the Pre-MDC section and the reporting of cases with a rehabilitation code led to an inappropriate reassignment to the lower paying medical MS–DRGs 945 and 946.

The following are only a few examples of current claims data that showed the hospital reported a rehabilitation therapy procedure code for services provided which did not impact the MS–DRG assignment. Under the suggested approach of making MS–

DRGs 945 and 946 a Pre-MDC, these cases would move from the appropriately assigned MS–DRGs which may have significantly higher average costs, to MS–DRGs 945 and 946, which have much lower average costs. Based on claims data from the December 2015 update of the FY 2015 MedPAR file, the average costs for cases reported in MS–DRGs 945 and 946 were $8,531 and $8,411, respectively.

Examples of cases reporting a rehabilitation therapy code that would move to MS–DRGs 945 and 946 based on the suggested logic change are as follows:

- An MS–DRG 460 (Spinal Fusion Except Cervical with MCC) case with average costs of $42,390;
- An MS–DRG 464 (Wound Debridement and Skin Graft Excluding Hand, for Musculoskeletal Tissue Disease with CC) case with average costs of $55,633;
- An MS–DRG 579 (Other Skin, Subcutaneous Tissue and Breast Procedure with MCC) case with average costs of $63,834;
- An MS–DRG 854 (Infectious and Parasitic Diseases with O.R. procedure with MCC) case with average costs of $62,455; and
- An MS–DRG 021 (Intracranial Vascular Procedures with Principal Diagnosis of Hemorrhage with CC) case with average costs of $90,522.

Our clinical advisors reviewed this issue and agreed that we should wait for ICD–10 claims data to become available prior to proposing updates to MS–DRGs 945 and 946. They did not support adding MS–DRGs 945 and 946 to the Pre-MDCs because the rehabilitation services are not as resource intensive as are the other MS–DRGs in the Pre-MDC section.

Considering these ICD–10–PCS guideline concerns, the structure of the pre-MDC section, and the lack of any ICD–10 claims data for MS–DRGs 945 and 946, we are proposing to maintain the current structure of MS–DRGs 945 and 946 and reconsider the issue when ICD–10 claims data become available and prior to proposing any updates.

We are inviting public comments on our proposal to maintain the current structure of MS–DRGs 945 and 946.

12. Proposed Medicare Code Editor (MCE) Changes

The Medicare Code Editor (MCE) is a software program that detects and reports errors in the coding of Medicare claims data. Patient diagnoses, procedure(s), and demographic information are entered into the Medicare claims processing systems and are subjected to a series of automated screens. The MCE screens are designed to identify cases that require further review before classification into an MS–DRG.

In the FY 2016 IPPS/LTCH PPS final rule (80 FR 49409 through 49412), we finalized the ICD–10 Definitions of Medicare Code Edits (ICD–10 MCE) Version 33. ICD–10 MCE Version 33 was based on the FY 2015 ICD–9–CM MCE Version 32 and the draft ICD–10 MCE Version 32 that had been made publicly available for comments in November 2014 on the ICD–10 MS–DRG Conversion Project Web site at: *https://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*. In August 2015, we posted the finalized FY 2016 ICD–10 MCE Version 33 manual file and an ICD–9–CM MCE Version 33.0A manual file (for analysis purposes only). The links to these MCE manual files, along with the links to purchase the mainframe and computer software for the MCE Version 33 (and ICD–10 MS–DRGs) were posted on the CMS Web site through the FY 2016 IPPS Final Rule Home Page at: *https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2016-IPPS-Final-Rule-Home-Page.html?DLSort=0&DLEntries=10&DLPage=1&DLSortDir=ascending*.

After implementation of the ICD–10 MCE Version 33, we received several requests to examine specific code edit lists that the requestors believed were incorrect and that affected claims processing functions. We received requests to review the MCE relating specifically to the Age conflict edit, the Sex conflict edit, the Non-covered procedure edit, and the Unacceptable principal diagnosis code edit. We discuss these code edit issues below.

a. Age Conflict Edit

In the MCE, the Age conflict edit exists to detect inconsistencies between a patient's age and any diagnosis on the patient's record; for example, a 5-year-old patient with benign prostatic hypertrophy or a 78-year-old patient coded with a delivery. In these cases, the diagnosis is clinically and virtually impossible for a patient of the stated age. Therefore, either the diagnosis or the age is presumed to be incorrect. Currently, in the MCE, the following four age diagnosis categories appear under the Age conflict edit and are listed in the manual and written in the software program:

- Newborn—Age of 0 years; a subset of diagnoses intended only for newborns and neonates (*e.g.,* fetal distress, perinatal jaundice).
- Pediatric—Age is 0–17 years inclusive (*e.g.,* Reye's syndrome, routine child health exam).
- Maternity—Age range is 12–55 years inclusive (*e.g.,* diabetes in pregnancy, antepartum pulmonary complication).
- Adult—Age range is 15–124 years inclusive (*e.g.,* senile delirium, mature cataract).

(1) Newborn Diagnosis Category

Under the ICD–10–CM Official Guidelines for Coding and Reporting (available on the Web site at: *https://www.cms.gov/Medicare/Coding/ICD10/2016-ICD-10-CM-and-GEMs.html*), there are general guidelines and chapter-specific coding guidelines. The chapter-specific guidelines state that diagnosis codes from Chapter 16 (Certain Conditions Originating in the Perinatal Period) may be reported throughout the life of the patient if the condition is still present. The requestors noted that several codes from this Chapter 16 appear on the ICD–10 MCE Version 33 Age conflict edit for the newborn diagnosis category. Codes from this chapter are included in the P00 through P96 code range. Therefore, the requestors believed that because the chapter-specific guidelines state that codes within this chapter may be reported throughout the life of a patient, all codes within this range (P00 through P96) should be removed from the newborn diagnosis category on the Age conflict edit code list.

We examined the newborn diagnosis category on the age conflict edit list in the ICD–9–CM MCE Version 32 in comparison to the ICD–9–CM chapter-specific guidelines. Under ICD–9–CM, Chapter 15 (Certain Conditions Originating in the Perinatal Period) includes codes within the 760 through 779 range. We found that the same chapter-specific guideline under ICD–10 exists under ICD–9–CM: Diagnosis codes from Chapter 15 may be reported throughout the life of the patient if the condition is still present. Similar to the ICD–10 MCE Version 33 newborn diagnosis category in the Age conflict edit code list, we noted that several codes from this Chapter 15 appear on the ICD–9–CM MCE Version 32 Age conflict edit for the newborn diagnosis category.

Because the full definition of the chapter-specific guideline for ''Certain Conditions Originating in the Perinatal Period'' clearly states the codes within the chapter may be reported throughout the life of the patient *if the condition is still present,* we believe that, historically, under ICD–9–CM, this was the rationale for inclusion of the

diagnosis codes that were finalized for the newborn diagnosis category under the Age conflict edit (in code range 760 through 779). For example, under ICD–9–CM, there are four diagnosis codes in the 760.6x series that specifically include the term ''newborn'' in the title. These diagnosis codes are:

- 760.61 (Newborn affected by amniocentesis);
- 760.62 (Newborn affected by other in utero procedure);
- 760.63 (Newborn affected by other surgical operations on mother during pregnancy); and
- 760.64 (Newborn affected by previous surgical procedure on mother not associated with pregnancy).

Under the ICD–9–CM classification, the chapter-specific guidelines in Chapter 15 (Certain Conditions Originating in the Perinatal Period) state that, for coding and reporting purposes, the perinatal period is defined as before birth through the 28th day following birth. As such, for coding and reporting purposes, a patient that is beyond the 28th day of life is no longer considered a newborn. Therefore, we believe that the diagnosis codes listed on the newborn diagnosis category in the Age conflict edit code list are, in fact, appropriate because they identify what the title of Chapter 15 describes (certain conditions specific to beginning in the perinatal period); that is, a newborn. The intent of the diagnosis codes included on the Age conflict edit code list is to identify claims where any one of the listed diagnoses is reported for a patient who is beyond the 28th day of life. If that definition is met according to the patient's date of birth, the edit is correctly triggered in those cases.

Transitioning to the ICD–10 MCE was based on replication of the ICD–9–CM based MCE (in parallel with the transition to the ICD–10 MS–DRGs, which was based on replication of the ICD–9–CM MS–DRGs). Therefore, the diagnosis codes included in the newborn diagnosis category on the Age conflict edit code list in the ICD–10 MCE are a replication of the diagnosis code descriptions included on the newborn diagnosis category on the Age conflict edit code list under the ICD–9–CM MCE. However, the chapter-specific guideline in ICD–10–CM Chapter 16, section C.16.e. (Low birth weight and immaturity status), specifies that codes within category P07 (Disorders of newborn related to short gestation and low birth weight, not elsewhere classified) are for use for a child or adult who was premature or had a low birth weight as a newborn and this condition is affecting the patient's current health status. Therefore, we agree that codes within the range of P07.00 through P07.39 should not be listed under newborn diagnosis category on the Age conflict edit code list in the ICD–10 MCE. It is unclear why this range of codes within category P07 is distinguished separately when under the General Perinatal Rules for Chapter 16 (Certain Conditions Originating in the Perinatal Period), section I.C.16.a.1. states that diagnosis codes from Chapter 16 may be reported throughout the life of the patient if the condition is still present. In addition, the guideline at section I.C.16.a.4. states that ''should a condition originate in the perinatal period, and continue throughout the life of the patient, the perinatal code should continue to be used regardless of the patient's age.'' According to these general guidelines, we could assume that potentially *all* codes within Chapter 16 in the code range of P00 through P96 should be considered for removal from the newborn diagnosis category on the Age conflict edit code list. However, a subsequent section of Chapter 16, section 1.C.16.c.2. (Codes for conditions specified as having implication for future health care needs), instructs users to assign codes for conditions that have been specified by the provider as having implications for future health care needs. Immediately below that instruction is a note which states: ''This guideline should not be used for adult patients.''

The ICD–10–CM Official Guidelines for Coding and Reporting are updated separately from the IPPS rulemaking process. Due to the confusion with the chapter-specific guidelines for codes in Chapter 16 and how they impact the newborn diagnosis category on the Age conflict edit code list, we believe it would be beneficial to fully evaluate the intent of these guidelines with the Centers for Disease Control's (CDC's) National Center for Health Statistics (NCHS) because NCHS has the lead responsibility for the ICD–10–CM diagnosis codes.

In the meantime, to address claims processing concerns related to the newborn diagnosis category on the Age conflict edit code list, we are proposing to remove all the ICD–10–CM diagnoses in the code range of P00 through P96 from the newborn diagnosis category in the Age conflict code edit list for the ICD–10 MCE for FY 2017. We are inviting public comments on our proposal. We also are soliciting public comments on the appropriateness of the other diagnosis codes currently listed under the newborn diagnosis category in the Age conflict edit in the ICD–10 MCE Version 33. We refer readers to Table 6P.1a. associated with this proposed rule (which is available via the Internet on the CMs Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) for review of the diagnosis codes we are proposing to remove. In addition, for FY 2017, we are examining the need to revise the description for the newborn diagnosis category in the Age conflict edit under the MCE. The current description as written, Newborn—Age of 0 years; a subset of diagnoses intended only for newborns and neonates (*e.g.,* fetal distress, perinatal jaundice), is not consistent with the instructions for reporting the diagnosis codes in Chapter 16. We are inviting public comments on our proposal to revise the description of the newborn diagnosis category in the Age conflict edit under the MCE.

(2) Pediatric Diagnosis Category

Under the ICD–10 MCE Version 33, the pediatric diagnosis category for the Age conflict edit considers the age range of 0 to 17 years inclusive. For that reason, the diagnosis codes on this Age conflict edit list would be expected to apply to conditions or disorders specific to that age group only. The code list for the pediatric diagnosis category in the Age conflict edit currently includes 12 diagnosis codes that fall within the F90 through F98 code range. These codes were included as a result of replication from the ICD–9–CM MCE Version 32 and the draft ICD–10 MCE Version 32.

We received a request to review the 12 ICD–10–CM diagnosis codes listed in the following table because they appear to conflict with guidance in the ICD–10–CM classification:

ICD–10–CM diagnosis code	Description
F93.0	Separation anxiety disorder of childhood.
F93.8	Other childhood emotional disorders.
F93.9	Childhood emotional disorder, unspecified.

ICD–10–CM diagnosis code	Description
F94.1	Reactive attachment disorder of childhood.
F94.2	Disinhibited attachment disorder of childhood.
F94.8	Other childhood disorders of social functioning.
F94.9	Childhood disorder of social functioning, unspecified.
F98.21	Rumination disorder of infancy.
F98.29	Other feeding disorders of infancy and early childhood.
F98.3	Pica of infancy and childhood.
F98.8	Other specified behavioral and emotional disorders with onset usually occurring in childhood and adolescence.
F98.9	Unspecified behavioral and emotional disorders with onset usually occurring in childhood and adolescence.

Under the ICD–10–CM Tabular List of Diseases and Injuries, Chapter 5 (Mental, Behavioral and Neurodevelopmental Disorders) contains a section titled ''Behavioral and emotional disorders with onset usually occurring in childhood and adolescence'' which includes codes for the F90 to F98 code range. At the beginning of this tabular section is an instructional ''note'' that states: ''Codes within categories F90–F98 may be used regardless of the age of a patient. These disorders generally have onset within the childhood or adolescent years, but may continue throughout life or not be diagnosed until adulthood.''

Because the note specifically states that these codes may be used regardless of the age of a patient, we believe they should not be included on the pediatric diagnosis category on the Age conflict edit code list. Therefore, we are proposing to remove the 12 codes that fall within the F90 through F98 code range currently listed for the pediatric diagnosis category on the ICD–10 MCE age conflict edit code list, effective October 1, 2016, for FY 2017. We are inviting public comments on our proposal.

We also received a request to review whether another group of diagnosis codes is clinically incorrect for the ICD–10 MCE Version 33 pediatric diagnosis category in the Age conflict edit. The requestor stated that ICD–10–CM diagnosis codes describing infantile and juvenile cataracts, by their titles, appear to merit inclusion on the pediatric diagnosis category on the Age conflict edit code list. However, according to the requestor, the diagnosis is not constrained to a patient's age, but rather the ''infantile'' versus ''juvenile'' reference is specific to the type of cataract the patient has. These diagnosis codes that are currently listed for the pediatric diagnosis category in the ICD–10 MCE Age conflict edit code list are as follows:

ICD–10–CM diagnosis code	Description
H26.001	Unspecified infantile and juvenile cataract, right eye.
H26.002	Unspecified infantile and juvenile cataract, left eye.
H26.003	Unspecified infantile and juvenile cataract, bilateral.
H26.009	Unspecified infantile and juvenile cataract, unspecified eye.
H26.011	Infantile and juvenile cortical, lamellar, or zonular cataract, right eye.
H26.012	Infantile and juvenile cortical, lamellar, or zonular cataract, left eye.
H26.013	Infantile and juvenile cortical, lamellar, or zonular cataract, bilateral.
H26.019	Infantile and juvenile cortical, lamellar, or zonular cataract, unspecified eye.
H26.031	Infantile and juvenile nuclear cataract, right eye.
H26.032	Infantile and juvenile nuclear cataract, left eye.
H26.033	Infantile and juvenile nuclear cataract, bilateral.
H26.039	Infantile and juvenile nuclear cataract, unspecified eye.
H26.041	Anterior subcapsular polar infantile and juvenile cataract, right eye.
H26.042	Anterior subcapsular polar infantile and juvenile cataract, left eye.
H26.043	Anterior subcapsular polar infantile and juvenile cataract, bilateral.
H26.049	Anterior subcapsular polar infantile and juvenile cataract, unspecified eye.
H26.051	Posterior subcapsular polar infantile and juvenile cataract, right eye.
H26.052	Posterior subcapsular polar infantile and juvenile cataract, left eye.
H26.053	Posterior subcapsular polar infantile and juvenile cataract, bilateral.
H26.059	Posterior subcapsular polar infantile and juvenile cataract, unspecified eye.
H26.061	Combined forms of infantile and juvenile cataract, right eye.
H26.062	Combined forms of infantile and juvenile cataract, left eye.
H26.063	Combined forms of infantile and juvenile cataract, bilateral.
H26.069	Combined forms of infantile and juvenile cataract, unspecified eye.
H26.09	Other infantile and juvenile cataract.

Our clinical advisors reviewed the list of diagnoses presented above and confirmed that these diagnosis codes are appropriate to include in the ICD–10 MCE for the pediatric diagnosis category in the Age conflict edit because the diseases described by these codes are typically diagnosed in early childhood and treated very rapidly to prevent amblyopia. Therefore, for FY 2017, we are not proposing to remove these codes under the pediatric diagnosis category in the Age conflict edit. We are proposing to maintain this list in the ICD–10 MCE Version 34, effective October 1, 2016. We are inviting public comments on our proposal.

As stated earlier, for the pediatric diagnosis category in the Age conflict edit, the MCE considers the age range of 0 through 17 years inclusive. In the ICD–10 MCE Version 33, there are four diagnosis codes describing the body

mass index (BMI) for pediatric patients in the pediatric diagnosis category on the Age conflict edit code list. The four ICD–10–CM diagnosis codes describing the BMI percentiles for pediatric patients are as follows:

ICD–10–CM diagnosis code	Description
Z68.51	Body mass index (BMI) pediatric, less than 5th percentile for age.
Z68.52	Body mass index (BMI) pediatric, 5th percentile to less than 85th percentile for age.
Z68.53	Body mass index (BMI) pediatric, 85th percentile to less than 95th percentile for age.
Z68.54	Body mass index (BMI) pediatric, greater than or equal to 95th percentile for age.

Under the ICD–10–CM Tabular List of Diseases and Injuries, the BMI pediatric diagnosis codes are designated for use in persons 2 through 20 years of age. The percentiles are based on the growth charts published by the CDC. As a result of the age discrepancy between the MCE pediatric diagnosis category in the Age conflict edit (ages 0 through 17) and the Tabular reference for the BMI pediatric codes (ages 2 through 20), we are proposing to remove ICD–10 diagnosis codes Z68.51, Z68.52, Z68.53, and Z68.54 from the ICD–10 MCE pediatric diagnosis category on the Age conflict edit code list for Version 34, effective FY 2017. We are inviting public comments on our proposal.

One requestor also asked that CMS review the ICD–10–CM diagnosis codes currently included in ICD–10–CM category R62 (Lack of expected normal physiological development in childhood and adults) series. Specifically, the requestor noted that there are adult patients diagnosed with the conditions in subcategory R62.5 (Other and unspecified lack of expected normal physiological development in childhood) and that three of these conditions also were listed in the ICD–10 MCE Version 33 pediatric diagnosis category on the Age conflict edit code list. These three diagnosis codes are:

- R62.50 (Unspecified lack of expected normal physiological development in childhood);
- R62.52 (Short stature (child)); and
- R62.59 (Other lack of expected normal physiological development in childhood).

We acknowledge that subcategory R62.5 can be confusing with regard to how to appropriately report a condition diagnosed for an adult when the titles reference the terms ''child'' or ''childhood''. Therefore, we consulted with the ICD–10–CM classification staff at the NCHS to determine the intended use and reporting of the diagnosis codes R62.50, R62.52, and R62.59. The NCHS staff agreed that the three diagnosis codes should not be restricted to the pediatric ages as defined by the MCE. The NCHS staff stated the codes are appropriate to report for adult patients, noting that if a patient is diagnosed with short stature as a child, the patient could very well carry over that diagnosis into adulthood.

During our review of the issue relating to the subcategory R62.5 pediatric diagnosis category on the Age conflict edit code list, we identified another diagnosis code that also appeared appropriate to report for an adult patient. ICD–10–CM diagnosis code Y93.6A (Activity, physical games generally associated with school recess, summer camp and children) is one of several activity codes included in ICD–10–CM Chapter 20 (External Causes of Morbidity). This diagnosis code includes games such as dodge ball and captures the flag, which one can reasonably expect an adult to be engaged in for physical activity.

We discussed this diagnosis code with the NCHS staff to receive their input on the intent for coding and reporting the code. They agreed that ICD–10–CM diagnosis code Y93.6A is applicable for adults as well as children. Therefore, for FY 2017, we are proposing to remove ICD–10–CM diagnosis codes R62.50, R62.52, and R62.59 in subcategory R62.5 and ICD–10–CM diagnosis code Y93.6A from the ICD–10 MCE pediatric diagnosis category on the Age conflict edit code list. We are inviting public comment on our proposal.

b. Sex Conflict Edit

In the MCE, the Sex conflict edit detects inconsistencies between a patient's sex and any diagnosis or procedure on the patient's record; for example, a male patient with cervical cancer (diagnosis) or a female patient with a prostatectomy (procedure). In both instances, the indicated diagnosis or the procedure conflicts with the stated sex of the patient. Therefore, the patient's diagnosis, procedure, or sex is presumed to be incorrect.

We received a request to review ICD–10–CM diagnosis code Z79.890 (Hormone replacement therapy (postmenopausal)). This code is listed on the Diagnoses for females only edit code list. Therefore, when the diagnosis is reported for a male patient, the edit will be triggered. However, the requester noted that the term ''postmenopausal'' is enclosed in parentheses and is a ''non-essential modifier.'' A ''non-essential modifier'' is used in the ICD–10–CM classification to identify a supplementary word that may, or may not be present in the statement of a disease or procedure. In other words, the term in parentheses does not have to be documented to report the code. If the medical record documentation states a female patient is undergoing hormone replacement therapy, the documentation supports assignment of the case to ICD–10–CM diagnosis code Z79.890 (Hormone replacement therapy (postmenopausal)). There does not need to be a diagnostic statement that the patient is postmenopausal to assign the code. The requester asked that CMS review why this diagnosis code is being classified as applicable to females only because, in the absence of the non-essential modifier (postmenopausal), the code could also apply to males.

We note that the ICD–9–CM equivalent code, V07.4 Hormone replacement therapy (postmenopausal) has been on the female only edit since October 1, 1992 in the ICD–9–CM MCE. We consulted with the ICD–10–CM classification staff at the NCHS to determine the intended use and reporting of this diagnosis code. The staff at NCHS acknowledged that, historically, the intent of the ICD–9–CM diagnosis code was for females only. However, they agreed that, under ICD–10–CM, the diagnosis code Z79.890 can be reported for both men and women. Therefore, we are proposing to remove this diagnosis code from the Diagnoses for females only edit code list effective October 1, 2016. We are inviting public comments on our proposal.

We also considered the ICD–10–CM diagnosis codes listed in the table below that are included on the Diagnoses for females only edit code list.

ICD–10–CM diagnosis code	Description
Z44.30	Encounter for fitting and adjustment of external breast prosthesis, unspecified breast.
Z44.31	Encounter for fitting and adjustment of external right breast prosthesis.
Z44.32	Encounter for fitting and adjustment of external left breast prosthesis).
Z45.811	Encounter for adjustment or removal of right breast implant.
Z45.812	Encounter for adjustment or removal of left breast implant.
Z45.819	Encounter for adjustment or removal of unspecified breast implant).

These codes describe encounters for breast implants or prostheses. Our clinical advisors and the NCHS staff agree that diagnosis codes Z44.30, Z44.31, Z44.32, Z45.811, Z45.812, and Z45.819 are clinically appropriate to report for male patients and should not be restricted to females. Therefore, we are proposing to remove these diagnosis codes from the Diagnoses for females only edit code list in the ICD–10 MCE, effective October 1, 2016. We are inviting public comments on our proposal.

c. Non-Covered Procedure Edit

In the MCE, the Non-covered procedure edit identifies procedures for which Medicare does not provide payment. Payment is not provided due to specific criteria that are established in the National Coverage Determination (NCD) process. We refer readers to the Web site at: *https://www.cms.gov/Medicare/Coverage/DeterminationProcess/howtorequestanNCD.html* for additional information on this process. In addition, there are procedures that would normally not be paid by Medicare but, due to the presence of certain diagnoses, are paid.

(1) Endovascular Mechanical Thrombectomy

We received several requests to review ICD–10–PCS procedure code 03CG3ZZ (Extirpation of matter from intracranial artery, percutaneous approach) which is currently listed as a non-covered procedure in the ICD–10 MCE Non-covered procedure edit code list. The comparable ICD–9–CM code translations for ICD–10–PCS code 03CG3ZZ are ICD–9–CM codes 17.54 (Percutaneous atherectomy of intracranial vessel(s)) and 39.74 (Endovascular removal of obstruction from head and neck vessel(s)).

The requestors noted that, under ICD–9–CM, endovascular mechanical thrombectomy of a cerebral artery to remove a clot that is causing an ischemic stroke was reported with procedure code 39.74 (Endovascular removal of obstruction from head and neck vessel(s)) and is a well-recognized procedure that has been covered by Medicare. After implementation of ICD–10 on October 1, 2015, claims that were correctly submitted for endovascular mechanical thrombectomy procedures with ICD–10–PCS procedure code 03CG3ZZ were triggering the Non-covered procedure edit. The requestors sought clarification as to whether there was a change in coverage or if there was a replication issue.

Under the ICD–9–CM MCE Version 32, procedure code 00.62 is listed on the Non-covered procedure edit code list. Percutaneous angioplasty of an intracranial vessel procedure (with and without stent) may be reported under ICD–10 with the ICD–10–PCS procedure codes listed in the following table:

ICD–10–PCS procedure code	Description
037G34Z	Dilation of intracranial artery with drug-eluting intraluminal device, percutaneous approach.
037G3DZ	Dilation of intracranial artery with intraluminal device, percutaneous approach.
037G3ZZ	Dilation of intracranial artery, percutaneous approach.
037G44Z	Dilation of intracranial artery with drug-eluting intraluminal device, percutaneous endoscopic approach.
037G4DZ	Dilation of intracranial artery with intraluminal device, percutaneous endoscopic approach.
037G4ZZ	Dilation of intracranial artery, percutaneous endoscopic approach.
057L3DZ	Dilation of intracranial vein with intraluminal device, percutaneous approach.
057L4DZ	Dilation of intracranial vein with intraluminal device, percutaneous endoscopic approach.

We discovered that a replication error occurred due to an outdated ICD–9–CM entry for procedure code 00.62. This error led to ICD–10–PCS procedure codes 03CG3ZZ (Extirpation of matter from intracranial artery, percutaneous approach) and 05CL3ZZ (Extirpation of matter from intracranial vein, percutaneous approach) being listed as comparable translations for ICD–9–CM code 00.62. As a result, ICD–10–PCS procedure code 03CG3ZZ was included on the ICD–10 MCE Version 33 Non-covered procedure edit code list.

For FY 2017, we are proposing to remove the ICD–10–PCS procedure codes listed in the following table from the ICD–10 MCE Version 34.0 Non-covered procedure edit code list.

ICD–10–PCS procedure code	Description
03CG3ZZ	Extirpation of matter from intracranial artery, percutaneous approach.
03CG4ZZ	Extirpation of matter from intracranial artery, percutaneous endoscopic approach.
05CL3ZZ	Extirpation of matter from intracranial vein, percutaneous approach.
05CL4ZZ	Extirpation of matter from intracranial vein, percutaneous endoscopic approach.

We are inviting public comments on our proposal.

(2) Radical Prostatectomy

We received a request to review ICD–10–PCS procedure codes related to a radical prostatectomy. Specifically, the requestor noted that when coding cases where the removal of the vas deferens is also performed, a Non-covered procedure edit is triggered. The requestor suggested that the edit for this procedure may be intended for cases where the removal of the vas deferens is being performed for sterilization (vasectomy) purposes. According to the requester, removal of the vas deferens also may be involved with removing the prostate in the radical prostatectomy procedure. The requestor suggested that CMS address this issue by revising the ICD–10 MCE Non-covered procedure edit code list to reflect non-coverage of the procedure codes when the removal of vas deferens procedure is being performed solely for sterilization (vasectomy) purposes.

Because radical procedures can have different meanings, depending on the procedure, the term ''radical'' is not always reliable information for coding and reporting the procedure. Under ICD–10–PCS, users are instructed to code separately the organs or structures that were actually removed and for which there is a distinctly defined body part. A radical prostatectomy is coded as a ''cluster'' under ICD–10–PCS. A ''cluster'' is the term used to describe the circumstance when a combination of ICD–10–PCS procedure codes are needed to fully satisfy the equivalent meaning of an ICD–9–CM procedure code for it to be considered a plausible translation.

The cluster definition for a radical prostatectomy in ICD–10–PCS currently consists of the one of the following codes:

- 0VT00ZZ (Resection of prostate, open approach);
- 0VT04ZZ (Resection of prostate, percutaneous endoscopic approach);
- 0VT07ZZ (Resection of prostate, via natural or artificial opening); or
- 0VT08ZZ Resection of prostate, via natural or artificial opening endoscopic; in combination with one of the following codes:
- 0VT30ZZ (Resection of bilateral seminal vesicles, open approach); or
- 0VT34ZZ (Resection of bilateral seminal vesicles, percutaneous endoscopic approach).

As stated earlier, under ICD–10–PCS, users are instructed to code separately the organs or structures that were actually removed and for which there is a distinctly defined body part. Therefore, a patient who undergoes a radical prostatectomy that involves removal of the vas deferens would have this procedure reported separately, in addition to the options displayed in the ''cluster.''

The ICD–10–PCS procedure codes that may be reported for sterilization and involve the bilateral vas deferens include the following:

ICD–10–PCS procedure code	Description
0V5Q0ZZ	Destruction of bilateral vas deferens, open approach.
0V5Q3ZZ	Destruction of bilateral vas deferens, percutaneous approach.
0V5Q4ZZ	Destruction of bilateral vas deferens, percutaneous endoscopic approach.
0VBQ0ZZ	Excision of bilateral vas deferens, open approach.
0VBQ3ZZ	Excision of bilateral vas deferens, percutaneous approach.
0VBQ4ZZ	Excision of bilateral vas deferens, percutaneous endoscopic approach.
0VTQ0ZZ	Resection of bilateral vas deferens, open approach.
0VTQ4ZZ	Resection of bilateral vas deferens, percutaneous endoscopic approach.

The eight procedure codes listed above describing various methods to remove the bilateral vas deferens are currently listed on the ICD–10 MCE Version 33 Non-covered procedure edit code list.

The requester is correct in stating that the codes related to removal of the bilateral vas deferens are included on the ICD–10 MCE Version 33 Non-covered procedure edit code list to reflect a sterilization procedure. While the vast majority of sterilization procedures will involve reporting the bilateral procedure codes, there are instances where one vas deferens may have been previously removed for other reasons and the remaining vas deferens requires sterilization. Therefore, the procedure codes describing removal of a unilateral vas deferens are also included on the ICD–10 MCE Version 33 Non-covered procedure edit code list to reflect a sterilization procedure. We agree that revising the language in the edit will resolve the issue of covered procedures being inappropriately subject to the edit.

In addition, while reviewing the Non-covered procedure edit list of codes that may be reported to identify sterilization procedures for males, we considered the procedure codes that may be reported to identify sterilization procedures for females. We examined the list of ICD–10–PCS procedure codes included on the ICD–10 MCE Version 33 Non-covered procedure edit code list that could reflect female sterilization (removal of fallopian tubes) and determined those codes also could be reported for other conditions and could be inappropriately subject to the current edit as well.

Therefore, for FY 2017, we are proposing to create a new ICD–10 MCE Version 34 Non-covered procedure edit to reflect that procedures performed on males involving the unilateral or bilateral vas deferens and procedures performed on females involving the fallopian tubes are not covered procedures for sterilization purposes. The proposed new ICD–10 MCE Version 34 Non-covered procedure edit would be displayed as follows: ''G. Non-covered procedure. The procedure codes shown below are identified as non-covered procedures *only* when ICD–10–CM diagnosis code Z30.2 (Encounter for sterilization) is listed as the principal diagnosis.''

We refer readers to Table 6P.1b. associated with this proposed rule (which are available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) to review the proposed list of non-covered procedure codes describing sterilization procedures for males and females for this proposed Non-covered procedure edit. We are inviting public comments on our proposal to create this new Non-covered procedure edit and also invite public comments on the proposed list of codes to describe sterilization procedures for the proposed edit.

d. Unacceptable Principal Diagnosis Edit

In the MCE, there are select codes that describe a circumstance which influences an individual's health status

but does not actually describe a current illness or injury. There also are codes that are not specific manifestations but may be due to an underlying cause. These codes are considered unacceptable as a principal diagnosis. In limited situations, there are a few codes on the MCE Unacceptable principal diagnosis edit code list that are considered ''acceptable'' when a specified secondary diagnosis is also coded and reported on the claim.

(1) Liveborn Infant

We received a request to examine ICD–10–CM diagnosis codes Z38.1 (Single liveborn infant, born outside hospital), Z38.4 (Twin liveborn infant, born outside hospital), and Z38.7 (Other multiple liveborn infant, born outside hospital), all of which are currently listed on the Unacceptable principal diagnosis edit code list for the ICD–10 MCE Version 33. The requestor believed that these codes are listed in error and suggested their removal.

The ICD–10–CM diagnosis code descriptions for liveborn infants differ from the ICD–9–CM diagnosis code descriptions for liveborn infants. The ICD–9–CM codes differentiate between a liveborn infant that was born prior to admission and hospitalized versus a liveborn infant that was born prior to admission and *not* hospitalized. The following codes in the ICD–9–CM MCE Version 32 included on the Unacceptable principal diagnosis edit code list are those that describe a liveborn infant that was born outside the hospital and not hospitalized:

ICD–9–CM diagnosis code	Description
V30.2	Single liveborn, born outside hospital and not hospitalized.
V31.2	Twin birth, mate liveborn, born outside hospital and not hospitalized.
V32.2	Twin birth, mate stillborn, born outside hospital and not hospitalized.
V33.2	Twin birth, unspecified whether mate liveborn or stillborn, born outside hospital and not hospitalized.
V34.2	Other multiple birth (three or more), mates all liveborn, born outside hospital and not hospitalized.
V35.2	Other multiple birth (three or more), mates all stillborn, born outside of hospital and not hospitalized.
V36.2	Other multiple birth (three or more), mates liveborn and stillborn, born outside hospital and not hospitalized.
V37.2	Other multiple birth (three or more), unspecified whether mates liveborn or stillborn, born outside of hospital.
V39.1	Liveborn, unspecified whether single, twin or multiple, born before admission to hospital.
V39.2	Liveborn, unspecified whether single, twin or multiple, born outside hospital and not hospitalized.

For replication purposes, the comparable ICD–10–CM diagnosis codes for the above listed codes are: Z38.1 (Single liveborn infant, born outside hospital); Z38.4 (Twin liveborn infant, born outside hospital); and Z38.7 (Other multiple liveborn infant, born outside hospital). There are no other ICD–10–CM diagnosis codes that describe a liveborn infant born outside a hospital.

The liveborn infant codes are an example of where a particular concept involving the place of birth is not the same between the ICD–9–CM and ICD–10–CM classification systems. Because the ICD–10–CM diagnosis codes do not include the same concept as the ICD–9–CM diagnosis codes regarding whether the liveborn infant was hospitalized or not, we agree it would not be appropriate to continue to include the ICD–10–CM diagnosis codes on the Unacceptable principal diagnosis list.

For FY 2017, we are proposing to remove ICD–10–CM diagnosis codes Z38.1, Z38.4, and Z38.7 from the Unacceptable principal diagnosis edit in the ICD–10 MCE Version 34. We are inviting public comments on our proposal.

(2) Multiple Gestation

We received a request to review the ICD–10–CM diagnosis codes related to multiple gestation that are currently listed on the ICD–10 MCE Version 33 Unacceptable principal diagnosis edit code list. The requestor expressed concern that these codes were included in the edit and suggested that CMS evaluate further to determine if they were appropriate.

In the ICD–10–CM classification, a single diagnosis code describes a multiple gestation and contains information pertaining to the placenta. This differs from the ICD–9–CM classification, where two diagnosis codes are required to separately report (1) multiple gestation with a delivery or complication and (2) multiple gestation with the status of the placenta.

In the ICD–9–CM MCE Version 32, only the ICD–9–CM diagnosis codes describing the status of the placenta are listed on the Unacceptable principal diagnosis edit code list. These ICD–9–CM diagnosis codes are:

ICD–9–CM diagnosis code	Description
V91.00	Twin gestation, unspecified number of placenta, unspecified number of amniotic sacs.
V91.01	Twin gestation, monochorionic/monoamniotic (one placenta, one amniotic sac).
V91.02	Twin gestation, monochorionic/diamniotic (one placenta, two amniotic sacs).
V91.03	Twin gestation, dichorionic/diamniotic (two placentae, two amniotic sacs).
V91.09	Twin gestation, unable to determine number of placenta and number of amniotic sacs.
V91.10	Triplet gestation, unspecified number of placenta and unspecified number of amniotic sacs.
V91.11	Triplet gestation, with two or more monochorionic fetuses.
V91.12	Triplet gestation, with two or more monoamniotic fetuses.
V91.19	Triplet gestation, unable to determine number of placenta and number of amniotic sacs.
V91.20	(Quadruplet gestation, unspecified number of placenta and unspecified number of amniotic sacs.
V91.21	Quadruplet gestation, with two or more monochorionic fetuses.
V91.22	Quadruplet gestation, with two or more monoamniotic fetuses.
V91.29	Quadruplet gestation, unable to determine number of placenta and number of amniotic sacs.
V91.90	Other specified multiple gestation, unspecified number of placenta and unspecified number of amniotic sacs.
V91.91	Other specified multiple gestation, with two or more monochorionic fetuses.
V91.92	Other specified multiple gestation, with two or more monoamniotic fetuses.

ICD–9–CM diagnosis code	Description
V91.99	Other specified multiple gestation, unable to determine number of placenta and number of amniotic sacs.

There are 68 ICD–10–CM diagnosis codes included on the ICD–10 MCE Version 33 Unacceptable principal diagnosis edit code list as comparable translations that describe multiple gestation and status of the placenta. The list of these codes is included in Table 6P.1c. associated with this proposed rule (which is available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*).

Because only one, and not both, concepts from the ICD–9–CM classification was considered to be an unacceptable principal diagnosis (status of placenta) in the ICD–9–CM MCE, we agree this was a replication error that incorrectly included the ICD–10–CM diagnosis codes that identify both concepts (multiple gestation and status of placenta) in a single code on the ICD–10 MCE. The edit cannot isolate the status of placenta for the ICD–10 MCE because it is reported in combination with the multiple gestation as a single code. Therefore, it is inappropriate to include these codes on the Unacceptable principal diagnosis edit code list.

For FY 2017, we are proposing to remove the ICD–10–CM diagnosis codes listed in Table 6P.1c. associated with this proposed rule (which is available via Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) from the ICD–10 MCE Version 34 Unacceptable principal diagnosis list. We are inviting public comments on our proposal.

(3) Supervision of High Risk Pregnancy

We received a request to review the ICD–10–CM diagnosis codes related to supervision of high risk pregnancy (elderly primigravida and multigravida) that are currently listed on the ICD–10 MCE Version 33 Unacceptable principal diagnosis edit code list. The requestor stated that these codes were not included in the edit under the ICD–9–CM MCE. According to the requester, the codes describing these conditions should be allowed for reporting as a principal diagnosis based on the ICD–10–CM Tabular List of Diseases instructions for Chapter 15 (Certain Conditions Originating in the Perinatal Period). The chapter-specific guidelines for ICD–10–CM state that ''diagnosis code O80 (Encounter for full-term uncomplicated delivery) should be assigned when a woman is admitted for a full-term normal delivery and delivers a single, healthy infant without any complications antepartum, during the delivery, or postpartum during the delivery episode. Code O80 is always a principal diagnosis. It is not to be used if any other code from Chapter 15 is needed to describe a current complication of the antenatal, delivery, or perinatal period.'' The requestor stated that obstetric patients admitted as inpatients often meet the definition of an elderly primigravida or elderly multigravida, [1] which is the appropriate condition to be reported as the principal diagnosis. However, because the codes describing this condition are listed on the Unacceptable principal diagnosis edit code list, they are unable to be reported.

The diagnosis codes describing high-risk patients admitted for delivery differ between the ICD–10–CM and ICD–9–CM classifications. Under ICD–9–CM, two diagnosis codes are required to separately report concept 1 of elderly primigravida or elderly multigravida and whether a delivery occurred and concept 2 of supervision of high-risk pregnancy with elderly primigravida or elderly multigravida. We display the codes that correspond to these concepts below and titled them as Code List 1 and Code List 2. A code from each list would be reported to fully describe the circumstances of the admission and the patient.

Code List 1—We note that the following codes are listed on the ICD–9–CM MCE Version 32 Unacceptable principal diagnosis edit code list:

ICD–9–CM diagnosis code	Description
V23.81	Supervision of high-risk pregnancy with elderly primigravida
V23.82	Supervision of high-risk pregnancy with elderly multigravida

Code List 2—We note that the following codes are *not* listed on the ICD–9–CM MCE Version 32 Unacceptable principal diagnosis edit code list. However, we display them here for the benefit of the reader in the discussion that follows.

ICD–9–CM diagnosis code	Description
659.50	Elderly primigravida, unspecified as to episode of care or not applicable
659.51	Elderly primigravida, delivered, with or without mention of antepartum condition
659.53	Elderly primigravida, antepartum condition or complication
659.60	Elderly multigravida, unspecified as to episode of care or not applicable
659.61	Elderly multigravida, delivered with or without mention of antepartum condition
659.63	Elderly multigravida, antepartum condition or complication

As noted above, in the ICD–9–CM MCE Version 32, only the ICD–9–CM diagnosis codes describing the supervision of high-risk pregnancy are listed on the Unacceptable principal diagnosis edit code list.

[1] The ICD–10–CM classification defines an elderly primigravida or elderly multigravida as a complication of the pregnancy since the management and care of the expectant mother is affected by the fact they are an older patient.

There are eight ICD–10–CM diagnosis codes included on the ICD–10 MCE Version 33 Unacceptable principal diagnosis edit code list that describe the concept of elderly primigravida or elderly multigravida and supervision of high-risk pregnancy, in a *single* code. As shown below, the concept of whether a delivery occurred is not included in the code description for the eight codes.

ICD–10–CM diagnosis code	Description
O09.511	Supervision of elderly primigravida, first trimester
O09.512	Supervision of elderly primigravida, second trimester
O09.513	Supervision of elderly primigravida, third trimester
O09.519	Supervision of elderly primigravida, unspecified trimester
O09.521	Supervision of elderly multigravida, first trimester
O09.522	Supervision of elderly multigravida, second trimester
O09.523	Supervision of elderly multigravida, third trimester
O09.529	Supervision of elderly multigravida, unspecified trimester

Because the concepts and coding guidelines between the ICD–9–CM and ICD–10–CM classifications differ greatly in how they define this subset of patients, we acknowledge that the eight ICD–10–CM diagnosis codes listed above should be removed from the ICD–10 MCE Unacceptable principal diagnosis edit code list to permit the reporting of these codes as principal diagnosis when the documentation supports such assignment.

We also note that during our analysis of the eight diagnosis codes describing elderly primigravida and elderly multigravida high risk pregnancy patients, we found additional codes on the ICD–10 MCE Version 33 Unacceptable principal diagnosis edit code list related to high-risk pregnancy that we believe should also be removed so as to permit the reporting of these codes as principal diagnosis when the documentation supports such assignment.

For FY 2017, we are proposing to remove all the ICD–10–CM diagnosis codes related to high-risk pregnancy currently listed in Table 6P.1d. associated with this proposed rule (which is available via Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*) from the ICD–10 MCE Version 34 Unacceptable principal diagnosis edit code list. We are inviting public comment on our proposal.

e. Other MCE Issues

The following MCE discussion and proposals are the result of internal review of other MCE issues.

(1) Procedure Inconsistent With Length of Stay Edit

In the FY 2016 IPPS/LTCH PPS final rule (80 FR 49411), we finalized a revision for the language of the ICD–10 MCE Version 33 edit for ''Procedure inconsistent with length of stay'' with regard to ICD–10–PCS procedure code 5A1955Z (Respiratory ventilation, greater than 96 consecutive hours). The current description of the code edit reads as follows: ''The following procedure code should only be coded on claims with a length of stay greater than four days.''

As we strive to assist providers with correct coding and reporting of this service, we are proposing to further revise the description of this code edit. For FY 2017, we are proposing to modify the edit description to read as follows: ''The following procedure code should only be coded on claims when the respiratory ventilation is provided for greater than four consecutive days during the length of stay.''

We believe this modification will further clarify the appropriate circumstances in which ICD–10–PCS code 5A1955Z may be reported. We are inviting public comments on our proposal.

Also, consistent with the discussion in the FY 2016 IPPS/LTCH PPS final rule (80 FR 49411 through 49412), we believe it would be beneficial to revise the title for ICD–10 MS–DRG 208 (Respiratory System Diagnosis with Ventilator Support <96 Hours). Currently, this ICD–10 MS–DRG title references terminology for mechanical ventilation ''< 96 hours'' based on the GROUPER logic for MS–DRG 208, which includes ICD–10–PCS codes 5A1935Z (Respiratory ventilation, less than 24 consecutive hours) and 5A1945Z (Respiratory ventilation, 24–96 consecutive hours). Because ICD–10–PCS code 5A1945Z includes mechanical ventilation up to and including 96 hours, we are proposing to modify the title of MS–DRG 208 by adding an ''equal'' sign (=) after the ''less than'' (<) sign to better reflect the GROUPER logic. We are proposing to revise the title of ICD–10 MS–DRG 208 as follows, effective October 1, 2016: MS–DRG 208 (Respiratory System Diagnosis with Ventilator Support <=96 Hours). We are inviting public comments on our proposal.

(2) Maternity Diagnoses

We identified three ICD–10–CM diagnosis codes that describe conditions related to pregnancy or the puerperium that are not currently listed on the ICD–10 MCE Version 33 Age conflict edit code list for maternity diagnoses. The diagnosis codes include:

- C58 (Malignant neoplasm of placenta);
- D39.2 (Neoplasm of uncertain behavior of placenta); and
- F53 (Puerperal psychosis).

To be consistent with other related conditions currently included on the Age conflict edit code list for maternity diagnoses, we are proposing to add ICD–10–CM diagnosis codes C58, D39.2, and F53 to the Age conflict edit code list for maternity diagnoses.

We are inviting public comments on our proposals for changes to the FY 2017 ICD–10 MCE Version 34.

(3) Manifestation Codes Not Allowed as Principal Diagnosis Edit

Section I.A.13. of the FY 2016 ICD–10–CM Official Guidelines for Coding and Reporting states that certain conditions have both an underlying etiology and multiple body system manifestations due to the underlying etiology. For such conditions, the classification has a coding convention that requires the underlying condition be sequenced first followed by the manifestation. Wherever such a combination exists, there is a ''use additional code'' note at the etiology code, and a ''code first'' note at the manifestation code. These instructional notes indicate proper sequencing order of the codes, etiology followed by manifestation.

We found that in the ICD–10–CM Tabular List of Diseases at category M02- (Postinfective and reactive arthropathies), a ''Code first underlying disease'' note exists. This would

indicate that there are codes in that category that are manifestations of an underlying etiology. We then examined the ICD–10 MCE Version 33 to determine if diagnosis codes from that category were included on the Manifestation codes not allowed as principal diagnosis edit code list. Only three ICD–10–CM diagnosis codes from that category were listed:

- M02.88 (Other reactive arthropathies, vertebrae);
- M02.89 (Other reactive arthropathies, multiple sites); and
- M02.9 (Reactive arthropathy, unspecified).

Based on the instructional note at the M02- category level, the title at subcategory M02.8 (Other reactive arthropathies), and the three diagnosis codes listed above on the current ICD–10 MCE Version 33 Manifestation codes not allowed as principal diagnosis edit code list, it seems appropriate that all of the diagnosis codes in subcategory M02.8 should be identified as manifestation codes.

We are proposing to add the ICD–10–CM diagnosis codes listed in the following table to the ICD–10 MCE Version 34 Manifestation codes not allowed as principal diagnosis edit code list.

ICD–10–CM diagnosis code	Description
M02.80	Other reactive arthropathies, unspecified site.
M02.811	Other reactive arthropathies, right shoulder.
M02.812	Other reactive arthropathies, left shoulder.
M02.819	Other reactive arthropathies, unspecified shoulder.
M02.821	Other reactive arthropathies, right elbow.
M02.822	Other reactive arthropathies, left elbow.
M02.829	Other reactive arthropathies, unspecified elbow.
M02.831	Other reactive arthropathies, right wrist.
M02.832	Other reactive arthropathies, left wrist.
M02.839	Other reactive arthropathies, unspecified wrist.
M02.841	Other reactive arthropathies, right hand.
M02.842	Other reactive arthropathies, left hand.
M02.849	Other reactive arthropathies, unspecified hand.
M02.851	Other reactive arthropathies, right hip.
M02.852	Other reactive arthropathies, left hip.
M02.859	Other reactive arthropathies, unspecified hip.
M02.861	Other reactive arthropathies, right knee.
M02.862	Other reactive arthropathies, left knee.
M02.869	Other reactive arthropathies, unspecified knee.
M02.871	Other reactive arthropathies, right ankle and foot.
M02.872	Other reactive arthropathies, left ankle and foot.
M02.879	Other reactive arthropathies, unspecified ankle and foot.

We are inviting public comments on our proposal.

(4) Questionable Admission Edit

In the MCE, some diagnoses are not usually sufficient justification for admission to an acute care hospital. For example, if a patient is assigned ICD–10–CM diagnosis code R03.0 (Elevated blood pressure reading, without diagnosis of hypertension), the patient would have a questionable admission because an elevated blood pressure reading is not normally sufficient justification for admission to a hospital.

Upon review of the ICD–10–CM diagnosis codes listed under the ICD–10 MCE Version 33 Questionable Admission edit, our clinical advisors determined that certain diagnoses clinically warrant hospital admission. Therefore, we are proposing to remove the following diagnosis codes from the ICD–10 MCE Version 34.0 Questionable admission edit.

- T81.81XA (Complication of inhalation therapy, initial encounter);
- T88.4XXA (Failed or difficult intubation, initial encounter);
- T88.7XXA (Unspecified adverse effect of drug or medicament, initial encounter);
- T88.8XXA (Other specified complications of surgical and medical care, not elsewhere classified, initial encounter); and
- T88.9XXA (Complication of surgical and medical care, unspecified, initial encounter).

We are inviting public comments on our proposal.

(5) Removal of Edits and Future Enhancement

With the implementation of ICD–10, it is clear that there are several concepts that differ from the ICD–9–CM classification. These differences are evident in the MCE as discussed earlier in this section. Looking ahead to the needs and uses of coded data as the data continue to evolve from the reporting, collection, processing, coverage, payment and analysis aspect, we believe the need to ensure the accuracy of the coded data becomes increasingly significant.

The purpose of the MCE is to ensure that errors and inconsistencies in the coded data are recognized during Medicare claims processing. As shown in the FY 2016 ICD–10 MCE Version 33 manual file and an ICD–9–CM MCE Version 33.0A manual file (developed for analysis only), an edit code list exists according to the definition or criteria set forth for each specified type of edit. Over time, certain edits under the ICD–9–CM MCE became discontinued as they were no longer needed. However, the MCE manual has continued to make reference to these discontinued edits, including through the replication process with transitioning to ICD–10.

Currently, the FY 2016 ICD–10 MCE Version 33 manual file displays the following edits:

- 12. Open biopsy check. Effective October 1, 2010, the Open biopsy check edit was discontinued and will appear for claims processed using MCE Version 2.0–26.0 only.
- 13. Bilateral procedure. Effective with the ICD–10 implementation, the bilateral procedure edit will be discontinued.

Because these edits are no longer valid, we are proposing to remove the reference to them, effective with the ICD–10 MCE manual and software

Version 34.0, for FY 2017. We are inviting public comments on our proposal.

As we continue to evaluate the purpose and function of the MCE with respect to the transition to ICD–10, we encourage public input for future discussion. For instance, we recognize a need to further examine the current list of edits and the definitions of those edits. We encourage public comments on whether there are additional concerns with the current edits, including specific edits or language that should be removed or revised, edits that should be combined, or new edits that should be added to assist in detecting errors or inaccuracies in the coded data.

13. Proposed Changes to Surgical Hierarchies

Some inpatient stays entail multiple surgical procedures, each one of which, occurring by itself, could result in assignment of the case to a different MS–DRG within the MDC to which the principal diagnosis is assigned. Therefore, it is necessary to have a decision rule within the GROUPER by which these cases are assigned to a single MS–DRG. The surgical hierarchy, an ordering of surgical classes from most resource-intensive to least resource-intensive, performs that function. Application of this hierarchy ensures that cases involving multiple surgical procedures are assigned to the MS–DRG associated with the most resource-intensive surgical class.

Because the relative resource intensity of surgical classes can shift as a function of MS–DRG reclassification and recalibrations, for FY 2017, we reviewed the surgical hierarchy of each MDC, as we have for previous reclassifications and recalibrations, to determine if the ordering of classes coincides with the intensity of resource utilization.

A surgical class can be composed of one or more MS–DRGs. For example, in MDC 11, the surgical class ''kidney transplant'' consists of a single MS–DRG (MS–DRG 652) and the class ''major bladder procedures'' consists of three MS–DRGs (MS–DRGs 653, 654, and 655). Consequently, in many cases, the surgical hierarchy has an impact on more than one MS–DRG. The methodology for determining the most resource-intensive surgical class involves weighting the average resources for each MS–DRG by frequency to determine the weighted average resources for each surgical class. For example, assume surgical class A includes MS–DRGs 001 and 002 and surgical class B includes MS–DRGs 003, 004, and 005. Assume also that the average costs of MS–DRG 001 are higher than that of MS–DRG 003, but the average costs of MS–DRGs 004 and 005 are higher than the average costs of MS–DRG 002. To determine whether surgical class A should be higher or lower than surgical class B in the surgical hierarchy, we would weigh the average costs of each MS–DRG in the class by frequency (that is, by the number of cases in the MS–DRG) to determine average resource consumption for the surgical class. The surgical classes would then be ordered from the class with the highest average resource utilization to that with the lowest, with the exception of ''other O.R. procedures'' as discussed in this rule.

This methodology may occasionally result in assignment of a case involving multiple procedures to the lower-weighted MS–DRG (in the highest, most resource-intensive surgical class) of the available alternatives. However, given that the logic underlying the surgical hierarchy provides that the GROUPER search for the procedure in the most resource-intensive surgical class, in cases involving multiple procedures, this result is sometimes unavoidable.

We note that, notwithstanding the foregoing discussion, there are a few instances when a surgical class with a lower average cost is ordered above a surgical class with a higher average cost. For example, the ''other O.R. procedures'' surgical class is uniformly ordered last in the surgical hierarchy of each MDC in which it occurs, regardless of the fact that the average costs for the MS–DRG or MS–DRGs in that surgical class may be higher than those for other surgical classes in the MDC. The ''other O.R. procedures'' class is a group of procedures that are only infrequently related to the diagnoses in the MDC, but are still occasionally performed on patients with cases assigned to the MDC with these diagnoses. Therefore, assignment to these surgical classes should only occur if no other surgical class more closely related to the diagnoses in the MDC is appropriate.

A second example occurs when the difference between the average costs for two surgical classes is very small. We have found that small differences generally do not warrant reordering of the hierarchy because, as a result of reassigning cases on the basis of the hierarchy change, the average costs are likely to shift such that the higher-ordered surgical class has lower average costs than the class ordered below it.

Based on the changes that we are proposing to make for FY 2017, as discussed in section II.F.4.c. of the preamble of this FY 2017 IPPS/LTCH PPS proposed rule, we are proposing to maintain the existing surgical hierarchy in MDC 5 for proposed revised MS–DRGs 228 and 229 (Other Cardiothoracic Procedures with MCC and without MCC, respectively).

We are inviting public comments on our proposals.

14. Proposed Changes to the MS–DRG Diagnosis Codes for FY 2017

The tables identifying the proposed additions and deletions to the MCC severity levels list and the proposed additions and deletions to the CC severity levels list for FY 2017 are available via the Internet on the CMS Web site at: *http://cms.hhs.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html* as follows:

- Table 6I.1—Proposed Additions to the MCC List—FY 2017;
- Table 6I.2—Proposed Deletions to the MCC List—FY 2017;
- Table 6J.1—Proposed Additions to the CC List—FY 2017; and
- Table 6J.2—Proposed Deletions to the CC List—FY 2017.

15. Proposed Complications or Comorbidity (CC) Exclusions List

a. Background of the CC List and the CC Exclusions List

Under the IPPS MS–DRG classification system, we have developed a standard list of diagnoses that are considered CCs. Historically, we developed this list using physician panels that classified each diagnosis code based on whether the diagnosis, when present as a secondary condition, would be considered a substantial complication or comorbidity. A substantial complication or comorbidity was defined as a condition that, because of its presence with a specific principal diagnosis, would cause an increase in the length of stay by at least 1 day in at least 75 percent of the patients. However, depending on the principal diagnosis of the patient, some diagnoses on the basic list of complications and comorbidities may be excluded if they are closely related to the principal diagnosis. In FY 2008, we evaluated each diagnosis code to determine its impact on resource use and to determine the most appropriate CC subclassification (non-CC, CC, or MCC) assignment. We refer readers to sections II.D.2. and 3. of the preamble of the FY 2008 IPPS final rule with comment period for a discussion of the refinement of CCs in relation to the MS–DRGs we adopted for FY 2008 (72 FR 47152 through 47171).

b. Proposed CC Exclusions List for FY 2017

In the September 1, 1987 final notice (52 FR 33143) concerning changes to the DRG classification system, we modified the GROUPER logic so that certain diagnoses included on the standard list of CCs would not be considered valid CCs in combination with a particular principal diagnosis. We created the CC Exclusions List for the following reasons: (1) To preclude coding of CCs for closely related conditions; (2) to preclude duplicative or inconsistent coding from being treated as CCs; and (3) to ensure that cases are appropriately classified between the complicated and uncomplicated DRGs in a pair. As previously indicated, we developed a list of diagnoses, using physician panels, to include those diagnoses that, when present as a secondary condition, would be considered a substantial complication or comorbidity. In previous years, we made changes to the list of CCs, either by adding new CCs or deleting CCs already on the list.

In the May 19, 1987 proposed notice (52 FR 18877) and the September 1, 1987 final notice (52 FR 33154), we explained that the excluded secondary diagnoses were established using the following five principles:

- Chronic and acute manifestations of the same condition should not be considered CCs for one another;
- Specific and nonspecific (that is, not otherwise specified (NOS)) diagnosis codes for the same condition should not be considered CCs for one another;
- Codes for the same condition that cannot coexist, such as partial/total, unilateral/bilateral, obstructed/unobstructed, and benign/malignant, should not be considered CCs for one another;
- Codes for the same condition in anatomically proximal sites should not be considered CCs for one another; and
- Closely related conditions should not be considered CCs for one another.

The creation of the CC Exclusions List was a major project involving hundreds of codes. We have continued to review the remaining CCs to identify additional exclusions and to remove diagnoses from the master list that have been shown not to meet the definition of a CC. We refer readers to the FY 2014 IPPS/LTCH PPS final rule (78 FR 50541) for detailed information regarding revisions that were made to the CC Exclusion Lists under the ICD–9–CM MS–DRGs.

For FY 2017, we are proposing changes to the ICD–10 MS–DRGs Version 34 CC Exclusion List. Therefore, we have developed Table 6G.1.—Proposed Secondary Diagnosis Order Additions to the CC Exclusions List—FY 2017; Table 6G.2.—Proposed Principal Diagnosis Order Additions to the CC Exclusions List—FY 2017; Table 6H.1.—Proposed Secondary Diagnosis Order Deletions to the CC Exclusions List—FY 2017; and Table 6H.2.—Proposed Principal Diagnosis Order Deletions to the CC Exclusions List—FY 2017. Each of these principal diagnosis codes for which there is a CC exclusion is shown in Table 6G.2. with an asterisk and the conditions that will not count as a CC are provided in an indented column immediately following the affected principal diagnosis. Beginning with discharges on or after October 1 of each year, the indented diagnoses are not recognized by the GROUPER as valid CCs for the asterisked principal diagnoses. Tables 6G and 6H associated with this proposed rule are available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*.

To capture new and deleted diagnosis and procedure codes, for FY 2017, we have developed Table 6A.—New Diagnosis Codes, Table 6B.—New Procedure Codes, and Table 6C—Invalid Diagnosis Codes to this proposed rule. However, they are not published in the Addendum to this proposed rule but are available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*, as described in section VI. of the Addendum to this proposed rule. We note that while we did not specifically develop a Table 6E.—Revised Diagnosis Code Titles for this proposed rule, a document containing the FY 2017 revised diagnosis code titles, as well as new diagnosis codes that have been finalized to date since implementation of the partial code freeze, was made available in advance in response to requests from the health care industry. During the March 9–10, 2016 ICD–10 Coordination and Maintenance Committee meeting, a discussion regarding this document was presented. Participants were informed that the document titled ''FY 2017 New Released ICD–10–CM Codes'' would contain the information that would otherwise be included for this table. This document has been posted along with the other March 9–10, 2016 ICD–10 Coordination and Maintenance Committee meeting materials on the CDC Web site at: *http://www.cdc.gov/nchs/icd/icd9cm_maintenance.htm*.

In addition, we did not specifically develop a Table 6F.—Revised Procedure Code Titles for this proposed rule. However, a document containing the FY 2017 revised procedure code titles, as well as new procedure codes that have been finalized to date since implementation of the partial code freeze, was made available in advance in response in response to requests from the health care industry. During the March 9–10, 2016 ICD–10 Coordination and Maintenance Committee meeting, a discussion regarding this document was presented. Participants were informed that the document titled ''FY 2017 New Revised ICD–10–PCS Codes'' would contain the information that would otherwise be included for this table. This document is posted on the CMS Web site at: *https://www.cms.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/ICD-9-CM-C-and-M-Meeting-Materials-Items/2016-03-09-MeetingMaterials.html?DLPage=1&DLEntries=10&DLSort=0&DLSortDir=descending*.

As mentioned in section II.F.14. of this proposed rule, we are proposing additions and deletions to the MS–DRG MCC and CC Lists for FY 2017 based on the creation of new ICD–10–CM codes. This information is available in Tables 6I.1 (Proposed Additions to the MCC List—FY 2017), 6I.2 (Proposed Deletions to the MCC List—FY 2017), 6J.1 (Proposed Additions to the CC List—FY 2017), and 6J.2 (Proposed Deletions to the CC List—FY 2017). However, they are not published in the Addendum to this proposed rule but are available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*, as described in section VI. of the Addendum to this proposed rule.

16. Review of Procedure Codes in MS DRGs 981 Through 983; 984 Through 986; and 987 Through 989
