

Type of Request: Intent to seek approval to renew an information collection.

Abstract:

Proposed Project: On September 11, 1993, President Clinton issued Executive Order 12862, "Setting Customer Service Standards," which calls for Federal agencies to provide service that matches or exceeds the best service available in the private sector. Section 1(b) of that order requires agencies to "survey customers to determine the kind and quality of services they want and their level of satisfaction with existing services." The National Science Foundation (NSF) has an ongoing need to collect information from its customer community (primarily individuals and organizations engaged in science and engineering research and education) about the quality and kind of services it provides and use that information to help improve agency operations and services.

Estimate of Burden: The burden on the public will change according to the needs of each individual customer satisfaction survey; however, each survey is estimated to take approximately 30 minutes per response.

Respondents: Will vary among individuals or households; business or other for-profit; not-for-profit institutions; farms; federal government; state, local or tribal governments.

Estimated Number of Responses per Survey: This will vary by survey.

Dated: February 10, 2017.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

SUPPLEMENTARY INFORMATION:

I. Discussion

NUREG-1021, Revision 11 provides policy and guidance for the development, administration, and grading of examinations used for licensing operators at nuclear power plants. This NUREG also provides guidance for maintaining operators' licenses, and for the NRC to conduct requalification examinations when necessary.

This NUREG is a rule as defined in the Congressional Review Act (5 U.S.C. 801-808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

Revision 11 of NUREG-1021 replaces Revision 10 of NUREG 1021. Draft NUREG-1021, Revision 11 was published in the **Federal Register** for public comment on February 5, 2016 (81 FR 6301) with a 45 day comment period. The NRC extended the comment period on Draft NUREG-1021, Revision 11 on March 3, 2016 (81 FR 11302) until April 5, 2016. The NRC received 314 public comments from private citizens and industry organizations. The NRC staff's evaluation and resolution of the public comments are documented in ADAMS under Accession No. ML17038A055.

Dated at Rockville, Maryland, this 8 day of February, 2017.

For the Nuclear Regulatory Commission.

Chief, Operator Licensing and Training Branch, Division of Inspection and Regional Support, Office of Nuclear Reactor Regulation.
