designed to improve returns to producers while protecting the interests of consumers. The Federal Milk Marketing Order regulations require places certain requirements on the handling of milk in the area it covers. Currently, there are 10 milk marketing orders regulating the handling of milk in the respective marketing areas.

Need and Use of the Information: The information collected is needed to administer the classified pricing system and related requirements of each Federal Order. Forms are used for reporting purposes and to establish the quantity of milk received by handlers, the pooling status of the handler, and the class-use of the milk used by the handler and the butterfat content and amounts of other components of the milk. Without the monthly information, the market administrator would not have the information to compute each monthly price nor know if handlers were paying producers on dates prescribed in the order. Penalties are imposed for violation of the order, such as the failure to pay producers by the prescribed dates.

Title: Reporting and Recordkeeping Requirements for 7 CFR, Part 29.

OMB Control Number: 0581–0056.

Summary of Collection: The Fair and Equitable Tobacco Reform Act of 2004 (7 U.S.C. 518) eliminated price supports and marketing quotas for all tobacco beginning with the 2005 crop year. Mandatory inspection and grading of domestic and imported tobacco was eliminated as well as the mandatory pesticide testing of imported tobacco and the tobacco Market News Program. The Tobacco Inspection Act (U.S.C. 511) requires that all tobacco sold at designated auction markets in the U.S. be inspected and graded. Provision is also made for interested parties to request inspection, pesticide testing and grading services on an “as needed” basis.

Need and Use of the Information: Information is collected through various forms and other documents for the inspection and certification process. Upon receiving request information from tobacco manufacturers and/or handlers, tobacco inspectors will pull samples and apply U.S. Standard Grades to samples to provide a Tobacco Inspection Certificate (TB–92). Also, samples can be submitted to a USDA laboratory for pesticide testing and a detailed analysis is provided to the customer.
