accounts, input-output tables, economic indices, and other composite measures that serve as the basis for economic policymaking, planning, and program administration. Further, the census provides benchmarks for surveys of businesses which track short-term economic trends, serve as economic indicators, and contribute critical source data for current estimates of the Gross Domestic Product (GDP) of the Island Areas. Finally, industry, business, academia, and the general public use information from the economic census for evaluating markets, preparing business plans, making business decisions, developing economic models and forecasts, conducting economic research, and establishing benchmarks for their own sample surveys.

If the Economic Census of Island Areas were not conducted, the Federal government would lose the only source of detailed comprehensive information of the economies of these areas. Additionally, the governments of the Island Areas would lose vital source data and benchmarks for their national accounts, input-output tables, and other composite measures of economic activity, causing a substantial degradation in the quality of these important statistics.

Affected Public: Businesses; Not-for-profit institutions; State, local or tribal governments.

Frequency: Every five years.

Respondent’s Obligation: Mandatory.

Legal Authority: This information collection is part of the 2017 Economic Census, which is required by law under Title 13, United States Code (U.S.C.), Section 131 of this statute directs the taking of a census at 5-year intervals. Section 191 defines the geographic scope of the census to include the island areas and Section 224 makes reporting mandatory.

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA_Submission@omb.eop.gov or fax to (202) 395–5806.

Sheleen Dumas,
PRA Departmental Lead, Office of the Chief Information Officer.

BILLING CODE 3510–07–P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.
Title: 2017 Economic Census.
OMB Control Number: None.
Form Number(s): The almost 800 electronic path numbers are too numerous to list here.
Type of Request: New collection.
Number of Respondents: 4,214,680.
Average Hours per Response: 1.3 hours.
Bureau Hours: 5,691,972.

Needs and Uses: The 2017 Economic Census will use direct data collection and administrative records to compile statistics on approximately 7 million employer business establishments in industries defined by the 2017 North American Industry Classification System (NAICS). This request for approval covers the information collection instruments and procedures that will be used in the enumeration of U.S. domestic businesses. The enumeration in the Island Areas (Puerto Rico, Guam, the Commonwealth of the Northern Marianas Islands, the U.S. Virgin Islands, and American Samoa) will be submitted separately to the Office of Management and Budget (OMB) for approval. In addition to the general enumeration of businesses, the 2017 census program also includes surveys of business owners and commodity flows. Those surveys will also be submitted separately.

The public administration sector is out of scope to the economic census. The U.S. Census Bureau conducts, and will submit separately for approval, the quinquennial census of governments and other current programs that measure the activities of government establishments.

The 2017 Economic Census will cover the following NAICS sectors of the U.S. economy:
- Mining, Quarrying, and Oil and Gas Extraction
- Utilities
- Construction
- Manufacturing
- Wholesale Trade
- Retail Trade
- Transportation and Warehousing
- Information
- Finance and Insurance
- Real Estate and Rental and Leasing
- Professional, Scientific and Technical Services
- Management of Companies and Enterprises
- Administrative and Support and Waste Management and Remediation Services
- Educational Services
- Health Care and Social Assistance
- Arts, Entertainment, and Recreation
- Accommodation and Food Services
- Other Services (Except Public Administration)

The economic census will produce basic statistics by industry for the number of establishments, value of shipments/receipts/revenue/sales, payroll, and employment. It will also yield a variety of industry-specific statistics, including materials consumed, detailed supplies and fuels consumed, electric energy consumed, depreciable assets, selected purchased services, inventories, and capital expenditures, value of shipments/receipts/revenue/sales by product line as defined by the North American Product Classification System (NAPCS), type of operation, size of establishments, and other industry-specific measures. The Economic Census is the primary source of information about the structure and functioning of the nation’s economy and features unique industry, product and geographic detail. Economic census statistics serve as part of the framework for the national accounts and provide essential information for government, business, and the general public. The Federal Government, including agencies such as the Bureau of Economic Analysis (BEA) and the Bureau of Labor Statistics (BLS), use information from the economic census as an important part of the framework for the national income and product accounts, input-output tables, economic indices, and other composite measures that serve as the factual basis for economic policy-making, planning, and program administration. Further, the census provides sampling frames and benchmarks for current business surveys which track short-term economic trends, serve as economic indicators, and contribute critical source data for current estimates of gross domestic product. State and local governments rely on the economic census as a unique source of comprehensive economic statistics for small geographic areas for use in policy-making, planning, and program administration. Finally, industry, business, academia, and the general public use information from the economic census for evaluating markets,
DEPARTMENT OF COMMERCE
National Oceanic and Atmospheric Administration

Proposed Information Collection; Comment Request; Reporting of Sea Turtle Entanglement in Fishing Gear or Marine Debris

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

DATES: Written comments must be submitted on or before May 9, 2017.

ADDRESSES: Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at pracommnts@doc.gov).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to Kate Sampson, Greater Atlantic Regional Fisheries Office, 55 Great Republic Drive, Gloucester, MA 01930, (978) 282–8470 or kate.sampson@noaa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for revision and extension of a currently approved information collection.

Sea turtles can become accidentally entangled in active or discarded fishing gear, marine debris, or other line in the marine environment. Entanglement has the potential to cause serious injury or mortality, which would negatively impact the recovery of endangered and threatened sea turtle populations. The National Oceanic and Atmospheric Administration’s (NOAA) National Marine Fisheries Service (NMFS) established the Sea Turtle Disentanglement Network (STDN) to respond to these entanglement events, in particular those involving the vertical line of fixed gear fisheries. The STDN’s goals are to increase reporting, to reduce serious injury and mortality to sea turtles, and to collect information that can be used for mitigation of these threats. As there is limited observer coverage of fixed gear fisheries, the STDN data are invaluable to NMFS in understanding the threat of entanglement and working towards mitigation.

II. Method of Collection

Reports will be submitted on paper (faxed or mailed), by telephone, or electronically.

III. Data

OMB Control Number: 0648–0496.

Form Number(s): None.

Type of Request: Regular submission (revision and extension of a currently approved information collection).

Affected Public: Individuals or households; business or other for-profit organizations; not-for-profit institutions; State, Local, or Tribal government; Federal government.

Estimated Number of Respondents: 111.

Estimated Time per Response: 2 to 2.5 hours per case.

Estimated Total Annual Burden Hours: 165.

Estimated Total Annual Cost to Public: $100 in recordkeeping/reporting costs.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency’s estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Requests for additional information or copies of the information collection instrument and instructions should be directed to Kate Sampson, Greater Atlantic Regional Fisheries Office, 55 Great Republic Drive, Gloucester, MA 01930, (978) 282–8470 or kate.sampson@noaa.gov.

FOR FURTHER INFORMATION CONTACT: Diana Evans, Council staff; telephone: (907) 271–2809.
