EPA is notifying the public that it has found that the fine particulate matter (PM$_{2.5}$) nonattainment area for Knoxville, Tennessee, is adequate for transportation conformity purposes. This SIS revision was submitted to EPA on December 20, 2016, by the Tennessee Department of Environment and Conservation (TDEC) for determining the adequacy of submitted SIS revisions for the Knoxville Area. EPA posted the availability of the Knoxville Area MVEBs on EPA’s Web site on December 22, 2016, as part of the adequacy process, for the purpose of soliciting comments. The adequacy comment period ran until January 23, 2017. During EPA’s adequacy comment period, no comments were received on the Knoxville Area MVEBs. Transportation conformity is required by section 176(c) of the Clean Air Act. EPA’s conformity rule, 40 CFR part 93, requires that transportation plans, programs, and projects conform to state air quality implementation plans and establishes the criteria and procedures for determining whether or not they do so. Conformity to a SIS means that transportation activities will not produce new air quality violations, worsen existing violations, or delay timely attainment of the NAAQS. The criteria by which EPA determines whether a SIS’s MVEBs are adequate for transportation conformity purposes are outlined in 40 CFR 93.118(e)(4).
