Sixty percent of individuals with substance use disorders whose treatment and recovery support services were supported wholly or in part by SAMHSA block grant funds were also uninsured. A substantial proportion of this population has gained health insurance coverage through Medicaid, Medicare, or private insurance. However, coverage provided by these plans and programs do not necessarily provide access to the full range of support services needed to achieve and maintain recovery for most of these individuals and their families.

Given these changes, SAMHSA has conveyed that block grant funds be directed toward four purposes: (1) To fund priority treatment and support services for individuals without insurance or who cycle in and out of health insurance coverage; (2) to fund those priority treatment and support services not covered by Medicaid, Medicare or private insurance offered through the exchanges and that demonstrate success in improving outcomes and/or supporting recovery; (3) to fund universal, selective and indicated prevention activities and services; and (4) to collect performance and outcome data to determine the ongoing effectiveness of behavioral health prevention, treatment and recovery support services and to plan the implementation of new services on a nationwide basis.

To help states meet the challenges of 2018 and beyond, and to foster the implementation and management of an integrated physical health and mental health and addiction service system, SAMHSA must establish standards and expectations that will lead to an improved system of care for individuals with or at risk of mental and substance use disorders. Therefore, this application package includes fully exercising SAMHSA’s existing authority regarding states’, territories’ and the Red Lake Band of the Chippewa Tribe’s (subsequently referred to as “states”) use of block grant funds as they fully integrate behavioral health services into the broader health care continuum.

Consistent with previous applications, the FY 2018–2019 application has sections that are required and other sections where additional information is requested. The FY 2018–2019 application requires states to submit a face sheet, a table of contents, a behavioral health assessment and plan, reports of expenditures and persons served, an executive summary, and funding agreements and certification of uses. SAMHSA is requesting information on key areas that are critical to the states success in addressing health care integration. Therefore, as part of this block grant planning process, SAMHSA is asking states to identify both their promising or effective strategies as well as their technical assistance needs to implement the strategies they identify in their plans for FYs 2018 and 2019.

To facilitate an efficient application process for states in FYs 2018–2019, SAMHSA convened an internal workgroup to review and modify the application for the block grant planning section. In addition, SAMHSA utilized the questions and requests for clarification from representatives from SMHAs and SSAs to inform the proposed changes to the block grants. Based on these discussions with states, SAMHSA is proposing several changes to the block grant programs as discussed in greater detail below.

Changes to Assessment and Planning Activities

The proposed revisions reflect changes within the planning section of the application. The most significant change involves a movement away from a request for multiple narrative descriptions of the state’s activities in a variety of areas to a more quantitative response to specific questions, reflecting statutory or regulatory requirements where applicable, or reflecting specific uses of block grant funding. In addition, to respond to the requests from states, the required and requested sections have been clearly identified.

The FY 2016–2017 application sections that gave states policy guidance on the planning and implementation of system issues which were not authorized services under either block grant have been eliminated to avoid confusion. In addition, the statutory criteria which govern the plan, report and application have been included in the document as references.

Other specific proposed revisions are described below:

- **Health Care System, Parity and Integration**—This section is a consolidation of the FY 2016–2017 sections on the health insurance marketplace, parity, enrollment, and primary and behavioral health care integration. It is vital that SMHAs and SSAs programming and planning reflect the strong connection between behavioral and physical health. Fragmented or discontinuous care may result in inadequate diagnosis and treatment of both physical and behavioral conditions, including co-occurring disorders. Health care professionals, consumers of mental, substance use disorders, co-occurring mental, and substance use disorders...
treatment recognize the need for improved coordination of care and integration of primary and behavioral health care. Health information technology, including electronic health records (EHRs), and telehealth are examples of important strategies to promote integrated care. Use of EHRs—in full compliance with applicable legal requirements—may allow providers to share information, coordinate care and improve billing practices.

- **Evidenced-based Practices for Early Serious Mental Illness for the MHBG**—In its FY 2016 appropriation, SAMHSA was directed to require that states set aside 10 percent of their MHBG allocation to support evidence-based programs that provide treatment to those with early SMI including but not limited to psychosis at any age.

SAMHSA worked collaboratively with the National Institute on Mental Health (NIMH) to review evidence showing efficacy of specific practices in ameliorating SMI and promoting improved functioning. NIMH has released information on Components of Coordinated Specialty Care (CSC) for First Episode Psychosis. Results from the NIMH funded Recovery After an Initial Schizophrenia Episode (RAISE) initiative, a research project of the NIMH, suggest that mental health providers across multiple disciplines can learn the principles of CSC for First Episode of Psychosis (FEP), and apply these skills to engage and treat persons in the early stages of psychotic illness. States can implement models across a continuum, which have demonstrated efficacy, including the range of services and principles identified by NIMH. Utilizing these principles, regardless of the amount of investment, and with leveraging funds through inclusion of services reimbursed by Medicaid or private insurance, every state will be able to begin to move their system toward earlier intervention, or enhance the services already being implemented.

- **Statutory changes required by the 21st Century CURES Act**—The CURES Act required several language changes, to include: A change from Administrator of SAMHSA to Assistant Secretary for Mental Health and Substance Use; a change from “Substance Misuse Prevention” to “Substance Use Disorder Prevention” and others. In addition, the Act eliminated section 1929 governing the annual treatment needs assessment and changed the specific requirements for the state determination of need to include estimates on the number of individuals who need treatment, who are pregnant women, women with dependent children, individuals with a co-occurring mental health and substance use disorder, persons who inject drugs, and persons who are experiencing homelessness.

**Other Changes**

While the statutory deadlines and block grant award periods remain unchanged, SAMHSA encourages states to turn in their application as early as possible to allow for a full discussion and review by SAMHSA. Applications for the MHBG-only are due no later than September 1, 2017. The application for SABG-only is due no later than October 1, 2017. A single application for MHBG and SABG is due no later than September 1, 2017.

**Estimates of Annualized Hour Burden**

The estimated annualized burden for the uniform application is 33,374 hours. Burden estimates are broken out in the following tables showing burden separately for Year 1 and Year 2. Year 1 includes the estimates of burden for the uniform application and annual reporting. Year 2 includes the estimates of burden for the recordkeeping and annual reporting. The reporting burden remains constant for both years.

### DEPARTMENT OF HOMELAND SECURITY

**Coast Guard**

[Docket No. USCG–2016–1059]

**Towing Safety Advisory Committee; April 2017 Meeting**

**AGENCY:** Coast Guard, Department of Homeland Security.

**ACTION:** Notice of Federal Advisory Committee meeting.

**SUMMARY:** The Towing Safety Advisory Committee will meet in Memphis, Tennessee, to review and discuss recommendations from its Subcommittees and to receive briefs on items listed in the agenda under...

**SUPPLEMENTARY INFORMATION.** All meetings will be open to the public.

**DATES:** The Subcommittees will meet on Tuesday, April 11, 2017, from 8 a.m. to 5:30 p.m. The full Towing Safety Advisory Committee will meet on Wednesday, April 12, 2017, from 8 a.m. to 5:30 p.m. These meetings may close early if the Subcommittees or Committee have completed its business.

**ADDRESSES:** All meetings will be held at the Doubletree Hotel by Hilton, 5069 Sanderlin Avenue, Memphis, Tennessee 38117. The telephone number for the Doubletree Hotel is 800–222–8733. The hotel Web site is: http://doubletree3.hilton.com/en/hotels/tennessee/doubletree-by-hilton-hotel-memphis-MEMEHDỊ/index.html

For information on facilities or services for individuals with disabilities, or to request special assistance at the meetings, contact the individual listed in FOR FURTHER INFORMATION CONTACT below as soon as possible.

**Instructions:** You are free to submit comments at any time, including orally...
