NATIONAL SCIENCE FOUNDATION

Notice of Permit Modification Received Under the Antarctic Conservation Act of 1978

AGENCY: National Science Foundation.

ACTION: Notice of permit modification request received and permit issued under the Antarctic Conservation Act of 1978, Public Law 95-541.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of requests to modify permits issued to conduct activities regulated and permits issued under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at Title 45 Part 670 of the Code of Federal Regulations. This is the required notice of a requested permit modification and permit issued.

DATES: March 9, 2017–September 1, 2021.

FOR FURTHER INFORMATION CONTACT:

Nature McGinn, ACA Permit Officer, Office of Polar Programs, Rm. 755, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230. Or by email: ACAPermits@nsf.gov.

SUPPLEMENTARY INFORMATION: The Foundation issued a permit (ACA 2017-019) to Jerry McDonald, Principal in Charge, Leidos Innovations Group, Antarctic Support Contract, on October 30, 2016. The issued permit allows the permit holder entry into five Antarctic Specially Protected Areas (ASPAs) in the Antarctic Peninsula region. The Antarctic Support Contractor's staff provides routine logistics support in the transport of science teams and supporting personnel, and in field camp put-in and take-out. Entry into an ASPA would occur only to support a science project for which a permit has been issued. Entry needs and requirements will be reviewed by ASC Environmental

Health and Safety Department prior to entry and reported per standard procedures.

Now the applicant proposes a permit modification to enter APSA No. 126 (Byers Peninsula, Livingston Island) for the purposes described in this permit. The Environmental Officer has reviewed the modification request and has determined that the amendment is not a material change to the permit, and it will have a less than a minor or transitory impact.

The permit modification was issued on March 9, 2017.

Nadene G. Kennedy,

Polar Coordination Specialist, Office of Polar Programs.

II. Introduction

The NRC is considering issuance of an amendment to Renewed Facility Operating License No. NFP-43, issued to DTE, for operation of the Fermi, Unit 2, located in Monroe County, Michigan. The proposed amendment requests modification of the TSs for emergency core cooling system (ECCS) instrumentation (TS 3.3.5.1) and reactor core isolation cooling (RCIC) system instrumentation (TS 3.3.5.2). The proposed changes add footnotes indicating that the injection functions of “Drywell Pressure—High” for HPCI and “Manual Initiation” for HPCI and RCIC are not required to be operable under low reactor pressure conditions.

Before any issuance of the proposed license amendment, the NRC will need to make the findings required by the Atomic Energy Act of 1954, as amended (the Act), and NRC's regulations.

The NRC has made a proposed determination that the license amendment request involves no significant hazards consideration. Under the NRC's regulations in § 50.92 of title 10 of the *Code of Federal Regulations* (10 CFR), this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2)
