**SUPPLEMENTARY INFORMATION:** The Environmental Protection Agency has submitted an information collection request (ICR), "NSPS for VOC Emissions from Petroleum Refinery Wastewater Systems (40 CFR part 60, subpart QQQ) (Renewal)" (EPA ICR No. 1136.12, OMB Control No. 2060-0172), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through March 31, 2017. Public comments were previously requested via the **Federal Register** (81 FR 26546) on May 3, 2016 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this ICR. The docket can be viewed online at [www.regulations.gov](http://www.regulations.gov), or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

**Abstract:** Owners and operators of petroleum refinery wastewater systems are required to keep records of design and operating specifications of all equipment installed to comply with the standards such as water seals, roof seals, control devices, and other equipment. This information is necessary to ensure that equipment design and operation specifications are met, and the source is in compliance with NSPS Subpart QQQ.

**Form Numbers:** None.

**Respondents/affected entities:** Petroleum refinery wastewater systems.

**Respondent's obligation to respond:** Mandatory (40 CFR part 60, subpart QQQ).

**Estimated number of respondents:** 149 (total).

**Frequency of response:** Initially, occasionally, and semiannually.

**Total estimated burden:** 10,200 hours (per year). Burden is defined at 5 CFR 1320.3(b).

**Total estimated cost:** \$19,400 in either annualized capital/startup or operation & maintenance costs.

**Changes in the Estimates:** There is an adjustment increase in the overall burden in this ICR when compared to the previous ICR. This is due to a correction from 135 in the previous ICR to 149 in this ICR renewal in the

estimated number of petroleum refineries subject to the NSPS. This ICR references the most recently available industry information from the Refinery Sector Rule reconsideration and is consistent with the source count for NSPS Subpart J for petroleum refineries. In addition, this ICR assumes all sources will take time to re-familiarize with the regulation each year.

**Abstract:** The affected entities are subject to the General Provisions of the NESHAP (40 CFR part 61, subpart A), and to the Provisions at 40 CFR part 61, subparts L and Y. Owners or operators of the affected facilities must submit a one-time only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required quarterly or semiannually at a minimum.

**Form Numbers:** None.

**Respondents/affected entities:** Owners or operators of benzene storage vessels and coke oven by-product recovery plants.

**Respondent's obligation to respond:** Mandatory (40 CFR part 61, subparts L and Y).

**Estimated number of respondents:** 21 (total).

**Frequency of response:** Occasionally, semiannually, and annually.

*Total estimated burden:* 3,220 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* \$332,000 (per year), which includes no annualized capital/startup or operation & maintenance costs.

*Changes in the Estimates:* There is a small adjustment increase in the respondent labor hours in this ICR compared to the previous ICR. The increase is due to a change in Agency assumption in calculating labor hours; this ICR assumes all sources will take time to re-familiarize with the regulation each year. This results in a small overall increase in burden.

*Abstract:* Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 63, subpart A), as well as for the specific requirements at 40 CFR part 63, subpart EEEEEEE. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with these standards.

*Form Numbers:* None.

*Respondents/Affected Entities:* Gold mine ore processing and production facilities.

*Respondent's Obligation To Respond:* Mandatory (40 CFR part 63 Subpart EEEEEEE).

*Estimated Number of Respondents:* 21 (total).

*Frequency of Response:* Initially, occasionally, semiannually, and annually.

*Total Estimated Burden:* 2,840 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total Estimated Cost:* \$227,000 in either annualized capital/startup or operation & maintenance costs.

*Changes in the Estimates:* There is an adjustment increase in the respondent labor hours as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the respondent labor hour estimates occurred for two reasons. First, a labor burden estimate for completing Method 29 testing was added based on comments from the Nevada Mining Association (note: This activity was already required by the rule; however, the previous ICR did not estimate the labor burden for completing the testing). Second, this ICR assumes all existing respondents will have to familiarize with the regulatory requirements each year.

There is a small adjustment decrease of \$130 in the total capital and O&M costs as currently identified in the OMB Inventory of Approved Burdens. This decrease occurred because this ICR rounds totals to three significant figures. There is no change in methodology for calculating O&M costs.
