

Total estimated burden: 3,220 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$332,000 (per year), which includes no annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There is a small adjustment increase in the respondent labor hours in this ICR compared to the previous ICR. The increase is due to a change in Agency assumption in calculating labor hours; this ICR assumes all sources will take time to re-familiarize with the regulation each year. This results in a small overall increase in burden.

Abstract: Owners and operators of affected facilities are required to comply with reporting and record keeping requirements for the General Provisions (40 CFR part 63, subpart A), as well as for the specific requirements at 40 CFR part 63, subpart EEEEEEE. This includes submitting initial notifications, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with these standards.

Form Numbers: None.

Respondents/Affected Entities: Gold mine ore processing and production facilities.

Respondent's Obligation To Respond: Mandatory (40 CFR part 63 Subpart EEEEEEE).

Estimated Number of Respondents: 21 (total).

Frequency of Response: Initially, occasionally, semiannually, and annually.

Total Estimated Burden: 2,840 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total Estimated Cost: \$227,000 in either annualized capital/startup or operation & maintenance costs.

Changes in the Estimates: There is an adjustment increase in the respondent labor hours as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the respondent labor hour estimates occurred for two reasons. First, a labor burden estimate for completing Method 29 testing was added based on comments from the Nevada Mining Association (note: This activity was already required by the rule; however, the previous ICR did not estimate the labor burden for completing the testing). Second, this ICR assumes all existing respondents will have to familiarize with the regulatory requirements each year.

There is a small adjustment decrease of \$130 in the total capital and O&M costs as currently identified in the OMB Inventory of Approved Burdens. This decrease occurred because this ICR rounds totals to three significant figures. There is no change in methodology for calculating O&M costs.

Director, Collection Strategies Division.

The Payphone Compensation Rules satisfy section 276 by identifying the party liable for compensation and establishing a mechanism for PSPs to be paid. The Payphone Compensation Rules: (1) Place liability to compensate PSPs for payphone-originated calls on the facilities-based long distance carriers or switch-based resellers (SBRs) from whose switches such calls are completed; (2) define these responsible carriers as "Completing Carriers" and require them to develop their own system of tracking calls to completion, the accuracy of which must be confirmed and attested to by a third-party auditor; (3) require Completing Carriers to file with PSPs a quarterly report and also submit an attestation by the chief financial officer (CFO) that the payment amount for that quarter is accurate and is based on 100% of all completed calls; (4) require quarterly reporting obligations for other facilities-based long distance carriers in the call path, if any, and define these carriers as "Intermediate Carriers;" (5) give parties
