—Online at <http://www.mafmc.org/comments/squid-amendment-public-comments>.

The purpose of the meetings and comment period is gather input from the public on the alternatives in the amendment. The objectives of this action are to:

A. Consider the appropriate number of vessels in the directed longfin squid and *Illex* squid fisheries and design appropriate management measures for permitted vessels. The Council is considering this action because there is considerable latent effort in both fisheries—a relatively small portion of vessels with limited access (“moratorium”) squid permits account for the majority of landings in most years. The Council is concerned that activation of latent permits in the squid fisheries could lead to excessive fishing effort (shortening seasons) on these semeparous, sub-annual species, and increased catch of non-target species.

B. Re-evaluate the management of longfin squid in Trimester 2. The Council is considering this action because the productivity of the longfin squid stock may be negatively impacted if excessive fishing effort in T2, which occurs on the inshore spawning grounds, does not allow sufficient spawning and/or hatching from egg mops. Additional information and relevant background documents are available on the Council’s Web site at <http://www.mafmc.org/actions/squid-capacity-amendment>. The public hearing document, which describes and analyzes the alternatives, will be posted there by April 18, 2017.
