DEPARTMENT OF TRANSPORTATION**National Highway Traffic Safety Administration**

[Docket No. NHTSA-2016-0066; Notice 2]

Bridgestone Americas Tire Operations, LLC, Grant of Petition for Decision of Inconsequential Noncompliance

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Grant of petition.

SUMMARY: Bridgestone Americas Tire Operations, LLC (BATO), has determined that certain Bridgestone VSB heavy-duty radial truck tires do not fully comply with Federal Motor Vehicle Safety Standard (FMVSS) No. 119, *New Pneumatic Tires for Motor Vehicles with a GVWR of more than*

4,536 Kilograms (10,000 pounds) and Motorcycles. BATO filed a noncompliance report dated April 7, 2016. BATO then petitioned NHTSA on May 5, 2016, for a decision that the subject noncompliance is inconsequential as it relates to motor vehicle safety.

ADDRESSES: For further information on this decision contact Abraham Diaz, Office of Vehicle Safety Compliance, the National Highway Traffic Safety Administration (NHTSA), telephone (202) 366-5310, facsimile (202) 366-5930.

SUPPLEMENTARY INFORMATION:

I. Overview: Bridgestone Americas Tire Operations, LLC (BATO), has determined that certain Bridgestone VSB heavy-duty radial truck tires do not fully comply with paragraph S6.5(d) of Federal Motor Vehicle Safety Standard (FMVSS) No. 119, *New Pneumatic Tires for Motor Vehicles with a GVWR of more than 4,536 Kilograms (10,000 pounds) and Motorcycles.* BATO filed a report dated April 7, 2016, pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports.* BATO then petitioned NHTSA on May 5, 2016, pursuant to 49 U.S.C. 30118(d) and 30120(h) and their implementing regulations at 49 CFR part 556, for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential as it relates to motor vehicle safety.

Notice of receipt of the petition was published, with a 30-day public comment period, on June 29, 2016, in the **Federal Register** (81 FR 42394). No comments were received. To view the petition and all supporting documents log onto the Federal Docket Management System (FDMS) Web site at: <http://www.regulations.gov/>. Then follow the online search instructions to locate docket number "NHTSA-2016-0066."

II. Tires Involved: Affected are approximately 1,167 Bridgestone VSB heavy-duty radial truck tires used mainly in a military application. Other instances include a few off-road logging applications and a single on-road snow plow vehicle for single load application. The affected tires were manufactured between April 5, 2015, and March 30, 2016.

III. Noncompliance: BATO stated that the subject tires are rated for both a single and a dual load and are marked with the proper maximum load rating and inflation pressure for a single load. However, they are not marked with the dual load information. As a result, the

tires do not fully comply with paragraph S6.5(d) of FMVSS No. 119.

IV. Rule Text: Paragraph S6.5(d) of FMVSS No. 119 provides, in pertinent part:

S6.5 Tire markings. Except as specified in this paragraph, each tire shall be marked on each sidewall with the information specified in paragraphs (a) through (j) of this section . . .

(d) The maximum load rating and corresponding inflation pressure of the tire, shown as follows:

(Mark on tires rated for single and dual load): Max load single __ kg (__ lb) at __ Pa (__ psi) cold. Max load dual __ kg (__ lb) at __ kPa (__ psi) cold.

(Mark on tires rated only for single load): Max load __ kg (__ lb) at __ kPa (__ psi) cold. . .

V. Summary of BATO's Petition:

BATO described the subject noncompliance and stated its belief that the noncompliance is inconsequential as it relates to motor vehicle safety. BATO states that the subject tires meet or exceed all of the performance requirements of FMVSS No. 119. BATO also contends that the missing dual load information has no effect on the performance of the subject tires and that the subject tires were tested and passed at the single tire load, which is higher and more punishing than that of the dual tire load.

BATO asserted that NHTSA has previously granted inconsequential noncompliance petitions similar to the subject noncompliance.

BATO submitted a supplemental letter to the agency dated September 23, 2016, which provided information about the use of the affected tires. BATO accounted for 100% of the affected tires as follows:

1. BATO stated that approximately 90% of all affected tires were sold to a customer using the tires on an M911 Heavy Equipment Transporter (HET) used by the U.S. Army. The M911 HET uses the subject tires in dual-load configuration. The dual-load configuration is used on the third and fourth axles. BATO provided an excerpt of the U.S. Army Technical Manual for vehicle M911. In the manual, the vehicle manufacturer specifies the maximum load for the third and fourth tandem axles as 65,000 lbs. Because there are 8 tires total on these two axles, this corresponds to 8,125 lbs per tire. BATO further states that from the Tire and Rim Association (TRA) Year Book, the subject tires are rated for 9,410 lbs in dual-load applications when inflated to 85 psi. Thus, in a maximum-load condition, the subject tires each have 1,285 lbs of reserve load (nearly 14%) when used in the only known on-road
