DEPARTMENT OF COMMERCE
Submission for OMB Review;
Comment Request

The Department of Commerce will
submit to the Office of Management and
Budget (OMB) for clearance the
following proposal for collection of
information under the provisions of the
Paperwork Reduction Act (44 U.S.C.
chapter 35).

Agency: U.S. Census Bureau.

Title: National Survey of Children’s
Health.

OMB Control Number: 0607–0990.

Form Number(s):

English survey forms include:

NSCH–S1 (English Screener),

NSCH–T1 (English Topical for 0- to 5-
year-old children),

NSCH–T2 (English Topical for 6- to
11-year-old children),

NSCH–T3 (English Topical for 12- to
17-year-old children).

Spanish survey forms include:

NSCH–S1 (Spanish Screener),

NSCH–S–T1 (Spanish Topical for 0-
to 5-year-old children),

NSCH–S–T2 (Spanish Topical for 6-
to 11-year-old children), and

NSCH–S–T3 (Spanish Topical for 12-
to 17-year-old children).

Type of Request: Regular submission.

Number of Respondents: 58,345 for
the Screener and 23,460 for the Topical.

Average Hours per Response: 0.083
for the screener and 0.5 for the topical.

Burden Hours: 16,573.

Needs and Uses: The National Survey
of Children’s Health (NSCH) enables the
Maternal and Child Health Bureau
(MCHB) of the Health Resources and
Services Administration (HRSA) of the
U.S. Department of Health and Human
Services (HHS) to produce national and
state-based estimates on the health and
well-being of children, their families,
and their communities as well as
estimates of prevalence and impact
of children with special health care
needs.

Data will be collected using one of
two modes. The first mode is a web
instrument (Centurion) survey that
contains the screener and topical
instruments. The web instrument first
will take the respondent through the
screener questions. If the household
screens into the study, the respondent
will be taken directly into one of the
design sets of questions. The second
mode is a mailout/mailback of a
self-administered paper-and-pencil
interviewing (PAPI) screener instrument
followed by a separate mailout/mailback
of a PAPI age-based topical instrument.

The National Survey of Children’s
Health (NSCH) is a large-scale (sample
size is 156,054 addresses) national
survey. The survey will consist of one
experiment to test the efficacy of an
infographic in the initial package as
well as two key, non-experimental
design elements. It is anticipated that
the infographic will provide respondents
with a generally pleasant overview of the survey, including
survey design, key estimates from past
iterations, and information on how the
data can benefit their community, will
encourage response. Higher response
can reduce follow-up costs and
nonresponse bias. The first additional
non-experimental design element is a $2
cash incentive mailed to 90% of
sampled addresses; the remaining
10% (the control) will receive no
incentive to monitor the effectiveness of
the cash incentive. This incentive is
designed to increase response and
reduce nonresponse bias. The incentive
amount was chosen following an
incentive test in the 2016 NSCH. From
this test, we concluded that the $2
incentive significantly increased
response over no incentive, particularly
among low-response groups, and was
more cost effective than the $5
incentive. The second additional
non-experimental design element is a
modification to data collection
procedures based on the block group-
level paper-only response probability to
identify households (30% of the sample)
that would be more likely to respond by
data and send them a paper
questionnaire from the initial mailing.

Affected Public: Parents, researchers,
policy makers, and family advocates.

Frequency: This 2017 collection is the
second administration of the NSCH. It is
expected that this will become an
annual or biennial survey, with a new
sample drawn for each administration.

Respondent’s Obligation: Voluntary.
