Committee has up-to-date and complete information about the nonprofit agency’s qualifications to participate in the AbilityOne Program. This form is completed only for new additions of products or services to the PL, and does not include administrative additions, or any other administrative or fair market price changes, to the PL. The already established annual representations and certification form (OMB number: 3037–0013) will continue to be required. The project specific representations and certification form being certified has been developed to include the regulatory requirements of section 51–4.3 and to collect other information pertinent to the Committee’s determination of nonprofit agency qualifications under 41 CFR 51–2.4(a) (b).

Title: Project Specific Representations and Certification Form for AbilityOne Qualified Nonprofit Agency

OMB Control Number: 3037–0014.

Form Number: Project Specific Reps and Certs.

Description of Respondents: Nonprofit agencies serving people who are blind or significantly disabled that participate in the AbilityOne Program.

Annual Number of Respondents: About 469 nonprofit agencies serving people who are blind or significantly disabled annually participate in the AbilityOne Program.

Total Annual Burden Hours: Burden is estimated to average 2 hours per respondent. Total annual burden is 938 hours. Note: This burden estimate is only for the nonprofit agencies that will be submitting addition requests for a product or service with a total contract value exceeding $500,000. Therefore, not all participating NPAs will be required to complete the form.

We invite comments concerning this renewal on: (1) Whether the collection of information is necessary for the proper performance of our agency’s functions, including whether the information will have practical utility; (2) the accuracy of our estimate of the burden of the collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents.

Amy B. Jensen,
Director, Business Operations.

Supplementary Information: Under the PRA, Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. “Collection of Information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3 and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA, 44 U.S.C. 3506(c)(2)(A), requires Federal agencies to provide a 60-day notice in the Federal Register concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, the Commission is publishing notice of the existing collections of information listed below.

Title: Real-Time Public Reporting and Block Trade (OMB Control No. 3038–0070). This is a request for extension of currently approved information collections.

Abstract: Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) added to the Commodity Exchange Act (CEA) new section 2(a)(13), which establishes standards and requirements related to real-time reporting and the public availability of swap transaction and pricing data. Section 2(a)(13) and part 43 of the Commission’s Regulations require reporting parties to publish real-time swap transactions and pricing data to the general public. Without the frequency of reporting set forth in part 43, the Commission would not be able to adequately assess the swap markets and, more importantly, would fail to achieve the frequency of reporting and promotion of increased price discovery in the swaps market which are mandated by the Dodd-Frank Act.

With respect to these information collections, the Commission invites comments on:

- Whether the collections of information are necessary for the proper performance of the functions of the Commission, including whether the information will have a practical use;
- The accuracy of the Commission’s estimate of the burden of the collections of information, including the validity of the methodology and assumptions used;
- Ways to enhance the quality, usefulness, and clarity of the information to be collected; and
- Ways to minimize the burden of collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology; e.g., permitting electronic submission of responses.

All comments must be submitted in English, or if not, accompanied by an English translation. Comments will be posted as received to http://www.cftc.gov. You should submit only information that you wish to make available publicly. If you wish the
Commission to consider information that you believe is exempt from disclosure under the Freedom of Information Act, a petition for confidential treatment of the exempt information may be submitted according to the procedures established in §145.9 of the Commission’s regulations.13

The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from http://www.cftc.gov that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of the Information Collection Request will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the Freedom of Information Act.

Burden Statement: Part 43 of the Commission’s regulations results in three information collection requirements within the meaning of the PRA.3 The first collection of information requirement under part 43 imposes a reporting requirement on registered swap execution facilities (“SEFs”) or designated contract markets (“DCMs”) when a swap is executed on a trading facility or on the parties to a swap transaction when the swap is executed bilaterally. The second collection of information requirement under part 43 of the Commission’s regulations creates a public dissemination requirement on registered swap data repositories (“SDRs”). The third collection of information requirement imposes a recordkeeping requirement for SEFs, DCMs, SDRs and any reporting party (as defined under the Commission’s regulations).4

The Commission notes that rather than the initial estimate of 40 SEFs, there currently are 57 SEFs either registered with the Commission or with registrations pending.5 The Commission notes that rather than the initial estimate of 18 DCMs, there currently are 25 DCMs registered with the Commission.6 The Commission notes that rather than the initial estimate of 15 SDRs, there currently are 4 SDRs registered with the Commission.7 Based on the experience gained by the Commission with regard to SDRs, the Commission estimates that rather than

the initial estimate of 750 reporting parties who are not swap dealers (“SDs”) or major swap participants (“MSPs”), and who contract with third parties to satisfy their reporting obligations, there are 496 such reporting parties.8 The Commission estimates that rather than the initial estimate of 250 reporting parties who are not swap dealers (“SDs”) or major swap participants (“MSPs”), and who satisfy their reporting obligations themselves, there are 207 such reporting parties.9 The burden hours for each entity category based upon these new estimates are noted in the applicable table below.

Recurring Annual Burden Hours for SEFs
Respondents/Affected Entities: SEFs.
Estimated number of respondents: 25.
Estimated total annual burden on respondents: 52,000 hours.8

Recurring Annual Burden Hours for DCMs
Respondents/Affected Entities: DCMs.
Estimated number of respondents: 15.
Estimated total annual burden on respondents: 31,200 hours.9

Recurring Annual Burden Hours for SDRs
Respondents/Affected Entities: SDRs.
Estimated number of respondents: 4.
Estimated total annual burden on respondents: 27,600 hours.10

Recurring Annual Burden Hours for Non SD/MSPs Using Third Party
Respondents/Affected Entities: Non SD/MSP’s Using Third Party.
Estimated number of respondents: 496.
Estimated total annual burden on respondents: 10,912 hours.11

Recurring Annual Burden Hours for Non SD/MSPs Reporting Themselves
Respondents/Affected Entities: Non SD/MSP’s Reporting Themselves.
Estimated number of respondents: 207.

Estimated total annual burden on respondents: 139,932 hours.12

In addition to the above burden hours for compliance with part 43 obligations generally, the Commission determined that certain market participants would incur burden hours associated with the masking of the geographic detail of the underlying assets to a swap in the other commodity asset class, and with the election to have a swap transaction treated as a block trade or large notional off-facility swap.13 The Commission initially estimated that respondent SDRs would incur an aggregate of 3,307 annual burden hours in connection with the masking of geographic detail of the underlying assets to a swap in the other commodity asset class. Based on the Commission’s observation of registered SDRs’ operations and compliance with part 43’s requirements, the Commission is increasing this estimate and now estimates that SDRs will incur an aggregate of 3,307 annual burden hours in connection with the masking of geographic detail of the underlying assets to a swap in the other commodity asset class.14 Based on the Commission’s observation of registered SDRs’ operations and compliance with part 43’s requirements, the Commission is increasing this estimate and now estimates that SDRs will incur an aggregate of 3,307 annual burden hours in connection with the masking of geographic detail of the underlying assets to a swap in the other commodity asset class.15 The Commission initially estimated that market participants would incur an aggregate of 2,167 annual burden hours in connection with the election to have a swap transaction treated as a block trade.16 Based on the Commission’s observation of market participants’ compliance with part 43’s requirements, the Commission is increasing this estimate and now estimates that market participants will incur an aggregate of 3,648 annual burden hours in connection with the election to have a swap transaction treated as a block trade.17

The Commission initially estimated that market participants would incur an aggregate of 2,255 annual burden hours in connection with the election to have a swap transaction treated as a large notional off-facility swap. Based on
