conducted a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the OMB for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

The Secretary of Labor is required by the Immigration and Nationality Act (INA) to certify that any alien seeking to enter the United States for the purpose of performing skilled or unskilled labor will not adversely affect wages and working conditions of U.S. workers similarly employed, and that there are not sufficient U.S. workers able, willing, and qualified to perform such skilled or unskilled labor. Many foreign professional athletes must qualify as skilled labor to gain permanent admission to the United States. Section 212(a)(5)(A)(ii) of the INA deals specifically with professional athletes coming to the United States on a permanent basis as immigrants.

Part A of Form ETA–750 is used to collect information that, when appropriate, permits DOL to certify that the admission of a foreign professional athlete meets the requirements of Section 212(a)(5)(A) of the INA. Part B of Form ETA–750 provides detailed information about a foreign national's education and work history, and is used by DOL to collect information about the professional athlete on whose behalf an application for permanent labor certification is filed. The Department of Homeland Security also uses Part B under 8 CFR 204.5(k)(4)(ii), for aliens without an employer sponsor who are applying for a National Interest Waiver (NIW) of the job offer requirement under INA Section 203(b)(2)(B)(i), which allows aliens to self-petition and, where appropriate, to enter without a labor certification. Sections 203(b)(2)(B)(i) and 212(a)(5)(A) of the INA (8 U.S.C. 1153(b)(2)(B)(i) and § 1182(a)(5)(A)) and 8 CFR 204.5(k)(4)(ii) authorize this information collection.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB under the PRA approves it and the information collection displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the ADDRESSES section. Comments must be written to receive consideration, and they will be summarized and included in the request for OMB approval of the final ICR. In order to help ensure appropriate consideration, comments should mention ETA, OMB Control Number 1205–0015.

Submitted comments will also be a matter of public record for this ICR, and posted on the Internet without redaction. The DOL encourages commenters not to include personally identifiable information, confidential business data, or other sensitive statements/information in any comments. The DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA’s estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 et. seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires OSHA to obtain such information with minimum burden upon employers, particularly those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the Agency’s functions, including whether the information is useful;
- The accuracy of OSHA’s estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and Ways to minimize the burden on employers who must comply-for example, by Using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements contained in the Portable Fire Extinguishers Standard (Annual Maintenance Certification Record) (29 CFR 1910.157(e)(3)). OSHA is requesting an adjustment increase of 4,489,161 responses (from 1,380,750 to 5,869,911), and an increase of 224,458 burden hours (from 69,038 to 293,496 burden hours). The increased estimate for the number of responses stems from a reconsideration of how this figure should be calculated. Prior estimates fully accounted for all time and cost burden but only counted responses imposing a time burden as a response to reginfo.gov database purposes. Employers who contract for an inspection also are making a response under the OSHA Inspector by those ICR adjusts the analysis. This ICR’s adjustment increase is also a result of the number of portable fire extinguishers increasing from 1,380,750 to 5,869,911 (see explanation under Item 12). In addition, there is an increase in the cost under Item 13 from $8,583,559 to $9,538,604 (an increase of $955,045). This cost increase is the result of updated data indicating a decrease in the number of establishments; thus, the Agency estimates an increase in the number of portable fire extinguishers inspected by outside contractors. The Agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB.

Title: Portable Fire Extinguishers (Annual Maintenance Certification Record (29 CFR 1910.157(e)(3)).

AFFECTED PUBLIC: Business or other for-profits.

Number of Responses: 5,869,911.

Frequency of Responses: On occasion.

Average Time per Response: Approximately 30 minutes (.50 hour) to perform and record the required maintenance inspection.

Estimated Total Burden Hours: 293,496.

Estimated Cost Operation and Maintenance: $9,538,604.

IV. Public Participation—Submission of Comments on this Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows:

1. Electronically at http://regulations.gov, which is the Federal eRulemaking Portal;
2. By facsimile (fax); or

All comments, attachments, and other materials must identify the Agency name and the OSHA docket number for the ICR (Docket No. OSHA–2010–0039). SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). The OSH Act also requires OSHA to obtain such information with minimum burden upon employers, particularly those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657). Paragraph (e)(3) of the Standard specifies that employers must subject each portable fire extinguisher to an annual maintenance inspection and record the date of the inspection. In addition, this provision requires employers to retain the inspection record for one year after the last entry or for the life of the shell, whichever is less, and to make the record available to OSHA on request. This recordkeeping requirement assures workers and Agency compliance officers that portable fire extinguishers located in the workplace will operate normally in case of fire; in addition, this requirement provides evidence to OSHA compliance officers during an inspection that the employer performed the required maintenance checks on the portable fire extinguishers.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employees filing occupational safety or health complaints) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and collections of information in accord with the Paperwork Reduction Act (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA’s estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (the OSH Act) (29 U.S.C. 651 et seq.) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

Under paragraphs (a) and (c) of 29 CFR 1903.11 ("Complaints by employees"), employees and their representatives may notify the OSHA area director or an OSHA compliance officer of safety and health hazards regulated by the Agency that they believe exist in their workplaces at any time. These provisions state further that this notification must be in writing and “shall set forth with reasonable particularity the grounds for the notice, and shall be signed by the employee or representative of the employee.”

In addition to providing specific hazard information to the Agency, paragraph (a) permits employees/employee representatives to request an inspection of the workplace. Paragraph (c) also addresses situations in which employees/employee representatives may provide the information directly to the OSHA compliance officer during an inspection. An employer’s former employees may also submit complaints to the Agency.

To address the requirements of paragraphs (a) and (c), especially the requirement that the information be in writing, the Agency developed the OSHA–7 Form; this form standardized and simplified the hazard reporting process. For paragraph (a), they may complete an OSHA–7 Form obtained...
