SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC received, by letter dated February 15, 2017 (ADAMS Accession No. ML17046A072, as supplemented March 9, 2017, ADAMS Accession No. ML17072A381) GEH's license amendment request (LAR) No. 15 for Materials License No. SNM-2500 (LAR 2500-15) for the GEH Facility at Morris, Illinois in accordance with 10 CFR 72.56. The amendment, if approved, would provide clarifying administrative changes to the current SNM 2500 license. The proposed changes add descriptions of authorized materials and physical forms currently onsite in order to be consistent with the approved Consolidated Safety Analysis Report (CSAR) sections. The amendment requests no changes in the scope or type of operations presently authorized by the license.

An NRC administrative completeness review found the application acceptable for a technical review (ADAMS Accession No. ML17086A009). Prior to approving LAR 2500-15, the NRC will need to make the findings required by the Atomic Energy Act of 1954 as amended (the Act), and the NRC's regulations. The NRC's findings will be documented in a safety evaluation report and an environmental assessment. The environmental assessment will be the subject of a subsequent notice in the **Federal Register**.
