

these funds expire by September 30, 2017, there would be limited time to conduct a NACTEP competition and provide the new administration sufficient time to determine its career and technical education priorities. Therefore, the Department believes it is in the best interest of the public to extend the existing grants for an additional 12 months.

If this proposed waiver becomes final through a notice of final waiver and extension of the project period published in the **Federal Register**: (1) The requirements applicable to continuation awards for current NACTEP grantees set forth in the 2013 NIA and the requirements in 34 CFR 75.253 would apply to any continuation awards sought by current NACTEP grantees; (2) we will make decisions regarding the continuation awards based on grantee program narratives, budgets and budget narratives, and program performance reports and the requirements in 34 CFR 75.253; and (3) we will not announce a new competition or make new awards in FY 2017.

The proposed waiver and project period extension would not exempt the current NACTEP grantees from the appropriation account closing provisions of 31 U.S.C. 1552(a), nor would they extend the availability of funds previously awarded to current NACTEP grantees. As a result of 31 U.S.C. 1552(a), appropriations available for a limited period may be used for payment of valid obligations for only five years after the expiration of their period of availability for Federal obligation. After that time, the unexpended balance of those funds is canceled and returned to the U.S. Department of the Treasury and is unavailable for restoration for any purpose (31 U.S.C. 1552(b)).

Regulatory Flexibility Act Certification

The Secretary certifies that the proposed waiver and extension and the activities required to support additional months of funding would not have a significant economic impact on a substantial number of small entities.

The small entities that would be affected by this proposed waiver and extension are the 30 currently funded NACTEP grantees and any other potential applicants. The Secretary certifies that the proposed waiver and extension would not have a significant economic impact on these entities because the extension of an existing project imposes minimal compliance costs, and the activities required to support the additional years of funding would not impose additional regulatory

burdens or require unnecessary Federal supervision.

Paperwork Reduction Act of 1995

This notice of proposed waiver and extension contains information collection requirements approved by OMB under control number 1830-0542; this proposed waiver and extension does not cause any changes to the approved OMB information collection.

Intergovernmental Review

The NACTEP is not subject to Executive Order 12372 and regulations in 34 CFR part 79.

On March 29, 2017 the Federal Communications Commission released a Report and Order, Amendment of Parts 2, 15, 80, 90, 97, and 101 of the Commission's Rules Regarding Implementation of the Final Acts of the World Radiocommunication Conference (Geneva, 2012)(WRC-12), Other Allocation Issues, and Related Rule Updates, ET Docket No. 15-99, FCC 17-33, which inter alia, amends the Commission's rules for the Amateur Radio Service to provide for frequency sharing requirements in the 135.7-137.8 kHz (2200 meter) and 472-479 kHz (630 meter) bands. These rules will ensure the compatibility of amateur radio operations and Power Line Carrier (PLC) systems that operate in these bands, and will promote the shared use of these bands. As background, in the larger 9-490 kHz band, electric utilities operate PLC systems on power transmission lines for communications important to the reliability and security of electric service to the public. The Commission found that the identification of transmission lines are not always readily identifiable and that amateur operators may not be able to determine whether PLC systems operate in the relevant bands on the subject transmission lines. For these reasons, the Commission adopted a notification process to ensure that amateur stations seeking to operate in these bands are located outside of a minimum separation distance.

Specifically, the information collection requirements contained in Section 97.303(g)(2) requires prior to commencement of operations in these bands, amateur operators must notify the Utilities Telecom Council (UTC) of their intent by submitting their call signs, intended band or bands of operation, and the coordinates of their antenna's fixed location. Amateur stations will be permitted to commence operations after a 30-day period unless UTC notifies the applicant that its requested location is located within one kilometer of PLC systems operating in the same or overlapping frequencies.
