Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason Angling category retention limit adjustment.

SUMMARY: NMFS has determined that the Atlantic bluefin tuna (BFT) daily retention limit that applies to vessels permitted in the Highly Migratory Species (HMS) Angling category and the HMS Charter/Headboat category (when fishing recreationally for BFT) should be adjusted for the remainder of 2017, based on consideration of the regulatory determination criteria regarding inseason adjustments. NMFS is adjusting the Angling category BFT daily retention limit to two school BFT and one large school/small medium BFT per vessel per day/trip for private vessels (*i.e.*, those with HMS Angling category permits); and three school BFT and one large school/small medium BFT per vessel per day/trip for charter

vessels (*i.e.*, those with HMS Charter/Headboat permits when fishing recreationally). These retention limits are effective in all areas, except for the Gulf of Mexico, where NMFS prohibits targeted fishing for BFT.

DATES: Effective May 1, 2017 through December 31, 2017.

SUPPLEMENTARY INFORMATION:

Regulations implemented under the authority of the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) governing the harvest of BFT by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 635. Section 635.27 subdivides the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) among the various domestic fishing categories, per the allocations established in the 2006 Consolidated Highly Migratory Species Fishery Management Plan (2006 Consolidated HMS FMP) (71 FR 58058, October 2, 2006) and amendments, and in accordance with implementing regulations. NMFS is required under ATCA and the Magnuson-Stevens Act to provide U.S. fishing vessels with a reasonable opportunity to harvest the ICCAT-recommended quota.

As a method for limiting fishing mortality on juvenile BFT, ICCAT recommends a tolerance limit on the annual harvest of BFT measuring less than 115 cm (straight fork length) to no more than 10 percent by weight of a Contracting Party's total BFT quota. Any overharvest of such tolerance limit from one year must be subtracted from the tolerance limit applicable in the next year or the year after that. The United States implements this provision by limiting the harvest of school BFT (measuring 27 to less than 47 inches) as appropriate to not exceed the 10-percent limit.

The currently codified baseline U.S. quota is 1,058.9 mt (not including the 25 mt ICCAT allocated to the United States to account for bycatch of BFT in pelagic longline fisheries in the Northeast Distant Gear Restricted Area). See § 635.27(a). The currently codified Angling category quota is 195.2 mt (108.4 mt for school BFT, 82.3 mt for large school/small medium BFT, and 4.5 mt for large medium/giant BFT).

The 2017 BFT fishing year, which is managed on a calendar-year basis and subject to an annual calendar-year
