BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[WC Docket No. 13–39; FCC 13–135; FCC 14–175]

Rural Call Completion Recordkeeping and Reporting Requirements; Correction

AGENCY: Federal Communications Commission.

ACTION: Final rule; correction.

SUMMARY: The Federal Communications Commission (Commission) published a document in the Federal Register on March 4, 2015, concerning its rural call completion recordkeeping and reporting requirements. That document inadvertently omitted reference to the Order on Reconsideration (Reconsideration Order) WC Docket No. 13–39, FCC 14–175, which adopted minor amendments to those requirements. This document corrects that error.

DATES: This correction is effective April 28, 2017.

FOR FURTHER INFORMATION CONTACT: Nirali Patel, Wireline Competition Bureau, Competition Policy Division, (202) 418–7830, or send an email to nirali.patel@fcc.gov.

SUPPLEMENTARY INFORMATION: This document makes the following corrections to the Commission’s final rule, FR Doc. No. 2015–04415, published on March 4, 2015, at 80 FR 11594:

1. On page 115494, in the heading of the rule, add “; FCC 14–175” after “FCC 13–135”.

2. On page 11594, in the SUMMARY section, in the first sentence, add “and the Commission’s Order on Reconsideration (Reconsideration Order) WC Docket No. 13–39, FCC 14–175.” to the end of the sentence.

3. On page 11594, in the DATES section, add “and the amendments to 47 CFR 64.2101, 64.2103, and 64.2105, published at 79 FR 73227, December 10, 2014, and corrected at 80 FR 1007, January 8, 2015.” to the end of the paragraph.

4. On page 11594, in the SUPPLEMENTARY INFORMATION section:

1. In the first sentence, add “and the Commission’s Reconsideration Order,

FCC 14–175, published at 79 FR 73227, December 10, 2014, and corrected at 80 FR 1007, January 8, 2015.” to the end of the sentence:

ii. In the third sentence, add “. and paragraph 66 of document WC Docket No. 13–39, FCC 14–175.” to the end of the sentence; and

iii. In the third column, under the heading “Needs and Uses,” add the following two sentences between the twelfth and thirteenth sentences: “On November 13, 2014, the Commission adopted a Reconsideration Order in WC Docket No. 13–39, FCC 14–175, 79 FR 73227, corrected at 80 FR 1007, Rural Call Completion. The Reconsideration Order reduced the burden on covered providers by excluding certain traffic from the reporting and retention requirements adopted in the Order.”

Federal Communications Commission.

Marlene H. Dortch,
Secretary.

[Docket No. 150121066–5717–02]

RIN 0648–XF346

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason Angling category retention limit adjustment.

SUMMARY: NMFS has determined that the Atlantic bluefin tuna (BFT) daily retention limit that applies to vessels permitted in the Highly Migratory Species (HMS) Angling category and the HMS Charter/Headboat category (when fishing recreationally for BFT) should be adjusted for the remainder of 2017, based on consideration of the regulatory determination criteria regarding inseason adjustments. NMFS is adjusting the Angling category BFT daily retention limit to two school BFT and one large school/small medium BFT per vessel per day/trip for private vessels (i.e., those with HMS Angling category permits); and three school BFT and one large school/small medium BFT per vessel per day/trip for charter vessels (i.e., those with HMS Charter/Headboat permits when fishing recreationally). These retention limits are effective in all areas, except for the Gulf of Mexico, where NMFS prohibits targeted fishing for BFT.

DATES: Effective May 1, 2017 through December 31, 2017.

FOR FURTHER INFORMATION CONTACT: Sarah McLaughlin or Brad McHale, 978–281–9260.

SUPPLEMENTARY INFORMATION: Regulations implemented under the authority of the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 et seq.) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 et seq.) governing the harvest of BFT by persons and vessels subject to U.S. jurisdiction are found at 50 CFR part 635. Section 635.27 subdivides the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) among the various domestic fishing categories, per the allocations established in the 2006 Consolidated Highly Migratory Species Fishery Management Plan (2006 Consolidated HMS FMP) (71 FR 58058, October 2, 2006) and amendments, and in accordance with implementing regulations. NMFS is required under ATCA and the Magnuson-Stevens Act to provide U.S. fishing vessels with a reasonable opportunity to harvest the ICCAT-recommended quota. As a method for limiting fishing mortality on juvenile BFT, ICCAT recommends a tolerance limit on the annual harvest of BFT measuring less than 115 cm (straight fork length) to no more than 10 percent by weight of a Contracting Party’s total BFT quota. Any overharvest of such tolerance limit from one year must be subtracted from the tolerance limit applicable in the next year or the year after that. The United States implements this provision by limiting the harvest of school BFT (measuring 27 to less than 47 inches) as appropriate to not exceed the 10-percent limit.

The currently codified baseline U.S. quota is 1,058.9 mt (not including the 25 mt ICCAT allocated to the United States to account for bycatch of BFT in pelagic longline fisheries in the Northeast Distant Gear Restricted Area). See § 635.27(a). The currently codified Angling category quota is 195.2 mt (108.4 mt for school BFT, 82.3 mt for large school/small medium BFT, and 4.5 mt for large medium/giant BFT). The 2017 BFT fishing year, which is managed on a calendar-year basis and subject to an annual calendar-year
quota, began January 1, 2017. The Angling category season opened January 1, 2017, and continues through December 31, 2017. The size classes of BFT are summarized in Table 1. Please note that large school and small medium BFT traditionally have been managed as one size class, as described below, i.e., a limit of one large school/ small medium BFT (measuring 47 to less than 73 inches). Currently, the default Angling category daily retention limit of one school, large school, or small medium BFT applies to recreational fishermen.

Daily Retention Limits (per Vessel)

- **January 1 through May 14:** 1 school, large school, or small medium (default)
- **May 15 through December 31 (80 FR 27863, May 15, 2015):** Private boats: 1 school and 1 large school/small medium
- **April 23 through December 31 (81 FR 23438, April 21, 2016):** Private boats: 2 school and 1 large school/small medium
- **Charter/Headboats:** 2 school and 1 large school/small medium
- **Charter/Headboats:** 3 school and 1 large school/small medium

### Adjustment of Angling Category Daily Retention Limit

Under §635.23(b)(3), NMFS may increase or decrease the Angling category retention limit for any size class of BFT after considering regulatory determination criteria provided under §635.27(a)(8). Recreational retention limits may be adjusted separately for specific vessel type, such as private vessels, headboats, or charter vessels.

NMFS has considered all of the relevant determination criteria and their applicability to the change in the Angling category retention limit. The criteria and their application are discussed below.

NMFS considered the usefulness of information obtained from catches in the particular category for biological sampling and monitoring of the status of the stock (§635.27(a)(8)(ii)). Biological samples collected from BFT landed by recreational fishermen continue to provide NMFS with valuable parts and data for ongoing scientific studies of BFT age and growth, migration, and reproductive status. Additional opportunity to land BFT would support the collection of a broad range of data for these studies and for stock monitoring purposes.

NMFS considered the catches of the Angling category quota to date and the likelihood of closure of that segment of the fishery if no adjustment is made (§635.27(a)(8)(ii)). NMFS anticipates that the full 2017 Angling category quota would not be harvested under the default retention limit. As shown in Table 2, Angling category landings were approximately 58 and 73 percent of the 184.3-mt annual Angling category quota in 2015 and 2016, respectively.

NMFS also considered the effects of the adjustment on bluefin tuna rebuilding and overfishing and the effects of the adjustment on accomplishing the objectives of the FMP (§635.27(a)(8)(v) and (vi)). These retention limits would be consistent with the quotas established and analyzed in the bluefin tuna quota final rule (80 FR 52198, August 28, 2015), and with objectives of the 2006 Consolidated HMS FMP and amendments, and is not expected to negatively impact stock health or to affect the stock in ways not already analyzed in those documents. It is also important that we limit landings to the subquotas both to adhere to the FMP quota allocations and to ensure that...
landings are as consistent as possible with the pattern of fishing mortality (e.g., fish caught at each age) that was assumed in the projections of stock rebuilding.

Another principal consideration in setting the retention limit is the objective of providing opportunities to harvest the full Angling category quota without exceeding it based on the goals of the 2006 Consolidated HMS FMP and amendments, including to achieve optimum yield on a continuing basis and to optimize the ability of all permit categories to harvest their full BFT quota allocations (related to § 635.27(a)(8)(x)).

The 2016 school bluefin tuna landings represent 3.7 percent of the total U.S. quota for 2016, well under the ICCAT recommended 10-percent limit. Landings of school bluefin tuna in 2015 represented 2.4 percent of the total U.S. quota for 2015. Given that the Angling category landings fell short of the available quota and considering the regulatory criteria above, NMFS has determined that the Angling category retention limit applicable to participants on HMS Angling and HMS Charter/Headboat category permitted vessels should be adjusted upwards from the default level. NMFS has also concluded that implementation of separate limits for private and charter/headboat vessels remains appropriate, recognizing the different nature, socio-economic needs, and recent landings results of the two components of the recreational BFT fishery. For example, charter operators historically have indicated that a multi-fish retention limit is vital to their ability to attract customers. In addition, Large Pelagics Survey estimates indicate that charter/headboat BFT landings averaged approximately 30 percent of recent recreational landings for 2015 through 2016, with the remaining 70 percent landed by private vessels.

Therefore, for private vessels (i.e., those with HMS Angling category permits), this action adjusts the limit upwards to two school BFT and one large school/small medium BFT per vessel per day/trip (i.e., two BFT measuring 27 to less than 47 inches, and one BFT measuring 47 to less than 73 inches). For charter vessels (i.e., those with HMS Charter/Headboat permits), this action adjusts the limit upwards to three school BFT and one large school/small medium BFT per vessel per day/trip when fishing recreationally for BFT (i.e., three BFT measuring 27 to less than 47 inches, and one BFT measuring 47 to less than 73 inches). These retention limits are effective in all areas, except for the Gulf of Mexico, where NMFS prohibits targeted fishing for BFT. Regardless of the duration of a fishing trip, the daily retention limit applies upon landing. For example, whether a private vessel (fishing under the Angling category retention limit) takes a two-day trip or makes two trips in one day, the day/trip limit of two school BFT and one large school/small medium BFT applies and may not be exceeded upon landing.

NMFS anticipates that the BFT daily retention limits in this action will result in landings during 2017 that would not exceed the available subquotas. Lower retention limits could result in substantial underharvest of the codified Angling category subquota, and increasing the daily limits further may risk exceeding the available quota, contrary to the objectives of the 2006 Consolidated HMS FMP and amendments. NMFS is not setting higher school BFT limit for private and charter vessels due to the potential risk of exceeding the ICCAT tolerance limit on school BFT and other considerations, such as potential effort shifts to BFT fishing as a result of current, reduced recreational retention limits for New England groundfish and striped bass. NMFS will monitor 2017 landings closely and will make further adjustments, including closure if necessary, with an inseason action if warranted.

Monitoring and Reporting

NMFS will continue to monitor the BFT fisheries closely through the mandatory landings and catch reports. HMS Charter/Headboat and Angling category vessel owners are required to report the catch of all BFT retained or discarded dead, within 24 hours of the landing(s) or end of each trip, by accessing hmspermits.noaa.gov or by using the Android or iPhone app. Depending on the level of fishing effort and catch rates of BFT, NMFS may determine that additional retention limit adjustments or closures are necessary to ensure available quota is not exceeded or to enhance scientific data collection from, and fishing opportunities in, all geographic areas. Subsequent actions, if any, will be published in the Federal Register. In addition, fishermen may call the Atlantic Tunas Information Line at (978) 281–9260, or access hmspermits.noaa.gov, for updates on quota monitoring and inseason adjustments.

HMS Angling and HMS Charter/Headboat category permit holders may catch and release (or tag and release) BFT of all sizes, subject to the mandatory catch-and-release and tag-and-release programs at § 635.26. Anglers are also reminded that all BFT that are released must be handled in a manner that will maximize survival, and without removing the fish from the water, consistent with requirements at § 635.21(a)(1). For additional information on safe handling, see the “Careful Catch and Release” brochure available at www.nmfs.noaa.gov/sfa/hms/.

Classification

The Assistant Administrator for NMFS (AA) finds that it is impracticable and contrary to the public interest to provide prior notice of, and an opportunity for public comment on, this action for the following reasons:

The regulations implementing the 2006 Consolidated HMS FMP and amendments provide for inseason retention limit adjustments to respond to the unpredictable nature of BFT availability on the fishing grounds, the migratory nature of this species, and the regional variations in the BFT fishery. Affording prior notice and opportunity for public comment to implement the daily retention limit for the remainder of 2017 at this time is impracticable. Based on available BFT quotas, fishery performance in recent years, and the availability of BFT on the fishing grounds, immediate adjustment to the Angling category BFT daily retention limit from the default levels is warranted to allow fishermen to take advantage of the availability of fish and of quota. NMFS could not have proposed these actions earlier, as it needed to consider and respond to updated data and information from the 2016 Angling category fishery. If NMFS was to offer a public comment period now, after having appropriately considered that data, it would preclude fishermen from harvesting BFT that are legally available consistent with all of the regulatory criteria, and/or could result in selection of a retention limit inappropriately high or low for the amount of quota available for the period.

Fisheries under the Angling category daily retention limit are currently underway and thus prior notice would be contrary to the public interest. Delays in increasing daily recreational BFT retention limit would adversely affect those HMS Angling and Charter/Headboat category vessels that would otherwise have an opportunity to harvest more than the default retention limit of one school, large school, or small medium BFT per day/trip and may exacerbate the problem of low catch rates and quota rollovers. Analysis of available data shows that adjustment to the BFT daily retention limit from the default level would result in minimal
risks of exceeding the ICCAT-allocated quota. NMFS provides notification of retention limit adjustments by publishing the notice in the Federal Register, emailing individuals who have subscribed to the Atlantic HMS News electronic newsletter, and updating the information posted on the Atlantic Tunas Information Line and on hmspermits.noaa.gov. Therefore, the AA finds good cause under 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment. For these reasons, there also is good cause under 5 U.S.C. 553(d) to waive the 30-day delay in effectiveness.

This action is being taken under § 635.23(b)(3), and is exempt from review under Executive Order 12866. Therefore, the AA finds good cause under 5 U.S.C. 553(d) to waive the 30-day delay in effectiveness.

The默认 annual catch entitlements for sectors are effective May 1, 2017, through April 30, 2019. The default catch limit for Eastern Georges Bank cod is effective May 1, 2017, through July 31, 2017, or until the final rule for Framework 56 is implemented if prior to July 31, 2017.

Written comments must be received on or before May 30, 2017.

ADDITIONS: You may submit comments on this document, identified by NOAA–NMFS–2017–0016, by either of the following methods:

- Electronic Submission: Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to http://www.regulations.gov; click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.
- Mail: Submit written comments to Kyle Molton, 55 Great Republic Drive, Gloucester, MA 01930.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous).

Copies of each sector’s final operations plan and contract are available from the NMFS Greater Atlantic Regional Fisheries Office: John K. Bullard, Regional Administrator, National Marine Fisheries Service, 55 Great Republic Drive, Gloucester, MA 01930. These documents are also accessible via the Federal eRulemaking Portal: http://www.regulations.gov.

SUPPLEMENTARY INFORMATION:

Background

Amendment 13 to the Northeast (NE) Multispecies Fishery Management Plan (FMP) (69 FR 22906; April 27, 2004) established a process for forming sectors within the NE multispecies (groundfish) fishery, and Amendment 16 to the FMP (74 FR 18262; April 9, 2010), followed by Framework Adjustment 45 to the FMP (76 FR 23042; April 25, 2011) and Framework 48 to the FMP (78 FR 26118; May 3, 2013), expanded and revised sector management.

The FMP defines a sector as “[a] group of persons (three or more persons, none of whom have an ownership interest in the other two persons in the sector) holding limited access vessel permits who have voluntarily entered into a contract and agree to certain fishing restrictions for a specified period of time, and which has been granted a TAC(s) [sic] in order to achieve objectives consistent with applicable FMP goals and objectives.” Sectors are self-selecting, meaning each sector can choose its members.

The NE multispecies sector management system allocates a portion of the NE multispecies stocks to each sector. These annual sector allocations are known as annual catch entitlements (ACEs) and are based on the collective fishing history of a sector’s members. Sectors may receive allocations of large-mesh NE multispecies stocks with the exception of Atlantic halibut, windowpane flounder, Atlantic wolffish, and ocean pout, which are non-allocated species. The ACEs are a portion of a stock’s annual catch limit (ACL) available to commercial NE multispecies vessels within a sector. A sector determines how to harvest its ACEs and may decide to limit operations to fewer vessels.

Because sectors elect to receive an allocation under a quota-based system, the FMP grants sector vessels several “universal” exemptions from the FMP’s effort controls. These universal exemptions apply to: Trip limits on allocated stocks; the Georges Bank (GB) Seasonal Closure Area; NE multispecies days-at-sea (DAS) restrictions; the requirement to use a 6.5-inch (16.5-cm) mesh codend when fishing with selective gear on GB; portions of the Gulf of Maine (GOM) Cod Protection Closures; and the at-sea monitoring (ASM) coverage level for sector vessels fishing exclusively in the Southern New England (SNE) and Inshore GB Broad Stock Areas (BSA) with extra-large mesh...
