

caused by nearby faults. As the basis of the request, the petitioner states that the “NRC staff’s determination that the new seismic information, including the Shoreline earthquake and its effect on the San Luis Bay and Los Osos faults, is a lesser-included case within the Hosgri earthquake is insufficient to insure that Diablo Canyon is operating safely with an adequate margin of safety.”

On two occasions, the NRC offered FOE opportunities to address the Petition Review Board (PRB), which was established to review FOE’s enforcement concerns. In response, on September 30, 2015, and February 8, 2016, FOE provided written submissions to the PRB in lieu of addressing the PRB in person or by

telephone. The NRC staff considered these submittals during its evaluation.

The NRC sent a copy of the proposed director’s decision to the petitioner and the Pacific Gas and Electric Company (the licensee) for comment on February 28, 2017. The petitioner and the licensee were asked to provide comments by March 16, 2017, on any part of the proposed director’s decision that was considered to be erroneous or any issues in the petition that were not addressed. The NRC staff did not receive any comments on the proposed director’s decision.

The Director of the Office of Nuclear Reactor Regulation has determined that the request to take enforcement actions to ensure that DCPD can operate safely and demonstrate its ability to safely shut down in the event of an earthquake

caused by nearby faults be denied. The reasons for this decision are explained in the director’s decision DD–17–02 pursuant to section 2.206 of 10 CFR of the Commission’s regulations.

The NRC will file a copy of the director’s decision with the Secretary of the Commission for the Commission’s review in accordance with 10 CFR 2.206. As provided by this regulation, the director’s decision will constitute the final action of the Commission 25 days after the date of the decision unless the Commission, on its own motion, institutes a review of the director’s decision in that time.
