oversight of a registered national securities exchange. Based on the Exchanges’ representations, the limited and indirect nature of the relationship between the Exchanges and the Foreign Indirect Affiliates, and the information that the Exchanges will provide with respect to all other affiliates, including the foreign direct affiliates and domestic direct and indirect affiliates, the Commission believes that it will have sufficient information necessary to oversee the Exchanges’ activities as national securities exchanges under the Exchange Act. In particular, the Commission notes that each Exchange has represented that the nature of the connection between it and the Foreign Indirect Affiliates is limited and indirect, that the Foreign Indirect Affiliates would have no ability to influence the management, policies, or finances of the Exchanges, and that the Foreign Indirect Affiliates would have no obligation to provide funding to, or ability to materially affect the funding of, the Exchanges.

In addition, the Commission notes that the Exchanges have represented that the Foreign Indirect Affiliates have no ownership interest in the Exchanges or in any of the controlling shareholders of the Exchanges and that there are no commercial dealings between any of the Exchanges and the Foreign Indirect Affiliates. For the reasons discussed above, the Commission finds that it is appropriate in the public interest and consistent with the protection of investors to grant the conditional exemptive relief requested by the Exchanges. The Commission may modify by order the terms, scope or conditions of the exemption from Rule 6a–2(b)(1) under the Exchange Act granted to each Exchange if it determines that such modification is necessary or appropriate in the public interest, or is consistent with the protection of investors. Furthermore, the Commission may limit, suspend, or revoke the exemption granted to each Exchange if it finds that the Exchange has failed to comply with, or is unable to comply with, any of the conditions set forth in this order, if such action is necessary or appropriate in the public interest, or is consistent with the protection of investors.

It is ordered, pursuant to Section 36 of the Exchange Act, that the Exchanges are exempt from the requirement under Rule 6a–2(b)(1) under the Exchange Act, with respect to the Foreign Indirect Affiliates, to update the information in Exhibit D to Form 1 on or before June 30th of each year subject to the following conditions:

1. Each Exchange must provide, as part of its annual Form 1 amendment due on or before June 30th of each year, a list of the names of the Foreign Indirect Affiliates for which the Exchange is relying on exemptive relief; and

2. Each Exchange must provide, as part of its annual Form 1 amendment due on or before June 30th of each year, an organizational chart setting forth the affiliation of all affiliates, including those Foreign Indirect Affiliates for which the Exchange is relying on exemptive relief.

By the Commission.

Brent J. Fields,
Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing of Proposed Rule Change To List and Trade the Guggenheim Limited Duration ETF

April 27, 2017.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) or “Exchange Act”), 1 and Rule 19b–4 thereunder, 2 notice is hereby given that on April 13, 2017, The NASDAQ Stock Market LLC (“Nasdaq” or “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to list and trade the Shares of the Fund under Rule 5735, which rule governs the listing and trading of Managed Fund Shares 3 on the Exchange. The Shares will be

1 A “Managed Fund Share” is a security that represents an interest in an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1) (the “1940 Act”) organized as an open-end investment company or similar entity that invests in a portfolio of securities selected by its investment adviser consistent with its investment objectives and policies. In contrast, an open-end investment company that issues Index Shares is a closed-end investment company that issues Index Shares 4 on the Exchange.

3 A “Managed Fund Share” is a security that represents an interest in an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1) (the “1940 Act”) organized as an open-end investment company or similar entity that invests in a portfolio of securities selected by its investment adviser consistent with its investment objectives and policies. In contrast, an open-end investment company that issues Index Shares is a closed-end investment company that issues Index Shares on the Exchange.

offered by the Fund, which will be an actively managed exchange-traded fund (“ETF”). The Fund is a series of the Trust. The Trust was established as a Delaware statutory trust on May 24, 2006. The Trust is registered with the Commission as an open-end management investment company and has filed a post-effective amendment to its registration statement on Form N-1A (the “Registration Statement”) with the Commission to register the Fund and its Shares under the 1940 Act and the Securities Act of 1933.\(^5\)

\(^5\)Guggenheim Partners Investment Management, LLC will serve as the investment adviser (the “Adviser”) to the Fund. Guggenheim Funds Distributors, LLC will serve as the principal underwriter and distributor of the Fund’s Shares (the “Distributor”). The Bank of New York Mellon will act as the custodian, transfer agent and fund accounting agent for the Fund (the “Custodian”). MUFG Investor Services, LLC will serve as the administrator for the Fund (the “Administrator”).

Paragraph (g) of Rule 5735 provides that, if the investment adviser to an investment company issuing Managed Fund Shares is affiliated with a broker-dealer, such investment adviser shall erect a “fire wall” between the investment adviser and the broker-dealer with respect to access to information concerning the composition and/or changes to such investment company’s portfolio.\(^6\) In addition,\(^7\) the Commission previously approved the listing and trading of other actively managed funds within the Guggenheim family of ETFs. See, e.g., Security [sic] Exchange Act Release Nos. 64550 (May 26, 2011); 77 FR 32003 (June 2, 2011) (SR–NYSEArca–2011–11) (order approving listing of Guggenheim Enhanced Core Bond ETF and Guggenheim Enhanced Ultra-Short Bond ETF); 76719 (December 21, 2011) (SR–NYSEArca–2011–10) (order approving listing of Guggenheim Total Return Bond ETF). The Exchange believes the proposed rule change raises no significant issues not previously addressed in those prior Commission orders.

\(^6\)See Registration Statement for the Trust, filed on April 12, 2016 (File Nos. 333–134551 and 811–219006). The descriptions of the Fund and the Shares contained herein are based, in part, on information in the Registration Statement. In addition, the Commission has issued an order granting certain exemptive relief to the Trust under the 1940 Act. See Investment Company Act Release No. 29271 (May 18, 2010) (File No. 13534) (“Exemptive Order”).

\(^7\)An investment adviser to an open-end fund is required to be registered under the Investment Advisers Act of 1940 (the “Advisers Act”). As a result, the Adviser and its related personnel are subject to the requirements of Rule 204A–1 under the Advisers Act relating to codes of ethics. This Rule requires investment advisers to adopt a code of ethics that reflects the fiduciary nature of the relationship as well as compliance with other applicable securities laws. Accordingly, procedures designed to prevent the communication and misuse of non-public information by an investment adviser must be consistent with the paragraph (g) of Rule 5735 further requires that personnel who make decisions on such investment company’s portfolio composition must be subject to procedures designed to prevent the use and dissemination of material, non-public information regarding the investment company’s portfolio.

Rule 5735(g) is similar to Nasdaq Rule 5705(b)(5)(A)(l), which applies to index-based funds and requires “fire walls” between affiliated broker-dealers and investment advisers regarding the index-based fund’s underlying benchmark index. Rule 5735(g), however, applies to the establishment of a “fire wall” between affiliated investment advisers and the broker-dealers with respect to the investment company’s portfolio and not with respect to an underlying benchmark index, as is the case with index-based funds.

The Adviser is not a broker-dealer, but it is affiliated with the Distributor, a broker-dealer. The Adviser has therefore implemented and will maintain a fire wall with the Distributor with respect to the access of information concerning the composition and/or changes to the Fund’s portfolio.

In the event (a) the Adviser or any sub-adviser becomes newly affiliated with a different broker-dealer, or (b) any new adviser to the Fund is a registered broker-dealer or becomes affiliated with a broker-dealer, each will implement and maintain a fire wall with respect to its relevant personnel and/or such broker-dealer affiliate, if applicable, regarding access to information concerning the Fund’s portfolio and will be subject to procedures designed to prevent the use and dissemination of material non-public information regarding such portfolio.

Guggenheim Limited Duration ETF

The Fund will be an actively-managed ETF, and its investment objective is to seek to provide a level of income consistent with preservation of capital.

Advisers Act and Rule 204A–1 thereunder. In addition, Rule 206(4)–7 under the Advisers Act makes it unlawful for an investment adviser to provide investment advice to clients unless such investment adviser has (i) adopted and implemented written policies and procedures reasonably designed to prevent violent, by the investment adviser and its supervised persons, of the Advisers Act and the Commission rules adopted thereunder; (ii) implemented, at a minimum, an annual review regarding the adequacy of the policies and procedures established pursuant to subparagraph (i) above and the effectiveness of their implementation; and (iii) designated an individual (who is a supervised person) responsible for administering the policies and procedures adopted under subparagraph (i) above.

Principal Investments

The Fund will seek to achieve its investment objective by investing, under normal market conditions,\(^7\) at least 80% of its net assets (plus the amount of any borrowings for investment purposes) in a diversified portfolio of “Debt Instruments” (as described below) of any interest rate, credit quality,\(^8\) maturity or duration; however, the Fund expects, under normal market conditions, to maintain a dollar-weighted average duration of less than 3.5 years (the “80% Policy”). The 80% Policy may be represented by certain derivative instruments as discussed below,\(^9\) and ETFs\(^1\) and exchange-traded and over-the-counter (“OTC”) closed-end funds (“CEFs”) (which may include ETFs and CEFs affiliated with the Fund), provided that such ETFs and CEFs invest substantially all of their assets in Debt Instruments. The Fund will, as described further below, invest in the following Debt Instruments: Corporate debt securities of

\(^7\)The term “normal market conditions” includes, but is not limited to, the absence of trading halts in applicable financial markets generally; operational issues (e.g., systems failure) causing dissemination of inaccurate market information; or force majeure type events such as natural or manmade disaster, act of God, armed conflict, act of terrorism, riot or labor disruption or any similar intervening circumstance.

\(^8\)The Fund may hold fixed-income securities of any quality, rated or unrated, including those that are rated below-investment grade (also known as “high yield securities” or “junk bonds”), or if unrated, determined by the Adviser to be of comparable quality. If nationally recognized statistical rating organizations assign different ratings to the same security, the Fund will use the higher rating for purposes of determining the security’s credit quality. However, the Fund will not invest more than 35% of its total assets in fixed-income securities that are rated below investment grade as described below under “Investment Restrictions.”

\(^9\)Duration is a measure of the price volatility of a debt instrument as a result of changes in market rates of interest, based on the weighted average timing of the instrument’s expected principal and interest payments. Duration differs from maturity in that it considers a security’s yield, coupon payments, principal payments and call features in addition to the amount of time until the security matures. As the value of a security changes over time, so will its duration. The longer a security’s duration, the more sensitive it will be to changes in interest rates.

\(^10\)See “The Fund’s Use of Derivatives,” infra.

\(^1\)The ETFs in which the Fund may invest include Index Fund Shares (as described in Nasdaq Rule 5705), Portfolio Depositary Receipts (as described in Nasdaq Rule 5705), and Managed Fund Shares (as described in Nasdaq Rule 5735). The shares of ETFs in which the Fund may invest will be limited to securities that are members of the Intermarket Surveillance Group (“ISG”), which includes all U.S. national securities exchanges, and exchanges that are parties to a comprehensive surveillance agreement with the Exchange. The Fund will not invest more than 20% of its net assets in leveraged or inverse-leveraged ETFs. The Fund will not invest in non-U.S. exchanged-listed ETFs.
governments and their subdivisions, agencies and government-sponsored enterprises; obligations of international agencies or supranational entities; cash equivalents; 17 agency and non-agency mortgage-backed securities ("MBS") and asset-backed securities ("ABS"); 18 U.S. government mortgage pass-through securities; 20 repurchase agreements; 21 commercial instruments (including asset-backed commercial instruments); 22 zero-coupon and payment-in-kind securities; 23 convertible securities; 24 preferred securities and step-up securities [such as ]

20 The Fund will seek to obtain exposure to U.S. agency mortgage pass-through securities primarily through the use of "to-be-announced" or "TBA" transactions. A TBA refers to a commonly used mechanism for the forward sale of U.S. agency mortgage pass-through securities, and not to a separate type of mortgage-backed security. Most transactions in mortgage pass-through securities occur through the use of TBA transactions. TBA transactions generally are conducted in accordance with widely-accepted guidelines which establish commonly observed terms and conditions for execution, settlement and delivery.

21 Repurchase agreements are fixed-income securities in the form of agreements backed by collateral. These agreements, which may be viewed as a type of secured lending by the Fund, typically involve the acquisition by the Fund of securities from the selling institution (such as a bank or a broker-dealer), coupled with the agreement that the selling institution will repurchase the underlying securities at a specified price and time in the future (or on demand). The Fund may accept a wide variety of underlying securities as collateral for the repurchase agreements entered into by the Fund. Such collateral may include U.S. government securities, corporate obligations, equity securities, municipal debt securities, asset- and mortgage-backed securities, convertible securities and other fixed-income securities. Any such securities serving as collateral are marked-to-market daily in order to maintain full collateralization (typically purchase price plus accrued interest).

22 Commercial instruments include commercial paper, master notes, asset-backed commercial paper and other short-term corporate instruments. Commercial paper normally represents short-term unsecured promissory notes issued in bearer form by banks or bank holding companies, commercial finance companies and other issuers. Commercial paper may be traded in the secondary market after its issuance. Master notes are demand notes that permit the investment of fluctuating amounts of money at varying rates of interest pursuant to arrangements with issuers who meet the quality criteria of the Fund. Master notes are generally illiquid and therefore subject to the Fund's percentage limitations for investments in illiquid securities. Asset-backed commercial paper is issued by a special purpose entity that is organized to issue the commercial paper and to purchase trade receivables or other financial assets.

23 Zero-coupon and payment-in-kind securities are debt securities that do not make regular cash interest payments. Zero-coupon securities are sold at a deep discount to their principal amount. Payment-in-kind securities pay interest through the issuance of additional securities.

24 Convertible securities include bonds, convertible notes and other securities that may be converted into a prescribed amount of common stock or other equity securities at a specified price and time. The Fund may invest in convertible securities traded on an exchange or OTC. The convertible securities in which the Fund may invest will be converted into a prescribed amount of common stock or other equity securities (i) whose principal market is a member of the Intermarket Surveillance Group ("ISG") [sic], or (ii) subject to the Fund's 10% limit on equity securities whose principal market is not a member of the ISG or is a market with which the Exchange does not have a comprehensive surveillance sharing agreement.
as step-up bonds);\textsuperscript{25} bank capital;\textsuperscript{26} bank instruments, including certificates of deposit ("CDs");\textsuperscript{27} time deposits and bankers’ acceptances from U.S. banks;\textsuperscript{28} debtor-in-possession financings;\textsuperscript{29} participations in and assignments of bank loans or corporate loans, which loans include senior loans,\textsuperscript{30} syndicated bank loans, junior loans,\textsuperscript{31} bridge loans,\textsuperscript{32} unfunded commitments,\textsuperscript{33} bankers’ acceptances from U.S. banks;\textsuperscript{28} of deposit ("CDs"),\textsuperscript{27} time deposits and

revolving credit facilities,\textsuperscript{34} and participation interests.\textsuperscript{35}

With respect to Debt Instrument investments, the Fund may invest in restricted securities (Rule 144A and Regulation S securities),\textsuperscript{36} which are subject to legal restrictions on their sale.

In addition, with respect to Debt Instrument investments, the Fund may, without limitation, seek to obtain market exposure to the securities in which it primarily invests by entering into a series of purchase and sale contracts or by using other investment techniques (such as buy backs and dollar rolls).

The Fund may also use leverage to the extent permitted under the 1940 Act by entering into reverse repurchase agreements and borrowing transactions (principally lines of credit) for investment purposes. The Fund’s exposure to reverse repurchase agreements will be covered by securities having a value equal to or greater than the commitments. Under the 1940 Act, reverse repurchase agreements are considered borrowings. Although there is no limit on the percentage of Fund assets that can be used in connection with reverse repurchase agreements, the Fund does not expect to engage, under normal circumstances, in reverse repurchase agreements with respect to more than 33 1/3% of its assets.

Other Investments of the Fund

While under normal market conditions the Fund will invest at least 80% of its assets pursuant to the 80% Policy described above, the Fund may invest its remaining assets in the securities and financial instruments described below.

The Fund may invest in exchange-traded and OTC hybrid instruments, which combine a traditional stock, bond, or commodity with an option or forward contract. Generally, the principal amount, amount payable upon maturity or redemption, or interest rate of a hybrid is tied (positively or negatively) to the price of some commodity, currency or securities index or another interest rate or some other economic factor ("underlying benchmark").\textsuperscript{17}

The Fund is permitted to invest in structured notes, which are debt obligations that also contain an embedded derivative component with characteristics that adjust the obligation’s risk/return profile. Generally, the performance of a structured note will track that of the underlying debt obligation and the derivative embedded within it.

The Fund may invest in credit-linked notes, which are a type of structured note.\textsuperscript{38}

The Fund may invest in risk-linked securities ("RLS"), which are a form of derivative issued by insurance companies and insurance-related special purpose vehicles that apply securitization techniques to catastrophic property and casualty damages.\textsuperscript{18}

\textsuperscript{37}Certain hybrid instruments may provide exposure to the commodities markets. These are derivative securities with one or more commodity-linked components that have payment features similar to commodity futures contracts, commodity options, or similar instruments. Commodity-linked hybrid instruments may be either equity or debt securities, and are considered hybrid instruments because they have both security and commodity-like characteristics. A portion of the value of these instruments may be derived from the value of a commodity, futures contract or other economic variable. The Fund would only invest in commodity-linked hybrid instruments that qualify, under applicable rules of the Commodity Futures Trading Commission, for an exemption from the provisions of the Commodity Exchange Act (7 U.S.C. 1).

\textsuperscript{38}The difference between a credit default swap and a credit-linked note is that the seller of a credit-linked note receives the principal payment from the buyer at the time the contract is originated. Through the purchase of a credit-linked note, the buyer assumes the risk of the reference asset and funds this exposure through the purchase of the note. The buyer takes on the exposure to the seller to the full amount of the funding it has provided. The seller has hedged its risk on the reference asset without other credit exposure.

Under normal market conditions, the Fund has the right to receive periodic interest payments from the issuer of the credit-linked note at an agreed upon interest rate and a return of principal at the maturity date.

\textsuperscript{39}RLS are typically debt obligations for which the return of principal and the payment of interest are contingent on the non-occurrence of a pre-defined "trigger event." Depending on the terms and structure of the RLS, this trigger could be the result of a hurricane, earthquake or some other catastrophic event. Insurance companies securitize this risk to transfer it to the capital markets and the truly catastrophic part of the risk exposure. A typical RLS provides for income and return of capital similar to other fixed-income investments, but would involve full or partial default if losses resulting from a
The Fund may invest a portion of its assets in high-quality money market instruments, including money market mutual funds, on an ongoing basis to provide liquidity. The Fund may invest in U.S. and foreign common stocks, both exchange-listed and OTC. The Fund may gain exposure to commodities through the use of investments in exchange-traded products ("ETPs") and exchange-traded notes ("ETNs"). The Fund may invest in the securities of exchange-traded and OTC real estate investment trusts ("REITs").

Investment Restrictions of the Fund

The Fund may not invest more than 25% of the value of its net assets in securities of issuers in any one industry or group of industries. This restriction will not apply to obligations issued or guaranteed by the U.S. government, its agencies or instrumentalties.

The Fund may invest up to 20% of its total assets in exchange-traded and OTC real estate investment trusts ("REITs"). Such holdings would be subject to the respective limitations on the Fund's investments in illiquid assets and high yield securities. The liquidity of such securities, especially in the case of Private MBS/ABS, will be a substantial factor in the Fund's security selection process.

The Fund may hold up to an aggregate amount of 15% of its net assets in illiquid assets (calculated at the time of investment), including commercial instruments deemed illiquid by the Adviser. The Fund will monitor its portfolio liquidity on an ongoing basis to determine whether, in light of current circumstances, an adequate level of liquidity is being maintained, and will consider taking appropriate steps in order to maintain adequate liquidity if, through a change in values, net assets, or other circumstances, more than 15% of the Fund's assets are held in illiquid securities or other illiquid assets. Illiquid securities and other illiquid assets include those subject to contractual or other restrictions on resale and other instruments or assets that lack readily available markets as determined in accordance with Commission staff guidance.

The Fund may invest up to 35% of its total assets in high yield debt securities ("junk bonds"), which are debt securities that are rated below-investment grade by nationally recognized statistical rating organizations such as Moodys Investors Service, Inc. ("Moody's"), Standard & Poors Rating Group ("S&P"), or Fitch Investor Services ("Fitch"), or are unrated securities that the Adviser believes are of comparable below-investment grade quality. The Fund may invest in defaulted or distressed securities that are in default at the time of investment or that default subsequent to purchase by the Fund, in which case the Adviser will determine in its sole discretion whether to hold or dispose of security, subject to the Fund's 35% limitation in high yield debt securities.

While the Fund will principally invest in debt securities listed, traded or dealt in developed markets, it may also invest in securities listed, traded or dealt in other countries, including emerging markets countries. Such securities may be denominated in foreign currencies. However, the Fund may not invest more than 35% of its total assets in debt securities and instruments that are economically tied to emerging market countries, as determined by the Adviser, and non-U.S. dollar denominated securities.

The Fund may not invest more than 10% of its net assets in the aggregate in equity securities and REITs whose principal market is not a member of the ISG or is a market with which the Exchange does not have a comprehensive surveillance sharing agreement.

The Fund may not invest more than 20% of its net assets in bank capital. The Fund will be considered diversified within the meaning of the 1940 Act.
The Fund intends to qualify for and to elect to be treated as a regulated investment company under Subchapter M of the Internal Revenue Code.48

The Fund’s investments will be consistent with the Fund’s investment objective. The Fund’s investments will not be used to enhance leverage. That is, while the Fund will be permitted to borrow as permitted under the 1940 Act, the Fund will not be operated as a “leveraged ETF,” i.e., it will not be operated in a manner designed to seek a multiple or inverse multiple of the performance of the Fund’s primary broad-based securities benchmark index (as defined in Form N–1A).49

The Fund’s Use of Derivatives

The Fund proposes to seek certain exposures through derivative transactions as described below. The Fund may invest in the following derivative instruments: Foreign exchange forward contracts; OTC foreign exchange options; exchange-traded futures on securities, commodities, indices, interest rates and currencies; exchange-traded and OTC options on securities and indices; exchange-traded and OTC options on interest rate futures contracts; exchange-traded and OTC interest rate swaps, exchange-traded and OTC cross-currency swaps, OTC total return swaps, exchange-traded and OTC inflation swaps and exchange-traded and OTC credit default swaps; and options on such swaps (“swaptions”).50

Generally, derivatives are financial contracts whose value depends upon, or is derived from, the value of an underlying asset or a financial index, and may relate to stocks, bonds, interest rates, currencies or currency exchange rates, commodities, and related indexes. The Fund may, but is not required to, use derivative instruments for risk management purposes or as part of its investment strategies.51 The Fund may also engage in derivative transactions for speculative purposes to enhance total return, to seek to hedge against fluctuations in securities prices, interest rates or currency rates, to change the effective duration of its portfolio, to manage certain investment risks and/or as a substitute for the purchase or sale of securities or currencies.

Investments in derivative instruments will be made in accordance with the 1940 Act and consistent with the Fund’s investment objective and policies. As described further below, the Fund will typically use derivative instruments as a substitute for taking a position in the underlying asset and/or as part of a strategy designed to reduce exposure to other risks, such as interest rate or currency risk. The Fund may also use derivative instruments to enhance returns. To limit the potential risk associated with such transactions, the Fund will segregate or “earmark” assets determined to be liquid by the Adviser in accordance with procedures established by the Trust’s Board of Trustees (the “Board”) and in accordance with the 1940 Act (or, as permitted by applicable regulation, enter into certain offsetting positions) to cover its obligations under derivative instruments. These procedures have been adopted consistent with Section 18 of the 1940 Act and related Commission guidance. In addition, the Fund will include appropriate risk disclosure in its offering documents, including leveraging risk. Leveraging risk is the risk that certain transactions of the Fund, including the Fund’s use of derivatives, may give rise to additional leverage, causing the Fund to be more volatile than if it had not been leveraged.52 Because the markets for certain securities, or the securities themselves, may be unavailable or cost prohibitive as compared to derivative instruments, suitable derivative transactions may be an efficient alternative for the Fund to obtain the desired asset exposure.

The Adviser believes that derivatives can be an economically attractive substitute for an underlying physical security that the Fund would otherwise purchase. For example, the Fund could purchase Treasury futures contracts instead of physical Treasuries or could sell credit default protection on a corporate bond instead of buying a physical bond. Economic benefits include potentially lower transaction costs or attractive relative valuation of a derivative versus a physical bond (e.g., differences in yields).

The Adviser further believes that derivatives can be used as a more liquid means of adjusting portfolio duration as well as targeting specific areas of yield curve exposure, with potentially lower transaction costs than the underlying securities (e.g., interest rate swaps may have lower transaction costs than physical bonds). Similarly, money market futures can be used to gain exposure to short-term interest rates in order to express views on anticipated changes in central bank policy rates. In addition, derivatives can be used to protect client assets through selectively hedging downside (or “tail risks”) in the Fund.

The Fund also can use derivatives to increase or decrease credit exposure. Index credit default swaps (CDX) can be used to gain exposure to a basket of credit risk by “selling protection” against default or other credit events, or to hedge broad market credit risk by “buying protection.” Single name credit default swaps (CDS) can be used to allow the Fund to increase or decrease exposure to specific issuers, saving investor capital through lower trading costs. The Fund can use total return swap contracts to obtain the total return of a reference asset or index in exchange for paying a financing cost. A total return swap may be more efficient than buying underlying securities of an index, potentially lowering transaction costs.

The Fund may attempt to reduce foreign currency exchange rate risk by entering into contracts with banks, brokers or dealers to purchase or sell foreign currencies at a future date (“forward contracts”).53

The Adviser believes that the use of derivatives will allow the Fund to selectively add diversifying sources of return from selling options. Option purchases and sales can also be used to hedge specific exposures in the portfolio, and can provide access to return streams available to long-term

49 The Fund’s broad-based securities benchmark index will be the Bloomberg Barclays U.S. Aggregate Bond 1–3 Total Return Index.
50 Options on swaps are traded OTC. In the future, in the event that there are exchange-traded options on swaps, the Fund may invest in these instruments.
51 The Fund will seek, where possible, to use counterparties whose financial status is such that the risk of default is reduced; however, the risk of losses resulting from default is still possible. The
52 To mitigate leveraging risk, the Adviser will segregate or “earmark” liquid assets or otherwise cover the transactions that may give rise to such risk.
53 A foreign currency forward contract is a negotiated agreement between the contracting parties to exchange a specified amount of currency at a specified future time at a specified rate. The rate can be higher or lower than the spot rate between the currencies that are the subject of the contract.
Valuation Methodology for Purposes of Determining Net Asset Value

The net asset value ("NAV") of the Fund’s Shares will be determined by dividing the total value of the Fund’s portfolio investments and other assets, less any liabilities, by the total number of Shares outstanding. Fund Shares will be valued as of the close of regular trading (normally 4:00 p.m., Eastern Time ("E.T.")) (the "NYSE Close") on each day that the New York Stock Exchange ("NYSE") is open ("Business Day"). Information that becomes known to the Fund or its agents after the NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of a portfolio asset or the NAV determined earlier that day. The Fund reserves the right to change the time its NAV is calculated if the Fund closes earlier, or as permitted by the Commission.

For purposes of calculating NAV, portfolio securities and other assets for which market quotes are readily available will be valued at market value. Market value will generally be determined on the basis of last reported sales or settlement prices, or if no sales are reported, then based on quotes obtained from a quotation reporting system, established market makers, or pricing services.

Domestic and foreign fixed income securities and non-exchange-traded derivatives will normally be valued on the basis of quotes obtained from brokers and dealers or pricing services using data reflecting the earlier closing of the principal markets for those assets. Prices obtained from independent pricing services use information provided by market makers or estimates of market values obtained from yield data relating to investments or securities with similar characteristics. Exchange-traded options and options on futures will generally be valued at the settlement price determined by the applicable exchange.

Derivatives for which market quotes are readily available will be valued at market value. Locally closing prices will be used for all instrument valuation purposes. Futures will be valued at the last reported sale or settlement price on the day of valuation. Swaps traded on exchanges such as the Chicago Mercantile Exchange ("CME") or the Intercontinental Exchange ("ICE-US") will use the applicable exchange closing price where available.

Foreign currency-denominated derivatives will generally be valued as of the respective local region’s market close.

With respect to specific derivatives:

- Currency spot and forward rates from major market data vendors will generally be determined as of the NYSE Close.
- Exchange-traded futures will generally be valued at the settlement price of the relevant exchange.
- A total return swap on an index will be valued at the publicly available index price. The index price, in turn, is determined by the applicable index calculation agent, which generally values the securities underlying the index at the last reported sale price.
- Equity total return swaps will generally be valued using the actual underlying equity at local market closing, while bank loan total return swaps will generally be valued using the evaluated underlying bank loan price minus the strike price of the loan.
- Exchange-traded non-equity options (for example, options on bonds, Eurodollar options, and U.S. Treasury options), index options, and options on futures will generally be valued at the official settlement price determined by the relevant exchange, if available.
- OTC and exchange-traded equity options will generally be valued on a basis of quotes obtained from a quotation reporting system, established market makers, or pricing services or at the settlement price of the applicable exchange.
- OTC foreign currency (FX) options will generally be valued by pricing vendors.
- All other OTC and exchange-traded swaps such as interest rate swaps, inflation swaps, swaptions, credit default swaps, and CDX/CDS will generally be valued by pricing services or at the settlement price of the applicable exchange.

Exchange-traded equity securities (including common stocks, ETFs, EFTs, ETNs, CEFs, exchange-traded convertible securities, REITs, and preferred securities) will be valued at the official closing price or the last trading price on the exchange or market on which the security is primarily traded at the time of valuation. If no sales or closing prices are reported during the day, exchange-traded equity securities will generally be valued at the closing bid price on the exchange or market on which the security is primarily traded, or using other market information obtained from quotation reporting systems, established market makers, or pricing services. Investment company securities that are not exchange-traded will be valued at NAV. Equity securities traded OTC will be valued based on price quotations obtained from a broker-dealer who makes markets in such securities or other equivalent indications of value provided by a third-party pricing service. Structured notes, exchange-traded and OTC hybrids and RLS will be valued based on prices obtained from an independent pricing vendor such as IDC or Reuters or on the basis of prices obtained from brokers and dealers. Debt instruments will generally be valued on the basis of independent pricing services or quotes obtained from brokers and dealers.

If a foreign security’s value has materially changed after the close of the security’s primary exchange or principal market but before the NYSE close, the security will be valued at fair value based on procedures established and approved by the Board. Foreign securities that do not trade when the NYSE is open will also be valued at fair value.

The Board has adopted policies and procedures for the valuation of the Fund’s investments (the “Valuation Procedures”). Pursuant to the Valuation Procedures, the Board has delegated to a valuation committee, consisting of representatives from Guggenheim’s investment management, fund administration, legal and compliance departments (the “Valuation Committee”), the day-to-day responsibility for implementing the Valuation Procedures, including, under most circumstances, the responsibility for determining the fair value of the Fund’s securities or other assets. Valuations of the Fund’s securities are supplied primarily by pricing services appointed pursuant to the processes set forth in the Valuation Procedures. The Valuation Committee convenes monthly, or more frequently as needed and will review the valuation of all assets which have been fair valued for reasonableness. The Fund’s officers, through the Valuation Committee and consistent with the monitoring and review responsibilities set forth in the Valuation Procedures, regularly review
procedures used by, and valuations provided by, the pricing services.

Debt securities with a maturity of greater than 60 days at acquisition will be valued at prices that reflect broker/dealer supplied valuations or are obtained from independent pricing services, which may consider the trade activity, treasury spreads, yields or price of bonds of comparable quality, coupon, maturity, and type, as well as prices quoted by dealers who make markets in such securities. Short-term securities with remaining maturities of 60 days or less will be valued at amortized cost, provided such amount approximates market value. Money market instruments will be valued at NAV.

Generally, trading in foreign securities markets is substantially completed each day at various times prior to the close of the NYSE. The values of foreign securities are determined as of the close of such foreign markets or the close of the NYSE, if earlier. All investments quoted in foreign currency will be valued in U.S. dollars on the basis of the foreign currency exchange rates prevailing at the close of U.S. business at 4:00 p.m. E.T. The Valuation Committee will determine the current value of such foreign securities by taking into consideration certain factors which may include those discussed above, as well as the following factors, among others: The value of the securities traded on other foreign markets, closed-end fund trading, foreign currency exchange activity, and the trading prices of financial products that are tied to foreign securities. In addition, under the Valuation Procedures, the Valuation Committee and the Adviser are authorized to use prices and other information supplied by a third party pricing vendor in valuing foreign securities.

Investments for which market quotations are not readily available will be fair valued as determined in good faith by the Adviser, subject to review by the Valuation Committee, pursuant to methods established or ratified by the Board. Valuations in accordance with these methods are intended to reflect each security’s (or asset’s) “fair value.” Each such determination will be based on a consideration of all relevant factors, which are likely to vary from one pricing context to another. Examples of such factors may include, but are not limited to: Market prices; sales price; broker quotes; and models which derive prices based on inputs such as prices of securities with comparable characteristics, or based on inputs such as anticipated cash flows or collateral, spread over Treasuries, and other information analysis.

Investments initially valued in currencies other than the U.S. dollar will be converted to the U.S. dollar using exchange rates obtained from pricing services. As a result, the NAV of the Fund’s Shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the NYSE is closed. As a result, to the extent that the Fund holds foreign (non-U.S.) securities, the NAV of the Fund’s Shares may change when an investor cannot purchase, redeem or exchange shares.

Derivatives Valuation Methodology for Purposes of Determining Intra-Day Indicative Value

On each Business Day, before commencement of trading in Fund Shares on the Exchange, the Fund will disclose on its Web site the identities and quantities of the portfolio instruments and other assets held by the Fund that will form the basis for the Fund’s calculation of NAV at the end of the Business Day. In order to provide additional information regarding the intra-day value of Shares of the Fund, the Exchange or a market data vendor will disseminate every 15 seconds through the facilities of the Consolidated Tape Association (“CTA”) or other widely disseminated means an updated Intra-day Indicative Value (“IIV”) for the Fund as calculated by a third party market data provider.

A third party market data provider will calculate the IIV for the Fund. For the purposes of determining the IIV, the third party market data provider’s valuation of derivatives is expected to be similar to their valuation of all securities. The third party market data provider may use market quotes if available or may fair value securities against proxies (such as swap or yield curves).

With respect to specific derivatives:

- Foreign currency derivatives, including foreign exchange forward contracts, foreign exchange options and currency futures, may be valued intraday using market quotes, or another proxy as determined to be appropriate by the third party market data provider.
- Futures may be valued intraday using the relevant futures exchange data, or another proxy as determined to be appropriate by the third party market data provider.
- Interest rate swaps and cross-currency swaps may be valued to a swap curve and valued intraday based on changes of the swap curve, or another proxy as determined to be appropriate by the third party market data provider.
- Index credit default swaps (such as, CDX/CDS) may be valued using intraday data from market vendors, or based on underlying asset price, or another proxy as determined to be appropriate by the third party market data provider.
- Total return swaps may be valued intraday using the underlying asset price, or another proxy as determined to be appropriate by the third party market data provider.

- Exchange listed options may be valued intraday using the relevant exchange data, or another proxy as determined to be appropriate by the third party market data provider.
- OTC options and swaptions may be valued intraday through option valuation models (e.g., Black-Scholes) or using exchange traded options as a proxy, or another proxy as determined to be appropriate by the third party market data provider.

During the business day, the Fund’s Shares may change when an investor cannot purchase, redeem or exchange shares.

Disclosed Portfolio

The Fund’s disclosure of derivative positions in the Disclosed Portfolio will include information that market participants can use to value these positions intraday. On a daily basis, the Adviser will disclose on the Fund’s Web site the following information regarding each portfolio holding, as applicable to the type of holding: Ticker symbol, CUSIP number or other identifier, if any; a description of the holding (including the type of holding, such as the type of swap); the identity of the security, commodity, index or other asset or instrument underlying the holding, if any; the type of swap; and other relevant information.

Impact on Arbitrage Mechanism

The Adviser believes there will be minimal, if any, impact to the arbitrage mechanism as a result of the use of derivatives. Market makers and participants should be able to value derivatives as long as the positions are disclosed with relevant information.

The Adviser believes that the price at which Shares trade will continue to be disciplined by arbitrage opportunities.
created by the ability to purchase or redeem creation Shares at their NAV, which should ensure that Shares will not trade at a material discount or premium in relation to their NAV.

The Adviser does not believe there will be any significant impacts to the settlement or operational aspects of the Fund’s arbitrage mechanism due to the use of derivatives. Because derivatives generally are not eligible for in-kind transfer, they will typically be substituted with a “cash in lieu” amount when the Fund processes purchases or redemptions of creation units in-kind.

Creation and Redemption of Shares

Investors may create or redeem in Creation Unit size of 100,000 Shares or aggregations thereof (“Creation Unit”) through an Authorized Participant (“AP”), as described in the Registration Statement. The size of a Creation Unit is subject to change. In order to purchase Creation Units of the Fund, an investor must generally deposit a designated portfolio of securities (the “Deposit Securities”) (and/or an amount in cash in lieu of some or all of the Deposit Securities) per each Creation Unit constituting a substantial replication, or representation, of the securities included in the Fund’s portfolio as selected by the Adviser (“Fund Securities”) and generally make a cash payment referred to as the “Cash Component.” The list of the names and the amounts of the Deposit Securities will be made available by the Fund’s Custodian through the facilities of the National Securities Clearing Corporation (“NSCC”) prior to the opening of business of the Exchange (9:30 a.m., E.T.). The Cash Component will represent the difference between the NAV of a Creation Unit and the market value of the Deposit Securities.

Shares may be redeemed only in Creation Unit size at their NAV on a day the Exchange is open for business. The Fund’s custodian will make available immediately prior to the opening of the Exchange, through the facilities of NSCC, the names and the amounts of the Fund Securities that will be applicable that day to redemption requests in proper form. Fund Securities received on redemption may not be identical to Deposit Securities which are applicable to purchases of Creation Units. The creation/redemption order cut-off time for the Fund will be 4:00 p.m. E.T.

Availability of Information

The Fund’s Web site (www.guggenheiminvestments.com), which will be publicly available prior to the public offering of Shares, will include a form of the prospectus for the Fund that may be downloaded. The Fund’s Web site will include the ticker symbol for the Shares, CUSIP and exchange information, along with additional quantitative information updated on a daily basis, including, for the Fund: (1) Daily trading volume, the prior Business Day’s reported NAV, closing price and mid-point of the bid/ask spread at the time of calculation of such NAV (the “Bid/Ask Price”); and a calculation of the premium and discount of the Bid/Ask Price against the NAV; and (2) data in chart format displaying the frequency distribution of discounts and premiums of the daily Bid/Ask Price against the NAV, within appropriate ranges, for the most recently completed calendar year and each of the four most recently completed calendar quarters since that year (or the life of the Fund if shorter).

On each Business Day, before commencement of trading in Shares in the Regular Market Session on the Exchange, the Fund will disclose on its Web site the identities and quantities of the portfolio of securities and other assets (the “Disclosed Portfolio”) as such term is defined in Nasdaq Rule 5735(c)(2)) held by the Fund that will form the basis for the Fund’s calculation of NAV at the end of the Business Day.

In addition to disclosing the identities and quantities of the portfolio of securities and other assets in the Fund’s披露 Portfolio, the Fund also will disclose on a daily basis on its Web site the following information, as applicable to the type of holding: Ticker symbol, if any, CUSIP number or other identifier, if any; a description of the holding (including the type of holding, such as, a type of swap), quantity held (as measured by, for example, par value, number of shares or units); identity of the security, index, or other asset or instrument underlying the holding, if any; for options, the options strike price; quantity held (as measured by, for example, par value, notional value, or number of shares, contracts or units); maturity date, if any; coupon rate, if any; market value of the holding; and percentage weighting of the holding in the Fund’s portfolio. The Web site and information will be publicly available at no charge.

In addition, to the extent the Fund permits full or partial creations in-kind, a basket composition file, which will include the security names and share quantities to deliver (along with requisite cash in lieu) in exchange for Shares, together with estimates and actual Cash Components, will be publicly disseminated daily prior to the opening of the Exchange via the NSCC. The basket will equal a Creation Unit.

In addition, for the Fund, an estimated value, defined in Rule 5735(c)(3) as the “Intraday Indicative Value,” that reflects an estimated intraday value of the Fund’s Disclosed Portfolio, will be disseminated by a major market data vendor per the terms of a data services agreement that will be finalized with the Adviser prior to the Fund’s launch (the “IOPV Vendor”). Moreover, the Intraday Indicative Value, available on the NASDAQ Information LLC proprietary index data service, will be calculated by the IOPV Vendor based upon the sum of the current value for the components of the Disclosed Portfolio and the estimated cash amount per share of the Fund, divided by the total amount of outstanding Shares. The Intraday Indicative Value will be updated and widely disseminated by the IOPV Vendor and broadly displayed at least every 15 seconds during the Regular Market Session. The Intraday Indicative Value will be calculated based on the IOPV Vendor’s calculations. If there is an issue or problem with any of the components of the calculation, the previously calculated Intraday Indicative Value will be disseminated until such issue or problem is resolved. With respect to equity securities, if trading in a component of the Disclosed Portfolio is halted while the market is open, the last traded price for that security will be used in the calculation until trading resumes. If trading is halted before the...
market is open, the previous day’s last sale price will be used. For components of the Disclosed Portfolio that are not U.S. listed, the last sale price is used, after being converted into U.S. Dollars, when the local market is open. When the local market closes, the closing price for the component of the Disclosed Portfolio continues to be updated by the applicable exchange rate.

The dissemination of the Intratday Indicative Value, together with the Disclosed Portfolio, will allow investors to determine the value of the underlying portfolio of the Fund on a daily basis and will provide a close estimate of that value throughout the trading day.

Intraday executable price quotations on certain Debt Instruments and other assets not traded on an exchange will be available from major broker-dealer firms or market data vendors, as well as from automated quotation systems, published or other public sources, or online information services. Additionally, the Trade Reporting and Compliance Engine ("TRACE"), the Financial Industry Regulatory Authority ("FINRA") will be a source of price information for corporate bonds, privately-issued securities (including Rule 144A securities), MBS, ABS, CDOs and CBOs to the extent transactions in such securities are reported to TRACE.59 Intra-day, executable price quotations on the securities and other assets held by the Fund, as well as closing price information, will be available from major broker-dealer firms or on the exchange on which they are traded, as applicable. Intraday and closing price information related to U.S. government securities, money market instruments (including money market mutual funds), and other short-term investments held by the Fund also will be available through subscription services, such as Bloomberg, Markit and Thomson Reuters, which can be accessed by APIs and other investors. Electronic Municipal Market Access ("EMMA") will be a source of price information for municipal bonds.

Information regarding market price and trading volume of the Shares will be continually available on a real-time basis throughout the day on brokers’ computer screens and other electronic services. Information regarding the previous day’s closing price and trading volume for the Shares will be published daily in the financial section of newspapers. Quotation and last sale information will be available via the CTA high-speed line for the Shares and for the following U.S. exchange-traded securities: Common stocks, hybrid instruments, convertible securities, preferred securities, REITs, CEFs, ETFs, ETPs, and ETNs. Price information for foreign exchange-traded stocks will be available from the applicable foreign exchange and from major market data vendors. Price information for exchange-traded derivative instruments will be available from the applicable exchange and from major market data vendors. Price information for OTC REITs, OTC common stocks, OTC preferred securities, OTC convertible securities, OTC step-up bonds, OTC CEFs, OTC options, money market instruments, forwards, structured notes, credit linked notes, risk-linked securities, OTC derivative instruments and OTC hybrid instruments will be available from major market data vendors. Price information for restricted securities, including Regulation S and Rule 144A securities, will be available from major market data vendors. Intraday and closing price information for exchange-traded options and futures will be available from the applicable exchange and from major market data vendors. In addition, price information for U.S. exchange-traded options is available from the Options Price Reporting Authority. Quotation information from brokers and dealers or independent pricing services will be available for Debt Instruments.

Additional information regarding the Fund’s holdings disclosures, including investment strategies, risks, credit, and redemption procedures, fees, portfolio holdings disclosure policies, distributions and taxes, will be included in the Registration Statement. Investors also will be able to obtain the Fund’s Statement of Additional Information ("SAI"), the Fund’s Shareholder Reports, and its Trust’s Form N-CSR and Form N-SAR, each of which is filed twice a year, except the SAI, which is filed at least annually. The Fund’s SAI and Shareholder Reports will be available free upon request from the Trust, and those documents and the Form N-CSR and Form N-SAR may be viewed on-screen or downloaded from the Commission’s Web site at www.sec.gov.

Initial and Continued Listing of the Fund’s Shares

The Shares will conform to the initial and continued listing criteria applicable to Managed Fund Shares, as set forth under Rule 12g-2. The Exchange represents that, for initial and continued listing, the Fund will be in compliance with Rule 10A–3 under the Exchange Act. A minimum of 100,000 Shares will be outstanding at the commencement of trading on the Exchange. The Exchange will obtain a representation from the issuer of the Shares that the NAV per Share will be calculated daily and that the NAV and the Disclosed Portfolio will be made available to all market participants at the same time.

Trading Halts of the Fund’s Shares

With respect to trading halts, the Exchange may consider all relevant factors in exercising its discretion to halt or suspend trading in the Shares of the Fund. Nasdaq will halt trading in the Shares under the conditions specified in Nasdaq Rules 4120 and 4121, including the trading pauses under Nasdaq Rules 4120(a)(11) and (12). Trading also may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable. These may include: (1) The extent to which trading in the securities or other public sources, or online information services. Additionally, the Trade Reporting and Compliance Engine ("TRACE") of the securities is not occurring in the securities and/or the financial instruments constituting the Disclosed Portfolio of the Fund; or (2) whether other unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present. Trading in the Shares also will be subject to Rule 5735(d)(2)(D), which sets forth circumstances under which Shares of the Fund may be halted.

Trading Rules

Nasdaq deems the Shares to be equity securities, thus rendering trading in the Shares subject to Nasdaq’s existing rules governing the trading of equity securities. Nasdaq will allow trading in the Shares from 4:00 a.m. until 8:00 p.m. E.T. The Exchange has appropriate rules to facilitate transactions in the Shares during all trading sessions. As provided in Nasdaq Rule 5735(b)(3), the minimum price variation for quoting and entry of orders in Managed Fund Shares traded on the Exchange is $0.01.

Surveillance

The Exchange represents that trading in the Shares will be subject to the existing trading surveillances, administered by both Nasdaq and FINRA, on behalf of the Exchange, which are designed to detect violations of Exchange rules and applicable federal securities laws.61 The Exchange represents that these procedures are adequate to properly monitor Exchange

59 Broker-dealers that are FINRA member firms have an obligation to report transactions in specified debt securities to TRACE to the extent required under applicable FINRA rules. Generally, such debt securities will have at issuance a maturity that exceeds one calendar year.

60 See 17 CFR 240.10A–3.

61 FINRA surveils trading on the Exchange pursuant to a regulatory services agreement. The Exchange is responsible for FINRA’s performance under this regulatory services agreement.
trading of the Shares in all trading sessions and to deter and detect violations of Exchange rules and applicable federal securities laws.

The surveillances referred to above generally focus on detecting securities trading outside their normal patterns, which could be indicative of manipulative or other violative activity. When such situations are detected, surveillance analysis follows and investigations are opened, where appropriate, to review the behavior of all relevant parties for all relevant trading violations. FINRA, on behalf of the Exchange, will communicate as needed regarding trading in the Shares and such other exchange-traded securities and instruments held by the Fund with other markets and other entities that are members of the ISG, and FINRA may obtain trading information regarding trading in the Shares and other exchange-traded securities (including ETFs and preferred stock) and instruments held by the Fund from such markets and other entities. Moreover, FINRA, on behalf of the Exchange, will be able to access, as needed, trade information for certain Debt Instruments, and other debt securities held by the Fund reported to FINRA’s TRACE.

In addition, the Exchange may obtain information regarding trading in the Shares and such other exchange-traded securities and instruments held by the Fund from markets and other entities that are members of ISG, which includes securities exchanges, or with which the Exchange has in place a comprehensive surveillance sharing agreement.

Not more than 10% of the net assets of the Fund in the aggregate invested in equity securities (other than non-exchange-traded investment company securities) shall consist of equity securities whose principal market is not a member of the ISG or is a market with which the Exchange does not have a comprehensive surveillance sharing agreement. Furthermore, not more than 10% of the net assets of the Fund in the aggregate invested in futures contracts and exchange-traded options contracts shall consist of futures contracts and exchange-traded options contracts whose principal market is not a member of ISG or with which the Exchange does not have a comprehensive surveillance sharing agreement.

In addition, the Exchange also has a general policy prohibiting the distribution of material, non-public information by its employees.

Information Circular

Prior to the commencement of trading, the Exchange will inform its members in an Information Circular of the special characteristics and risks associated with trading the Shares. Specifically, the Information Circular will discuss the following: (1) The procedures for purchases and redemptions of Shares in Creation Units (and that Shares are not individually redeemable); (2) Nasdaq Rule 2111A, which imposes suitability obligations on Nasdaq members with respect to recommending transactions in the Shares to customers; (3) how information regarding the Intraday Indicative Value and the Disclosed Portfolio is disseminated; (4) the risks involved in trading the Shares during the Pre-Market and Post-Market Sessions when an updated Intraday Indicative Value will not be calculated or publicly disseminated; (5) the requirement that members purchasing Shares from the Fund for resale to investors deliver a prospectus to investors purchasing newly issued Shares prior to or concurrently with the confirmation of a transaction; and (6) trading information.

In addition, the Information Circular will advise members, prior to the commencement of trading, of the prospectus delivery requirements applicable to the Shares. Members purchasing Shares from the Fund for resale to investors will deliver a prospectus to such investors. The Information Circular will also discuss any exemptive, no-action and interpretive relief granted by the Commission from any rules under the Exchange Act.

Additionally, the Information Circular will reference that the Fund is subject to various fees and expenses. The Information Circular will also disclose the trading hours of the Shares of the Fund and the applicable NAV calculation time for the Shares. The Information Circular will disclose that information about the Shares of the Fund will be publicly available on the Fund’s Web site.

Continued Listing Representations

All statements and representations made in this filing regarding (a) the description of the portfolio, (b) limitations on portfolio holdings or reference asset information and availability of the reference asset or intraday indicative values, or (d) the applicability of Exchange listing rules shall constitute continued listing requirements for listing the Shares on the Exchange. In addition, the issuer has represented to the Exchange that it will advise the Exchange of any failure by the Fund to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will monitor for compliance with the continued listing requirements. If the Fund is not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under the Nasdaq 3800 Series.

2. Statutory Basis

Nasdaq believes that the proposal is consistent with Section 6(b) of the Exchange Act, in general, and Section 6(b)(5) of the Exchange Act, in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to, and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

The Exchange believes that the proposed rule change is designed to prevent fraudulent and manipulative acts and practices in that the Shares will be listed and traded on the Exchange pursuant to the initial and continued listing criteria in Nasdaq Rule 5735. The Exchange represents that trading in the Shares will be subject to the existing trading surveillances, administered by both Nasdaq and FINRA, on behalf of the Exchange, which are designed to deter and detect violations of Exchange rules and applicable federal securities laws and are adequate to properly monitor trading in the Shares in all trading sessions. The Adviser is affiliated with a broker-dealer and have implemented a fire wall with respect to its broker-dealer affiliate regarding access to information concerning the composition and/or changes to the Fund’s portfolio. In addition, paragraph (g) of Nasdaq Rule 5735 further requires that personnel who make decisions on an open-end fund’s portfolio composition must be subject to procedures designed to prevent the use and dissemination of material, non-public information regarding the open-end fund’s portfolio.

The proposed rule change is designed to perfect the mechanism of a free and open market and, in general, to protect

62 For a list of the current members of ISG, see www.isgportal.org. The Exchange notes that not all components of the Disclosed Portfolio for the Fund may trade on markets that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement.

investors and the public interest in that it will facilitate the listing and trading of an additional type of actively-managed exchange-traded product that will enhance competition among market participants, to the benefit of investors and the marketplace.

FINRA may obtain information via ISG from other exchanges that are members of ISG. In addition, the Exchange may obtain information regarding trading in the Shares and other exchange-traded securities (including ETFs and preferred stock) and instruments held by the Fund from markets and other entities that are members of ISG, which includes securities exchanges, or with which the Exchange has in place a comprehensive surveillance sharing agreement. The Fund will limit its investments in illiquid securities or other illiquid assets to an aggregate amount of 15% of its net assets (calculated at the time of investment). The Fund also may invest directly in ETFs. Additionally, the Fund may engage in frequent and active trading of portfolio securities to achieve its investment objective. The Fund’s investments will not be used to enhance leverage. That is, while the Fund will be permitted to borrow as permitted under the 1940 Act, the Fund will not be operated as a “leveraged ETF,” i.e., it will not be operated in a manner designed to seek a multiple or inverse multiple of the performance of the Fund’s primary broad-based securities benchmark index (as defined in Form N-1A).

The proposed rule change is designed to promote just and equitable principles of trade and to protect investors and the public interest in that the Exchange will obtain a representation from the issuer of the Shares that the NAV per Share will be calculated daily every day that the Fund is traded, and that the NAV and the Disclosed Portfolio will be made available to all market participants at the same time. In addition, a large amount of information will be publicly available regarding the Fund and the Shares, thereby promoting market transparency. Moreover, the Intraday Indicative Value, available on the NASDAQ Information LLC proprietary index data service, will be widely disseminated by one or more major market data vendors at least every 15 seconds during the Exchange’s Regular Market Session. On each Business Day, before commencement of trading in Shares in the Regular Market Session on the Exchange, the Fund will disclose on its Web site the Disclosed Portfolio of the Fund as the basis for the Fund’s calculation of NAV at the end of the Business Day.

Information regarding market price and trading volume of the Shares will be continually available on a real-time basis throughout the day on brokers’ computer screens and other electronic services, and quotation and last-sale information for the Shares will be available via Nasdaq proprietary quote and trade services, as well as in accordance with the Unlisted Trading Privileges and the CTA plans for the Shares. Quotation and last sale information will be available via the CTA high-speed line for the Shares and for the following U.S. exchange-traded securities: Common stocks, hybrid instruments, convertible securities, preferred securities, REITs, CEFs, ETFs, ETNs, and ETNs. Price information for foreign exchange-traded stocks will be available from the applicable foreign exchange and from major market data vendors. Price information for exchange-traded derivative instruments will be available from the applicable exchange and from major market data vendors. Price information for OTC REITs, OTC common stocks, OTC preferred securities, OTC convertible securities, OTC step-up bonds, OTC CEFs, OTC options, money market instruments, forwards, structured notes, credit linked notes, risk-linked securities, OTC derivative instruments, and OTC hybrid instruments will be available from major market data vendors. Price information for restricted securities, including Regulation S and Rule 144A securities, will be available from major market data vendors. Intraday and closing price information for exchange-traded options and futures will be available from the applicable exchange and from major market data vendors. In addition, price information for U.S. exchange-traded options is available from the Options Price Reporting Authority. Quotation information from brokers and dealers or independent pricing services will be available for Debt Instruments.

The Fund’s Web site will include a form of the prospectus for the Fund and additional data relating to NAV and other applicable quantitative information. Moreover, prior to the commencement of trading, the Exchange will inform its members in an Information Circular of the special characteristics and risks associated with trading the Shares. Trading in Shares of the Fund will be halted under the conditions specified in Nasdaq Rules 4120 and 4121 or because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable, and trading in the Shares will be subject to Nasdaq Rule 5735(d)(2)(D), which sets forth circumstances under which Shares of the Fund may be halted. In addition, as noted above, investors will have ready access to information regarding the Fund’s holdings, the Intraday Indicative Value, the Disclosed Portfolio, and quotation and last sale information for the Shares.

For the above reasons, Nasdaq believes the proposed rule change is consistent with the requirements of Section 6(b)(5) of the Exchange Act.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Exchange Act. The Exchange believes that the proposed rule change will facilitate the listing and trading of an additional type of actively-managed exchange-traded product that will enhance competition among market participants, to the benefit of investors and the marketplace.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the Federal Register or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will:

(A) By order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission’s Internet comment form (http://www.sec.gov/rules/sro.shtml); or

• Send an email to rule-comments@sec.gov. Please include File Number SR-NASDAQ-2017-039 on the subject line.
SECURITIES AND EXCHANGE COMMISSION

Self-Regulatory Organizations; Fixed Income Clearing Corporation; Notice of Designation of Longer Period for Commission Action on Proposed Rule Change To Implement the Capped Contingency Liquidity Facility in the Government Securities Division Rulebook

April 25, 2017.

On March 1, 2017, Fixed Income Clearing Corporation ("FICC") filed with the Securities and Exchange Commission ("Commission") proposed rule change SR–FICC–2017–002 ("Proposed Rule Change") pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act").1 and Rule 19b–4 thereunder,2 to implement a Capped Contingency Liquidity Facility in FICC's Government Securities Division Rulebook.3 The Proposed Rule Change was published for comment in the Federal Register on March 20, 2017.4 To date, the Commission has received one comment letter to the Proposed Rule Change.5

Section 19(b)(2) of the Act6 provides that, within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding, or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this Proposed Rule Change is May 4, 2017. The Commission is extending this 45-day time period.

In order to provide the Commission with sufficient time to consider the Proposed Rule Change, the Commission finds that it is appropriate to designate a longer period within which to take action on the Proposed Rule Change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,7 designates June 18, 2017 as the date by which the Commission shall either approve, disapprove, or institute proceedings to determine whether to disapprove the proposed rule change SR–FICC–2017–002.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.8

Eduardo A. Aleman,
Assistant Secretary.
