Coast Guard

33 CFR Part 117

[Docket No. USCG–2017–0355]

Drawbridge Operation Regulation; Lake Washington Ship Canal, Seattle, WA

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulation.

SUMMARY: The Coast Guard has issued a temporary deviation from the operating schedule that governs the Montlake Bridge across Lake Washington Ship Canal, mile 5.2, at Seattle, WA. The deviation is necessary to accommodate the Emerald City Bike Ride event. This deviation allows the bridge span to remain in the closed-to-navigation position.

DATES: This deviation is effective from 6 a.m. to 9 a.m. on May 28, 2017.

ADDRESSES: The docket for this deviation, [USCG–2017–0355] is available at http://www.regulations.gov. Type the docket number in the “SEARCH” box and click “SEARCH.” Click on Open Docket Folder on the line associated with this deviation.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary deviation, call or email Mr. Steven Fischer, Bridge Administrator, Thirteenth Coast Guard District; telephone 206–220–7282, email d13-pfd13bridges@uscg.mil.

SUPPLEMENTARY INFORMATION: The Washington Department of Transportation (bridge owner) has requested a temporary deviation from the operating schedule for the Montlake Bridge across Lake Washington Ship Canal, at mile 5.2, at Seattle, WA. The deviation is necessary to accommodate event participants to cross the bridge safely. The Montlake Bridge is a double leaf bascule bridge; and in the closed-to-
navigation position provides 30 feet of vertical clearance throughout the navigation channel, and 46 feet of vertical clearance throughout the center 60 feet of the bridge; vertical clearance references to Mean Water Level of Lake Washington. To facilitate this event, the double bascule span will remain closed from 6 a.m. to 9 a.m. on May 28, 2017. The Coast Guard coordinated with the local mariners by request any objections via the Local Notice to Mariners.

The normal operating schedule for the Montlake Bridge operates in accordance with 33 CFR 117.1051(e). Waterway usage on the Lake Washington Ship Canal ranges from commercial tug and barge to small pleasure craft. Vessels able to pass through the bridge in the closed-to-navigation position may do so at anytime. The bridge will be able to open for emergencies and emergency vessels in route to a call. Lake Washington Ship Canal has no immediate alternate route for vessels to pass. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessels can arrange their transits to minimize any impact caused by the temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the designated time period. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Steven M. Fischer,
Bridge Administrator, Thirteenth Coast Guard District.

For further information contact: If you have questions on this temporary deviation, call or email James M. Moore, Bridge Management Specialist, First Coast Guard District Bridge Branch, U.S. Coast Guard; telephone 212–514–4334, email james.m.moore2@uscg.mil.

Supplementary information: The Suffolk County Department of Public Works, the owner of the bridge, requested a temporary deviation in order to facilitate reconstruction of the bascule leaves.

The Beach Lane Bridge across the Quantuck Canal, mile 1.1 at Westhampton Beach, New York is a double-leaf bascule bridge offering mariners a vertical clearance of 13.9 feet at mean high water and 16.2 feet at mean low water in the closed position. Horizontal clearance is 50.3 feet, but utilization of a work barge placed underneath one of the bascule leaves will reduce horizontal clearance to 25 feet. The existing drawbridge operating regulations are listed at 33 CFR 117.799(d).

This temporary deviation will allow the Beach Lane Bridge to open only one of the two bascule spans for bridge openings from 12:01 a.m. on April 17, 2017 to 11:59 p.m. on September 30, 2017. Dual lift span operations will be permitted, provided 48 hours of advance notice is furnished to the owner of the bridge.

The majority of vessels requiring bridge openings are sailing vessels and yachts transiting the waterway. Discussion with the proprietor of the Modern Yachts Marina located in the vicinity of the bridge confirms typical recreational traffic will continue to be able to proceed through the navigation opening of the bridge during one-leaf operations. Small scale tug/barge combinations occasionally transit the Quantuck Canal, but such commercial craft are generally limited in size. Mariners concur that the requirement to provide the bridge owner 48 hours of advance notice for dual lift span operations will not impede overall operations.

Vessels that can pass under the bridge without an opening may do so at all times. The bridge will be able to open for emergencies and there is an alternate route for vessels unable to pass through the bridge when in the closed position.

The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notices to Mariners of the change in operating schedule for the bridge so that vessel operators can arrange their transits to minimize any impact caused by this temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridge must return to its regular operating schedule immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: April 24, 2017.

C.J. Bisignano,
Supervisory Bridge Management Specialist, First Coast Guard District.

National Waterway System—Approval and Promulgation of Implementation Plans: Oklahoma; Revisions to Minor New Source Review Permitting Program

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Pursuant to the Federal Clean Air Act (CAA or the Act), the Environmental Protection Agency (EPA) is approving severable portions of revisions to the Oklahoma New Source Review (NSR) State Implementation Plan (SIP) submitted by the State of Oklahoma on February 14, 2002 (the February 14, 2002, SIP submittal). This action addresses revisions to the Oklahoma Administrative Code (OAC), Title 252, Chapters 4 and 100, concerning the State’s Minor New Source Review air permitting program.

DATES: This rule is effective on June 14, 2017.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R06–OAR–2007–0989. All
