

DEPARTMENT OF JUSTICE**Notice of Lodging of Proposed Settlement Agreement Under the Comprehensive Environmental Response, Compensation, and Liability Act**

On May 11, 2017, a proposed Settlement Agreement was lodged with the Circuit Court of Cook County, Illinois, in the case entitled *In the Matter of the Rehabilitation of Centaur Insurance Company*, No. 87 CH 8615.

The Centaur Insurance Company ("Centaur") is in rehabilitation under the jurisdiction of the Circuit Court of Cook County, Illinois County Department, Chancery Division. In that proceeding, the United States has asserted claims totaling \$10 million on behalf of the Environmental Protection Agency under an insurance policy issued by Centaur to LCP Chemicals, Inc. ("LCP") in 1982 (the "Policy"). The Policy is an Excess Umbrella Liability policy with a liability limit of \$10 million in excess of \$11 of underlying liability. The claims under the Policy are based on LCP's liability to EPA under the Comprehensive Environmental Response, Compensation, and Liability Act ("CERCLA"), 42 U.S.C. 9601, *et seq.*, at three Superfund sites: The LCP Chemicals Site in Brunswick, Georgia ("Brunswick Site"), the Hanlin-Allied-Olin Superfund Site in Moundsville, West Virginia ("Moundsville Site"), and the LCP Chemicals, Inc. Superfund Site in Linden, New Jersey ("Linden Site"). The Office of the Deputy Receiver, Illinois Department of Insurance ("Rehabilitator"), has been appointed as the rehabilitator of Centaur under the Illinois statutes governing insurance receiverships.

The Settlement Agreement will require the Rehabilitator to pay EPA \$8,750,000, to be allocated as follows: \$2,916,667 for the Brunswick Site, \$2,916,667 for the Moundsville Site, and \$2,916,666 for the Linden Site. In exchange for this payment, the United States, on behalf of EPA, promises not to file a civil action against the Rehabilitator or Centaur for all liabilities under the Policy arising under CERCLA for the Brunswick Site, the Moundsville Site, the Linden Site, or any other site. The Settlement Agreement preserves the United States' right to file (a) any claim based on any other insurance policy issued by Centaur, (b) any claim by EPA under the Policy based on statutes other than CERCLA, and (c) any claims of federal agencies other than EPA under the Policy.

The publication of this notice opens a period for public comment on the Settlement Agreement. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *In the Matter of the Rehabilitation of Centaur Insurance Company*, No. 87 CH 8615 (Ill. Circuit Ct. Cook County), D.J. Ref. No. 90-11-3-10462. All comments must be submitted no later than thirty (30) days after the publication date of this notice. U.S. Nuclear Regulatory Commission

In the Matter of Airgas Specialty Gases, Inc.; EA-16-167; Docket No. 11006088; License No. XMAT427

Order Approving Direct and Indirect Transfers of Control of Export License I.

As of April 1, 2016, Airgas Specialty Gases, Inc. ("ASG"), a Texas corporation and holder of one U.S. Nuclear Regulatory Commission (NRC) export license (XMAT427), was merged into Airgas USA, LLC, a Delaware limited liability company, with Airgas USA, LLC, being the surviving entity and ASG not existing as a separate legal entity after the merger. Prior to this restructuring, both ASG and Airgas USA, LLC, were subsidiaries of Airgas, Inc. On May 23, 2016, Airgas, Inc. was acquired by L'Air Liquide, S.A. ("Air Liquide"), a public company in France. American Air Liquide Holdings, Inc. and Air Liquide International S.A., which were subsidiaries of Air Liquide before the May 23, 2016, acquisition, continued to exist. Following the May 23, 2016, acquisition, Airgas USA, LLC, remained a wholly-owned subsidiary of Airgas, Inc., but Airgas, Inc. became a wholly-owned subsidiary of American Air Liquide Holdings, Inc. American Air Liquide Holdings, Inc. is owned by American Air Liquide, Inc. (97.33033% ownership) and Carba Holdings, AG (2.66967% ownership), both of which are owned by Air Liquide International

S.A. Air Liquide International S.A. is a direct subsidiary of Air Liquide (the ultimate parent company).

II.

On December 5, 2016, after a review of records associated with ASG's indirect and direct transfers of control and records associated with the export of nuclear material to China on May 9, 2016, the NRC issued a Notice of Violation (NOV) to ASG (Agencywide Documents Access and Management System (ADAMS) Accession No. ML16245A279). The NRC determined that three violations of NRC requirements occurred. The violations involved: (1) The direct transfer of control of XMAT427 without Commission approval as required by Title 10 of the *Code of Federal Regulations* (10 CFR), Section 110.50(d), and Section 184 of the Atomic Energy Act (AEA) of 1954, as amended (42 U.S.C. 2234); (2) the indirect transfer of control of XMAT427 without written Commission consent as required by Section 184 of the AEA; and (3) the export of nuclear material without obtaining a specific license as required by 10 CFR 110.5. Specifically, 10 CFR 110.50(d) states that a "specific license may be transferred, disposed of or assigned to another person only with the approval of the Commission by license amendment." Section 184 of the AEA states, in part, that no NRC license shall be transferred, directly or indirectly, through transfer of control of any license to any person, unless the Commission shall, after securing full information, find that the transfer is in accordance with the provisions of this Act, and shall give its consent in writing. And 10 CFR 110.5 states, in part, that no person may export any nuclear material listed in 10 CFR 110.9 unless authorized by a general or specific license issued under 10 CFR part 110. Because ASG did not receive Commission approval, the NRC did not have the opportunity to review the planned transfers of control to ensure that the transferee possessed the appropriate authority over the license being directly or indirectly acquired and controlled. The violations associated with the indirect and direct transfers of control of XMAT427, without Commission approval, were categorized collectively, in accordance with the NRC Enforcement Policy, as a Severity Level IV problem because of the low radiological or programmatic significance associated with the particular circumstances of the case. Because the activities conducted under XMAT427 do not involve the actual storage of licensed material, the NRC
