

DEPARTMENT OF DEFENSE**Department of the Army, Corps of Engineers****Lake Eufaula Advisory Committee Meeting Notice**

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of open committee meeting.

SUMMARY: The Department of the Army is publishing this notice to announce the following Federal advisory committee meeting of the Lake Eufaula Advisory Committee (LEAC). The meeting is open to the public.

DATES: The Committee will meet from 10:00 a.m.–12:00 p.m. on Friday, June 16, 2017.

ADDRESSES: The meeting will be held at Legacy on Main Street, 224 North Main Street, Eufaula, OK 74432.

FOR FURTHER INFORMATION CONTACT: Mr. Jeff Knack; Designated Federal Officer (DFO) for the Committee, in writing at Eufaula Lake Office, 102 E. BK 200 Rd., Stigler, OK 74462–1829, or by email at Jeff.Knack@usace.army.mil, or by phone at 1–918–484–5135.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the Federal Advisory Committee Act of 1972 (5 U.S.C., Appendix, as amended), the Sunshine in the Government Act of 1976 (U.S.C. 552b, as amended) and 41 Code of the Federal Regulations (CFR 102–3.150).

Purpose of the Meeting: The Lake Eufaula Advisory Committee is an independent Federal advisory committee established as directed by Section 3133(b) of the Water Resources Development Act of 2007 (WRDA 2007) (Pub. L. 110–114). The committee is advisory in nature only with duties to include providing information and recommendations to the Corps of Engineers regarding operations of Eufaula Lake, Oklahoma for project purposes. In accordance with Sections 3133(c)(2) and 3133(d)(1) of WRDA 2007, the committee will also provide recommendations on a reallocation study concerning current and future use of the Lake Eufaula storage capacity for authorized project purposes as well as a subsequent pool management plan.

Agenda: This will be the third meeting of the LEAC. The committee will have a question and answer session with U.S. Army Corps of Engineers representatives about reallocation studies and lake level manipulation plans, discuss proposals for recommendations about reallocation studies, and discuss future direction.

Public's Accessibility to the Meeting: Pursuant to 5 U.S.C. 552b and 41 CFR 102–3.140 through 102–3.165, and the availability of space, this meeting is open to the public. Seating is on a first-come basis. Legacy on Main Street is readily accessible to and usable by persons with disabilities. For additional information about public access procedures, contact Mr. Jeff Knack, the Committee's Designated Federal Officer, at the email address or telephone number listed in the **FOR FURTHER INFORMATION CONTACT** section.

Written Comments and Statements: Pursuant to 41 CFR 102–3.105(j) and 102–3.140 and section 10(a)(3) of the Federal Advisory Committee Act, the public or interested organizations may submit written comments or statements to the Committee, in response to the stated agenda of the open meeting or in regard to the Committee's mission in general. Written comments or statements should be submitted to Mr. Knack, the Committee's Designated Federal Officer, via electronic mail, the preferred mode of submission, at the address listed in the **FOR FURTHER INFORMATION CONTACT** section. Each page of the comment or statement must include the author's name, title or affiliation, address, and daytime phone number. Written comments or statements being submitted in response to the agenda set forth in this notice must be received by the Designated Federal Officer at least seven business days prior to the meeting to be considered by the Committee. The Designated Federal Officer and the Committee Chair will review all timely submitted written comments or statements and ensure the comments are provided to all members of the Committee before the meeting. Written comments or statements received after this date may not be provided to the Committee until its next meeting. Please note that because the LEAC operates under the provisions of the Federal Advisory Committee Act, as amended, all written comments will be treated as public documents and will be made available for public inspection.

Pursuant to 41 CFR 102–3.140d, the Committee is not obligated to allow a member of the public to speak or otherwise address the Committee during the meeting. Members of the public will be permitted to make verbal comments during the Committee meeting only at the time and in the manner described below. If a member of the public is interested in making a verbal comment at the open meeting, that individual must submit a request, with a brief statement of the subject matter to be addressed by the comment, at least three

(3) days in advance to the Committee's Designated Federal Officer, via electronic mail, the preferred mode of submission, at the addresses listed in the **FOR FURTHER INFORMATION CONTACT** section. The Designated Federal Officer will log each request, in the order received, and in consultation with the Committee Chair determine whether the subject matter of each comment is relevant to the Committee's mission and/or the topics to be addressed in this public meeting. A 15-minute period near the end of meeting will be available for verbal public comments. Members of the public who have requested to make a verbal comment and whose comments have been deemed relevant under the process described above, will be allotted no more than three (3) minutes during this period, and will be invited to speak in the order in which their requests were received by the Designated Federal Officer.

Brenda S. Bowen,

Army Federal Register Liaison Officer.

BILLING CODE 3720–58–P

DEPARTMENT OF DEFENSE**Department of the Army, U.S. Army Corps of Engineers****Notice of Intent To Prepare a Draft Integrated General Reevaluation Report and Supplemental Environmental Impact Statement, Middle Rio Grande Flood Protection Bernalillo to Belen, New Mexico: Mountain View, Isleta and Belen Units**

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: The U.S. Army Corps of Engineers (Corps) intends to prepare a General Reevaluation Report and Supplemental Environmental Impact Statement (GRR/SEIS). This is in compliance with the National Environmental Policy Act (NEPA), for the Middle Rio Grande Flood Protection Bernalillo to Belen, New Mexico Project (Project). This also is the implementation of actions to avoid or minimize potential effects to Endangered Species Act (ESA) listed species and/or associated critical habitat. The GRR/SEIS will supplement the *May 1979, Middle Rio Grande Flood Protection Bernalillo to Belen, New Mexico, Final Environmental Impact Statement* (FEIS). That document assessed impacts from alternatives to reduce flood risk to structures, infrastructure and life safety. The

previously proposed alternative included reconstructing the existing spoil bank system maintained by the Middle Rio Grande Conservancy District (MRGCD) with structurally competent levee system.

ADDRESSES: Comments should be mailed to Albuquerque District, U.S. Army Corps of Engineers, CESP-PM-LE, Bernalillo to Belen Levee GRR/SEIS, 4101 Jefferson Plaza NE., Albuquerque, NM 87109, or submitted via email to Michael.D.Porter@usace.army.mil, designated by inserting "Bernalillo to Belen Levee SEIS" in the subject line. Comments may also be submitted at public meetings that will be scheduled at a later date.

FOR FURTHER INFORMATION CONTACT:

Questions about the proposed action and SEIS can be answered by contacting Dr. Michael D. Porter, Fishery Biologist, Albuquerque District, U.S. Army Corps of Engineers, CESP-PM-LE, 4101 Jefferson Plaza NE., Albuquerque, NM 87109, by phone at (505) 342-3264; or via email to Michael.D.Porter@usace.army.mil designated by including "Bernalillo to Belen Levee SEIS" in the subject line.

SUPPLEMENTARY INFORMATION: The original spoil banks were constructed by MRGCD as part of their authority to drain wetlands and deliver irrigation water.

Preparation of this GRR/SEIS became necessary due to the changes that have occurred since the project was authorized as described below. A longer period of record for hydrological data is now available to allow improved and updated hydrological analysis. New levee design criteria that address long duration flows have also been adopted by the Corps in 1993. Any proposed plan now has to incorporate new design features that prevent seepage through the levee or its foundation due to prolonged flow against the riverward toe. The Corps has adopted a probabilistic determination of flood risk to perform levee design. Three species that have been listed as threatened or endangered since 1994 occur within the study area (two with critical habitat). These include the Western Yellow-billed Cuckoo, the Southwestern Willow Flycatcher, and the Rio Grande Silvery Minnow.

The GRR/SEIS will investigate and determine the extent of Federal interest in a range of alternative plans designed to reduce the risk of flooding in the communities between Albuquerque and Belen. The GRR/SEIS will describe the risk of flooding in the communities between Albuquerque and Belen; evaluate a range of alternatives to

reduce flood risk and potential environmental impacts; and describe measures to minimize or mitigate for potential environmental impacts.

On November 27, 1995, the Corps published the notice of intent (NOI) to prepare the SEIS for the MRG GRR study in the **Federal Register** (Vol. 60, No. 227).

Previously Proposed Action: The Corps has previously proposed a Tentatively Selected Plan for the Project to rehabilitate the spoil bank system with an engineered levee in four Middle Rio Grande Units. The levee for the Mountain View (4.4 miles), Isleta West (3.2 miles), Belen East (18.1 miles), and Belen West Units (22.1 miles) are designed to provide protection for the 0.1% probability flood. The Corps initiated consultation with the U.S. Fish and Wildlife Service (Service) on the effects of the Project on species listed under the ESA. As part of that consultation, the Corps has proposed several conservation measures that would modify structures or operation and maintenance of the Project. The Service is preparing a Biological Opinion (BiOp) and the Corps expects that the Service may incorporate the conservation measures as part of the BiOp. The Corps will need to complete applicable environmental compliance, including evaluation under NEPA, prior to adopting and implementing any terms and conditions in the BiOp. The proposed GRR/SEIS would constitute that evaluation under NEPA. The Corps has proposed several measures to improve conditions for listed species, including the actions described in the Public Involvement Process section below, subject to authority and funding:

Public Involvement Process: Coordination has been ongoing since 2008 with both public and private entities that have jurisdiction or an interest in land and resources in the Middle Rio Grande Valley of New Mexico. These entities include the general public, local governments, the Pueblo of Isleta, the U.S. Bureau of Reclamation, the Service, the MRGCD, the New Mexico Department of Game and Fish, and the Interstate Stream Commission. Coordination will continue throughout the development of the SEIS through comment letters, public meetings and field visits. All interested parties, including federal, state, tribal, and public entities, will be invited to submit comments on the draft SEIS when it is circulated for review.

The planning effort is also being coordinated with the Service pursuant to the requirements of the Fish and Wildlife Coordination Act of 1972 and the ESA of 1973, as amended.

Consultation with the Advisory Council on Historic Preservation and the New Mexico State Historic Preservation Officer is ongoing pursuant to the National Historic Preservation Act of 1966.

Significant Issues To Be Analyzed: Significant issues to be analyzed in the development of the SEIS include the effect of the alternatives on endangered or threatened species and their critical habitat; floodplain development; water quality; riparian ecological systems; social welfare; human safety; cultural resources; and aesthetic qualities. Development of mitigation measures will be undertaken for any unavoidable impacts.

Request for Review Comments: The Corps invites affected federal, state, and local agencies, affected Native American tribes, and other interested organizations and persons to participate in the review of the GRR/SEIS. The Corps invites interested parties to provide specific comments on issues and the preferred alternative in the GRR/SEIS related to the construction of the Project. Comments, requests to be placed on the GRR/SEIS mailing list, and requests for information may be submitted to the address above. All comments and materials received, including names and addresses, will become part of the administrative record and may be released to the public. Interested parties should not submit confidential business or otherwise sensitive or protected information.

Public Scoping Meeting: The Corps currently plans to conduct public review meetings for this GRR/SEIS in 2017. The exact date, time, and location of the public meetings has not yet been determined. The Corps will publicize this information once the meeting arrangements have been made. The draft GRR/SEIS is currently scheduled to be available for public review in summer 2017. The final GRR/SEIS is currently scheduled to be available for public review in spring 2018.

James L. Booth,

Lieutenant Colonel, U.S. Army, District Commander.
