I. Meeting Details and Agenda

The GPAC will be considering the proposed rule titled, “Safety of Gas Transmission and Gathering Pipelines,” which was published in the **Federal Register** on April 8, 2016, (81 FR 20722) and on the associated regulatory analysis. In the proposed rule, PHMSA is proposing the following changes to Part 192:

- Require periodic assessments of pipelines in locations where persons are expected to be at risk that are not already covered under the integrity management program requirements.

- Modify the repair criteria, both inside and outside of high consequence areas (HCAs).

- Require inspections of pipelines in areas affected by extreme weather, man-made and natural disasters, and other similar events.

- Provide additional specificity for in-line inspections, including explicit requirements to account for uncertainty of reported inspection data when evaluating in-line inspection data to identify anomalies.

- Expand integrity assessment methods to explicitly address guided wave ultrasonic inspection and excavation with direct in-situ examination.

- Provide clearer functional requirements for conducting risk assessments for integrity management, including addressing seismic risks.

- Expand the mandatory data collection and integration requirements for integrity management, including data validation and seismicity.

- Add requirements to address management of change.

- Repeal the use of API Recommended Practice 80 for gathering lines.

- Apply Type B requirements along with emergency requirements to newly regulated greater than 8-inch Type A gathering lines in Class 1 locations (GAO Recommendation 14–667).

- Extend the reporting requirements to all gathering lines.

- Expand requirements for corrosion protection to specify additional post-construction quality checks, and periodic operational and maintenance checks to address coating integrity, cathodic protection, and gas quality monitoring.

- Require operators to report maximum allowable operating pressure exceedances.

- Require safety features on in-line inspection tool launchers and receivers.

- Add certain types of roadways to the definition of “identified sites” (NTSB P–14–1).

- Address grandfathered pipe and pipe with inadequate records.

The GPAC meeting agenda will include a discussion on the following topics as time permits:

—Corrosion control.

—Records.

—IM Clarifications.

—Strengthened assessment requirements.

—Assessments outside of HCAs.

—Repair criteria revisions.

—Material documentation.

—Integrity Verification Process for grandfathered segments.

The agenda will be published on the PHMSA meeting page <https://primis.phmsa.dot.gov/meetings/MtgHome.mtg?mtg=123>, once it is finalized.

II. Committee Background

The GPAC is a statutorily mandated advisory committee that advises PHMSA on proposed gas pipeline safety standards and their associated risk assessments. The committee is established in accordance with the Federal Advisory Committee Act (5 U.S.C. App. 2, as amended) and 49 U.S.C. 60115. The committee consists of 15 members with membership evenly divided among federal and state governments, the regulated industry, and the general public. The committees advise PHMSA on the technical feasibility, reasonableness, cost-effectiveness, and practicability of each proposed pipeline safety standard.

Issued in Washington, DC, on May 18, 2017, under authority delegated in 49 CFR 1.97.

Alan K. Mayberry,
