Requests for additional information or copies of the information collection instrument and instructions should be directed to Jennifer Watson, (907) 586-7228.

SUPPLEMENTARY INFORMATION:**I. Abstract**

This request is for extension of a currently approved information collection.

Scale and catch weighing requirements address performance standards designed to ensure that all catch delivered to the processor is accurately weighed and accounted for. Scale and catch-weighing monitoring is required for Western Alaska Community Development Quota Program (CDQ) catcher/processors (C/Ps), American Fisheries Act (AFA) C/Ps, AFA motherships, AFA shoreside processors and stationary floating processors, Central Gulf of Alaska Rockfish Program trawl C/Ps, non-AFA trawl C/Ps participating in Bering Sea and Aleutian Islands (BSAI) trawl fisheries, and longline C/Ps participating in BSAI Pacific cod fisheries.

National Marine Fisheries Service (NMFS) has identified three primary objectives for monitoring catch. First, monitoring must ensure independent verification of catch weight, species composition, and location data for every delivery by a catcher vessel or every pot by a C/P. Second, all catch must be weighed accurately using NMFS-approved scales to determine the weight of total catch. Third, the system must provide a verifiable record of the weight of each delivery. To effectively manage fisheries, NMFS must have data that will provide reliable independent estimates of the total catch.

II. Method of Collection

Respondents have a choice of either electronic or paper forms. Methods of submittal include email, online, mail, and facsimile transmission. Daily flow scale and hopper scale tests are reported using an electronic logbook. Printed reports are generated automatically by software. Video monitoring systems record and store video data automatically.
