technological innovations or updated guidance. A withdrawal includes the original generic communication and any supplements or revisions. The NRC is currently publishing withdrawals of generic communications on a quarterly basis.

Withdrawal of the original generic communication and supplements, if applicable, will not affect the public’s ability to obtain this information. The original generic communication and supplements will remain accessible through ADAMS and the NRC’s generic communications Web site. The NRC’s generic communications Web site will be updated to reflect the generic communications status as withdrawn. The generic communications Web site is accessible at https://www.nrc.gov/reading-rm/doc-collections/gen-comm/.

B. Withdrawals of Generic Communications

The following generic communications are withdrawn:

This GL was issued to withdraw the original GL 1995–08, dated October 31, 1995. Since the original GL has been withdrawn, there is no longer a need for this revision, and it is also withdrawn.

This RIS was issued to inform addressees on how to communicate and interact with NRC during the Federal Government shutdown of 2013. Since the guidance only applied to the Federal Government shutdown of 2013, there is no longer a need for this RIS.

• RIS 2013–16, Supplement 1, “Interactions Between the NRC and NRC Stakeholders During a Lapse of Agency Appropriations,” October 9, 2013 (ADAMS Accession No. ML13273A190).

This supplement to RIS 2013–16 was issued to notify addressees that NRC appropriations no longer supported normal operations, and the NRC would be operating at a reduced level. Since the guidance only applied to the Federal Government shutdown of 2013, there is no longer a need for this RIS.

Dated at Rockville, Maryland, this 5th day of June 2017.

For the Nuclear Regulatory Commission.

Alexander D. Garmons,
