

OMB Control Number: 0648-0441.

Form Number(s): None.

Type of Request: Regular (extension of a currently approved information collection).

Number of Respondents: 201.

Average Hours per Response: 4 hours for installation or replacement of a VMS unit; 2 hours for annual maintenance.

Burden Hours: 170.

Needs and Uses: This request is for extension of a currently approved information collection.

As part of fishery management plans developed under the authority of the Magnuson-Stevens Fishery Conservation and Management Act, owners of commercial fishing vessels in the Hawaii pelagic longline fishery, American Samoa pelagic longline fishery (only vessels longer than 50 feet), Northwestern Hawaiian Islands lobster fishery (currently inactive), and Northern Mariana Islands bottomfish fishery (only vessels longer than 40 feet) must allow the National Oceanic and Atmospheric Administration (NOAA) to install vessel monitoring system (VMS) units on their vessels when directed to do so by NOAA enforcement personnel. VMS units automatically send periodic reports on the position of the vessel. NOAA uses the reports to monitor the vessel's location and activities, primarily to enforce regulated fishing areas. NOAA pays for the units and messaging. There is no public burden for the automatic messaging; however, VMS installation and annual maintenance are considered public burden.

Affected Public: Business or other for-profit organizations.

Frequency: One time, annually and hourly (passive reporting).

Respondent's Obligation: Mandatory.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Reporting Requirements for the Ocean Salmon Fishery off the Coasts of Washington, Oregon, and California.

OMB Control Number: 0648-0433.

Form Number(s): None.

Type of Request: Regular (extension of a currently approved information collection).

Number of Respondents: 40.

Average Hours per Response: 15 minutes.

Burden Hours: 10.

Needs and Uses: Based on the management regime specified each year, designated regulatory areas in the commercial ocean salmon fishery off the coasts of Washington, Oregon, and California may be managed by numerical quotas. To accurately assess catches relative to quota attainment during the fishing season, catch data by regulatory area must be collected in a timely manner. Requirements to land salmon within specific time frames and in specific areas may be implemented in the preseason regulations to aid in timely and accurate catch accounting for a regulatory area. State landing systems normally gather the data at the time of landing. If unsafe weather conditions or mechanical problems prevent compliance with landing requirements, fishermen need an alternative to allow for a safe response. Fishermen would be exempt from landing requirements if the appropriate notifications are made to provide the name of the vessel, the port where delivery will be made, the approximate amount of salmon (by species) on board, and the estimated time of arrival.

Affected Public: Business or other for-profit organizations; individuals or households.

Frequency: On occasion.

Respondent's Obligation: Mandatory.

information collection should be sent within 30 days of publication of this notice to [OIRA\\_Submission@omb.eop.gov](mailto:OIRA_Submission@omb.eop.gov) or fax to (202) 395-5806.
