1. *The title of the information collection:* Collection of Operator Simulator Training Data.
2. *OMB approval number:* An OMB control number has not yet been assigned to this proposed information collection.
3. *Type of submission:* New.
4. *The form number, if applicable:* Not applicable.
5. *How often the collection is required or requested:* Licensees will provide a one-time response expressing their interest in participating. The NRC staff anticipates that the participating licensees would provide data six times per year.
6. *Who will be required or asked to respond:* U.S. nuclear power stations with an onsite reactor simulator.
7. *The estimated number of annual responses:* 95 (15 one-time responses + 90 annual responses).
8. *The estimated number of annual respondents:* 5.
9. *The estimated number of hours needed annually to comply with the information:* 411 hours.

10. *Abstract:* The NRC's Office of Nuclear Regulatory Research (NRC/RES) and the South Texas Project Nuclear Operating Company jointly developed the Scenario Authoring, Characterization, and Debriefing Application (SACADA) software for operator simulator training. The SACADA collects operator simulator performance information that can be used to improve simulator training and human reliability analysis. The NRC/RES is making the SACADA software

available to licensees for their voluntary use. The licensees interested in participating in using the software will contact the NRC. The NRC will provide free software licenses, training, and technical support to facilitate the licensee's use of the software. The participating licensees would provide data approximately six times per year according to their training cycle to a master database currently maintained by the Idaho National Laboratory and sponsored by the NRC. The licensees would agree to let the NRC analyze the data for improving human reliability analysis techniques.
