

Second, the Task Force seeks suggestions from the public for specific regulatory actions previously taken by the Department that should be repealed, replaced, or modified, consistent with applicable law. In particular, the Task Force welcomes specific comments that identify regulatory actions that meet the criteria as proscribed in Executive Order 13777.

The Department's Regulatory Reform Task Force will consider public comments as it conducts its own evaluation of the Department's regulations in order to identify candidate regulations for repeal, replacement, or modification.

The Department notes that this Request for Comment is issued solely for information and planning purposes. The Department will give careful consideration to the comments, and may use them as appropriate during its review, but we do not anticipate providing a point-by-point response to each comment submitted. While responses to this Request for Comments do not bind the Department to any further actions related to the response, all submissions will be made publicly available on <http://www.regulations.gov>.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <http://www.regulations.gov> as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Rulemaking Procedure

This proposed rule is limited to the changes contained in Amendment No. 3 to CoC No. 1032 and does not include other aspects of the Holtec HI-STORM FW MPC Storage System design. Because the NRC considers this action noncontroversial and routine, the NRC is publishing this proposed rule concurrently with a direct final rule in the Rules and Regulations section of this issue of the **Federal Register**. Adequate protection of public health and safety continues to be ensured. The direct final rule will become effective on September 11, 2017. However, if the NRC receives significant adverse comments on this proposed rule by July 28, 2017, then the NRC will publish a document that

withdraws the direct final rule. If the direct final rule is withdrawn, the NRC will address the comments received in response to these proposed revisions in a subsequent final rule. Absent significant modifications to the proposed revisions requiring republication, the NRC will not initiate a second comment period on this action in the event the direct final rule is withdrawn.

A significant adverse comment is a comment where the commenter explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. A comment is adverse and significant if:

(1) The comment opposes the rule and provides a reason sufficient to require a substantive response in a notice-and-comment process. For example, a substantive response is required when:

(a) The comment causes the NRC staff to reevaluate (or reconsider) its position or conduct additional analysis;

(b) The comment raises an issue serious enough to warrant a substantive response to clarify or complete the record; or

(c) The comment raises a relevant issue that was not previously addressed or considered by the NRC staff.

(2) The comment proposes a change or an addition to the rule, and it is apparent that the rule would be ineffective or unacceptable without incorporation of the change or addition.

(3) The comment causes the NRC staff to make a change (other than editorial) to the rule, CoC, or Technical Specifications.

For additional procedural information and the regulatory analysis, see the direct final rule published in the Rules and Regulations section of this issue of the **Federal Register**.

III. Background

Section 218(a) of the Nuclear Waste Policy Act (NWPA) of 1982, as amended, requires that “the Secretary [of the Department of Energy] shall establish a demonstration program, in cooperation with the private sector, for the dry storage of spent nuclear fuel at civilian nuclear power reactor sites, with the objective of establishing one or more technologies that the [Nuclear Regulatory] Commission may, by rule, approve for use at the sites of civilian nuclear power reactors without, to the maximum extent practicable, the need for additional site-specific approvals by the Commission.” Section 133 of the NWPA states, in part, that “[the Commission] shall, by rule, establish procedures for the licensing of any technology approved by the Commission under Section 219(a) [sic: 218(a)] for use at the site of any civilian nuclear power reactor.”

To implement this mandate, the Commission approved dry storage of spent nuclear fuel in NRC-approved casks under a general license by publishing a final rule which added a new subpart K in part 72 of title 10 of

the *Code of Federal Regulations* (10 CFR) entitled, “General License for Storage of Spent Fuel at Power Reactor Sites” (55 FR 29181; July 18, 1990). This rule also established a new subpart L in 10 CFR part 72 entitled, “Approval of Spent Fuel Storage Casks,” which contains procedures and criteria for obtaining NRC approval of spent fuel storage cask designs. The NRC subsequently issued a final rule dated March 28, 2011 (76 FR 17019), that approved the Holtec HI-STORM FW MPC Storage System design and added it to the list of NRC-approved cask designs in 10 CFR 72.214 as CoC No. 1032.

IV. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, well-organized manner that also follows other best practices appropriate to the subject or field and the intended audience. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, “Plain Language in Government Writing,” published June 10, 1998 (63 FR 31883). The NRC requests comment on the proposed rule with respect to clarity and effectiveness of the language used.

Rules and Regulations Under the Textile Fiber Products Identification Act

AGENCY: Federal Trade Commission (“FTC” or “Commission”).

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission proposes amending the Textile Rules (“Rules and Regulations under the Textile Fiber Products Identification Act”) to delete the requirement that an owner of a registered word trademark furnish the FTC with a copy of the mark’s registration with the United States Patent and Trademark Office (“USPTO”) before using the mark on labels, and to no longer restrict the use of such trademarks to only those also employed as house marks. Eliminating these requirements is expected to reduce compliance costs while increasing firms’ flexibility.

DATES: Written comments must be received on or before July 31, 2017.

ADDRESSES: Interested parties may file a comment online or on paper by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. SUPPLEMENTARY INFORMATION:

I. Introduction

The Commission recently announced a new initiative to eliminate or change outdated, unnecessary regulations and processes.¹ While the textile regulation at issue here does not impose large costs on business, the cumulative burden of unnecessary regulations can impose significant costs and undermine the efficiency with which government delivers services to the public. With these concerns in mind, the Commission now proposes eliminating the requirement in 16 CFR 303.19(a) that businesses furnish the Commission with registered word trademarks prior to using these marks to satisfy the Textile Rules. Eliminating this requirement is expected to reduce compliance costs while increasing firms’ flexibility.

Specifically, the Textile Fiber Products Identification Act (“Textile Act”)² and implementing rules (“Textile Rules”) require marketers to, among other things, attach a label to each covered textile product disclosing: (1) The generic names and percentages by weight of the constituent fibers in the product; (2) the name under which the manufacturer or other responsible company does business or, in lieu thereof, the company’s registered identification number (“RN number”); and (3) the name of the country where the product was processed or manufactured.³ Section 303.19 allows the owners of registered word trademarks who use these trademarks as house marks to disclose such trademarks on labels in lieu of their business names. However, before doing so, the company must file a copy of the trademark’s USPTO registration with the Commission. This requirement was imposed in 1959 presumably to obviate
