SUPPLEMENTARY INFORMATION:

I. Abstract

The Migratory Bird Treaty Act (Act; 16 U.S.C. 703-712) implements the four bilateral migratory bird treaties the United States entered into with Great Britain (for Canada), Mexico, Japan, and Russia. The Act authorizes and directs the Secretary of the Interior to allow hunting, taking, etc., of migratory birds subject to the provisions of and in order to carry out the purposes of the four treaties. Section VII of the U.S.-Canada Migratory Bird Treaty authorizes the taking of migratory birds that, under extraordinary conditions, become seriously injurious to agricultural or other interests.

The number of light geese (lesser snow, greater snow, and Ross’ geese) in the midcontinent region has nearly quadrupled during the past several decades, due to a decline in adult mortality and an increase in winter survival. We refer to these species and subspecies as light geese because of their light coloration, as opposed to dark geese, such as white-fronted or Canada geese. Because of their feeding activity, light geese have become seriously injurious to their habitat, as well as to habitat important to other migratory birds. This poses a serious threat to the short- and long-term health and status of some migratory bird populations. We believe that the number of light geese in the midcontinent region has exceeded long-term sustainable levels for their arctic and subarctic breeding habitats, and that the populations must be reduced. Title 50 of the Code of Federal Regulations (CFR) at part 21 provides authority for the management of overabundant light geese.

Regulations at 50 CFR 21.60 authorize States and tribes in the midcontinent and Atlantic flyway regions to control light geese within the United States through the use of alternative regulatory

strategies. The conservation order authorizes States and tribes to implement population control measures without having to obtain a Federal permit, thus significantly reducing their administrative burden. The conservation order is a streamlined process that affords an efficient and effective population reduction strategy, rather than addressing the issue through our permitting process. Furthermore, this strategy precludes the use of more drastic and costly direct population-reduction measures such as trapping and culling geese. States and tribes participating in the conservation order must:

- Designate participants and inform them of the requirements and conditions of the conservation order. Individual States and tribes determine the method to designate participants and how they will collect information from participants.

- Keep records of activities carried out under the authority of the conservation order, including:

- (1) Number of persons participating in the conservation order;

- (2) Number of days people participated in the conservation order;

- (3) Number of light geese shot and retrieved under the conservation order; and

- (4) Number of light geese shot, but not retrieved.

- Submit an annual report summarizing the activities conducted under the conservation order on or before September 15 of each year. Tribal information can be incorporated in State reports to reduce the number of reports submitted.
