

with the concurrence of the Assistant General Counsel for Administration and Transactions, formally determined on March 21, 2017, pursuant to Section 10(d) of the Federal Advisory Committee Act, in accordance with Section 5(c) of the Government in the Sunshine Act, Public Law 94-409, that the meeting of the Judges Panel may be closed to the public in accordance with 5 U.S.C. 552b(c)(4) because the meeting is likely to disclose trade secrets and commercial or financial information obtained from a person which is privileged or confidential and 5 U.S.C. 552b(c)(9)(B) because the meeting is likely to disclose information the premature disclosure of which would, in the case of any agency, be likely to significantly frustrate implementation of a proposed agency action. The meeting, which involves examination of current Malcolm Baldrige National Quality Award (Award) applicant data from U.S. organizations and a discussion of these data as compared to the Award criteria in order to recommend Award recipients, will be closed to the public.

Kevin Kimball,

NIST Chief of Staff.

Agenda

All meetings will discuss facets of implementing the Seafood Import Monitoring Program, including:

- Overview of the Seafood Import Monitoring Program.
- Implementation Timeline.
- Pilot Testing in the Automated Commercial Environment (ACE) for U.S. Importers.
- Traceability Data Requirements for Reporting.
- Supply Chain Data Requirements for Recordkeeping.
- Question and Answer Session.

As part of NOAA's ongoing efforts to provide industry awareness of and support for compliance with the Seafood Import Monitoring Program's traceability data reporting and recordkeeping requirements, NMFS will hold public meetings to discuss the implementation of the U.S. Seafood Import Monitoring Program and address questions from participants.

The meetings will address issues relevant to both foreign exporters and U.S. domestic importers of seafood species whose products are covered by the Seafood Import Monitoring Program (SIMP). The mandatory compliance date for SIMP is January 1, 2018. Please note,

however, that the rule has been challenged in Federal court and the resolution of that case may impact implementation of the rule, including the compliance date.

The Seafood Import Monitoring Program is the first phase of a risk-based traceability program, which establishes the reporting and recordkeeping requirements needed to prevent illegally harvested and misrepresented seafood from entering into U.S. Commerce. In the development of the SIMP rule, 13 "priority" species were identified as being most at risk for Illegal, Unreported, and Unregulated (IUU) fishing and misrepresentation, and are the only species currently subject to this program.

Importers of the 13 priority species (Abalone*, Atlantic Cod, Atlantic Blue Crab, Dolphinfish (Mahi Mahi), Grouper, Red King Crab, Pacific Cod, Red Snapper, Sea Cucumber, Sharks, Shrimp*, Swordfish, and Tunas: Albacore, Bigeye, Skipjack, Yellowfin, and Bluefin) will be required to submit harvest and landing information on those products through the International Trade Data System (ITDS) prior to entry into U.S. Commerce, and maintain supply chain records from the point of harvest to the point of entry into U.S. Commerce for a period of two years after entry. *Note that the mandatory compliance date for Abalone and Shrimp has been stayed until further notice.

Information on future SIMP implementation meetings and transcripts of prior meetings and webinars can be found at: <http://www.iuufishing.noaa.gov/RecommendationsandActions/RECOMMENDATION1415/FinalRuleTraceability.aspx>.

Special Accommodations

The meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Celeste Leroux at (202) 816-0661 prior to the meeting.

Dated: July 3, 2017.
