**SUPPLEMENTARY INFORMATION**: US–CERT is responsible for performing, coordinating, and supporting response to information security incidents, which may originate outside the Federal community and affect users within it, or originate within the Federal community and affect users outside of it. Often, therefore, the effective handling of security incidents relies on information sharing among individual users, industry, and the Federal Government, which may be facilitated by and through US–CERT.

US–CERT fulfills the role of the Federal information security incident center for the United States Federal Government as defined in the Federal Information Security Modernization Act of 2014. Each Federal agency is required to notify and consult with US–CERT regarding information security incidents involving the information and information systems (managed by a Federal agency, contractor, or other source) that support the operations and assets of the agency. Additional entities report incident information to US–CERT voluntarily.

Per the Federal Information Security Modernization Act of 2014, as codified in subchapter II of chapter 35 of title 44 of the United States Code, US–CERT must inform operators of agency information systems about current and potential information security threats and vulnerabilities. Per the Homeland Security Act, as amended, the NCCIC, of which US–CERT and ICS–CERT are a part, is required to be the Federal civilian interface for sharing cybersecurity risks, incidents, analysis, and warnings for federal and non-Federal entities.

OMB is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

**SUPPLEMENTARY INFORMATION**: Section 227 of the Homeland Security Act authorizes the National Cybersecurity and Communications Integration Center (NCCIC) within NPPD as a “Federal civilian interface for the multi-directional and cross-sector sharing of information related to . . . cybersecurity risks.” 6 U.S.C. 148(c)(1). This authority applies to Federal and non-Federal entities, including the private sector, small and medium businesses, sectors of critical infrastructure, and information sharing organizations. This provision includes the authority to receive, analyze and disseminate information about cybersecurity risks and incidents and to provide guidance, assessments, incident response support, and other technical assistance upon request and codifies NPPD’s coordinating role among federal and non-federal entities. 6 U.S.C. 148.

As part of its information sharing responsibilities with non-Federal entities, the National Defense Authorization Act For Fiscal Year 2017 amended the Homeland Security Act to authorize the Department to specifically focus on small businesses. See Public Law 114–328 (2017). Specifically, the Act authorizes NPPD to “leverage small business development centers to provide assistance to small business concerns by disseminating information
