The project is being developed to alleviate congestion and improve mobility along the I–516 and SR 21/CS 1503/DeRenne Avenue corridor. Proposed project elements may include modifications at the interchange of I–516 and SR 21, improvements along roads adjacent to DeRenne Avenue, intersection upgrades, and improvements along DeRenne Avenue.

A study corridor large enough to incorporate detailed studies for the full range of alternatives to be considered for the project will be evaluated. The EIS will be prepared in accordance with the National Environmental Policy Act (NEPA: 42 U.S.C. 4321 et seq.) of 1969, and the regulations implementing NEPA set forth in 40 CFR parts 1500–1508 and 1504. An additional agency coordination will begin with publication of the NOI, followed by initial contact and scoping occurring within 45 to 60 days after publication of the NOI and continuing coordination throughout the EIS process. Regulations implementing NEPA, as well as the provisions of SAFETEA–LU and MAP–21, call for enhanced agency and public involvement in the EIS process. An invitation to all Federal and non-Federal agencies and Native American tribes that may have an interest in the proposed project will be extended.
