

range of the operation) from applicants seeking authorization by the Federal Communications Commission (FCC) to operate in radio frequency (RF) bands that are shared on a co-primary basis by federal and non-federal spectrum users. The web-based system provides a means for non-federal applicants to rapidly determine the availability of RF spectrum in a specific location, or the need for detailed frequency coordination of a specific newly proposed assignment within the shared portions of the radio spectrum. It allows proposed radio site information from non-federal applicants to be analyzed, and a real-time determination made as to whether a potential for RF interference to, or from, existing Federal government radio operations exists in the vicinity of the proposed site. This web-based coordination helps expedite the coordination process for non-federal applicants while assuring protection of government data relating to national security. The information provided by non-federal applicants also will assist in the protection of the applicant's station from interference from future government operations.

## II. Method of Collection

NTIA collects the data by means of an Internet-based system. The system provides real-time responses for an applicant to obtain either: (1) A validation of the coordination of a single frequency, or (2) a notification of the unavailability of a frequency at one site which will require further coordination by the FCC and NTIA.

## III. Data

*OMB Control No:* 0660-0018.

*Form No.:* N/A.

*Type of Review:* Regular submission (extension of currently approved information collection).

*Affected Public:* Applicants seeking to operate in the 71-76 GHz, 81-86 GHz, and 92-95 GHz radio frequency bands.

*Estimated Total Number of Annual Respondents:* 4,000.

*Estimated Time per Response:* 15 minutes.

*Estimated Total Annual Burden Hours:* 1,000.

*Estimated Total Annual Cost to Public:* \$0.00.

## IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have a practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the

proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

## DEPARTMENT OF DEFENSE

### Department of the Navy

#### Record of Decision (ROD) for the United States Marine Corps Santa Margarita River Conjunctive Use Project (SMR CUP) at Marine Corps Base (MCB) Camp Pendleton, California

**AGENCIES:** Bureau of Reclamation (Reclamation), Department of the Navy (DoN).

**ACTION:** Record of Decision.

**SUMMARY:** The Department of the Navy (DoN), after carefully considering the environmental consequences of the proposed action, announces its decision to implement a project for the conjunctive use of surface water and groundwater within the Lower Santa Margarita River (SMR) Basin. The DoN has selected the preferred alternative as identified in the 2016 Final Environmental Impact Statement (EIS)/ Environmental Impact Report (EIR). This alternative consists of construction and operation of new facilities for adaptive management of surface water and groundwater resources that would be achieved through the enhanced diversion of SMR surface waters to groundwater recharge ponds and the active use of groundwater aquifers for water storage. The proposed action would resolve the water rights disputes between the United States (on behalf of the Marine Corps) and Fallbrook Public Utility District (FPUD) and satisfy the United States District Court for the Southern District of California order to find a "physical solution" to the ongoing litigation in *United States v. Fallbrook Public Utility District, et al.* The Proposed Action would also efficiently meet the long-term water demands of Marine Corps Installations (MCI) West-MCB Camp Pendleton and FPUD, reduce FPUD's dependence on imported water, maintain watershed resources, and improve water supply reliability by managing the yield of the Lower SMR Basin. The DoN and Reclamation are the designated co-lead agencies for review of this project under the National Environmental Policy Act (NEPA), and FPUD is the designated lead agency for review of this project under the California Environmental Quality Act (CEQA) in the preparation of the joint EIS/EIR.

This ROD documents why the DoN has chosen to implement the preferred alternative as described in the 2016 Final EIS/EIR. The ROD includes descriptions and discussions of the anticipated environmental impacts of the proposed action as well as all practical means to avoid or minimize environmental impacts from the selected alternative. It also includes descriptions and discussions of all related actions and their anticipated impacts.

**FOR FURTHER INFORMATION CONTACT:** SMR CUP EIS Project Manager, Commanding General, Marine Corps Installations West-Marine Corps Base Camp Pendleton, CA 92055-5010, Attn: Environmental Security, 760-725-1721.
