

The Crab Rationalization Program (CRP) allocates Bering Sea and Aleutian Islands (BSAI) crab resources among harvesters, processors, and coastal communities through a limited access system that balances the interests of these groups who depend on these fisheries.

The Crab Rationalization Program Arbitration System (CRPAS) is a series of steps that harvesters and processors can use to negotiate delivery and price contracts. The Arbitration System allows unaffiliated Class A individual fishing quota holders to initiate an arbitration proceeding in the event of a dispute to allow an independent third party to provide a review of harvester and processor negotiation positions and provide an independent and binding resolution to issues under dispute. To use the arbitration system, a harvester must commit deliveries to a processor and initiate a binding arbitration proceeding in advance of the season opening. The Arbitration System is designed to minimize antitrust risks for crab harvesters and processors and is intended to ensure that a reasonable price is paid for all landings.

## II. Method of Collection

Methods of submittal include email, mail, and facsimile transmission.

## III. Data

*OMB Control Number:* 0648–0516.  
*Form Number(s):* None.

*Type of Review:* Regular submission (extension of a current information collection).

*Affected Public:* Business or other for-profit organizations; individuals or households.

*Estimated Number of Respondents:* 2.

*Estimated Time per Response:*

Combined Annual Arbitration Organization Report, 3 hours; Market Report, Nonbinding Price Formula, Contract Arbitrator Report, and Combined Shared Arbitration Accounting Report, 0 hours (completed by contractors).

*Estimated Total Annual Burden*

*Hours:* 6 hours.

*Estimated Total Annual Cost to Public:* \$157,701 in recordkeeping/reporting costs.

## IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c)

ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: July 24, 2017.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

**RIN 0648–XF498**

### Endangered and Threatened Species; Take of Anadromous Fish

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice.

**SUMMARY:** We, NMFS, announce receipt of a permit application (20571) to enhance the propagation and survival of species listed under the Endangered Species Act (ESA) of 1973, as amended, from the United States Fish and Wildlife Service (Service). Under permit application 20571, the Service is requesting to continue, for the next five years, hatchery and monitoring activities associated with the San Joaquin River Restoration Program (SJRRP) and the SJRRP's Salmon Conservation and Research Program. These activities of the SJRRP were previously permitted under permits 14868 and 17781. Under permit application 20571 the Service proposes to collect Central Valley spring-run Chinook salmon from Butte Creek to use as broodstock, which was not authorized by the previous permits. As part of this permit application, the Service has submitted an HGMP as an attachment to the application. This notice advises the public that the permit application and associated HGMP are available for review and comment, prior to a determination by NOAA's National Marine Fisheries Service (NMFS) on the issuance of the permit. The permit application, and attached HGMP, may

be viewed online at: [https://apps.nmfs.noaa.gov/preview/preview\\_open\\_for\\_comment.cfm](https://apps.nmfs.noaa.gov/preview/preview_open_for_comment.cfm).

**DATES:** Comments or requests for a public hearing on the application must be received at the appropriate address or fax number (see **ADDRESSES**) no later than 5 p.m. Pacific standard time on August 28, 2017.

**ADDRESSES:** Written comments on the application should be submitted to the California Central Valley Office, NMFS, 650 Capitol Mall, Suite 5–100, Sacramento, CA 95814. Comments may also be submitted via fax to 916–930–3629, or by email to [Jeff.Abrams@noaa.gov](mailto:Jeff.Abrams@noaa.gov) (include the permit number in the subject line of the fax or email).

**FOR FURTHER INFORMATION CONTACT:** Jeff Abrams, Sacramento, CA (ph.: 916–930–3614; Fax: 916–930–3629; email: [Jeff.Abrams@noaa.gov](mailto:Jeff.Abrams@noaa.gov)). Permit application instructions are available from the address above, or online at <https://apps.nmfs.noaa.gov>.

### SUPPLEMENTARY INFORMATION:

#### Species Covered in This Notice

The following listed species are covered in this notice:

Chinook salmon (*Oncorhynchus tshawytscha*): Threatened Central Valley (CV) spring-run.

Steelhead (*O. mykiss*): Threatened California Central Valley (CCV).

#### Authority

Enhancement permits are issued in accordance with section 10(a)(1)(A) of the ESA (16 U.S.C. 1531 *et seq.*) and regulations governing listed fish and wildlife permits (50 CFR part 222). NMFS issues permits based on findings that such permits: (1) Are applied for in good faith; (2) if granted and exercised, would not operate to the disadvantage of the listed species that are the subject of the permit; (3) are consistent with the purposes and policies of section 2 of the ESA; (4) whether the permit would further a bona fide and necessary or desirable scientific purpose or enhance the propagation or survival of the endangered species, taking into account the benefits anticipated to be derived on behalf of the endangered species; and additional issuance criteria [as listed at 50 CFR 222.308(c)(5)–(12)]. The authority to take listed species is subject to conditions set forth in the permit.

Anyone requesting a hearing on an application listed in this notice should set out the specific reasons why a hearing on that application would be appropriate (see **ADDRESSES**). Such hearings are held at the discretion of the Assistant Administrator for Fisheries, NMFS.

**Permit Application Received***Permit 20571*

The Service has applied for an enhancement permit under section 10(a)(1)(A) of the ESA for a period of five years that would allow take of multiple life stages of CV spring-run Chinook salmon and CCV steelhead. Hatchery activities included in the permit application would result in take of CV spring-run Chinook salmon only. Hatchery activities would be permitted pursuant to the draft final HGMP, which is attached to the permit application. Monitoring and in-river research activities, also included in the application, could result in take of both CV spring-run Chinook salmon and CCV steelhead.

The activities would occur under the auspices of the SJRRP and are related to the reintroduction of salmonids to the San Joaquin River (SJR). This Service has previously conducted reintroduction activities under 10(a)(1)(A) permits 14868 and 17781. Permit 14868, issued October 11, 2012, authorized collection of broodstock from Feather River Hatchery (FRFH) for the Interim Salmon Conservation and Research Facility (Interim Facility) and Salmon Conservation and Research Facility (SCARF), which is currently under construction. Permit 17781, issued March 21, 2014, authorized collections from FRFH for direct translocation to the SJR, the release of broodstock offspring and ancillary broodstock to the SJR, trap and haul of returning adults, and population monitoring activities. The Service is proposing to continue with previously authorized work in addition to some new activities to further reintroduction efforts.

Under the application for Permit 20571, proposed take activities for CV spring-run Chinook salmon include: (1) Broodstock collection, (2) broodstock rearing and spawning, (3) broodstock offspring (hatchery origin) and ancillary broodstock releases, (4) release of translocated hatchery origin juveniles, and (5) trap and haul of juveniles and returning adults. Activities also include restoration area monitoring and in-river research, which could involve take of both CV spring-run Chinook salmon and CCV steelhead.

Broodstock collections, as with all hatchery activities, would occur pursuant to the attached HGMP, and include potential collections from Butte Creek (juvenile life stage), FRFH (juvenile and/or egg life stage), or/and the SJR (adult, juvenile, and/or egg life stage). The purpose of collecting individuals from Butte Creek is to help

to create an SJRRP broodstock, and self-sustaining population, that is a robust representation of the genetic and phenotypic diversity of the species. As described in the HGMP, collection would be in accordance with the SJRRP genetic management goal to promote and protect genetic diversity within the reestablishing population while safeguarding against negative genetic effects to out-of-basin source and non-target populations. Details for collection by source and life stage, including quarantine and pathology testing protocols, are included in the permit application. Hatchery-produced fish and ancillary broodstock may be released at various life stages based on production targets, hatchery capacity, river conditions, and program needs. Population monitoring and evaluation may include adult monitoring by video, acoustic tracking, visual surveys, and redd and spawning surveys; juvenile monitoring may consist of various outmigrant traps, and fry emergence monitoring. For a more detailed discussion of the monitoring activities, please see the permit application package.

**Public Comments Solicited**

NMFS invites the public to comment on the permit application and associated HGMP during a 30 day public comment period beginning on the date of this notice. This notice is provided pursuant to section 10(c) of the ESA (16 U.S.C. 1529(c)). All comments and materials received, including names and addresses, will become part of the administrative record and may be released to the public. We provide this notice in order to allow the public, agencies, or other organizations to review and comment on these documents.

**Next Steps**

NMFS will evaluate the applications, associated documents, and comments submitted to determine whether the applications meet the requirements of section 10(a)(1)(A) of the ESA and Federal regulations. The final permit decisions will not be made until after the end of the 30-day public comment period and after NMFS has fully considered all relevant comments received. NMFS will publish notice of its final action in the **Federal Register**.

Dated: July 24, 2017.

**COMMODITY FUTURES TRADING COMMISSION****Agency Information Collection Activities Under OMB Review**

**AGENCY:** Commodity Futures Trading Commission.

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act of 1995 (“PRA”), this notice announces that the Information Collection Request (“ICR”) abstracted below has been forwarded to the Office of Management and Budget (“OMB”) for review and comment. The ICR describes the nature of the information collection and its expected costs and burden.

**DATES:** Comments must be submitted on or before August 28, 2017.

**ADDRESSES:** Comments regarding the burden estimated or any other aspect of the information collection, including suggestions for reducing the burden, may be submitted directly to the Office of Information and Regulatory Affairs (“OIRA”) in OMB, within 30 days of the notice’s publication, by either of the following methods. Please identify the comments by OMB Control No. 3038-0075.

- *By email addressed to:* [OIRASubmissions@omb.eop.gov](mailto:OIRASubmissions@omb.eop.gov); or
- *By mail addressed to:* Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the Commodity Futures Trading Commission, 725 17th Street NW., Washington, DC 20503.

A copy of all comments submitted to OIRA should be sent to the Commodity Futures Trading Commission (“CFTC” or “Commission”) by either of the following methods. The copies should refer to OMB Control No. 3038-0075.

- *By submission through the Commission’s Web site:* <http://comments.cftc.gov>. Please follow the instructions for submitting comments through the Web site;
- *By mail addressed to:* Christopher Kirkpatrick, Secretary of the Commission, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street NW., Washington, DC 20581; or
- *By hand delivery/courier to:* The address listed above for submission mail.

**FOR FURTHER INFORMATION CONTACT:**
