#### I. Background Information

The Clean Air Act (CAA or “Act”) requires the EPA to establish National Ambient Air Quality Standards (NAAQS or “standards”) for certain widespread pollutants, such as ozone, that cause or contribute to air pollution that is reasonably anticipated to endanger public health or welfare.<sup>1</sup> In 1979, we promulgated an ozone NAAQS of 0.12 parts per million (ppm), one-hour average (“1-hour ozone standard”).<sup>2</sup>

The Act, as amended in 1990, required the EPA to designate as nonattainment any ozone areas that were still designated nonattainment under the 1977 Act Amendments, and any other areas violating the 1-hour ozone standard, generally based on air quality monitoring data from the 1987 through 1989 period.<sup>3</sup> The 1990 CAA Amendments further classified these areas, based on the severity of their nonattainment problem, as Marginal, Moderate, Serious, Severe or Extreme.
