ICR status: OMB approval for this ICR expired on July 1, 2017 due to administrative error. This action is a request to reinstate OMB approval for the information collection activities outlined in this document.

Under PRA, 44 U.S.C. 3501 et seq., an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers are displayed either by publication in the Federal Register or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This information collection request covers the information collection activities associated with the containment design and residue removal requirements and containment structure requirements. With respect to the container design and residue removal requirements, the information collection activities are associated with the requirement that businesses subject to the container regulations (pesticide registrants and repackaging regulations (pesticide registrants and refillers) maintain records of test data, cleaning procedures, certain data when a container is refilled, and other supporting information. These records are subject to both call-in by EPA and on-site inspection by EPA and its representatives. EPA has not established a regular schedule for the collection of these records, and there is no reporting.

With respect to the containment structure requirements, the information collection activities are associated with the requirement that businesses subject to the containment structure regulations maintain records of the: (1) Monthly inspection and maintenance of each containment structure and all stationary bulk containers; (2) duration over which non-stationary bulk containers holding pesticide and not protected by a secondary containment unit remain at the same location; and (3) construction date of the containment structure.

The businesses subject to the containment structure regulations include agrichemical retailers and refilling establishments, custom blenders and commercial applicators of agricultural pesticides. The records have to be maintained by the owners and operators of such businesses. There is no regular schedule for the collection of either of these records, nor does EPA anticipate a call-in of records at some future date. Instead, the records would be available to inspectors to ensure that businesses are in compliance with containment requirements. These inspections are generally conducted by the states, which enforce FIFRA regulations through cooperative agreements with EPA.

Respondents/Affected Entities: Pesticide registrants and businesses who formulate pesticide products or pesticide formulation intermediates, farm supply wholesalers, swimming pool applicators, and agricultural (aerial and ground) commercial applicators.

Respondent’s Obligation To Respond: Mandatory under sections 3, 8, 19, and 25 of the Federal Insecticide and Rodenticide ACT (FIFRA) (7 U.S.C. 136f, 136q, and 136w).

Estimated Number of Respondents: 23,586.

Frequency of Response: On occasion.

Estimated Total Burden: 169,660 hours per year.

Estimated Total Cost: $7,296,308 per year.

Changes in the Estimates: There is no change in the estimated respondent burden compared with the ICR currently approved by OMB.

Authority: 44 U.S.C. 3501 et seq.

Courtney Kerwin,
Director, Regulatory Support Division.

Notification of a Public Meeting of the Clean Air Scientific Advisory Committee (CASAC) Sulfur Oxides Panel

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) Science Advisory Board (SAB) Staff Office announces a public meeting of the Clean Air Scientific Advisory Committee (CASAC) Sulfur Oxides Panel to peer review EPA’s Risk and Exposure Assessment for the Review of the Primary National Ambient Air Quality Standard for Sulfur Dioxide (External Review Draft) and Policy Assessment for the Review of the Primary National Ambient Air Quality Standard for Sulfur Dioxide (External Review Draft). The CASAC Sulfur Oxides Panel and CASAC will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies.

ADDRESSES: Location. The public meeting will be held at the Residence Inn Arlington Capital View, 2850 South Potomac Avenue, Arlington, Virginia, 22202.

FOR FURTHER INFORMATION CONTACT: Any member of the public wishing to obtain information concerning the public meeting may contact Mr. Aaron Yeow, Designated Federal Officer (DFO), EPA Science Advisory Board Staff Office (1400K), U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue NW., Washington, DC 20460; by telephone at [202] 564–2050 or at yeow.aaron@epa.gov. General information about the CASAC, as well as any updates concerning the meetings announced in this notice, may be found on the CASAC Web page at http://www.epa.gov/casac.

SUPPLEMENTARY INFORMATION: The CASAC was established pursuant to the Clean Air Act (CAA) Amendments of 1977, codified at 42 U.S.C. 7409(d)(2), to review air quality criteria and National Ambient Air Quality Standards (NAAQS) and recommend any new NAAQS and revisions of existing criteria and NAAQS as may be appropriate. The CASAC is a Federal Advisory Committee chartered under the Federal Advisory Committee Act (FACA), 5 U.S.C., App. 2. Section 109(d)(1) of the CAA requires that the Agency periodically review and revise, as appropriate, the air quality criteria and the NAAQS for the six “criteria” air pollutants, including sulfur oxides. EPA is currently reviewing the primary (health-based) NAAQS for sulfur dioxide (SO2) as an indicator for health effects caused by the presence of sulfur oxides in the ambient air. Pursuant to FACA and EPA policy, notice is hereby given that the CASAC Sulfur Oxides Panel will hold a public face-to-face meeting to review EPA’s Risk and Exposure Assessment for the Review of the Primary National Ambient Air Quality Standard for Sulfur Dioxide (External Review Draft) and Policy Assessment for the Review of the Primary National Ambient Air Quality Standard for Sulfur Dioxide (External Review Draft). The CASAC Sulfur Oxides Panel and CASAC will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies.

Clean Air Act Operating Permit Program; Petition To Object to Title V Permit for Scrubgrass Generating Company; Pennsylvania

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of final action.

SUMMARY: Pursuant to the Clean Air Act (CAA), the Environmental Protection Agency (EPA) Administrator signed an Order, dated May 12, 2017, granting a petition to object to a state operating permit issued by the Pennsylvania Department of Environmental Protection (PADEP) to the Scrubgrass Generating Company for its facility in Kennerdell, Pennsylvania. The Order responds to a May 4, 2016 petition. The petition was submitted by the Sierra Club (Petitioner). This Order constitutes final action on that petition requesting that the Administrator object to the issuance of the proposed CAA title V permit.

USERNAME: Copies of the final Order, the petition, and all pertinent information relating thereto are on file at the following location: EPA, Region III, Air Protection Division (APD), 1650 Arch St., Philadelphia, Pennsylvania 19103. EPA requests that if at all possible, you contact the individual listed in the FOR FURTHER INFORMATION CONTACT section to view copies of the final Order, petition, and other supporting information. You may view the hard copies Monday through Friday, from 9 a.m. to 3 p.m., excluding Federal holidays. If you wish to examine these documents, you should make an appointment at least 24 hours before the visiting day. The final Order is also available electronically at the following Web site: https://www.epa.gov/title-v-operating-permits/title-v-petition-database.

FOR FURTHER INFORMATION CONTACT: David Talley, Air Protection Division, EPA Region III, telephone (215) 814–2117, or by email at talley.david@epa.gov.

SUPPLEMENTARY INFORMATION: The CAA affords EPA a 45-day period to review and object to, as appropriate, operating permits proposed by state permitting authorities. Section 505(b)(2) of the CAA authorizes any person to petition the EPA Administrator within 60 days after the expiration of this review period to object to a state operating permit if EPA has not done so. Petitions must be based only on objections raised with reasonable specificity during the public comment period, unless the petitioner demonstrates that it was impracticable to raise these issues during the comment period or that the grounds for objection or other issue arose after the comment period.

The May 4, 2016 petition requested that the Administrator object to the proposed title V operating permit issued by PADEP (Petition No. 61–00181), on the grounds that the proposed permit contains a condition whereby Scrubgrass would be improperly permitted a three-year compliance extension for the hydrochloric acid/sulfur dioxide emission limit pursuant to subpart UUUUU (National Emission Standards for Hazardous Air Pollutants: Coal- and Oil-Fired Electric Utility Steam Generating Units) of 40 CFR part 63.

The Order granting the petition to object to the state operating permit to the Scrubgrass Generating Company explains the reasons behind EPA’s decision to grant the petition for objection.

Dated: May 19, 2017.

Cecil Rodrigues,
Acting Regional Administrator, Region III.
