The lease tract is located at the Center Mine and contains 2.43 million tons of in-place Federal coal resources. Due to adverse geologic conditions, BNI intends to mine approximately 1.69 million tons of coal from the tract. The tract underlies private surface and is described as follows:

Sec. 18, NE¼.

The area described contains 160 acres.

Through this notice, the BLM is inviting the public to provide comments regarding the potential environmental impacts related to the proposed action, and also to submit comments on the FMV and the MER for the proposed LBA tract. All public comments, whether written or oral, will receive consideration prior to the BLM's decision regarding the leasing of the Federal coal contained in the tract.

Public comments on the EA should address the potential environmental impacts of the proposed action. Public comments on the FMV and MER for the proposed lease tract may address, but do not have to be limited to, the following:

1. The quality and quantity of the Federal coal resource;
2. The mining method or methods to be employed to obtain the MER of the coal, including the name of the coal bed(s) to be mined, timing and rate of production, restriction of mining, and the inclusion of the tracts in an existing mining operation;
3. The price that the mined coal would bring when sold;
4. Costs, including mining and reclamation costs, of producing the coal and the anticipated timing of production;
5. The percentage rate at which anticipated income streams should be discounted, either with inflation, or in the absence of inflation, in which case the anticipated rate of inflation should be given;
6. Depreciation, depletion, amortization, and other tax accounting factors; and
7. The value of any privately held mineral or surface estate in the Center Mine area.

Any proprietary information or data that you submit to the BLM must be marked as confidential to assure the data will be treated in accordance with the applicable laws and regulations governing the confidentiality of such information or data.
