AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized in this document. EPA did not receive any comments in response to the previously provided public review opportunity issued in the **Federal Register** on January 3, 2017 (82 FR 115). With this submission, EPA is providing an additional 30 days for public review.

- To OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.

ICR status: This ICR is currently scheduled to expire on August 31, 2017. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB.

Under PRA, 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: EPA's asbestos worker protection rule is designed to provide occupational exposure protection to state and local government employees who are engaged in asbestos abatement activities in states that do not have state plans approved by the Occupational Safety and Health Administration (OSHA). The rule provides protection for public employees not covered by the OSHA standard from the adverse health effects associated with occupational exposure to asbestos. Specifically, the rule requires state and local governments to monitor employee exposure to asbestos, take action to reduce exposure to asbestos, monitor employee health and train employees about asbestos hazards.

The rule includes a number of information reporting and recordkeeping requirements. State and local government agencies are required to provide employees with information about exposures to asbestos and the

associated health effects. The rule also requires state and local governments to notify EPA before commencing any asbestos abatement project. State and local governments must maintain medical surveillance and monitoring records and training records on their employees, must establish a set of written procedures for respirator programs and must maintain procedures and records of respirator fit tests. EPA will use the information to monitor compliance with the asbestos worker protection rule. This request addresses these reporting and recordkeeping requirements.

Respondents/Affected Entities: State and local government employers in 24 states, DC, and certain U.S. Territories that have employees engaged in asbestos-related construction, custodial and brake and clutch repair activities without OSHA-approved state plans.

Respondent's obligation to respond: Mandatory (see 40 CFR 763 Subpart G). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Estimated total number of potential respondents: 23,437.

Frequency of response: On occasion.

Estimated total burden: 372,969 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Estimated total costs: \$ 15,763,007 (per year), includes no annualized capital investment or maintenance and operational costs.

Changes in the estimates: There is a net increase of 9,452 hours in the total estimated respondent burden compared with that identified in the ICR currently approved by OMB. This increase reflects an increase of 24,371 hours to account for updates made from previous ICRs to standardize methodology, and a decrease of 14,919 hours due to Maine's new status of having an OSHA-approved state plan whereby its entities are no longer covered under this ICR. This change is an adjustment.

Authority: 44 U.S.C. 3501 *et seq.*

Courtney Kerwin,

Director, Collection Strategies Division.

Abstract: The affected entities are subject to the General Provisions of the NESHAP at 40 CFR part 60, subpart A, and any changes, or additions to the Provisions specified at 40 CFR part 60, subparts KKK and LLL. Owners or operators of the affected facilities must submit a one-time-only report of any physical or operational changes, initial performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. Reports are required semiannually at a minimum.

Form Numbers: None.

Respondents/affected entities: Owners or operators of onshore natural gas processing plants.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subparts KKK and LLL).

Estimated number of respondents: 484 (total).

Frequency of response: Initially, semiannually, and occasionally.

Total estimated burden: 102,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$10,800,000 (per year), includes \$68,400 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in the estimated labor hours and number of responses as currently identified in the OMB Inventory of Approved Burdens. The decrease is due to a projected decline in the number of sources subject to the regulation, as new and modified sources will become subject to NSPS Subpart OOOO. We expect on average 27 existing facilities under Subpart KKK and 3 facilities under Subpart LLL will undergo modifications each year such
