**Abstract of Proposed Collection**

The Assistance Coordination (AC) Office, established in June 2014, coordinates United States government foreign assistance in the Middle East and North Africa region for the Department of State, and manages the implementation of all the assistance functions within the Department of State's Bureau of Near Eastern Affairs. In fiscal year 2017, the AC office expects to obligate over \$142 million to support economic development, good governance, education, democracy programs, and human rights reform in 20 countries of the Middle East and North Africa. As a normal course of business and in compliance with OMB Guidelines contained in 2 CFR 200, recipient organizations are required to provide, and the U.S. Department of State is required to collect, periodic program and financial performance reports. The responsibility of the Department to track and monitor the programmatic and financial performance necessitates a database that can help facilitate this in a consistent and standardized manner. The NEA/AC Performance Reporting System (ACPRS) enables enhanced monitoring and

evaluation of grants through standardized collection and storage of relevant award elements, such as quarterly progress reports, workplans, results monitoring plans, grant agreements, and other business information related to AC implementers. The ACPRS streamlines communication with implementers and allows for rapid identification of information gaps for specific projects. With the introduction of a results monitoring module within SAMS Domestic in April 2018, NEA/AC will exclusively use SAMS Domestic to track and monitor programmatic and financial performance of awards and phase out ACPRS.

**Methodology**

Information will be electronically entered into ACPRS, and later SAMS Domestic, by respondents.

**SUPPLEMENTARY INFORMATION:**

*Title:* *Local Public Agencies Training and Technical Assistance Needs Assessment Background:* The Federal Highway Administration (FHWA) is charged with implementing a local technical assistance program under 23 U.S.C. 504 (b). Congress recognized that training and technical assistance to the

local public agencies (LPA) to provide access to surface transportation technology, technical assistance and training was necessary and created the Rural Technical Assistance Program (RTAP) in 1982. In 1991, through the Intermodal Surface Transportation Efficiency Act (ISTEA) legislation, this program became the Local Technical Assistance Program (LTAP). There is an LTAP Center in every State and PR/USVI—51 total. The program has launched a strategic planning process and a lack of data directly linking training to improvements in program delivery and innovation deployment outcomes posed a challenge to the Agency.

A needs assessment survey will help inform and identify what areas of knowledge that training needs to accomplish within the local agency community. The results of the assessment will help direct resources to the areas of greatest demand. The survey will be conducted once over a 30 day period. These are surveys to collect training related information and there are no sensitive or personal questions, therefore confidentiality is not guaranteed or necessary.

*Respondents:* Local Public Agency Public Works Directors and Road Superintendents.

*Frequency:* This is a one-time collection.

*Estimated Average Burden per Response:* Approximately 7,800 responses who will each require an average of 15 minutes to respond.

*Estimated Total Annual Burden Hours:* The total annual public burden hours for this information collection is estimated to be 1,950 hours.

**Authority:** The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Issued on: August 22, 2017.
