the amount submitted for payment is less than the amount billed, VA will accept the submission as payment, subject to verification at VA’s discretion. A VA employee having responsibility for collection of such charges may request that the third party payer submit evidence or information to substantiate the appropriateness of the payment amount (e.g., health plan policies, provider agreements, medical evidence, proof of payment to other providers demonstrating the amount paid for the same care and services VA provided). This information would be needed to determine whether the third-party payer has met the test of properly demonstrating its equivalent private sector provider payment amount for the same care or services within the same geographic area as provided by VA. This form provides for requesting patient medical records, health plan policies, provider agreements and any type or records that provide evidence of medical services and proof of payments made to others for the same medical care and services.

If VA accepts the submitted payment that is less than the billed charges, the third party payer can be subject to rate verification. In the event that rate verification is conducted, the results can be used to negotiate better rates, recoup underpayments, or amend agreements. Absent a third party payer agreement, VA should also be reimbursed billed charges or the amount third party payers would pay to non-government entities.
