

reasoning supporting the exemptions from the 30-minute break time rule and allowing a 14-hour daily on duty-period for drivers of ready-mixed concrete vehicles applies to drivers engaged in the transportation of asphalt and related materials and equipment. Both are perishable products that are not useable if they are not dropped and spread within a brief delivery window. Because of this short delivery window, the routes from the production facility to the delivery site for both products are limited to less than 40 miles, and the time spent actually driving a CMV is typically only a few hours per day. Thus in both cases, the drivers do not face the same fatigue factors as drivers of long-haul trucks, and therefore do not pose the same risk of a fatigue-related accident as long-haul drivers.”

NAPA requests that the operation of certain vehicles and equipment (Water Truck, Tack (tar) Distributor, Equipment Hauler and Pick-Sweeper (Street Sweeper)) be included in the definition of “transportation of asphalt and related materials and equipment” for purposes of these exemptions.

NAPA states in its application that drivers would remain subject to the HOS regulations and would receive sufficient rest due to the nature of their operations that limit driving to an average of six to seven hours per day or less during the paving season. NAPA believes that granting these exemptions would achieve the same level of safety provided by the two HOS rules. The requested exemptions are for 5 years with renewals. A copy of NAPA’s application for exemptions is available for review in the docket for this notice.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2017-0076]

Petition for Waiver of Compliance

Under Part 211 of Title 49 of the Code of Federal Regulations (CFR), this document provides the public notice that on July 24, 2017 the New York Susquehanna & Western Technical & Historical Society (THSX) petitioned the Federal Railroad Administration (FRA)

for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at Title 49 Code of Federal Regulations Part 230—*Steam Locomotive Inspection and Maintenance Standards*. FRA assigned the petition docket number FRA-2017-0076.

THSX maintains and operates No. 142, a 2-8-2 “Mikado” type steam locomotive built in 1989 by the Tangshan Locomotive Works in China for the New York, Susquehanna & Western Railroad. THSX requests relief from performing the 1472 service day inspection (SDI), for No. 142, regarding inspection of the boiler every 15 calendar years or 1472 service days. This is required under CFR 49 Section 230.17—*One thousand four hundred seventy-two (1472) service day inspection*. THSX is requesting an additional 58 calendar days before performing a 1472 SDI. The previous SDI was performed on September 2, 2002. Granting relief will allow No. 142 an SDI period of 15 calendar years and 58 calendar days while not exceeding 1472 service days.

No. 142 is operated by THSX on Belvedere & Delaware Railroad for weekly tourist service. THSX’s justification for requesting relief is that No. 142 has only operated for a total 640 service days within the 15-calendar year period. The extension will allow No. 142 to operate through their busiest tourist season. THSX anticipates approximately 18 additional service days during the requested time extension.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov and in person at the Department of Transportation’s Docket Operations Facility, 1200 New Jersey Ave. SE., W12-140, Washington, DC 20590.
