

Species Protection Plan (Final SPP) to help protect Gulf of Maine Distinct Population Segment Atlantic salmon, which are listed as endangered under the Endangered Species Act (ESA). Under the Final SPP, the licensee would build upon monitoring, evaluation and protection work performed under its Interim SPP, which was approved in an order issued November 28, 2012. Work under the Final SPP would include monitoring Atlantic salmon movement through the project's existing upstream and downstream fish passage facilities, conducting a downstream passage effectiveness study in 2018, and conducting an upstream passage effectiveness study if certain trigger conditions are met. Under the Final SPP, the licensee would continue existing measures to minimize and avoid take of Atlantic salmon, and participate in mapping of nearby salmon habitat. The licensee would also explore opportunities to increase access to upstream salmon habitat, based on the results of the 2018 downstream passage study. On August 30, 2017, pursuant to section 7 of the ESA, the National Marine Fisheries Service filed a Biological Opinion for the licensee's Final SPP.
