electronically in machine-readable format. PDF images created by scanning a paper document may not be submitted, except in cases in which a word-processing version of the document is not available.

Confidential information may continue to be submitted by paper filing, but a redacted version must be filed electronically at the same time the paper filing is submitted. An exception to the electronic filing requirement will be made in cases in which the filing party claims hardship. The basis for the hardship claim must be substantiated in the ex parte filing; (9) To facilitate stricter enforcement of the ex parte rules, the Enforcement Bureau is authorized to levy forfeitures for ex parte rule violations; (10) Copies of electronically filed ex parte notices must also be sent electronically to all staff and Commissioners present at the ex parte meeting so as to enable them to review the notices for accuracy and completeness. Filers may be asked to submit corrections or further information as necessary for compliance with the rules; and (11) Parties making permissible ex parte presentations in restricted proceedings must conform and clarify rule changes when filing an ex parte notice with the Commission.

The information is used by parties to permit-but-disclose proceedings, including interested members of the public, to respond to the arguments made and data offered in the presentations. The responses may then be used by the Commission in its decision-making.

The availability of the ex parte materials ensures that the Commission’s decisional processes are fair, impartial, and comport with the concept of due process in that all interested parties can know of and respond to the arguments made to the decision-making officials.

Licensees file surrenders of authorizations with the Commission on a voluntary basis. This information is used by Commission staff to issue Public Notices to announce the surrenders of authorization to the general public. The Commission’s release of Public Notices is critical to keeping the general public abreast of the licensees’ discontinuance of telecommunications services.

Without this collection of information, licensees would be required to submit surrenders of authorizations to the Commission by letter which is more time consuming than submitting such requests to the Commission electronically. In addition, Commission staff would spend an extensive amount of time processing surrenders of authorizations received by
letter. The collection of information saves time for both licensees and Commission staff since they are received in IBFS electronically and include only the information that is essential to process the requests in a timely manner. Furthermore, the E-filing module expedites the Commission staff’s announcement of surrenders of authorizations via Public Notice.
