SUPPLEMENTARY INFORMATION:

I. Background

NASA is proposing to revise the NFS to implement revisions to the voucher submittal and payment process. These revisions are necessary in order for NASA to comply with the Office of Management and Budget (OMB) issued Memorandum M–15–19, which directed federal agencies to transition to electronic invoicing for appropriate federal procurements by the end of fiscal year 2018. In Fiscal Year 2016, NASA revised their voucher submission and payment process to electronically process cost type vouchers under cost-reimbursement type contracts. As part of NASA’s goal to have all contract payments processed electronically by 2018, this proposed rule revises NASA’s submission and payment process to have invoices for fixed price contracts submitted electronically.

II. Discussion

Sections of the NFS are being revised to implement changes to NASA’s voucher and invoice submission and payment process. Specifically, NASA is proposing the following changes:

- Revise the clause prescription at 1816.506–70(b) and associated clause at 1852.216–80(i) to require contractors to submit task order progress reports for all contract types.
- Revise clause prescription at 1832.908–70 to include invoices.
- Add alternate clause at 1852.232–80(i).
- Revise clause at 1852.232–80(c)(2) to list relevant back-up documentation required to be submitted with invoices and fee vouchers in order for the contracting officers to review and approve them.

III. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

IV. Regulatory Flexibility Act

NASA does not expect this rulemaking to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the guidance will not create additional burden to the contractor but rather the rulemaking is intended to update the current voucher and invoice submission process at NASA resulting in fewer voucher/invoice rejections, rework, and payment delays. However, an initial regulatory flexibility analysis has been performed and is summarized as follows:

NASA is proposing to revise the NFS to implement revisions to the voucher and invoice submittal and payment process. These revisions are necessary in order for NASA to comply with Office of Management and Budget (OMB) Memorandum M–15–19, which directed federal agencies to transition to electronic invoicing for appropriate federal procurements by the end of fiscal year 2018.

The objective of this rulemaking is to remove the outdated NFS payment clause and associated prescription relative to the NASA voucher and invoice submittal and payment process and replace with a new clause that will revamp NASA’s voucher and invoice submission and payment process to ensure the continued prompt payment to its suppliers. The revision will also minimize cost voucher and invoice submission and payment delays to NASA suppliers as well the potential accrual of Government interest payments to contractors.

This proposed rule would apply to contractor requests for payment under all contract types. An analysis of data in the Federal Procurement Data System (FPDS) revealed that cost reimbursement and fixed priced contracts are primarily awarded to small businesses. FPDS data compiled over the past three fiscal years (FY2014 through FY2016) showed an average of 76,675 NASA contract actions, of which 45,011 (approximately 59%) were awarded to small businesses. However, there is no significant economic or administrative cost impact to small or large businesses because fee vouchers and invoices previously processed manually will be processed electronically. NASA anticipates that the rulemaking will have a positive benefit in the way of fewer voucher rejections, rework, and payment delays. In FY16, NASA processed approximately 55,000 vendor payment requests (invoice/voucher), which are

currently received by various means (70% by email, 15% by mail, 2% by fax, 13% by an electronic secure file transfer). NASA's current payment request process for fee vouchers and invoices requires manual intervention at almost every step in the process. Manual intervention decreases speed and accuracy and adds to the cost per invoice/voucher. This rulemaking will further automate the processing of contract payments thus reducing processing delays, input errors, rework, interest penalties, which all add to the cost to process each invoice and voucher. The proposed rule does not contain additional reporting requirements, recordkeeping, or other compliance requirements.

The proposed rule does not duplicate, overlap, or conflict with any other Federal rules. No alternative approaches were considered, because this approach will have minimal impact on small entities.

NASA invites comments from small business concerns and other interested parties on the expected impact of this rulemaking on small entities. NASA will also consider comments from small entities concerning the existing regulations in subparts affected by this proposed rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610 (NFS Case 2017-N014), in correspondence.

V. Paperwork Reduction Act

The proposed rule contains information collection requirements that require the approval of the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. chapter 35; however, these changes to the NFS do not impose additional information collection requirements to the paperwork burden previously approved under OMB Control Number 9000-0070, entitled Payments—FAR Sections Affected: 52.232-1 thru 52.232-4 and 52.232-6 thru 52.232-11.
