This study will examine the accuracy of district verification procedures.

Need and Use of the Information: Collecting this data will help FNS to understand the approaches districts take to verify, understand the accuracy of the verification process and the results it produces in the context of potential changes, and help to identify potential improvements to the verification process.

Drinking water and wastewater systems are basic and vital to both health and economic development. RUS supports the sound development of rural communities and the growth of our economy without endangering the environment. RUS provides financial and technical assistance to help communities bring safe drinking water and sanitary, environmentally sound waste disposal facilities to rural Americans in greatest need.

I. Funding Opportunity

Drinking water and sewer systems are basic and vital to public health, the environment and economic development. Hurricanes, floods, forest fires and other natural disasters have severely damaged water systems in multiple states. Without dependable water supply, rural communities in these states will not attract families and businesses to return and invest in rural disaster damaged communities.

The Rural Utilities Service (RUS) supports rural prosperity, quality of life, economic development and stewardship of the environment. RUS provides financial and technical assistance to help communities bring safe drinking water and sanitary, environmentally sound waste disposal facilities to rural Americans in greatest need.

The additional funding made available under this notice for TAT/DR grants will allow rural communities to rebuild water and sewer infrastructure damaged by recent disasters and enhance the security of the RUS loan portfolio. Qualified private, non-profit organizations with expertise and a record of experience in providing technical assistance and training to RUS eligible water and sewer utilities may apply to receive a grant to provide technical assistance to RUS eligible water and sewer utilities in areas covered by a Presidential disaster declaration on or after the date of this notice. Grants are for disaster recovery related technical assistance, including such services as helping eligible rural water and sewer utilities complete Federal Emergency Management Administration (FEMA) claims, and file insurance recovery claims, address and cure outstanding delinquencies, and assisting new and returning RUS applicants prepare applications for water and waste disposal loans and grants as needed.

A. RUS will rank all qualifying applications by their final score. Applications will be selected for funding based on the highest scores. No grant will exceed $600,000. The agency expects to award a small number of grants under this notice. The agency reserves the right to make no grant awards if all applications are incomplete and/or score below 65 points.    1. Eligible and selected for funding;
   2. Eligible and offered fewer funds than requested;
   3. Eligible but not selected for funding; or

The Administrator’s decision shall be final and non-reviewable by the National Appeals Division.

D. Applicants selected for funding will complete a grant agreement suitable to RUS, which outlines the terms and conditions of the grant award. Pursuant to the grant agreement, grant funds may be released over the course of the grant period in reimbursement for the performance of eligible, approved activities which do not duplicate similar federal efforts or tasks. The grant agreement may also include reporting and pre-approval requirements consistent with 7 CFR part 1775 which if not met, may result in a delay in reimbursement, disallowance of expense or a suspension of the grant.

E. Grantees will be reimbursed as follows:
   1. SF–270, “Request for Advance or Reimbursement,” will be completed by the grantee and submitted to either the State or National Office not more frequently than monthly.
   2. Upon receipt of a properly completed SF–270, payment will ordinarily be made within 30 days.

F. Any change in the scope of the project, budget adjustments of more than 10 percent of the total budget, or any other significant change in the project must be reported to and approved by the approval official by written amendment to the Grant Agreement. Any change not approved may be cause for termination of the grant.
G. Project reporting.
   1. Grantees shall constantly monitor performance to ensure that time schedules are being met, projected work by time periods is being accomplished, and other performance objectives are being achieved.
   2. SF–269, "Financial Status Report (short form)," and a project performance activity report will be required of all grantees on a quarterly basis, due 30 days after the end of each quarter.
   3. A final project performance report will be required with the last SF–269 due 90 days after the end of the last quarter in which the project is completed. The final report may serve as the last quarterly report.
   4. All grantees are to submit an original of each report to the National Office. The project performance reports should detail, in a narrative format, activities that have transpired for the specific time period.

H. The grantee will provide an audit report or financial statements in accordance with Uniform Audit Requirements for Federal Awards at 2 CFR part 200, subpart F.
