

Activity for Which Permit is Requested: Waste Management. The applicant proposes to operate a small, battery-operated remotely piloted aircraft system (RPAS) consisting, in part, of a quadcopter equipped with a camera to collect commercial and educational footage of the Antarctic, as well as for ice reconnaissance. The quadcopter would not be flown over concentrations of birds or mammals, or over Antarctic Specially Protected Areas. The RPAS would only be operated by pilots with extensive experience (≤ 20 hours), who are pre-approved by the Expedition Leader. Several Measures would be taken to prevent against loss of the quadcopter including a highly visible paint color; only operating when the wind is less than 25 knots; operating for only 15 minutes at a time to preserve battery life; having prop guards on propeller tips; using a flotation device if operated over water; a “fail-safe and auto go home” feature in the case of a loss of control link or low battery; having an observer on the lookout for wildlife, people, and other hazards; and ensuring that the separation between the operator and quadcopter does not exceed an operational range of 500 meters. The applicant is seeking a Waste Permit to cover any accidental releases that may result from operating the RPAS.

Location: Antarctic Peninsula Region.

Dates: November 1, 2017–March 31, 2018.
