

appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2017 sculpins ITAC in the BSAI is 3,825 metric tons (mt) as established by the final 2017 and 2018 harvest specifications for groundfish in the BSAI (82 FR 11826, February 27, 2017). In accordance with § 679.20(d)(2), the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that the 2017 sculpins ITAC in the BSAI has been reached. Therefore, NMFS is requiring that sculpins caught in the BSAI be treated as prohibited species in accordance with § 679.21(b).

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay prohibiting retention of sculpins in the BSAI. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as September 28, 2017.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and § 679.21 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: October 6, 2017.

Emily H. Menashes,

Acting Director Office of Sustainable Fisheries, National Marine Fisheries Service.

Fisheries of the Exclusive Economic Zone Off Alaska; Other Rockfish in the Aleutian Islands Subarea of the Bering Sea and Aleutian Islands Management Area

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting retention of “other rockfish” in the Aleutian Islands subarea of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary because the 2017 “other rockfish” total allowable catch (TAC) in the Aleutian Islands subarea of the BSAI has been reached.

DATES: Effective 1200 hrs, Alaska local time (A.l.t.), October 6, 2017, through 2400 hrs, A.l.t., December 31, 2017.

FOR FURTHER INFORMATION CONTACT: Josh Keaton, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the BSAI according to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The 2017 “other rockfish” TAC in the Aleutian Islands subarea of the BSAI is 550 metric tons (mt) as established by the final 2017 and 2018 harvest specifications for groundfish in the BSAI (82 FR 11826; February 27, 2017).

In accordance with § 679.20(d)(2), the Administrator, Alaska Region, NMFS (Regional Administrator), has determined that the 2017 “other rockfish” TAC in the Aleutian Islands subarea of the BSAI has been reached. Therefore, NMFS is requiring that “other rockfish” caught in the Aleutian Islands subarea of the BSAI be treated as prohibited species in accordance with § 679.21(b) and be discarded at sea with a minimum of injury. “Other

rockfish” includes all *Sebastes* and *Sebastolobus* species except for Pacific ocean perch, northern rockfish, shortraker rockfish, and rougheye rockfish.

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would delay prohibiting retention of “other rockfish” in the Aleutian Islands subarea of the BSAI. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as September 28, 2017.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and § 679.21 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

RIN 0648-XF725

Fisheries of the Exclusive Economic Zone Off Alaska; Inseason Adjustment to the 2017 Gulf of Alaska Pollock Seasonal Apportionments

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason adjustment.

SUMMARY: NMFS is adjusting the 2017 D seasonal apportionments of the total allowable catch (TAC) for pollock in the Gulf of Alaska (GOA) by re-apportioning unharvested pollock TAC in Statistical Areas 610, 620, and 630 of the GOA. This action is necessary to provide opportunity for harvest of the 2017 pollock TAC, consistent with the goals and objectives of the Fishery Management Plan for Groundfish of the Gulf of Alaska.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), October 6, 2017, until 2400 hours A.l.t., December 31, 2017.

FOR FURTHER INFORMATION CONTACT: Josh Keaton, 907-586-7228.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council (Council) under authority of the Magnuson-Stevens Fishery Conservation and Management Act. Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR part 600 and 50 CFR part 679.

The annual pollock TACs in Statistical Areas 610, 620, and 630 of the GOA are apportioned among four seasons, in accordance with § 679.23(d)(2). Regulations at § 679.20(a)(5)(iv)(B) allow the underharvest of a seasonal apportionment to be added to subsequent seasonal apportionments, provided that any revised seasonal apportionment does not exceed 20 percent of the seasonal apportionment for a given statistical area. Therefore, NMFS is increasing the D season apportionment of pollock in Statistical Areas 610, 620, and 630 of the GOA to reflect the underharvest of pollock in those areas during the C season. In addition, any underharvest remaining beyond 20 percent of the originally specified seasonal apportionment in a particular area may be further

apportioned to other statistical areas. Therefore, NMFS also is increasing the D season apportionment of pollock to Statistical Areas 610 and 630 based on the underharvest of pollock in Statistical Areas 620 of the GOA. These adjustments are described below.

The D seasonal apportionment of the 2017 pollock TAC in Statistical Area 610 of the GOA is 19,569 metric tons (mt) as established by the final 2017 and 2018 harvest specifications for groundfish of the GOA (82 FR 12032; February 27, 2017). In accordance with § 679.20(a)(5)(iv)(B), the Administrator, Alaska Region, NMFS (Regional Administrator), hereby increases the D season apportionment for Statistical Area 610 by 653 mt to account for the overharvest of the TAC in Statistical Area 610 and the underharvest of the TAC in Statistical Area 620 in the C season. This increase is in proportion to the estimated pollock biomass and is not greater than 20 percent of the D seasonal apportionment of the TAC in Statistical Area 610. Therefore, the revised D seasonal apportionment of the pollock TAC in Statistical Area 610 is 20,222 mt (19,569 mt plus 653 mt).

The D seasonal apportionment of the pollock TAC in Statistical Area 620 of the GOA is 12,341 mt as established by the final 2017 and 2018 harvest specifications for groundfish of the GOA (82 FR 12032; February 27, 2017). In accordance with § 679.20(a)(5)(iv)(B), the Regional Administrator hereby increases the D seasonal apportionment for Statistical Area 620 by 2,468 mt to account for the underharvest of the TAC in Statistical Areas 620 in the C season. This increase is not greater than 20 percent of the D seasonal apportionment of the TAC in Statistical Area 620. Therefore, the revised D seasonal apportionment of the pollock TAC in Statistical Area 620 is 14,809 mt (12,341 mt plus 2,468 mt).

The D seasonal apportionment of pollock TAC in Statistical Area 630 of the GOA is 15,886 mt as established by the final 2017 and 2018 harvest specifications for groundfish of the GOA (82 FR 12032; February 27, 2017). In accordance with § 679.20(a)(5)(iv)(B),

the Regional Administrator hereby increases the D seasonal apportionment for Statistical Area 630 by 2,435 mt to account for the underharvest of the TAC in Statistical Areas 620 and 630 in the C season. This increase is in proportion to the estimated pollock biomass and is not greater than 20 percent of the D seasonal apportionment of the TAC in Statistical Area 630. Therefore, the revised D seasonal apportionment of pollock TAC in Statistical Area 630 is 18,321 mt (15,886 mt plus 2,435 mt).

Classification

This action responds to the best available information recently obtained from the fishery. The Assistant Administrator for Fisheries, NOAA (AA), finds good cause to waive the requirement to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B) as such requirement is impracticable and contrary to the public interest. This requirement is impracticable and contrary to the public interest as it would prevent NMFS from responding to the most recent fisheries data in a timely fashion and would provide opportunity to harvest increased pollock seasonal apportionments. NMFS was unable to publish a notice providing time for public comment because the most recent, relevant data only became available as of October 1, 2017.

The AA also finds good cause to waive the 30-day delay in the effective date of this action under 5 U.S.C. 553(d)(3). This finding is based upon the reasons provided above for waiver of prior notice and opportunity for public comment.

This action is required by § 679.20 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*
