## II. Information Specific to the Documents

Two sections of the Clean Air Act (CAA) govern the establishment and revision of the national ambient air quality standards (NAAQS). Section 108 (42 U.S.C. 7408) directs the Administrator to identify and list certain air pollutants and then to issue air quality criteria for those pollutants. The Administrator is to list those air pollutants that in his “judgment, cause or contribute to air pollution which may reasonably be anticipated to endanger public health or welfare”; “the presence of which in the ambient air results from numerous or diverse mobile or stationary sources”; and “for which . . . [the Administrator] plans to issue air quality criteria . . .” (42 U.S.C. 7408(a)(1)(A)–(C)). Air quality criteria are intended to “accurately reflect the latest scientific knowledge useful in indicating the kind and extent of all identifiable effects on public health or welfare which may be expected from the presence of [a] pollutant in the ambient air . . .” (42 U.S.C. 7408(a)(2)). Under section 109 (42 U.S.C. 7409), the EPA establishes primary (health-based) and

secondary (welfare-based) NAAQS for pollutants for which air quality criteria are issued. Section 109(d) requires periodic review and, if appropriate, revision of existing air quality criteria. The revised air quality criteria reflect advances in scientific knowledge on the effects of the pollutant on public health or welfare. The EPA is also required to periodically review and revise the NAAQS, if appropriate, based on the revised criteria. Section 109(d)(2) requires that an independent scientific review committee “shall complete a review of the criteria . . . and the national primary and secondary ambient air quality standards . . . and shall recommend to the Administrator any new . . . standards and revisions of the existing criteria and standards as may be appropriate . . .” Since the early 1980s, this independent review function has been performed by the Clean Air Scientific Advisory Committee (CASAC).

Presently, the EPA is reviewing the air quality criteria and primary NAAQS for sulfur oxides.<sup>1</sup> The EPA’s overall plan for this review is presented in the *Integrated Review Plan for the Primary NAAQS for Sulfur Dioxide* (IRP). The EPA is currently working to finalize the *Integrated Science Assessment for Sulfur Oxides—Health Criteria* (ISA), the second draft of which was reviewed by the CASAC at a public meeting in March 2017 (82 FR 11449). The *Risk and Exposure Assessment Planning Document for the Review of the Primary National Ambient Air Quality Standards for Sulfur Oxides* (REA Planning Document) was also reviewed by the CASAC at this meeting (82 FR 11449). The draft REA and draft PA, which build on information presented in these documents, were the subject of review by the CASAC at a public meeting on September 18–19, 2017 (82 FR 37213). The EPA will consider comments received from the CASAC and the public in preparing revisions to these documents. The draft REA and PA documents, and other documents in this review, referenced above, are available on the EPA’s Technology Transfer Network Web site at <https://www.epa.gov/naaqs/sulfur-dioxide-so2-primary-air-quality-standards>.

The notice of availability for the draft REA and draft PA was originally published on September 19, 2017, with the public comment period closing on October 18, 2017 (82 FR 43756). We received a request from a member of the public to extend the comment period by 30 days. After considering this request,

<sup>1</sup> The indicator for the current standard is sulfur dioxide.

we are extending the comment period and, as described above, it will now close on November 17, 2017.

Dated: October 11, 2017.

The Commission provides broadcast licensees and commercial mobile radio service (CMRS) licensees with a "true-up" opportunity to update or otherwise correct their assessed fee amounts well before the actual due date for payment of regulatory fees. Providing a "true-up" opportunity is necessary because the data sources that are used to generate the fee assessments are subject to change at time of transfer or assignment of the license. The "true-up" is also an opportunity for regulatees to correct inaccuracies.

Per 47 CFR 1.1119 and 1.1166, the FCC may, upon a properly submitted written request, waive or defer collection of an application fee or waive, reduce, or defer payment of a regulatory fee in a specific instance for good cause shown where such action would promote the public interest. When submitting the request, no specific form is required.

FCC requires that when licensees or regulatees request exemption from regulatory fees based on their non-profit status, they must file a one-time documentation sufficient to establish their non-profit status. The

documentation may take the form of an IRS Determination Letter, a state charter indicating non-profit status, proof of church affiliation indicating tax exempt status, etc.
