DATES: Written, telefaxed, or email comments must be received on or before February 16, 2017.

ADDRESSES: The application and related documents are available for review by selecting “Records Open for Public Comment” from the “Features” box on the Applications and Permits for Protected Species (APPs) home page, https://apps.nmfs.noaa.gov, and then selecting File No. 19508 from the list of available applications.

These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427–8401; fax (301) 713–0376.

Written comments on this application should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301) 713–0376, or by email to NMFS.Pr1Comments@noaa.gov. Please include the File No. in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Carrie Hubard or Amy Hapeman, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

The subject permit is requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 et seq.) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222–226).

The applicant requests a five-year permit to examine patterns and trends in the abundance, distribution, movements, foraging ecology, and population structure of sea turtles. Research would occur in three study areas: (1) Indian River Lagoon, Florida; (2) Trident Turning Basin, Cape Canaveral, Florida; and (3) Northern and Eastern Gulf of Mexico, which includes waters up to 120 miles offshore from Louisiana to Western Florida. Researchers would capture sea turtles by tangle net, dip net, or by hand; annual requested take numbers per species vary by year and project. Sea turtles would have the following procedures performed before release: Measure, flipper tag, passive integrated transponder tag, gastric lavage, and scute, blood, focal, and tissue sampling. A subset of animals would receive an epoxy-attached transmitter before release.

Julia Harrison, Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

FOR FURTHER INFORMATION CONTACT: Jim Armstrong, Council staff; telephone: (907) 271–2809.

SUPPLEMENTARY INFORMATION:

Agenda

Wednesday, February 22, 2017

The agenda includes updating the status of the Statewide Scallops Stocks and Stock Assessment and Fishery Evaluation (SAFE) compilation, update on monitoring ocean acidification and its potential effect on the scallop stocks, update on new scallop assessment programs and a review of research priorities. The Agenda is subject to change, and the latest version will be posted at http://www.npfmc.org/

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Shannon Gleason at (907) 271–2809 at least 7 working days prior to the meeting date.

Jeffrey N. Lonergan, Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Atlantic Highly Migratory Species; Exempted Fishing Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt of an application for an exempted fishing permit; availability of a draft environmental assessment; request for comments.

SUMMARY: NMFS announces the receipt of an application for an exempted fishing permit (EFP) from Dr. David Kerstetter of Nova Southeastern University to evaluate pelagic longline (PLL) catch and bycatch rates from within two different sub-areas in the northern portion of the East Florida Coast Pelagic Longline (PLL) Closed Area (north and south of 29°50’ N. lat.) and compare those rates to rates obtained by authorized samplers from outside the EFC PLL Closed Area and the availability of a draft Environmental Assessment (EA) analyzing the impacts of granting the application to conduct the research using commercial PLL vessels, with certain terms and conditions. The overall purpose of the research project would be to evaluate PLL catches and catch rates of target and non-target species within a portion of the EFC PLL Closed Area to evaluate the effectiveness of existing area closures at meeting current conservation and management goals under current conditions using standardized PLL gear on a specified number of commercial vessels.

DATES: Written comments on the issuance of the EFP or on the draft EA will be considered by NMFS and must be received on or before February 16, 2017.

ADDRESSES: Comments may be submitted by any of the following methods:

• Email: nmfs.hms.pllefp@noaa.gov. Include in the subject line the following identifier: 0648–XF086.
